In the middle of the night I got the feeling that you may be right, that I did do a summary of the existing literature review (that Job, you approved). I'll have to look for it on Monday (unless I go into the office over the weekend, which is possible). I may be hallucinating, but if not, I'll just present it at the meeting rather than try to get it to them ahead of time. Tova

Hi Peg,

Just wondering if you had any word from Rokita. Also, I wanted to let you know that I think disinviting members of the working group would be a very unwise and frankly embarrassing way of dealing with the
problem of getting 100% attendance. I'm sure we'll talk before any decisions are made. As I said, I'm free on Monday. Thanks. Tova

Cindy --

Can you please check the accuracy of these figures - - which you recall we gave to the EAC a month or so ago - - to endure that they are up-to-date?

I believe we have had several public events that have taken place since we gave them the Public Fraud List a few weeks ago.

Peggy:

Please add this to the packet.
The teleconference is on. However, I am still one person down for the meeting and I am not comfortable. This will have to be discussed since from the start it was agreed that the WG would be equal and if I lost a person Tova would have to lose one. Further and most importantly, I don't yet have a hotel so my attendance is still up in the air. Finally, the agenda is not what we discussed and gives far too much time for areas that can be covered in a short time. Not listed are all of the questions that Tova's proposed agenda had. All in all, it needs to be redone.

To: psims@eac.gov;  
Subject: Re: Working group

Peggy:

4:00 eastern on Tuesday is fine however, given the financial restrictions that you indicated would be in place for use of my car (I would actually loose money coming to DC) and given the cost of hotels at this time (I can't afford to front these costs and wait for months to be repaid), etc. it would take a miracle for this working group meeting to take place in person. It is looking like the only way it will get done is by teleconference. I also share Tova's concern about the unknown nature of Mr. Perez.

Job

--- psims@eac.gov wrote:

> Hi, Folks:
> 
> Teleconference
> Are both of you available for a teleconference next Tuesday afternoon at about 4 PM EST? If this does not work for you, please suggest another date and/or time. I would like to discuss our preparations for the Working Group meeting.
> 
> Working Group Members
> We have a very good person to fill the slot for the nonpartisan local election official: J.R. Perez, Elections Administrator for Guadalupe County, TX. Attached is his bio. Hope you have no objections to him. He is available on May 18. I have place 2 calls to Pat Rogers office, but have not yet received a reply. Job, if you have any pull with him, you may want to contact him, too.
> 
> Travel Arrangements
> You should make your own travel arrangements, including hotel. Travel time cannot be billed to the contract, except for hours actually worked on the contract (i.e.; reviewing materials in preparation for the meeting, and the like). Current Federal rates follow:
Maximum Lodging = $180 per day - does not include hotel taxes (if you cannot get this rate, we have covered reasonable rates that are a little higher)
Meals & Incidentals = $64 per day (except that it is $48 on the first and last day of travel)
Mileage for Personally Owned Vehicle = $0.445 per mile

Under the new contract, I do not have to fill out a travel authorization. I can approve your trip via email. Afterwords, when you turn in your next pay voucher, you can attach the airline receipt (or mileage documentation), hotel receipt(s), and ground transportation receipts and a copy of any printed itineraries. Calculate the total travel expenses due you, including applicable per diem. I do not need meal receipts.

Job, under Federal travel regulations, deviations for personal reasons are not normally accommodated. What you can do, however, is to give me a comparison of the cost of roundtrip mileage, hotel, and per diem of doing it your way against the cost of a roundtrip flight, ground transportation, hotel, and per diem. If your way costs less, it should be no problem to cover the full cost. If your way is more expensive, we may only pay up to the amount of traditional travel. (The same rules apply to me when I travel.) If you can tell me where, other than DC, you will spend the night, I can check on applicable per diem rates.

Dear Mr. Ginsberg:

This is to confirm my call to your office this morning inviting you to be a member of and attend the upcoming meeting of the U.S. Election Assistance Commission’s (EAC) Working Group on Voting Fraud-Voter Intimidation. The meeting is scheduled to take place from 1:00 PM to 5:30 PM on Thursday, May 18th, 2006 at the offices of the U.S. Election Assistance Commission (EAC), 1225 New York Avenue, NW, 11th Floor, Washington, DC.

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute are the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- methods of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC’s Board of Advisors recommended that the agency make research on these matters a high priority. Subsequently, the Commission contracted with two consultants (Job Serebrov and Tova Wang) to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation, and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

We strive to include bipartisan representation on the Working Group associated with this project. You were recommended for this project by our Republican consultant, Job Serebrov. Your ideas for possible EAC activities related to this topic will help the agency as it plans future actions to meet its HAVA responsibilities.

If you can find the time in your busy schedule to participate, I will have an information packet delivered to your office by COB, Monday, May 15. Please let me know if you are available. Thank you.

Regards,

Peggy Sims

OK, I get it. The text in the attachment follows:
§ 31.032. APPOINTMENT OF ADMINISTRATOR; COUNTY ELECTION COMMISSION.

(a) The position of county elections administrator is filled by appointment of the county election commission, which consists of:
   (1) the county judge, as chair;
   (2) the county clerk, as vice chair;
   (3) the county tax assessor-collector, as secretary; and
   (4) the county chair of each political party that made nominations by primary election for the last general election for state and county officers preceding the date of the meeting at which the appointment is made.

(b) The affirmative vote of a majority of the commission's membership is necessary for the appointment of an administrator.

(c) Each appointment must be evidenced by a written resolution or order signed by the number of commission members necessary to make the appointment. Not later than the third day after the date an administrator is appointed, the officer who presided at the meeting shall file a signed copy of the resolution or order with the county clerk. Not later than the third day after the date the copy is filed, the county clerk shall deliver a certified copy of the resolution or order to the secretary of state.

(d) The initial appointment may be made at any time after the adoption of the order creating the position.

§ 31.035. RESTRICTIONS ON POLITICAL ACTIVITIES.

(a) A county elections administrator may not be a candidate for a public office or an office of a political party, hold a public office, or hold an office of or position in a political party. At the time an administrator becomes a candidate or accepts an office or position in violation of this subsection, the administrator vacates the position of administrator.

(b) A county elections administrator commits an offense if the administrator makes a political contribution or political expenditure, as defined by the law regulating political funds and campaigns, or publicly supports or opposes a candidate for public office or a measure to be voted on at an election. An offense under this subsection is a Class A misdemeanor. On a final conviction, the administrator's employment is terminated, and the person convicted is ineligible for future appointment as county elections administrator.

The non-election officials on the Working Group currently include:

- Barry Weinberg, whom you know
- Barbara Arnwine, Lawyers Committee for Civil Rights Under Law (organization associated with the Voting Rights Project and Election Protection)
- Bob Bauer, Perkins Coie, DC (Democrat attorney)
- Mark "Thor" Hearne, Lathrop & Gage, St Louis, MO (Republican attorney)

I am trying to recruit one other Republican attorney, Patrick Rogers, Modrall, Sperling, Roehl, Harris and Sisk, NM, who was recommended by our Republican consultant. He would replace an original member who is no longer available.

I know that Barbara has associated at conferences and in legislative efforts with Wade Henderson, Leadership Conference on Civil Rights. Also, the Lawyers Committee for Civil Rights is listed as one of many members of the Executive Committee for the Leadership Conference on Civil Rights (see http://www.civilrights.org/about/lccr/executive_committee.htm).

Does this information help? --- Peggy

"Donsanto, Craig" <Craig.Donsanto@usdoj.gov>

Peggy -- they don't have anything to do with the Leadership Conference on Civil Rights do they?

I ask only because the Justice Department is currently engaged in a very acrimonious FOIA litigation with LCCR that focuses precisely on our efforts to combat voter "intimidationm"

Craig:

This meeting is being held to obtain input from our eight-member Working Group for the project. The group is composed of election lawyers, election officials, and a representative of an advocacy group, all of whom have an interest and some expertise in the identification and/or prosecution of voting fraud and voter intimidation. The group was chosen so that we would have an equal number of folks on each side of the political spectrum, plus some nonpartisan members.

After our consultants review the results of their preliminary research (interviews, literature review, case law), we will ask the Working Group to brainstorm possible next steps for EAC. Our consultants will write a report summarizing the proposals that come out of this meeting. The report will go to the Commissioners, who will decide what they want to do, funds available, and what priority to assigned to the effort(s).

Your participation in this part of the process is extremely important, so I am very happy that you can find time for us that afternoon. I'll get an agenda and other information to you next week. --- Peggy
Okay, Peg -- I will mark off the entire afternoon and try to be there. What is the agenda? I was not aware that this was anything beyond having your contractors spend another session with me. Also, if they will be needing stats and stuff like that I need to know as I will bring my state-people with me.
Afternoon of May 18 -- 2:30 okay? How long will they need??

I am looking at the afternoon of 5/18 for the meeting, due to scheduling conflicts of Working Group members. There remain two members from whom we have not yet received confirmations of their schedule (with some, it is like pulling teeth), but right now 5/18 still looks like the best day. We may have to hold the meeting over here to make it easier for Commissioners to drop in.

My problem is that agency staff is booked most of the week of 5/21. Monday through Wednesday are taken up with meetings of the Standards Board Executive Committee, the full Standards Board, and the Board of Advisors. Thursday, we have EAC's public meeting. Also, I will lose one of my two consultants in June, so I'm trying to wrap up this project (and get the final report from the consultants) by the end of May.

Dear Tova,

I am working with Peggy Sims in order to set a date for the Voting Fraud/Voter Intimidation Project Working Group. I have been trying to reach Barbara Arnwine in order to find out which days in May she is potentially available to attend this meeting but all of my attempts have been unsuccessful.

I would appreciate any help that you could provide in this matter.

Sincerely,

Devon Romig

Peg - -

I have read over the materials you sent to me and viewed the pieces on the CD.

I have only one correction:

I did not say that offenders who receive target letters routinely request - - or routinely receive - - audiences here at DOJHQ. That is very rare. Instead, what usually happens is that once a subject for an election fraud investigation is advised that he or she is going to be charged that person usually enters into plea negotiations and ultimately pleads guilty. Very few federal election fraud cases go to trial. When a subject does request a HQ interview or a HW hearing, it would be held in the first instance by myself. But again, Peg, that is rare.

Also, while the occurrences of prosecutions of isolated instances of felons and alien voters and double
voters has increased, we still aggressively and I believe quite successfully pursue systematic schemes to
correct the electoral process, as the cases we brought recently out of Knott and Pike Counties in
Kentucky, those we brought out of Lincoln and Logan Counties in West Virginia, and those we brought in
New Hampshire growing out of the jamming of getout-the-vote phone bank lines attest.

I think they are panicking because they are preparing to travel tomorrow and may not have time to submit a revised version. They also are resisting changes to their interview summaries because the summaries represent what they think they heard. I was there at the interview and I heard what you said. I'm not sure that either of them heard everything (including the nuances) because so much of the information was new to them and it was one of their earlier interviews. I'm sorry I did not catch the defects before the summary went out.

My first concern is ensuring that the Working Group has the correct information. Then, we can deal with what version, if any, goes in the final report. Do you want me to excerpt the corrections from your email and submit them to the Working Group? --- Peggy

----- Forwarded by Margaret Sims/EAC/GOV on 11/29/2006 01:48 PM -----
The first item is not as big a deal as the second one: the processes under which subjects of investigations come to Jesus is not as important as the overall assessment of our law enforcement achievements. But stressing the isolated test cases we brought - - and will continue to being - - to deter things like felon voting, alien voting and double voting, which not mentioning such significant achievements as the five case PROJECTS mentioned in my last e-mail - - misrepresents what we are doing and the deterrent message we are trying to communicate.

I appreciate that these two young people may have found themselves in a Brave New World when they came over here. It showed in their questioning. But the fact that criminal law enforcement is not at all similar to preventative legal relief (as under the Voting Rights Act) or civil relief (as election contest litigation) is I guess more of a problem than I at first foresaw. My real concerns is that the civil rights groups - - with whom we over here have an amazing amount of common grounds - - will take the singling out of the felon and alien voter cases as evincing a malevolent aggression on their constituencies. That is not the case. We are only enforcing the law.

I think they are panicking because they are preparing to travel tomorrow and may not have time to submit a revised version. They also are resisting changes to their interview summaries because the summaries represent what they think they heard. I was there at the interview and I heard what you said. Subject Request to interview AUSAs

Peg --

At the Advisory Board meeting we had last week, your two contractors asked to interview the over-100 AUSAs who are serving as District Election Officers in connection with the Fraud study.

This request needs to be addressed to Natalie Voris of EOUSA per the message from here that follows.

If the contractors require additional information in connection with the Fraud Study, and should EOUSA not be able to satisfy their needs they can communicate with me on criminal issues and Cameron Quinn on Civil Rights issues.

I will be here when you arrive later today at the Board of Advisors meeting
when you arrive to talk to us at 4:30.

Ms. Voris' message follows:

Per the USAM, all requests for interviews/surveys/research projects that involve USAOs must be approved by EOUSA. I am pasting the provision below - the contact name needs to be updated. Requests should come to me, as the Acting Counsel to the Director.

Thanks,
Natalie

Thank you for this, Peg.

The third bullet point is one I embrace fully. We lack the statutory took to do the job. Hopefully, that can be remedied through legislation. But as things stand today large loopholes in the federal legal matrix addressing electoral abuse and fraud exist - particularly when such abuses occur in elections where there were no federal candidates on the ballot.
Here is the content of the email attachment:

**Existing Research Analysis**

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the “second phase” of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund’s frequently cited book. Again, this is something that it is hoped will be addressed in the “second phase” of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.

- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.

- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.

- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

Peg - -

This is a complicated issue largely because of two things: 1) there is a lot of ambiguity out there as to what constitutes “intimidation.” To the civil rights community, “intimidation” means anything that makes voting uncomfortable or less than automatic. To us in the criminal law enforcement “intimidation” means threats of economic or physical nature made to force or prevent voting. Only the latter involve aggravating factors that warrant putting offenders in jail, and the statutes that address “intimidation” from a criminal perspective are thus limited. We have never had many “intimidation” criminal cases. For one thing, in this modern post voting rights era, there is not a lot of physical/economic duress out there in the voting context - - at least not that I have seen. For another, where it does occur it is very hard to investigate and detect as victims who have been physically or economically intimidated are not likely to come to the FBI.

The bottom line is that we take matters that do present predication for physical or economically based “intimidation” very seriously, AND that we are being extremely proactive in trying to find ways to prosecute matters involving voter suppression as in the Tobin cases in New Hampshire where the local GOP tried to jam telephone lines for a GOTV effort run by the Dems. But even there - - the usual “suppression” matter involves flyers that are passed around giving out misleading information about an election, and we have investigated every one of those that came to our attention last election cycle. We were not able to identify the person(s) responsible for printing the misleading flyers in any of these. But we sure as heck tried.
Craig:

I'm putting the finishing touches on a status report to the EAC Standards Board and EAC Board of Advisors on our Voting Fraud-Voter Intimidation research project. For the most part, I am using our consultants summaries for the report, but one bullet under the interview summaries is giving me heartburn. It is the bullet that references the decrease in DOJ voter intimidation actions. It is one of the places in which our consultants had indicated that your office is focusing on prosecuting individuals. I have reworded it and would like your feedback on the revision:

Several people indicate - including representatives from DOJ -- that for various reasons, the Department of Justice is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. While the Voting Section of the Civil Rights Division focuses on systemic patterns of malfeasance, the Election Crimes Branch of the Public Integrity Section has increased prosecutions of individual instances of felon, alien, and double voting while also maintaining an aggressive pursuit of systematic schemes to corrupt the electoral process.

Please suggest any changes that you think would further clarify the current approach. --- Peggy

Dear Working Group Members and Participants:

You should receive a packet of information today, either by Federal Express or hand delivery, concerning Thursday's meeting of the project Working Group for EAC's Voting Fraud-Voter Intimidation research project. Attached is an analysis of the consultants' research into relevant literature and reports. This summary was not available when we prepared the information packets last Friday, but may be of interest to you. Our consultants and I look forward to having a productive discussion with you.

Regards,

Peggy Sims
Election Research Specialist
U.S. Election Assistance Commission

Washington, DC 20005
Phone: 866-747-1471 (toll free) or 202-566-3120 (direct)
Fax: 202-566-3127
email: psims@eac.gov
Tova:

We can certainly discuss this at the Working Group meeting. (The draft definition had already been sent out by the time I read your message.) There may be other VRA provisions that should be considered as well, such as the prohibition on removing the names of certain registrants, who were registered by federal examiners, without obtaining prior approval of the Justice Department.

After I received your email, I asked Barry Weinberg to review the draft definition and consider if we have left off examples of Voting Rights Act violations that would qualify as election fraud. Barry, during his 25 years with DOJ, led aggressive action against attempts to place police at the polls to intimidate voters, challenges targeting minorities, failure to provide election materials and assistance in languages other than English (in covered jurisdictions), etc. His input should prove helpful. --- Peggy

How about specifying Section 2 and 203 of the VRA?

---- Original Message ----
Upon first reading, my only comment would be that I would like to restore "failing to follow the requirements of the Voting Rights Act"

Subject: Fraud Definition

Would you please take a look at the attached? I combined both of your definitions, reformatted the list, removed a reference to the fraud having to have an actual impact on the election results (because fraud can be prosecuted without proving that it actually changed the results of the election), and taken out a couple of vague examples (e.g., reference to failing to enforce state laws --- because there may be legitimate reasons for not doing so).

I have made contact with Ben Ginsberg's office and am waiting to hear if he accepts our invitation to join the working group. --- Peggy

Let me try to do it, Peg. Again what I do not want to see occur is for the LCCR to start attacking us. We have more in common with them than I had originally assumed, thanks to the write-ups of their interviews. We need to promote what we have in common not try to score political points. But I will try to correct the records as long as you will agree you heard what I said the way I know I said it!

Topsims@eac.gov  
cc SubjectRE: Your Materials  
019352
The first item is not as big a deal as the second one: the processes under which subjects of investigations come to Jesus is not as important as the overall assessment of our law enforcement achievements. But stressing the isolated test cases we brought - - and will continue to bring - - to deter things like felon voting, alien voting and double voting, which not mentioning such significant achievements as the five case PROJECTS mentioned in my last e-mail - - misrepresents what we are doing and the deterrent message we are trying to communicate.

I appreciate that these two young people may have found themselves in a Brave New World when they came over here. It showed in their questioning. But the fact that criminal law enforcement is not at all similar to preventative legal relief (as under the Voting Rights Act) or civil relief (as election contest litigation) is I guess more of a problem than I at first foresaw. My real concerns is that the civil rights groups - - with whom we over here have an amazing amount of common grounds - - will take the singling out of the felon and alien voter cases as evincing a malevolent aggression on their constituencies. That is not the case. We are only enforcing the law.

Subject: RE: Your Materials

I think they are panicking because they are preparing to travel tomorrow and may not have time to submit a revised version. They also are resisting changes to their interview summaries because the summaries represent what they think they heard. I was there at the interview and I heard what you said. I'm not sure that either of them heard everything (including the nuances) because so much of the information was new to them and it was one of their earlier interviews. I'm sorry I did not catch the defects before the summary went out.

My first concern is ensuring that the Working Group has the correct information. Then, we can deal with what version, if any, goes in the final report. Do you want me to excerpt the corrections from your email and submit them to the Working Group? --- Peggy

*Donsanto, Craig* <Craig.Donsanto@usdoj.gov>

05/16/2006 01:41 PM
Sure. But where is the resistance coming from? The notes were not accurate. As you know, I have to be very concerned about that.

I have read over the materials you sent to me and viewed the pieces on the CD.

I have only one correction:

I did not say that offenders who receive target letters routinely request or routinely receive audiences here at DOJHQ. That is very rare. Instead, what usually happens is that once a subject for an election fraud investigation is advised that he or she is going to be charged that person usually enters into plea negotiations and ultimately pleads guilty. Very few federal election fraud cases go to trial. When a subject does request a HQ interview or a HW hearing, it would be held in the first instance by myself. But again, Peg, that is rare.

Also, while the occurrences of prosecutions of isolated instances of felons and alien voters and double voters has increased, we still aggressively and I believe quite successfully pursue systematic schemes to corrupt the electoral process, as the cases we brought recently out of Knott and Pike Counties in Kentucky, those we brought out of Lincoln and Logan Counties in West Virginia, and those we brought in New Hampshire growing out of the jamming of get-out-the-vote phone bank lines attest.

I know --- I'll have to cover that in my oral presentation, along with some other points. The audience will have a copy of the paper I put together using Job's and your summaries and findings. The paper provides a lot more detail. We did not plan to provide a copy of the PowerPoint presentation, which is just meant to keep me on track and them interested in the presentation. --- Peggy

I still think we should include the recommendations in the report
I haven't sent it yet. If you need to leave early, you can look at what I have so far, which does not have the intro or the text regarding the final report. --- Peggy

What is the information you need when you say:
The consultants jointly selected experts from ???

We chose the interviewees by first coming up with a list of the categories of types of people we wanted to interview. Then we each filled those categories with a certain number of people, equally. The ultimate categories were academics, advocates, elections officials, lawyers and judges.

Is that what you need?

Subject Your Materials

Peg - -

I have read over the materials you sent to me and viewed the pieces on the CD.

I have only one correction:

I did not say that offenders who receive target letters routinely request - or routinely receive - audiences here at DOJHQ. That is very rare. Instead, what usually happens is that once a subject for an election fraud investigation is advised that he or she is going to be charged that person usually enters into plea negotiations and ultimately pleads guilty. Very few federal election fraud cases go to trial. When a subject does request a HQ interview or a HW hearing, it would be held in the first instance by myself. But again, Peg, that is rare.

Also, while the occurrences of prosecutions of isolated instances of felons and alien voters and double voters has increased, we still aggressively and I believe quite successfully pursue systematic schemes to corrupt the electoral process, as the cases we brought recently out of Knott and Pike Counties in Kentucky, those we brought out of Lincoln and Logan Counties in West Virginia, and those we brought in New Hampshire growing out of the jamming of get-out-the-vote phone bank lines attest.

----- Original Message-----

Great -- thanks so much and apologies for the false alarm.

-----Original Message-----
This article is on the CD, it is located in the "Nexis Article Charts" folder.

Tova:
I think you did send this --- or is this a revised version of one you sent earlier? It should be on the CD in the packet you should receive today. (Can't check that right now as I am at the clinic.) If I put anything on the CD that you want to highlight at the meeting, let me know and we'll make copies for those attending.
Peggy

Here is the content of the email attachment:

**Existing Research Analysis**

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the "second phase" of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage.
of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund’s frequently cited book. Again, this is something that it is hoped will be addressed in the “second phase” of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.

- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.

- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.

- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.

- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

Dear Working Group Members and Participants:

You should receive a packet of information today, either by Federal Express or hand delivery, concerning Thursday's meeting of the project Working Group for EAC's Voting Fraud-Voter Intimidation research project. Attached is an analysis of the consultants' research into relevant literature and reports. This summary was not available when we prepared the information packets last Friday, but may be of interest to you. Our consultants and I look forward to having a productive discussion with you.

Let me try to do it, Peg. Again what I do not want to see occur is for the LCCR to start attacking us. We have more in common with them than I had originally assumed, thanks to the write-ups of their interviews. We need to promote what we have in common not try to score political points. But I will try to correct the records as long as you will agree you heard what I said the way I know I said it!

I fully understand. Do you want me to prepare a correction sheet for the Working Group, placing your second and more important point first, or do you want to handle this verbally at the meeting? --- Peggy

The first item is not as big a deal as the second one: the processes under which subjects of investigations come to Jesus is not as important as the overall assessment of our law enforcement achievements. But stressing the isolated test cases we brought - - and will continue to being - - to deter things like felon voting, alien voting and double voting, which not mentioning such significant achievements as the five case PROJECTS mentioned in my last e-mail - - misrepresents what we are doing and the deterrent message we are trying to communicate.
I appreciate that these two young people may have found themselves in a Brave New World when they came over here. It showed in their questioning. But the fact that criminal law enforcement is not at all similar to preventative legal relief (as under the Voting Rights Act) or civil relief (as election contest litigation) is I guess more of a problem than I at first foresaw. My real concerns is that the civil rights groups -- with whom we over here have an amazing amount of common grounds -- will take the singling out of the felon and alien voter cases as evincing a malevolent aggression on their constituencies. That is not the case. We are only enforcing the law.

Subject: RE: Your Materials

I think they are panicking because they are preparing to travel tomorrow and may not have time to submit a revised version. They also are resisting changes to their interview summaries because the summaries represent what they think they heard. I was there at the interview and I heard what you said. I'm not sure that either of them heard everything (including the nuances) because so much of the information was new to them and it was one of their earlier interviews. I'm sorry I did not catch the defects before the summary went out.

My first concern is ensuring that the Working Group has the correct information. Then, we can deal with what version, if any, goes in the final report. Do you want me to excerpt the corrections from your email and submit them to the Working Group? --- Peggy

Peg --

I have read over the materials you sent to me and viewed the pieces on the CD.
I have only one correction:

I did not say that offenders who receive target letters routinely request - or routinely receive - audiences here at DOJHQ. That is very rare. Instead, what usually happens is that once a subject for an election fraud investigation is advised that he or she is going to be charged, that person usually enters into plea negotiations and ultimately pleads guilty. Very few federal election fraud cases go to trial. When a subject does request a HQ interview or a HW hearing, it would be held in the first instance by myself. But again, Peg, that is rare.

Also, while the occurrences of prosecutions of isolated instances of felons and alien voters and double voters has increased, we still aggressively and I believe quite successfully pursue systematic schemes to corrupt the electoral process, as the cases we brought recently out of Knott and Pike Counties in Kentucky, those we brought out of Lincoln and Logan Counties in West Virginia, and those we brought in New Hampshire growing out of the jamming of get-out-the-vote phone bank lines attest.

I think he can just raise these points at the meeting, no? I'm sure many we interviewed would say we misquoted them on something. This is what both Job and I remember him saying. I think it would be unfair for him to change/amend his interview without giving the same opportunity to the other interviewees.

Craig:

I'm putting the finishing touches on a status report to the EAC Standards Board and EAC Board of Advisors on our Voting Fraud-Voter Intimidation research project. For the most part, I am using our consultants summaries for the report, but one bullet under the interview summaries is giving me heartburn. It is the bullet that references the decrease in DOJ voter intimidation actions. It is one of the places in which our consultants had indicated that your office is focusing on prosecuting individuals. I have reworded it and would like your feedback on the revision:

Several people indicate - including representatives from DOJ -- that for various reasons, the Department of Justice is bringing fewer voter intimidation and suppression cases now, and has
increased its focus on matters such as noncitizen voting, double voting, and felon voting. While the Voting Section of the Civil Rights Division focuses on systemic patterns of malfeasance, the Election Crimes Branch of the Public Integrity Section has increased prosecutions of individual instances of felon, alien, and double voting while also maintaining an aggressive pursuit of systematic schemes to corrupt the electoral process.

Please suggest any changes that you think would further clarify the current approach. --- Peggy

Hi Peg,

How do you recommend dealing with this? I have this feeling like he's trying to create a situation where I will have to write it myself. Thanks. Tova

Hi Job,

Peg tells me that we should now be getting the transcript early next week. Regardless, we should talk about the organization and distribution of work on the final report and try to finally get it done. Would it be possible for you to do a call before you leave for work in the morning, say 8 am your time, on Wednesday? If not, could you do 6 pm your time on Wednesday? Thanks.

Hi, What's going on? I have not received responses from either one of you in a week. I'd like to wrap this up in the next two weeks if we can. Did you get my recommendations? Thanks. Tova
I'll try to call you Wednesday. Is there a time that is best for you? Today has been too hectic. Tomorrow is primary election day in VA. Still no transcript. I have taken a look at the recommendations that you sent me, but have not yet heard from Job. --- Peg

----- Forwarded by Margaret Sims/EAC/GOV on 11/29/2006 01:47 PM -----

Could you do Friday in the morning?

Wednesday next week? It would have to be 6 pm.

Hi Job,

Peg tells me that we should now be getting the transcript early next week. Regardless, we should talk about the organization and distribution of work on the final report and try to finally get it done.

Would it be possible for you to do a call before you leave for work in the morning, say 8 am your time, on Wednesday? If not, could you do 6 pm your time on Wednesday?

Thanks.

Peg:

I just arrived home for lunch. I can no longer take time during the work day for telephone conferences. As I told you I will need to finish this project after daily working hours. I am still getting things done from being out for ten days. I will review Tova's recommendations and expand on mine this weekend.

Also, I sent you an e-mail asking how you handled the mileage portion of my travel voucher?

What time do you arrive home from work? Perhaps we could talk then?

Re your question on the mileage, I have approached our Financial Officer with a request that you receive...
full reimbursement on the grounds that your actual total travel costs are less than the estimated total travel costs if you had flown to DC, stayed in our more expensive hotels, and received the higher per diem for 3 days (instead of 1). I have not yet received a response from her and she has been out of the office much of this week, so I don't know what she decided to do. --- Peggy

Peggy:

In the transcript, there is one serious mistake that must be changed immediately. On page 5 it indicates that I helped review and draft changes to the election code of Libya. It should be Namibia not Libya. The reason this is so serious if it stands is that at the time I reviewed Namibia's Code it was illegal for Americans to deal with Libya. I need to know that this has been corrected any ALL parties who have seen the transcript notified.

Hi Tom, Is anything going to be done to correct the record in the news reporting in USA Today and now numerous other media that this status report presented to the board of standards by Peg in May is NOT the report we submitted in July? I'm getting questions and don't know how to answer them. I feel compelled to tell people who ask that this is not our report. Our report still has not been released. Thanks. Tova

> minute call on August 31
> or September 1 at 1:00?
Julie:

Just a reminder that we have a telephone conference for the vote fraud group at 4:00 today. You were going to see if you could talk to Commissioner Davidson before that time so I could know what the possibilities are for serving as her executive assistant. If this is even possible and if the Commission is willing to raise the salaries of the executive assistants, her time table could affect the vote fraud project time table.

Regards,

Job

Julie:

Any luck finding the whereabouts of our contracts? Also, I assume that we will not hear from Peg until Monday.

Job

Julie:

I see that I will have to drive folks up there crazy Monday to make the Tuesday deadline for the signing of our contracts so we get paid on time.

At this point, on Tuesday I just plan to e-mail a standard invoice for this month.

Job
Hi Karen and Tom,

As we discussed yesterday, attached is a preliminary work plan/division of labor for your review. Please let us know if this is sufficient for the present and if you have any comments or questions.

In terms of hours dedicated to the project, Job and Tova are able to commit to 15-20 hours per week assuming that includes reimbursed periodic travel. Steve can do approximately 2 hours per week. We have tentatively scheduled to meet at your offices in DC, if that is convenient for you, on September 20. We will be able to confirm that within the next day or so.

All of us are very eager to get started on this important work as soon as possible. However, because we also have other work related responsibilities, we are a bit reluctant to do so before having an opportunity to review our contracts. We look forward to receiving them so we can get going right away.

Thanks so much. Speak to you soon.

Tova, Job and Steve

The package came today. Thanks. See you Thursday.
Barry

I have forwarded your message to our consultants and have requested a corrected version for distribution at the WG meeting. --- Peggy

Peg - -
I have read over the materials you sent to me and viewed the pieces on the CD.
I have only one correction:

I did not say that offenders who receive target letters routinely request - or routinely receive -- audiences here at DOJHQ. That is very rare. Instead, what usually happens is that once a subject for an election fraud investigation is advised that he or she is going to be charged that person usually enters into plea negotiations and ultimately pleads guilty. Very few federal election fraud cases go to trial. When a subject does request a HQ interview or a HW hearing, it would be held in the first instance by myself. But again, Peg, that is rare.

Also, while the occurrences of prosecutions of isolated instances of felons and alien voters and double voters has increased, we still aggressively and I believe quite successfully pursue systematic schemes to corrupt the electoral process, as the cases we brought recently out of Knott and Pike Counties in Kentucky, those we brought out of Lincoln and Logan Counties in West Virginia, and those we brought in
New Hampshire growing out of the jamming of get0-out-the-vote phone bank lines attest.

---

Here is the content of the email attachment:

**Existing Research Analysis**

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the “second phase” of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage
of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book. Again, this is something that it is hoped will be addressed in the “second phase” of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.

- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.

- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.

- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.

- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

Let me try to do it, Peg. Again what I do not want to see occur is for the LCCR to start attacking us. We have more in common with them than I had originally assumed, thanks to the write-ups of their interviews. We need to promote what we have in common not try to score political points. But I will try to correct the records as long as you will agree you heard what I said the way I know I said it!

I fully understand. Do you want me to prepare a correction sheet for the Working Group, placing your second and more important point first, or do you want to handle this verbally at the meeting? --- Peggy

"Donsanto, Craig" <Craig.Donsanto@usdoj.gov>

05/16/2006 02:55 PM
Subject: RE: Your Materials

The first item is not as big a deal as the second one: the processes under which subjects of investigations come to Jesus is not as important as the overall assessment of our law enforcement achievements. But stressing the isolated test cases we brought - - and will continue to bring - - to deter things like felon voting, alien voting and double voting, which not mentioning such significant achievements as the five case PROJECTS mentioned in my last e-mail - - misrepresents what we are doing and the deterrent message we are trying to communicate.
I appreciate that these two young people may have found themselves in a Brave New World when they came over here. It showed in their questioning. But the fact that criminal law enforcement is not at all similar to preventative legal relief (as under the Voting Rights Act) or civil relief (as election contest litigation) is I guess more of a problem than I at first foresaw. My real concerns is that the civil rights groups -- with whom we over here have an amazing amount of common grounds -- will take the singling out of the felon and alien voter cases as evincing a malevolent aggression on their constituencies. That is not the case. We are only enforcing the law.

From: psims@eac.gov [mailto:psims@eac.gov]
Sent: Tuesday, May 16, 2006 2:47 PM
To: Donsanto, Craig
Subject: RE: Your Materials

I think they are panicking because they are preparing to travel tomorrow and may not have time to submit a revised version. They also are resisting changes to their interview summaries because the summaries represent what they think they heard. I was there at the interview and I heard what you said. I'm not sure that either of them heard everything (including the nuances) because so much of the information was new to them and it was one of their earlier interviews. I'm sorry I did not catch the defects before the summary went out.

My first concern is ensuring that the Working Group has the correct information. Then, we can deal with what version, if any, goes in the final report. Do you want me to excerpt the corrections from your email and submit them to the Working Group? --- Peggy

"Donsanto, Craig" <Craig.Donsanto@usdoj.gov>
05/16/2006 01:41 PM
Sure. But where is the resistance coming from? The notes were not accurate. As you know, I have to be very concerned about that.

Thank you, Peg. This stuff is very interesting.
I have forwarded your message to our consultants and have requested a corrected version for distribution at the WG meeting. --- Peggy

*Donsanto, Craig* <Craig.Donsanto@usdoj.gov>

05/16/2006 10:46 AM
I have only one correction:

I did not say that offenders who receive target letters routinely request - - or routinely receive - - audiences here at DOJHQ. That is very rare. Instead, what usually happens is that once a subject for an election fraud investigation is advised that he or she is going to be charged that person usually enters into plea negotiations and ultimately pleads guilty. Very few federal election fraud cases go to trial. When a subject does request a HQ interview or a HW hearing, it would be held in the first instance by myself. But again, Peg, that is rare.

Also, while the occurrences of prosecutions of isolated instances of felons and alien voters and double voters has increased, we still aggressively and I believe quite successfully pursue systematic schemes to corrupt the electoral process, as the cases we brought recently out of Knott and Pike Counties in Kentucky, those we brought out of Lincoln and Logan Counties in West Virginia, and those we brought in New Hampshire growing out of the jamming of get0-out-the-vote phone bank lines attest.
Peg -

I have read over the materials you sent to me and viewed the pieces on the CD.

I have only one correction:

Tova and Job:

I am home recuperating, but see that in my absence, a USA Today article has gotten everyone stirred up. The report to which the article refers is only the status report on the voting fraud-voter intimidation research project that was delivered to our Standards Board and Board of Advisors last spring. I provided a copy of this document to both of you, but have attached another copy for your information. This document is subject to public release because it was presented at a public meeting.

Due to internal resource allocation problems, your final report has not yet been reviewed by the Commissioners. It is considered a working document (not subject to public release) until it has completed the review process and the Commissioners have agreed to release it. There has been no attempt by the Commission to hold up the report. I bear responsibility for any delays in moving it along. Please be reassured that we would not release your report without letting you know.

Peggy Sims

Fax: 202-566-3127  
email: psims@eac.gov

Peg:

We saw both the USA Today article and a similar thing was reported on Rush Limbaugh's show naming both of us. I had a talk this morning with folks at the EAC. I told them at this point there needs to be a press release sent out by the Chairman saying just what you stated. This is the only
way to rehabilitate the work we did, the Chairman's credibility, and our reputations. I also fear that if this is not done the EAC will begin to receive calls from Congressman and Senators regarding the "report" and its effect on voter ID requirements.

Peg, up to now Tova and I have refused to speak with the press at all out of respect for the EAC and its mission. We both stand by our work and its conclusions. We both also feel that if a statement (as well phrased as you did in this e-mail clarifying the issue) is not forthcoming from the Chairman then I will have to correct this error with the Press. I explained this in my conversation this morning with the EAC.

Tova and I worked hard to produce a correct, accurate and truthful report. I could care less that the results are not what the more conservative members of my Party wanted. Neither one of us was willing to conform results for political expediency. I think it important for me to note that I was very impressed with Tova's members of the Working Group and I can't say enough about Tova's partnership effort in this endeavor. While neither one of us really care about outside opinions, we do care that the Chairman was quoted or misquoted in a way that would disparage our year-long effort and all of the tax payer money that went into it. For this reason, we believe that a press release clarifying the situation is necessary from either the Chairman or from me.

Regards,

Job

email: psims@eac.gov

Yes. I asked her if she wanted me to delete the Voter Fraud Project files on my computer or whether I should keep them. She said to download them to a disk and send them to her at the EAC. These files are just duplicates of what you have plus the text of some of the articles. What do you want me to do? I will not be able to do anything until after the election on Tuesday in any case because I am so involved in Asa Hutchinson's campaign.

Hope you are feeling better.

Regards,

Job

Subject: RE: Voting Fraud-Voter Intimidation

Craig:

This meeting is being held to obtain input from our eight-member Working Group for the project. The group is composed of election lawyers, election
officials, and a representative of an advocacy group, all of whom have an interest and some expertise in the identification and/or prosecution of voting fraud and voter intimidation. The group was chosen so that we would have an equal number of folks on each side of the political spectrum, plus some nonpartisan members.

After our consultants review the results of their preliminary research (interviews, literature review, case law), we will ask the Working Group to brainstorm possible next steps for EAC. Our consultants will write a report summarizing the proposals that come out of this meeting. The report will go to the Commissioners, who will decide what they want to do, funds available, and what priority to assigned to the effort(s).

Your participation in this part of the process is extremely important, so I am very happy that you can find time for us that afternoon. I'll get an agenda and other information to you next week. --- Peggy

I'm up for a short meeting afterward and a teleconference on Monday. And maybe when all of this is over, you and I can have dinner! Have I told you that I am moving down to DC this summer?

I suspect you have put up with much more than I have and I really appreciate everything you have done.

Tova:

I understood Job to say that he could only find a hotel room with the right bed in Roanoke (hours away). He will drive in Thursday morning for the meeting and return to that hotel Thursday night. He won't drive back into DC for a Friday morning meeting.

We don't have to do dinner. I recognize that you have spent a lot of time and energy to make this project work, and I don't want to put you out. (You have done a lot under difficult circumstances.) Though we will be bushed, we may want to have a short meeting right after the Working Group disperses --- or we could do a teleconference the following Monday afternoon (before I head into three more days of meetings). --- Peggy

It would not be my first preference to do this right after the meeting, and I sort of had tentative plans. They can be changed if necessary of course, but what happened to meeting on Friday morning?

Dear Tova,

I am working with Peggy Sims in order to set a date for the Voting Fraud/Voter Intimidation Project Working Group. I have been trying to reach Barbara Arnwine in order to find out which days in May she is potentially available to attend this meeting but all of my attempts have been unsuccessful.

I would appreciate any help that you could provide in this matter.

Sincerely,

Devon Romig

As of now, the afternoon of Thursday, May 18 appears to be the best possible date for the meeting. Norcross is not available to attend in person that day (he is available only 2 days during the first three weeks of May). We won't have confirmation of the availability of Secretary Rokita until tomorrow --- but I am hopeful.

I'll give you an update tomorrow. Maybe we can schedule a teleconference on Monday afternoon. --- Peggy

---- Forwarded by Margaret Sims/EAC/GOV on 11/29/2006 01:48 PM ----

Job found it. I'm assuming its too late to include so as I said I'll just present it if thats OK. Thanks again Job. T

Peggy --
I have Cynthia Mitchell in here with me now.

She says that the figures you listed in your attachment are your analysis of our product, and that therefore we cannot re-evaluate them.

I do not see anything in these raw numbers that impacts adversely any privacy or privilege issues.

We can update the public list and send that to you, if you'd prefer. That would allow you to represent that the numbers are current up through now. But if you would prefer, you can use what you have as long as it is represented as complete only through January, 2006.

Let us know your desires --

I don't think we can put you on teleconference for 41/2 hours. We really need to have you here in person if you are to help conduct the Working Group meeting. You should make your travel arrangements ASAP.
--- Peggy

Peggy:

4:00 eastern on Tuesday is fine however, given the financial restrictions that you indicated would be in place for use of my car (I would actually loose money coming to DC) and given the cost of hotels at this time (I can't afford to front these costs and wait for months to be repaid), etc, it would take a miracle for this working group meeting to take place in person. It is looking like the only way it will get done is by teleconference. I also share Tova's concern about the unknown nature of Mr. Perez.

Say "Hi" to Cameron for me.

Peggy -- they don't have anything to do with the Leadership Conference on Civil Rights do they?

I ask only because the Justice Department is currently engaged in a very acrimonious FOIA litigation with LCCR that focuses precisely on our efforts to combat voter "intimidation"

Craig:

This meeting is being held to obtain input from our eight-member Working Group for the project. The group is composed of election lawyers, election officials, and a representative of an advocacy group, all of whom have an interest and some expertise in the identification and/or prosecution of voting fraud and voter intimidation. The group was chosen so that we would have an equal number of folks on each side of the political spectrum, plus some nonpartisan members.

After our consultants review the results of their preliminary research (interviews, literature review, case law), we will ask the Working Group to brainstorm possible next steps for EAC. Our consultants will write a report summarizing the proposals that come out of this meeting. The report will go to the Commissioners, who will decide what they want to do, funds available, and what priority to assigned to the effort(s).

Your participation in this part of the process is extremely important, so I am very happy that you can find time for us that afternoon. I'll get an agenda and other information to you next week. --- Peggy
Okay, Peg -- I will mark off the entire afternoon and try to be there. What is the agenda? I was not aware that this was anything beyond having your contractors spend another session with me. Also, if they will be needing stats and stuff like that I need to know as I will bring my state-people with me.

Also, I will lose one of my two consultants in June, so I'm trying to wrap up this project (and get the final report from the consultants) by the end of May.

Say "Hi" to Cameron for me.
Hi, Folks:

Teleconference
Are both of you available for a teleconference next Tuesday afternoon at about 4 PM EST? If this does not work for you, please suggest another date and/or time. I would like to discuss our preparations for the Working Group meeting.

Working Group Members
We have a very good person to fill the slot for the nonpartisan local election official: J.R. Perez, Elections Administrator for Guadalupe County, TX. Attached is his bio. Hope you have no objections to him. He is available on May 18. I have place 2 calls to Pat Rogers office, but have not yet received a reply. Job, if you have any pull with him, you may want to contact him, too.

Travel Arrangements
You should make your own travel arrangements, including hotel. Travel time cannot be billed to the contract, except for hours actually worked on the contract (i.e.; reviewing materials in preparation for the meeting, and the like). Current Federal rates follow:

- Maximum Lodging = $180 per day- does not include hotel taxes (if you cannot get this rate, we have covered reasonable rates that are a little higher)
- Meals & Incidentals = $64 per day (except that it is $48 on the first and last day of travel)
- Mileage for Personally Owned Vehicle = $.445 per mile

Under the new contract, I do not have to fill out a travel authorization for you. I can approve your trip via email. Afterwords, when you turn in your next pay voucher, you can attach the airline receipt (or mileage documentation), hotel receipt(s), and ground transportation receipts and a copy of any printed itineraries. Calculate the total travel expenses due you, including applicable per diem. I do not need meal receipts.

Job, under Federal travel regulations, deviations for personal reasons are not normally accommodated. What you can do, however, is to give me a comparison of the cost of roundtrip mileage, hotel, and per diem of doing it your way against the cost of a roundtrip flight, ground transportation, hotel, and per diem. If your way costs less, it should be no problem to cover the full cost. If your way is more expensive, we may only pay up to the amount of traditional travel. (The same rules apply to me when I travel.) If you can tell me where, other than DC, you will spend the night, I can check on applicable per diem rates.

Peggy
I have placed another call to his office (after one previous call to his assistant and an email to him). I, too, am concerned about our dwindling chances. --- Peggy

"Job Serebrov" <serebrov@sbcglobal.net>

Given the short time period, you may want to give Ginsberg a deadline. The longer we wait, the poorer our chances are of getting Braden.

--- psims@eac.gov wrote:

> I am reluctant to invite Braden until after I have received a "No" from Ginsberg. --- Peg

> This is ok, given the fact that the WG may have suggestions. Will you be sending us the same packets that you are sending the WG? Also, I figure with Tova's response we will need to have a teleconference on the report once I return to Little Rock. We will need to do it that following Monday or Tuesday.
Would you please take a look at the attached? I combined both of your definitions, reformatted the list, removed a reference to the fraud having to have an actual impact on the election results (because fraud can be prosecuted without proving that it actually changed the results of the election), and taken out a couple of vague examples (e.g., reference to failing to enforce state laws because there may be legitimate reasons for not doing so). I have made contact with Ben Ginsberg's office and am waiting to hear if he accepts our invitation to join the working group.

--- Peggy

The bio for JR Perez tells us very little about him and there is pretty much nothing about him on the web. Can you tell us more about him and how you decided on him? Thanks. Tova

Subject: Working Group

Hi, Folks:

Teleconference
Are both of you available for a teleconference next Tuesday afternoon at about 4 PM EST? If this does not work for you, please suggest another date and/or time. I would like to discuss our preparations for the Working Group meeting.

Working Group Members
We have a very good person to fill the slot for the nonpartisan local election official: J.R. Perez, Elections Administrator for Guadalupe County, TX. Attached is his bio. Hope you have no objections to him. He is available on May 18. I have placed 2 calls to Pat Rogers office, but have not yet received a reply. Job, if you have any pull with him, you may want to contact him, too.

Travel Arrangements
You should make your own travel arrangements, including hotel. Travel time cannot be billed to the contract, except for hours actually worked on the contract (i.e., reviewing materials in preparation for the meeting, and the like). Current Federal rates follow:

Maximum Lodging = $180 per day- does not include hotel taxes (if you cannot get this rate, we have covered reasonable rates that are a little higher)
Meals & Incidentals = $64 per day (except that it is $48 on the first and last day of travel)
Mileage for Personally Owned Vehicle = $.445 per mile

Under the new contract, I do not have to fill out a travel authorization for you. I can approve your trip via email. Afterwards, when you turn in your next pay voucher, you can attach the airline receipt (or mileage documentation), hotel receipt(s), and ground transportation receipts and a copy of any printed itineraries. Calculate the total travel expenses due you, including applicable per diem. I do not need meal receipts.

Job, under Federal travel regulations, deviations for personal reasons are not normally accommodated. What you can do, however, is to give me a comparison of the cost of roundtrip mileage, hotel, and per diem of doing it your way against the cost of a roundtrip flight, ground transportation, hotel, and per diem. If your way costs less, it should be no problem to cover the full cost. If your way is more expensive, we may only pay up to the amount of traditional travel. (The same rules apply to me when I travel.) If you can tell me where, other than DC, you will spend the night, I can check on applicable per diem rates.

Peggy
Peg,

Correct me if I'm wrong, but I think I omitted sending you these specific summaries that are based on complex cases that could not be adequately described within the confines of the Nexis article Excel spreadsheets. If we can, these should be included, probably on the disc. Sorry.

Peg - - what is the name of the group?

From: psims@eac.gov [mailto:psims@eac.gov]
Sent: Thursday, May 04, 2006 3:13 PM
To: Donsanto, Craig
Subject: RE: Voting Fraud-Voter Intimidation

Craig:

This meeting is being held to obtain input from our eight-member Working Group for the project. The group is composed of election lawyers, election officials, and a representative of an advocacy group, all of whom have an interest and some expertise in the identification and/or prosecution of voting fraud and voter intimidation. The group was chosen so that we would have an equal number of folks on each side of the political spectrum, plus some nonpartisan members.

After our consultants review the results of their preliminary research (interviews, literature review, case law), we will ask the Working Group to brainstorm possible next steps for EAC. Our consultants will write a report summarizing the proposals that come out of this meeting. The report will go to the Commissioners, who will decide what they want to do, funds available, and what priority to assigned to the effort(s).

Your participation in this part of the process is extremely important, so I am very happy that you can find time for us that afternoon. I'll get an agenda and other information to you next week. --- Peggy

"Donsanto, Craig" <Craig.Donsanto@usdoj.gov>

05/04/2006 02:32 PM
Okay, Peg - - I will mark off the entire afternoon and try to be there. What is the agenda? I was not aware that this was anything beyond having your contractors spend another session with me. Also, if they will be needing stats and stuff like that I need to know as I will bring my state-people with me.

Afternoon of May 18 -- 2:30 okay? How long will they need??
-----------------------------
Sent from Dr. D's Fabulous BlackBerry Wireless Handheld
I am looking at the afternoon of 5/18 for the meeting, due to scheduling conflicts of Working Group members. There remain two members from whom we have not yet received confirmations of their schedule (with some, it is like pulling teeth), but right now 5/18 still looks like the best day. We may have to hold the meeting over here to make it easier for Commissioners to drop in.

--- Peg

Okay -- you are on for May 18th! Can we do it over here at 10?

Sent from Dr. D’s Fabulous BlackBerry Wireless Handheld

My problem is that agency staff is booked most of the week of 5/21. Monday through Wednesday are taken up with meetings of the Standards Board Executive Committee, the full Standards Board, and the Board of Advisors. Thursday, we have EAC’s public meeting. Also, I will lose one of my two consultants in June, so I’m trying to wrap up this project (and get the final report from the consultants) by the end of May.

Say "Hi" to Cameron for me.
Hi Peg. I am sitting here with Cameron Quinn putting together this year's bailing conference for AUSAs. She sent her best!

I am available on 5/18. But I am also going to the Board of Advisors Meeting the following week. I would rather do this then.

Subject RE: Fraud Definition

Lets raise this issue at the meeting. (I'll add "DRAFT" to the current document.) My concern is that there are a number of requirements in the Voting Rights Act. Not all of them are considered election fraud, when violated. For example, failure to preclear changes in election procedures is not treated as election fraud, though it is actionable. --- Peggy

Subject Re: Today's Teleconference

The teleconference is on. However, I am still one person down for the meeting and I am not comfortable. This will have to be discussed since from the start it was agreed that the WG would be equal and if I lost a person Tova would have to loose one. Further and most importantly, I don't yet have a hotel so my attendance is still up in the air. Finally, the agenda is not what we discussed and gives far too much time for areas that can be covered in a short time. Not listed are all of the questions that Tova's proposed agenda had. All in all, it needs to be redone.

Peggy:

4:00 eastern on Tuesday is fine however, given the financial restrictions that you indicated would be in place for use of my car (I would actually loose money coming to DC) and given the cost of hotels at this time (I can't afford to front these costs and wait for months to be repaid), etc, it would take a miracle for this working group meeting to take place in person. It is looking like the only way it will get done is by teleconference. I also share Tova's concern about the unknown nature of Mr. Perez.

Job

--- psims@eac.gov wrote:

> Hi, Folks:
> > Teleconference
> > Are both of you available for a teleconference next Tuesday afternoon at about 4 PM EST? If this does not work for you, please suggest another date and/or time. I would like to discuss our preparations for the Working Group meeting.
> > Working Group Members
> > We have a very good person to fill the slot for the nonpartisan local election official: J.R. Perez, Elections Administrator for Guadalupe County, TX. Attached is his bio. Hope you have no objections to him. He is available on May 18. I have place 2 calls to Pat Rogers office, but have not yet received a reply. Job, if you have any pull with him, you may want to contact him, too.
> > Travel Arrangements
> > You should make your own travel arrangements, including hotel. Travel time cannot be billed to the contract, except for hours actually worked on the contract (i.e.; reviewing materials in preparation for the meeting, and the like). Current Federal rates follow:
Maximum Lodging = $180 per day - does not include hotel taxes (if you cannot get this rate, we have covered reasonable rates that are a little higher)

Meals & Incidentals = $64 per day (except that it is $48 on the first and last day of travel)

Mileage for Personally Owned Vehicle = $.445 per mile

Under the new contract, I do not have to fill out a travel authorization. I can approve your trip via email. Afterwords, when you turn in your next pay voucher, you can attach the airline receipt (or mileage documentation), hotel receipt(s), and ground transportation receipts and a copy of any printed itineraries. Calculate the total travel expenses due you, including applicable per diem. I do not need meal receipts.

Job, under Federal travel regulations, deviations for personal reasons are not normally accommodated. What you can do, however, is to give me a comparison of the cost of roundtrip mileage, hotel, and per diem of doing it your way against the cost of a roundtrip flight, ground transportation, hotel, and per diem. If your way costs less, it should be no problem to cover the full cost. If your way is more expensive, we may only pay up to the amount of traditional travel. (The same rules apply to me when I travel.) If you can tell me where, other than DC, you will spend the night, I can check on applicable per diem rates.

Peggy

What political party is Perez with? How political is he? Is the position in Texas neutral or political? Who appointed Perez?

As to Pat I will contact him but I can't promise anything. If Pat can't come, who is getting knocked off Tova's list?

Job
Dear Mr. Ginsberg:

This is to confirm my call to your office this morning inviting you to be a member of and attend the upcoming meeting of the U.S. Election Assistance Commission's (EAC) Working Group on Voting Fraud-Voter Intimidation. The meeting is scheduled to take place from 1:00 PM to 5:30 PM on Thursday, May 18th, 2006 at the offices of the U.S. Election Assistance Commission (EAC), 1225 New York Avenue, NW, 11th Floor, Washington, DC.

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute are the development of:

- Nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- Methods of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority. Subsequently, the Commission contracted with two consultants (Job Serebrov and Tova Wang) to:

- Develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- Perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- Establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- Provide the description of what constitutes voting fraud and voter intimidation, and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- Produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

We strive to include bipartisan representation on the Working Group associated with this project. You were recommended for this project by our Republican consultant, Job Serebrov. Your ideas for possible EAC activities related to this topic will help the agency as it plans future actions to meet its HAVA responsibilities.

If you can find the time in your busy schedule to participate, I will have an information packet delivered to your office by COB, Monday, May 15. Please let me know if you are available. Thank you.

Regards,

Peggy Sims

OK, I get it. The text in the attachment follows:
§ 31.032. APPOINTMENT OF ADMINISTRATOR; COUNTY ELECTION COMMISSION.

(a) The position of county elections administrator is filled by appointment of the county election commission, which consists of:

(1) the county judge, as chair;
(2) the county clerk, as vice chair;
(3) the county tax assessor-collector, as secretary; and
(4) the county chair of each political party that made nominations by primary election for the last general election for state and county officers preceding the date of the meeting at which the appointment is made.

(b) The affirmative vote of a majority of the commission's membership is necessary for the appointment of an administrator.

(c) Each appointment must be evidenced by a written resolution or order signed by the number of commission members necessary to make the appointment. Not later than the third day after the date an administrator is appointed, the officer who presided at the meeting shall file a signed copy of the resolution or order with the county clerk. Not later than the third day after the date the copy is filed, the county clerk shall deliver a certified copy of the resolution or order to the secretary of state.

(d) The initial appointment may be made at any time after the adoption of the order creating the position.

§ 31.035. RESTRICTIONS ON POLITICAL ACTIVITIES.

(a) A county elections administrator may not be a candidate for a public office or an office of a political party, hold a public office, or hold an office of or position in a political party. At the time an administrator becomes a candidate or accepts an office or position in violation of this subsection, the administrator vacates the position of administrator.

(b) A county elections administrator commits an offense if the administrator makes a political contribution or political expenditure, as defined by the law regulating political funds and campaigns, or publicly supports or opposes a candidate for public office or a measure to be voted on at an election. An offense under this subsection is a Class A misdemeanor. On a final conviction, the administrator's employment is terminated, and the person convicted is ineligible for future appointment as county elections administrator.
Do you have text to replace the corrupted text in paragraph 4? -- Peggy

The non-election officials on the Working Group currently include:

- Barry Weinberg, whom you know
- Barbara Arnwine, Lawyers Committee for Civil Rights Under Law (organization associated with the Voting Rights Project and Election Protection)
- Bob Bauer, Perkins Coie, DC (Democrat attorney)
- Mark "Thor" Hearne, Lathrop & Gage, St Louis, MO (Republican attorney)

I am trying to recruit one other Republican attorney, Patrick Rogers, Modrall, Sperling, Roehl, Harris and Sisk, NM, who was recommended by our Republican consultant. He would replace an original member who is no longer available.

I know that Barbara has associated at conferences and in legislative efforts with Wade Henderson, Leadership Conference on Civil Rights. Also, the Lawyers Committee for Civil Rights is listed as on of many members of the Executive Committee for the Leadership Conference on Civil Rights (see http://www.civilrights.org/about/lccr/executive_committee.html).

Does this information help? --- Peggy

"Donsanto, Craig" <Craig.Donsanto@usdoj.gov>

Peggy -- they don't have anything to do with the Leadership Conference on Civil Rights do they?

I ask only because the Justice Department is currently engaged in a very acrimonious FOIA litigation with LCCR that focuses precisely on our efforts to combat voter "intimidationm"

Subject: RE: Voting Fraud-Voter Intimidation

Craig:

This meeting is being held to obtain input from our eight-member Working Group for the project. The group is composed of election lawyers, election officials, and a representative of an advocacy group, all of whom have an interest and some expertise in the identification and/or prosecution of voting fraud and voter intimidation. The group was chosen so that we would have an equal number of folks on each side of the political spectrum, plus some nonpartisan members.

After our consultants review the results of their preliminary research (interviews, literature review, case law), we will ask the Working Group to brainstorm possible next steps for EAC. Our consultants will write a report summarizing the proposals that come out of this meeting. The report will go to the Commissioners, who will decide what they want to do, funds available, and what priority to assigned to the effort(s).

Your participation in this part of the process is extremely important, so I am very happy that you can find time for us that afternoon. I'll get an agenda and other information to you next week. --- Peggy

Subject: Re: Voting Fraud-Voter Intimidation

I am looking at the afternoon of 5/18 for the meeting, due to scheduling conflicts of Working Group members. There remain two members from whom we have not yet received confirmations of their schedule (with some, it is like pulling teeth), but right now 5/18 still looks like the best day. We may have to hold the meeting over here to make it easier for Commissioners to drop in.

My problem is that agency staff is booked most of the week of 5/21. Monday through Wednesday are taken up with meetings of the Standards Board Executive Committee, the full Standards Board, and the Board of Advisors. Thursday, we have EAC's public meeting. Also, I will lose one of my two consultants in June, so I'm trying to wrap up this project (and get the final report from the consultants) by the end of May.

Peggy:

I can't predict when I get home but it is between 5:30 and 6:30 my time. I know that is generally too late to have a teleconference.

I plan to review Tova's recommendations this weekend and work on my own as well as expanding the explanation of the case section.

Please see what your financial officer did with regards to my travel.

Thank you,

Job

Peg:

I just arrived home for lunch. I can no longer take
time during the work day for telephone conferences.
As I told you I will need to finish this project after
daily working hours. I am still getting things done
from being out for ten days. I will review Tova's recommendations and
expand on mine this weekend.

Also, I sent you an e-mail asking how you handled
the mileage portion of my travel voucher?

Peg:

I just arrived home for lunch. I can no longer take time during the work day for telephone conferences. As I told you I will need to finish this project after daily working hours. I am still getting things done from being out for ten days. I will review Tova's recommendations and expand on mine this weekend.

Also, I sent you an e-mail asking how you handled the mileage portion of my travel voucher?

I'll see how it comes in. I hope we receive an electronic copy. If we only receive a hard copy, we can pdf it and email it to the two of you. How about Monday afternoon at 3 PM EST for a brief teleconference? I really can't do it before then because of other commitments. --- Peggy

Hi, What's going on? I have not received responses from either one of you in a week. I'd like to wrap this up in the next two weeks if we can. Did you get my recommendations? Thanks.

Tova

What time do you arrive home from work? Perhaps we could talk then?

Re your question on the mileage, I have approached our Financial Officer with a request that you receive 019631
full reimbursement on the grounds that your actual total travel costs are less than the estimated total travel
costs if you had flown to DC, stayed in our more expensive hotels, and received the higher per diem for 3
days (instead of 1). I have not yet received a response from her and she has been out of the office much
of this week, so I don't know what she decided to do. --- Peggy

I can't predict when I get home but it is between 5:30 and 6:30 my time. I know that is generally too late to have a teleconference.

I plan to review Tova's recommendations this weekend and work on my own as well as expanding the explanation of the case section.

Please see what your financial officer did with regards to my travel.

Thank you,

Job

Subject question

Am I correct in assuming that I still cannot discuss the findings of our report? Thanks.
Peggy:

In the transcript, there is one serious mistake that must be changed immediately. On page 5 it indicates that I helped review and draft changes to the election code of Libya. It should be Namibia not Libya. The reason this is so serious if it stands is that at the time I reviewed Namibia's Code it was illegal for Americans to deal with Libya. I need to know that this has been corrected any ALL parties who have seen the transcript notified.

Subject RE: Your Materials

I think they are panicking because they are preparing to travel tomorrow and may not have time to submit a revised version. They also are resisting changes to their interview summaries because the summaries represent what they think they heard. I was there at the interview and I heard what you said. I'm not sure that either of them heard everything (including the nuances) because so much of the information was new to them and it was one of their earlier interviews. I'm sorry I did not catch the defects before the summary went out.

My first concern is ensuring that the Working Group has the correct information. Then, we can deal with what version, if any, goes in the final report. Do you want me to excerpt the corrections from your email and submit them to the Working Group? --- Peggy

"Donsanto, Craig"<Craig.Donsanto@usdoj.gov>
Sure. But where is the resistance coming from? The notes were not accurate. As you know, I have to be very concerned about that.

Craig:

I am getting some resistance from my consultants to correcting the summary of the interview prior to the meeting. Would you mind noting the corrections at the meeting? --- Peggy

Thank you, Peg. This stuff is very interesting.

I have forwarded your message to our consultants and have requested a corrected version for distribution at the WG meeting. --- Peggy
I have read over the materials you sent to me and viewed the pieces on the CD.

I have only one correction:

I did not say that offenders who receive target letters routinely request - - or routinely receive - - audiences here at DOJHQ. That is very rare. Instead, what usually happens is that once a subject for an election fraud investigation is advised that he or she is going to be charged that person usually enters into plea negotiations and ultimately pleads guilty. Very few federal election fraud cases go to trial. When a subject does request a HQ interview or a HW hearing, it would be held in the first instance by myself. But again, Peg, that is rare.
Also, while the occurrences of prosecutions of isolated instances of felons and alien voters and double voters has increased, we still aggressively and I believe quite successfully pursue systematic schemes to corrupt the electoral process, as the cases we brought recently out of Knott and Pike Counties in Kentucky, those we brought out of Lincoln and Logan Counties in West Virginia, and those we brought in New Hampshire growing out of the jamming of get-out-the-vote phone bank lines attest.

Subject RE: Your Materials

The first item is not as big a deal as the second one: the processes under which subjects of investigations come to Jesus is not as important as the overall assessment of our law enforcement achievements. But stressing the isolated test cases we brought - - and will continue to being - - to deter things like felon voting, alien voting and double voting, which not mentioning such significant achievements as the five case PROJECTS mentioned in my last e-mail - - misrepresents what we are doing and the deterrent message we are trying to communicate.

I appreciate that these two young people may have found themselves in a Brave New World when they came over here. It showed in their questioning. But the fact that criminal law enforcement is not at all similar to preventative legal relief (as under the Voting Rights Act) or civil relief (as election contest litigation) is I guess more of a problem than I at first foresaw. My real concerns is that the civil rights groups - - with whom we over here have an amazing amount of common grounds - - will take the singling out of the felon and alien voter cases as evincing a malevolent aggression on their constituencies. That is not the case. We are only enforcing the law.

Peg - -

This is a complicated issue largely because of two things: 1) there is a lot of ambiguity out there as to what constitutes "intimidation." To the civil rights community, "intimidation" means anything that makes voting uncomfortable or less than automatic. To us in the criminal law enforcement "intimidation" means threats of economic or physical nature made to force or prevent voting. Only the latter involve aggravating factors that warrant putting offenders in jail, and the statutes that address "intimidation" from a criminal perspective are thus limited. We have never had many "intimidation" criminal cases. For one thing, in this modern post voting rights era, there is not a lot of physical/economic duress out there in the voting context - - at least not that I have seen. For another, where it does occur it is very hard to investigate and detect as victims who have been physically or economically intimidated are not likely to come to the FBI.

The bottom line is that we take matters that do present predication for physical or economically based "intimidation" very seriously, AND that we are being extremely proactive in trying to find ways to prosecute matters involving voter suppression as in the Tobin cases in New Hampshire where the local GOP tried to jam telephone lines for a GOTV effort run by the Dems. But even there - - the usual "suppression" matter involves flyers that are passed around giving out misleading information about an election, and we have investigated every one of those that came to our attention last election cycle. We were not able to identify the person(s) responsible for printing the misleading flyers in any of these. But we sure as heck tried.
Craig:

I'm putting the finishing touches on a status report to the EAC Standards Board and EAC Board of Advisors on our Voting Fraud-Voter Intimidation research project. For the most part, I am using our consultants summaries for the report, but one bullet under the interview summaries is giving me heartburn. It is the bullet that references the decrease in DOJ voter intimidation actions. It is one of the places in which our consultants had indicated that your office is focusing on prosecuting individuals. I have reworded it and would like your feedback on the revision:

Several people indicate - including representatives from DOJ -- that for various reasons, the Department of Justice is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. While the Voting Section of the Civil Rights Division focuses on systemic patterns of malfeasance, the Election Crimes Branch of the Public Integrity Section has increased prosecutions of individual instances of felon, alien, and double voting while also maintaining an aggressive pursuit of systematic schemes to corrupt the electoral process.

Please suggest any changes that you think would further clarify the current approach. --- Peggy

03/26/2006 10:41 AM To psims@eac.gov,"Job Serebrov" cc SUBJECT: RE: Request to interview AUSAs

I still think we should include the recommendations in the report

-----Original Message-----
Below is Craig's response to the request to interview AUSAs. It does not appear that this avenue is likely because the AUSAs are so busy...

Also, he asked about permission for other folks to attend the election crimes training session, and the answer was "no". (I can't even get in, and I'm a federal employee.). I understand that a good part of the reason is practical -- they are having enough trouble accommodating the folks that are required to come.

I did not say that offenders who receive target letters routinely request or routinely receive audiences here at DOJHQ. That is very rare. Instead, what usually happens is that once a subject for an election fraud investigation is advised that he or she is going to be charged that person usually enters into plea negotiations and ultimately pleads guilty. Very few federal election fraud cases go to trial. When a subject does request a HQ interview or a HW hearing, it would be held in the first instance by myself. But again, Peg, that is rare.

Also, while the occurrences of prosecutions of isolated instances of felons and alien voters and double voters has increased, we still aggressively and I believe quite successfully pursue systematic schemes to corrupt the electoral process, as the cases we brought recently out of Knott and Pike Counties in Kentucky, those we brought out of Lincoln and Logan Counties in West Virginia, and those we brought in New Hampshire growing out of the jamming of get-out-the-vote phone bank lines attest.

I don't think anyone should be given the opportunity to correct mistakes.
OK. Weather is not going to be great in DC Thursday. I hope that does not delay me.

"Weinberg and Utrecht"
Hi Peg,

Attached please find our joint working definition of voter fraud and intimidation.

This is also to let you know that Job and I have agreed that I may speak with political and social scientists with expertise in methodology and data collection alone.

Finally, the types of expenses that we are incurring unrelated to travel include such items as long distance phone calls, particularly between Job and myself, but also between me and the political scientists mentioned above; and books such as John Fund's "Stealing Elections," Andrew Gumbel's "Stealing the Election," and "Deliver the Vote: A History of Election Fraud, an American Political Tradition-1742-2004" by Tracy Campbell, which cost in the $25 range each. I also ordered the 2005 National Directory of Prosecuting Attorneys for $50. Another potential expense might be shipping fees if we want to exchange material that cannot be emailed. Please let us know how you would like us to arrange for reimbursement for such expenses.

Thanks.
Tova

> Dear Tova and Job:
> >
> > Rest assured that I have not ignored your emails. We have a lot going on around here, and have had to use a triage system to tackle all of the things that currently need our attention. I understand that Julie has responded to Tova's question about the September monthly report, indicating that the nomenclature refers to work done in September, not a monthly report due in September. Here are responses to other questions you have raised, and some concerns of mine:
> >
> > Teleconference - We do need a teleconference this week to discuss some procedural issues and any remaining concerns that you may have. At the moment, my schedule for the remainder of the week is flexible. When would a teleconference be convenient for you two?
> >
> > Working Group - I am circulating your lists of possible working group members to our Commissioners for review and comment. I will get back to you as soon as I have heard from everyone. This may take awhile, probably through the end of November, as one of our Commissioners is out of the office for an extended period due to a death in the family.
> >
Revised Workplan - Due to political sensitivities regarding this project, it is more important than usual that you act as a team. I noticed several instances on the revised workplan where only one of you is scheduled to be involved. While it seems to me that it would be OK for one or the other to take the lead on a particular aspect of the work (e.g.; developing Westlaw search terms, drafting a research instrument, or setting up interviews), it is very important that both of you be involved in making final decisions on the information gathering process and in the resulting information gathering effort (e.g.; finalizing the Westlaw search terms and reviewing the search results; finalizing the proposed research instrument, administering the survey, and reviewing the survey responses; and conducting interviews).

DOJ Contact - I am working through the DOJ bureaucracy to obtain the input we need from the Election Crimes Branch. I have spoken to the career attorney I mentioned in previous teleconferences, Craig Donsanto. He is very interested in providing information and perspectives that will be useful to the project; but may have to obtain his superior's permission to participate. I will keep you posted on my efforts. Once we have access to him, it will be important to schedule an initial interview at the earliest time convenient for him and the two of you.

Contacting Other EAC Contractors - Questions for other EAC contractors need to be fielded through me. I realize this may seem cumbersome, but there are a number of reasons for this, some involving contractual issues, some procedural and policy issues. I will have to coordinate our activities on this project with the EAC project manager for the other EAC research project(s). Together, we will ascertain what the other contractors already have provided to EAC that may answer your questions, perhaps without an interview being necessary, or if the research is not far enough along to provide the information you seek.

Peggy Sims
Somehow I did not get the original email with the search results. Would someone please send them to me? Thanks. Tova

Job,

I was using Lexis because I don't have inter-semester access to Westlaw. In addition, Westlaw does not allow me to restrict to specific dates. However, I called the dean of my school this morning and he granted me access to Westlaw for the break on a limited basis, so I will start fresh with the terms.

In the student version of Westlaw, I can choose cases in the past 3 or 10 years, but cannot select a date range. I will use the 10 year limitation unless you write to tell me otherwise.

I'll send results tonight.

Thanks,

"Job Serebrov" <serebrov@sbcglobal.net>
my last e-mail that I wanted you to use Westlaw because you can pull up a short case evaluation for each case. These are no good to us without these evaluations. The evaluations list the parties, a short statement of facts and a short summary of the court's holding. I can only evaluate these cases with such a summary. Sorry to send you back to the drawing board but better now then after you substantially completed the assignment. If you can get these kind of evaluations with Lexis then go ahead but if not you need to use Westlaw.

Regards,

Job

Hi Peg,

Hope you're enjoying the holiday weekend. Job and I are having a bit of a disagreement about how we should be handling the existing research materials and would like to briefly discuss this with you. Are you available on Tuesday morning? We are both available until 11:30 am. Thanks so much.

Tova

Oops! I had an appointment Tuesday morning and did not see your message until after Noon. (When I have my Blackberry, I will be able to respond more promptly.) Are you two available any other time today? I will be out of the office Wednesday through Monday, but will be back in the office Tuesday afternoon. --- Peggy

Fax: 202-566-3127
The Law Clerk's name is Tamar Nedzar. She is very sharp. Our intern's name is Devon Romig.

Tamar has the most recent lists of search terms and may have questions about them. Devon will need to know how you want the press clippings sorted by type of voting fraud. I think we need to give her a specific list. that, I hope, will not overlap. For example, do you want her to sort using the term Absentee Ballot Fraud when that can involve voter intimidation/coercion/undue influence, vote buying, ballot tampering, and ballot box stuffing (by voting in the name of another or under a fictitious name).

We need to discuss this because I am concerned that we currently do not have a full written description of what does and does not constitute voting fraud and voter intimidation. The current written definition excludes voter registration shenanigans; yet, voter registration applications submitted with fictitious names or that falsely affirm eligibility to vote are considered election crimes that can have an impact on election results. Specifically, they are used in schemes to vote more than once or to have ineligible persons participate in voting. Also, an increasing number of States are including as an election crime the knowing and willful destruction of voter registration applications by voter registration drives and their failure to transmit such applications to the election office in a timely manner.

If we define voting fraud as any illegal act that has a clear and direct distorting impact on the election results, then administrative mistakes that violate federal or State law could be included. For federal elections, administrative mistakes definitely are not considered voting fraud. The examples provided for "de facto" fraud and "quasi" fraud also are not likely to be considered part of voting fraud and voter intimidation without evidence that there also is ballot box stuffing, vote buying, tampering with ballots or vote tallies, voter intimidation, etc. Although a number of things other than voting fraud and voter intimidation can (and do) distort election results, EAC is handling such issues under separate research efforts.

For your information, I have attached a speech presented by Craig Donsanto (complete with typos) that addresses the issue of defining voting fraud. Perhaps it will be of interest to you.

Job:

This is just to remind you that I will be calling today at 4:00 PM EST (3:00 PM CST). --- Peggy

Tova and Job,

It was good to talk to you today. Hope you are doing well. I've attached my African American search results below. It encompasses all of the terms you suggested having to do with African Americans.

The following is a search I used to truncate words and combine terms, but I still got a large number of results:

Vot! and deny and black or vot! and black and challenge or vot! and black and reject or vot! and black or vot! And deny and African w/s American or vot! And African w/s American and reject or challenge or vot! And African w/s American or election and black and deny or challenge or reject or election and black or election and African w/s American and deny or challenge or reject or election and African w/s American or ballot and security and black or ballot and security and African w/s American or black and vot! And suppress! Or African w/s American and vot! And suppress or African w/s and disenfranchis! or black and disenfranchis!

If this search yields useful cases for you, I can continue searching using the same strategy. If not, please provide me with additional guidelines and I will do my best!

Please feel free to contact me should you have any questions or need additional information.

Thank you,

RE: Voting Fraud Teleconference-Meeting-Work
Schedule

Peg, This all sounds good. Will you be calling us
on Wednesday?

I should not need a hotel for the 28th. Just let me
know what time. Are
there expense forms we should have for
reimbursement?

On the work product, we did send Karen a very
preliminary draft of a work
plan. I attach it again here and we can talk about
it more on Wednesday.

My only money question is, are we being paid on a
monthly basis? And if
so, when does that begin? I assume this all is in
the contracts we'll be
getting...

Thanks.

Tova

Subject: Voting Fraud Teleconference-Meeting-Work
Schedule
Tova and Job:

Teleconference -
Let's schedule the teleconference for 4:00 PM on
Wednesday, October 5.
Gavin Gilmour will join us.

Meeting -
October 28 is fine for the face-to-face meeting in
DC. We have allocated
$5,000 to each of you to cover reasonable and
necessary travel and other
incidental expenses. Expenses claimed for
reimbursement need to be
itemized, with appropriate receipts provided. You
should be able to,
obtain the Federal government rate at an area hotel
(if you plan to stay
overnight). If the hotel needs a letter from EAC
(in lieu of showing them
your signed contract), just let me know. Airlines
apparently no longer
honor government rates for government contractors.
Rail carriers may
provide government rates for government contractors.
If you drive, the
current government rate for a personally owned
vehicle (POV) is 48.5 cents
per mile.

Deliverables -
The first item on the list of deliverables is the
draft project workplan,
which is due ASAP after award. Would it be possible
for the two of you to
deliver a draft workplan to me via email by 10/11?
That would be after we
have had our teleconference to work out lingering
questions.

Questions for Finance -
If you have questions for our Finance Officer, you
can reach her via email
at dscott@eac.gov. I would appreciate it if you
would cc: me on such
emails, so that I know to follow up with her.

(direct)
Fax: 202-566-3127
email: psims@eac.gov
In the course of compiling a list of search terms for the nexis research, I thought of some major omissions to the WESTLAW list.

Everywhere we have a term such as African American and .... or Latino and .... we should also have the following:

Asian American (and if possible, Chinese, Korean, Vietnamese)
Native American
Indian
Indian Country

Moreover, everywhere we have poll worker or poll inspector we should also have the following:

Poll judges
Poll monitors
Poll observers

Let me know if you want me to re-do the list.

Tova
Can you give us a better idea of the other EAC research projects that you think we might overlap with if we include these activities? Job and I had strong reasons for what we did and did not include and how we wanted to frame the term fraud, so we do indeed need to discuss this -- perhaps before or after the discussion with Tamar and Devon?

Thanks. Tova

Job:
Devon set up the folders before she completed her review of the articles. I saw that the folders were empty, but did not ask her to remove them. If you copy the CD contents to a file on your computer, you may yet use the empty folders to file relevant articles found subsequent to Devon's sorting. For example, I have a few recent articles that I will send via email. When we come across articles that belong in the empty folders, we can put them there. --- Peggy

The following file folders on the disc you sent me were empty:

Misleading Ex-felon Voting Right
Non-Citizen Voting
Wrongful Removal of Eligible Voters from Registration Lists

If they were blank file folders, why were they included?

Job
Subject Various

Peggy:

Tova and I will need copies of your vote fraud literature file. Also, do you want a one liner on all of the people proposed for the working group or just the three that we are recommending for the final group?

Any work from Gavin?

Job

----- Forwarded by Margaret Sims/EAC/GOV on 11/29/2006 04:39 PM -----

Tova and Job,

I am requesting that we be able to have four instead of three from each side. I have four very good people who have a lot of experience in this area. I left you a telephone call on this matter. I know we have to watch the budget but one of my picks is in DC and will not cost much if anything to get to meetings. I know that Tova also had DC people that she could add as a fourth.

Subject: Requesting Your Help-Preliminary Research on Voting Fraud and Voter Intimidation

Hi, Craig:

As I mentioned in my telephone call earlier today, I have been assigned to manage the U.S. Election Assistance Commission's (EAC) preliminary research project on voting fraud and voter intimidation. I know these are subjects.
with which you are intimately familiar and recognize that the project needs the information and insights that you can provide, so I am asking for your help.

As you know, section 241 of the Help America Vote Act of 2002 requires EAC to conduct research on election administration issues. Among the issues listed in the statute are:

* nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
* identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that EAC make research on these topics a high priority. Subsequently, the Commission contracted with two consultants (Tova Wang and Job Serebrov) to:

* develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
* perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
* establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
* provide the description of what constitutes voting fraud and voter intimidation and the results of the background research to the working group;
* convene the working group to discuss potential avenues for future EAC research on this topic;
* produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;
* draft the project scope and Statement of Work for future research on these topics, if EAC decides to pursue one or more recommendations for future research.

At minimum, I hope that you can serve as an information resource for the team of two EAC consultants hired to conduct the research and me. I also would like to explore the feasibility of your participation in meetings of the project working group.

If EAC needs to submit a more formal request for your help, please advise me how to do so. Also, it would help me to know if there are any restrictions on your participation, other than anticipated restrictions on the time you have available.
Let me know if you have any questions about this request or the research project. I look forward to hearing from you and hope you are doing well.

Subject Question

Peggy:

We need to have a conference call this week if possible. I will have the one liner bios to you today. Also, when do you think the Commission with make its choices?

Job

----- Forwarded by Margaret Sims/EAC/GOV on 11/29/2006 04:39 PM -----
I am available for a 3-way teleconference after Noon on Wednesday this week. My schedule on Thursday and Friday is flexible, as well. When would be best for you two? I can call the telephone numbers you prefer and set up the conference call from my desk.

Both the 24th or the 28th are fine with me for the face-to-face meeting. Which do you prefer? If you have no preference, I suggest we pick the earlier of the two.

Regarding your contracts, I understand that the contract will carry the date of 9/25/05. All contracts have to be signed by the Chair, who has been out of the office on Commission business. I have been told that she will sign off on your contracts, among others, today. Our financial officer will send it to you after that. I'll try to obtain copies and fax the appropriate one to you as soon as they have been signed.

Regarding your pay, the contract will state that you should submit a monthly invoice to EAC for payment of your fee for that month. The contract is for 6 months, so our Finance Officer, Diana Scott, wants you to submit an invoice to her each month for 1/6th of the total payment, beginning 10/25/05.

I look forward to talking again with the two of you.

Subject: Travel to DC and Proposed Working Group Members

Dear Tova and Job:

I have been advised by our Counsel that, since the contracts have not yet been signed, we will have to postpone our October 28th meeting. Tova, for future reference, the per diem rates for DC (the Greater Washington, DC area) can be accessed through that web site I provided by clicking on the District of Columbia link on the map.

I also have to ask you to hold any further efforts on the Working Group until further notice. We are going to have to limit the number in the group to no more than six. EAC has to pay for the travel for these folks out of FY 2006 dollars. The agency currently is operating under a continuing resolution, and may not have its FY 2006 budget until December 2005, or later. When you submit the names of possible Working Group members, I will need a summary of their work in studying or enforcing laws against voting fraud and voter intimidation. (It is not sufficient to have expressed an interest in these matters, we need experienced folks.) The working group can include nonpartisan members, so long as any partisan-leaning members are balanced (i.e.; 1 R for 1 D).

I am sorry for any inconvenience that this may cause. I wish I had the power to change the situation, but I don't.

Peggy Sims

019720
I will initiate the calls to you two on Wednesday. The number I have for Tova is (__). For Job, I have [redacted]. Let me know if I should use a different number for you on Wednesday.

Thanks, Tova, for the copy of the draft work plan you provided to Karen. I'll take a look at it and, hopefully, provide some feedback on Wednesday. I have not yet caught up to all the paperwork and emails that preceded my assignment to this project. Karen just handed me a folder full of documents that should help.

I think you may have received an email from Nicole Mortellito regarding an October 14 meeting. If you two cannot come in person but can attend via phone, just let me know. Nicole's message has information regarding hotel rates that conflicts with what I've just sent you. I've asked her to double check her information because I have another contractor that has had no problem obtaining government rate at hotels.

Yes, you will be paid on a monthly basis. You can file your first invoice on October 25, according to Diana Scott.

Peggy Sims

Fax: 202-566-3127  
email: psims@eac.gov

Peg, This all sounds good. Will you be calling us on Wednesday?

I should not need a hotel for the 28th. Just let me know what time. Are there expense forms we should have for reimbursement?

On the work product, we did send Karen a very preliminary draft of a work plan. I attach it again here and we can talk about it more on Wednesday.

My only money question is, are we being paid on a monthly basis? And if so, when does that begin?
assume this all is in the contracts we'll be getting...

Thanks.

Tova

Subject: Voting Fraud Teleconference-Meeting-Work Schedule

Tova and Job:

Teleconference -
Let's schedule the teleconference for 4:00 PM on Wednesday, October 5. Gavin Gilmour will join us.

Meeting -
October 28 is fine for the face-to-face meeting in DC. We have allocated $5,000 to each of you to cover reasonable and necessary travel and other incidental expenses. Expenses claimed for reimbursement need to be itemized, with appropriate receipts provided. You should be able to obtain the Federal government rate at an area hotel (if you plan to stay overnight). If the hotel needs a letter from EAC (in lieu of showing them your signed contract), just let me know. Airlines apparently no longer honor government rates for government contractors. Rail carriers may provide government rates for government contractors. If you drive, the current government rate for a personally owned vehicle (POV) is 48.5 cents per mile.

Deliverables -
The first item on the list of deliverables is the draft project workplan, which is due ASAP after award. Would it be possible for the two of you to deliver a draft workplan to me via email by 10/11? That would be after we have had our teleconference to work out lingering questions.

Questions for Finance -
If you have questions for our Finance Officer, you can reach her via email at dscott@eac.gov. I would appreciate it if you would cc: me on such emails, so that I know to follow up with her.

I probably could give two to three days in January.

--- Tova Wang wrote:

> As I mentioned to Job earlier, I think we need to
meet as soon as possible
in order to develop and pare down our lists of who we want to interview,
determine how we are going to go about doing the interviews (in-person,
phone, email), schedule such meetings, decide what themes we agree to
discuss with them; go over existing research and how we will work on
summarizing existing findings; hammer out what is within the scope of our research; meet with the intern and law clerk;
discuss how we are going to do the case law research; etc. Up to now, we both agreed, we have been operating in a bit of a void. We've been trying to do this meeting for months.

Is it that you think we can combine this meeting with a meeting with Craig?
I actually think they need to be separate since I think both will be very laborious and very different in nature.

However, I will defer to whatever you, Peg, think best. I don't feel so strongly about it that I will be extremely upset if we wait until January.

Thanks.

Tova

Washington, DC 20005
(202) 566-2377
http://www.eac.gov
TNedzar@eac.gov

Tamar:

You are not going to be able to place all of these word searches together. We need you to take each term on the list and do a search on it. You can only merge terms when it will not add other terms and therefore affect the outcome. For instance, vote and voter could probable be merged. I know this creates much much more work but it can't be helped. I would like you to pull the first 50 cases for each set of terms and send them
to us with a short case summary (I know Westlaw lets you do a short case summary). From there we will have to read the cases and decide if we need any others in that search term.

Regards,

Job

--- tnedzar@eac.gov wrote:

----------------------------------------
Tova and Job,

It was good to talk to you today. Hope you are doing well. I've attached my African American search results below. It encompasses all of the terms you suggested having to do with African Americans.

The following is a search I used to truncate words and combine terms, but I still got a large number of results:

Vot! and deny and black or vot! and black and challenge or vot! and black and reject or vot! and black or vot! And deny and African w/s American or vot! And African w/s American and reject or challenge or vot! And African w/s American or election and black and deny or challenge or reject or election and black or election and African w/s American and deny or challenge or reject or election and African w/s American or ballot and security and black or ballot and security and African w/s American or black and vot! And suppress! Or African w/s American and vot! And suppress or African w/s and disenfranchis! or black and disenfranchis!

If this search yields useful cases for you, I can continue searching using the same strategy. If not, please provide me with additional guidelines and I will do my best!

Please feel free to contact me should you have any questions or need additional information.

Thank you,

Subject: More Money Roulette or Double or Nothing Still Equals Zero

Dear Julie & Peggy:

I just checked my bank account and no money. That also means that Tova is also penniless. As I understood, there was actually a chance that we were getting all

016729
back pay by today. But alas---double or nothing still equals zero in this case no matter how you spin it.

Please give those wonderful folks who are in charge of releasing your funds a call and find out if they are on the beach in Brazil.

Eternally Broke,

Job

Do you agree with this? Thanks. Tova

Karen and Tom,

Thanks so much. I am looking forward to working with you and my co-consultants on what I think is an extremely important topic.

I am pretty much available any day that week except Monday the 12th, so whatever is most convenient for everyone else any other day is fine by me. Please let me know the contract specifics when possible so I can work out an arrangement with The Century Foundation (which will not be a problem). Thanks again.

Thanks Peg. I would think we would want to meet with Craig for at least an hour. We could schedule it for an hour if he is OK with it running over if necessary. If we would like statistical data from him should we request that in advance or wait until we see him to discuss what he can provide us with?

Also, does the below mean I will be receiving all three payments at once?

Thanks again. Tova
-----Original Message-----
Hi, Tova;

How much time do you want to schedule for the meeting with Donsanto? An hour? We've just received his response to our request confirming that he is pleased to be of assistance, which means he has received the OK from his superiors. I also want to include him in any Working Group discussions, although he will not be named as a member of that group. He is a great resource because he is smart and organized, and has years of experience in this area as a career DOJ attorney. I find that he is not shy about identifying challenges and noting improvements that he thinks are needed.

I signed off on all 3 of your invoices.

Subject: Contract Issues-Government Per Diem Rates

Good Morning Job an Tova:

I still do not have copies of your signed contracts. I understand that they may have to be revised if the project is going to use an EAC intern and EAC Westlaw access. I've scheduled a meeting with one of our attorneys this week to discuss the matter and will get back to you with further information, when I have it.

By now, you should have heard that the October 14 contractor meeting has been cancelled. Instead, EAC has scheduled a couple of staff meetings to review requirements for invoices and requests for reimbursement. I should have more information for you on this front by next Monday.

Today, I am sending by Federal Express the most recent copy of the Department of Justice's Federal Prosecution of Election Offenses and the Federal Election Commission's Innovations in Election Administration 8: Election Document Retention in an Age of High Technology. Let me know if you do not have it within a couple of days.

New per diem rates for federal travelers are effective October 1, 2005. You can find these rates at [a web link].

--- Forwarded by Margaret Sims/EAC/GOV on 11/29/2006 04:38 PM ---

Peggy:

I think that you have hit the major problem in voter fraud---the federal/state system. We are essentially operating under state laws that control federal elections. Administrative mistakes can amount to voter fraud because the state system controls voting procedure. I must strongly disagree with you as to whether de facto or quasi fraud needs anything else. In my 15 years of election practice and administration it needed nothing else.

We can discuss the rest of your additions to our definition at our conference call.

Job

--- psims@eac.gov wrote:

> The Law Clerk's name is Tamar Nedzar. She is very sharp. Our intern's name is Devon Romig.
> Tamar has the most recent lists of search terms and may have questions about them. Devon will need to know how you want the press clippings sorted by type of voting fraud. I think we need to give her a specific list. that, I hope, will not overlap. For example, do you want her to sort using the term Absentee Ballot Fraud when that can involve voter intimidation/coercion/undue influence, vote buying, ballot tampering, and ballot box
stuffing (by voting in the name of another or under a fictitious name).

We need to discuss this because I am concerned that we currently do not have a full written description of what does and does not constitute voting fraud and voter intimidation. The current written definition excludes voter registration shenanigans; yet, voter registration applications submitted with fictitious names or that falsely affirm eligibility to vote are considered election crimes that can have an impact on election results. Specifically, they are used in schemes to vote more than once or to have ineligible persons participate in voting. Also, an increasing number of States are including as an election crime the knowing and willful destruction of voter registration applications by voter registration drives and their failure to transmit such applications to the election office in a timely manner.

If we define voting fraud as any illegal act that has a clear and direct distorting impact on the election results, then administrative mistakes that violate federal or State law could be included. For federal elections, administrative mistakes definitely are not considered voting fraud. The examples provided for "de facto" fraud and "quasi" fraud also are not likely to be considered part of voting fraud and voter intimidation without evidence that there also is ballot box stuffing, vote buying, tampering with ballots or vote tallies, voter intimidation, etc. Although a number of things other than voting fraud and voter intimidation can (and do) distort election results, EAC is handling such issues under separate research efforts.

For your information, I have attached a speech presented by Craig Donsanto (complete with typos) that addresses the issue of defining voting fraud. Perhaps it will be of interest to you.

Peggy Sims

1225 New York Ave, NW - Ste 1100
Washington, DC 20005
Phone: 866-747-1471 (toll free) or 202-566-3120
Hi, Craig:

As I mentioned in my telephone call earlier today, I have been assigned to manage the U.S. Election Assistance Commission's (EAC) preliminary research project on voting fraud and voter intimidation. I know these are subjects with which you are intimately familiar and recognize that the project needs the information and insights that you can provide, so I am asking for your help.

As you know, section 241 of the Help America Vote Act of 2002 requires EAC to conduct research on election administration issues. Among the issues listed in the statute are:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office (section 241(b)(6)); and
- identifying, deterring, and investigating methods of voter intimidation (section 241(b)(7)).

EAC's Board of Advisors recommended that EAC make research on these topics a high priority. Subsequently, the Commission contracted with two consultants (Tova Wang and Job Serebrov) to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the background research to the working group;
- convene the working group to discuss potential avenues for future EAC research on this topic;
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;
- draft the project scope and Statement of Work for future research on these topics, if EAC decides to pursue one or more recommendations for future research.

At minimum, I hope that you can serve as an information resource for the team of two EAC consultants hired to conduct the research and me. I also would like to explore the feasibility of your participation in meetings of the project working group.

If EAC needs to submit a more formal request for your help, please advise me how to do so. Also, it would help me to know if there are any restrictions on your participation, other than anticipated restrictions on the time you have available.
Let me know if you have any questions about this request or the research project. I look forward to hearing from you and hope you are doing well.

Hi Job,

The Westlaw search took more than half an hour-I think because I can only download results into ASCII format. I did find a way to add a case summary to the Lexis output. I have attached the first search below. If this is useful to you, I would rather use Lexis because output into a PDF file is faster. If you'd still prefer me to use Westlaw, I'll have to figure out a way to shorten the search times.
Tamar:

Please use the 10 year range. The case summary is the most important item. In the US Courts version of Westlaw you can restrict by date.

Thanks,

Job

--- tnedzar@eac.gov wrote:

> Job,
> >
> > I was using Lexis because I don't have inter-semester access to Westlaw.

> > In the student version of Westlaw, I can choose cases in the past 3 or 10 years, but cannot select a date range. I will use the 10 year limitation unless you write to tell me otherwise.
> > I'll send results tonight.
> >
> > Thanks,
Tamar:  

I received your first Zip File today and there is another major problem. These look like Lexis and not Westlaw searches. The way this material is presented it is impossible to tell what is going on. I stated in my last email that I wanted you to use Westlaw because you can pull up a short case evaluation for each case. These are no good to us without these evaluations. The evaluations list the parties, a short statement of facts and a short summary of the court's holding. I can only evaluate these cases with such a summary. Sorry to send you back to the drawing board but better now than after you substantially completed the assignment. If you can get these kind of evaluations with Lexis then go ahead but if not you need to use Westlaw.

Regards,

Job

Margaret Sims/EAC/GOV  
10/03/2005 03:48 PM  
To Tova Andrea Wang, Job Serebrov  
cc Gavin S. Gilmour/EAC/GOV@EAC  
Subject Voting Fraud Teleconference-Meeting-Work Schedule

Tova and Job:
Teleconference -
Let's schedule the teleconference for 4:00 PM on Wednesday, October 5. Gavin Gilmour will join us.

Meeting -
October 28 is fine for the face-to-face meeting in DC. We have allocated $5,000 to each of you to cover reasonable and necessary travel and other incidental expenses. Expenses claimed for reimbursement need to be itemized, with appropriate receipts provided. You should be able to obtain the Federal government rate at an area hotel (if you plan to stay overnight). If the hotel needs a letter from EAC (in lieu of showing them your signed contract), just let me know. Airlines apparently no longer honor government rates for government contractors. Rail carriers may provide government rates for government contractors. If you drive, the current government rate for a personally owned vehicle (POV) is 48.5 cents per mile.

Deliverables -
The first item on the list of deliverables is the draft project workplan, which is due ASAP after award. Would it be possible for the two of you to deliver a draft workplan to me via email by 10/11? That would be after we have had our teleconference to work out lingering questions.

Questions for Finance -
If you have questions for our Finance Officer, you can reach her via email at dscott@eac.gov. I would appreciate it if you would cc: me on such emails, so that I know to follow up with her.

That's the right number. On the 14th I do want to be on by phone. I probably will only be able to be on for the beginning though. I may be able to rejoin again at the end. Will someone be taking notes?

Thanks for everything. Tova

I will initiate the calls to you two on Wednesday. The number I have for Tova is [Redacted]. Let me know if I should use a different number for you on Wednesday.

Thanks, Tova, for the copy of the draft workplan you provided to Karen. I'll take a look at it and, hopefully, provide some feedback on Wednesday. I have not yet caught up to all the paperwork and emails that preceded my assignment to this project. Karen just handed me a folder full of documents that should help.

I think you may have received an email from Nicole Mortellito regarding an October 14 meeting. If you two cannot come in person but can attend via phone, just let me know. Nicole's message has information regarding hotel rates that conflicts with what I've just sent you. I've asked her to double check her information because I have another contractor that has had no problem obtaining government rate at hotels.

Yes, you will be paid on a monthly basis. You can file your first invoice on October 25, according to Diana Scott.

Subject RE: Voting Fraud Teleconference-Meeting-Work Schedule
Peg, This all sounds good. Will you be calling us on Wednesday?

I should not need a hotel for the 28th. Just let me know what time. Are there expense forms we should have for reimbursement?

On the work product, we did send Karen a very preliminary draft of a work plan. I attach it again here and we can talk about it more on Wednesday.

My only money question is, are we being paid on a monthly basis? And if so, when does that begin? I assume this all is in the contracts we'll be getting...

Thanks.

Tova

Subject: Voting Fraud Teleconference-Meeting-Work Schedule

Tova and Job:

Teleconference -
Let's schedule the teleconference for 4:00 PM on Wednesday, October 5. Gavin Gilmour will join us.

Meeting -
October 28 is fine for the face-to-face meeting in DC. We have allocated $5,000 to each of you to cover reasonable and necessary travel and other incidental expenses. Expenses claimed for reimbursement need to be itemized, with appropriate receipts provided. You should be able to obtain the Federal government rate at an area hotel (if you plan to stay overnight). If the hotel needs a letter from EAC (in lieu of showing them your signed contract), just let me know. Airlines apparently no longer honor government rates for government contractors. Rail carriers may provide government rates for government contractors. If you drive, the current government rate for a personally owned vehicle (POV) is 48.5 cents per mile.

Deliverables -
The first item on the list of deliverables is the draft project workplan, which is due ASAP after award. Would it be possible for the two of you to deliver a draft workplan to me via email by 10/11? That would be after we have had our teleconference to work out lingering questions.

Questions for Finance -
If you have questions for our Finance Officer, you can reach her via email at dscott@eac.gov. I would appreciate it if you would cc: me on such emails, so that I know to follow up with her.
Hi Peg,

Attached are our Nexis word search terms to be used for looking for news articles. A revised westlaw list is forthcoming. As we discussed, we need to talk to the people doing these before they can begin. Thanks.

Craig:

The Chair gave me your response. I'm pleased, to say the least! Would you be available for an hour or so on January 13 (a Friday) to talk with our two consultants when they are in town? If so, when would be most convenient for you? Would you prefer that I accompany them, or are you willing to take them on alone?

Also, would you prefer that our consultants forward any information requests through me (both before and after their meeting with you), or may I provide your contact information so that they can make their
requests directly? Already, I have received a request for any related statistical data you may have. I have given them a copy of the January 1995 version of your *Federal Prosecution of Election Offenses*.

Subject: Re: FYI  

Job:

Devon set up the folders before she completed her review of the articles. I saw that the folders were empty, but did not ask her to remove them. If you copy the CD contents to a file on your computer, you may yet use the empty folders to file relevant articles found subsequent to Devon's sorting. For example, I have a few recent articles that I will send via email. When we come across articles that belong in the empty folders, we can put them there. --- Peggy

---Job Serebrov---

The following file folders on the disc you sent me were empty:

Misleading Ex-felon Voting Right
Non-Citizen Voting

Wrongful Removal of Eligible Voters from Registration Lists

If they were blank file folders, why were they included?

Job

Tova and Job,

Thank you for your feedback. There are two factors that went into my decision to perform the search in the manner I indicated which may have a bearing on whether you want me to do each search individually.

First, I checked with the Lexis representative at my school, who suggested the search methodology I used. She indicated that I would get the same results if I did the searches separately or together.

Second, as I am in the midst of finals, as you can imagine, I have limited time to devote to work. I will only be in the office two days in the next two weeks and will not be able to do much work from home. As a result, I probably won't be able to do the majority of the searches until just after Christmas if I am to do the each term separately. If not, I should be able to get you results by the week before Christmas.

I will do whatever you and Peggy decide given your timelines, but wanted to let you know the factors that went into my decision.

Thank you,

Cc:
Subject: Re: Search Results Example

Tamar:

You are not going to be able to place all of these word searches together. We need you to take each term on the list and do a search on it. You can only merge terms when it will not add other terms and therefore affect the outcome. For instance, vote and voter could probably be merged. I know this creates much much more work but it can't be helped. I would like you to pull the first 50 cases for each set of terms and send them to us with a short case summary (I know Westlaw lets you do a short case summary). From there we will have to read the cases and decide if we need any others in that search term.

Regards,

Job

Tova and Job,

It was good to talk to you today. Hope you are doing well. I've attached my African American search results below. It encompasses all of the terms you suggested having to do with African Americans.

The following is a search I used to truncate words and combine terms, but I still got a large number of results:

Vot! and deny and black or vot! and black and challenge or vot! and black and reject or vot! and black or vot! And deny and African w/s American or vot! And African w/s American and reject or challenge or vot! And African w/s American or election and black and deny or challenge or reject or election and black or election and African w/s American and deny or challenge or reject or election and African w/s American or ballot and security and black or ballot and security and African w/s American or black and
vot! And suppress! Or African w/s American and vot!
And suppress or African w/s and disenfranchis! or
black and disenfranchis!

If this search yields useful cases for you, I can
continue searching using the same strategy. If not,
please provide me with additional guidelines and I
will do my best!

Please feel free to contact me should you have any
questions or need additional information.

Hi Peg,

Hope you're enjoying the holiday weekend. Job and I are having a bit of a disagreement about how we should be handling the existing research materials and would like to briefly discuss this with you. Are you available on Tuesday morning? We are both available until 11:30 am.

Thanks so much.

Tova

Hi Devon

I hope you are enjoying the holidays and thanks so much for your work. Just a couple of preliminary questions: The folders that are empty -- did you not get to them or did you not find anything in those categories? How far along in the list of search terms did you get -- were you able to do the whole list? If not, where did you leave off? And finally, what was the last date upon which you conducted a search?

Thanks so much.

Tova

Subject: Re: Meetings
I am available for a 3-way teleconference after Noon on Wednesday this week. My schedule on Thursday and Friday is flexible, as well. When would be best for you two? I can call the telephone numbers you prefer and set up the conference call from my desk.

Both the 24th or the 28th are fine with me for the face-to-face meeting. Which do you prefer? If you have no preference, I suggest we pick the earlier of the two.

Regarding your contracts, I understand that the contract will carry the date of 9/25/05. All contracts have to be signed by the Chair, who has been out of the office on Commission business. I have been told that she will sign off on your contracts, among others, today. Our financial officer will send it to you after that. I'll try to obtain copies and fax the appropriate one to you as soon as they have been signed.

Regarding your pay, the contract will state that you should submit a monthly invoice to EAC for payment of your fee for that month. The contract is for 6 months, so our Finance Officer, Diana Scott, wants you to submit an invoice to her each month for 1/6th of the total payment, beginning 10/25/05.

I look forward to talking again with the two of you.

Subject: Re: Various

Job:

I found Gavin. He said that the Chair has the letters that have to accompany the contracts for you and Tova. Once she signs them, the finance folks will fax a copy to you and send the original by mail.

After we have the signed contracts:

- Adjusted Workplan - You and Tova should look at the workplan to determine what should be revised due to the contract issues.

- Working Group - I will ask for a one or two sentences for each person you have on the list of potential working group members. The sentences should summarize why you think the person would be perfect for this particular project. What in their particular experience qualifies them to help develop recommendations for future avenues of EAC research on voting fraud and voter intimidation? (Remember, other research efforts already are underway to address items such as provisional voting, voter ID issues, and contested elections and recounts.) If you want to put an asterisk next to the names that you especially recommend, that would be fine. I have to discuss the potential working group members with our Commissioners, only one of which is in the office now. Others are in the field and I can speak with them as they return. I'll bet that this will take some time, probably through next week.

- Westlaw Search - You and Tova can provide more information about the Westlaw search. I spoke with our Executive Director and he authorized me to use a part-time legal intern to conduct the search and provide the results to you and Tova.

- Meetings - The three of us should probably decide a time for a teleconference and a tentative in-person meeting date in the not-to-distant future.

Regarding the election fraud newsclips, Tova was in town this morning for a non-EAC meeting. While here, she took the opportunity to look over the newsclips in one of my files. (I have another file that I have yet to unearth from my FEC boxes.) I mentioned to Tova that one of our EAC interns could sort the clips, put them in pdf, and drop them on a CD for each of you. Tova thinks that it would be most useful to have the clips organized by type of voting fraud (e.g.; absentee ballot, voter registration, etc.) and, within that sorting, by State. Does this work for you, or would you prefer a different organization?

Peggy Sims
Research Specialist
U.S. Election Assistance Commission
1225 New York Ave, NW - Ste 1100
Washington, DC 20005
Peggy:

Tova and I will need copies of your vote fraud literature file. Also, do you want a one liner on all of the people proposed for the working group or just the three that we are recommending for the final group?

Any work from Gavin?

Job

--- Forwarded by Margaret Sims/EAC/GOV on 11/29/2006 04:38 PM ---

As I mentioned to Job earlier, I think we need to meet as soon as possible in order to develop and pare down our lists of who we want to interview, determine how we are going to go about doing the interviews (in-person, phone, email), schedule such meetings, decide what themes we agree to discuss with them; go over existing research and how we will work on summarizing existing findings; hammer out what is within the scope of our research; meet with the intern and law clerk; discuss how we are going to do the case law research; etc. Up to now, we both agreed, we have been operating in a bit of a void. We've been trying to do this meeting for months.

Is it that you think we can combine this meeting with a meeting with Craig? I actually think they need to be separate since I think both will be very laborious and very different in nature.
However, I will defer to whatever you, Peg, think best. I don't feel so strongly about it that I will be extremely upset if we wait until January.

Thanks.

Tova

Peggy:

I will have a list of Republicans for the working group in the next few days. I am still speaking with people. However, having discussed this with a number of people who deal with election fraud, I am convinced that we need a ten member panel and not eight (five Republicans and five Democrats). My list will present six to seven people for the Commission's vetting. If all agree to serve, culling down to five will be challenging.

I guess for getting paid purposes it doesn't matter, it just matters with respect to the timeline for completion of the project. If that's right, I will sign and send the letter acknowledging receipt as is. Thanks so much.

Tova

Subject: Re: contract

The invoice that you have submitted at this point is for work conducted in September, September 1 - 30.

The invoice that you will submit shortly, if you have not already is for work performed in October,
1-31.

I am not sure if we are semantically calling these by different names (i.e., you submitted the September invoice in October, and October's work in November).

Let me know if this clarifies the point or confuses it.

Subject contract

Just one question on the receipt of contract -- it says that the first invoice was for September, but it actually was for October when we really got started, right? Should this be adjusted to say October 1 to October 31?

Thanks.

Hi Peggy,

Just an FYI -- Job and I have developed our own draft of a definition of fraud and intimidation and are working on compiling existing research. With respect to the working group, I have sent him the names and bios of my first choices, most of whom I have not yet spoken to. My thought was that I would have you vet them before asking them if they could do it, so I wouldn't have to turn around and say no. I have plenty of "plan B" people should some of my first choices not work out. Job has gone ahead and inquired as to people's availability before putting them on his list, which he expects to send me today.

Hope you had a great weekend.

Tova

Subject: Contract Issues-Government Per Diem Rates

Good Morning Job an Tova:

I still do not have copies of your signed contracts. I understand that they may have to be revised if the project is going to use an EAC intern and EAC Westlaw access. I've scheduled a meeting with one of our attorneys this week to discuss the matter and will get back to you with further information, when I have it.

By now, you should have heard that the October 14 contractor meeting has been cancelled. Instead, EAC has scheduled a couple of staff meetings to review requirements for invoices and requests for reimbursement. I should have more information for you on this front by next Monday.

Today, I am sending by Federal Express the most recent copy of the Department of Justice's
**Federal Prosecution of Election Offenses** and the Federal Election Commission's **Innovations in Election Administration 8: Election Document Retention in an Age of High Technology.** Let me know if you do not have it within a couple of days.

New per diem rates for federal travelers are effective October 1, 2005. You can find these rates at [http://www.gsa.gov/Portal/gsa/ep/contentView.do?programId=9704&channelId=-15943&ooid=16365&contentId=17943&pageTypeId=8203&contentType=GSA_BASIC&programPage=%2Fep%2Fprogram%2FgsaBasic.jsp&P=MTT](http://www.gsa.gov/Portal/gsa/ep/contentView.do?programId=9704&channelId=-15943&ooid=16365&contentId=17943&pageTypeId=8203&contentType=GSA_BASIC&programPage=%2Fep%2Fprogram%2FgsaBasic.jsp&P=MTT).

Kick off activities for the EAC Voting fraud/voter intimidation project

Greetings-
Tom Wilkey and I have just completed a series of very informative and productive conversations with each of you and are anxious to move to the next step of this process.

We hope to assemble our consultant team on this project, within the next three weeks and are presently awaiting final approval of your contracts from our Commissioners. We anticipate this will take place in the next week to ten days.

We would like to assemble the team- Steve Ansolabehere of MIT, Tova Wang from The New Century Foundation and Job Serebrov, who has worked extensively on these issues for the State of Arkansas, during the week of September 11. Please get back to us with some tentative dates during that week that might work with your schedule.

We look forward to working with all of you and appreciate your efforts on behalf of the EAC.

Regards-

Let me add the assistance you were going to give me on the statewide election administrator and the discs with the work Devon did. Are we getting a replacement for her?

The money issue has become the most important matter at this point. I have already laid out money for this project, so I’m running a deficit after three and a half months.

Thanks. Tova

Subject Re: List

Tova:

You should have received Devon's disk today. We won't have a replacement for her anytime soon. I'm still working on confirming your choice for State election official. I'm also trolling for further information on possible nonpartisan local election officials that might serve. At the moment, I am seeking feedback on nonpartisan county Election Administrators in Texas, many of whom are Hispanic.

Now that Tamar has finished her exams, you should be receiving regular emails with search results. I still need to provide feedback on the definition of vote fraud.

I have asked Diana Scott to find out exactly where GSA is in the process of paying you and Job. Julie Thompson and I are discussing ways we might expedite things in the future.

Hello Peg and greetings from Mexico City.

Interesting way you put that question!! When will I NOT be available!!!

Peg -- I have a speech to deliver to the Illinois Association of Election Commissioners December 7-8. After that, my wife says she will arise in protest if I don't stay put for the next couple months!!!

So I guess anytime after December 8 will work.

I hope I can help you and the EAC on this.

Attached is a list of requests for material/information for Mr. Donsanto in advance of our meeting. They are purely requests for data and hard materials, not necessarily the extent of the questions I will want to ask (and I'm sure, Job, you'll want to ask) which may well be of a more procedural nature.

I'm off for a few days without the ability to communicate with the outside world, so, if it is necessary, we can talk about this on Tuesday afternoon as well as our other topics.

Have a wonderful new year!

Tova:

Thad's research on threat assessment is not being conducted under an EAC contract. The requirement to work through EAC only applies to contact with EAC contractors about EAC research. Thad's EAC contract is for Vote Counts/Contested Elections and Recounts. At this time, the contractor is analyzing State laws and procedures and contacting appropriate federal agencies regarding any pertinent consent agreements. Currently, there are no plans to do a survey that would be subject to the Paperwork Reduction Act requirements.

If your interest in Thad involves his non-EAC research, I would have no problem with you contacting him directly. If you think he will not respond unless I forward your request to him, I will see what I can do.

Peggy Sims

Job:

I found Gavin. He said that the Chair has the letters that have to accompany the contracts for you and Tova. Once she signs them, the finance folks will fax a copy to you and send the original by mail.

After we have the signed contracts:
- Adjusted Workplan - You and Tova should look at the workplan to determine what should be revised due to the contract issues.
- Working Group - I will ask for a one or two sentences for each person you have on the list of potential working group members. The sentences should summarize why you think the person would be perfect for this particular project. What in their particular experience qualifies them to help develop recommendations for future avenues of EAC research on voting fraud and voter intimidation? (Remember, other research efforts already are underway to address items such as provisional voting, voter ID issues, and contested elections and recounts.) If you want to put an asterisk next to the names that you especially recommend, that would be fine. I have to discuss the potential working group members with our Commissioners, only one of which is in the office now. Others are in the field and I can speak with them as they return. I'll bet that this will take some time, probably through next week.
- Westlaw Search - You and Tova can provide more information about the Westlaw search. I spoke with our Executive Director and he authorized me to use a part-time legal intern to conduct the search and provide the results to you and Tova.
- Meetings - The three of us should probably decide a time for a teleconference and a tentative in-person meeting date in the not-to-distant future.

Regarding the election fraud newsclips, Tova was in town this morning for a non-EAC meeting. While here, she took the opportunity to look over the newsclips in one of my files. (I have another file that I have yet to unearth from my FEC boxes.) I mentioned to Tova that one of our EAC interns could sort the clips, put them in pdf, and drop them on a CD for each of you. Tova thinks that it would be most useful to have the clips organized by type of voting fraud (e.g.; absentee ballot, voter registration, etc.) and, within that sorting, by State. Does this work for you, or would you prefer a different organization?

Subject Re: 2 quick questions
Hi, Tova;

How much time do you want to schedule for the meeting with Donsanto? An hour? We've just received his response to our request confirming that he is pleased to be of assistance, which means he has received the OK from his superiors. I also want to include him in any Working Group discussions, although he will not be named as a member of that group. He is a great resource because he is smart and organized, and has years of experience in this area as a career DOJ attorney. I find that he is not shy about identifying challenges and noting improvements that he thinks are needed.

I signed off on all 3 of your invoices. I understand that they are going through the rest of the process required to get your payments to you. You turned in your revised invoices for September and October work a little after Job, and there was a short hiatus while I figured out what to do for the September invoice (I multiplied the hours you claimed by the $111 hourly rate cited in the contract). We also had to wait until our Chair was available to sign off on everything. (This has to happen before anything is submitted to GSA.) My estimate is that you should receive your payments no later than the end of next week (and maybe earlier).

I'll keep my eyes open for your receipts. I will fax the completed travel voucher form (aka request for reimbursement) to you. You will need to sign it and return it to me by mail (with the original signature). Then, I can put it in the pipeline for reimbursement.

Subject: RE: Voting Fraud-Voter Intimidation

Craig:

This meeting is being held to obtain input from our eight-member Working Group for the project. The group is composed of election lawyers, election
officials, and a representative of an advocacy group, all of whom have an interest and some expertise in the identification and/or prosecution of voting fraud and voter intimidation. The group was chosen so that we would have an equal number of folks on each side of the political spectrum, plus some nonpartisan members.

After our consultants review the results of their preliminary research (interviews, literature review, case law), we will ask the Working Group to brainstorm possible next steps for EAC. Our consultants will write a report summarizing the proposals that come out of this meeting. The report will go to the Commissioners, who will decide what they want to do, funds available, and what priority to assigned to the effort(s).

Your participation in this part of the process is extremely important, so I am very happy that you can find time for us that afternoon. I'll get an agenda and other information to you next week. --- Peggy

I am looking at the afternoon of 5/18 for the meeting, due to scheduling conflicts of Working Group members. There remain two members from whom we have not yet received confirmations of their schedule (with some, it is like pulling teeth), but right now 5/18 still looks like the best day. We may have to hold the meeting over here to make it easier for Commissioners to drop in.

Tova:

I understood Job to say that he could only find a hotel room with the right bed in Roanoke (hours away). He will drive in Thursday morning for the meeting and return to that hotel Thursday night. He won't drive back into DC for a Friday morning meeting.

We don't have to do dinner. I recognize that you have spent a lot of time and energy to make this project work, and I don't want to put you out. (You have done a lot under difficult circumstances.) Though we will be bushed, we may want to have a short meeting right after the Working Group disperses — or we could do a teleconference the following Monday afternoon (before I head into three more days of meetings). — Peggy

It would not be my first preference to do this right after the meeting, and I sort of had tentative plans. They can be changed if necessary of course, but what happened to meeting on Friday morning?

On another note entirely, since traffic will be bad going to Roanoke, do you want to have a dinner meeting with Tova and me after the group meeting to discuss the final report? As long as we are out by 7or so I am ok with it. Also, my wife would have to be there as she will be meeting me after the WG.

--- psims@eac.gov wrote:
> According to the Commissioners, you and Tova each
Would you please take a look at the attached? I combined both of your definitions, reformatted the list, removed a reference to the fraud having to have an actual impact on the election results (because fraud can be prosecuted without proving that it actually changed the results of the election), and taken out a couple of vague examples (e.g., reference to failing to enforce state laws — because there may be legitimate reasons for not doing so).

I have made contact with Ben Ginsberg's office and am waiting to hear if he accepts our invitation to join the working group. — Peggy

Correct me if I'm wrong, but I think I omitted sending you these specific summaries that are based on complex cases that could not be adequately described within the confines of the nexis article excel spreadsheets. If we can, these should be included, probably on the disc. Sorry.

We are continuing our efforts to hone in on a date for the Working Group meeting. Are you available the afternoon of Thursday, May 18?

Peggy Sims
Election Research Specialist
U.S. Election Assistance Commission
I am looking at the afternoon of 5/18 for the meeting, due to scheduling conflicts of Working Group members. There remain two members from whom we have not yet received confirmations of their schedule (with some, it is like pulling teeth), but right now 5/18 still looks like the best day. We may have to hold the meeting over here to make it easier for Commissioners to drop in.
--- Peg

Okay -- you are on for May 18th! Can we do it over here at 10?
--------------------------
Sent from Dr. D's Fabulous BlackBerry Wireless Handheld

My problem is that agency staff is booked most of the week of 5/21. Monday through Wednesday are taken up with meetings of the Standards Board Executive Committee, the full Standards Board, and the Board of Advisors. Thursday, we have EAC's public meeting. Also, I will lose one of my two consultants in June, so I'm trying to wrap up this project (and get the final report from the consultants) by the end of May.

Say "Hi" to Cameron for me.
Hi Peg. I am sitting here with Cameron Quinn putting together this year’s ballt conference for AUSAs. She send her best!

I am available on 5/18. But I am also going to the Board of Advisors Meeting the following week. I would rather do this then.

Peggy Sims
Election Research Specialist
U.S. Election Assistance Commission
Afternoon of May 18 -- 2:30 okay? How long will they need?

Sent from Dr. D's Fabulous BlackBerry Wireless Handheld
This meeting is being held to obtain input from our eight-member Working Group for the project. The group is composed of election lawyers, election officials, and a representative of an advocacy group, all of whom have an interest and some expertise in the identification and/or prosecution of voting fraud and voter intimidation. The group was chosen so that we would have an equal number of folks on each side of the political spectrum, plus some nonpartisan members.

After our consultants review the results of their preliminary research (interviews, literature review, case law), we will ask the Working Group to brainstorm possible next steps for EAC. Our consultants will write a report summarizing the proposals that come out of this meeting. The report will go to the Commissioners, who will decide what they want to do, funds available, and what priority to assigned to the effort(s).

Your participation in this part of the process is extremely important, so I am very happy that you can find time for us that afternoon. I'll get an agenda and other information to you next week. --- Peggy
It is just the Working Group for the Voting Fraud-Voter Intimidation Project. I am asking you to attend as Technical Advisor for the project. --- Peggy

Peg - - what is the name of the group?
Tova and Job:

As agreed, Tova and I can connect with Job by telephone during our Friday morning meeting. Tova would like to start the meeting at 10 AM EST. Job, we will call you from the meeting room.

Craig Donsanto says we can use a meeting room over at DOJ that has a phone, so that we can bring Job into the interview. The meeting is scheduled to begin at 2 PM EST, but it may take up to 10 minutes for us to settle in over there. We will call Job as soon as we can begin the interview. --- Peggy
Hi again,

I'm just scanning over Devon's collection and do not believe she could have possibly searched all of the terms we gave her. I am aware of tons of articles that were written on many of these topics in 2004 that do not appear in the folder. I think someone is going to have to do it over again from scratch, and I'm thinking about doing at least some of it myself. We should discuss this in detail on Thursday. Thanks.

Tova

---

Hi Peg,

Below is a list of areas we hope to cover at our long awaited convening next week. Please feel free to add
Thanks Peg. I do plan to be in DC next Friday. Also, once again, please include Alex at Tova.

Hi Peg,

In reviewing some of the Missouri materials, I was reminded by this article that DOJ sued five jurisdictions after the 2000 election, including St. Louis. We'd like to see the case materials but they're not on the DOJ website. Do you think Mr. Donsanto would provide that material for us? Should I contact him directly?
or should you ask him for us? Have you been able to copy and send the other materials from him yet? It would be good for us to have it prior to talking to Mr. Tanner. Thanks and see you tomorrow. Tova

ELECTION REFORMS

It seems that Ritzy the dog got a better deal from the city's Election Board than thousands of eligible St. Louis voters who were turned away from the polls last fall. After last November's election, a fuming Sen. Christopher S. Bond, R-Mo., showed the U.S. Senate an oversized copy of a 1994 voter registration card issued to the English springer spaniel. This political stunt called attention to the real problem of vote fraud. But it overshadowed a more disturbing election-day development that is just coming to light.

The Justice Department said this week it was suing the city Election Board for allegedly preventing thousands of eligible voters from casting ballots. The city is one of five jurisdictions being sued. The others are in Florida and Tennessee. Assistant Attorney General Ralph Boyd alleges that the city's board removed the names of inactive but eligible voters from the list given election judges, didn't notify the inactive voters that their names had been removed and required these voters to get authorization from Election Board headquarters before casting ballots. These developments led to turmoil on election day, with hundreds of voters jamming the Election Board headquarters after being turned away at the polls.

Some fraud did occur. St. Louis Circuit Attorney Jennifer Joyce has charged three people after reviewing 3,800 voter registration cards. But Rep. William Lacy Clay, D-St. Louis, had warned that the alleged fraud paled in comparison to voters whose civil rights were violated. They had been put on an inactive list of more than 50,000 voters, Mr. Boyd said.

The Missouri Legislature has corrected part of the problem. A bill sponsored by Sen. Anita Yeckel, R-Sunset Hills, allows provisional voting for people who insist they are eligible to cast ballots after being challenged by an election board. But that law, awaiting the governor's signature, covers only
Sen. Yeckel says Missouri must look for additional answers that make it "harder to cheat and easier to vote." One is a state database of voters that local election officials could tap into to determine voter eligibility on election day.

The Legislature also approved two other promising voter reforms. One would require the secretary of state's office to review all butterfly ballots because those crowded with too many candidates or issues can confuse voters. The other is to allow early voting up to 10 days before an election.

As might be expected, the U.S. Justice Department won't try to use its lawsuits to overturn the results of last fall's presidential election. And, just as predictably, the city Election Board claims it has corrected all the problems. Even so, this fiasco has made St. Louis look little better than Selma during the '60s.

The best outcome of the lawsuits would be fair elections for all, guaranteed by a technologically sophisticated, functional elections bureaucracy that will eliminate the problems both Mr. Bond and Mr. Clay have highlighted.

--- Forwarded by Margaret Sims/EAC/GOV on 11/29/2006 03:59 PM ---

Dear John:

I have been assigned to manage the U.S. Election Assistance Commission's (EAC) preliminary research project on voting fraud and voter intimidation. Obviously, obtaining information regarding the Voting Section's actions against voter intimidation and other voting rights violations is important to this effort. Would you be available for an interview by our project consultants on February 24 at 2:00 PM? The interview may take place by phone, or one of the consultants may visit your office and connect the other consultant by phone.

Background

Section 241 of the Help America Vote Act of 2002 requires EAC to conduct research on election administration issues. Among the issues listed in the statute are the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections
EAC's Board of Advisors recommended that EAC make research on these topics a high priority. Subsequently, the Commission contracted with two consultants (Tova Wang and Job Serebrov) to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform preliminary research on these topics (including Federal and State administrative and case law review), identify related activities of key government agencies and civic and advocacy organizations, and deliver a summary of this research and all source documentation;
- convene a meeting of a project working group composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation, provide the results of the preliminary research to the working group, and record the working group's deliberations; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future EAC action, if any.

Possible Questions

Possible interview questions include the following:

1. According to a GAO report dated September 14, 2004 entitled Department of Justice's Activities to Address Past Election-Related Voting Irregularities, the "Voting Section has used several means of tracking allegations of voting irregularities and the Section's actions with regard to those allegations. First, the Voting Section used telephone logs to track telephone calls regarding allegations of voting irregularities it received related to the November 2000 and 2002 elections. Second, DOJ tracks matters and cases through its Interactive Case Management (ICM) system-its formal process for tracking and managing work activities. Third, the Voting Section tracked monitoring of elections using logs and for some election-monitoring activities they opened matters; thus, it has not routinely tracked election-monitoring activities through the ICM system."

Can you provide us with the following:

a) The telephone logs referred to in the report
b) The matters and cases tracked through the Interactive Case Management (ICM) system
c) The other logs referred to in the report
d) Any other data the division has maintained electronically during the last three federal election cycles

Can you provide us with the following:

a) Any reports that were developed with respect to those efforts, before, during and after it implementation
b) Any field notes from federal attorneys and their staff
c) Information on any lawsuits and/or prosecutions for voter intimidation and/or suppression from the last five years
3. Does it matter if the complaint does or does not come from a member of a racial or language minority?

4. What kinds of complaints would routinely override principles of federalism?

5. Are you of the opinion that there are too few prosecutions?

6. What should be done to improve the system?

Let me know if you have any questions about this request or the research project. I look forward to hearing from you.

Thanks for letting me know Job. As I'm sure Peg told you, we are subject to GSA's file size restrictions and they are not always timely in letting us know when they block emails. Unfortunately, until they notify me that they are holding the email hostage, I cannot send it along. However, if I don't hear from them by 5, I will force the issue.
Tamar-

I received all but file number 5.

Regards,

Job

Subject: Interview Request Re EAC Research on Voting Fraud and Voter Intimidation

Dear John:

I have been assigned to manage the U.S. Election Assistance Commission's (EAC) preliminary research project on voting fraud and voter intimidation. Obviously, obtaining information regarding the Voting Section's actions against voter intimidation and other voting rights violations is important to this effort. Would you be available for an interview by our project consultants on February 24 at 2:00 PM? The interview may take place by phone, or one of the consultants may visit your office and connect the other consultant by phone.

Background

Section 241 of the Help America Vote Act of 2002 requires EAC to conduct research on election administration issues. Among the issues listed in the statute are the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- methods of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that EAC make research on these topics a high priority. Subsequently, the Commission contracted with two consultants (Tova Wang and Job Serebrov) to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform preliminary research on these topics (including Federal and State administrative and case law review), identify related activities of key government agencies and civic and advocacy organizations, and deliver a summary of this research and all source documentation;
- convene a meeting of a project working group composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation, provide the results of the preliminary research to the working group, and record the working group's deliberations; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future EAC action, if any.
Possible Questions

Possible interview questions include the following:

1. According to a GAO report dated September 14, 2004 entitled Department of Justice's Activities to Address Past Election-Related Voting Irregularities, the "Voting Section has used several means of tracking allegations of voting irregularities and the Section's actions with regard to those allegations. First, the Voting Section used telephone logs to track telephone calls regarding allegations of voting irregularities it received related to the November 2000 and 2002 elections. Second, DOJ tracks matters and cases through its Interactive Case Management (ICM) system-its formal process for tracking and managing work activities. Third, the Voting Section tracked monitoring of elections using logs and for some election-monitoring activities they opened matters; thus, it has not routinely tracked election-monitoring activities through the ICM system." Can you provide us with the following:
   a) The telephone logs referred to in the report
   b) The matters and cases tracked through the Interactive Case Management (ICM) system
   c) The other logs referred to in the report
   d) Any other data the division has maintained electronically during the last three federal election cycles

2. The division deployed thousands of observers to polling sites throughout the country in 2002, 2003, and 2004. Can you provide us with the following:
   a) Any reports that were developed with respect to those efforts, before, during and after it implementation
   b) Any field notes from federal attorneys and their staff
   c) Information on any lawsuits and/or prosecutions for voter intimidation and/or suppression from the last five years

Craig:

This is just to remind you of the interview appointment we had set up for 2 PM, Friday, January 13. I'll accompany our consultants, Job Serebrov and Tova Wang, to your office. I invited both of them to submit questions in advance of the interview. The questions they have submitted so far, are attached. I realize that you may not have the answers to questions involving Voting Section activities. Perhaps you can recommend someone in that section who could answer such questions.

Look forward to seeing you!
If you would like a conference call, how about some time tomorrow morning. Tomorrow afternoon is booked. Today, I am trying to get through all the emails left in my short absence. --- Peggy

We have not received the draft anti-fraud bill from him, yet. Let me see if I can locate the previous version on-line. I haven't had time to photocopy the hard copy materials, or to copy the CD he gave us. I'll try to get some help with that, but most of our folks are not available because there is a long lasting virus going around. --- Peggy

"Tova Wang"

Hi again,

Have you had a chance to send us the new handbook, training materials, and the draft mail fraud bill that he wanted to give us? Thanks.

Subject Upcoming Interviews-DOJ Info

Hi, Job and Tova:

Tony Sirvello (former election director for Harris County, TX and current Executive Director of the International Association of Clerks, Recorders, Election Officials and Treasurers) can make himself available for an interview next Wednesday morning (4/12). He is on CST. Is there a time that works well for the two of you? How about 10 AM CST/11 AM EST? I saw Kevin Kennedy at a meeting in our office this past Tuesday. We are trying to set up an interview with him next Tuesday (4/11).

I asked Donsanto about an updated version of his *Prosecution of Election Offenses*. He responded that it is at the printers and will not be available for a couple of months. In the interim, he referred me to the white paper he did for IFES, which I have attached. He said that the white paper includes the same information on the prosecution of election fraud that will be in the book. --- Peggy
Hi Peg,

I should meet you at the building where John Tanner is a little before 2, right? Can you please tell me the location? Thanks. Tova

Barry:

Hope you have been doing well. Scott Lansell (IFES) was in the office last week and spoke well of you. He said that you had worked with IFES on a project they were doing in Africa.

I am now working for the new Election Assistance Commission (EAC), as the Help America Vote Act of 2002 (HAVA) required the transfer of the FEC's Office of Election Administration to EAC. I have been assigned to manage the U.S. Election Assistance Commission's (EAC) preliminary research project on voting fraud and voter intimidation. I wondered if you would be interested in and available to serve on a project working group for EAC's preliminary research on voting fraud and voter intimidation. I appreciated your insight when we worked on the implementation of NVRA, and hope that you will be available to provide us the benefit of your expertise.

EAC is conducting this research to meet HAVA requirements. Section 241 of the Help America Vote Act of 2002 requires EAC to conduct research on election administration issues. Among the issues listed in the statute are the development of:
• nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
• methods of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that EAC make research on these topics a high priority. Subsequently, the Commission contracted with two consultants (Tova Wang and Job Serebrov) to:

• develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
• perform preliminary research on these topics (including Federal and State administrative and case law review), identify related activities of key government agencies and civic and advocacy organizations, and deliver a summary of this research and all source documentation;
• convene a meeting of a project working group composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation, provide the results of the preliminary research to the working group, and record the working group's deliberations; and
• produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future EAC action.

The working group members would need to review the results of preliminary research done by the two consultants to EAC and brainstorm ideas for future EAC action in this area, if any. I expect that the group will meet only once this year, probably in April in DC.

Please call me or send an email if you have any questions about the project or this request. I look forward to hearing from you.

phone: 212-452-7704 fax: 212-535-7534  

Does this mean that the articles you collected were already scanned and are on the CD?
Hi again,

I'm just scanning over Devon's collection and do not believe she could have possibly searched all of the terms we gave her. I am aware of tons of articles that were written on many of these topics in 2004 that do not appear in the folder. I think someone is going to have to do it over again from scratch, and I'm thinking about doing at least some of it myself. We should discuss this in detail on Thursday. Thanks.

Tova

Peggy

It will be easiest to meet in office, which is at 1800 G St NW, 7th floor. (You can call as you approach or when you get to the 7th floor.) I can patch anyone in by phone.

Much of the information you have requested is, as you can imagine, internal. I'll get you as much as we can, however, and look forward to talking with you.

John

Craig:

In reviewing the great materials you gave our consultants, we have not found an updated draft of your famous Prosecution of Election Offenses. Is that available for review? If you have a pdf version, I could pass that on to our consultants (noting any restrictions you may have on use).

Also, we noticed some gaps in the 2004 DOJ training binder. It appears that we are missing the Chris Herren information from Panel 3 and something titled "July 21, 2004" from Panel 4. If these were removed because we should not see them, just let me know.

I also have to check your availability the week of May 15. I'm still trying to find a date that everyone will be available for the working group meeting.

Sorry to bug you. Hope all is going well.

Peggy:

We will need to do the Friday interviews the same way we are doing all of the others. Despite Tova being in DC, we will have to do a conference call from your office. I only have a cell phone to make long distance calls and limited minutes.

Job
Hi Peg,

I got all of Tamar's emails from yesterday, but I guess I am still missing the 29th if she sent something on that day.

Also, will we be getting statements reflecting our payments? The number of dollars in my account isn't exactly the number I calculated, but I can't tell if there were withholdings or it's because of something else. Thanks.

Hope you are enjoying the weekend.

Tova

Hi Peg, Thanks for everything yesterday. It was quite a day. Below please find a breakdown of the 200 additional hours we will require to complete the project. Let me know if you have any questions.

Expert Interviews:
3 hours of scheduling
17 hours conducting the interviews
15 hours summarizing and analyzing the interviews
Total: 35 hours

Nexis research, organization of research, summary of research (Tova): 100 hours
Lexis research, organization of research, summary of research (Job): 100 hours
> Working Group preparation and meeting time: 20 hours
> Final Report: 45 hours

Sent: Wednesday, February 08, 2006 4:49 PM
To: Tanner, John K (CRT)
Subject: Interview Request Re EAC Research on Voting Fraud and Voter Intimidation

Dear John:

I have been assigned to manage the U.S. Election Assistance Commission's (EAC) preliminary research project on voting fraud and voter intimidation. Obviously, obtaining information regarding the Voting Section's actions against voter intimidation and other voting rights violations is important to this effort. Would you be available for an interview by our project consultants on February 24 at 2:00 PM? The interview may take place by phone, or one of the consultants may visit your office and connect the other consultant by phone.

Background

Section 241 of the Help America Vote Act of 2002 requires EAC to conduct research on election administration issues. Among the issues listed in the statute are the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- methods of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that EAC make research on these topics a high priority. Subsequently, the Commission contracted with two consultants (Tova Wang and Job Serebrov) to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform preliminary research on these topics (including Federal and State administrative and case law review), identify related activities of key government agencies and civic and advocacy organizations, and deliver a summary of this research and all source documentation;
- convene a meeting of a project working group composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation, provide the results of the
preliminary research to the working group, and record the working group's deliberations; and produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future EAC action, if any.

Possible Questions

Possible interview questions include the following:

1. According to a GAO report dated September 14, 2004 entitled Department of Justice's Activities to Address Past Election-Related Voting Irregularities, the "Voting Section has used several means of tracking allegations of voting irregularities and the Section's actions with regard to those allegations. First, the Voting Section used telephone logs to track telephone calls regarding allegations of voting irregularities it received related to the November 2000 and 2002 elections. Second, DOJ tracks matters and cases through its Interactive Case Management (ICM) system—its formal process for tracking and managing work activities. Third, the Voting Section tracked monitoring of elections using logs and for some election-monitoring activities they opened matters; thus, it has not routinely tracked election-monitoring activities through the ICM system."

Can you provide us with the following:

a) The telephone logs referred to in the report

b) The matters and cases tracked through the Interactive Case Management (ICM) system

c) The other logs referred to in the report

d) Any other data the division has maintained electronically during the last three federal election cycles

Can you provide us with the following:

a) Any reports that were developed with respect to those efforts, before, during and after implementation

b) Any field notes from federal attorneys and their staff

c) Information on any lawsuits and/or prosecutions for voter intimidation and/or suppression from the last five years

3. Does it matter if the complaint does or does not come from a member of a racial or language minority?

4. What kinds of complaints would routinely override principals of federalism?

5. Are you of the opinion that there are too few prosecutions?
6. What should be done to improve the system?

Let me know if you have any questions about this request or the research project. I look forward to hearing from you.

Regards,

Subject: Upcoming Interviews-DOJ Info

Hi, Job and Tova:

Tony Sirvello (former election director for Harris County, TX and current Executive Director of the International Association of Clerks, Recorders, Election Officials and Treasurers) can make himself available for an interview next Wednesday morning (4/12). He is on CST. Is there a time that works well for the two of you? How about 10 AM CST/11 AM EST? I saw Kevin Kennedy at a meeting in our office this past Tuesday. We are trying to set up an interview with him next Tuesday (4/11).

I asked Donsanto about an updated version of his Prosecution of Election Offenses. He responded that it is at the printers and will not be available for a couple of months. In the interim, he referred me to the white paper he did for IFES, which I have attached. He said that the white paper includes the same information on the prosecution of election fraud that will be in the book. --- Peggy

Craig:

I have 2 issues for you today.

First, I am trying to schedule a meeting of the project working group for EAC's Voting Fraud-Voter Intimidation research project. As a technical advisor on this project, your attendance is particularly important to me. Would you please look at your schedule and let me know if there are any days during the first 2 weeks of May that you would NOT be available?

Second, is it OK for our consultants to refer in their report to guidance provided in the DOJ training materials? I ask this because I understood that some materials in the materials are considered confidential and we do not want to violate your confidentiality provisions. If there is a compromis position, such as having you review that portion of the consultants' report, then let me know.

Thanks!

Peggy Sims
Thank you.

Job and Tova:

I'd like to suggest a moratorium on adding interviewees to the list until we complete interviews on the last list prepared. Frankly, in terms of the enforcement mechanics, I think you will get more out of your interviews with Donsanto, Tanner, and Joe Rich than you will get from an interview with Hans. Hans worked at DOJ for a relatively short time, compared to those folks. You also will have input from Barry Weinberg (former Deputy Chief, Voting Section, Civil Rights Division, DOJ) who has confirmed that he is available for the Working Group.

Regarding upcoming interviews that I schedule for you two, are there any times that you are NOT available next week or the week thereafter?

Peggy

It will be easiest to meet in office, which is at 1800 G St NW, 7th floor. 
(You can call as you approach or when you get to the 7th floor.) I can patch 
anyone in by phone.

Much of the information you have requested is, as you can imagine, internal. 
I'll get you as much as we can, however, and look forward to talking with you.

Subject: Upcoming Interview

Dear John:

This is just to confirm the interview I set up with you this Friday at 2 
PM. I'll bring Tova Wang, one of the two consultants on the project. 
Would it be possible to bring the other consultant into the conference via 
speaker phone? (He is in Little Rock, AR, so it would be a long distance 
call.)

I assume that we should go to the main entrance for 950 Pennsylvania Ave, 
NW and that Security will let you know when we've arrived. Is that 
correct?

Thanks, again, for time out for us.

Peggy & Tova:

We have an telephone interview with Douglas Webber from the Indiana Attorney General's Office on Feb 15 at 2 pm EST.

Job
Tova:
The articles I collected from 2000 to the time Devon completed the CD should be on the CD. I've found a few additional articles that I will add to a new CD, which I will either give you when you come to DC or FedEx to you. I have two bulging file folders of articles published prior to 2000 that are not on the CD. --- Peggy
Hi again,

I'm just scanning over Devon's collection and do not believe she could have possibly searched all of the terms we gave her. I am aware of tons of articles that were written on many of these topics in 2004 that do not appear in the folder. I think someone is going to have to do it over again from scratch, and I'm thinking about doing at least some of it myself. We should discuss this in detail on Thursday. Thanks.

Peg, I hope we will be able to review the binders you put together before they get sent out. Thanks. Just
Peg --

This is essentially FBI's equivalent of the Department's Ballot Access and Integrity Initiative. The news conference on Thursday announced that FBI was enhancing its prioritization of campaign financing offenses. The main feature of this initiative, aside from enhancing the priority these cases will get in the Bureau, is that each of the Bureau's 57 Field Divisions will have at least one "Election Coordinator Agent" who will be the equivalent of the District Election Officer AUSAs. We have been training these new FBI-types: the week before last we had roughly 75 of them in Denver in a very well received two-day session in election law enforcement at which several FEC people spoke. On Wednesday, I head out to Portland, Oregon for more of the same.

That's what I am concerned about. I think we need to end all interviews with Sarah Ball Johnson. With the literature reviews I am finishing, the case write up and the Tova's Nexis research that I need to read, I will have about 45 hours left for the Working Group meeting and final write up.

Hi, Sarah:

Thank you for agreeing to be interviewed on Wednesday, April 19, by the consultants for EAC's initial research on voting fraud and voter intimidation, Job Serebrov and Tova Wang. Our consultants are conducting interviews as part of preliminary research to determine how EAC may best meet the requirements of Section 241(b)6 and 7 of the Help America Vote Act of 2002. As you may recall, Section 241 requires EAC to conduct research on election administration issues, including the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office; and
- methods of identifying, deterring, and investigating methods of voter intimidation.

This is what I need you (and the Secretary, if he is available) to do:

- At approximately 11 AM EST on April 19, call 1-866-222-9044.
- At the prompt for the pass code, enter ________

Tova and Job will join you on the line. We have arranged for the line to be open for an hour, with 10 minutes extra on the front end (for folks who have not synchronized their watches).

You mentioned that Secretary Grayson may be using a cell phone. Our teleconference provider has given us the following information regarding the use of cell phones during the teleconference:

- Signals are often in and out and the audio bridging equipment cannot compensate fast enough by adjusting the signal. This affects all participants connected. If participants must use a cell phone – they should be stationary in a location where they can pick up the other participants, moving while using a cell phone causes the signal to go in and out and often will pick up extraneous electrical signals that will cause heavy static on the call.
- The cell phone should be well charged and muted, if possible, until the individual is ready to speak.
- If there is a problem, anybody who dials into a conference can contact the operator/technicians by simply pressing *0 (star zero). This information is part of the recording when individuals are dialing in.

If you have any problems accessing the teleconference, please call Edgardo Cortés. You can reach him at 1-866-747-1471 (toll-free) or 202-566-3126. He can contact our service provider to correct any problems. (I will be on my way to Seattle and unable to help.)

Thanks, again!

This is essentially FBI's equivalent of the Department's Ballot Access and Integrity Initiative. The news conference on Thursday announced that FBI was enhancing its prioritization of campaign financing offenses. The main feature of this initiative, aside from enhancing the priority these cases will get in the Bureau, is that each of the Bureau's 57 Field Divisions will have at least one "Election Coordinator Agent" who will be the equivalent of the District Election Officer AUSAs. We have been training these new FBI-types: the week before last we had roughly 75 of them in Denver in a very well received two-day session in election law enforcement at which several FEC people spoke. On Wednesday, I head out to Portland, Oregon for more of the same.
To: Donsanto, Craig
Subject: Fw: Announcement of FBI Election Crimes Initiative

Hi, Craig:

Tova noticed an article about an FBI initiative against election crimes (see attached email). Is this something new, or is it more of the same initiative that you addressed in your interview? If it is new, would you have time for a teleconference with Job and Tova to answer any questions they may have on the initiative?

Happy Easter!

Would it be possible to talk to Mr. Donsanto about this latest initiative, or somehow get more information? Thanks. Tova

http://www.fbi.gov/page2/april06/electioncrime041406.htm

I have to check with Conny McCormack to see if things have settled down for her enough so that she would be available. I have had no response to my overtures to Colleen McAndrews' office. I can try again, but I have to be out of town again, from Wednesday through Friday this week, on another research contract and for EAC's public meeting in Seattle. Were you able to get through to Mike McCarthy?

Please remember to watch your time. We'll need to reserve some of your time for the working group meeting and the subsequent reports. --- Peggy

Craig:
Are yu available any days in the third week of May?
Peggy
Hello Peg!

God willing, I will be here the first two weeks of May.

As for your second question, it is not possible for me to assess the level of public attribution that would be appropriate without seeing the substantive stuff in context. I do not foresee a problem. So, I recommend that you get me a draft text and I will review it to ensure we are not disclosing things we shouldn't disclose.

Craig:

I have 2 issues for you today.

First, I am trying to schedule a meeting of the project working group for EAC's Voting Fraud-Voter Intimidation research project. As a technical advisor on this project, your attendance is particularly important to me. Would you please look at your schedule and let me know if there are any days during the first 2 weeks of May that you would NOT be available?

Second, is it OK for our consultants to refer in their report to guidance provided in the DOJ training materials? I ask this because I understood that some materials in the materials are considered confidential and we do not want to violate your confidentiality provisions. If there is a compromis position, such as having you review that portion of the consultants' report, then let me know.

Thanks!
Peg -- I'll have check. I am pretty well clogged next month.

What do you need Peg?

Peggy Sims
Election Research Specialist
U.S. Election Assistance Commission
1225 New York Ave, NW - Ste 1100
May 9, 2007

Mr. Greg Gordon
National Correspondent
McClatchy Newspapers
Washington, DC

Dear Mr. Gordon:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on April 11, 2007. The request sought “all emails between Job Serebrov and Elections Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for the EAC.”

Responsive records. In regard to your request, copies of the responsive documents are attached (approximately 1,000 pages). Upon review of the records, you will find a few places where small portions of information have been redacted (in black). As required by FOIA exemption 6, the EAC has redacted personal information, including home addresses, telephone numbers, personal e-mail addresses, personal financial information, social security numbers, and tax identification numbers.

Withheld records. In reference to your request, an estimated 300 pages of e-mails have been withheld because the information in these e-mails is pre-decisional and protected by the Deliberative Process Privilege. As you may know, the Deliberative Process Privilege protects intra-agency documents that are (1) pre-decisional in nature and (2) part of the deliberative process. In other words, the documents must be part of a process that recommends or presents opinions on a policy matter or governmental decision before that matter is finally decided. It is a well settled matter of law that the work of contract employees and contractors (“consultants”) constitute intra-agency documents.1 This is true even where the consultants are deemed to be independent contractors and are not subject to the degree of control that agency employment entails.2 The courts have made this determination after recognizing that agencies have a special need for the opinions and recommendations of temporary consultants.3 Ultimately, deliberative

---

2 Klamath, at 10.
3 Hoover, 611 F.2d at 1138.
documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors, (2) to protect against premature disclosure of proposed policies and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action. 4

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you will have an opportunity to appeal it to the Election Assistance Commission. However, as this letter is only partially responsive to your request, please hold any appeal until your request has been fully addressed. At that time, your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of EAC’s final response letter. Please include your reasons for reconsideration and attach a copy of this and subsequent EAC responses.

Sincerely,

Jeannie Layson
Director of Communications
U.S. Election Assistance Commission

Attachments:
1. Your Request (dated April 11, 2007)

Washington, D.C. 20005  
Fax: 202-566-3127  
Phone: 202-566-3100  
HAVAinfo@eac.gov

Dear Ms. Layson:

This is an official request under the Freedom of Information Act, 5 U.S.C., 552 as amended.

I am writing on behalf of McClatchy Newspapers to request copies of all emails between Job Serebrov and Elections Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for the EAC.

In the event that this request results in research or copying, McClatchy Newspapers requests a public interest fee waiver because the material being sought is likely to be used in a newspaper story. We would argue strongly that there is a significant public interest in our reviewing the material being sought. As the nation's second largest newspaper group with 32 daily newspapers and a new service serving 400 newspapers, McClatchy easily qualifies as acting in the public interest.

If possible, I would appreciate your expediting this request, especially any emails transmitted after the draft report was submitted, because of the obvious topical import of these documents.

Should this letter prompt questions, please feel free to phone me at 202-383-0005. Thanks for your assistance.

Sincerely,
Greg Gordon

How about after 3 tomorrow until 5-10 on Wednesday or 3-5 on Wednesday. If you call my assistant Bert she will find you a good time frame. Sorry that's my life these days.

Tom
Hey Tom,

How are you? I hope you're doing well.

I'd like to talk to you about some issues we are having with respect to the project when you have a free moment. Is there a good time to call? Thanks. Tova

Dear Tom and Julie,

Happy New Year. I hope you both enjoyed the holidays.

As you know, I am well aware that the research Job and I produced belongs to
the EAC. Nonetheless, I was wondering whether there might be some way I can
use just the Nexis material solely for my own further research purposes.
Anything I might publish using that underlying data as enhanced by my
further research would be in my name and my name only, not that of the EAC.
I put a tremendous amount of work into collecting and organizing that data
and I would like the opportunity to continue this research on an ongoing
basis. It would be a shame if it was not put to some further use.

Is there something we might arrange in this regard? Thanks so much.

1225 New York Ave., NW, Ste 1100
Washington, DC 20005
(202) 566-3100

Julie,

I understand from Tom Wilkey that you are planning on releasing our report at the public meeting next Thursday, December 7. As we discussed, I respectfully request that Job and I be permitted to review what you are releasing before it is released. I would like us both to be provided with an embargoed copy as soon as possible so we have time to properly review it before Thursday. I can be contacted by email, cell phone at 917-656-7905, or office phone 202-741-6263. I hope to hear from you soon. Thanks.

Tova
Julie:

I just added my invoices and I get only around $39,700 including the travel expense reimbursement. The 1099 needs to be corrected.

Job
Julie:

I received my 1099 and the figure looks too high. It is listed at $58,065.35. Can you check on this?

Job.
Julie:

It looks like the most likely place Mari & I will go is DC. I have a number of job applications out there with different fed agencies. I will keep you posted. On another subject, what ever happened with Tova's protest?

Happy New Year!

Job
Julie:

I sent this to Tova on Saturday to make it clear about my feelings and what my actions will be if she proceeds with her protest any further. I think it makes it clear that she would be fighting both of us. I know I am going to hear from her on this but the issue needs to be put to bed.

> I spoke to Julie late yesterday and she told me that you sent a letter, as you said you would. I must ask you to drop this if your request is denied. We were never guaranteed that our report, paid for by the EAC, would be published in the form that we sent it or with the conclusions that we arrived at.
> 
> As I told you, I am satisfied with the published report from the EAC. I can live with the removal of the Donsanto comment and the other alterations. What I am very concerned about is that further action on your part would cause the EAC, in defending its final report, to criticize the report we submitted or to attack our report outright as somehow unusable, even if this is not the case. Should this occur, I will defend both the final EAC report and our submission which will leave you alone fighting a two front war. I think it is more important to preserve the integrity of the overall project submission than to press the issue over how it was used. I hope this will not be necessary.

Job
Julie:

Well I see you left out the controversial Donsanto remark. I really think the report is well done. It should have served to satisfy both sides---but wait---there is the Tova on the war path factor. Tova is totally disgusted with the report. She especially hates the omission of the summaries of the various sections (interviews, case law, reports, literature, and interviews). She is really upset with the Donsanto omission. I can see her going to some of the members of Congress she knows and trying to get a hearing. I know she will be sending you a letter, asking or demanding that you retract this report and publish the original one we submitted.

I told her that I am satisfied with the report and that I will have nothing to do with her future actions---which I expect will be plentiful like Santa's Christmas gifts or like the bubonic plague. In any case, this is a Tova production.

Now for the I told you so---this would have been far better had we been able to stick to the original plan to have me do this project alone. I told you so!!!

Keep a stiff upper lip,

Job
Julie:

I was hoping that my e-mail reply to Tova would end all of this. On another note, Las Vegas fell apart mostly due to timing issues. Unfortunately that leaves me, for now, looking for a job. Any ideas?

Job

Thanks Julie. Actually, I ended up doing all of the Nexis research myself on The Century Foundation's account. Using one of your interns to do it never worked out, as Job can also tell you. I assume that takes care of that issue. Thanks again. Tova

Tova,

I see no reason why we cannot allow you to have the research for your use. The one caveat to that is that this research was obtained on our Westlaw/Nexis accounts. Therefore, we would have to have an agreement from you that you would not reproduce or distribute those copyrighted materials. I will have one of my law clerks work on getting the information burned to a CD and drafting an agreement concerning the use of these documents.

I will be in touch with you next week to let you know when we will have these documents and agreement available.

*Tova Wang*
Dear Tom and Julie,

Happy New Year. I hope you both enjoyed the holidays.

As you know, I am well aware that the research Job and I produced belongs to the EAC. Nonetheless, I was wondering whether there might be some way I can use just the Nexis material solely for my own further research purposes. Anything I might publish using that underlying data as enhanced by my further research would be in my name and my name only, not that of the EAC. I put a tremendous amount of work into collecting and organizing that data and I would like the opportunity to continue this research on an ongoing basis. It would be a shame if it was not put to some further use.

Is there something we might arrange in this regard? Thanks so much.

Just a reminder that we have a telephone conference for the vote fraud group at 4:00 today. You were going to see if you could talk to Commissioner Davidson before that time so I could know what the possibilities are for serving as her executive assistant. If this is even possible and if the Commission is willing to raise the salaries of the executive assistants, her time table could affect the vote fraud project time table.

Regards,
Job

---

I have attached a draft proposed schedule of events for our discussion today. Please keep in mind that this is only a proposal but I thought that we needed somewhere to start from.

"Job Serebrov"

10/21/2005 04:04 PM

Julie:

I see that I will have to drive folks up there crazy Monday to make the Tuesday deadline for the signing of our contracts so we get paid on time.

At this point, on Tuesday I just plan to e-mail a standard invoice for this month.

Job
Julie:

As we just discussed, at this time and in light of the recent inquiry, I think it prudent to postpone our meeting in DC until the first or second week of November in order to:

1. Finalize the Working Group list (I am still waiting to hear from Kay James and Governor Barbour);
2. Finalize the Interview list;
3. Finish the search on existing voter fraud research;
4. Assure participation from the Department of Justice; and,
5. Get everyone on the same page and assure all outside parties that this will not be a radical venture

What do you think and can we get agreement on this with Peggy?

Regards,

Job
Julie:

I need clarification on something in the project before the conference call at 2:00 today between Peggy, Tova, and me. How much of what we are investigating should involve DOJ's jurisdictional matters under such things as the Voting Rights Act?

Also, did you have a chance to talk to Karen about a second project? I need to know because if there will not be one I will have to get a job with a local law firm until the 2006 elections.

Job
Both criminal and civil

Julie:

Do you have an answer for me on the DOJ issue? We have a conference call in half an hour.

Job

Julie:

Tova has not been paid yet for the first invoice. I left a message with Peggy but this has me concerned on several levels. First, I was paid and Tova is way over due. Second, Tova and I now have two more invoices out with you and that are due to be paid before the end of December. Can you check on all of this?

Thanks,

Job
Hi Karen and Tom,

As we discussed yesterday, attached is a preliminary work plan/division of labor for your review. Please let us know if this is sufficient for the present and if you have any comments or questions.

In terms of hours dedicated to the project, Job and Tova are able to commit to 15-20 hours per week assuming that includes reimbursed periodic travel. Steve can do approximately 2 hours per week. We have tentatively scheduled to meet at your offices in DC, if that is convenient for you, on September 20. We will be able to confirm that within the next day or so.

All of us are very eager to get started on this important work as soon as possible. However, because we also have other work related responsibilities, we are a bit reluctant to do so before having an opportunity to review our contracts. We look forward to receiving them so we can get going right away.

Thanks so much. Speak to you soon.

Tova, Job and Steve

All-

In anticipation of our 45-minute conference call scheduled for Tuesday, September 6 at 4:00 PM, I would ask the three consultants (Steve, Job and Tova) to come prepared to talk about the following:

The major topics and issues which you see as needing immediate attention, definition, delineation, etc.
Rough timelines and timeframes for addressing these major issues and topics
Your major roles and responsibilities and the timelines you envision for meeting your major deliverables

We all realize that this conversation is just a start; I look forward to this beginning and to framing the tasks that lie ahead of us between now and September 30.

Have a wonderful holiday!!

I'll need to get back to you on this and the definition tomorrow (too many things going on today). In the meantime, I have attached the written status report that was presented to the EAC Standards Board and Board of Advisors, because I can't remember if I ever provided the final version to the two of you. The status report is primarily made up of your preliminary reports, with some intro information provided and a brief summary of recommendations discussed at the Working Group meeting. This may or may not help the two of you in preparing the final. You can use any of it, or none of it. I am sure that your product will be much better than this quickly pulled together thing. --- Peggy

Does this work for you?
I wasn't planning on circulating the transcript to the Commissioners. Most of them probably don't have the

time to go through the whole thing. I will let them know it is available, if they are interested in reviewing it.
--- Peggy

Wow, there are a lot of errors in this. But at least it gets at the substance. Will this be circulated to the

commissioners?

Thanks for being willing to help me identify a qualified, nonpartisan local election official to serve on our Project Working Group for the preliminary research being conducted on voting fraud and voter intimidation.

Background

Section 241 of the Help America Vote Act of 2002 requires EAC to conduct research on election administration issues. Among the issues listed in the statute are the development of:

1. nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
2. methods of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that EAC make research on these topics a high priority.

Preliminary EAC Research

Subsequently, the Commission contracted with two consultants (Tova Wang and Job Serebrov) to:

1. develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
2. perform preliminary research on these topics (including Federal and State administrative and case law review), identify related activities of key government agencies and civic and advocacy organizations, and deliver a summary of this research and all source documentation;
3. convene a meeting of a project working group composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation, provide the results of the preliminary research to the working group, and record the working group's deliberations; and
4. produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future EAC action, if any.

The Project Working Group will probably meet only once during this preliminary research effort (probably in late April) to review the consultants research and provide input. Other members of the Working Group are lawyers from advocacy groups and major political parties, two State election officials, and Barry Weinberg, former Deputy Chief of DOJ's Voting Section, Civil Rights Division. Craig Donsanto, Director of DOJ's Election Crimes Branch will serve as a technical advisor to the group.

I really appreciate any help you can offer in identifying a qualified individual to fill the slot on the Working Group that has been reserved for an experienced, nonpartisan local election official.

Dear Tony, 
Unfortunately both Javier and myself have to decline in being members of the working group from Texas. It is a bad time of the year where we have so many elections and would not be able to contribute enough time to doing research of any kind. Please keep us in mind for future meetings.

Helen, Javier, 

Attached is the information from the EAC requesting your services as a member of the working group from Texas. Please let me know in a couple of days if one of you will be able to participate. If you need more information, call me and I will conference in with Peggy Sims, who can give you more details.
I really appreciate any help you can offer in identifying a qualified individual to fill the slot on the Working Group that has been reserved for an experienced, nonpartisan local election official.

I would rather not spread them out over a lot of time. I still have three to schedule outside of what you are doing. As far as Baker is concerned, you never answered my question. Can Tova use any unused travel funds that I have? A trip to DC and Houston for me should not exceed $3000-$3500. That will leave $1500-$2000.

---

--- psims@eac.gov wrote:

> Job and Tova:

Tova:
I've been trying to connect with Tanner, but I realized that I had not asked you some important questions:

* If you meet with him on Monday, February 6, how were you planning on bringing Job into the interview? I'll be at the meeting all day Monday, so I won't be in the office to set up a conference call.

* Are you still free to meet with Tanner on Tuesday or Wednesday, if Monday does not work out, in which case we can have you meet in his office and conference Job in by speaker phone.

* Are there any times that are better for you and Job than others on these three days?

* Do you have an advance list of questions that is different from the Donsanto list (shown below), or should I just send the Donsanto list to Tanner?

--- Peggy
Probably. We should come up with some different questions for Tanner.

FOIA File
August 30, 2005

Ms. Bobbie Ann Brinegar
Washington, D.C. Director
Miami-Dade Election Reform Coalition
1725 19th Street, NW #B
Washington, DC 20009

Dear Ms. Brinegar:

This letter is in response to the Miami-Dade Election Reform Coalition's (MDERC) Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on August 3, 2005. The August 3rd FOIA request served as a revision to a previous request received by the EAC on July 22, 2005. The revision was made in response to a request for clarification sent by the EAC on July 29, 2005.

The revised request (August 3, 2005) sought “all documents relating to meetings that were not publicly noticed, including all telephonic meetings or conferences, [in] which...” Chair Gracia M. Hillman, Vice Chairman Paul S. DeGregorio, Commissioner Ray Martinez or interim Executive Director Carol Pacquette were in attendance. The request notes that this includes “all lists of such meetings, and all notes made at such meetings or telephone calls.” The letter also request copies of all FOIA requests made to the EAC.

With regard to your request for all prior FOIA requests, you will find copies of all responsive documents, attached. You will not be charged for processing and copying costs.

With regard to your request for “all documents relating to meetings that were not publicly noticed,” the EAC must provide a bifurcated response. First, the EAC has not been able to search the personally held files of the Commissioners or previous interim Executive Director. Unfortunately, each of these individuals has been traveling for all but a few days over the last month and a half. As such, they have not had the opportunity to review their files. While the Commissioners will continue to travel in September, it is hoped the travel will be less extensive. In an effort to take all reasonable steps to provide you the documents you seek, the EAC will review the files maintained by the Commissioners and respond to you within 10 working days.

It is important to understand that, generally, the EAC does not maintain or track documents based upon their association with a given meeting (and attendance at that meeting). However, it is possible that individual Commissioners or the Interim Executive Director (or their assistants) may have personally maintained a few document files in a “meeting associated” manner. Because this possibility exists, the EAC will coordinate with the Commissioners in
order to determine if we can reasonably accommodate your request. However, this effort is a result of the EAC’s desire to take every reasonable step to provide the documents you seek. Generally, without clarification, your FOIA request does not meet the definition of proper request under FIOA.

A proper FOIA request must reasonably describe the records sought (5 U.S.C. §552(a)(3)(A)). Such a request would enable a professional agency employee familiar with the subject area to locate the record with a “reasonable amount of effort.” FOIA does not allow requesters to “conduct fishing expeditions” through agency files or require agency staff to have “clairvoyant capabilities.” Finally, Federal Agencies are not required to conduct “unreasonably burdensome” searches for records. Your request requires the EAC to identify any document that was created as a result of any type of discussion (including telephonic) between a Commissioner or interim Executive Director and any other person (including EAC staff). Given that such conversations represent the majority of our Commissioner’s time and that the EAC staff generally does not maintain records based upon “meeting connectivity,” your request requires both an “unreasonably burdensome” search and fails to “reasonably describe” the records sought.

As was noted in the EAC letter requesting clarification (July 29, 2005):

[T]he vast majority of documents created or obtained by the EAC were likely created or obtained as a result of or in preparation for a meeting with a Commissioner. Notwithstanding this fact, in many cases it will be almost impossible to determine, with any certainty, which specific documents were “meeting associated,” as such information is not ordinarily maintained on a document. Like most organizations, our documents are identified by subject matter and the individual or organization that created it. In short, your request, as stated, would require EAC personnel to search every document in possession of the Commission and speculate as to whether it was created as a result of or in preparation for a meeting with one of our four Commissioners.

Absent questioning every staff member on every document in the EAC’s possession there is no reasonable way to determine if a particular document was used in a non-publicly noticed meeting. Even if the EAC took this burdensome course of action, the results would be purely speculative. Requester’s should frame requests with sufficient particularity to ensure that searches are not unreasonably burdensome. The rationale is that FOIA was not intended to reduce

---

1 H.Rep.No.93-876 93rd Cong., 2d Sess. 6 (1974); S.Rep.No.813 89th Cong., 1st Sess. 8 (1965); Marks v. United States, 578 F.2d 261, 263 (9th Cir. 1978) (FOIA provision that request reasonably describe records sought relates not only to subject matter but also to place of search).
2 Freeman v. United States Dep’t of Justice, No. 90-2754, slip op. at 3 (D.D.C. Oct. 16, 1991) (“The FOIA does not require that the government go fishing in the ocean for fresh water fish.”)
3 Hudgins v. IRS, 620 F.Supp. 19, 21 (D.D.C.1985) (Hogan, J.) (“[A]n agency is not required to have ‘clairvoyant capabilities’ to discover the requester’s need.”)
4 Van Strum v. EPA, 1992 WL 1976660, (9th Cir. Aug. 17, 1992) (accepting agency justification in denying a request or seeking clarification that a request was burdensome because it would put an inordinate search burden on Agency resources and sought vast amount of materials).
government agencies to full-time investigators on behalf of requesters. Therefore, agencies are not 
required to perform searches incompatible with their own document retrieval systems.

This letter is not a final response to your FOIA request. You will hear from us 
within the next 10 working days. I continue to encourage you to further clarify your FOIA request 
consistent with the conclusions, above. I offer you my assistance in this endeavor. You may reach 
me at (202) 566-3100 or ggilmour@eac.gov.

Sincerely,

Gavin S. Gilmour 
Associate General Counsel 
U.S. Election Assistance Commission

Ms. Bobbie Ann Brinegar
Miami-Dade Election Reform Coalition
1725 19th Street, NW #B
Washington, DC 20009

Dear Ms. Brinegar:

This letter is in response to the Miami-Dade Election Reform Coalition's (MDERC) Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on August 3, 2005. The August 3rd FOIA request served as a revision to a previous request received by the EAC on July 22, 2005. The revision was made in response to a request for clarification sent by the EAC on July 29, 2005. This letter supplements our previous communication of August 30, 2005.

In our previous letter (August 30th), the EAC (1) provided all documents responsive to your request for the agency's prior FOIA requests; (2) informed you of our determination that the remainder of your request was not a proper FOIA request, as it failed to reasonably describe the records sought and required an unreasonably burdensome search for records; and (3) informed you that we would, nonetheless, perform a reasonable search for records that involved meetings with third parties. Attached please find a copy of our August 30th letter.

Each of the individuals noted in your request letter (and/or their assistant) searched their files for meeting associated records. As they could not reasonably search all records held by the EAC and speculate as to their potential association with a meeting, they looked for documents filed (including e-mails) as “meetings.” Moreover, because you did not define the broad term “meeting” (which could include any time two individuals communicate) we defined the term consistent with your correspondence. We provided documents, filed as noted above, in which one of the individuals you identified met with a non-federal employee or organization. The result of our records search is enclosed. A few of the documents have had small portions redacted, such as personal phone numbers, as release of this information would constitute an unwarranted invasion of personal privacy (5 U.S.C. §522(b)(6)).

At this time, Commissioner DeGregorio has not completed the search of his records. His efforts were cut short by an official trip to Hungary. He will return from his overseas trip on the 21st of September. This letter is not a final response to your FOIA request. The EAC will provide our final response by September 26, 2005. In the interim, if you have any questions, you may reach me at (202) 566-3100 or ggilmour@eac.gov.

Sincerely,

[Signature]

David S. Gilmour
Associate General Counsel

Re: Freedom of Information Act Request

This letter constitutes a request under the Freedom of Information Act, 5 U.S.C. § 552, on behalf of the Miami – Dade Election Reform Coalition, 1725 19th St. NW #B Washington, DC 20009 (MDERC).

On behalf of MDERC, I request that you provide the following:

1. All documents relating to publicly noticed and/or private meetings (including telephonic meetings or conferences), at which Gracia M. Hillman was in attendance after being confirmed to serve on the U.S. Election Assistance Commission (EAC) by the U.S. Senate on December 9, 2003 through the present. This includes all documents that were prepared, received, transmitted, collected and/or maintained by the EAC relating to such meetings; all recordings of any portion of such meetings; all notes taken at such meetings or made in connection to such meetings, all correspondence relating to such meetings; and all agendas for or minutes of such meetings.

2. All documents relating to publicly noticed and/or private meetings (including telephonic meetings or conferences), at which Commissioner Paul S. DeGregorio was in attendance from the time of his confirmation to serve on the EAC until the present. This includes all documents that were prepared, received, transmitted, collected and/or maintained by the EAC relating to such meetings; all recordings of any portion of such meetings; all notes taken at such meeting or made in connection to such meetings, all correspondence relating to such meetings; and all agendas for or minutes of such meetings.

3. All documents relating to publicly noticed and/or private meetings (including telephonic meetings or conferences), at which Commissioner Ray Martinez was in attendance from the time of his confirmation to serve on the EAC until the present. This includes all documents that were prepared, received, transmitted, collected and/or maintained by the EAC relating to such meetings; all recordings of any portion of such meetings; all notes taken at such meetings or
made in connection to such meetings, all correspondence relating to such meetings; and all agendas for or minutes of such meetings.

Please advise us of the cost prior to copying.

If this request is denied in whole or in part, I request that you justify all deletions by reference to specific exemptions of the FOIA. Please provide all segregable portions of otherwise exempt material.

Please send all records, as they become available, to this address:

Bobbie Ann Brinegar

Re: Freedom of Information Act Request

This letter constitutes a request under the Freedom of Information Act, 5 U.S.C. § 552, on behalf of the Miami – Dade Election Reform Coalition, 1725 19th St. NW #B Washington, DC 20009 (MDERC).

On behalf of MDERC, I request that you provide the following:

1. All documents relating to meetings that were not publicly noticed, including all telephone conversations and conferences, which Gracia M. Hillman participated in or attended after being confirmed to serve on the U.S. Election Assistance Commission (EAC) by the U.S. Senate on December 9, 2003 through the present. This includes lists of all such meetings, and all notes made at such meetings or telephone calls or in connection with such meetings or telephone calls.

2. All documents relating to meetings that were not publicly noticed, including all telephone conversations and conferences, which Paul S. DeGregorio participated in or attended after being confirmed to serve on the U.S. Election Assistance Commission (EAC) by the U.S. Senate on December 9, 2003 through the present. This includes lists of all such meetings, and all notes made at such meetings or telephone calls or in connection with such meetings or telephone calls.

3. All documents relating to meetings that were not publicly noticed, including all telephone conversations and conferences, which Ray Martinez participated in or attended after being confirmed to serve on the U.S. Election Assistance Commission (EAC) by the U.S. Senate on December 9, 2003 through the present. This includes lists of all such meetings, and all notes made at such meetings or telephone calls or in connection with such meetings or telephone calls.
4. All documents relating to meetings that were not publicly noticed, including all telephone conversations and conferences, which Carol Pacquette participated in or attended during the period she served as Acting Executive Director of the U.S. Election Assistance Commission (EAC). This includes lists of all such meetings, and all notes made at such meetings or telephone calls or in connection with such meetings or telephone calls.

5. All requests that have been made to the U.S. Election Assistance Commission (EAC) under the Freedom of Information Act (FOIA).

Please advise us of the cost prior to copying.

If this request is denied in whole or in part, I request that you justify all deletions by reference to specific exemptions of the FOIA. Please provide all segregable portions of otherwise exempt material.

Please send all records, as they become available, to this address:

Gavin S. Gilmour  
Associate General Counsel  
United States Election Assistance Commission  
1225 New York Ave., NW, Suite 1100  
Washington, DC 20005

Dear Mr. Gilmour:

We are in receipt of your letters dated August 30, 2005 and September 15, 2005 and respond as follows.

First, in your August 30, 2005 letter, you correctly point that in your July 29, 2005 letter requesting clarification, you informed us that the EAC’s documents “are identified by subject matter and the individual or organization that created it.” Based upon that statement, we clarified our request to ask for “all documents relating to meetings that were not publicly noticed.” Our clarification was based upon two assumptions: (i) that EAC members were required to maintain logs of who they met with and who they had telephone conversations with and (ii) that one of the EAC’s subject matter categories for document indexing would be “meetings not publicly noticed.” In your August 30, 2005 letter, you have now further clarified that “generally, the EAC does not maintain or track documents based upon their association with a given meeting (and attendance at that meeting).” However, you do not clarify whether the EAC members are in the practice of maintaining logs.

Under cover of letter dated September 15, 2005, you provided in excess of 150 pages of documents which we are in the process of reviewing. It is also our understanding that you might be providing additional documents from Commissioner DeGregorio upon his return from an official trip. We will be providing you with further comments as soon as we complete our review of the documents you have provided thus far.

Very truly yours,

Lida Rodriguez-Taseff  
Chair  
Miami-Dade Election Reform Coalition

Please call Melanie to set up a date in January for the meeting she requested.

----- Forwarded by Gracia Hillman/EAC/GOV on 12/13/2004 04:20 PM -----
"Melanie Campbell" <melaniec@ncbcp.org>

Thanks Gracia for meeting with me today. I will send out the EAC Announcement for the executive director position today to our e-mail lists.

I look forward to another opportunity to follow-up with you as we all continue to assess what worked and what didn’t work in the 2004 Election as far as the implementation of HAVA and other election systems issues.

I would like to schedule another time in January to share with you the results of our Election Day Poll, what we learned from our hotlines (1-866-OUR-VOTE and our Tom Joyner registration hotline 1-866-316-VOTE) and information on the poll locator website we utilized during the 2004 Election. I would like to bring our hotline vendor, Ken Smukler and NCBCP Board member, Rene Redwood, to join us for that follow-up meeting.

Please let me know when your schedule will allow a follow-up meeting hopefully in January.
Thanks.

Melanie

Attached is the draft letter that will be sent to the executive leadership of various nonprofit organizations inviting them to meet with us on Monday, January 24.

Please feel free to email back to me any comments and edits to the letter. My plan is to begin sending out the letters tomorrow (Tuesday).

**Via this email, I am asking Julie to make certain I have extended the appropriate invitation for this closed door meeting.**

It is also my plan to have a copy of the invitation list for you at tomorrow (Tuesday) morning's Discussion Session.

Mtg with Nonprofits, Jan 11 Invite Ltr.doc
January 11, 2005
**DRAFT**

Dear 

The U.S. Election Assistance (EAC) Commissioners request your presence at a meeting to be held on Monday, January 24, 2005. The meeting will begin at 1:30 p.m., is expected to last about 90 minutes, and will be held at our offices at 1225 New York Avenue, NW, Suite 1100, Washington, DC 20005.

As you know, the Help America Vote Act of 2002 (HAVA) established EAC to make certain that the law is fully and effectively implemented. The work of your organization brings value to this process. We also feel it is extremely important to have a direct relationship with the executive leadership of the nonprofit organizations that are committed to ensuring that American voters have confidence in the integrity and fairness of our elections. We did not have the opportunity to have such a meeting in 2004 and want to make certain that we do so early in 2005, before we begin our aggressive schedule of public meetings and hearings.

While we want an opportunity to personally share with you the broad based components of our 2005 work plan, it is our desire to have a broader discussion of how America is fairing under HAVA. You have been invited as the head of your organization because it is important that we hear directly from you. Your perspectives inform and bring value to our work as EAC Commissioners. Recognizing that we all rely heavily on expertise within our organizations, you are welcome to bring a member of your staff with you but we also want to emphasize that it is your input that we seek.

I hope you will join us on January 24 and look forward to seeing you then. Please confirm your attendance with my office at 202-566-3111. We will also need to know the name of any one who will accompany you to the meeting. My assistant, Sheila Banks, will provide any additional information you might need.

Best wishes for a wonderful, peaceful and successful New Year.

Sincerely,

Gracia Hillman
Chair
Commissioners-

At a session today, in which we discussed the upcoming public hearing on state-wide VR databases, set for Boston, on April 26, 2005, it was agreed that we will hold our working group meeting on state-wide VR databases on March 23 and 24, here in Washington.

Subject: Meeting with Ted Selker, MIT/Calech Voting Project

Hello Ms. Hillman,

Ted Selker will be in DC next week and he was hoping to be able to meet with you.

He will be arriving Wednesday, March 2 and would have time after 4:00 that day or Thursday morning before 10:00.

Please let me know what could work with your schedule.

Thank you.

Brad,

Just a note to let you know that I have confirmed your meeting with the Chair and the Vice Chair on Thursday, May 5 at 10:00 a.m. Do you think this meeting will last 2 hours?

Sheila
Sheila:

Thanks for calling today. We are glad that the Chairman can attend the Board meeting. We are looking for about 30 minutes including questions and answers focusing on what the EAC has accomplished so far -- especially the voting systems guidelines and the work that Jim and JR have contributed. It would be interesting for people to learn more about what comes next as well. Here is a link that describes more about the Board and its members:

http://www.access-board.gov/indexes/aboutindex.htm

BOARD MEETING

Day and Date: Wednesday, May 11, 2005

Location: The Westin Embassy Row
2100 Massachusetts Avenue, NW
Washington, DC

Time: 1:30 - 3:00 p.m.

I. Introductory Remarks - Jan Tuck, Chair

II. Roll Call

III. Approval of the March 9, 2005 Draft Meeting Minutes

IV. Committee Reports
A. Ad Hoc Committee on Board Election Process
B. Planning and Budget Committee
C. Technical Programs Committee
D. Executive Committee
§ Editorial Corrections to Revised ADA and ABA Accessibility Guidelines (Voting)
E. Public Rights-of-Way

VI. New Business
A. Presentation from the Election Assistance Commission

VII. Adjourn
Good Afternoon:

For the most part, the details and arrangements for the NASS Executive Board meeting with the EAC Commissioners are complete and I wanted to get this out to you for your information.

The meeting will take place on Tuesday, March 22, 2005 from 2:00pm – 4:00pm. The meeting will be held in the EAC Conference Room. The EAC is located at 1225 New York Avenue, N.W. Suite 1100.

The Executive Board members attending in person will be:
Hon. Rebecca Vigil-Giron, NM, NASS President
Hon. Donetta Davidson, CO, NASS President-elect
Hon. Deb Markowitz, VT, NASS Treasurer
Hon. Mary Kiffmeyer, MN, NASS Immediate Past President
Hon. Pedro Cortes, PA, NASS Eastern Region VP
Hon. Ron Thornburgh, KS, NASS Midwestern Region VP
Hon. Joe Meyer, WY, NASS Western Region VP
Hon. John Gale, NE, NASS Executive Board Member at Large

Meredith Imwalle, NASS Communications Director will be attending the meeting in person

Paddy McGuire, OR Deputy Secretary of State will participate via phone on behalf of the Hon. Bill Bradbury, OR, NASS Executive Board Member at Large
Charlie Krogmeier, IA First Deputy Secretary of State will participate via phone on behalf of the Hon. Chet Culver, IA, NASS Secretary
Leslie Reynolds, NASS Executive Director will participate via phone.

This is a busy time in Washington and hotel rooms were difficult to come by. Government rates were impossible to come by. For those who requested we find them a room, we have made reservations at the Four Points by Sheraton. I have confirmed these rooms with my personal Amex. It would be greatly appreciated if you could transfer the charges to your card when you check in! This hotel is about a block and a half from the EAC. The address is:
1201 K Street, N.W. Washington, DC
202-289-7600
202-349-2215 Fax

Rebecca Vigil-Giron, arrive 3-21-05 and depart 3-23-05, confirmation #107353401
Donetta Davidson, arrive 3-21-05 and depart 3-23-05, confirmation # 707354376
John Gale, arrive 3-21-05 and depart 3-22-05, confirmation # 867353401
Mary Kiffmeyer, arrive 3-21-05 and depart 3-22-05, confirmation # 187353402
Joe Meyer, arrive 3-21-05 and depart 3-23-05, confirmation # 527353401

Secretaries Markowitz, Cortes and Thornburgh will be arriving and departing on March 22, 2005 and therefore did not request a room.

The EAC will hold their monthly public meeting that morning from 10am – 12:00pm. Obviously you are
welcome to attend. I do not know what the public meeting agenda is yet.

Finally, Chair Hillman sent an email to Sec. Vigil-Giron in the middle of February saying that she planned to send her a list of topics that the EAC would like to discuss prior to the meeting. She requested that we do the same. Therefore, if you have any topics you would like addressed, please feel free to send them to me and I will make sure that they are included on the list Sec. Vigil-Giron sends back.

Thanks so much. Sorry I will miss you all when you are in town, but it is spring break for the kids' school and we are off to Florida.

Adam,

I successfully changed my train to one that is supposed to arrive at Union Station at 11:00 am on Monday. I therefore plan to come meet the Commissioner at 11:30 am. If the train is delayed, I will leave you a message.

As for the meeting attendees, they are:

Wendy Weiser, Brennan Center for Justice at NYU School of Law
Justin Levitt, Brennan Center for Justice at NYU School of Law
Lloyd Leonard, League of Women Voters
James Dickson, American Association of People with Disabilities
Steven Carbo, Demos
Jonah Goldman, Lawyers Committee for Civil Rights Under Law
Laleh Ipsahani, American Civil Liberties Union
Tanya Clay, People for the American Way
Larry Gonzalez, NALEO (arriving late)

Possible additional attendees include:

Jo-Anne Chasnow, Project Vote
Heather Thompson, Appleseed Foundation
Jeanette Senecal, League of Women Voters

Thank you. I look forward to meeting you in person.

Best,

Wendy

Subject Monday 5/16 database meeting

Adam,

I wanted to touch base to finalize the arrangements for our meeting on Monday, May 16 regarding the database guidance. Specifically, we need to clarify the time and location of the meeting. (I believe that you said that you preferred 12:30 pm.) I would also like to confirm that I am responsible for the meeting agenda. Finally, I have consulted with other advocates and have a near-final list of those who would like to attend. Please let me know if you would like a copy of that list in advance. Thanks, and I look forward to meeting you in person.

Best,

Wendy

Commissioners -

We have tentatively scheduled May 26 at 2:30 for a kickoff meeting here with Eagleton Institute. What will happen at this meeting is Eagleton will introduce their key people and make a brief presentation on their approach to performing the provisional voting and voter ID studies. It will be an opportunity to ask questions, raise any concerns, and/or provide guidance as they begin this work. Please advise if you wish to attend this meeting. I expect it will last about an hour.

Carol A. Paquette  
Interim Executive Director  
U.S. Election Assistance Commission  
(202)566-3125  cpaquette@eac.gov
Hello,

As per our conversation, I would like to set up a meeting with the chairwoman in mid June or as soon as her schedule allows.

I represent two organizations here in D.C., VerifiedVoting.org and the Miami-Dade Election Reform Coalition. At the March EAC meeting one of the panelists mentioned the Miami-Dade Election Reform Coalition as a non-partisan election reform community group that might serve as a model for community involvement on election related matters. I would like to share a little about the Coalition and talk about the possibility of having some leaders from Miami-Dade County present to the EAC.

Thanks very much for your consideration,

Bobbie

Subject: Re: June Meeting with Gracia Hillman

Ms. Brinegar,

Sorry for the delay in getting back to you.

Chair Hillman suggested that you meet with our Research Director, Karen Lynn-Dyson, and I understand that you met her at our May 24 public meeting. She has your information and will be in contact very soon.

Regards,

Sheila A. Banks
Special Assistant to Chair Gracia Hillman
U.S. Election Assistance Commission
1225 New York Avenue, NW, Suite 1100
Washington, D.C. 20005
Telephone: 202.566.3111
Fax: 202.566-1392
www.eac.gov
This will be a 20-30 minute free exchange with the Council's CEO and Vice President for Programs. The Vice Chair should read the proposal that is in the updated notebook which Joe Hardy has prepared for all of the Commissioners.

I'm hoping we can have a video, but will have to see if we can find a VCR around here!!

Also, there will be a follow-on 20 minute presentation by the law clerks, that will focus on an idea they have for an EAC voter information/education outreach project. They will be making a powerpoint presentation.

Let me know if you need other material.

Thanks

K

Commissioners,
I've arranged an ed. bd. meeting (Adam Cohen and others) with the New York Times for Friday, July 1. They are going to get back to me with available times, but I wanted you to know it’s in the works. After I get the particulars, I’ll give you a memo with all of the details.

Hey there --

Thanks for getting back to me. 10am on Monday is fine. See you then.

Kim

In a message dated 6/17/2005 10:09:27 A.M. Eastern Daylight Time, sbanks@eac.gov writes:

How about 10:00 a.m. on Monday, June 20?
Hi Sheila,
I just wanted to confirm the times and also say thank you very much for your help.

**Monday, June 27, 2005**
Gracia Hillman (Chair)  - From 09:00 - 10:00 - 202-566-3111 - Jeff will initiate the call
Tom Wilkey (Executive Director) - From 10:00 - 11:00 - 202-566-3114 - Jeff will initiate the call

**Tuesday, June 28, 2005**
Paul DeGregorio (Vice - Chair) - From 14:30 - 15:30 - 202-566-3106 - Jeff will initiate the call
Ray Martinez - waiting for response.

Please call with any questions.

December 15, 2004

The Honorable Ray Martinez III  
U.S. Election Assistance Commission  
1225 New York Avenue, NW, Suite 1100  
Washington, DC 20005  

Dear Mr. Martinez:

I am writing to invite you to join the board of The Pew Charitable Trusts for a discussion on election reform while we are visiting Miami, January 10-14, 2005. Given your leadership on states' implementation of the federal Help America Vote Act of 2002, we would welcome the chance to hear your insights about the process. Our five-day educational trip to Florida is being planned to provide our board with opportunities to learn about a range of critical issues facing the country and to talk with policy makers, experts and a number of the Trusts' grantees. We would be most honored to have the opportunity to meet with you during our stay.

The Pew Charitable Trusts supports initiatives that inform the public on key topics and trends, promote engagement in civic life, and advance policy solutions on important challenges facing the American people. For more than a decade, the Trusts has sought to facilitate the federal policy debate on such issues as environmental protection, public health, and genetics and technology. Recognizing the growing influence of states, the Trusts several years ago began to develop a number of programs directed at state policy change. Most recently, our board approved a plan to launch a "center on the states," which will allow us to work on a broader range of policy issues and improve the effectiveness of our efforts by becoming more active participants in the process.

During the last decade, the Trusts has supported three nonpartisan initiatives aimed at improving the nation's elections. As you know, in the aftermath of the 2000 election, the Trusts established Electionline.org, a project to help monitor, assess and facilitate effective election reform and restore the public's confidence in the right to vote. I was delighted to learn that you use Electionline.org regularly and consider it a comprehensive and credible resource. The Trusts also has played a significant role in reforming the nation's campaign finance system and in encouraging young people between the ages of 18 and 25 to vote.

Given your legal expertise in election issues and your service on the U.S. Election Assistance Commission, our board would benefit greatly from hearing your observations about election reform in Florida and nationally, both in terms of progress that has been made and work that remains to be done. Doug Chapin, director of Electionline.org, also will be joining us for this off-the-record conversation, which will be moderated by Sue Urahn, director of Policy Initiatives and the Education program at the Trusts. This session is scheduled for Wednesday, January 12, from 9 a.m. to 10:30 a.m. in the Marbella Room on the lobby level of the Biltmore Hotel in Coral Gables. We would appreciate it if you would speak to the board for 15 to 20 minutes, leaving ample time for questions and an open dialogue.
By way of background, our board consists of members of the Pew family as well as other business, health and academic professionals. Included among its membership are several physicians, a lawyer, an investment advisor, a rancher, a former banker, a recently retired Fortune 500 CEO and a former university executive. In addition, our board members serve on other corporate, university and charitable boards.

We would be very grateful if you would agree to take part in what promises to be a lively and informative discussion. If you are able to join us, we would, of course, be happy to cover any expenses you might incur, including hotel and travel.

Should you accept our invitation, my colleague Laura Shell will be in touch with your office closer to the event to confirm final logistical arrangements, while Sue will coordinate with you and Mr. Chapin on the content of the session. In the interim, please do not hesitate to contact Laura at 215-575-4701 with any questions.

Thank you for your thoughtful consideration of our invitation, and I hope to see you in January. In the meantime, you have my warm regards and best wishes for continued success in your important work on the U.S. Election Assistance Commission.

Sincerely,

Rebecca W. Rimes

BOARD DIRECTOR BIOGRAPHIES

ROBERT H. CAMPBELL (Bob)
Bob Campbell enjoyed a lengthy career at Sun Co., Inc., beginning in 1960 as an engineer. He rose through the company to become president and CEO in 1991, and retired as chairman and CEO in 2000. Currently, he serves on the boards of CIGNA Corporation, Hershey Foods Corp., Hypercar, Inc., Rocky Mountain Institute and Vical, Inc. In addition, Mr. Campbell has been a director on the boards of the Philadelphia National Bank, National Industrial Advisory Council of the Opportunities Industrialization Centers of America and Elwyn Institute. He received his bachelor's degree in chemical engineering from Princeton University, a master's degree in chemical engineering from Carnegie Mellon University and a second master's in management from the Massachusetts Institute of Technology. Mr. Campbell joined the board in 2001.

SUSAN W. CATHERWOOD
Susan Catherwood serves on the University of Pennsylvania board of trustees and is board vice chair of the Christopher Ludwick Foundation and the Executive Service Corps of the Delaware Valley. Ms. Catherwood is also a director on the board of The Glenmede Trust Company and is a board member of the United Way of Southeastern Pennsylvania, the World Affairs Council, the Monell Chemical Senses Center and the Thomas Harrison Skelton Foundation, among others. A graduate of Stanford University with a bachelor's degree in history and political science, she has a particular interest in culture, public policy, health and education. Ms. Catherwood has been a member of the Trusts' board since 1988.

GLORIA TWINE CHISUM
Dr. Chisum earned her bachelor’s and master’s degrees from Howard University and a PhD from the University of Pennsylvania. At the University, she served in a variety of capacities including trustee, vice chair of the trustees and chair of the Commission on Strengthening the Community. Ms. Chisum is a retired research psychologist who headed the vision laboratories of the U.S. Naval Air Development Station in Warminster, PA. She is a member of the Philadelphia Compact Leadership Group and has previously served on the boards of the Free Library of Philadelphia, the Annenberg Research Institute, the William Penn Foundation, Fischer & Porter Company and the former Meritor Savings Bank. Dr. Chisum joined the board in January 2004.

ALAN J. DAVIS
Alan Davis is a partner at the law firm of Ballard Spahr Andrews & Ingersoll. His practice areas include commercial litigation, securities, criminal and municipal law. Mr. Davis has served as city solicitor of Philadelphia, chief assistant district attorney of Philadelphia, chief labor negotiator for the Southeastern Pennsylvania Transportation Authority (SEPTA), the School District of Philadelphia, and the City of Philadelphia. He is a past chairman and present member of the Executive Committee of the University of Pennsylvania Law School Inn of Court and a fellow of the American College of Trial Lawyers and International Academy of Trial Lawyers. He has been a lecturer at the University of Pennsylvania Law School and is active in various civic and charitable organizations. Mr. Davis is a graduate of the University of Pennsylvania (AB, with honors, 1957), and Harvard University (LLB, magna cum laude, 1960), and was editor of the Harvard Law Review. Mr. Davis joined the board in January 2004.
THOMAS W. LANGFITT, MD (Tom)
Tom Langfitt served as the president of the Trusts until 1994 and as chairman and chief executive officer of The Glenmede Corporation until May 1997. Prior to joining the Trusts, he was the Charles Harrison Frazier Professor and director of the division of neurosurgery at the University of Pennsylvania. During his 25-year tenure at Penn, Dr. Langfitt also served as vice president for health affairs, responsible for the university's hospital and health profession schools. His research interests include head injury, intracranial pressure, cerebral blood flow and metabolism. He is a graduate of Princeton University and the Johns Hopkins University School of Medicine and is the author of more than 200 publications. Dr. Langfitt is a fellow of the College of Physicians and a member of the American Philosophical Society and the Institute of Medicine. He is a director on the board of The Glenmede Trust Company, the University of Pennsylvania Medical Center, the National Museum of American History and the Greater Philadelphia Urban Affairs Coalition. He also has affiliations with Harvard Medical School and Princeton University. Dr. Langfitt has been a member of the Trusts' board since 1980.

PAUL F. MILLER, JR.
Paul Miller formerly served on the Trusts' investment committee and is a retired investment company executive. A founding partner of Miller, Anderson & Sherrerd, he has served as a trustee of the University of Pennsylvania, and on the boards of the Ford Foundation, Colonial Williamsburg, the Science Center of New Hampshire and on the board of overseers of the Wharton School. Mr. Miller is a member of the Financial Analysts of Philadelphia, the World Wildlife Fund, where he also serves as a director, and various other organizations. He earned his bachelor's degree from the University of Pennsylvania and has received honorary degrees from both Penn and Washington and Lee University. Mr. Miller joined the board in February 2004.

ARTHUR E. PEW III (Art)
Art Pew received a bachelor's degree in mechanical engineering from Princeton University. He has worked with the Burlington Northern Railroad, Pennsylvania Railroad and Chicago & Northwestern Railway in a number of professional capacities. His fondness for trains has continued through retirement. Mr. Pew is a director on the board of The Glenmede Trust Company and also currently serves on the boards of the Minnesota Transportation Museum, Museum of Transportation and Development, Osceola & St. Croix Valley Railway, Manitou Island Association and the Corporation of the Bermuda Biological Station for Research. His other interests include culture and health issues. He is the brother of Andy Pew and half brother of Sandy Pew. Mr. Pew has been a member of the Trusts' board since 1994.

MARY CATHARINE PEW, MD (Cathy)
Cathy Pew is a staff pediatrician with the Community Health Centers of King County in Washington State. She earned her medical degree at the University of Pennsylvania and holds a bachelor's degree in molecular biology from Yale University. Throughout her career, she has maintained a strong interest in issues related to child development and behavioral problems as well as children in crisis. Dr. Pew is fluent in Spanish and is a member of the American Academy of Pediatrics and Ambulatory Pediatric Association. She is the daughter of J. N. Pew, 3rd and the sister of Joe Pew IV and Howdy Pew. Dr. Pew joined the Trusts' board in 2000.

J. HOWARD PEW II (Howdy)
Howdy Pew attended the University of Vermont, holds a bachelor's degree in liberal arts from The Pennsylvania State University and earned a master's degree in wildlife biology from the
University of Montana. Howdy is a director on the board of The Glenmede Trust Company. He is an avid outdoorsman and a strong advocate for the environment, and has a particular interest in natural resource issues and public policy. Howdy is the son of J. N. Pew, 3rd and the brother of Joe Pew IV and Cathy Pew. Mr. Pew has been a member of the Trusts’ board since 1972.

J.N. PEW IV, MD (Joe)
Joe Pew IV, a graduate of the University of Pennsylvania School of Medicine, is a physician at the Reading (PA) Hospital and Medical Center, and Community General Hospital. Dr. Pew is a director on the board of The Glenmede Trust Company and includes among his memberships the American Medical Association, the American College of Physicians, American Red Cross, French & Pickering Creek Conservation Trust and the Pennsylvania Medical Association. His special interests are in the areas of health, public policy and the environment. He is the son of J. N. Pew, 3rd and brother of Howdy Pew and Cathy Pew. Dr. Pew has been a member of the Trusts’ board since 1988.

R. ANDERSON PEW (Andy)
A director of Sun Company, Inc., Andy Pew served as president of the Helios Capital Corporation (a Sun subsidiary) and corporate secretary for Sun Company. He received his bachelor’s degree from Temple University and a master of science degree in management from the Massachusetts Institute of Technology. Mr. Pew is currently director and chairman of the board of The Glenmede Corporation and is involved with many local civic organizations including the Children’s Hospital of Philadelphia, Bryn Mawr College, the Curtis Institute of Music, the Academy of Music and Jackson Laboratory. He is an active pilot and chairman of the board for the Aircraft Owners and Pilots Association. Mr. Pew is the brother of Art Pew and half brother of Sandy Pew. He has been a member of the Trusts’ board since 1967.

SANDY PEW
In addition to owning and operating the North Ridge Ranch in Montana, Sandy Pew leads study trips for individuals and groups in the Northern Rockies. These guided journeys focus on the wildlife in Grand Teton, Yellowstone and Glacier National Parks as well as the national forests of the area. Mr. Pew received a bachelor of science degree in range and animal science from Arizona State University. Sandy is a director on the board of The Glenmede Trust Company and, with interests in religion, the environment and education, he has served on the boards of many conservation and educational organizations, including the Yellowstone Center for Mountain Environments, the Mountain Research Center at Montana State University, the Glacier Fund, the Fountain Valley School in Colorado Springs and Teton Science School in Wyoming. He is the half brother of Andy Pew and Art Pew. Mr. Pew has been a member of the Trusts’ board since 1994.

REBECCA W. RIMEL
President & Chief Executive Officer
Rebecca joined the Trusts’ staff in 1983 and became executive director in 1989 and president and chief executive officer in 1994. She came to the Trusts from the University of Virginia Medical Center, where she was head nurse in the emergency department and assistant professor of neurosurgery, the first nurse to hold a faculty position in the university’s medical school. She has authored or coauthored numerous scientific articles relating to head injury and is active on many boards. Rebecca serves on several boards including Deutsche Banc Scudder Funds and is emeritus trustee of Monticello-The Thomas Jefferson Foundation. She has been appointed to President Bush’s Council on Service and Civic Participation and is a member of the Greater
Philadelphia Chamber of Commerce Executive Committee and the American Philosophical Society, as well as a fellow of the College of Physicians of Philadelphia. Rebecca received a BS degree, with distinction, from the University of Virginia and an MBA from James Madison University. Ms. Rimel has been a member of the Trusts' board since 1994.

ROBERT G. WILLIAMS (Bob)
Bob Williams retired in 1993 from the Markel Corporation, where he was owner and chair. Previously, he had served 24 years at The Girard Bank in a variety of positions ranging from security analyst to vice chairman and director. Currently, Mr. Williams serves as chairman of the board of The Glenmede Trust Company and is a member of several other boards, including the Coriell Institute for Medical Research, Estaugh Corporation, Upland Corporation and the Elizabeth Haddon Housing Corporation. He is a graduate of Babson College and Harvard Business School and has interests in health, the arts and the environment. Mr. Williams has been a member of the Trusts' board since 1996.

ETHEL BENSON WISTER (Peppi)
Peppi Wister is a director of The Glenmede Corporation and Glenmede Trust Company. Ms. Wister has been involved with many cultural organizations and currently serves on the board of Philadelphia Television Network, Inc. and is a committee member of the Academy of Music. She is also the recipient of numerous awards, including the 1997 Arts Award from the Concerto Soloists Orchestra and the 1998 Guest of Honor Award from Scheie Eye Institute. Ms. Wister has been a member of the Trusts' board since 2003.
Overview

Since the 2000 election, Florida has been the poster child for election reform. George W. Bush’s narrow 537-vote victory over Al Gore that year catapulted the state into the international spotlight and subjected its electoral process to withering scrutiny. As the national drama over the outcome of the presidential election continued, Florida and its election officials were the subject of nearly daily reports about the conduct of the vote. And the halting effort to conduct a recount triggered widespread frustration, both with the highly decentralized nature of the American electoral system and the lack of formal or informal national voting standards.

The events in Florida became the catalyst for nationwide changes in election reform. In 2002, Congress enacted the Help America Vote Act (HAVA), which promised $3.86 billion to help states address their election problems and established a new federal agency, the Election Assistance Commission (EAC), to dole out the funds and provide states with information and guidance on election administration. In exchange for the federal grants, states were required to meet certain national mandates, including provisions for statewide computerized voter databases and voting technology upgrades. But while states immediately received about $650 million to begin updating voting equipment, Congress and the White House took more than a year to appoint the EAC, which in turn delayed the distribution of additional HAVA funds to the states.

As both states and the EAC fought to catch up, predictions about the nation’s electoral readiness in 2004 became dire. Some states, including Florida, rushed to purchase touchscreen voting machines, only to find themselves mired in lawsuits over voter-verifiable paper trails. States adopted different interpretations of HAVA’s voter identification and provisional ballot provisions. Democrats and Republicans exchanged heated accusations about fraud among absentee ballots, and each party deployed thousands of lawyers and activists to monitor the polls.

Much to the country’s surprise and relief, no major glitches occurred on November 2. For Florida, the margin of victory in the presidential race, combined with a relatively smooth Election Day and more widely publicized problems in Ohio and elsewhere, took the state off election reform’s center stage. But as many experts noted, there were a number of places in the country where, if the vote had been closer, scrutiny of the
election process would have produced the same sort of consternation as did the events of four years ago. And states are far from meeting all of the HAVA mandates—or receiving the full appropriation promised by Congress. More than 40 states, for example, received waivers until 2006 on the requirement that they establish statewide voter registration databases, which will help guarantee that voter lists are accurate.

This session’s speakers—Doug Chapin, director of the Trusts-supported Electionline.org initiative, and Ray Martinez III, a member of the federal EAC—will offer a retrospective look at the states’ progress on election reform since 2000, as well as an analysis of what challenges lie ahead as the nation turns its attention to the 2006 and 2008 elections.

SPEAKERS' BIOGRAPHIES

Doug Chapin

Doug Chapin is director of Electionline.org, created by the Trusts in March 2001 to monitor, assess and help advance states’ election reform efforts in the aftermath of the 2000 elections. Mr. Chapin has worked on the legal and policy aspects of election issues for more than 15 years. Prior to joining Electionline.org, Mr. Chapin worked at the law firm of Skadden, Arps, Slate, Meagher & Flom, counseling clients on compliance with federal, state and local laws regulating campaign finance, lobbying, gifts to public officials and conflicts of interest. At District, Shaprio, Morin & Oshinsky, he established the firm’s disclosure program under the Lobbying Disclosure Act and litigated redistricting cases in state and federal court.

Mr. Chapin served for three years as elections counsel to the Democrats on the U.S. Senate Rules Committee, where he worked on campaign finance reform, election administration, disabled voting and other issues. He also spent five years as director of research and statistics at Election Data Services, a political consulting firm, and was a statistician for the Federal Election Commission. Mr. Chapin received a law degree from Georgetown University Law Center, a Master’s degree in public administration from Harvard’s Kennedy School of Government and a Bachelor’s degree in politics from Princeton University.

Ray Martinez III

Ray Martinez is one of four members of the U.S. Election Assistance Commission (EAC). Mr. Martinez was nominated by President Bush and confirmed by unanimous consent of the U.S. Senate in December 2003. Previously, he was an attorney in Austin, Texas, focusing primarily on government affairs and administrative law matters for county governments and other public entities. He also served as executive director and legal counsel of the Every Texan Foundation, a nonpartisan voter registration and education effort aimed at increasing voter participation in Texas.

Before beginning his law practice, Mr. Martinez served as deputy assistant to the President for Intergovernmental Affairs, assisting former President Clinton with policy
issues involving the nation's governors and other state elected officials. He also helped develop long-term strategies to stimulate economic growth along the U.S./Mexico border region and helped establish the U.S./Mexico Border Health Commission, now headquartered in El Paso, Texas. He served as regional director for the U.S. Department of Health and Human Services (HHS) in Dallas, where he focused agency resources on public health issues such as full implementation of the Children's Health Insurance Program. He also served as White House liaison to HHS and as special assistant to the President in the White House Office of Political Affairs. Prior to his service in the federal government, Mr. Martinez worked as a legislative liaison for the Texas Attorney General's office, and on staff at the Texas legislature. A native of Texas, he received his law degree from the University of Houston Law Center and his Bachelor's degree from Southwestern University.
Voting confusion raises fears of more polling day glitches.

By HOLLY YEAGER
525 words
20 October 2004
Financial Times
London Ed3
Page 8
English
(c) 2004 The Financial Times Limited. All rights reserved

The electoral reforms launched after the contested 2000 US election have only been partially implemented, and some voting procedures across the US remain confused, a report on possible election glitches said yesterday.

The study by electionline.org, a non-partisan research group, comes amid growing concern that "overtime" will be required to determine the outcome of this year's presidential contest. High voter turnout, close contests in battleground states and legal challenges could potentially delay results. Democrats, Republicans and activist groups; have lined up thousands of lawyers to monitor polling stations on election day. The campaigns have also been raising money for any recounts.

"What happened in (the) 2000 (election) might never be repeated again, but some of the ingredients that produced chaos four years ago still exist," said Doug Chapin, director of electionline.org.

Many states moved to install touch-screen voting machines. But uncertainty about the ability to provide a paper receipt to voters, and to conduct a recount if a contest is close, has stalled adoption of that technology.

A separate area of concern is so-called provisional ballots. The Help America Vote Act, passed after the 2000 debacle, gave voters who show up at a polling stations and believe they are registered - but do not find their names on the voter rolls - the right to cast a ballot. This would be counted only if the voter's eligibility was subsequently confirmed.

But states have set up different procedures for determining voter eligibility, with some 28 mandating that ballots cast in the wrong precinct should not be counted.

"Many people are afraid provisional ballots will become the hanging chads (of Florida) of 2004," Mr Chapin said.

The US Justice department stepped in to a dispute surrounding this issue on Monday, asking a federal judge in Michigan to dismiss a lawsuit brought by Democrats attempting to require the state to count ballots cast in the wrong precinct.

About a dozen other lawsuits are pending across the country that could effect the conduct of the vote.

Mr Chapin also identified three areas in which reform did not keep pace with expectations after 2000: the Pentagon reversed course and did not institute an Internet voting system for military personnel overseas; only 15 states have statewide databases required by the voting law; and the federal government has dispensed only a portion of the money pledged to help states with these reforms.

In Florida, where early voting began Monday, civil rights groups complained that an area with a high concentration of black voters was inadequately served by a single early-voting site. The Republican secretary of state said additional sites would be added.

Cornell Belcher, a Democratic pollster who studies African-American and young voters, said the hot-button issue for black women this year was not the war in Iraq or the economy.

"What's at stake is their belief in our Democratic democratic system," he said.

The single comment he hears most often is: "is my vote going to be counted?"
Problems at polling places; No major meltdowns reported, but minor troubles snarl voting process

By Deborah Hastings
Associated Press
3 November 2004
Akron Beacon Journal (OH)

Machines malfunctioned, tempers flared and edgy voters often waited in lines for hours Tuesday to pick a president in a contentious race watched by thousands of monitors who expected the worst.

By midday, several local snarls had been reported but no widespread allegations of voting problems.

' 'So far, it's no big, but lots of littles,'" said Doug Chapin, director of the Election Reform Information Project, a nonpartisan research group. ' 'We know of no major meltdowns anywhere along the lines some people were worried about.'"

Hyper-vigilance appeared to be the order of the day, which in some states prompted poll closures and unfounded complaints.

In the battleground state of New Jersey, for example, a suspicious substance later determined to be spilled salt prompted the two-hour closure of a Mount Laurel precinct. In Pennsylvania, zealous GOP election monitors complained that some Philadelphia voting machines already had thousands of recorded votes when the polls opened at 7 a.m.

Local election officials quickly explained that voting machines registered every vote ever cast on them -- like mileage on a car odometer -- and that did not constitute evidence of fraud.

' 'It's absolutely ridiculous,'" said Deputy City Commissioner Ed Schuigen.

In other states too close to call -- including Iowa and Michigan -- the liberal group MoveOn.org was accused of disrupting local precincts. In Ohio, a woman filed a lawsuit on behalf of voters who didn't receive absentee ballots on time, asking they be allowed to cast provisional ballots. Later in the day, a Toledo federal judge granted her request.

New touch-screen voting machines, which have been criticized by computer scientists and various states as susceptible to hacking and malfunction, were used Tuesday in 29 states and the District of Columbia. Only in Nevada, for this election, did the machines produce the paper records that make recounts reliable.

In Florida, which gave the 2000 election to President Bush on the basis of 537 votes, nearly half the state's voters were using the ATM-like machines.

Chellie Pingree, president of Common Cause and a former international election monitor, said a toll-free voting hot line established by her citizens' lobbying group had logged 20,000 calls by 10 a.m.

Provisional ballots, new this election, also prompted disaster fears because they could delay any recount efforts. Any voter whose name does not appear on precinct rolls is entitled to cast a provisional -- or paper -- ballot. But election officials must individually certify them as being cast by registered voters before they can be counted.
Georgia's touch-screen voting machines passed a major test Tuesday.

A record 3.2 million voters cast ballots across the state, and no widespread equipment problems were reported. Just 24 minutes after the polls closed, unofficial results began flowing in to state election workers headquartered in Atlanta. In an exit poll of 1,618 Georgians conducted for The Atlanta Journal-Constitution and other media, 90 percent said they believed their votes would be counted accurately.

And on Election Day, Secretary of State Cathy Cox's worries were about long lines and provisional ballots. She wasn't having to defend the performance of the touch-screen machines she purchased in 2002 to replace the state's former patchwork of lever, optical scan and punch-card voting systems.

"They liked the machines," Cox said of Georgia voters. "They're frustrated with how long it takes to go through the check-in process. That's part of what we'd like to attack next."

Only a few minor problems with voting equipment were reported. Election officials had trouble programming voter access cards used to cast ballots, delaying the opening of some polls in Rockdale, Twiggs and Hancock counties.

Touch-screen voting also is used in parts of Florida, California, Nevada and other states. Officials in Maryland, the only other state that votes exclusively on touch-screen machines, also were crowing about their Tuesday success.

Like Cox, Maryland's chief election official hopes that problem-free elections eventually will snuff out criticism from some computer scientists, political activists and others who believe that electronic voting can be manipulated to produce fraudulent results.

"The fact that elections went so well across the country ... it's got to start quieting down a bit," predicted Linda Lamone, Maryland's administrator of elections.

But that's not likely to happen, countered Doug Chapin, director of electionline.org, an election reform project financed by the Pew Charitable Trusts.

"Anyone who had an opinion on electronic voting before Nov. 2 saw nothing on Nov. 2 to change their opinion," Chapin said. "The people who make the machines, bought the machines or like the machines saw nothing that would dissuade them from making, buying or liking them in the future. People who have concerns about the machines saw nothing that would dissuade them from having continued concerns."

Forsyth County computer programmer Roxanne Jekot of countthevote.org said it's "foolish" for anyone to immediately declare electronic voting a rousing success. She said she is withholding judgment for now.

"I really don't have any comment until I get some numbers and do some evaluation and take a look at what the end result was," Jekot said.

Georgia Tech researchers have devised a survey that seeks voters' opinions on their experiences in casting ballots. The
survey can be accessed at www.ittatc.org/voting.php, or a paper copy can be obtained by calling 1-866-948-8282.

Cox's office will begin meeting soon with an advisory panel of local elected officials to talk about how to streamline the voter check-in process in hopes of ending long waits at the polls. Among the ideas --- one already used in Forsyth County --- is the automation of a statewide voter registration database so that voters' names can be looked up on laptop computers at the polling place rather than manually.

Electiononline.org's Chapin said that "on first blush ... it's a positive sign" that there were no major national problems reported with electronic voting. But he was cautious about drawing any broad conclusions just two days after the election.

"We don't know yet if the absence of reported problems so far means that there weren't any problems," Chapin said. "Or if it's like the old joke about the guy who fell off the tall building --- they knew he was an optimist because halfway down they heard him say, 'So far, so good.' " Photo Touch-screen machine instructions helped voters cast ballots Tuesday at City Hall in Morrow. / JOHNNY CRAWFORD / Staff

More than 4,000 votes vanished without a trace into a computer's overloaded memory in one North Carolina county, and about a hundred paper ballots were thrown out by mistake in another. In Texas, a county needed help from a laboratory in Canada to unlock the memory of a touch-screen machine and unearth five dozen votes.

In other places, machine undercounting or overcounting of votes was a problem. Several thousand votes were mistakenly double-counted in North Carolina, Ohio, Nebraska, and Washington state. Some votes in other areas were at first credited to the wrong candidates, with one Indiana county, by some quirk, misallocating several hundred votes for Democrats to Libertarians. In Florida, some machines temporarily indicated votes intended for challenge John F. Kerry were for President Bush, and vice versa.

In the month since the election, serious instances of voting machine problems or human errors in ballot counts have been documented in at least a dozen states, each involving from scores of ballots to as many as 12,000 votes, as in a North Carolina county. On Election Day, or in later reconciling tallies of ballots and voters, local officials discovered problems and corrected final counts. In some cases, the changes altered the outcomes of local races. But in North Carolina, the problems were so serious that the state may hold a rare second vote, redoing a contest for state agriculture commissioner decided by fewer votes than the number of ballots lost.

After the disputed vote in Florida four years ago, Congress passed the Help America Vote Act of 2002 and authorized $4 billion so states could create central computerized voter lists and replace outdated voting systems such as punchcards by 2006. But many states have not completed the overhaul, and this year's election unearthed enough problems both with older technologies and newer electronic touch-screens that two federal agencies plan unprecedented nationwide inquiries. The investigations by the Government Accountability Office and US Election Assistance Commission will begin early next year and be completed by mid-2005, at the earliest.

In addition, minor presidential candidates requested recounts in four states a partial one completed yesterday in New Hampshire, and statewide in Ohio, New Mexico, and Nevada.

None of the recounts or inquiries is expected to affect the results of the presidential election, which Bush won by more than 3.3 million votes.

Those who believe that either or both of the past two presidential elections were manipulated by a vague conspiracy to elect Bush have done statistical analyses of voting patterns in Florida and argued that the voting discrepancies were much larger and systemic, but their studies have not stood up to scrutiny from academics and other analysts.

Most of the concerns, which have rocketed through the Internet, center on computerized voting or tabulating machines, including some that do not keep a paper record for audits and recounts. Some computer scientists acknowledge that these systems could be vulnerable to tampering.

"I would hesitate to take seriously the conspiracy theories, but there are certainly gaps and vulnerabilities that have got to be addressed," said DeForest B. Soaries, chairman of the US Election Assistance Commission, which was created by the 2002 law and plans to conduct hearings around the country on the voting.

"We are convinced that while the election went relatively smoothly compared to what many had expected, that does not eliminate the need to study the results and collect data to document machine malfunctions and other administrative matters," Soaries said.
Since 2000, watchdog groups have intensified their monitoring and cataloging of complaints and errors. The nonpartisan Verified Voting Foundation and other groups built a database of more than 30,000 "election incidents" reported across the country this year. Most were routine, but nearly 900 involved significant e-voting problems, including malfunctions that shut down machines, lengthening waits at the polls. There were 42 reports of total breakdowns of machines in New Orleans and 28 in Philadelphia and "15 reports of catastrophic machine failure" in Mercer County, Pa.

The most serious problems occurred in North Carolina, where 4,388 e-votes disappeared in Carteret County. In at least five other counties, major double-counting or undercounting was discovered and corrected by North Carolina officials during their tabulations.

Johnnie McLean, deputy director of the State Board of Elections, attributed many mistakes to "the human element, brought on by fatigue." In Carteret, for example, election workers apparently did not notice the "Voter Log Full" message on the black box as the UniLect touch-screen failed to record the electronic votes, she said.

"If we had problems in the past, they were not magnified like this," McLean said, referring not only to the closeness of the statewide race, but also the extraordinary scrutiny of voting since 2000.

Examples of other major problems that were reported on and after Nov. 2, then later corrected, include:

- Thousands of ballots were mistakenly double-counted in Sandusky County, Ohio; Sarpy County, Neb.; and Grays Harbor County, Wash. Democrats in Washington must decide by Friday whether to seek a second recount in the closest governor's race in state history. One recount has been held, reducing Republican Dino Rossi's 261-vote lead to 42 votes over Democrat Christine Gregoire.
- In Gahanna, Ohio, a suburb of Columbus, Bush was temporarily credited with 3,893 more votes than he actually received in a precinct where only 538 voters cast ballots on a Danaher electronic voting machine.
- In Franklin County, Ind., a tabulator credited about 600 straight-ticket Democratic votes to Libertarian Party candidates.
- In Collin County, Texas, the memory card of a Diebold Election Systems touch-screen machine had to be sent to a laboratory in Canada a week after the election to extract information about 63 votes cast before the machine froze and was taken out of service.
- In South Florida's Broward County, "multiple misrecordings" occurred when votes for Kerry on touch-screens made by Election Systems & Software Inc. appeared as Bush votes, and there was at least one account of a Bush vote going to Kerry, the Verified Voting group reported. Broward voters discovered the problem on screens that allowed them to check their selections before entering them electronically.

The long list of documented problems has fueled the suspicions of conspiracy theorists, activists, and the minor presidential candidates who requested the New Hampshire and Ohio recounts.

Ohio decided the 2004 contest, but since the 2000 election, Florida remains the focus of the doubters and the devotees of various scenarios that suggest skullduggery, in part because early exit polls overstated Kerry's strength.

No group has been more aggressive than Seattle-based Black Box Voting, which bills itself as "consumer protection for elections." Led by founder Bev Harris, the organization is seeking election records from around the country for audits of the results. The primary focus is Florida, where internal computer records have Volusia County, in the east-central part of the state, being contested.

Four years ago, during vote-counting on election night, a faulty memory card initially deducted 16,022 votes from Democrat Al Gore's vote total in Volusia. Despite spending about $300,000 to upgrade equipment and avert a repeat, there were memory card problems this year in tabulators for six Volusia precincts. The optically-scanned paper ballots were re-fed into other counting machines to reach an accurate tally, a county election official said.

"All day long, I get desperate calls from people who are in so much pain," said Harris, the Black Box founder, who said she is convinced fraud occurred in some places Nov. 2. "They say: Can you fix it? Can you solve it? Can you turn around the presidential election? We're not trying to turn the election around. We're trying to get elections to be more transparent, because with the new machines, it's not transparent."

Deanie Lowe, Volusia's supervisor of elections, said she has complied with Harris's record requests and offered to recount, free of charge, any three of Volusia's 179 precincts selected by Harris.
Harris, however, said records for all precincts were not turned over, and Black Box will seek a 50-precinct recount in the county, which Kerry won but by a smaller margin than Gore did in 2000.

Much of the postelection focus on Florida resulted from a pair of analyses that claimed Bush’s vote totals in the state were inflated by two vote-counting technologies.

The first analysis originated on the Web and cited results in rural, overwhelmingly Democratic counties in Florida’s panhandle, where Bush crushed Kerry. All use optical scanners. What the analysis failed to note is that Bush routed Gore by nearly equal margins four years ago in the same conservative counties that have been tilting Republican for years in national elections. A team of Miami Herald reporters reviewed 17,000 ballots in three of the counties, basically confirming the election results.

Then, a broadly reported second study by a team at the University of California at Berkeley, using an academic statistical method, asserted that “irregularities associated with electronic voting machines may have awarded 120,000 excess votes to President George W. Bush in Florida.” In Broward County alone, the study said, Bush “appears to have received approximately 72,000 excess votes.” Palm Beach and Miami-Dade counties, which also use touch-screens, were also cited as anomalies.

But if Bush had actually received 72,000 fewer votes in heavily Democratic Broward, his total this year would have been less than it was in 2000 even though nearly 132,000 more ballots were cast. Kerry won all three key counties, Broward by more than 209,000 votes.

Bush carried the state by 380,978 votes, or about 5 percent of 7.6 million cast.

If recounts are the skeptics’ best hope to uncover systemic irregularities, they got off to a rocky start in New Hampshire. Completed yesterday at the request of independent candidate Ralph Nader, the Granite State re-tally of 50,650 votes in 11 towns and cities found that use optical scanners increased Kerry’s total by 87 votes and Bush’s by 62.

Secretary of State William M. Gardner said scanned ballots have worked well in New Hampshire. Indeed, the largest discrepancies found this year were in a legislative race involving hand-counted ballots, he said.

On deck is Ohio, which tipped the Electoral College to Bush. At the earliest, the recount of 88 counties won’t begin until Dec. 13, according to the secretary of state’s office, the same day the Electoral College is scheduled to formalize Bush’s reelection. The recount could take anywhere from a few days to a few weeks. Minor presidential candidates Michael Badnarik and David Cobb of the Libertarian and Green parties, respectively, have said they would formally seek the recount once the state certifies the official results Monday. They will incorporate the review of 155,000 provisional ballots, which were not included in preliminary tallies that showed Bush winning Ohio by 136,483 votes, or about 2.5 percent.

How long the recount takes will depend on whether Badnarik and Cobb ask for a manual inspection of any or all of the 5.5 million ballots, said Carlo LoParo, spokesman for Ohio’s secretary of state, J. Kenneth Blackwell.

Of complaints about long lines that discouraged some from voting and allegations that there was a shortage of machines in some urban Democratic areas, LoParo said such decisions in Ohio are made by county boards of elections with two Republicans and two Democrats.

Long waits in Ohio and elsewhere resulted from the system being overwhelmed by a high turnout, said Doug Chapin, director of the nonpartisan electionline.org, which monitors reform efforts.

More attention should be paid to providing an adequate number of machines in polling places, he said, as well as “finishing the job” mandated by the Help America Vote Act. Forty states, for example, have yet to comply with a mandate to establish a central, statewide database of registered voters. That will reduce questions about voter eligibility at election time, Chapin said.

Whatever the outcome of the recounts and the official inquiries by federal agencies, the impetus for improve voting systems will not fade, he said.

"This is not a fringe issue, because a sizable group is interested in pursuing this as a policy issue going forward," Chapin said. "There's now a critical mass of people involved who want to address the problems that occurred in 2004. This issue is not going to go away."

SIDEBAR: ELECTION DAY PROBLEMS PLEASE REFER TO MICROFILM FOR CHART DATA.

Lawmakers, Election Officials Push for Change After Vote

By Dan Shuey
electionline.org

State lawmakers and election officials have for the most part put the election behind them, but not the problems that occurred in a number of states and localities.

With a few months to go before most state legislatures open sessions early, top election officials and politicians are beginning to lay out their plans for changing the way elections are administered based on the lessons they learned on November 2.

The plans being floated for deliberations next year range from the practical, the addition of early or no-excuse absentee voting in states that do not allow such options for voters now, to the innovative, which in Florida is a call for an election "season" that lasts two weeks rather than a traditional Election Day.

Problems a month ago at the polls have prompted calls for updated or standardized voting machines in New York and New Mexico. And it appears likely that the debate over the need for voter-verified paper audit trails with electronic voting machines will again be rekindled in a number of state legislatures.

A review of press reports from the past few weeks preview the focus of discussions in a number of states.

Florida election officials have proposed creating an election season which would do away with a set election day and allow voting through an extended time period, the Miami Herald reported.

In Iowa, Secretary of State Chet Culver has said he will ask the state legislature to approve same-day voter registration, and to also consider a mail-in election system, according to the Iowa City Press-Citizen. In Connecticut, the Record-Journal reported that lawmakers there are also considering same-day voter registration.

The Albuquerque Journal reported New Mexico Gov. Bill Richardson has proposed several changes he would like to see for the next election, including standardizing voting machines in all counties, requiring voting machines to leave a paper trail and developing new standards concerning the ratio of voting machines per voter in order to prevent long lines.

New York City Mayor Michael Bloomberg publicly criticized the voting machines that were used in the November election, saying they were over 40 years old, and based on a patent developed by Thomas Edison which is almost 140 years old, Newsday reported. After noting the current voting machines "belong in the New York Historical Society" rather than polling places, Bloomberg said that the state lawmakers need to enact legislation to free up $200 million in federal
funds to buy new voting machines.

2. Texas state Rep. Aaron Peña, proposed H.B. 166, which would require voting machines to give voters paper receipts. If passed, the bill would go into effect January 1, 2006. A companion bill has also been submitted in the Texas State Senate, as reported by The Valley Morning Star.

3. According to the Miami Herald, Florida Gov. Jeb Bush has supported a series of changes that will revise the way in which felons can regain the right to vote. They would include easing restrictions in clemency rules which will allow more felons the right to vote, as well as hiring more staff in order to handle the backlog of felons who have applied to have their rights restored. The changes will be introduced by the clemency board in early December.

4. Illinois election officials have called for legislation which would create a statewide standard for counting provisional ballots, the State Journal-Register reported. In the 2004 elections, different counties used different standards as to where provisional ballots could be cast and for what races they could be cast for.

5. According to The Journal Inquirer, Connecticut will be holding legislative hearings on adding no-excuse absentee voting for the next election.

electiononline.org will continue to update the progress of election administration bills filed in state legislatures.

entitled 7/22/05
Planning Session on State Voter Registration Databases
EAC follow-on proposal

Discussion document

In my survey of the state and Academy technology experts, everyone noted the significance of the January 1, 2006 deadline. Further, there was a broad consensus that many states are in danger of falling short of deploying a HAVA-compliant system by that date. Short-term measures that the EAC and Academies might undertake together fell into two broad categories: technical and administrative.

Prior to January 2006

The following technically oriented objectives were mentioned as useful activities to undertake prior to January 2006:

- Developing a list of common criteria (perhaps derived from some reasonable amalgamation of current state requirements for their VR systems).
- Providing advice to support conversions of county data to the statewide system to establish a baseline population in the database.
- Describing plausible quick-fix "disposable" approaches that bring states into compliance that do not constrain the eventual architecture of better systems.
  - For example, it might be useful to develop criteria and procedures that would enable counties to feed their individual lists into a state system by whatever means feasible, e.g. upload through the Internet, CDs, etc, and then coalesced into a single database system that assigns the necessary unique ID.
- Planning for election day use of the systems.
  - A real problem is capacity planning for the peak query load that will occur on election day. This could be done through a contract with a service provider to provide server farm capability.
- Developing a set of best practices that will allow states to fail or succeed en masse. (The "en masse" notion is based on the idea that if a large number of states are in the same situation regarding compliance, they may have greater leverage in negotiating with the Justice Department subsequent to January 2006. The availability of a set of "best practices" to which these states adhere could be an important part of demonstrating a good faith attempt to comply with the HAVA requirements.)

One administratively oriented objective was mentioned for consideration prior to January 2006: the formation of a state consortium that would begin to enable states to pool knowledge and exert greater leverage over contractors. Code sharing is already in place through govc.c, but higher-level knowledge sharing is very much needed. (Higher-level knowledge includes contract terms, RFPs, architectures, problem reporting, data
The United States Election Assistance Commission engages in research and technical assistance activities to support State-level implementation of the provisions of the Help America Vote Act (HAVA). One such provision is the requirement for all States to provide statewide voter registration bases at all voting locations not later than January 1, 2006. These databases, described in Section 303 of HAVA, are required to host information in a single environment accessible to authorized users but protected from inappropriate use, interface with other State-level systems, assign unique identifiers to legally registered voters, and, generally, serve as the single point of information for all Federal voter registration information in a specific State.

In order to support States' efforts on this important topic, the EAC convened a workshop for chief information technology officers responsible for the development and operations of these databases. This workshop, held in June 2005 at the National Academy of Sciences in Washington, DC, afforded State technology officials an opportunity to share experiences, ideas, challenges and constraints with their peers from around the country. This peer dialogue was supplemented by participation from a cadre of NAS technology experts. These experts brought unique perspectives and valuable technology knowledge to bear on the challenges articulated by the participants. Before the meeting, participants were provided the following topics for consideration:

- Software Development
- Databases
- Networking & Communication
- Security & Privacy
- Training & Human Resources

Over the course of the two days, participants were asked to contribute their perspectives on the key elements and challenges of meeting the requirements for statewide voter registration databases articulated in HAVA. This meeting summary provides an overview of the key observations and challenges articulated by the participants as well as a summary of suggested action items in each of these themes.

**Software Development**

While software development itself (e.g. architecture, testing) did not resonate as a primary challenge for the IT participants, they did articulate challenges around contract management and vendor selection and performance. Specifically, States were concerned about the RFP development process and a sense that vendors were "re-selling" the same product because States were not communicating about what was already available. Additionally, by not sharing information (e.g. request for proposals), States were repeating the same mistakes, rendering them insufficiently prepared to hold vendors accountable and secure the best services.
Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- Developing a community of practice with the following features:
  - Online learning community to share, information, documents, code bases, and other resources
  - A place (online) to share success stories and "get the word out" about new requirements.
- Fostering "user groups" where States using the same vendor could gather to share information either in person or electronically

Databases

It was generally agreed that "databases" as a topic focused on the interoperability capacity of the systems as compared to the requirements of HAVA. Participants noted that the language in HAVA requiring database to interact with other databases is not completely clear. Participants struggled with feeling under prepared to assess their own compliance, asking the question "how good is good enough?"

In addition to the question of with which databases the voter registration list is required to interact, participants were also concerned about the effect of time on their databases’ performance and ability to auto-interact. That is, if solutions are developed to challenges identified over time, participants worry that the revised databases might become too cumbersome to work effectively.

Beyond these technical challenges, participants articulated challenges they described as "political." These challenges included securing county buy-in, fostering collaboration among diverse stakeholders, and balancing Federal and State legal requirements in their work. Participants encouraged their peers to include all stakeholders early in the process, to create buy-in by being inclusive in RFP development and vendor selection, and to always focus on the fact that "at the end of the day, you want the system to work."

Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- A compliance checklist focused on the technical requirements of the VR databases
- Testing guidance from the Election Assistance Commission
- A joint Federal-State testing plan
- Standards for best practices in design and interoperability
- A reference architecture that would be HAVA compliant
Security & Privacy

Two primary themes emerged as part of the security and privacy conversation: internal and external concerns. Internal concerns deal with ensuring those that have access only have appropriate access to appropriate information, as mandated by HAVA and in accordance with State law. To this end, participants discussed the need for role-based access. This type of access assigns certain permissions to certain users (based on their role and level of need) and thus ensures that only those that “need to know” have access to sensitive information.

External access recognizes that counties have different perceptions of privacy constraints and that they use information differently. For instance, many counties sell their voter registration lists to candidates in various elections. Clearly, there must only be non-private information on that list. This is a requirement for privacy; the database must contain but not provide that information on the sellable list.

Additionally, participants were concerned about the perception of privacy in their home States. Real social problems such as stalking and violence against public officials (e.g. judges) have created fear over inappropriate access to address or even voting district information. This fear has resulted in the cancellation of certain public Web-based applications through which voters can determine where their appropriate polling location.

Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- Guidance around legitimate privacy concerns, including blind ballot voters
- Shared best practices on role-based and privacy (e.g. flags vs. filters) strategies

Networking & Communication

Participants considered security to be a component of networking and, as such, articulated challenges they face or are concerned about with respect to threats, role identification, and tradeoffs between privacy and security. Specifically, participants thought threat detection and planning for attacks on their databases was critically important. These threats may be from those actually attempting to steal information or those simply testing their “hacking skills.” Specifically, participants discussed the need for planning, detection, and recovery from an attack on their system. Additionally, participants are aware that threats are constantly evolving, a situation that requires constant vigilance on their parts.

With respect to appropriate roles, participants discussed the value of moving from a password-based protection system to a potential token system. Under either system, it was agreed, security is still a consideration to be given top priority. States need to make individual decisions based on the type of user being given access.

1 Participants wanted to discuss security with networking.
Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- Additional literature on the value of tokens vs. passwords
- Coordination with postal service to reach additional addresses, as appropriate
- Guidance around requirement interactive partners

Training & Human Resources

The primary challenges associated with human resources and training related to staff shortages and accountability. Specifically, the participants were concerned about the “accountability gap” between those that will actually do most of the work and those that will be held accountable for its quality. Many participants felt that the nature of their work and the requirements they face are not always well understood, leaving them understaffed and overtaxed.

Training issues included challenges around States delivery vendor-developed training, facility constraints, and staff turnover. Also challenging to the participants is knowledge transfer from the vendor over to State personnel and the need to educate management about ongoing support needs. Participants encouraged their peers to ensure they participate in the design plans and not simply hand over control to their vendors.

Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- Tools for communicating staffing requirements
- Strategies for educating first internal collaborators and then external stakeholders
- A chart comparing the staffing levels of other States
- Comprehensive help files for all programs and products
- Regional trainings, peer methodology or train-the-trainer

This Workshop for Voter Registration Database Technology Officers provided colleagues from around the country to join together with EAC and NAS technology experts for a facilitated discussion around issues, challenges, strategies, and necessary support. Thanks to the active participation of the attendees, the meeting was successful on many fronts. Among the outcomes of the meeting are:

- Fostered peer relationships for ongoing communication
- Provided EAC a clearer sense of the challenges and needs of the field
- Generated a list of possible next steps for both EAC and the IT personnel back home
- Exposed participants to NAS expertise

As EAC moves forward in supporting States in meeting the requirements of HAVA, both those effective in January and beyond, this meeting will inform that process.

For more information, please contact Karen Lynn-Dyson, Research Manager, US Election Assistance Commission at klynnedyson@eac.gov.
File Folder for Martinez
entitled Trans May 17, 2005
Design for Democracy
Good morning Adam:
In Boston I snared Commissioner Martinez for a few minutes and asked if he would be willing to meet with board members from an organization called Design for Democracy, an affiliate organization of the American Institute for Graphic Arts. They have done some wonderful work in Chicago, Oregon and other places redesigning election materials and processes (they redesigned the whole polling place in Chicago) in order to make election day work more smoothly for all.

I asked Commissioner Martinez if he was willing to listen to a briefing from the group to see what they’ve done and discuss a potential projects with the EAC. One project I discussed with him would be getting Design for Democracy involved in reviewing the design of the national mail-in voter registration form.

This is a long way of getting to my point. But I’ve been working with the Design for Democracy folks on a possible day that some of them could travel to Washington to meet with Commissioner Martinez. They are available on May 17. Would it be possible for him to meet with them on May 17th? And might Chair Hillman and Commissioner DeGregorio be available as well? Commissioner Martinez mentioned that they might also want to participate in the briefing.

This is a wonderful group. (For disclosure purposes I need to mention here that I am now on their board of directors.) Instead of attacking elections officials they reached out to help. They have convinced me and other elections officials across the country that improving elections doesn’t always have to be about buying expensive new equipment. Sometimes, redesigning the process you already have to make it more voter friendly will get the job done.

Anyway, let me know if a May 17 meeting would work. These folks would be flying in from New York and Chicago.

John Lindback, Director
Elections Division
Oregon Secretary of State's Office
Election Design

The examples provided in "Election Design: Models for Improvement" were developed from a carefully conceived system of colors, symbols, images, typefaces, principles of organization, and methods of execution. Some of the recommended formats can be easily implemented by election administrators working in partnership with print or electronic media suppliers. Others will require professionals familiar with information design and the workings of a graphic design system. We are created a pdf of the design system section that is downloadable from this page.

Download "Election Design: Models for Improvement" (pdf).

Professional graphic designers have the specific skills and knowledge needed to extend the basic system into more complex or customized applications. For guidance beyond simple adaptations of the templates, AIGA Design for Democracy can put you together with a designer.

Election Design

The Voting Experience

Each stage of the election process involves distinct procedures and communication requirements for voters and for election officials. Our design system applies established design principles to all stages of the voting experience.

Examples include voter registration cards that meet HAVA requirements and that adhere to the Design for Democracy standard of making the complex clear.

Information about the election process, candidates, and issues in a given election need to be readily available and easy to understand. Our system includes brochures, information cards, and instruction sheets.

Well designed signs that provide instruction and information in the polling place will instill confidence in a voter's ability know what to do and how to do it.
Additional administrative challenges are to account for provisional votes. Our document management system has been extended to accommodate forms and envelopes necessary for HAV, provisional voting.

Those who serve in the polling place have direct influence on the voter's experience. They also impact the efficiency of election administration. Our book, Election Design: Models for Improvement, provides detailed guidelines for page layout and content management of a pollworker training and reference manual including templates for electronic training support.

The forms, envelopes, and instructions used for election record keeping and vote recording can be very confusing for pollworkers. Design for Democracy has developed a document management system that includes large reference numbers, consistent placement of information, clear instructions, and a color coding system that provides instant, useful information. Listing of sub-sections: Pollworker training and support. Document management system. Provisional voting.
**Provisional Voter Affidavit**

State of Illinois
County of Cook

State of election

1. This affidavit must be filled out and signed by the voter.
   - Name
   - Street address
   - Village/zip code
   - Telephone number
   - Sex
   - Date of birth
   - Present age
   - Ward (Enter even or odd)
   - Precinct

2. To help us verify your registration status, please list your driver's license # if you have one and the last four digits of your Social Security #. If you have a state id, you may list that number as well.

   Other's license #
   Sex
   Date of Birth

I affirm that I am a citizen of the United States at least 18 years old and a duly registered voter in every respect and eligible to vote in this election. I have resided in this state and in this precinct for 30 days before the election and have not voted in this election.

Government in a participatory democracy has a responsibility to remove the barriers to participation in civic life. This includes making the tools of participation (ballots, surveys, forms, web sites and informational publications) easy for every citizen to use.

When citizens get confused while filling out tax forms, the problem is not the intelligence of the citizen, it's the design of the form. When a family fails to return a government questionnaire because it looks too complicated and intrusive, the problem is not the family, but the look and feel of the survey. When an election ballots is tossed out because the voter was confused, the problem is not with the voter, but the design of the machine and the layout of the ballot.

"Every citizen" should mean just that — everyone who is a citizen, regardless of age, physical challenge or education, should have an equal opportunity to participate in democracy and communicate easily with his or her government.

Information design

Information design is the art and science of making raw information and instructions easy to read, understand and use. It is practiced by graphic designers, usability experts, and language simplification specialists. In the private sector, the information and service economies employ information design to insure that information products (web sites, manuals and customer services) are effective and easy to use. In the competitive new economy, information design makes the difference between product acceptance and failure.

Information design, undertaken by professionals with experience, helps to address the different needs of different audiences, whether they be elderly, young, disabled or challenged by English as a second language.

Information design is just as important in the public sector, yet the practice and application of advanced design to government communications lags significantly behind. At the same time, the general public (with exposure to sophisticated communications products) has increased expectations for the government to perform at the same level as the private sector.

Design in a participatory democracy

Government can benefit from private sector advances in information design. Clear performance expectations are urgently needed to guide the design of the tools of participation. Information gathering tools, such as ballots, surveys, and forms need to be designed to be consistent, clear and easy to use. Information dissemination tools, such as public service instructions and government web sites must encourage use through clarity and usability. They may be designed at the district, local, state or national level by local designers selected by different agencies; yet, they should be designed with a clear appreciation for the performance standards that need to be met by the designed forms, screens or reports.

Participatory democracy relies on the free and equal exchange of information and ideas. Government communications that are difficult to use give preference to those with time,
resources, and education. To be truly democratic, government communications should be accessible to all. The government has an opportunity to improve compliance through ease-of-use and to improve goodwill by demonstrating that taxpayers' money is being well spent.

The process

The public information product development process

Though the design of information products, such as a universal voting machine and ballot, might seem simple at first, this is misleading. There are a number of critical information product design processes that are critical to the success of such undertakings. No major design initiatives would be complete without the following steps.

Research and planning

Investigate and learn from similar projects undertaken in the private sector, in local governments, or other countries. In many cases, information problems have already been solved and tested. A design strategist and researcher can help create design plans that harvest the best ideas around the world and avoid duplication.

Language simplification

Work with writing professionals to shorten text and to craft language that the majority of Americans would understand.

Identity development

Make sure that all communications look and feel like they come from the government and that they have the appropriate look of authority and security. Use professional graphic designers to develop brands or signatures for any communication program.

Graphic design

Work with graphic designers to develop appropriate and contemporary styles and formats for all communications. This includes layout, use of color, typefaces, illustration and formatting.

Industrial design

Work with industrial designers to develop the form, function and feel of any hardware associated with the information product. This includes materials development, product design, ADA issues and finishes.

Experience design and usability testing

Study and explore how the general public interacts with the tools of participation. Usability professionals employ experience, focus groups and careful user testing to avoid mistakes and to be absolutely sure that any new products will be accepted and easy-to-use by the broadest public.

Assessment
Any new information product is not complete until it is evaluated under real conditions for at least one year. The evaluation would explore rates of compliance, security issues, and unexpected problems or benefits.

Where to find help

AIGA, the American Institute of Graphic Arts, is the largest and oldest professional association of designers in the country. It is a nonprofit, nonpartisan association that represents information designers and designers working in print, motion, new media and interactive media. AIGA, through its experience in working with public and private clients, can assist in creating an RFP, a scope of work or design brief, or in helping agencies locate designers with the requisite experience and skills. AIGA has also assembled a special expert team to develop and evaluate options.
Buster:

While in Austin last week, I was invited to meet with David Hart, who is president/CEO of Hart Intercivic (DRE manufacturer). I had a good meeting with David and his senior staff, and toured the company's headquarters there in Austin.

I received a follow-up email from David last night, and he was asking if any of us were planning to be in San Antonio for IACREOT because the Election Technology Council (of which David is chairman) will be meeting at IACREOT as well. The specific request from David is for any, or all, of the four EAC commissioners to meet and address the vendors all in one sitting. I personally think this is a good opportunity to meet with the vendors and, among other things, urge them to comply with your security proposal, which by that time, will presumably be a formal Statement of Policy adopted by the EAC.

Before I run this request by the other commissioners, I thought I would present it to you first. If we can find the time to do so, I think this is a good idea. Your thoughts?

Thanks.

Hi Adam,

Conny and Deborah Wright asked me if I would like to attend your meeting on August 1st. The answer is "yes". It will be my pleasure to attend the meeting. Can you let me know the logistics, such as where the meeting will be held, do I need to bring information to share, how do I book the flight (through our department or your agency's account)? Please advise. Thank you.

Adam,

It just occurred to me that you probably need the OK ed. bd. logistics now since he’s going there from TX. I will write a memo for him and fax it to him in TX.

Again, his meeting with the Oklahoman ed. bd. is on Thursday, July 21, at 2 p.m. See details below and let me know if you need anything else.

Jeannie Layson

Jeannie Layson,

Editorial board members: Ed Kelley, editor of The Oklahoman; J.E. McReynolds, chief editorial writer; Owen Canfield, editorial writer.

We’re also going to invite a news reporter to sit in but I don’t know which one. I can give you that name when I get it.

The Oklahoman is at 9000 N Broadway Extension, at the southeast corner of Broadway Ext. and Britton Rd. In our lobby Commissioner Martinez will check in with the guard (who will be expecting him) and they’ll
call me to bring him up to our floor.

Phyllis

Ms. Bennett,
If you could provide the names of those attending, the address of the Oklahoman and instructions for Ray when he enters the building (ask for you in the lobby, etc.), that would be very helpful.

Summary of Meeting with Advocates for the Disabled Community

The meeting started with Commissioner Martinez explaining the various funding constraints the EAC has dealt with which caused the TGDC and NIST to rush their VVSG recommendations. The Advocates for the Disabled then mentioned section 2.2.5 of the VVSG as providing a ‘loophole’ for modified optical scan machines such as the ES&S AutoMark, by using the word “should” instead of “shall”. Commissioner Martinez acknowledged this problem and urged the VVSG to be viewed as an ever-changing document. The Advocates replied by saying that once States buy machines based on EAC / VVSG recommendations, they will be in place for a long time. With a January 2006 deadline, there must be a sense of urgency to close these ‘loopholes’. The idea of machines being able to be fit retroactively with devices which would ensure independence and privacy to persons with disabilities was then introduced by Mr. Dickson. He stated that only a limited number of vendors are addressing this issue.

The next major issue addressed in the meeting was VVPAT. The Advocates pointed out that current VVPAT does not insure security. They also stated that VVPAT hinders machines from being fully accessible especially if they use the VVPAT as the official ballot, as some states have deemed they should for recounts (Commissioner Martinez added the point that no state has made VVPAT the official ballot).

Another issue that was brought up was section 2.2.7. A “shall” is used for visually impaired, but a “should” is used for mobility impaired. They viewed this as potentially divisive within their community. Members of the EAC, including Commissioner Martinez, Mr. Wilkey, and Carol Paquette, responded by saying that the
lack of an independent source is a problem, and that there are other technologies out there that are a better substitute to VVPAT.

Commissioner Martinez concluded the meeting by encouraging them to submit their comments to the EAC, and that those comments should be submitted in writing. He followed by saying that he hopes this will be an ongoing dialogue between the EAC and the disabled community.

In short, the Advocates are mainly concerned with maintaining a unified community – one that advocates for all who are disabled, regardless of their disability. They are concerned that these new voting machines, specifically the VVPAT, will grant access, independence, and privacy to only those who are visually or hearing impaired and that those with mobility or dexterity disabilities will not be guaranteed the same right to access, independence and privacy.

The meeting ended on good terms and it seemed that Commissioner Martinez’s comments about the VVSG being a changing document and him encouraging this conversation to be ongoing between the EAC and the disabled community put the Advocates a little at ease. They feared that following the 90 day comment period, some changes would be made to the VVSG, and then the document would be put on a shelf to “collect dust”. Commissioner Martinez, Mr. Wilkey, Carol Paquette, and Gavin Gilmour encouraged them to believe otherwise.
Adam:

Can you do a little background research on Mr. Becker’s company so that I can be informed before I decide to meet with him? He was referred by Conny McCormack, so I will meet with him, but I just want to know what his company specializes in.

Thanks.

Conny:

Thanks for the email...sorry it's taken me some time to respond. I've been on a short trip with my family to Sesame Street Place as we made our way from Arlington, VA to New York City for our public hearing. I've seen enough Big Bird and Elmo to last me quite a while!

Our public hearing went well today. We received very good testimony from all of our panelists. Needless to say, we have much work to do over the next 90 days, but I look forward to receiving much input.

Thanks for the email introduction to David -- I would welcome a phone call so that we can make arrangements to speak or get together at some time. My direct line is 202-566-3104 (I won't be back in the office until next Tuesday, July 5th).

Stay in touch and as always, please feel free to call me anytime.

Dear Adam,

Here by I respectfully request Commissioner Martinez for a fifteen minutes meeting, before the EAC release the VVSG.

Please let me know when that can be possible.

Fernando Morales
The best time for the Chair is after the June 16 NASS conference call.
Adam,

I just wanted to confirm the meeting we have planned for Tuesday at 2 pm at your offices at 1225 New York Ave NW. There will be three of us and we will be meeting with you, Commissioner Martinez and possibly other commissioners and staff.

Let me know if there have been any changes in plans.

Adam,

I wanted to touch base to finalize the arrangements for our meeting on Monday, May 16 regarding the database guidance. Specifically, we need to clarify the time and location of the meeting. (I believe that you said that you preferred 12:30 pm.) I would also like to confirm that I am responsible for the meeting agenda. Finally, I have consulted with other advocates and have a near-final list of those who would like to attend. Please let me know if you would like a copy of that list in advance. Thanks, and I look forward to meeting you in person.

Best,

Wendy

wendy.weiser@nyu.edu
Adam:

I just wanted to confirm for you the names of the three Design for Democracy board members who will attend next Tuesday's meeting at your headquarters. They are:

1. Ric Grefe, chair of the Design for Democracy Board, and executive director of the American Institute for Graphic Arts. The AIGA was the organization that started Design for Democracy.

2. Marcia Lausen, director of the School of Design at the University of Illinois at Chicago, and owner of studiolab, a design firm with offices in Chicago and San Francisco. As an instructor in the School of Design she directed the very impressive projects that redesigned processes and materials for Cook County polling place elections and Oregon's vote-by-mail elections.

3. Whitney Quesenbery, who represents the Usability Professionals' Association on the board. She brings an expertise in usability to the organization and you may already know her because she is a member of the TGDC.

I wish I could be there because I believe so strongly in the fine work these folks have done in the past few years. I believe there is a great potential for this group to work with the EAC on very positive projects. But I think if I had to travel all the way to the east coast again this soon my bosses, and my wife, would disown me!

Cheers-
jlindback

John Lindback, Director
Elections Division
Oregon Secretary of State's Office
Commissioners,

The NASS Executive Board would like to continue to have open communication with you and have suggested a conference call meeting for next month. Specifically, they are looking at the afternoon of June 14 or 16.

Adam, please let me know what the Commissioners' schedules look like for either one of those days. The call should not last more than an hour.

Thank you,
Sheila
Dear Adam,

I am writing to follow up on our conversation of yesterday. I would like to know when Commissioner Martinez (and/or the other Commissioners) might be available for a smaller and/or a larger meeting to discuss statewide voter registration databases and the EAC's Guidance. I would be happy to facilitate the participation of other groups as well. Thank you, and I look forward to hearing from you.

Best,

Folks -

It looks like the most viable date for June is the 13th-14th. So let's move ahead with preparation for that date.

Herb, I think we need to talk about the objectives and agenda. Don't think we need to meet in person; a phone call will do. I have a meeting this morning at 10. Could we shoot for maybe 11 or sometime between 2 and 3 this afternoon? Thanks!

Carol A. Paquette  
Interim Executive Director  
U.S. Election Assistance Commission  
(202)566-3125  cpaquette@eac.gov
Commissioner et al. -

A decision has been made to re-schedule the second VRDB/NAS meeting from May 16-17 to one of the following dates: June 2-3, June 9-10, June 13-14, June 29-30.

NAS needs a decision from EAC in the next day or two so they can reserve the meeting space.

EAC needs to firm up the objectives and agenda for this meeting, as well as to identify potential attendees.

Adam - Can you identify a 15 minute window for the Commissioner, Julie, you and me to discuss this in the next two days? Thanks!

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov
I have confirmed this meeting with Secretary McPherson.

Subject: Meeting With California Secretary of State Bruce McPherson

Commissioners,

Secretary Bruce McPherson has requested to meet with you at the May 5 Commissioners Discussion at 10:00 a.m. He wants to deliver the California Certificate of Compliance in person. In addition, he wants to discuss how California can be a positive participant with the EAC as the state continues its implementation of HAVA. Others attending this meeting include Assistant Secretary of State Brad Clark and Los Angeles County Registrar-Recorder Conny McCormack.

Brad will provide more details.

Thanks,
Sheila
Commissioners,

Secretary Bruce McPherson has requested to meet with you at the May 5 Commissioners Discussion at 10:00 a.m. He wants to deliver the California Certificate of Compliance in person. In addition, he wants to discuss how California can be a positive participant with the EAC as the state continues its implementation of HAVA. Sheila
Commissioners,

I'm trying to coordinate a meeting for you with Dr. Pastor. His availability has changed for next week and his assistant and I are trying complete this task while Commissioner Soaries is in town.

Dr. Pastor is scheduled to testify on the Hill on Wednesday, April 6, at 2:00 p.m. Would you be open to having a lunch meeting with him at a place nearby around 12:00 (noon)? His assistant is also checking with him.

Thanks,
Sheila
Commissioners -

Susan Zevin contacted me several weeks ago to set up a meeting between the Commissioners and Paul Kurtz, the Executive Director of the Cyber Security Industry Alliance (CSIA). CSIA is an industry advocacy group that has been formed to promote improvement of cyber security through public policy, education and technology-focused initiatives. Their membership is comprised of major cyber security software providers such as Symantec, Entrust, McAfee, Check Point (they've been getting some unfavorable press lately), and others. They are "interested in assisting the Commission in the evolution of new approaches to voting systems." Susan was rather vague about what this means. I suggested that it might be useful for this group to review and comment on the TGDC/NIST work on the NIST website. Susan indicated they are interested in "higher level, big picture policy matters." Whatever these matters are, she indicated that they can only be discussed directly with the Commissioners, not with some intermediary.

Checked out this group with some colleagues in the security business. The feedback I received was that they're relatively new on the scene, only one of several similar industry advocacy groups, and that they're looking for an issue to make their mark on. (There might have been some professional rivalry seeping through in these comments.) Mr. Kurtz has pretty impressive credentials, having been National Security Council senior director of the Office of Cyberspace Security and a member of the President's Critical Infrastructure Protection Board (prior to 2003).

Is there interest in a meeting by all or some of you?

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov
Adam,

Like Dan, I would be delighted to meet with Commissioner Martinez and am pleased that he has found our website helpful.

Would it be possible to meet on Monday at 5:30, perhaps at the Hotel George on Capitol Hill? I will be heading to the airport at 6:15pm to catch a flight back to Columbus, but that would give us a little time for the kind of informal meeting you describe, at which we can start a conversation that can be pursued subsequently. I believe Dan might be able to join us at this time as well.

Thanks very much,

Ned Foley

At 05:01 PM 11/10/2004, Daniel P. Tokaji wrote:

Adam:

Thanks for writing. I'm very pleased to hear that Commissioner Martinez has found our website useful. I will in indeed be in DC early next week. While it looks like the conference will take up most of the day and I've made plans for the evening, I'm not going to be returning to Columbus until Tuesday afternoon -- I'd originally planned on attending another event in DC that day, but it's been cancelled. Would Commissioner Martinez have any time to meet on Tuesday morning or early afternoon? (I'm just speaking for myself and am not sure what Ned's schedule looks like.)

Dan

At 01:50 PM 11/9/2004, aambrogi@eac.gov wrote:

Dear Professors Foley and Tokaji:

My name is Adam Ambrogi, and I am special assistant to Commissioner Ray Martinez of the U.S. Election Assistance Commission. Commissioner Martinez is a frequent visitor to your law school's website containing legal news and analysis on election law issues. As one of four commissioners on the EAC, Commissioner Martinez is especially interested in issues related to provisional voting and the Help America Vote Act of 2002. In short, Commissioner Martinez found the information on your website to be extremely useful and the analysis insightful.
Commissioner Martinez asked me to send this email today because it is our understanding that you will participate in a forum here in D.C. next Monday sponsored by GWU's Law Review. Although Commissioner Martinez plans to attend some portions of the forum (depending on his schedule), he was wondering if either or both of you had any room on your schedule while in Washington to have coffee at the EAC offices. The purpose of the visit would be very informal -- simply a "get to know you" visit to establish a dialogue and get initial input from you on HAVA and election reform generally. If you are available and interested in doing so, please contact me ASAP at 202-566-3105 (or respond via email) to schedule a time.

Regards,

Adam Ambrogi

Adam:

Thanks for writing. I'm very pleased to hear that Commissioner Martinez has found our website useful. I will indeed be in DC early next week. While it looks like the conference will take up most of the day and I've made plans for the evening, I'm not going to be returning to Columbus until Tuesday afternoon -- I'd originally planned on attending another event in DC that day, but it's been cancelled. Would Commissioner Martinez have any time to meet on Tuesday morning or early afternoon? (I'm just speaking for myself and am not sure what Ned's schedule looks like.)

Dan

Daniel P. Tokaji
Assistant Professor of Law
This is to confirm our meeting tomorrow morning, November 9, at 9:30 AM in our offices with Tom Kattus from the Rural Ethnic Institute.

Tom has a short video to show us, that his students made on the election.

I think we will be scrambling tomorrow morning to get things ready for the meeting, so I don't think 9:00AM is a good time. This organization is a credible and important group, and one that I hope we can get involved in this program. Rather than meeting tomorrow before the meeting, why don't I call her today and explain where we are with the program, and to further explain that all we are doing tomorrow is adopting a framework within which whoever directs this program will be able to operate. We are not disbursing grant money to any entity tomorrow and in fact, we are very interested in proposals for funding right now. If she comes to the meeting, perhaps we can meet with her afterwards.

Is this approach acceptable to everyone?

Rec'd a phone call from Becky O'Brien who is with Just Democracy. Just Democracy represents a group of law students and Becky would like to meet with you all to discuss what type of support her group can provide on election day. She would like to meet tomorrow morning before the public meeting. Do you want to meet with Becky, if so will you be available tomorrow morning at 9:00AM
Will the Commissioners be able to meet on the 19th at Noon?
Adam, we are still on for the 23rd.

The meeting with Chairman McAuliffe will be 30 minutes and we just want Commissioner Martinez to talk about the work of the commission and coming events.

Thanks.

Commissioner:

The Chairman would like for you to attend a meeting with him and myself on Friday (to discuss the Poll Worker Initiative specifically getting honors students involvement) with Alex Perwich II, CEO of the Golden Key International Honor Society on Friday at 2:30 here in the EAC conference room.

If you have any questions, please call me at 566-3116.
Larry:
Hope all is well. Cmsr. Martinez, our research associate Laiza Otero, and myself are organizing a Working Group meeting for Hispanic groups focused on the particular problems faced by Spanish-speaking voters. I left a voicemail for you about that, but I wanted to let you know that the event has changed to August 1, 2005, from 1-4 PM in our offices in DC. Please let me know your availability- as we certainly want NALEx's presence at this meeting.
Thanks,
Adam
I received a call from Sarah Ball Johnson, from Kentucky. Their Secretary of State, Trey Grayson will be in DC next week on the 15th and 16th-- and is available to meet with Commissioners on the 15th from 10-11:30, and on the 16th from 330-6 PM. He would just like a 'meet and greet' and a tour of our offices.

Please let me know if any or all of these times are better for the Commissioners to meet with Sec. Grayson, and I will make the appointment with his office.

Thanks,
Adam

Commissioners:

As a follow-up to my email of last week, I have been in touch with Tracy Warren, who had asked to speak with both of you regarding the efforts that she and Jennifer Collins-Foley are proposing through the "Pollworker Institute." In addition to the prospectus for the P.I. provided you both, they have also indicated their interest in discussing the future of the College Pollworker Program, in light of their schedule for this year's Pollworker Institute initiatives. Tracy (and Jennifer, if she's back from Albania) are available to meet on Monday, June 6th at 2 PM. Please let me know whether that time is available for you, and whether you desire any additional staff present at this meeting. I will work out the remaining details.

Thanks,

Adam

Dear Wendy:
Upon further reflection and a brief conversation with Commissioner Martinez, I think that a group of 10-12 individuals should be about the largest that this meeting should get. (Aside from EAC staff, of course.) Let me know how you believe the plans are shaping up.
Best,
Adam

Ann called and apologized for not calling you back two weeks ago... She then confirmed the times that we would be in town on Monday. She checked the SOS's schedule, and there some time for you to meet with him at Monday at 3:30 PM. I told her that it sounded good, but told her I'd call to finalize. Let me know if you see any problems with that time frame.

Lloyd Leonard and his staffer Jeanette Senecal will meet with us (or you, depending on your preference) at 2 PM on Monday, at the EAC. I've reserved the small conference room for us. He says he intends to set up meetings with each of the four commissioners separately, (but, he added in a unique tone) he's coming to you first.

Dear Becca:

My name is Adam Ambrogi and I'm Commissioner Martinez's Special Assistant (and an '02 Texas Law graduate). I'll be attending and will help coordinate that meeting on Friday. Is 12:15 at Bertucci's in the "Shops at 2000 Penn" (by Kinkead's in Foggy Bottom) ok to discuss the HAV College Program and any potential partnerships between JD and the EAC?

Please let me know. Please also provide a phone number should any changes be necessary. My contact number is below, and I know the Commissioner and I look forward to meeting you on Friday.

Very truly yours,

Adam Ambrogi

I spoke with Jim Dickson today. He indicated his concern with the Automark system not being in true compliance with 301 (a). Jim said that John Groh was coming to DC with one of his experts to talk to him on Tuesday, the same day Ray and I are having our meeting. I did not tell him about the meeting we have set up with ES&S.

Commissioners:

I just spoke with Melinda Glazer at NASED. They would like to invite you to address their membership at their annual winter meeting in DC (a formal letter of invitation has been mailed to each of you). Please check on your availability for Friday, February 4, 2005. The timeslot they have available runs from 1:30-3:45 PM. They wanted to give you the opportunity to speak on a weekday, but Saturday (Feb. 5) would also work if Friday will not.

The following is a list of topics that NASED would like for you to address, in addition to any additional EAC-related topics:

* ITA issues--when EAC will take over, how, etc.

* Provisional ballots--what our study will entail, timeframe for conducting the study, etc.

* Full funding for HAVA requirements payments--a suggested strategy for working with the state offices to get full funding

* Guidance to address changes to state plans--what constitutes a "material change" and other legal issues

The staff will work with you to prepare an agenda, etc. For now, please let me know ASAP if the Feb. 4 date and timeframe works for you.

In addition, I just received a fax invite to the NASS winter conference. I will distribute a copy to each of you. It will contain more details, but please mark your calendars for our EAC presentation on Monday, Feb. 7, from 9:00 AM-12:00 PM. You are also invited to stay for a lunch that follows immediately afterwards.

Best,
Kay
3 PM tomorrow. EAC office.
She sounded interested. She also said "I just got back from vacation and received a phone message from Vice-Chair Hillman... I wonder if it is regarding the same issue?" I told her that I did not know.
Sure. Tomorrow afternoon either at 1 or 1:30PM will work, but I have to be at DOJ for a meeting by 2:45PM. Let me know if something in that timeframe works for you guys. Can we do the meeting here in my office (address below)?

Thanks.

Jennifer:

I'm sure we can work something out... things are pretty fluid for next week, but hopefully Tuesday would work. I'm not sure about the other commissioners, but I can sit down with Jim sometime that Tuesday, though it would probably work best to do something here at the office, since I'm swamped right now trying to get ready for the hearing, the roll-out of our requirements payments to states (beginning May 10th) and our budget hearing in front of our appropriating sub-committee (which happens on May 12). Needless to say, the first two weeks of May will be a very trying time for the new EAC!

Anyway, I'll definitely make time for your client, and I'll mention it to the other commissioners when I see them later today. Also, I tried calling you back several times yesterday, but could not get through on the number that was given to me (422-6422). Perhaps we got the number down incorrectly... sorry about that.

I'll let you know when on Tuesday works best for me.... I'll be back in touch later this afternoon.

Thanks.

Ray Martinez III
Commissioner

Ray-
I saw that someone called my phone but did not leave a message for me, so I used the call log to call back (because it was a San Antonio number). It was Mr. Cisneros' organization, and I spoke with Sylvia there, who wanted to see if she could move your meeting back from 330 to either 130 or 230 tomorrow. (Mr. Cisneros wants to try to see his son fly- he's taking flying lessons tomorrow afternoon). Please let me know, or call back Sylvia at 210-228-9670. I introduced myself to her, and mentioned that it was good to have Jacob up here, and that he spoke kindly of them-- FYI.

November 16, 2004

Professor Edward Foley  
Mortiz College of Law  
Ohio State University  
Columbus, OH,

Dear Professor Foley:

It was good to meet you yesterday at the Law and Democracy Symposium sponsored by the George Washington University School of Law. I commend you for your efforts to provide information and analysis on election law issues, and enjoyed our discussion regarding the state of election law. I will certainly keep your advice in mind.

While the election of 2004 has passed, I firmly believe that the Election Assistance Commission has its most challenging work ahead. The development of voting system standards, as well as voluntary guidelines for the states on HAVA compliance present a particular opportunity to improve the way election administration is handled. In these months ahead, I would welcome your thoughts on these issues, as we continue the reforms focused on the people, process and technology of election reform.

Please feel free to contact me at any time; my office number is 202-566-3105.

Regards,

Ray Martinez  
Commissioner
Good Morning to all!

I am attaching a Logistics Fact Sheet for your reference regarding the August 1, 2005, Hispanic Working Group meeting. - taxi services available (fare will be approximately $15-$20)

Parking:
Parking garage available behind building on I Street, NW.

Contact:
For travel arrangements or information, contact Laiza N. Otero at (202) 566-3126 or via e-mail at lotero@eac.gov.
I would like to take this opportunity to thank you for agreeing to participate in the Hispanic Working Group meeting on August 1, 2005 being organized by the U.S. Election Assistance Commission (EAC). The overall purpose of this meeting is to strengthen the EAC's understanding of the needs of the Hispanic community with regard to implementation of the Help America Vote Act of 2002, as well as the EAC's role in administering the National Voter Registration Act of 1993. We hope to provide an open dialogue for all meeting participants to candidly assess and recommend to the EAC various steps needed to ensure registration and voting accessibility for Hispanic voters.

Attached to this email, you will find several documents that will be discussed at the meeting, including the NVRA mail-in voter registration form (in English and Spanish) and a recently-updated glossary of election terminology. Specifically, we would like to solicit your feedback on the usability and readability of these documents. (Please note that the Spanish translation of the NVRA form was done in 2003 and the EAC is in the process of revising this document to reflect the updated English version that will soon be available.) In addition to these documents, we have also attached a copy of the proposed agenda and a link to a recently-issued report on the National Voter Registration Act commissioned by the EAC. Both the Help America Vote Act and the National Voter Registration Act can be viewed and downloaded via the EAC website as www.eac.gov. We encourage you to take a look at our website, as we may also want to discuss during our meeting how the EAC can best utilize the Internet to reach and better serve the Hispanic community.

Once again, thanks in advance for your commitment to this important effort, and for your willingness to participate. I believe that this meeting is a critical step in ensuring that the EAC is responsive to all constituencies as we strive to continually improve the way we conduct elections for Federal office. I look forward to seeing you all on August 1st. If you have any questions or need additional information prior to the meeting, please feel free to call me or Laiza Otero here at the EAC. We can be reached at (202) 566-3100.

Best regards,

Ray Martinez III
Commissioner
Hispanic Working Group

Dear Commissioner Martinez:

The dates for the May "technology" meeting are confirmed for May 16-17, 2005. We will start at 9:00 with a continental breakfast and go until 8:00 PM on day one, with a "networking dinner." On day two we are planning to start at 9:00 AM and will end at 2:00 PM. Dr. Lin has identified 8-12 technology experts to work with the group. The agenda is still under development, but it is suggested that we focus on five major topic areas:

* Databases
* Security/Privacy Issues
* Networking and Communication Systems between state and localities
* Software Development/IT Contracting
* Training Issues

We have been working with Karen and Dr. Lin at NAS to think through the agenda for the May "technology" meeting, but feel that it is critical that EAC send out the "invites" to attendees by week's end. The major question is "whom to invite."

* Of course, we want the technology chiefs in the state election systems, but what states to invite is of issue. There has been some discussion that the "Working Group" be invited with their chief technology person.

* However, it might be worth considering inviting different states based on the status of their statewide voter registration database system, i.e. those that have statewide data bases, those that have already selected a vendor, and those with pending systems contracts.

Deciding on the best "invited" states to the table is of critical importance and must be resolved so that we can get notice out to the participants.

To resolve this issue, Karen, Herb and I were hoping to get a few moments on your calendar for a phone call on Friday morning.

I am also attaching a draft invite letter for your consideration and review. Thank you.

Memorandum

TO:
FROM: COMMISSIONER RAY MARTINEZ
SUBJECT: CREATION OF STATEWIDE VOTER REGISTRATION LIST
TECHNOLOGY WORKING GROUP
DATE: APRIL 22, 2005

The Help America Vote Act of 2002 ("HAVA") requires that each State implement a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained and administered at the State level. Moreover, the EAC is required by HAVA to adopt voluntary guidance to assist States in meeting this important requirement.

Accordingly, to assist the EAC in developing voluntary guidance, the EAC has established a Voter Registration List Implementation Working Group, which is comprised exclusively of state and local election officials drawn primarily from the current membership of the EAC's Board of Advisors and Standards Board, in addition to representation from the Department of Justice. Our first meeting took place on March 30-31, 2005 in Washington, D.C. Based on this initial meeting EAC staff produced draft voluntary guidance which, after an appropriate public comment and hearing process, will be considered for final adoption by the EAC.

EAC is now ready to launch the second step of this effort. The EAC, in conjunction with the National Academy of Sciences ("NAS"), is bringing together state election officials, their chief technology officers in charge of election databases, and national technology database experts in order to discuss key technology issues related to the implementation and on-going use of statewide voter registration lists. You are most welcome to attend this session, but it is critical that your chief technology officer attend. All travel and per diem expenses will be covered by EAC. This meeting is scheduled for May 16-17, 2005 in Washington, D.C. at the National Academy of Sciences. Please forward the names and contact information of your representative no later than Friday, May 6, 2005 to Karen Lynn-Dyson. Ms. Dyson can be reached via email at klynndyson@eac.gov and telephone at (202) 566-3100.

Thank you.

1 Help America Vote Act, Pub.L. 107-252. Title 11, § 303(a), 116 Stat. 1708 (codified at 42 U.S.C. § 15483 et seq.). An informal survey conducted by EAC staff last month found that States are in various stages of meeting this HAVA requirement.
3 EAC will implement a process for adoption of any final guidance which is in accordance with the public notice, comment and hearing provisions contained in HAVA, as well as a review period for the EAC's Board of Advisors and Standards Board.

previously provided
Attached is the draft letter that will be sent to the executive leadership of various nonprofit organizations inviting them to meet with us on Monday, January 24.

Please feel free to email back to me any comments and edits to the letter. My plan is to begin sending out the letters tomorrow (Tuesday).

Via this email, I am asking Julie to make certain I have extended the appropriate invitation for this closed door meeting.

It is also my plan to have a copy of the invitation list for you at tomorrow (Tuesday) morning’s Discussion Session.

Mtg with Nonprofits, Jan 11 Invite Lit.doc
Dear  

The U.S. Election Assistance (EAC) Commissioners request your presence at a meeting to be held on Monday, January 24, 2005. The meeting will begin at 1:30 p.m., is expected to last about 90 minutes, and will be held at our offices at 1225 New York Avenue, NW, Suite 1100, Washington, DC 20005.

As you know, the Help America Vote Act of 2002 (HAVA) established EAC to make certain that the law is fully and effectively implemented. The work of your organization brings value to this process. We also feel it is extremely important to have a direct relationship with the executive leadership of the nonprofit organizations that are committed to ensuring that American voters have confidence in the integrity and fairness of our elections. We did not have the opportunity to have such a meeting in 2004 and want to make certain that we do so early in 2005, before we begin our aggressive schedule of public meetings and hearings.

While we want an opportunity to personally share with you the broad based components of our 2005 work plan, it is our desire to have a broader discussion of how America is fairing under HAVA. You have been invited as the head of your organization because it is important that we hear directly from you. Your perspectives inform and bring value to our work as EAC Commissioners. Recognizing that we all rely heavily on expertise within our organizations, you are welcome to bring a member of your staff with you but we also want to emphasize that it is your input that we seek.

I hope you will join us on January 24 and look forward to seeing you then. Please confirm your attendance with my office at 202-566-3111. We will also need to know the name of any one who will accompany you to the meeting. My assistant, Sheila Banks, will provide any additional information you might need.

Best wishes for a wonderful, peaceful and successful New Year.

Sincerely,

Gracia Hillman
Chair
Hi Adam: Attached is the draft agenda for Seattle. Will Commissioner Martinez need a hotel room for either the night of the 16th or 17th or both? Let me know so we can reserve one for him. My assistant Trina Caudle will make sure he has a badge for the meeting, and of course, he is welcome to attend any of our functions while he is with us in Seattle. Here is a link to the general meeting page:

http://www.ncsl.org/annualmeeting/

Please don't hesitate to contact me or Trina (202) 624-8695 if you have any questions. Thanks.

NCSL Redistricting and Elections Committee

National Conference of State Legislatures

The Forum for America’s Ideas

NCSL Annual Meeting
Seattle, Washington
August 16-19, 2005

2004-2005 Committee Officers

Co-Chair: Representative Tommy Reynolds, Mississippi
Co-Chair: Representative Dennis Ross, Florida
Vice-Chair: Senator Jeanmarie Devolites, Virginia
Vice-Chair: Representative Thad McClammy, Alabama
Staff Co-Chair: Mary Galligan, Kansas
Staff Co-Chair: Steve Miller, Wisconsin
Staff Vice-Chair: Karl Aro, Maryland
Staff Vice-Chair: John Bjornson, North Dakota

Preliminary Agenda

Tuesday, August 16, 2005

8:30 am – 5:00 pm               Registration Open

5:00 pm - 10:00 pm              Welcome Reception: Seattle Sports Scene!

Qwest Field and Event Center and Mariners’ Game at Safeco Field

Seattle boasts two of the finest new stadiums, Qwest Field and Safeco Field. Qwest Field -- home of the Seahawks -- is set against a background of Puget Sound and snowy mountains. While you're waiting for the Mariners to take on the Kansas City Royals at Safeco Field (across the street from Qwest Field) you can enjoy interactive football games, larger-than-life football inflatables and the best slide burgers, foot-long hotdogs and fries in Seattle. Then, there's reserved seating for NCSL delegates and guests at the Mariners' game! Truly an evening to remember!
WEDNESDAY, AUGUST 17, 2005

8:30 am – 5:00 pm  Registration Open

7:30 am - 9:00 am  Continental Breakfast for All Delegates

8:30 am - 10:00 am  Opening Plenary Session

Presiding: Delegate John Hurson, Maryland, President, NCSL

Keynote Speaker: Bill Gates

Bill Gates is Chairman and Chief Software Architect, Microsoft Corporation, Seattle. Gates started the world’s leading software company in 1975. His vision and leadership have changed the way the world uses computers. The Bill and Melinda Gates Foundation, with an endowment of $27 billion, is dedicated to global health and learning.

10:15 am – noon  Efforts to Regulate Campaign Activity by “527s”

In the 2004 election season, several so-called 527 organizations played prominent roles in both state and federal campaigns. Will federal efforts to reign in 527s impact state elections? Will legislative candidates and caucus campaign committees be covered by any federal reforms?

12:00 pm - 1:00 pm  Lunch for All Meeting Participants

Enjoy lunch and visit the exhibit hall! It features hundreds of exhibitors: businesses; public interest groups and associations; federal, state and local government agencies; trade associations; political groups; and consulting firms. Information and entertainment for all!

1:15pm – 3:00pm  Innovative Approaches to Running Elections

For nearly five years, states have worked diligently to reform the elections process. What are the most substantial changes and what top innovations should states look to replicate to improve the elections process?

Ray Martinez, Commissioner, Election Assistance Commission

Tova Wang, Century Foundation

Rebecca Vigil-Giron, Secretary of State, New Mexico

Miles Rappaport, Demos, New York

3:00 pm – 4:15 pm  The Expanding Field of Election Law
Elections have become increasingly litigious. What can states do to be prepared for court challenges in future elections? Will a judge decide your next race?

Dan Lowenstein, UCLA, California

Bill Gilkeson, North Carolina

Doug Chapin, electionline.org

**4:15 pm – 5:00pm**

**Business Meeting**

The Committee will consider important issue positions for NCSL's full membership to adopt as official policy. We will also discuss any potential Committee topics for the December meeting in Chicago, Illinois.

Presiding:
Committee Officers

---
The Voting Rights Act, perhaps more than any other federal law, plays a major role in redistricting. Will the Act be changed or amended in the next couple of years? How much difference did it make in this round of redistricting compared to the 1990s?

10:30 am – 11:45 am  Redistricting by Commission – Pros and Cons

Voters in several states may soon be considering redistricting reform measures designed to strip the power of redistricting from legislatures. Do commissions produce more competitive district plans? Are they truly independent?

11:45 am - 1:15 pm  Legislators' Luncheon

Presiding: Senator Leticia Van de Putte, Texas, Vice President, NCSL

Biomedical Research and Economic Development

World-renowned researcher Leroy Hood and Nobel Laureate Lee Hartwell will share the latest trends in biomedical research and the impact this cutting-edge field can have on economic development.

Speakers:

Lee Hartwell, President, Fred Hutchinson Cancer Research Center, University of Washington, Seattle, Washington

Leroy Hood, M.D., President, Institute for Systems Biology, Seattle, Washington

1:30 pm - 3:15 pm  Changing Demographics: What Lies in Store for States?

Demographic forecasting is essential for making informed decisions on issues ranging from school enrollments to public employees' retiree benefits. Hear current thinking on the trends and their meaning for state policy. What do demographic trends tell us about 2011 redistricting?

Speaker:

William Frey, Research Professor, University of Michigan

3:30 pm - 5:00 pm  Concurrent Sessions

- LEGISLATOR TRAINING TRACK--The Art of Public Debate
- Achieving Access to Prescription Drugs: Changing Roles for the States
- Cameras in the Capitol: The Legislative Perspective on Live TV Coverage
- Can Governments Break Their Addiction to Discriminatory Taxes?
• Driver Distraction: How Much is Too Much?
• Helping Children in Immigrant Families Succeed
• Maintaining Civility and Decorum
• Medical Liability: Finding Middle Ground

6:30 pm - 9:30 pm  A Taste of Washington Extravaganza

Seattle Center: Pacific Science Center, Experience Music Project and the Space Needle

Discover the diversity of our magical city as we bring our most famous sites to you. At the Pacific Science Center you can delight in a tropical stroll with hundreds of butterflies, re-ignite your imagination with interactive exhibits or simply sit back, relax and dine with the dinosaurs. Experience the power and joy of music, in all its forms, at EMP, a one-of-a-kind museum. You can explore the amazing collection of popular music artifacts, create your own music, or get a taste of rock stardom. And, we have reserved the Space Needle’s Observation Level just for you. Enjoy sweeping views of Puget Sound, Mount Rainer, the Cascade and Olympic mountain ranges, Lake Washington and, of course, Seattle.* You will enjoy the smooth sounds of Seattle’s famous jazz, mingle with the entertaining street performers, and stroll the famous Pike Place Market vendor stalls. Come, bring your family, and enjoy some of the best delicacies the Northwest has to offer.

*Access to the Space Needle Observation Deck is limited to the first 2,000 people.

Friday, August 19, 2005

8:00 am - 9:00 am  Coffee Service for All Delegates

8:30 am - 10:00 am  Plenary Session

Speaker: Uwe Reinhardt, James Madison Professor of Political Economy, Princeton University, Princeton, New Jersey

10:15 am - noon  NCSL Annual Business Meeting
History is filled with examples of elections decided by a handful of votes, sometimes by one vote. In 2004, several races, including the Washington governor's race, were decided by a fraction of a percentage point. How can states be sure statutes are adequate when the lightning bolt of a one-vote race strikes?

Saturday, August 20, 2005

8:00 am - 9:00 am Coffee Service for All Delegates

8:30 am - 10:00 am Plenary Session

10:15 am - 12:00 pm Nashville is Only Twelve Months Away!

Greetings,

I just wanted to remind you that this Monday, August 1, 2005, we will be the Hispanic Working Group meeting from 1 pm to 4 pm, here at the EAC. If you plan on attending, please, let me know so I can have a count in terms of seating. If you have any questions or would like more information, please, feel free to contact me at your earliest convenience. I am attaching the agenda for the meeting and below I have listed the groups that will be represented at the meeting. Thank you!

Participants:

- California - L.A. County
- Congressional Hispanic Caucus Institute
- Congressional Hispanic Leadership Institute
- Institute for Puerto Rican Policy
- Rep. Charles Gonzalez’s Office
- IFES
- LULAC
- Sen. Mel Martinez’s Office
- MALDEF
- National Association of Latino Elected Officials
- NCLR
- U.S. Hispanic Leadership Institute
- VotoLatino
- William C. Velazquez Institute

Hispanic Working Group Meeting

August 1, 2005

AGENDA

U.S. Election Assistance Commission
1201 New York Avenue, N.W.
Conference Room
(12th St, NW and New York Ave, NW)
Washington, D.C. 20005

This half-day meeting will provide guidance to the EAC as it potentially focuses on research under Section 311 and 312 of HAVA, as well as research under Section 241 and NVRA responsibilities under Section 802. The working group will review two works currently in progress, the readability and usability of the National Mail-In Registration form and the review of the updated List of Translated Election Terms. The working group will assist the EAC in the identification of “Best Practices” relating to methods of effective administration of Federal elections impacting the Hispanic and Spanish-speaking communities.

Monday, August 1, 2005 (Conference Room)

1:00PM – Welcome –Vice-Chair Paul DeGregorio, and Tom Wilkey, Executive Director
1:15PM – EAC background information – Julie Thompson, General Counsel
1:30PM – EAC research activities and meeting objectives – Laiza N. Otero, Research Associate
1:45PM – Introductions by working group members
2:00PM – Discussion – led by Commissioner Ray Martinez
   • Discussion of election administration issues that affect Hispanic and Spanish-speaking voters; recommendations for studies and activities
   • Identification of Best Practices relating to methods of effective administration of Federal elections impacting Hispanic and Spanish-speaking voters
   • Readability and usability of the National Mail-In Registration form
   • Review of the List of Translated Election Terms
4:00PM – Adjourn meeting
Working Group – Topics for Discussion

I. HAVA Section 241 – Studies and other activities to promote effective administration of Federal elections

- This section allows the Commission to carry out studies and other activities with the goal of promoting effective administration of Federal elections. Effective administration methods are to be the most convenient, accessible, and easy to use for voters, including voters with limited proficiency in the English language. Two of the election administration issues described for study in §241(b), directly refer to voters with limited proficiency in the English language. The former describes “methods of ensuring the accessibility of voting, registration, polling places, and voting equipment to all voters” including voters with limited proficiency in the English language. The second issue described is the “technical feasibility of providing voting materials in eight or more languages for voters who speak those languages and who have limited English proficiency.”

- Question 1: What methods do you consider effective in ensuring the accessibility of voting, registration, polling places, and voting equipment to Hispanic and Spanish-speaking voters? - Discuss accessibility for minority language speakers for each component.

- Question 2: What resources are there currently to assist Hispanic and Spanish-speaking voters? How do you rate their level of accessibility?

- Question 3: What materials have proven to be the most effective in your communities in assisting Hispanic and Spanish-speaking voters? - Discuss what would constitute “Best Practices” in each of the areas mentioned before.

- Question 4: What recommendations do you have for research purposes relating to these topics in §241?

II. HAVA Section 302(a) – Provisional voting

- If the name of an individual does not appear on the official list of eligible voters at the polling place where he declares to be a registered voter or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot. The section further describes the process by which a voter may cast a provisional ballot.

- Question 1: What particular concerns do Hispanic and Spanish-speaking voters have in regards to provisional ballots? – Some areas to discuss may be provisional voting process, ballot counting, and accessibility of information regarding how the vote was counted.

- Question 2: What type of assistance would be most effective in providing guidance for these voters regarding provisional voting? – Identify “Best Practices.”

- Question 3: What recommendations do you have for research purposes relating to provisional voting?

III. HAVA Section 302(b) – Voting information requirements

- Per this section, the following voting information has to be publicly posted at each polling place on the day of each election for Federal office: a sample version of the ballot that will be used for that election; information regarding the date of the election and the hours during which polling places will be open; instructions on how to vote, including how to cast a vote and how to cast a provisional ballot; instructions for mail-in registrants and first-time voters under section 303(b); general information on voting rights under applicable Federal and State laws, including information on the right of a person to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and general information on Federal and State laws regarding prohibitions on act of fraud and misrepresentation.

- Question 1: How many States and/or jurisdictions voluntarily provide all or some of the above voting requirements in Spanish? How accessible are they to Spanish-speaking voters?

- Question 2: For jurisdictions covered under section 203 and/or section 4 of the VRA, how effectively are the required voting information materials translated and how available are they to voters? What resources do these jurisdictions utilize to ensure the cultural and linguistic appropriateness of the translated materials?

- Question 3: What materials have proven to be the most effective in your communities? - Identify “Best Practices.”
IV. HAVA Section 303(b) – Requirements for voters who register by mail

- If an individual registers to vote by mail and has not previously voted in an election for Federal office, or the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of §303(a) the voter will have to submit a copy of an accepted form of identification along with their registration or present the identification in person at the polls on the day of elections. If the person does not have an accepted form of identification when he or she goes to vote at the polls, the individual may cast a provisional ballot. If the person is voting by mail and did not submit identification upon registration the ballot shall be counted as a provisional ballot in accordance with §302(a). Section 303(b) lists the following as forms of identification: current and valid photo identification, current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. However, the requirements shall not apply if a voter submits with their registration either a driver’s license number or at least the last 4 digits of their social security number and the local election official matches the information with an existing State identification record bearing the same number, name and date of birth as provided in such registration.

- Question 1: How have States expanded the above requirements to require voter identification of all voters when they go to cast a vote in person?
- Question 2: How have voter identification requirements impacted Hispanic and Spanish-speaking voters?
- Question 3: What type of assistance would be most effective in providing guidance for these voters regarding voter identification requirements? – Identify “Best Practices.”
- Question 4: What recommendations do you have for research purposes relating to voter identification requirements?
• **Question 1:** How are states able to translate the ballot measures on the voting systems? How would a direct translation of the form interact with a readable Spanish-version of the ballot measure—or election instructions on the DRE or optical scan system?

• **Question 2:** How do localities provide for non-printed language accessibility at the polling place to help them use the voting system (Poll workers, dedicated phone lines with Spanish-language accessibility)?

• **Question 3:** What resources do local election officials utilize to ensure the language on the voting systems is translated appropriately? – Identify “Best Practices.”

VII. The combination of 301(a)(3) [requiring the voting system—DRE or otherwise—to be at least one-per polling place in 2006] and 301(a)(4) [requiring that at each voting system provides alternative language accessibility] means that at least one machine per polling place has accessibility for minority language individuals.

• **Question 1:** This means that even in the jurisdictions not covered by Sec. 203 of the Voting Rights Act, there is the capability for a minority language provision on those voting systems. While not required by law, have groups considered working with local election officials to have a Spanish language option included in growing Spanish-language populations?

• **Question 2:** Have groups done studies to see, aside from the Sec. 203 of the VRA covered territories, the counties where there is an emerging Spanish-speaking population, but no Spanish-translated election materials?
Happy New Year, Adam.

I sent the following e-mail in mid-December regarding the STEM of Democracy meeting that we have planned in Chicago for February 10th. We would very much like to have you and/or Ray attend this meeting. I understand that between the Washington election and the holidays, things may have been pretty hectic for you both.

Can you please check your schedules and let me know if you will be available to attend this meeting? If you would like, I'd be happy to send another e-mail to Ray as a reminder.

I hope you had a great holiday season and I look forward to hearing from you soon. I am hopeful that we will see you and Ray in Chicago.

All the best,

Patti

Subject: STEM of Democracy Meeting in Chicago

Dear Commissioner Martinez,

David Burns asked me to extend an invitation to you and Adam to attend a meeting that we are convening in Chicago on February 10, 2005 for the STEM of Democracy project.
This meeting will gather academic leaders and faculty members who are interested in developing the STEM of Democracy idea, testing it out, and developing materials that will assist faculty who want to teach "through" some of the contested issues and continuing challenges in our democratic system "to" learning in STEM fields.

At this meeting, we plan to:

- Explore the STEM of Democracy idea more intensively,
- Discuss the possibility of a special session at our SENCER Summer Institute 2005,
- Identify existing courses that feature issues that are related to the STEM of Democracy idea, and
- Consider what resources faculty members would need to develop a STEM of Democracy project or course at their institution.

We have already heard from a number of interested parties, including those who were involved in our EAC proposal. We expect this meeting to be a small and informal gathering that will generate thoughtful conversation and robust planning.

I have attached an article from our October e-newsletter that David wrote about this project. I think you'll both enjoy it.

David asked me to convey to you how much we would appreciate your participation in this meeting. He also asked me to send you his warm holiday wishes to you and your families.

Please let me know if you are able to attend the meeting or if you have any questions. I look forward to hearing from you and I wish you happy holidays!

STEM of Democracy.pdf
As I write this, it's just two weeks from November 2, our next national election day. Voting has already begun and serious controversies about voting began even before the voting did.

Our edition of this morning's New York Times offers testimony to this: It carries an article about a legal challenge to New Jersey's electronic (touch-screen) voting machines (the lawsuit questions their accuracy and reliability and calls for verification or receipts, you could say). A second report details problems with Florida's early voting system. The front page features a photo of President Bush's parents and lots of other people waiting in line to cast their votes in Texas—fully 15 days before November 2.

For me, this image of "early voting" morphed the traditional meaning of "election day" into "election deadline." It stimulated other thoughts about intended and unintended consequences: The goal of increasing voter turnout and participation rates by being attentive to the complexities of modern life and our many competing schedules and commitments argues for these "convenience-enhancing" reforms (and the growing use of "absentee" ballots). But do these reforms have the effect of "privatizing" or atomizing what in the past, at least, was largely a public event? Does this deprive us of one of the few civic events common to people from all walks of life? Will we soon be changing what was private act carried out in public into a private act carried out privately? And if so, does this matter? What role does technology play in all this? How do people's views of technology affect their appraisal of the legitimacy of processes in which the most advanced technologies are employed? How does our view of science and the advances that science has made possible affect our confidence in the quality of "scientific" results?

It makes sense that we'd be thinking about elections and voting as we begin the first national election since 2000. There are many sources for this heightened attention: Public discourse has lately tended to equate widespread voter participation and the capacity to conduct fair elections with democracy, itself. The suggestion is that voting is in some profound way an essential—and to listen to some commentators, nearly a sufficient—indicator that a state has a democratic form of government. Think of the importance being attached to the inauguration of free and direct presidential elections in Afghanistan and the promise of a national legislative election in Iraq in January as markers of the emergence of these states as modern democracies.

We know that having elections is a necessary, but by itself an insufficient, specific indicator of a democratic regime (the former Soviet Union had any number of elections and, to the best of my recollection, none of them were cliffhangers and nobody questioned the ballot designs!)

It is inconceivable to Americans, however, that we could have a democracy without our constitution, our democratic institutions, and elections that genuinely assessed and represented with considerable accuracy the will of the people who participate in them. Elections really do matter in a democratic state; they are not exercises in civic somnambulism.

Suppose that, on November 3rd and in the days that follow, we lack a clear winner in our presidential election and are faced with serious challenges regarding the process and the technologies employed in the complex "system" of voting, as well as serious doubts about the accuracy and legitimacy of the results. Suppose we have a result that, for many, calls into question the tradition of non-direct election of our national leaders. In that event, the need for serious academic attention to these issues will be manifestly evident. We won't need to make a case for curricular attention. Rather, I expect we'll be faced with a demand for such attention.

Suppose that none of the above happens, or at least, none of it happens to an extent that keeps the results in serious doubt. Assume the election goes off without a hitch, most of us are satisfied with its legitimacy, and, for some of us at least, we're even happy with the results. In that eventuality, we'll need other stimuli and other vehicles to encourage students to learn about this dimension of our civic life. One source of encouragement might come from the possibility that the study of democracy and its institutions (including voting) could lead to some real learning in the STEM disciplines.

(Continued on next page.)
The STEM of Democracy (cont.)

SENCER offers an attractive platform in either eventuality. What terrific candidates elections and other mechanisms of democratic participation are as complex, contested, capacious civic issues that can be illuminated by what those who know mathematics, statistics, systems engineering and design, computer sciences, and the social sciences can teach! Regardless of what happens in November, it is more than fair to say that elections have become terrific examples of what June Osborn once called, "multidisciplinary trouble."

We know this to be true because last Summer at Santa Clara a group of about 30 participants in SSI-2004 met to discuss what science, mathematics and public policy could be taught "through" a focus on voting, elections, proportional representation, districting, the conduct of the decennial census, and a host of other elements of our Republic's institutions and forms of governance. The list generated by the group was extensive, wide-ranging and impressive. (We'll be publishing a summary gleaned from the discussions by Richard Keeling in a future e-newsletter.) In that meeting, thanks to Ed Lorenz of Alma College, our group even got to inspect a ballot from Canada—something that led many of us to reflect that we'd never seen a ballot other than the ones we'd used ourselves (and, of course, many of us have voted without a ballot at all, in the traditional sense)! This offered subtle testimony to our parochialism ("doesn't everybody vote the way I do?") and to how lightly and occasionally most of us give any serious thought to these issues.

The conversations in Santa Clara ranged widely, from controversies about source codes and verification, to systems theory, to ideas about "fairness" that emerge from advanced algebra. They touched on a set of semiotic and philosophical questions about what we think voting really means or signifies and why or whether it ought to matter at all.

With this in mind and the encouragement of the participants in that August 8th meeting, we at the SENCER national center are now developing ideas and soliciting interest in what we are calling the "STEM of Democracy Project."

What's in a name? In this case, we are saying STEM for at least two reasons: The first, of course, is that, in many important respects as suggested above, the act of voting is the basic "stem"—as in the main trunk of a plant—of democracy. Voting is one of the elemental, functional expressions of one's personal participation in the governance of a state, especially a democratic state. Voting is a stem in the sense that so much else flows from, or grows from, the act of casting a ballot.

In spite of this, up until just recently, voting has failed to get the attention it should in many college programs to encourage "civic engagement" and service learning, often, it seems, because voting is denigrated as purely instrumental ("high school civics") and doesn't qualify as, to use Benjamin Barber's phrase, "strong democracy." This is unfortunate because the downplaying of voting may have itself resulted in decreased voter participation. If it were up to college students with their current <30% participation rates in national elections to "water the stem of democracy," the results would be an even more wilted plant, indeed.

It will be interesting to see what the participation rates will be among college students this year—rates that will reflect, to be sure, both the heightened interest in this year's race, but also a concerted effort to rectify the old denigration of voting, itself. One of many such efforts to increase student participation in the process is the college initiative of the United States Election Assistance Commission, which has awarded modest grants to some 15 institutions to engage college students as poll workers in local election districts. We look forward to having the reports of these efforts.

That's the "stem." The capital S-T-E-M in the STEM of Democracy, as SENCER e-newsletter readers will surely know, refers to a second meaning. In this case STEM refers to the fields of science, technology, engineering and mathematics—all areas of concern for higher education, in general, and the specific areas of focus of the National Science Foundation's work in improving undergraduate education, in particular. We want to highlight the idea of elections as the stem of the democratic process, just as we claim that an academic focus on elections will help organize and improve learning in the STEM fields.

This is, of course, the fundamental SENCER ideal and goal.

We think the right place or locus for this project is where the other SENCER courses and projects are: the classroom and, to the extent that it is feasible, the surrounding community as sites and beneficiaries of community based research.

"Voting is one of the elemental, functional expressions of one's personal participation in the governance of a state, especially a democratic state."

(Continued on next page.)
We need your help to develop this idea, gather people interested in testing it out, and create materials that will assist faculty who want to teach “through” some of the contested issues and continuing challenges in our democratic system “to” learning in STEM fields. Here’s what we need from you:

First, we need to hear from you if you are currently teaching a course or even part of a course that features issues that we are loosely gathering under the heading STEM of Democracy. Could you contact us, share your syllabus and assessment results, consider nominating your project/course as a model, or at least let us know what you are doing?

Second, we need to know if this idea interests you and if you’d be interested in exploring it more intensively with other scholars via e-mail or, if we can arrange it, at a meeting or two, or in a special session at our SENCER Summer Institute 2005 or other regional meetings or disciplinary gatherings.

Third, we’d like to know what resources you think you would need to consider developing a stem of democracy project or course on your campus. Would a backgrounder that identifies what might be taught and how that teaching would improve learning in mathematics, statistics, engineering and the social sciences be useful to you and your colleagues? Do you have any authors to recommend, resources to call attention to, other suggestions?

Fourth, while we can easily think about how the knowledge residing and being developed in mathematics, statistics, computer science, social science and engineering have great relevance to the issues in democracy (and while Barbara Tewksbury’s course model on geology and its relationship to development is suggestive of still other dimensions of this issue), it isn’t clear how the canonical elements in biology, chemistry, and physics, to pick three big domains, can be illuminated or taught through the issues raised by elections, voting technology, proportional representation and other issues. But let me be quick to say that I suspect this condition has a lot to do with the failure of my imagination and the limits of my knowledge. So, if you have any suggestions, hunches, or evidence, by all means, please share them with us and we’ll share them with others, as well.

Please forward this request to others on your campus and elsewhere who may have an interest and contact me by e-mail (david.bums@sencer.net), telephone (732) 873-1539 or letter (National Center for Science and Civic Engagement, 215 Market St, 4th Floor, Harrisburg, PA 17101.)

We’ve often said that SENCER seeks to deal with two great trends that appear to be colliding with one another: (1) the alarming decline in the study in the STEM disciplines by American college students, almost none of whom take any more than the most basic required courses (this is true for science and math majors, as well), a condition that is aggravated by the poor retention of science and mathematical knowledge and skills by those who are only minimally exposed to science learning, and (2) the growing number of highly complex and often hotly contested matters of civic concern that are either in some way created by advances in science, engineering, mathematics and technology and/or that require some advanced knowledge in one or more STEM field in order to craft and implement the best possible policies, laws or regulations. Elections and modern possibilities for voting have now become perfect exemplars of the issues covered in the second trend. We in the SENCER National Office and the Center look forward to hearing your thoughts and suggestions on these matters and to working with you to develop the STEM of Democracy Project in the coming year.

Oh, and don’t forget to vote on November 2nd, unless you’ve done so already!
Dear Commissioner Martinez,

David Burns asked me to extend an invitation to you and Adam to attend a meeting that we are convening in Chicago on February 10, 2005 for the STEM of Democracy project.

This meeting will gather academic leaders and faculty members who are interested in developing the STEM of Democracy idea, testing it out, and developing materials that will assist faculty who want to teach "through" some of the contested issues and continuing challenges in our democratic system "to" learning in STEM fields.

At this meeting, we plan to:

- Explore the STEM of Democracy idea more intensively,
- Discuss the possibility of a special session at our SENCER Summer Institute 2005,
- Identify existing courses that feature issues that are related to the STEM of Democracy idea, and
- Consider what resources faculty members would need to develop a STEM of Democracy project or course at their institution.

We have already heard from a number of interested parties, including those who were involved in our EAC proposal. We expect this meeting to be a small and informal gathering that will generate thoughtful conversation and robust planning.

I have attached an article from our October e-newsletter that David wrote about this project. I think you'll both enjoy it.

David asked me to convey to you how much we would appreciate your participation in this meeting. He also asked me to send you his warm holiday wishes to you and your families.

Please let me know if you are able to attend the meeting or if you have any questions. I look forward to hearing from you and I wish you happy holidays!

Patti Simon

STEM of Democracy.pdf

020272
Hi Adam! Hope all is well with you.

FYI, here is a letter we sent to The Pollworker Institute board last week. You'll see a mention of possible work with the EAC. (I have not followed up with Karen LD but it's on my "To Do" list!)

Also attached is a letter to Commissioners DeGregorio and Martinez with a request for a meeting regarding a project that the PI is doing for the Pew Charitable Trust. (We'll be sending a hard copy to each Commissioner and to Tom Wilkey but wanted you to see that it is on its way. I'll also be sending an email to Tom re this project.) Pew has contracted Tracy and me to conduct a feasibility study to assess whether initiatives targeting the implementation of statewide voter registration systems could significantly and measurably enhance voter enfranchisement and reduce the registration problems that have plagued U.S. elections. We are interviewing policy makers, election officials, vendors, the advocacy community, etc.

We hope that at least Commissioners Martinez and DeGregorio and Tom Wilkey can find time to meet with us. I know there is little time to spare in between Hearings!

Best Regards, Jennifer

July 28, 2005

"Dear Pollworker Institute Board of Directors and Board of Advisors,

- UPDATE ON THE POLLWORKER INSTITUTE -

1) New Friends and Old Friends. First, the new friends.....We are fortunate to be adding Richard Soudriette, Warren Furutani and Connie Schmidt to our Advisory Board.

Richard Soudriette has served as the President of the International Foundation for Election Systems (IFES) since 1987. IFES is an internationally respected nonpartisan, nonprofit organization that has developed and implemented comprehensive, collaborative democracy solutions in more than 100 countries. One of IFES's many strengths is its extensive experience in the capacity building and professional development of election officials around the world.

Warren Furutani is President of the Los Angeles Community College system and is a long time advocate of community colleges, voter-friendly polling places and, in particular, college pollworker programs. He has been instrumental in the growth of L.A. County's College Pollworker Program partnership with the community college system.

Connie Schmidt recently retired as Registrar of Voters in Johnson County Kansas where she developed nationally respected voter service programs and voting system integrity standards. She has a particular commitment to and enthusiasm for innovative pollworker recruiting and training. Connie has already spoken with Johnson County's new Registrar and is confident we can count on them to be a pilot program.

And old friends......We are proud to announce that one of
our founding Board members, Tom Wilkey, has been selected to serve as the first Executive Director of the U.S. Election Assistance Commission. While we are THRILLED for Tom, we understand his decision to resign from the Board of the Pollworker Institute. We wish him all the best in his new venture!!

2) We’ve landed our first project! The Pollworker Institute’s Jennifer and Tracy are currently conducting a feasibility study for the Pew Charitable Trusts. The purpose of the study is to assess whether initiatives targeting the implementation of statewide voter registration systems could significantly and measurably enhance voter enfranchisement and reduce the registration problems that have plagued U.S. elections. The result will be an internal Pew document so sorry we won’t be able to share it with you all .....but what a great experience for us!

3) New Collaboration. We formalized a Memorandum of Understanding with the International Foundation for Election Systems (IFES) this week. IFES will provide in-kind contributions such as office space, phones, copy machine, website design, etc. We are grateful to be affiliated with such a terrific organization. Being on-site means we will also be able to easily brainstorm and collaborate on possible U.S. election administration projects with IFES’ Director of Programs, Scott Lansell, staff and consultants. Our new address is: The Pollworker Institute, 1101 15th Street, Suite 115, Washington, DC 20005. Phone will be: (202) 350-6700, (Tracy x 6671 and Jennifer x6672).

4) New partners. We have a new partner in Iowa. Professor David Redlawsk from the University of Iowa is very excited about the possibility of working with us. Professor Redlawsk is a political psychologist whose primary line of research focuses on how citizens process political information in order to make a voting decision. He has been offering students academic credit for substantive community service so is an experienced resource for us. He has offered to approach the Johnson County Auditor, Tom Slockett, to encourage him to join the program. We’ll keep you posted.

5) Funding and Update on Pilot Projects. Fiorello Consulting has been representing us as fundraising consultants since May. Cliff Hash and Patti Fiorello are optimistic about the possibility for funding in the near future. However, since we have not received funding to date, we are going to re-adjust our hope to conduct pilot programs this Fall. But stay tuned....we still hope to implement 5 or 6 terrific pilot programs in the Spring of 2006! And in the meantime, we have been granted our 501(c)(3) status by the IRS so we’re ready for whenever the funds come rolling in.
6) **Possible project with US Election Assistance Commission.** Tracy and I met in May with the EAC regarding a possible College Pollworker Project which would involve developing a "How To" manual for organizing a College Pollworker Program. It would include calendars, check lists, models - for large and small jurisdictions. The project may include delivering such a manual at regional conferences which would involve brainstorming among election officials and reps from academic institutions and some possible training the trainers. We anticipate an RFP hitting the streets any day now. Again, we'll keep you posted!

7) **A new twist on the Concept.** We are discussing collaboration with the American Association of University Professors. General Secretary Roger Bowen has received a small Carnegie grant to explore the possibility of a program to recruit college professors to serve as pollworkers. The best of all worlds would be to merge their idea with ours....the professors would invited students to "do like I do" and serve along with them as part of the academic course.

8) **Possible International Work.** In an unexpected turn of events, an international for-profit democracy building firm called "Democracy International" was intrigued by our concept and requested permission to list the Pollworker Institute as a partner/resource for a 5 year USAID "IQC" (Indefinite Quantity Contract) for international democracy building programs. We always thought that we would someday like to get in to pollworker issues at international levels but did not know it would happen this soon. We'll keep you posted. It may be some time before Democracy International knows if it has been selected as an IQC holder.

Please call us if you have any questions or suggestions!

Best Regards,

Jennifer Collins-Foley, President, (540) 379-9974
Tracy Warren, Executive Director, (202) 462-2735

August 2, 2005

Commissioner Paul DeGregorio
U.S. Election Assistance Commission
1225 New York Avenue, NW
Suite 1100
Washington, DC 20005

Dear Commissioner DeGregorio:

As the deadline for implementing significant changes in voter registration looms, state and local election officials, as well as the voting rights community, have turned their attention to this critical component of the Help America Vote Act. Changing voter registration means opportunities both to expand the electorate and remedy problems that have plagued our registration system. The Pew Charitable Trusts has hired The Pollworker Institute to conduct a feasibility study to explore possible initiatives that would take advantage of these opportunities. I am writing to request a meeting to discuss this project and the U.S. Election Assistance Commission’s plans in this area.

I am enclosing a summary of our project for your review. We have been meeting with state and local election officials, with technology experts, with voting rights organizations and with policy experts to examine the ways that the Pew Charitable Trusts might be helpful. Of course, in addition to learning the Commission’s plans, we would welcome your feedback on what kinds of initiatives can help guarantee that HAVA fulfills the law’s intended purpose: to ensure that every eligible voter is able to cast a vote and have that vote count.

We would be grateful if you could take the time to meet with us. I will follow up with your office to determine your availability.

Best regards,

Tracy Warren

ENCL
FOIA File
Ms. Lillie Coney  
Associate Director  
Electronic Privacy Information Center (EPIC)  
1718 Connecticut Ave, NW  
Washington, DC 20009

Dear Ms. Coney:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on May 10, 2005. The request was clarified in a May 20, 2005 phone conversation as memorialized in a letter sent to you on that same day. Your clarified request sought certain records from “March 23, 2004 to the present,” including:

- Any and all transcripts, meeting minutes or similar documents memorializing the Technical Guidelines Development Committee (TGDC) meetings or hearings which are in the possession of the EAC and not publicly available on the NIST web site.
- Any and all EAC documents or communications regarding the selection or appointment of members of the TGDC.
- All Public Financial Disclosure Forms (OGE Form 278) filed by members of the TGDC.
- The recommended Voluntary Voting Systems Guidelines presented to the EAC by the TGDC.

With regard to your request for transcripts, minutes and similar documents not found on the NIST web site, the EAC has no records responsive to the request. All available minutes, transcripts and digital recordings of TGDC meetings and hearings are maintained by NIST on the web at www.vote.nist.gov.

In response to your request for documents or communications regarding the selection or appointment of TGDC members, all responsive documents have been attached (Attach. 3). A few of these documents contain redactions required by FOIA Exemption 6 (5 U.S.C. §552(b)(6)), to protect personal information and avoid unwarranted invasions of personal privacy. Generally, the redacted information included personal identifiers and contact information (i.e. home addresses and phone numbers).
As for your request for Public Financial Disclosure Forms (SF 278) filed by members of the TGDC, this information may be released under Section 105 of the Ethics in Government Act of 1978 (and 5 C.F.R. §2634.603). The law requires that prior to the release of Public Financial Disclosure Forms the requestor affirm his or her understanding of the limited use of the forms. I have attached OGE Form 201 (Attach. 4). You may use this form to meet the above requirements. The form should be sent to NIST, as the only member of the TGDC presently required to file a SF 278 is a NIST employee, Dr. Hratch Semerjian. As such, NIST is the custodian of this record.

Finally, in response to your request for the Voluntary Voting Systems Guidelines presented to the EAC by the TGDC, a copy of this document is attached (computer disk). (Attach. 5).

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Garlin S. Gilmour
Associate General Counsel
U.S. Election Assistance Commission

2. Request Clarification Letter (May 20, 2005);
3. TGDC Appointment Documents;
4. OGE Form 201;
5. Voluntary Voting Systems Guidelines presented to the EAC by the TGDC
May 20, 2005

Ms. Lillie Coney
Associate Director
Electronic Privacy Information Center (EPIC)
1718 Connecticut Ave, NW
Washington, DC 20009

RE: FOIA Request

Dear Ms. Coney:

Per our telephone discussion this afternoon, this letter serves to memorialize the clarifications made by EPIC regarding its Freedom of Information Act request. At a teleconference meeting between the EAC and EPIC, you were kind enough to clarify your May 10, 2005 FOIA request. Specifically, you noted that the request is limited to the following documents:

- Any and all transcripts, meeting minutes or similar documents memorializing the Technical Guidelines Development Committee (TGDC) meetings or hearings which are in the possession of the EAC and not publicly available on the NIST web site.
- Any and all EAC documents or communications regarding the selection or appointment of members of the TGDC.
- All Public Financial Disclosure Forms (OGE Form 278) filed by members of the TGDC.
- The recommended Voluntary Voting Systems Guidelines presented to the EAC by the TGDC.

I believe the above accurately reflects our conversation this morning. If you believe I have missed some element of the conversation, please let me know. I can be reached at (202)566-1392.

Thank you for your assistance in this matter. You will hear from us regarding this request soon.

Sincerely,

Gavin S. Gilmour
Associate General Counsel
Attachment 1
May 10, 2005

Fax 202-566-3127

The Honorable Paul S. DeGregorio
United States Election Assistance Commission
1225 New York Avenue N.W., Suite - 1100
Washington, DC 20005

RE: Freedom of Information Act Request

Dear Commissioner DeGregorio,

This letter constitutes a request under the Freedom of Information Act (“FOIA”), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking all agency records concerning the Technical Guidelines Development Committee (TGDC) from March 23, 2004 to the present (including but not limited to electronic records) including records regarding appointments to the TGDC, disclosure statements by members of the TGDC, meetings, hearings, and work of the TGDC related to voting technology standards. Please, also provide all printed meeting and hearing transcripts for the TGDC.

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of “news media” requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for “news media,” fee status, EPIC v. Department of Defense, 241 F.Supp.2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public’s understanding of the activities and operation of the government.

Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at coney@epic.org.

Sincerely,

Lillie Coney
Associate Director

Comments:
Craig,

As I may have discussed with you, the EAC would like to announce at its March 23rd first public meeting the formation of the Technical Guidelines Development Committee (TGDC) and, possibly, when their first meeting will be held. The formation of this committee will put in motion a timetable to develop and approve the voluntary standards outlined in HAVA. We would like to discuss with NIST what HAVA requires the TGDC to do—and what we can do realistically what the funds we may or may not have. We can also work on a strategy whereby we put the things we cannot do in FY04 into our (or your) FY05 budget request.

There has been some confusion in recent days over what monies NIST does or does not have available for this purpose. Today, Penelope Bonsall of my staff was told by Dr. Zevin that there was only $350,000 to work with for FY04—and that very little progress with standards could be made with it. In addition, Dr. Zevin’s presentation at NASS and NASED has confused some people because they didn’t quite understand that when Susan included 7 pages of “what could be done in the next six months” in her presentation, some folks thought that is what NIST will do in 2004. I understood it to be the NIST wish list and was not sure what portion will come under the TGDC umbrella.

In addition to all of this, we have been reviewing the Human Factors report developed by NIST and have some questions. We would like to release this report at our March 23 meeting. We would like for representatives of NIST to be at our public meeting to discuss the TGDC and Human Factors report.

Therefore, I would like to propose that the following folks meet ASAP (Monday or Tuesday of next week; March 8 or 9) to talk about these issues.

Paul DeGregorio, EAC
Penelope Bonsall, EAC
Craig Burkhardt, DOC
Dr. Zevin, NIST
Allan Eustis, NIST

I think it might be best if the NIST folks heard from you to set this meeting up. Can you (or your designee) call Penelope Bonsall at 202-694-1097 with a time and place (we are flexible) for a meeting on Monday or Tuesday?

The agenda could be as follows:
1) TGDC: expectations on who will be appointed; what is it they must/can do in FY04 and FY05. What is the TGDC timetable?
2) Human Factors report
3) Dr. Zevin’s “what could be done in the next 6 months”;
4) Funding issues for all of this. Can we get money from DOD?

I am on travel on Friday, March 5 but can be reached on my federal cell phone which is 202-360-2146.

Thanks for your help and attention to this important matter.

Paul DeGregorio
Paul-

Along with the NIST voting team, I reviewed the names and biographies submitted by Congressman Holt's Office for nomination to the four "open" positions on the Technical Guidelines Development Committee. Avi Rubin, Barbara Simons and Michael Alvarez are all extremely qualified for the TGDC. In fact, during our deliberations, the NIST voting team considered each of these individuals for inclusion on our final list. However, there were important reasons for choosing the individuals we did. Rather than criticize these fine nominees, any of whom would bring expertise to the TGDC, I will list the criteria for NIST's final selection of nominees:

1. Technical Competence in Standards Development Processes,
2. Open Minded and Unbiased Viewpoints. No pre-set agendas,
3. Global view of security and usability issues related to voting systems and voting equipment
4. Unique "lifetime/career" experiences and expertise not available from other appointed TGDC members

I would also note that like Michael Alvarez, NIST nominee Ron Rivest was also a co-author of the Cal tech/MIT report. We at NIST stand by our nominees as the strongest candidates to meet our strict criteria for inclusion on the TGDC.

I hope this description of our TGDC nominee evaluation process will assist the EAC in the selection of the four "open" positions. We will shortly provide you with a "final four" list from the original list of six individuals. We have broadened our selection to include women who were on our original list.

I will send you some talking points for the March 23rd EAC meeting tomorrow morning. I am a bit swamped today having just returned from leave.

Regards

Allan C. Eustis
Project Leader- NIST Voting Systems Standards
Technology Building 225 Room B257

Susan-

I have forwarded your e-mail on to the Election Assistance Commission. IEEE will still likely receive a formal letter requesting a nominee, but your response is quite helpful and will speed the process of spinning up the TGDC.

thanks

At 05:22 PM 3/18/2004 -0500, you wrote:

Dear Allan:

Judy Gorman referred me your email query about a formal nomination of the IEEE representative to the Technical Guidelines Development (TGD) Committee of the Election Assistance Commission (EAC).

I spoke with Donald Heirman, IEEE Standards Association President Elect and IEEE-SA Board of Governors (IEEE-SA BoG) Liaison to Standards Coordinating Committee 38 (SCC38), which is the group within IEEE working on voting standards. Don asked that I write to let you know that last year, the IEEE-SA BoG named Stephen H. Berger as its choice to represent IEEE on the TGD Committee. Stephen is a member of the IEEE-SA Standards Board and Chair of SCC 38.

I hope that this email answers your questions. I would be glad to provide further information or assistance, if needed.

Sincerely,

Susan

25 West 43 Street, 4th Floor
New York, New York 10036
212-642-4914

Anne Caldas has held the position of Director of Procedures and Standards Administration at the American National Standards Institute (ANSI) for more than eight years. In this capacity, she is the primary staff support for the work of three of the primary committees that implement the American National Standards process: the ANSI Executive Standards Council (ExSC), the ANSI Board of Standards Review (BSR) and the ANSI Appeals Board. The related program areas for which she is responsible include the accreditation and audit of standards developers (of which there are about 200), the accreditation of US Technical Advisory Groups (TAGs) to International Standards Organization (ISO), the approval of standards as American National Standards (ANS) (approximately 10,000 ANS exist) and the implementation of a multi-level appeals process. Prior to her current position, she worked for twelve years at the Human Resources Administration of the City of New York, serving in a final capacity as Director of Procedures and Analysis for the Office of Employment Services. She holds a Masters Degree in public policy.
Commissioner DeForest B. Soaries, Jr.
Chairman, Election Assistance Commission
1225 New York Avenue, N.W.
Washington, D.C. 20005

Dear Commissioner Soaries:

I am pleased to notify the Commission that the following four individuals have agreed to serve on the Technical Guidelines Development Committee (TGDC) pending financial disclosure clearance and final approval by the Election Assistance Commission (EAC):

- Dr. Ronald L. Rivest
- Ms. Whitney Quesenbery
- Dr. Daniel Schutzer
- Mr. Patrick J. Gannon

I am confident that each of these individuals will bring unique technical competence in standards development to the challenging tasks that await the TGDC. In my conversations with the nominees, they each expressed an appreciation of the importance of the guidance that they will offer the BAC as we implement the Help America Vote Act of 2002. I have enclosed their resumés and am most willing to answer your questions concerning their qualifications.

Sincerely,

Arden L. Bement, Jr.
Director

Professor Rivest is the Viterbi Professor of Computer Science in MIT's Department of Electrical Engineering and Computer Science. He is a member of MIT's Laboratory for Computer Science, a member of the lab's Theory of Computation Group and is a leader of its Cryptography and Information Security Group. He is also a founder of RSA Data Security. (RSA was bought by Security Dynamics; the combined company has been renamed to RSA Security.)

Professor Rivest has research interests in cryptography, computer and network security, and algorithms.

Professor Rivest is a Fellow of the Association for Computing Machinery and of the American Academy of Arts and Sciences, and is also a member of the National Academy of Engineering. Together with Adi Shamir and Len Adleman, he has been awarded the 2000 IEEE Koji Kobayashi Computers and Communications Award and the Secure Computing Lifetime Achievement Award. He has also received, together with Shamir and Adleman, the 2002 ACM Turing Award. Professor Rivest has received an honorary degree (the "laurea honoris causa") from the University of Rome. He is a Fellow of the World Technology Network and a Finalist for the 2002 World Technology Award for Communications Technology.

Professor Rivest is an inventor of the RSA public-key cryptosystem. He has extensive experience in cryptographic design and cryptanalysis, and has published numerous papers in these areas. He has served as a Director of the International Association for Cryptologic Research, the organizing body for the Eurocrypt and Crypto conferences, and as a Director of the Financial Cryptography Association.

He received a B.A. in Mathematics from Yale University in 1969, and a Ph.D. in Computer Science from Stanford University in 1974.

He has also worked extensively in the areas of computer algorithms, machine learning, and VLSI design.

Biography

Whitney Quesenbery is the director of the UPA Voting and Usability Project, a role she took on when she joined the board just days after the 2000 US Presidential election. This project has focused on the human side of the voting experience, and has worked to raise awareness of the need for usability and user-centered design in voting systems as with all technology. Whitney was on the advisory council for the FEC project on human factors in voting systems. A discussion group brings together usability advocates and researchers from around the world. Information is available on the UPA web site – www.usabilityprofessionals.org

In her 'civilian' life, Whitney Quesenbery is a user interface designer, design process consultant, and highly regarded speaker. She is an expert in developing new concepts that achieve the goal of meeting business, user, and technology needs. She has extensive user interface design experience and has produced award winning multimedia products, user interfaces, websites, and software applications.

She is the owner and principal consultant for Whitney Interactive Design, LLC (www.WQusability.com) where she continues the work begun during her dozen years at Cognetics Corporation. Whitney's projects ranged from online financial news retrieval to hospital management software, web applications, and corporate information tools for companies such as the TriZetto Group, FDA, Open University, Armstrong, Novartis, Deloitte Consulting, Dow Jones, McGraw-Hill, Siemens, Hewlett-Packard, and Eli Lilly.

Whitney is active in the user experience community as a member of the Board of Directors for the Usability Professionals' Association (UPA) and the past-manager of the Society for Technical Communication (STC) Special Interest Group on Usability.

Experience

2002 - Present: Whitney Interactive Design, LLC  
Consultancy in user-centered design, interface design and usability
Clients include:
• Trizetto
• ITG - Interpersonal Technology Group
• IRS
• Blackbaud

1990 - 2002: Cognetics Corporation  
Principal and Senior Vice President for Design  
Key accomplishments
• One of the primary developers for LUCID, a user-centered approach to user experience design
• Product management and documentation for Hyperties 3.0 and 4.0, released in 1992 and 1995
- Usability training and process implementation for Cognetics and clients
- Developed professional skills evaluation process for staff designers
- Principal or lead designer for design and consulting projects:
  - Web-based applications for healthcare, pharmaceutical, financial services
    - Siemens Health Systems Soarian
    - The McGraw-Hill Companies
    - ADP
    - StreamNet
    - Cynocom IAsyst
    - Con Edison
  - Intranet design and information architecture
    - McNeil
    - Novartis Consumer Health InfoWeb
    - Deloitte Consulting
    - Sanofi
  - Website design and usability
    - Eli Lilly
    - International Center of Photography
    - NSI
    - Congressional Information Systems
    - Cognetics Corporation
  - Online books and reference
    - Hewlett Packard Laser Jet 4 Travel Guide
    - The Productivity Shoppe Get Smart
    - Gale Research
    - Primary Source Media American Journey
    - Research Publications Broadcast News
    - Union Carbide Safety Manual
    - Lederle Pharmaceuticals
  - Multimedia and interactive television
    - Dow Jones Investor Network
    - Ameritech Interactive TV Prototypes
    - AT&T/Lucent PDD - Capabilities Demo
- 1977 - 1990: Theatrical Lighting Designer
  New York and regional theatre, dance and opera
  - Arden Theatre Company
  - Movement Theatre International
  - Lenox Arts Center
  - Hyde Park Festival Theatre
  - American Music Theatre Festival
  - Berkshire Ballet Company
  - Center for Contemporary Opera
  - LaMama E.T.C.
  - Laurie Anderson's United States I - IV
  - Poppie Nongena

Vice President & Director of External Standards and Advanced Technology, e-Citi, Citigroup
Financial Services Technology Consortium, Board Chairman
Chairman ISO Subcommittee 2
Fellow and Advisory Board National Academy of Sciences
Citibank, 750 Washington Blvd. 7th Floor, Stamford, CT 06901
Tel.: (203) 975-6812

Advisory Committee on Online Access and Security -- Nomination, P004807.

Currently responsible for directing and coordinating Citigroup's advanced technology efforts and Citigroup's senior representation at external organizations and standards bodies. This includes ensuring research and standards activities are properly focused and aligned with business goals and priorities; formulating and executing business-driven technology directions and strategies; providing overall management, assessment, and prioritization of research and standards activities; and keeping the Citibank highly innovative. Areas of focus include electronic banking, payments and electronic commerce, bill presentment and payment, portfolio and risk management, financial engineering and new product design, customer behavioral modeling, mathematical marketing analyses and simulations, fraud detection and control, security over computer networks. Advanced technologies under investigation include agent technology, XML, machine learning, multimedia, biometrics, image and voice processing, smart cards and secure tokens.

Previous positions include Technical Director Naval Intelligence, Technical Director Navy Command, Control and Communications, and Program Manager Sperry Rand. Also worked for Bell Labs, Syracuse University and IBM.

Currently serving as Research Professor of Information Technology at Rutgers Center of Management, Integration and Connectivity (CIMIC), and teaching part time at Iona College in New Rochelle, New York, and George Washington University in Washington D.C.

President and CEO of the Organization for the Advancement of Structured Information Standards (OASIS). In addition to serving on the OASIS Board of Directors, Mr. Gannon has served since 2000 with the United Nations Economic Commission for Europe (UNECE), as Chairman of the Team of Specialists for Internet Enterprise Development, which advises governments in transitional economies on best practices for electronic business. He also serves on the ebXML (electronic business using eXtensible Markup Language) Joint Coordinating Committee together with management from UN/CEFACT. He has worked for BEA Systems, where he served as Senior Vice President in the E-Commerce Integration Division. Prior to BEA, Mr. Gannon served as Vice President of Marketing and Industry Programs at Netfish Technologies and as Vice President of Strategic Programs for the CommerceNet Consortium, directing research and development efforts in new Internet commerce standards such as XML. While at CommerceNet, he served as the first Project Leader for RosettaNet and as Executive Director for the Open Buying on the Internet (OBI) initiative. Mr. Gannon is co-author of the book: "Building Database-Driven Web Catalogs," and is an international speaker on electronic business. Mr. Gannon has also provided guidance to governmental leaders (ministers and heads of state) on adoption of electronic business (Information & Communication Technology) strategies to facilitate economic growth; which has included Lee Teng-hui, President of the Republic of China, and Askar Akayev, President of the Kyrgyz Republic.
Dr. Bement joined NSF from the National Institute of Standards and Technology, where he has been director since Dec. 7, 2001. As head of NIST, he oversees an agency with an onsite research and administrative staff of about 3,000, complemented by a NIST-sponsored network of 2,000 locally managed manufacturing and business specialists serving smaller manufacturers across the United States.

Prior to his appointment as NIST director, Bement served as the David A. Ross Distinguished Professor of Nuclear Engineering and head of the School of Nuclear Engineering at Purdue University. He has held appointments at Purdue University in the schools of Nuclear Engineering, Materials Engineering, and Electrical and Computer Engineering.

Bement came to the position as NIST director having previously served as head of that agency's Visiting Committee on Advanced Technology, the agency's primary private-sector policy adviser and as head of the advisory committee for NIST's Advanced Technology Program. Along with his NIST advisory roles, Bement served as a member of the NSF's National Science Board from 1989 to 1995.

Bement joined the Purdue faculty in 1992 after a 39-year career in industry, government, and academia.

He holds an engineer of metallurgy degree from the Colorado School of Mines, a master's degree in metallurgical engineering from the University of Idaho and a Ph.D. in metallurgical engineering from the University of Michigan. He is a member of the U.S. National Academy of Engineering.
Arden L. Bement, Jr., became Acting Director of the National Science Foundation on February 22, 2004.

He joined NSF from the National Institute of Standards and Technology, where he has been director since Dec. 7, 2001. As head of NIST, he oversees an agency with an annual budget of about $773 million and an onsite research and administrative staff of about 3,000, complemented by a NIST-sponsored network of 2,000 locally managed manufacturing and business specialists serving smaller manufacturers across the United States. Prior to his appointment as NIST director, Bement served as the David A. Ross Distinguished Professor of Nuclear Engineering and head of the School of Nuclear Engineering at Purdue University. He has held appointments at Purdue University in the schools of Nuclear Engineering, Materials Engineering, and Electrical and Computer Engineering, as well as a courtesy appointment in the Krannert School of Management. He was director of the Midwest Superconductivity Consortium and the Consortium for the Intelligent Management of the Electrical Power Grid.

Bement came to the position as NIST director having previously served as head of that agency's Visiting Committee on Advanced Technology, the agency's primary private-sector policy adviser; as head of the advisory committee for NIST's Advanced Technology Program; and on the Board of Overseers for the Malcolm Baldrige National Quality Award.

Along with his NIST advisory roles, Bement served as a member of the U.S. National Science Board from 1989 to 1995. The board guides NSF activities and also serves as a policy advisory body to the President and Congress. He also chaired the Commission for Engineering and Technical Studies and the National Materials Advisory Board of the National Research Council; was a member of the Space Station Utilization Advisory Subcommittee and the Commercialization and Technology Advisory Committee for NASA; and consulted for the Department of Energy's Argonne National Laboratory and the Idaho National Engineering and Environmental Laboratory.

He has been a director of Keithley Instruments Inc. and the Lord Corp. and was a member of the Science and Technology Advisory Committee for the Howmet Corp. (a division of Alcoa).

Bement holds an engineer of metallurgy degree from the Colorado School of Mines, a master's degree in metallurgical engineering from the University of Idaho, a doctorate degree in metallurgical engineering from the University of Michigan, an honorary doctorate degree in engineering from Cleveland State University, and an honorary doctorate degree in science from Case Western Reserve University. He is a member of the U.S. National Academy of Engineering.
Paul W. Craft

Biographical Sketch

Mr. Craft is a true Florida native, born in Tallahassee, Florida.

He graduated from Florida State University in 1976 with a B.S. in Business and Hotel Restaurant Administration. After 6 years in restaurant management he returned to Florida State for additional work in accounting and became a Certified Public Accountant in 1986 and a Certified Information Systems Auditor in 1992.

From 1982 to 1991, he was employed as an auditor by the Florida Department of Revenue. He began as a tax compliance auditor was promoted to an audit manager. In 1987 he was picked to head a task force investigating embezzlements within the tax refund section. Using a combination of statistical sampling, internal control analysis and computer modeling the investigation concluded with successful prosecutions.

In 1991 he was hired by the Florida Department of State as a Computer Audit Analyst in the Voting Systems Certification Section. In 1994 he began managing the section. In 2001, the Florida Legislature put significant resources into elections reform including expanding the section into a bureau with Mr. Craft as Chief.

Since the early 1980's Mr. Craft has been active in the NASED ITA Board and its technical subcommittee. His Bureau of Voting Systems Certification has been instrumental in implementing Florida's 2001 election reforms, the 2002 election accessibility act, and is now implementing the provisions of HAVA.

Mr. Craft lives in Tallahassee with his wife, Debra Ann Corkhill, one bird and two cats.
Current Employment

Bureau Chief, Bureau of Voting Systems Certification, Division of Elections, Florida Department of State.

The Bureau consists of four sections:

The Voting System Section:
- establishes standards for computer based election systems, as well as testing and evaluating system compliance with existing state and federal election standards.
- provides oversight for the use of election systems by county election offices.
- provides technical assistance, expert witness, educational and management advisory services to county election offices.

The National Voter Registration Administration Section:
- provides oversight and training under the requirements of the Florida Voter Registration Act and the National Voter Registration Act.
- provides coordination for training programs and workshops conducted by the Division of Elections.
- coordinates publications for the Division of Elections.

The Data Processing Section
- designs, develops, maintains and supports users of the Divisions Of Elections' custom computer applications.
- manages the Divisions Of Elections' web presence. (See http://election.dos.state.fl.us)
- maintains and operates the Florida Statewide Voter Registration Database.
The Florida Voter Registration System Section

- design and development of the new Florida Voter Registration System for deployment in January 2006, under the Help America Vote Act.

Education

Florida State University – B.S. Hotel and Restaurant Administration. Additional work in Accounting to meet Certified Public Accountant requirements. Continuing Professional Education to maintain CPA and CISA certifications.

H. STEPHEN BERGER  
President of the General Partner  
stephen.berger@ieee.org  

PROFILE  
Professional project manager with specialization in:  

- Government and Industry Relations,  
- Advanced technology business planning,  
- Standards development and regulatory management.  

20 years of product development and technology planning experience.  
Member of the IEEE Standard Board and chair of the IEEE EMC Society  
Standards Development Committee. Currently chairs IEEE Project 1588,  
standard for voting equipment. Project management experience in  
Telecommunications, Information Technology and Instrumentation  
Industries, with strong record, in the areas of EMC (Electromagnetic  
Compatibility), RF safety and Disability Issues.  

SELECTED ACCOMPLISHMENTS  
IEEE Standards Board and New Standards Committee  
1st Vice-President, NARTE (National Association of Radio and  
Telecommunications Engineers)  
Chair, IEEE EMC Society Standards Development Committee  
Invented the EHR GTEM, patented, gained FCC approval and  
implemented its use, improving test efficiency by >80%. Awarded  
Siemens' highest award for technical contribution to the business.  
Established EMCO's electromagnetic field sensing products line base  
upon technology transfer with NIST in Boulder, Co. This product line  
grew to 15% of total revenues in 3 years.  
Current President and co-founder of the Association of Access  
Engineering Specialists (AAES)  
Member of 2 US Access Board Federal Advisory Committee:  

Telecommunications Access Advisory Committee (TAAC) (1996-1997)  
and  
Electronic Information Technology Access Advisory Committee (1998-  
1999)  

Invited presenter on disability access at EU Ministerial Conference,  
April 2000 in Lisbon, Portugal
EMC AND ENVIRONMENTAL TESTING

REGULATORY COMPLIANCE

Improved test department throughput by 5 times, with no increase in personnel. This was accomplished by extensive automation, the invention of new, patented test technology.

Increased total revenues by 15% at EMCO because of antenna and instrumentation designs

Member of key standards committees for EMC, RF Health, Accessibility and related areas.

PROFESSIONAL AWARDS

Certificate of Appreciation for RESNA for contributions to the field of rehabilitation engineering, 1997.

SHHH (Self Help for Hard of Hearing People) Friend of People with Hearing Loss 2001 award.

PATENTS

6,744,750: Replicating and Recombinant Networking Systems and Methods for Wireless Networks
6,684,063: Integrated Hearing Aid for Telecommunications Devices
6,380,896: Circular polarization antenna for wireless communication system
6,225,917: Electromagnetic Field Probe Having a Non-Electrical Transmission Modality
5,754,054: Apparatus and Method for Determining the Source and Strength of Electro-magnetic Emissions
5,589,773: System and Method for Making Electromagnetic Measurements Using a Tilttable Transverse Electromagnetic Cell and a Fixed Tilt Sample Holder
EP00805562A3: Radio-Frequency Hearing Aid Protector for Wireless Communications Products

PROFESSIONAL BACKGROUND
TEM CONSULTING, LP 2000-
Present
President of the General Partner

SIEMENS INFORMATION AND COMMUNICATIONS MOBILE 1990-
2000
Project Manager, Standards & Regulations 1999-
2000
Senior Engineer, Wireless Terminals Compliance 1999-
1999
Technical Lead, Hardware Design Assurance 1990-
1996

THOMAS-CONRAD CORP. 1988-
1990
Senior Engineer, Digital Design

THE ELECTRO-MECHANICS COMPANY (EMCO) 1985-1988
Director for Field Sensing Products

DATAPoint CORP. 1980-
1985
Engineer, EMC and environmental compliance testing

EDUCATION

BS, Physics

Biographical Sketch

Donetta Davidson, Colorado Secretary of State

"For me, growing up in a rural area really exemplified the community family, it is what inspired me to run for office. Getting involved in the Colorado Community has been one of the most rewarding experiences of my life. I highly recommend it!"

Donetta Davidson was born into a military family in Liberal, Kansas in 1943. She became a Coloradoan shortly thereafter when her family moved first to Two Buttes then to Las Animas where they settled. When ever possible Donetta spends time with her family, son Todd; daughter and son-in-law Trudie and Todd Berich and granddaughters Brittany and Nicole.

**Official Positions:**

- Bent County Clerk and Recorder, Las Animas, Colorado  
  Elected in November 1978 and served until January 1986
- Director of Elections, Colorado Department of State  
  Appointed in January 1986 and served until December 1994
- Arapahoe County Clerk and Recorder, Littleton, Colorado  
  Elected in November 1994, re-elected in November 1998, and served until July 21, 1999
- Colorado Secretary of State  
  Appointed by Governor Bill Owens on July 22, 1999  
  Elected in November 2000
- Treasurer, National Association of Secretaries of State, Elected in July 2003
- Member of the Elections Committee for the National Association of Secretaries of State
- Will serve as the President of the National Association of Secretaries of State in 2006

**Experience:**

- Elections Officer, Colorado Department of State, supervising the county clerks in all election matters pertaining to the Primary/General elections, including mail ballot; assisting with recall issues; municipal, special district, and school district elections
- Legislative liaison for the Secretary of State
- Legislative Liaison for the County Clerk Association
- Speaker at six Postal Training Seminars held in various cities, 1998
- Chairman of committee that developed the only logo ever used by election officials for mailings and a User's Guide for election officials and post offices to facilitate lower mailing costs, as well as, ensuring delivery of official election mail to electors
• Speaker, National Postal Forum, 1998
• Participant, US Postal Service National Training broadcast, 1998
• Expert speaker on the election process
• Participation on state and federal levels concerning legislative changes

Accomplishments:

• Recipient, Las Animas High School Business Department, Employer of the Year, 1984
• President, Colorado State Association of County Clerk and Recorders, 1983 to 1984
• Executive Board Member, National Association of County Clerk and Recorders, 1995 to 1999
• President, National Association of State Election Directors (NASED), 1994
• Recipient, Henry Toll Fellowship of Council of State Governments, 1993
• Member, International Association of Clerks, Recorders, Election Officials, and Treasurers (IACREOT), 1995 to 1999
• Appointment to Federal Election Commission Advisory Panel, 1995 to present
• Chairman, Legislative Committee for Colorado State Association of County Clerk and Recorders, 1996 to 1999
• Chairman, Joint Elections Officials Liaison Committee (JEOLC) Postal Service Task Force, 1997 to present
• Appointment to the Election Center Board of Directors, 1998 to present
• Appointment to the National Association of State Election Directors Voting Systems/Independent Test Authority Accreditation Board, 1998 to 2003
ALICE P. MILLER

Alice P. Miller was appointed Executive Director by the Board of Elections and Ethics in July 1996, while serving as the General Counsel for the agency. Uniquely, she served in the dual capacity and was able to sustain the major operations of the Board during two major elections: the City Council Primary and Presidential election cycles. This required maintaining and promoting the Board’s mission from both a legal and administrative perspective. Since her appointment as the permanent Executive Director in 1997, progress at the agency to date has included:

- modifying the training component of the pollworker unit to include professionally produced training videos that are used to supplement the in-house hands on training, and testing of election day workers; the video ultimately minimizes the costs for outside trainers, and ensures that all assigned election day workers receive uniform information about election day processes and procedures;

- reorganization of agency operations, including combining the data processing unit to function in conjunction with the registration processing component of the agency, thereby resulting in direct supervision and minimizing functions of the systems management branch;

- upgrading and enhancement of the 20 year old voter registration and ballot tabulation system to an optical scanning operation that will add ease to the voting process, reduce election day support requirements, and centralized daily in-house operations;

- implementing for the first time ever a major comparison of the local voter roll with contiguous jurisdictions and instituting procedures for making referrals of obvious violators to the Office of the United States Attorney for investigation and possible convictions;

- maintenance of the voter roll by implementing a data exchange program with other District government agencies to track individuals that may have failed to notify the Board of a change of address or residency; checking voter registration information by utilizing the National Change of Address Program (NCOA) and the National Social Security Death List;

- improvement of customer service through the development of the Board’s website; the continued development of the website has evolved from an initial posting of twenty-five pages in 1997 to a current posting of 1100 pages, providing information, documents and features required in any first class “Election Website”; and the website maintains a design that allows for easy navigation and is accessible to all Internet users, regardless of their expertise or the sophistication of their equipment;
• developing thorough, comprehensive, and goal-oriented annual performance plans for fiscal year operations prior to budget approval;

• installation of signa-scan or "digital signatures" as a technology upgrade to in-house operations; the module of signa-scan, a signature verification and retrieval system, is designed to decrease the time required for verifying signatures on petitions and absentee ballots, while increasing the overall accuracy of the process.

Since Ms. Miller's tenure, the agency has made significant advancements with management and administrative control through the effective use of technology, orderly planning and procedures, development of comprehensive agency annual performance plans, and continued trouble-free elections. Public confidence in the District's election system has continued to rise and increases in voter participation in the overall process has been noted.

Professional Appointments:

Vice President, National Association of State Election Directors (NASED): (2001-present), Treasurer (1999-200), Northeast Regional Representative (1998-1999); Committee on Legislative Affairs (2001-present)

Board Member, The Election Center Professional Education Program (1999-present); Co-Chair, The Committee on Ethics and Professional Responsibility, (2001-present)

Member, Metropolitan Council of Government Election Officials Technical Committee

Member, International Foundation for Election Systems (IFES), Steering Committee for Collection of Election Resources in the United States (CERUS) Project

Bar Admissions:

United States Supreme Court, United States Court of Appeals for the District of Columbia, United States District Court for the District of Columbia, and District of Columbia Court of Appeals.

Other Professional Activities:

Testimony before Congressional Black Caucus on election reform. Presenter for the League of Women Voters, District of Columbia Commission on Aging, International Foundation for Election Systems International Visitors Program,
Institute of International Education Foreign Visitors Program and The National Association of State Election Directors

Previous Employment

From 1988 to 1997, Ms. Miller served as the senior staff attorney and later the General Counsel for the D.C. Board of Election and Ethics. As the chief legal officer for the Board of Elections and Ethics, she was responsible for representing the Board in all court proceedings on matters related to the elections process and challenges thereto. In addition, she drafted and prepared for final adoption all regulations governing the election process in the District of Columbia.

Significantly, for a period of approximately eighteen month, Ms. Miller performed both the duties associated with the offices of the General Counsel and that of the Executive Director of the Board of Elections. Most importantly, the timing of this appointment of dual responsibilities came at the onset on the Council Primary and Presidential elections. Both major elections were successful and the total operations of the agency commenced without incident. The Presidential Election was eventful in that some residents of the local Georgetown area challenged the right of student voters. That challenge resulted in ongoing contentious litigation which resulted in the Board’s position of allowing students access to the franchise being continuously upheld.

Ms. Miller also worked for a brief period with the Council of the District of Columbia. She has also worked as a law clerk and later associate attorney for the law firm of Jack H. Olender and Associates, P.C.

EDUCATION

Ms. Miller received her law degree from Northeastern University. She received her B.A. degree from Boston College, graduating cum laude from the College of Arts and Sciences Honors Program.

Personal:

Ms. Miller was born in 1956 in Bethesda, Maryland, raised in Washington, DC, married in 1983, and has two children. The Millers have resided as a family in Washington, DC since 1987.
Anne Caldas
Director, Procedures and Standards Administration
American National Standards Institute
25 West 43 Street, 4th Floor
New York, New York 10036

Anne Caldas has held the position of Director of Procedures and Standards Administration at the American National Standards Institute (ANSI) for more than eight years. In this capacity, she is the lead staff support for the work of three of the primary committees that implement the American National Standards process: the ANSI Executive Standards Council (ExSC), which accredits developers of American National Standards; the ANSI Board of Standards Review (BSR), which approves standards as American National Standards; and the ANSI Appeals Board, which is the final level of appeal at ANSI. The related program areas for which she is responsible include the accreditation and audit of standards developers (of which there are about 200), the accreditation of US Technical Advisory Groups (TAGs) to International Standards Organization (ISO), the approval of standards as American National Standards (ANS) (approximately 10,000 ANS exist) and the implementation of a multi-level appeals process. Prior to her current position, she worked for twelve years at the Human Resources Administration of the City of New York, serving in a final capacity as Director of Procedures and Analysis for the Office of Employment Services. She holds a Masters Degree in public policy.
BRITAIN J. WILLIAMS

Dr. Williams is a Professor Emeritus of Computer Science and Information Systems at Kennesaw State University, Kennesaw, Georgia. Kennesaw State is a senior university in the University System of Georgia.

From 1986 to the present he has served as a consultant to the FEC Clearinghouse for Election Administration. In this capacity, he was involved in the development of the original Voting Systems Standards published in 1990 and the revision of the Voting Systems Standards that is currently underway.

From 1986 until 1988 and from 1993 until the present, Dr. Williams has served the Elections Division of the Office of the Georgia Secretary of State as a technical advisor to assure that voting systems proposed for use in the State are in compliance with the FEC Standards, the Rules of the Secretary of State, and the Georgia Election Code. He is also a consultant on matters related to voting system certification for several other states.

From 1994 until the present, Dr. Williams has served as Chairman of the NASED Voting Systems Board Technical Advisory Committee. This committee provides technical advice to the NASED Voting Systems Board on matters related to the interpretation of the FEC Voting System Standards. The NASED Voting Systems Board is responsible for the implementation of the FEC Voting System Standards.
Daniel Schutzer, Ph.D.

Vice President & Director of External Standards and Advanced Technology, e-Citi, Citigroup
Financial Services Technology Consortium, Board Chairman
Chairman ISO Subcommittee 2
Fellow and Advisory Board National Academy of Sciences
Citibank, 909 Third Avenue, 32nd floor, New York, N.Y. 10022
(212) 559 1876, Fax (212) 832 7497

Advisory Committee on Online Access and Security -- Nomination, P004807.

Currently responsible for directing and coordinating Citigroup’s advanced technology efforts and Citigroup’s senior representation at external organizations and standards bodies. This includes ensuring research and standards activities are properly focused and aligned with business goals and priorities; formulating and executing business-driven technology directions and strategies; providing overall management, assessment, and prioritization of research and standards activities; and keeping the Citibank highly innovative. Areas of focus include electronic banking, payments and electronic commerce, bill presentment and payment, portfolio and risk management, financial engineering and new product design, customer behavioral modeling, mathematical marketing analyses and simulations, fraud detection and control, security over computer networks. Advanced technologies under investigation include agent technology, XML, machine learning, multimedia, biometrics, image and voice processing, smart cards and secure tokens.

Previous positions include Technical Director Naval Intelligence, Technical Director Navy Command, Control and Communications, and Program Manager Sperry Rand. Also worked for Bell Labs, Syracuse University and IBM.

Currently serving as Research Professor of Information Technology at Rutgers Center of Management, Integration and Connectivity (CIMIC), and teaching part time at Iona College in New Rochelle, New York, and George Washington University in Washington D.C.

EDUCATIONAL BACKGROUND: BSEE, College of City of New York, MSEE and Ph.D. Syracuse University

James Elekes of Plainfield, New Jersey is an adjunct professor at Essex County College in West Caldwell, New Jersey, where he has taught political science and sociology for the past 12 years. He is also an adjunct professor at the County College of Morris. Previously, he was employed by NJ TRANSIT, the state's public transit agency, where he developed and conducted training programs for bus and rail operating and support personnel on service to passengers with disabilities. Elekes has been active in providing guidance on accessibility and disability issues to various community and civic organizations. Elekes became blind 23 years ago due to complications from juvenile diabetes. He was appointed to the Board by President Bush in 2003.

J. R. Harding, Ed.D. of Tallahassee, Florida was appointed to the Access Board in the spring of 2002 by President Bush. Active in state and local advocacy for persons with disabilities, Dr. Harding is employed by the Department of Education, Division of Vocational Rehabilitation as a Partnership Specialist for the Office of the Director. He currently represents the state of Florida and Tallahassee on a number of boards and commissions, including the Governor's ADA Working Group, the Florida Building Commission Waiver Council, the Commission for Transportation Disadvantaged, the Citizens' Advisory Council of Leon County, and he is also an active member of the Chamber of Commerce. He is a graduate of Leadership Tallahassee, class of 19 and has been living with quadriplegia for over 20 years.
President and CEO of the Organization for the Advancement of Structured Information Standards (OASIS). In addition to serving on the OASIS Board of Directors, Mr. Gannon has served since 2000 with the United Nations Economic Commission for Europe (UNECE), as Chairman of the Team of Specialists for Internet Enterprise Development, which advises governments in transitional economies on best practices for electronic business. He also serves on the ebXML (electronic business using eXtensible Markup Language) Joint Coordinating Committee together with management from UN/CEFACT. He has worked for BEA Systems, where he served as Senior Vice President in the E-Commerce Integration Division. Prior to BEA, Mr. Gannon served as Vice President of Marketing and Industry Programs at Netfish Technologies and as Vice President of Strategic Programs for the CommerceNet Consortium, directing research and development efforts in new Internet commerce standards such as XML. While at CommerceNet, he served as the first Project Leader for RosettaNet and as Executive Director for the Open Buying on the Internet (OBI) initiative. Mr. Gannon is co-author of the book: "Building Database-Driven Web Catalogs," and is an international speaker on electronic business. Mr. Gannon has also provided guidance to governmental leaders (ministers and heads of state) on adoption of electronic business (Information & Communication Technology) strategies to facilitate economic growth; which has included Lee Teng-hui, President of the Republic of China, and Askar Akayev, President of the Kyrgyz Republic.
Helen Purcell
Maricopa County Recorder
111 S. 3rd Ave
Phoenix, AZ 85003

Office: 602-506-3629
Cell: 602-390-2516
Fax: 602-506-4050
e-mail: hpurcell@risc.maricopa.gov

Helen Purcell was elected to the office of Maricopa County Recorder in November, 1988; and re-elected in November, 1992, November, 1996, and November, 2000 - the second woman to hold this position since 1871. Born in Topeka, Kansas, she has been a Phoenix resident since 1964. Mrs. Purcell began her career with T. J. Bettes Mortgage Company in Texas, subsequently becoming a Real Estate Trust Officer with Stewart Title & Trust of Phoenix. She has been a member of the Board of Directors of the National Association of Counties (NACo) since December, 1997, a member of the Board of Directors of the Kids Voting-Arizona, a member of the National Association of County Recorders and Clerks, and the International Association of Clerks, Recorders, Elections Officials and Treasurers. In May, 1998, Mrs. Purcell received the National Kids Voting Excellence Award. She is Past President of the Arizona Association of Counties and a former President of the Arizona Association of County Recorders. She is a member of The Property Records Industry’s Joint Task Force, a Subcommittee of the National Association of County Recorders, Election Officials and Clerks (NACRC), and the Co-Chairperson of the Technology Committee. She is a member of the State of Arizona’s Election Law Sub-Committee. In November of 2000, Mrs. Purcell was asked to serve on the National Commission on Election Standards and Reform, a twenty-member panel created by the National Association of Counties (NACo) and NACRC to review the American election process and make recommendations to improve it. Mrs. Purcell has two grown sons, Mark and Todd, and four grandsons.

Mrs. Purcell’s statutory duties and responsibilities include recording and maintaining, for permanent public record, 8,000 to 10,000 documents per day, and maintaining voter registration rolls for over 1,300,000 registered voters. In addition, she is responsible for administering the Elections Department that conducts all national, state and countywide elections, and provides elections support for cities, towns, schools, and other jurisdictions.

On April 3, 2000, the Maricopa County Elections Department’s Vote-By-Mail technology became part of the 2000 Computerworld Smithsonian Collection at the Smithsonian’s National Museum of American History in Washington, D. C. Nominated by Michael Dell, Chairman and Chief Executive Officer of Dell Computer Corporation, Mrs. Purcell and her Department encourage voters of America’s 5th largest county to request mail-in ballots by phone, mail, Internet, or walk-in, increasing overall voter participation as mail-in ballots grow to account for a third of the total ballots.
Professor of Computer Science at Northwestern University and co-founder of the Nielsen Norman Group, an executive consulting firm that helps companies produce human-centered products and services. Norman serves as advisor and board member to numerous companies in high technology and consumer products and to non-profit organizations in the area of policy and education.

Norman has served as Vice President of the Advanced Technology Group at Apple Computer and as an executive at Hewlett Packard and UNext, a distance education company. He is Professor Emeritus at the University of California, San Diego where he was founding chair of the Department of Cognitive Science and chair of the Department of Psychology. He is a trustee of the Institute of Design in Chicago, IL.

Norman received a B.S. degree from MIT and an MS degree from the University of Pennsylvania, both in Electrical Engineering. His doctorate, from the University of Pennsylvania, is in Psychology. In 1995, he received an honorary degree from the University of Padua (Italy).

He was one of the founders of the Cognitive Science Society and has been chair of the society and editor of its journal, Cognitive Science. He is a fellow of the Human Factors & Ergonomics Society, the American Psychological Society, and the American Academy of Arts and Sciences, the Association for Computing Machinery (ACM). In 2002 he received the "Lifetime Achievement Award" from SIGCHI, the professional organization for Computer-Human Interaction. He has been a Fellow at the Center for Advanced Studies in the Behavioral Sciences (Stanford).

Dr. Norman has published extensively in journals and books, and is the author or co-author of thirteen books, with translations into twelve languages, including "The Design of Everyday Things," and "Things That Make Us Smart." His latest book is "The Invisible Computer: Why good products can fail, the PC is so complex, and information appliances are the answer." Business Week has called this "the bible of the 'post PC' thinking." (No ties to voting. Considered a guru in the field of human-computer interactions)
Ms. Buie serves as co-director of elections for the Kansas City Board of Election Commissioners, administering policies, directives and decisions of the Board while insuring the proper conduct of all public elections in the city of Kansas City, Missouri, within the boundaries of Jackson County.

Along with her co-director, Ms. Buie is responsible for servicing over 220,000 registered voters with 26 full time, up to 50 part time, and approximately 1,600 temporary employees on election days. Typically, four to six elections are held annually.

During her tenure, she has received the industry’s highest designation of CERA, Certified Elections/Registration Administrator and she has been appointed to several Boards and Commissions:

- EAC Board of Advisors
- EAC Technical Guidelines Development Committee
- The Blunt Commission by Secretary of State Blunt
- The Blunt Commission on Election Reform
- Chair of the Missouri State Help America Vote Act Education/Training Committee
- The International Foundation for Election Systems Miami/Dade Monitoring Project
- The International Foundation for Election Systems Washington D.C. State Plan Project
- The International Association of Clerks, Recorders, Election Officials and Treasurers representative on The Election Assistance Commission Advisory Board for the Help America Vote Act

Ms. Buie also holds memberships in several organizations: The Election Assistance Commission, which is a newly established organization commissioned by the President of the United States; The Blunt Commission, which was established by Missouri Secretary of State Blunt to improve the election process, the International Association of Clerks, Recorders, Election Officials and Treasurers, The Election Center, the Missouri Association of County Clerks & Election Authorities, the National Association of County Recorders, Election Officials and Clerks, the NAACP, League of Women Voters and Citadel Gardens, Inc., a residential housing center for senior adults.
We will need to vote to appoint the TGDC. Since four of the members are our appointees with NIST, it is incumbent upon us to properly consider and appoint them.

______________________________
Sent from my BlackBerry Wireless Handheld
Fellow Commissioners,

Attached is the list and the bios of the 15 people that I will propose that we ratify as the members of the Technical Guidelines Development Committee. In addition to the electronic copies, I am also going to give you a paper version of same.

Unless I hear from you otherwise, on Thursday, June 10, I will submit a tally vote for ratification of these appointees.

Please note that those appointees with an (EAC) after their name are the appointees of which we have real discretion. Secretary Davidson (R) and Ms. Miller (D) come from the Standards board; Ms. Turner Buie (D) and Ms. Purcell (R) come from the Advisory Board (as required by HAVA).

Please let me know if you have any questions. Thanks.

BEFORE THE U.S. ELECTION ASSISTANCE COMMISSION

In the Matter of

Approval of Recommended Joint Appointments to Technical Guidelines Development Committee;
Letter Re Same to Director, NIST

CERTIFICATION

I, DeForest B. Soaries, Jr., Chairman of the U.S. Election Assistance Commission do hereby certify that on June 10, 2004, the Commission decided by a vote of 4-0 to approve the following:

1. Approval of Recommended Joint Appointments to Technical Guidelines Development Committee; Letter Re Same to Director, NIST.

Commissioners Soaries, Hillman, Martinez and DeGregorio voted affirmatively for the decision.

Date: June 10, 2004

DeForest B. Soaries, Jr.
Chairman
TALLY VOTE MATTER

DATE & TIME OF TRANSMITTAL: June 9, 2004, 10:00 AM

BALLOT DEADLINE: June 11, 2004, 10:00 AM

COMMISSIONERS: DeGREGORIO, HILLMAN, MARTINEZ, SOARIES

SUBJECT: APPROVAL OF RECOMMENDED JOINT APPOINTMENTS TO TECHNICAL GUIDELINES DEVELOPMENT COMMITTEE; LETTER RE SAME TO DIRECTOR, NIST.

( ) I approve the recommendation. — as edited

( ) I disapprove the recommendation.

( ) I object to the recommendation.

( ) I am recused from voting.

COMMENTS: See edits to spelling of Ms. Turner-Bruce's name and to the letter.

DATE: 6/9/04 SIGNATURE: [Signature]

A definite vote is required. All ballots must be signed and dated. Please return ONLY THE BALLOT to the Consulting Chief of Staff. Please return the ballot no later than date and time shown above.

FROM COMMISSIONER DeGREGORIO
MEMORANDUM

TO: EAC Commissioners

FROM: Paul DeGregorio

SUBJ: Submission for Tally Vote—Recommended Joint Appointments to the Technical Guidelines Development Committee; Letter to Acting Director, National Institute of Standards and Technology, Requesting Concurrence in Joint Appointment

I respectfully recommend that the Commission take the following actions:

1. **Recommended Joint Appointments to the Technical Guidelines Development Committee.**

That the Commission recommends the joint appointment, with the Director of the National Institute of Standards and Technology (HAVA sec. 221(c)), of the following individuals to be members of the Technical Guidelines Development Committee:

   a. Donetta Davidson
      Colorado Secretary of State
      (HAVA sec. 221(c)(1)(A)(i) (Standards Board))

   b. Alice Miller
      Director of Elections-District of Columbia
      (HAVA sec. 221(c)(1)(A)(i) (Standards Board))

   c. Sharea Turner Buie
      Director of Elections-Kansas City
      (HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))
d. Helen Purcell  
Maricopa County Recorder  
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))

e. James (Jim) R. Harding  
Member, Architectural and Transportation Barrier Compliance Board  
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

f. James Elekes  
Member, Architectural and Transportation Barrier Compliance Board  
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

g. Ann Caldas  
Director, Procedures and Standards Administration  
American National Standards Institute  
(HAVA sec. 221(c)(1)(B) (American National Standards Institute))

h. H. Stephen Berger  
TEM Consulting, LP  
Chair, IEEE SEC 38 (Voting Syst. Stds.), Institute of Electrical and Electronics Engineers  
(HAVA sec. 221(c)(1)(C) (Institute of Electrical and Electronics Engineers))

i. Dr. Brittain Williams  
Retired professor- Kennesaw State- University of Georgia  
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

j. Paul Craft  
Florida Department of State, Voting Systems Division  
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

k. Dr. Ronald Rivest  
Professor, MIT-Department of Electrical Engineering and Computer Science  
(HAVA sec. 221(c)(1)(E))

l. Dr. Daniel Schutzer  
Vice President & Director of External Standards and Advanced Technology, e-Citi, CitiGroup  
(HAVA sec. 221(c)(1)(E))

m. Patrick Gannon  
President and CEO, OASIS  
(HAVA sec. 221(c)(1)(E))
n. Whitney Quesenbery  
Director-Usability Professionals' Association  
(HAVA sec. 221(c)(1)(E))

2. Letter to Director, National Institute of Standards and Technology, Requesting Concurrence in Joint Appointments.

That the Commission approves the attached letter to the Director, National Institute of Standards and Technology, requesting that the Director concur in the recommended joint appointments to the Technical Guidelines Development Committee, and also that the Commission authorize the Chairman to sign and transmit the letter on its behalf.

Attached please find a ballot on which you may mark your vote on this matter, and instructions and a deadline for returning your vote to the Chairman.

CC: Consulting Chief of Staff
June __, 2004

Dr. Arden Bement, Jr.
Acting Director, National Science Foundation
Director, National Institute of Standards and Technology
100 Bureau Drive, Stop 1000
Gaithersburg, MD 20899-1000

Dear Dr. Bement:

On June __, 2004, the Election Assistance Commission (EAC) voted to recommend that the following individuals be jointly appointed, under 15 U.S.C. 15361, by the EAC and the Director of the National Institute of Standards Technology (NIST) to the Technical Guidelines Development Committee (TGDC):

Donetta Davidson
Colorado Secretary of State
(HAVA sec. 221(c)(1)(A)(i) (Standards Board))

Alice Miller
Director of Elections-District of Columbia
(HAVA sec. 221(c)(1)(A)(i) (Standards Board))

Sharen Turner/Buie
Director of Elections-Kansas City
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))

Helen Purcell
Maricopa County Recorder
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))
Dr. Arden Bement, Jr.
June __

James (Jim) R. Harding
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

James Elekes
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

Ann Caldas
Director, Procedures and Standards Administration
American National Standards Institute
(HAVA sec. 221(c)(1)(B) (American National Standards Institute))

H. Stephen Berger
TEM Consulting, LP
Chair, IEEE SEC 38 (Voting Syst. Stds.), Institute of Electrical and Electronics Engineers
(HAVA sec. 221(c)(1)(C) (Institute of Electrical and Electronics Engineers))

Dr. Brittain Williams

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman
Thanks for the clarification. We'll fix the bio section and resend.

Paul-

My apologies for the mis-statement. Patrick Gannon is indeed one of the approved TGDC at large members. In my attached e-mail, I meant to print Don Norman for exclusion from the TGDC bios file and for some reason typed Patrick Gannon.

Don Norman is not one of the TGDC members, Patrick Gannon is. (Norman was one of the original seven approved and vetted "at large" candidates bios originally transmitted to the EAC. We narrowed the selection to four and included Whitney Quesenbery.)

Bottom line, the TGDC voted on the correct at-large members listed in the EAC_TGDC file dated June 8, 2004. Norman's name appears only in the EAC_BIOs file.

Again, my apologies.

Allan,

I am really confused now. Are you saying that Patrick Gannon is NOT Dr. Bement's pick for the TGDC? His name and the bio we are using was with Bement's letter of April 27, 2004 which transmitted his 4 recommendations to the TGDC.

Please advise ASAP as the commission voted today to approve all members of the TGDC.
Thanks.

To: pdegregorio@eac.gov  
From: Allan Eustis <allan.eustis@nist.gov>  
Subject: TGDC Members- Incorrect Addresses

Paul-

Per my voice mail, I am listing the corrected addresses for Whitney Quesenbery and Patrick Gannon below. The file you sent with their addresses contained erroneous title lines. Also, the bio file contains a bio for Patrick Gannon who I am fairly sure is not one of the TGDC members on whom you will be voting. You will want to delete his bio.

Dr. DeForest B. Soaries, Jr.
Chairman
U. S. Election Assistance Commission
1225 New York Avenue
Suite 1100
Washington, DC 20005

Dear Dr. Soaries:

Thank you for the June 10, 2004 letter indicating the Election Assistance Commission’s affirmative vote for the fourteen members of the Technical Guidelines Development Committee.

I concur with the individuals selected to the committee by the Commission and look forward to the upcoming July meeting of the Committee.

Sincerely,

Arden L. Bement, Jr.
Director
The EAC will announce the members of the TGDC on Thursday, June 17.

I want to remind everyone that with the first meeting set for July 9, we need to do the following:

1) Get out a "save the date" e-mail to the members ASAP so they can hold their calendars for the July 9 meeting (and arrive in DC the night before). Diane Savoy is to do this by COB on June 16.
2) No later than Friday, June 18, we need to mail and fax a formal letter out from the Chairman to the members of the TGDC of their appointment and with meeting details, including information on how to make plane/hotel reservations and file any reports they are required to. John Vergelli is doing the draft, with input from Eustis, Burkhardt and Greene.
3) We need to file the Charter of the TGDC with the proper committees by next Monday. John Vergelli is working on this.
4) Federal Register notice must be published no later than June 24 (and the FR has to be notified that it is coming). Allan Eustis is responsible for this.
5) The agenda for July 9 has been drafted. I am circulating it with my fellow commissioners to make sure they are OK with it.

I am assuming that once the TGDC is up and running that NIST will handle all of the administrative functions, and coordinate with the EAC as to meeting dates and the agenda.

What am I missing?

Greetings all:

Attached is the latest draft of the letter that is to be sent to the members of the TGDC ASAP. Please review and get your comments to Diane Savoy, who will facilitate getting these letters out. Perhaps Adam can assemble the attachments. I've attached a list of the members (taken from our shared drive).

John--do we need a separate version for those appointees who will not have to file the same disclosure documents as the 6 you identified (the four scientist plus the ANSI and IEEE representatives)? Please note that I asked them to submit the forms to you.

Craig--since Alan Eustis is out until Monday, you'll need to sign off on this letter (he gave us Mary Floyd's contact information; I assume she knows this).

Adam- Please go to the following file on the shared drive to find the list of members in excel and word. Please note that the word file lists two phone numbers for each person, but does not indicate which one is the fax (you can go to the excel file to confirm which one is). Please note which number is the fax number on the word file, which is the document you should send as an attachment: 1:CLEARINGHOUSE:Help America Vote Act\Boards and Committees\TGDC

Thanks for your help.

Good morning,

For the recipients of the letter who are not financial disclosure filers, the third full paragraph (beginning "Before you begin...") should be deleted.

Having the filers send the forms to me is fine.

JCV.

Subject: Re: draft letter to TGDC appointees

All:

The letter looks good to me.

Regards,
Craig Burkhardt
Joan,

Attached is a draft of the letter that is to go to the TGDC members notifying them of the first meeting on July 9. Please show it to the Chairman so that he can see it before we send him 15 letters to sign, in case he has changes to make. Please note that there will be two versions: 6 of the 15 members will receive a letter with the 3rd paragraph shown in the attached version (financial disclosure requirement). When you have a final version, please send it to Joyce, with a cc to me, Diane, Adam and John. Joyce will facilitate merging the letters and getting them out the door.

We need to get this done ASAP. Thanks.

Paul DeGregorio

June 18, 2004

Dear [Name],

On behalf of my colleagues on the Election Assistance Commission (EAC) and of the Director of the National Institute of Standards and Technology (NIST), let me take this opportunity to welcome you and thank you for agreeing to become a member of the Technical Guidelines Development Committee (TGDC). This letter contains important information about your service on the TGDC and plans for the first meeting.

The EAC looks forward to working with you to meet the requirements of the Help America Vote Act (HAVA) by assisting in the development of voluntary voting system guidelines. Your appointment as a member of the TGDC will begin as of the date of this letter. We have included with this letter a list of all members of the TGDC so that you can become familiar with your colleagues on this crucial committee. Also attached is a copy of the portion of HAVA that governs the work of the Committee.

Before you begin your important work with the TGDC, please be aware that the Federal Advisory Committee Act (FACA) Pub. L. 92-463, 5 U.S.C. App.1, and Federal ethics laws require that you complete the attached SF-450 financial disclosure document. This document is mandated for individuals appointed to the TGDC as general experts or otherwise unofficial representatives of the appointing authority. Please complete this form by July 2, 2004 and return it to John Vergelli at the address listed at the top of this page. This form can also be accessed on-line by going to the U.S. General Services Administration web site (www.gsa.gov) and typing “SF450” in the search box at the top right-hand side of the page. Timely submission of this form will ensure that you are able to fully participate in all actions of the TGDC. Please be assured that your information will be kept in the strictest confidence according to Federal statute.
The inaugural meeting of the TGDC will be held on July 9, 2004, in Washington, D.C. at the offices of the EAC, 1225 New York Ave, NW, Suite 1100. Under HAVA, the National Institute for Standards and Technology will serve as the Secretariat for the TGDC. Accordingly, NIST will pay roundtrip airfare, hotel, per diem and local transportation expenses for you as prescribed in the Federal Government Travel Regulations. We ask that you make your travel arrangements by calling Mary Floyd at NIST at 301-975-4612. A block of rooms has been reserved at the Washington Marriott Metro Center, which is located less than two blocks from the EAC. Ms. Floyd will handle your reservations once you confirm your attendance.

The July 9th meeting will begin at 9:00 am and will continue until approximately 3:00 pm. We are planning a very tight agenda as there is a lot that we must accomplish at this first meeting. Your participation for the entire time is very important to us. We will mail and fax the meeting agenda and other materials to you the week of June 28, 2004.

Should you have any questions, please contact Mr. Allan Eustis, Project Leader, NIST Voting Systems Standards, at 301-975-5092. We look forward to seeing you on July 9th.

Sincerely,

DeForest B. Soaries, Jr.
Chairman

On behalf of my colleagues on the U.S. Election Assistance Commission (EAC) and the Director of the National Institute of Standards and Technology (NIST), let me take this opportunity to welcome you and thank you for agreeing to become a member of the Technical Guidelines Development Committee (TGDC). This letter contains important information about your service on the TGDC and plans for the first meeting.

The EAC looks forward to working with you to meet the requirements of the Help America Vote Act (HAVA) by assisting in the development of voluntary voting system guidelines. Your appointment as a member of the TGDC will begin as of the date of this letter. We have included with this letter a list of all members of the TGDC so that you can become familiar with your colleagues on this crucial Committee. Also attached is a copy of the portion of HAVA that governs the work of the Committee.

Before you begin your important work with the TGDC, please be aware that the Federal Advisory Committee Act (FACA) Pub. L. 92-463, 5 U.S.C. App.1, and Federal ethics laws require that you complete the attached OGE-450 financial disclosure document. This document is mandated for individuals appointed to the TGDC as general experts or otherwise unofficial representatives of the appointing authority. Please complete this form by July 2, 2004 and return it to John Vergelli at the letterhead address at the top of this page. This form can also be accessed on-line by going to the U.S. General Services Administration web site (www.gsa.gov) and typing “OGE450” in the search box at the top right-hand side of the page. Timely submission of this form will ensure that you are able to fully participate in all actions of the TGDC. Please be assured that your information will be kept in the strictest confidence according to Federal statute.

The inaugural meeting of the TGDC will be held on July 9, 2004, in Washington, D.C. at the offices of the EAC, 1225 New York Ave, NW, Suite 1100. Under HAVA, the National Institute for Standards and Technology (NIST) will serve as the Secretariat for the TGDC. Accordingly, NIST will pay roundtrip airfare, hotel, per diem and local transportation expenses for you as prescribed in the Federal Government Travel Regulations. We ask that you make your travel arrangements by calling Mary Floyd at NIST on 301-975-4612. A block of rooms has been reserved at the Washington Marriott Hotel.
Metro Center hotel, which is located less than two blocks from the EAC. Ms. Floyd will handle your reservations once you confirm your attendance.

The July 9th meeting will begin at 9:00 a.m. and will continue until approximately 3:00 p.m. We are planning a very tight agenda as there is a lot that we must accomplish at this first meeting, therefore we will start promptly. Your participation for the entire time is very important to us. We will mail and fax the meeting agenda and other materials to you the week of June 28, 2004.

Should you have any questions, please contact Mr. Allan Eustis, Project Leader, NIST Voting Systems Standards, at 301-975-5099. We look forward to seeing and working with you on July 9, 2004.

Sincerely,

Gracia Hillman
Vice-Chair

Diane-

Here is a final draft of the letter that went to TGDC members yesterday. You will receive a hard copy of the package as well most likely today. I am sending the letter and contents of the package to Mr. Elekes via e-mail as he is blind and the Access Board has requested we transmit all documents to him in .doc format. I will cc you on this e-mail as well with a copy to David Capozzi at the Access Board.

regards

Georgetown, TX 78628

Dear Mr. Berger:

On behalf of Dr. Arden L. Bement, Jr., and the Information Technology Laboratory at the National Institute of Standards and Technology (NIST), I welcome the opportunity to work with you as a member of the Technical Guidelines Development Committee (TGDC). The Help America Vote Act (HAVA) of 2002 sets out an ambitious nine-month task for us to meet. I will serve as the Committee’s Secretariat. Please feel free to contact me with any issues at any time.

I am including some information on our work at NIST in this package. Early next week, I will send you an agenda for our upcoming July 9, 2004 meeting as well as a straw man procedural roadmap for the TGDC. My assistant, Mary Floyd, is making final arrangements for your travel and hotel accommodations at the Marriott Metro Center Hotel, approximately two blocks from the Election Assistance Commission (EAC) Headquarters, 1225 New York Avenue, where the TGDC will meet on July 9, 2004. The Hotel, located at 775 12th Street NW, is a twenty-minute taxi ride from National Airport. We are planning a get acquainted dinner at the Metro Grille in the hotel at 7 pm on July 8, 2004. I hope you will arrive in time to attend and meet Dr. Bement, Director of NIST and chair of the TGDC.

We will begin our committee work on July 9th at 9 a.m. and end at 3 p.m. I look forward to working with you on accomplishing the tasks outlined for us in HAVA.

Sincerely,

Allan C. Eustis
Project Leader
NIST Voting Systems Standards

Juliet,  

I have taken a look at the statute and charter for some guidance on this issue. It appears that ANSI (whoever is the proper person to make the appointment) should notify TGDC through Dr. Semerjian and EAC that they wish to replace Ms. Caldas with Mr. Karmol including the effective date of the appointment. Not having the historical knowledge that you do, I am not sure that Ms. Caldas is the right person to be communicating on behalf of ANSI. Is she the appointing authority for ANSI? If so, then we can accept a letter or communication from her as the tool to make the change. If not, we need a communication from the appropriate person.

---

Juliet: Looks like we should go ahead and make the switch. As GC for the EAC, I think it is in your court, but let me know if you wish me to do anything. At the least, I suggest I have my people do the basic background vetting, which takes 3 days. Perhaps we should have Caldas send a formal message of resignation to Hratch to trigger the event. Doing so will not negatively impact TGDC operations, as Ms. Caldas was abstaining on all votes anyway. How do you think we should proceed? Regards, Craig

Subject ANSI Representative on the TGDC
Dear Craig and Allan -

In follow-up to my E-mail below and in light of Craig's confirmation at the last TGDC meeting that David Karmol may replace me as ANSI's representative on the TGDC, I wondered if official confirmation is forthcoming or needed? In addition, as David will serve as the ANSI representative going forward, his name should replace mine for E-mail and hard copy distributions.

I appreciate your efforts and thank you both for your professionalism and hard work in connection with this project.

If I can ever be of assistance to you in the future, please do not hesitate to contact me.

Regards,

Anne

Subject: ANSI Representative on the TGDC

Dear Mr. Burkhardt:

The purpose of this E-mail is to request that the official representative of ANSI on the TGDC be changed to:

David L. Karmol

Vice President, Public Policy and Government Affairs

dkarmol@ansi.org

202-331-3610

Please advise me of any steps that ANSI must take to effect this change. At this time, I intend to represent ANSI at the March 9th TGDC meeting at NIST.

Thank you for your assistance.

Sincerely,

Anne

sounds wonderful. thanks.

She is not the appointing authority. Why don't I call her and say she
should get the appointing authority of ANSI to send a letter indicating
their desired appointee to the EAC and Semerjian, also a letter of
resignation to the same parties?
Craig,

I have notified Commissioner Martinez, who is the DFO for the TGDC this year. I will work on the Turner-Buie issue today.

Subject Will have ANSI replacement vetted by Tuesday

Juliet:

We will have the vetting done on David Karmol (the ANSI replacement) on Tuesday next week. I can arrange for Semerjian to agree to the appointment immediately thereafter, and then it is just a matter for you to get assent from the EAC and issue the invitation. We can also have Hratch make the invitation, if the EAC prefers.

I know you are busy, but the EAC needs to determine if it wants to replace Ms. Turner-Buie in advance of the April meeting. She is ill with cancer, and has asked for a "leave". Unfortunately, there is no flexibility for someone to vote or meaningfully participate in her place during the meeting, so I suggest that we replace her with the understanding that the replacement will resign and she will be reappointed when she wants to return. This is one of the slots the EAC picked from its advisory board, so NIST will agree to your replacement. We can vet this person very quickly, if you wish.

Regards,
Craig
202-482-4620
This morning, moments before the TGDC meeting was to begin, I was approached by David Karmol, who indicated that he was the replacement for Anne Caldas, who resigned as the American National Standards Institute (ANSI) representative on the TGDC about two months ago. Mr. Karmol said that the letter from ANSI to the EAC/NIST appointing him as the replacement for Ms. Caldas was sent concurrently with Ms. Caldas resignation. I do recall seeing a copy of the resignation and replacement letters.

Needless to say Mr. Karmol was very upset that his paperwork was not processed in a timely manner so that he could participate in this very important meeting of the TGDC. He pressed me on the status of his paperwork and I could not give him an answer because I had no idea.

It was an embarrassing incident. As the Federal Officer for the TGDC I should have been kept in the loop and should have had an adequate answer for Mr. Karmol.

Mr. Karmol's paperwork should have been processed in an expedited manner so that he could have participated in this meeting. The fact that it was not shows that there is a serious communications and process breakdown somewhere that must be fixed. I should have been kept better informed by staff on this important manner and will insist that they do so in the future.

Paul DeGregorio
Vice Chairman
Dear Julie and Gavin:

I started today downtown and retrieved the appointment and resignation documents. They were refaxed to Gavin at his request just a few moments ago. My records show that Juliet and I telephoned and e-mailed about this in March before her vacation, during which I agreed to get the resignation/appointment letters, and perform a "basic" ethics vetting. I faxed the letters on March 29, and the vetting was completed on April 5. I communicated successful passage of the vetting and Semerjian's assent to the appointment during phone conversations with Juliet, Carol and Gavin later that week, and early the week of April 11. I also spoke with Carol about the Turner-Bouie matter, and she related the EAC would not seek to replace her at this time.

On April 12, I spoke very briefly with Caldas and Karmol, and informed them to contact Carol if there were any questions regarding when the EAC would act to issue an appointment letter. When EAC is ready to act, all it needs to do is issue the same appointment letter used during the original round of appointments. I don't have copies of those letters, but I recall they were very summary in nature.

Gavin mentioned wanting to see a resume on Karmol in his voice mail to me this morning. Consistent with our agreement that EAC recommends and reviews the organization-specific members and NIST recommends and reviews the at-large members, NIST neither requested nor reviewed any such documents on Karmol. The basic ethics vetting only picks up ethical difficulties from our database and personnel review.

Let me know if you have any questions. I am going back out to the hearing now, so call my cell if you have a priority question. Otherwise, I'll be in the office tomorrow.

Finest Regards,

Craig
Carol,  

Regarding the e-mail below.  

I have some questions regarding his recollection. I obviously can't speak to anything that occurred regarding this matter before last week, However, I do know that neither Julie nor myself were involved in a group call on the 11th.  

Such issues aside...  

I have only spoken to the man once (alone), on or about the 12-13th of April. Per my notes, I wanted four things from him. (1) a Resume or other info on qualifications, (2) Letter from ANSI, (3) Letter from Nist (which he noted may be in a casual form like an e-mail) and (4) an Example appointment letter (if he could find one).  

I have not received the above information as of yesterday.  

As for the information he faxed today, it contains only two NIST letters (1 resignation letter and 1 appointment letter). In my opinion It is missing the most important part, a letter from NIST approving the candidates. HAVA requires that the candidates be approved by both NIST and EAC. We cannot issue the candidate a final appointment letter unless we have documentation that he is NIST approved. Perhaps we may hold that the various conversations and the e-mails below constitute such confirmation. I leave that matter to you. Finally, I would note that if NIST will provide no background info on the applicant, how are we to send this matter to a tally vote (and how did they approve the person)? We would be asking the Commissioners to approve an individual for the board based solely on a three sentence ANSI representation letter.

Subject TGDC Replacement

Dear Juliet:

This is to reconfirm that Dr. Semerjian has agreed to the appointment of Mr. Karmol to represent ANSI on the TGDC. The Department of Commerce previously determined that there are no pending or significant matters between the Department and Mr. Karmol, and ethics personnel have determined that there is no reason why Mr. Karmol should not be considered for the position.

Sincerely,
Craig Burkhardt
Chief Counsel for Technology
U.S. Department of Commerce
Dear Mr. Gilmour:

Attached is my bio. Beyond what is listed in the bio, I have been a candidate for public office in five elections, three of which I won. I was an elected member of the Ohio General Assembly for two terms, and was a candidate in Virginia for Commonwealths Attorney for Fairfax County in 1995.

As this request for my appointment was submitted almost a month ago, it is indeed unfortunate that this request for my resume was not made to me at that time. I was told by Mr. Burkhart at NIST that no NIST approval was required, so it may be a good idea for you to speak to him, to determine what the requirements are. I recognize the position is relatively new, but I would appreciate this request being expedited at this time.

As I do not seem to have Mr. Burkhart's e-mail, I am copying Mr. Eustis, who I trust will share this note with Craig.

If there is anything else that is needed, please let me know, with a copy to my assistant, Diane Zielinski, who is copied on this e-mail.

The EAC has recently received ANSI's request for you to serve as its representative on the EAC's Technical Guidelines Development Committee (TGDC). As you may know, appointment as a member of the TGDC requires approval from both NIST and the EAC. In order to move forward with this process, the EAC is requesting that you send a copy of your resume for review. This resume will be used to provide information to our Commissioners, so that they may make an informed decision on your appointment. Please e-mail a copy of your resume to me.

Please let me know if you have any questions.

Sincerely,

Gavin S. Gilmour
Associate General Counsel
United States Election Assistance Commission

Tally Vote
Information dated
April 27, 2005
Julie,

Here is the info you request concerning the appointment of Mr Karmol. Hopefully you can perform some sort of tally vote on the road. Attached please find (1) Mr. Karmol's Bio, (2) A memo for the Tally Vote, (3) a proposed appointment letter, (4) the ANSI letters [two] and (5) a list of TGDC members I received from Adam. I have not enclosed a copy of Mr. Burkhardt's Email memorializing NIST's approval of the candidate, as I believe you already have this in your e-mail. Please review the proposed documents and let me know if you have any questions. Hope things are going well in Boston. Let me know if you need further action on this issue.

Tally Vote
Information dated April 27, 2005
April 26, 2005

Mr. David L. Karmol  
American National Standards Institute  
Vice President, Public Policy and Government Affairs  
1819 L Street, NW, 6th Floor  
Washington, DC 20036

Dear Mr. Karmol:

On behalf of my colleagues on the U.S. Election Assistance Commission (EAC), I would like to welcome you as a member of the Technical Guidelines Development Committee (TGDC), representing the American National Standards Institute. Your participation in this Committee has been approved by both the Director of the National Institute of Standards and the EAC.

The EAC looks forward to working with you as we labor to meet the requirements of the Help America Vote Act of 2002 (HAVA). As you know, HAVA tasks the TGDC with the job of assisting the Commission in the development of voluntary voting system guidelines. This is an important effort and we welcome your participation in the process.

I have enclosed a copy of the TGDC’s membership list for your perusal. Please refer to our website (www.eac.gov) for additional information. If you have any questions concerning your appointment, please feel free to contact me or Vice Chair Paul DeGregorio, EAC’s Designated Federal Officer to the TGDC, at (202)566-3100.

Sincerely,

Gracia M. Hillman  
Chair

MEMORANDUM

TO: EAC Commissioners

FROM: Paul DeGregorio, Vice Chairman
       U.S. Election Assistance Commission

SUBJECT: Appointment of David Karmol to the Technical Guidelines Development Committee (TGDC), representing ANSI

As you may know, on March 29, 2005 Ms. Anne Caldas, American National Standards Institute (ANSI), resigned as a member of the TGDC. (Attach. 1). That same day, ANSI proposed a replacement representative, Mr. David Karmol. (Attach. 2). The purpose of this memorandum is to provide information to the Commissioners about Mr. Karmol, such that he may be approved as a member of the TGDC.

The Help America Vote Act of 2002 (HAVA) provides for both the composition of the TGDC and the Committee's appointment process. Specifically, HAVA Section 221(c) (42 USC §15361(c)) specifies that the Committee will have in its membership one representative from ANSI. Further, HAVA states that all members of the Board are to be appointed jointly by NIST and the EAC. (See HAVA Section 221(c)(1)).

Recently, the EAC received notice that NIST (Dr. Hratch Semerjian) has agreed to the appointment of Mr. Karmol (Attach. 3). As such, upon the Commission's approval, Mr Karmol may become a member of the Standards Board. To this end, I have enclosed Mr. Karmol's biography for your review. (Attach. 4). Finally, I have also attached a proposed appointment letter for the Chair's signature. (Attach. 5).
RECOMMENDATION:

Review each of the attachments and approve Mr. Karmol as ANSI's representative to the TGDC per HAVA Section 221(c).

Attachments:
1. ANSI Resignation Letter.
2. ANSI Replacement Letter.
3. E-mail noting NIST's Approval.
4. Mr. Karmol's Bio.
5. Proposed Appointment Letter.
MEMORANDUM

TO: EAC Commissioners

FROM: Paul DeGregorio, Vice Chairman
U.S. Election Assistance Commission

DATE: April 27, 2005

SUBJECT: Appointment of David Karmol to the Technical Guidelines Development Committee (TGDC), representing ANSI

As you may know, on March 29, 2005 Ms. Anne Caldas, American National Standards Institute (ANSI), resigned as a member of the TGDC. (Attach. 1). That same day, ANSI proposed a replacement representative, Mr. David Karmol. (Attach. 2). The purpose of this memorandum is to provide information to the Commissioners about Mr. Karmol, such that he may be approved as a member of the TGDC.

The Help America Vote Act of 2002 (HAVA) provides for both the composition of the TGDC and the Committee's appointment process. Specifically, HAVA Section 221(c) (42 USC §15361(c)) specifies that the Committee will have in its membership one representative from ANSI. Further, HAVA states that all members of the Board are to be appointed jointly by NIST and the EAC. (See HAVA Section 221(c)(1)).

Recently, the EAC received notice that NIST has agreed to the appointment of Mr. Karmol (Attach. 3). As such, upon the Commission's approval, Mr Karmol will become a member of the Technical Guidelines Development Committee. To this end, I have enclosed Mr. Karmol's biography for your review. (Attach. 4)

Upon approval of this recommendation, a letter of appointment signed jointly by the Director of NIST and the Chair of EAC will be sent to Mr. Karmol to formalize and finalize his appointment.

RECOMMENDATION:
Approve Mr. Karmol as ANSI's representative to the TGDC per HAVA Section 221(c).
March 29, 2005

Dr. Hratch Semerjian
TGDC Chair
Acting Director
National Institute of Standards and Technology (NIST)
100 Bureau Drive, Stop 1000
Gaithersburg, MD 20899-1000

Re: ANSI Representation on the Technical Guidelines Development Committee

Dear Dr. Semerjian:

I respectfully resign as ANSI's representative on the TGDC. ANSI's President and CEO, Dr. Mark Hurwitz, will advise you of my replacement.

Thank you for the opportunity to work with you and the excellent NIST staff on this important initiative.

Sincerely,

Arse Caldas
Director, Procedures and Standards Administration

Re: ANSI Representation on the Technical Guidelines Development Committee

Dear Dr. Semerjian:

I am requesting that ANSI's current representative on the TGDC, Anne Caldas, be replaced by David Karmol, ANSI’s Vice President of Public Policy and Government Affairs. David's contact information follows:

David L. Karmol
Vice President, Public Policy and Government Affairs
1819 L Street, NW, 6th Floor
Washington, DC 20036
E-mail: dkarmol@ansi.org
Phone: 202-331-3610

If further information is required, please advise.

Thank you for your continuing leadership with respect to this important initiative.

Sincerely,

Mark W. Hurwitz, CAE

Subject: TGDC Replacement

Dear Juliet:

This is to reconfirm that Dr. Semerjian has agreed to the appointment of Mr. Karmol to represent ANSI on the TGDC. The Department of Commerce previously determined that there are no pending or significant matters between the Department and Mr. Karmol, and ethics personnel have determined that there is no reason why Mr. Karmol should not be considered for the position.

Sincerely,
Craig Burkhardt
Chief Counsel for Technology
U.S. Department of Commerce
David Karmol
Vice President, Public Policy and Government Affairs
American National Standards Institute (ANSI)

David Karmol currently serves as Vice President for Public Policy and Government Affairs at the American National Standards Institute (ANSI). In this position he is responsible for advocacy and outreach programs designed to better educate federal, state and local government officials on the value of the voluntary consensus standardization system and its importance to advancing the competitiveness of U.S. businesses and enhancing the health and safety of the world’s citizens.

Karmol joined ANSI in July 2001 with a thorough knowledge of the issues important to the standards and conformity assessment community and a track record of success working on policies, strategies and programs in close liaison with federal, state and local governments. Prior to joining ANSI, he spent ten years as general counsel and director of public affairs at the National Spa and Pool Institute (NSPI), an ANSI member and accredited standards developer. Karmol also served as press secretary and special assistant to the director of the United States Mint; general counsel for the Can Manufacturers Institute; associate counsel to the U.S. House of Representatives Judiciary Committee; member of the Ohio House of Representatives, and assistant prosecuting attorney in Franklin County, Ohio.

Mr. Karmol received his B.A. from Miami University of Ohio, and his J.D. from the Ohio State University College of Law and is admitted to practice law in Virginia, the District of Columbia and Ohio.

ANSI’s mission is to enhance U.S. global competitiveness and the American quality of life by promoting, facilitating, and safeguarding the integrity of the voluntary standardization system. ANSI is the official U.S. representative to the International Accreditation Forum (IAF), the International Organization for Standardization (ISO) and, via the U.S. National Committee, the International Electrotechnical Commission (IEC). ANSI currently has offices in New York City and Washington, DC.

American National Standards Institute  
Vice President, Public Policy and Government Affairs  
1819 L Street, NW, 6th Floor  
Washington, DC 20036

Dear Mr. Karmol:

On behalf of the U.S. Election Assistance Commission (EAC) and the National Institute for Standards and Technology (NIST), we would like to welcome you as a member of the Technical Guidelines Development Committee (TGDC), representing the American National Standards Institute. Your appointment is effective May 3, 2005.

The EAC looks forward to working with you as we labor to meet the requirements of the Help America Vote Act of 2002 (HAVA). As you know, HAVA tasks the TGDC with the job of assisting the Commission in the development of voluntary voting system guidelines. This is an important effort and we welcome your participation in the process.

I have enclosed a copy of the TGDC's membership list and charter for your perusal. Please refer to our website (www.eac.gov) for additional information. If you have any questions concerning your appointment, please feel free to contact Gracia Hillman, Chair, or Vice Chairman Paul DeGregorio, EAC's Designated Federal Officer to the TGDC, at (202)566-3100.

Sincerely,

Gracia M. Hillman

Ms. Jo-Anne Chasnow
Policy Director, Election Administration Program
Project Vote
6 Liberty Place, #5E
Weehawken, New Jersey 07086

Dear Ms. Chasnow:

This letter is in response to your Freedom of Information Act (FOIA) request for the list of participants who attended the April 4, 2006 "Survey Review" Meeting held at the U.S. Election Assistance Commission (EAC) office along with any minutes/notes from that meeting. Your request was received by the EAC on July 14, 2006.

Responsive records. Please find the responsive documents attached.

Please note that any future FOIA requests should be sent directly to jlayson@eac.gov or to the attention of Jeannie Layson at 1225 New York Avenue, Suite 1100, Washington, DC 20005.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Jeannie Layson
Director of Communications
U.S. Election Assistance Commission

Attachments:
1. Your Request Email (July 14, 2006);
2. Responsive Documents
This is a FOIA request.

Please provide me with a List of Participants for the April 4, 2006 "Survey Review" Meeting, along with any minutes/notes from that meeting. My organization is a non-profit.

Many thanks.

Jo-Anne

Election Day Survey Comments

- Definitions
  - State codes differ in ballots are counted
    - For example
      - absentee and early voting ballots may be consolidated at the counting site but the survey asks for the count of each type separate, there is an issue of aggregation of the data to answer the survey
  - EAC can offer states guidance on uniformity of terms to ensure comparability of survey questions answers
  - EAC can create uniform terms or use 50 different survey instruments (tailored to each state)
  - There should be an effort on asking for information that has already been collected from election administrators.
  - EAC should gather information already available to cut down on survey length.
    - For example
      - The survey asked how many votes were cast for President, House and Senate. This information is generally already available.
    - Issue if relying on existing data: Credibility
      - Suggested solution: compare the collected results to the previously published information.
      - EAC has used the previously available information to fill in survey blanks.
  - What is the purpose of the data?
    - State by state comparison?
    - Discovering national trends, then need to aggregate the data.
  - Survey Form
    - Template that assists the states in filling out the form
    - Web based survey that corrects in real time.
      - Issue
        - How survey filler will deal with questions that they do not have sufficient data to answer the question
        - Are the elections officials comfortable with a web based survey?
        - Will the elections officials know that they can save and return to the web survey (do not have to fill it all out at once)
  - EAC should require tallying software in dbx format instead of print format
  - EAC should focus data collection on states have trouble getting data, auto pilot the states that regularly submit complete data.
  - Timing of sending the survey
    - If near election day the election administrator is overwhelmed.
    - If the election administrator has advance notice of the questions they may start collecting the information that they normally would not collect.
- On many topics the administrator may have had the information at some point. Do not want to lose the information if they do not regularly keep the information
- Show the administrator how this information will help them, ie. with redistricting, to encourage participation
- Problems with questions as asked
  - Questions not applicable to some states
    - Some states used the choice of n/a while other used zero
    - Hard to determine if 0 is an answer or a n/a answer
  - Provisional voting, other issues (ie. has same day voter registration) made the questions difficult to answer
  - Roughly worded questions people interpret differently.
    - Voting units – LA County said it had 200
  - Broken counters – how truthful and accurate will the election official be in answering this question?
  - Get rid of election systems failure questions because states did not answer them.
  - Question 15 b. how is this data going to used
  - Questions on polling place accessibility
    - Some states treated 19 and 20 as the same questions, treating polling place and precincts as interchangeable terms
    - Question 21,
      - wording confusing,
      - Part A break out curbside voting
      - Should be a separate survey
- Additional questions for survey
  - Types of voting equipment by mode of voting
  - Poll workers
    - break the questions out by early voting and super centers
    - how many worked on election day
    - how many worked during early voting
    - how many were dedicated to problem voters, non problem voters
  - How many polling places did not open on time?
  - How many people work in the election offices?
- Recommendations
  - Don’t assume that things that appear obvious are without merit
  - Test the survey before sending it out.
  - Customize the survey to the state while maintaining uniformity, questions that don’t apply should not be asked of a state
  - Predesign survey to the states
  - For the 2006 survey:
    - Focus on the most important information and not go for everything
    - Take the assumptions out
    - Is the target audience state election officials?
• Yes. Send the survey to the state and allow them to send it to the county if they want and think the county can handle it.
  • Send out the information to be collected and build the web survey at a later date.
  • Build a web based survey (with ease and speed), pretesting not required
  • EAC can use the required public comment time as a form of pretest
    o Automated survey – allows the respondent to break the answer down by voting system or other factor where the state has more then one answer to the question.
    o If information from the local election official is required EAC might have to ask on election night to get the accurate information.
    o How likely is some of the information to change; ask background questions as “has there been a change”
    o Help states set a standard at the precinct level for how the information is reported.
    o Use the standards board
- Who is the audience?
  o Data Users: “Number crunchers” who want the precinct level data.
  o Survey Respondents: One survey for state and local, but different audience
    • Segment what the state is required to submit from the information the local election office need to submit
    • Currently the state is in charge of gathering the information from the locals
    • How much authority does the state have to compel a local office to supply the information?
- What is the EAC relationship with the information that the census bureau collects?
  o No formal relationship
  o Census might be able to help in filling in the holes in the data
- How do you deal with localities that do not follow the law?

UOCAVA
- Third survey of three to go the states. The second of two survey’s to request county level information. States spent their “good will” getting the election day survey information from the local officials.
- Problems
  o Number of ballots sent to potential voters is not an accurate question
  o No one knows how many Americans of voting age are living overseas. Should the EAC commission a study on the topic? Without information cannot figure out participation rate.
  o Overseas versus military no longer clear
- Additional Questions on:
  o Number of ballots not returned, a high number – why? Is there a problem:
    • Voter received the ballot late
• Ballot lost before voter received it
• Lost after voter returned it the state
• Mail delay
  o Federal Post Card Absentee’s requests
  o Innovations – faxing, internet, e-mail
    • NASED?? Website contains this information, are the states sick of
      answering these questions over and over?

- Difference between EAC and FVAP survey
  o FVAP
    • Sample of voters
    • Run by Gallop
    • Samples of election officials
- Can the EAC combine the UOCAVA survey with the election day survey?
  o Some questions are required to answered and some are discretionary
  o Web based survey might be easier to combine

NVRA
- Public Assistance Agency Data
  o Need more useful information
  o A separate form (unlike DMV), so wide spread lack of implementation
- Additional Questions
  o How many people were supposed to get a registration form from a public
    assistance agency?
    • Even if do not want to answer the question is educational.
    • State agency may not be aware it was supposed to provide the
      voter registration forms.
  o Track the decantation form from public assistance agency
- Some state public assistance agencies collect information on their voter
  registration activities.
  o Can EAC survey these agencies?
  o The individual data is private but not the aggregate data
- Problem s
  o Voter registration forms are not available in the state assistance agencies.
  o Survey is very long
  o Too many open ended questions, do not lead to comparability between the
    states.
- Can the statewide voter registration list track the data on the performance
  measurements, performance, and performance metrics?
- Put the questions mandated by law first.

Would like all the survey available in electronic form with a fips code so can merge all
the results into one database.
Notes for Meeting Election Officials

NVRA;

Problems;
Problems for Election Officials
- "politically loaded"
- collecting info that is required by law.
- questions from political parties

Questions 51 to 56;
- asking new questions...
41, 43, 44, 45, 46, (all new)

How does state answer for all counties? Each county is different.
If there is no State policy, than answers will vary.

Q 46 - "Doesn't tell you anything" - I am not sure why we asked that question.
- answer does not matter.

Could you send survey to Chief Election Official? They might know all of these answers.

Q 47 - There is only one answer that should be given

Q 48 - Needs to be removed

Q 50 - Needs to be removed
  2nd part - "database" - The question is important

The terminology needs to be more user-friendly. Sixth grade reading level.

FL - the FDLE was bad b/c it only had charges not convictions. That is reason for problems, flawed data.
  This is not their responsibility

Problems with DMV database.

Huge turnover with ST election officials since last training.
A lot of resistance from heads of DMV - not wanting to include voter registration. Going backward
  We need cooperation between social services and DMV.

Q 51 - What is purpose of the question?
  There is not one since NVRA

Q "Serial #'s" - It is interesting. Not sure if it is useful
Q 54 – needs to be removed
These are thing legislatures have been working on for the last 3 years to get rid of

Q 55 – Need to define “public”. Is it for sale or just available?

Social security numbers on voter registration
- we mark out the social security, the reporter holds the paper to the light and
retrieves the social security #.

Q 56 – Not critical

Q 42 – Not necessary

Q 18 & 19 – You will get duplicates through social services.

Send us information through email about any concerns about the questions

Q 24 What do you gain from this question?
This seems to be a carry-over question

Q 26 This seems to be the direction we are heading. Cross checking.
At least 3 or 4 laboratories are doing it.
We have vested interest – we have to report it somehow
Double voting – fraudulent registration (FL)

Q 1 & 2 – Can we define “active” and “inactive”?

There will be a glossary.

The questions are still valid but are not understood by all States.

Election Day Survey

Any questions related to voting systems will not be asked.

Recommendation; Start the survey at state level and distribute it electronically and have it
submitted electronically
- Put it on EAC website and give State’s pin number
- Potential for error with keying in information. Need to be able to electronically transfer
info.
- States reformatted survey into their own terms and sent it out to jurisdictions.
- Need to hone down what it is you really want to know. You will get more data.

Survey Questions;
- From terminology –
Q 2 number of ballots counted by state

- Do you understand question
- No.

What do you want to know?
- The first part is for the State, the second is for the jurisdictions.

Why are you asking the about the ballots counted ahead of how many ballots are cast?
- Did you want to change the order?

Blank ballots, provisional ballots cast – not counted
- We counted ballots not voters.
- You can see how the confusion

- We want # of ballots counted by state and jurisdiction.
- What is the difference between voters, ballots, etc...
  - does this include issued ballots.
  - You have cast, issued, counted
  - We have 2 ballot cards, A and B
  - Absentee ballots do not send back one of the ballots.
  - One ballot is two cards.
    - Do you count what you get back?
      The highest number.
  - We get back different numbers for Ballots A and B
  - It looks like the question is trying to cover the whole spectrum.
  - When you send out an absentee ballot and you do not get a response back.
    - We need to bring this up with the people downstairs.
  - How can we improve this
    - We need to clarify
      - I still am not sure how to ask the questions so that everyone will understand.
  - In DC we would not count absentee ballots if they are turned in late
  - What should we be tracking?
    - How many were counted, rejected,
      - Issued, Cast, Counted
  - Let's do what we think is the right thing to do and then ask the States to comply.
  - States only wants to know how many votes and how many provisional ballots.
  - The local should keep detailed election records for verification purposes.
  - We want to know how many people go to the polling place to vote, rejected ballots do not always count.
  - We need to track every vote but maybe not show them in the results (ex. Rejected ballots)
  - How many people asked for a ballot and got a ballot, including absentee.
    Will we include a question on issuing?

The media is interested by number of ballots issued and counted.
Public wants to know, Did we help America vote?
A complication, FPCA ballots. They will just show up.
- The only time you should get that is if there is a dispute.
  In 2000, the lawyers tried to stop these ballots but they were from valid voters.
Poll Worker Questions

These questions seemed to be confusing
- There is a huge range between different polling centers.
- Simplify by not asking for both State and local.
- Is there a correlation between rural and urban jurisdictions.

Proposed Questions;
Where you able to recruit the amount of poll workers you needed?
How many poll workers did not show up on election day?

We are just trying to fill the slots.
The political parties may not come through with their promised poll workers. So, election officials must scramble to get people.

How do you answer Q 11? – There are few incidents of over votes, in Texas it still happens. You cannot measure it effectively.
The voter cannot be held responsible. Blank votes are more commons – it might be a statement not an issue of confusion.

If you train poll workers to count votes, they will not count or keep a record of over votes/ blank ballots.

It seems that counting all of these things would be a part of auditing process.

A recount by hand will yield different results, optical votes may not count a vote that a person would because of voter intent.

I do not think that we will ask for over vote.

What have we not asked???
If it means undermining job security, do not ask it. You this as a guide. People will not tell on themselves.

Q 13 & 14 – do not worry about these questions.

Q 41B – It is either county of sub-county level.

Q 21C – we will not ask

Q 21B – Is that true? Yes

We do want to know that the State’s polling places are accessible. Wheel-chair accessible is an old definition. Need to clarify.

We will think about it/
Are you trying to get to compliance with these questions?
The potential format is an issue.
I like the format, it is easy.

Eliminate the paper, send it electronically. We are thinking about getting the survey online.

You will not ever stop revising this survey. Even if corrections do not make the 2006 revision, use them for 2008.

We will give you specific time at NASED.
Only one survey. About 1 hour
In addition to voting system standards

If revisions are made, will they apply to this year’s survey?
We will remove question, and use info for long term revision.

The thought of a clearinghouse for academia – Connecting info from academic and info from election officials.
Concerns form local – is this a legit group (survey)
If we can encourage people interested in this type of information to work through EAC.

Handout of current research projects current and future.

ND is proud to not have voter registration; Election Day Survey lists voter registration #’s for ND. (Brace saying that ND has 100 % registration) – This does not apply to ND

FEC did a good job representing this lack of data

Diff between citizen voting age pop and voting age pop.

Ultimately the way this data is reported in unfavorable to ND

EAC should not participate in this

UCAVA

This is a sample not a census. Required by Congress.
Are the citizens getting what they need from election officials?

Based on HAVA –

Q 6 and 8
   Why did the vote not count-signature? – If so, this is an education issue.
This can be used to formulate solutions.

Everyone received survey before election, so that the areas will know what to keep records of.

Sampling – different for larger states – Michigan

We would like for the two survey instruments to complement each other.

We (EAC) are required by law to ask how many votes are cast and counted. Response rates are low. If we need to cut the survey down to the basics than it should be a consideration.

The UCAVA survey is simple and straightforward.

The EAC and UCAVA should be using same language

Three separate survey instruments are too many.

Some jurisdictions are only counting FPCA’s.

FVAP does mention FPCA.

If you have people in active duty, they will get ballots for two elections regardless of their current status. There is no required way to get a person’s military status.

We need EAC help to explain the difficulty in getting this information.

This will become more difficult because of increasing mobility of armed forces.

It is important for election officials to track voters, through mailings. New addresses, military status.

I hope we can support getting FVAP back into electronic initiative. — UCAVA is required to create standards

   Internet is ideal for UCAVA, but not for widespread internet voting.

Secure internet voting possible

HAVA 703 – every election cycle requirements UCAVA

   There are barriers to data collections. Does this make it difficult

   It is possible to report these numbers

Did not separate absentee voters from UCAVA voters

The law is saying that the States are required to give information.
Barriers: How do the States separate absentee voters from UCAVA reports. EAC got resistance from States. 
-This was not a question that was ever required before. The other States cannot be faulted, it was not an issue to most States. 
-EAC must educate States so that the new requirement is known. 
-In most states you cannot tell an absentee vote from an absentee vote.

Meeting Part 2

Overview of meeting downstairs  
-Started with EDS, UOCAVA, then NVRA  
-Kim Brace – detailed problems with EAC and data

EDS 
-Problematic categories  
-Voting equipment  
-Accessibility

-Could the EAC take a sample? Pretest? (In order to test the instrument) Who is the primary audience? (State election official?) 
-Who should be asked to complete the survey.  
-Who are the results for? Is it the same as who is completing survey?  
-Web-based application of survey.

UOCAVA 
-Difficulties in definition of voters  
-EAC is mandated to do UOCAVA survey  
-Learn more about problems/challenges of identifying UOCAVA voter  
-Can EAC gain a better understanding of process that other agencies use to offer voter registration

NVRA 
-Too long 
-Can it be reduced to a check-off list.

Overview Election Officials

Accessibility, Voting equipment (information will be obtained elsewhere), NVRA can be shortened and simplified,

UOCAVA – most problematic, limit questions that are required by HAVA.

Generally the conclusions seem to be the same except for sampling suggestion.

Ms. Bonnie Glaser  
Election Administration Research Center  
111 Moses Hall  
Berkeley, CA 94720

Dear Ms. Glaser:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on March 23, 2006.

You requested the information from the winning, technical proposal for EAC's Request for Proposal 05-05 regarding poll worker recruitment, training, and retention pertaining to the work to be performed under the contract.

**Responsive records.** Please find the responsive documents attached regarding RFP 05-05. Some of the communications responsive to the request have been redacted in part. The removed portions contain personal information (such as home and e-mail addresses and Social Security Numbers). This redaction is required by 5 U.S.C. §522(b)(6).

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

[Signature]

Jeannie Layson  
Director of Communications  
U.S. Election Assistance Commission

1. PROVIDE A PROPOSED PROJECT WORK PLAN THAT DESCRIBES HOW THE CONTRACTOR WILL ACCOMPLISH EACH OF THE PROJECT TASKS, INCLUDING A PERT OR GANTT CHART INDICATING MAJOR ACTIVITIES AND MILESTONES. ASSUME A PROJECT START DATE OF SEPTEMBER 20, 2005. DISCUSS EACH TASK IN THE STATEMENT OF WORK.

The project work plan is outlined in the Excel chart in Attachment A. The work plan enumerates the major activities proposed to accomplish tasks specified by the Statement of Work over a 15-month period, from September 20, 2005, the project's start date, to December 31, 2006, the deadline for the final project report. The matrix in Attachment B shows the number of hours that have been allocated for the proposed activities to each member of the project team. The section details how the IFES-PI team will approach the required tasks: conducting a series of focus groups, developing an extensive manual, implementing pilot programs using strategies and materials from the manual, providing recommendations for revisions to the manual and for future activities to benefit efforts to recruit, train, and retain pollworkers. The discussion of the work plan concludes with summaries of the work experience of senior members of the proposed project team.

Project milestones are the deadlines for delivery of the following items:

Discussion of Specific Tasks
The discussion of specific tasks begins with Task 4.4 and includes a description of each task outlined in the RFP's Statement of Work and how the IFES-PI team proposes to accomplish each task.

Task 4.4 – Develop a Project Working Group
Task 4.4 requires the Contractor to develop a working group composed of 5 individuals considered experts in the fields of elections, training, education, or possess other experience deemed relevant that would assist in the administration of the project. To accomplish this task, the IFES-PI team proposes to form a Working Group composed of five members, including the following:

- An experienced state election administrator who has demonstrated a commitment to innovative pollworker recruiting and training development programs. Recommendation:
An experienced local election administrator with a demonstrated commitment to innovative recruiting and training programs. Two recommendations are:

- A representative from a public interest organization dedicated to protecting the rights of voters with limited English proficiency, e.g., the Mexican American Legal Defense Fund (MALDEF), National Association of Latino Elected Officials (NALEO) or voters with disabilities, e.g., The Access Board, the American Association of People with Disabilities or Paralyzed Veterans of America.

An experienced researcher in the area of elections. Recommendations:

The Working Group will be asked to undertake the following:

- Assist in identifying current research on State requirements relevant to pollworker programs;
- Identify best practices for pollworker recruitment, retention and training; encourage colleagues to respond to requests for information, particularly responding to a survey that will be developed to gather models and samples.
- Review summary of best practices from jurisdictions already implementing innovative or cost-saving programs and make recommendations for how to effectively share these practices in the manual
- Assist in designing questions for the focus group discussions
- Advise on the outline of the manual and review the final draft of the manual
- Review the results of the pilot programs
- Review the final report to the EAC

The Working Group will meet three times, initially in Washington, D.C., and, subsequently, at other locations around the country, preferably in conjunction with another event such as an EAC hearing or project focus group. Each meeting is scheduled to last a day. In addition, and to minimize costs, a monthly telephone conference will be conducted to brief members and solicit their feedback. Documents, including reports requiring the Working Group's review and comment such as drafts of the manual, will be submitted electronically. Members will be encouraged to return comments electronically as well.

Additional Pro Bono Advisors. Additionally, the IFES-PI team will benefit from the extensive pro bono contributions from the Pollworker Institute Board of Directors and Board of Advisors.

The Pollworker Institute Board of Directors includes:

- Beverly Kaufman, County Clerk, Harris County, Texas
- Conny B. McCormack, Los Angeles County Registrar-Recorder/County Clerk
Leonard Shablon, a D.C.-based attorney who served as counsel to congressional sponsors of the Help America Vote Act and to the Ford-Carter and Carter-Baker National Election Reform Commissions

Task 4.5 – Research State requirements for pollworkers and poll assistants
Task 4.5 requires the Contractor to review available information and where necessary, conduct research on state requirements for pollworkers and poll assistants.

Task 4.5 and Task 4.6 both require the Contractor to solicit and compile information relevant to pollworker programs, including state laws and regulations as well as local policies and practices. Because the IFES-PI team sees these two research tasks as linked, we will be using one survey instrument (described below) to accomplish both tasks.

Taken together, the results of these two research tasks will form the beginning of a data collection effort long overdue. The IFES-PI team believes that better and more accessible information about how election officials run this vital part of the election system will be invaluable as we take steps to enlarge and enhance the pool of available pollworkers.

To complete this task, the IFES-PI team will undertake the following:

- research existing information and research on State requirements for pollworkers, such as data compiled by Electionline.org and the National Council on State Legislators
- develop a web-based survey to verify the research results
- disseminate the survey, collect and compile responses from state and local election officials
- provide a written summary of the requirements and an analysis of how these requirements such as requiring political parties to nominate pollworkers or requiring that the pollworker live within the precinct can affect pollworker programs
- provide a 50-state chart containing all laws and regulations pertinent to pollworker management

The IFES-PI team intends to build on already available data such as the state-by-state pollworker requirements compiled by Electionline.org and information available from the National Association of Secretaries of State (NASS). The team will also draw from the data collected through the 2004 Election Day Survey.

Use of web-based survey. The IFES-PI team plans to develop and institute a web-based survey collection tool so that individual jurisdictions can directly enter information on the subject of this proposal. First proposed to the EAC by team member Election Data Services in their recommendations for improvements to the Election Day Survey, the survey tool will save on data entry costs associated with other paper based surveys. In addition, this will allow for immediate and on-going tallying of responses for summary reporting.

The survey instrument would be designed so that a county or jurisdiction would log in with an ID and password that would be e-mailed to them ahead of time. This ensures that only the authorized jurisdiction contact is providing valid information, and will prevent hackers from contaminating the results. This also means that the survey could be rolled out to just certain selected jurisdictions or could be opened up to allow all jurisdictions in a state to fill in their information.
The adoption of this structure allows any Census data to be joined to the instrument, or any other data that is tied to the Federal ID. All of the data already compiled from the Election Day, the National Voter Registration Act (NVRA) and the UOCAVA surveys would also be joinable to the survey if needed or when desired.

Once a jurisdiction’s representative has logged into the web-based survey we envision them being presented with some basic information about their jurisdiction, i.e., the county name, the contact information we have in the file. The representative would be able to correct and update any of the information and generate a change record for the system. The representative would then move to the survey section on pollworker recruitment, training and retention as described below under Task 4.6.

The web-based survey instrument could be used for other areas of interest to the EAC, and even other projects seeking information from local jurisdictions. We envision a representative could complete part of a survey and then come back the next day to finish the information. Each time they enter the instrument they would see all the data they have already filled out. Because this concept is interchangeable, it is incorporated in other proposals that Election Data Services is a team member.

To ensure a sufficient response rate to the survey, we will enlist the team’s extensive network of contacts, as well as the Election Center and The Pollworker Institute’s Board of Directors, in an effort to encourage states to respond. We believe that the EAC’s Advisory Board could also be a helpful partner in encouraging election officials to respond to the survey.

Task 4.6 – Review existing resources on pollworker recruitment and training

Task 4.6 is vitally important to the success of the overall program.

The decentralization of our elections makes the systematic compilation of information about both “best practices” and standard practices extremely difficult. By compiling information and materials on pollworker programs – management tools, recruitment materials, performance assessments, the EAC will provide an invaluable service to election officials. The compilation and analysis of these programs and materials will provide an important first step in the development of models that can be tested in the 2006 elections.

While it is important to gather State-level data on pollworker requirements, in reality there is great variation across multiple jurisdictions. States do make macro policy decisions on the overall conduct of elections, however, micro-level policy decisions with respect to pollworker recruitment, training, and retention are largely left to counties and in many cases municipalities. Ideally, data collection efforts will encompass these multiple levels of election policy and operation.

With more than 3,000 counties across the nation, and tens of thousands of cities, such an undertaking is obviously beyond the scope of this project. That said, this proposal suggests preliminary steps in an effort to obtain this important information. Therefore, we propose identifying 100 to 150 counties across the nation and gathering detailed information about the county, about the county’s pollworker program and about the county’s pollworkers. These counties would be selected on the basis of factors that lead to the accumulation of a representative sample.
In general, the IFES-PI team will undertake the following:

- review published pollworker recruitment, retention and training “best practices”
- reach out to the team’s network of contacts in the elections community to solicit additional pollworker program models
- review existing and ongoing research on pollworker issues
- survey state and local election officials and other stakeholders on current practices and methods to recruit, train and keep pollworkers
- identify 100 – 150 counties that can serve as a representative sample; conduct follow-on interviews to collect additional information
- gather and compile materials such as marketing materials, recruitment plans, RFP’s for outsourcing recruitment and training, timelines, and evaluations or reports
- analyze the programs using the methodology described below to identify successful strategies and potential pitfalls
- produce a written summary highlighting successful program components and problem areas

**Best practices.** Although the term “best practices” is frequently used, little systematic research has been conducted to measure the effectiveness of specific practices or methods in the area of pollworker recruitment, training and retention. Election officials and other stakeholders have relied primarily on experience and anecdotal evidence when deciding what to include in “best practices” guides. The follow-on interviews to survey respondents, the focus groups (Task 4.7) and the pilot programs (Task 4.9) present an opportunity to gather data about specific practices to enable a more accurate evaluation.

That being said, the IFES-PI team will collect best practices, such as the EAC’s “Best Practices in Administration, Management and Security in Voting Systems: A Toolkit for Election Administrators and Stakeholders” and information and materials collected for the Election Center’s Professional Practices program. The team will also make use of the comprehensive Administration and Cost of Elections (ACE) Project, developed by IFES in cooperation with the International Institute for Democracy and Electoral Assistance (IDEA) and the United Nations Department of Economic and Social Affairs (UNDESA). ACE is an ongoing project to create a globally accessible repository of information and materials on election practices, including pollworker programs.

The IFES-PI Team will solicit information and materials from counties who responded to the survey. In this effort, the team will seek out, in particular, materials targeted to working with bilingual pollworkers, such as Los Angeles County’s “Pollworker Connections” manual developed by Jennifer Collins-Foley; materials designed for working with pollworkers with disabilities, such as North Carolina’s video presentation; and materials designed for election officials who are implementing new voting systems, such as “Introducing a New Voting Systems from a Local Election Official’s Perspective,” developed by Connie Schmidt.

**Survey on standard local practices.** In addition, the IFES-PI team will review the results of the survey carried out in Task 4.5 to gain information on standard practices. We will conduct follow-on interviews with both election officials and pollworkers to gather the following information:

- description of the jurisdiction – size; demographic make-up; rural, urban or mixed
Materials collected will include:

- sample marketing materials, including materials in electronic formats such as radio PSAs, television PSAs, web-based communications
- sample training materials, such as orientation materials, training manuals, Election Day job guides and checklists, toolkits, web-based training modules
- sample pollworker communications, such as newsletters, notices, letters of appreciation, evaluation forms
- pollworker management materials, such as timelines, workplans, checklists, database spreadsheets

Research. The IFES-PI team will review existing research on pollworker programs, including, where available, reports and audits, such as the report issued by the Miami-Dade County Inspector General on the conduct of the 2002 election. The team will also make an effort to catalogue ongoing research, such as the extensive survey of pollworkers being conducted in by Professor Thad Hall at the University of Utah.

Task 4.7—Conduct Focus Groups

Task 4.7 requires the Contractor to conduct focus groups consisting of election officials, pollworkers, representatives of community-based organizations, corporate leaders who are active in encouraging employees to serve as election workers and any other relevant groups such as service clubs or charities.

The IFES-PI team will partner with the League of Women Voters Education Fund (LWVEF) to conduct a series of focus groups in five jurisdictions across the nation. The purpose of these sessions will be to identify successful strategies to use in the recruitment, training and retention of poll workers and to identify “potential pitfalls when replicating and adapting” these strategies in other localities.

In planning and conducting the focus groups, the LWVEF will:
finalize locations for focus groups
create discussion guides for each focus (preliminary discussion formats are provided below)
partner with election officials and appropriate local Leagues of Women Voters and other civic organizations to recruit focus group participants
coordinate and conduct a total of 20 focus groups in five locations across the country
draft report summarizing results of focus groups

Focus group sites. Locations will be chosen to reflect a range in jurisdiction size, geographic location, and demographic composition, as well as a range in current poll worker recruitment and training practices and election administration practices. Possible locations for focus groups include sites in California, Georgia, Kansas, Minnesota, Pennsylvania, South Carolina and Texas.

In order to identify successful recruitment, training and retention strategies, it will be necessary to obtain the views of three clusters of stakeholders: election practitioners or workforce; members of the public, that is, potential poll workers; and those intermediary groups in a position to facilitate the participation of potential poll workers—employers, non-election related government officials and school administrators. Representatives from each of these three clusters will therefore be engaged in the focus groups. Focus groups will also reflect as much diversity as possible in terms of ethnicity, gender, language, age and national origin.

The LWVF plans a total of five to eight focus groups. Each will address recruitment, training and retention issues, but to varying degrees, depending on which cluster composes the focus group. Questions will be tailored to fit the particular cluster.

The three clusters can be broken down as follows:

Members of the Public
- High school students
- Members of the public who speak English as a second language (ESL)
- Members of the public with disabilities
- Representatives of community-based organizations, including service clubs and charities

Intermediaries
- School administrators
- Local government officials that do not typically have a role in elections, such as the Department of Motor Vehicles
- Corporate leaders who are active in encouraging employees to serve as poll workers

Elections Workforce
- Poll workers
- State and local election officials
- Full time poll worker recruitment and training staff
- Temporary poll worker recruitment and training staff
- Poll worker recruiters from political parties
Focus group recruitment. The League will be responsible for focus group participant recruitment, including ensuring the necessary diversity of participants. The League's network of members and leaders in the selected focus group communities will be utilized in order to identify focus group participants from each cluster. In addition, the League's national coalition partners, such as Mexican American Legal Defense Fund, National Coalition of Black Civic Participation, American Association of People with Disabilities and the Asian American Legal Defense and Education Fund, will assist the League in identifying participants to ensure a diverse pool of participants.

Focus Group topics: recruitment. Focus group questions about recruitment will explore the different types of messages that have been or would be successful at engaging different audiences in becoming poll workers, and how these messages can be tailored to specific audiences (e.g., students, ESL, disabled). This line of questioning is aimed at developing a greater understanding of the public's knowledge gaps and barriers to involvement, and what motivating language might be used to help them overcome these barriers.

Focus group questions posed to members of the public will explore such issues as: what is the individual's understanding of being a poll worker; what challenges do they perceive to participating as a poll worker; what incentives might make participating as a poll worker attractive; what are their feelings towards mandatory vs. voluntary training; what messages might serve as a motivating call to action; how do they feel about the amount of time required of poll workers for training and on Election Day; and what other factors, such as participation in civic organizations, are indicators of likely participation. Questions will also explore citizens' attitudes and experiences with voting; their knowledge about electoral processes and being a poll worker; and the likelihood of their participating as a poll worker having been a part of the focus group process.

Focus group questions posed to election practitioners will probe their perspective on the questions above, as well as: do they currently have enough poll workers to meet their needs, including language assistance; what their current practices are for recruiting poll workers; which of their current practices seem to work the best and what are the demographics of their current poll workers; what type of media do they use (print, radio, TV, Internet, word-of-mouth) to recruit; how many times do they advertise; do they vary their methods for primary vs. general elections; the impact of allowing poll workers to "split-shifts"; the impact of election administration issues, such as early voting; and do they target certain demographics (e.g., multi-lingual citizens).

Among other things, focus group questions posed to the intermediaries will examine the possibilities of building poll worker service into student government activities or volunteer requirements; strategies for cross-training non-election related government employees for poll worker service; and incorporating poll worker service opportunities into corporate social responsibility/community service programs. Additional focus group questions will examine motivation or incentives for these intermediaries to participate.

Focus group topics: retention. Focus group questions about retention are intended to develop a greater knowledge of current retention practices used by election officials in various localities and to gauge the attitudes of current poll workers about both their service and intentions to serve.
Focus group questions posed to current poll workers about retention issues in particular will examine such matters as: whether they intend to serve as poll workers again; what they think worked well and where they see a need for improvement; and what factors affect whether they feel they want to serve again. Focus group questions posed to the other segments of the election workforce – state and election officials – will explore such issues as: what tools are used to communicate with poll workers after Election Day; the extent to which there is communications in between elections; and what type of communication would they like to receive.

Focus group questions posed to intermediaries and members of the public about retention issues will examine such things as what practices they expect a retention strategy to include and how these strategies can be built into the networks already in place (e.g. community groups, corporate activities and student-based organizations and activities).

Focus group topics: training. Focus group questions about training are intended to gain a better understanding of the range of training practices currently used in various localities, gather information about which methods work best and learn more about the needs of poll workers.

Focus group questions posed to current poll workers about training issues in particular will solicit feedback about: the type(s) of training they received (e.g. hands-on, Internet, video, role-playing etc); how many hours of training they received and was it a single or multi-day training; was training a one-type fits all for new and returning poll workers; how many times was training offered; was there compensation for training and does it make a difference in their decision to attend; and recommendations for strengthening training.

Focus group questions posed to the other segments of the election workforce (aka state and election officials, etc) will examine similar issues as well as: the current training protocols, including length of training, requirements for participation and compensation; qualifications of trainers; are trainers permanent or temporary staff and what are the costs and benefits of this; are their different training materials and/or sessions for new vs. returning poll workers or bilingual poll workers; and certification of poll workers.

Focus group questions posed to members of the public who are potential poll workers will explore such matters as what form of training they might prefer (e.g.: in-class, video for home use, role-playing, etc.) and issues similar to those as mentioned above.

Focus group questions posed to intermediaries about training issues will examine such things as the amount of time off that employers and school administrators would be willing to allow their employees for training and using corporate and/or school facilities for training.

Focus Group Results. All focus group results will be summarized; their implications for the project outcomes will also be analyzed. These results will then stand ready to inform the recommendations and materials for poll worker recruitment, retention and training that are developed in the next phase of the project and tested in the project’s pilot phase.

Task 4.8 – Develop and produce a “How to” Manual
Task 4.8 requires the Contractor to develop a manual that will be available to all interested parties that will describe best practices in the field of pollworker and poll assistant recruiting, training and retention. The contractor is also required to design the manual so that it will supplement established recruitment and training programs as well as serve as a "how to" guide for new programs.

A word on the IFES-PI approach to the manual: too often instructional guides require too much reading on the part of the user—who, in this instance, is likely to be an over-committed election official. Where possible, therefore, we will reduce the amount of narrative text, opting instead for a manual that offers a wealth of sample materials and models easily adapted by diverse users.

In creating this manual the IFES-PI team will follow the steps outlined below:

- conduct a two-day meeting of team members to review materials and information collected, review the focus group reports, draft a manual outline and develop a workplan
- submit manual outline to the Working Group and the EAC
- develop criteria for selection of materials to be included in the manual
- design a user-friendly template for each section
- draft and edit the manual (detailed below)
- develop compendium of resource materials
- submit draft manual to the Project Working Group and the EAC Standards Board and the EAC Advisory Board prior to final production

Planning meeting. The IFES-PI team will bring the Working Group and IFES-PI team together for a one-two day work session in mid-January 2006 to begin to develop the manual. The session will include:

- discussion of goals and purpose of the manual, and the universe of potential users
- discussion and review and assess the summary of state requirements and the summary of existing resources and materials, including best practices, with regard to their application to the manual
- discussion and review of focus group reports
- development of criteria for including materials or model practices in the manual
- drafting the manual outline

In order to reduce travel costs, this Working Group meeting will be held if possible before or after the Joint Election Officials Legislative Committee annual meeting in Washington, DC, when many of the Working Group and the PI Board of Directors will be in Washington.

Drafting of the manual. In consultation with the Working Group, a team of editors experienced in producing practical, user-friendly manuals will develop an initial draft. The Consultants will work separately and then together to bring together a manual that can be tested in the pilot projects.

Materials and models included in the manual. Listed below are the kinds of model programs and materials that may be included in the manual.

- Model recruitment programs such as high school student pollworker programs; bilingual pollworker programs; corporate pollworker programs; split shift options; Adopt-a-Poll programs.
Model retention programs such as pollworker newsletters; appreciation ceremonies; pollworker pins; post-election critiques involving pollworkers.

Model training approaches such as outsourcing the pollworker training to professional trainers and educators; Introducing adult learning and experiential methods such as promoting hands-on and role playing opportunities during training classes (see text box below); customized training for specific pollworker audiences such as corporate, county or student programs; on-line training programs, the set up and employment of “mock” polling place equipment in to the training, issuing training materials in advance of the training class for pollworkers to review and ask better questions as a result, better training materials such as laminated “job cards” instead of long descriptions of each pollworkers responsibilities and role.

Other innovative pollworker programs such as programs to track and evaluate pollworker performance or programs such as Early Voting which may reduce the number of pollworkers needed.

Task 4.9 – Develop and implement pilot programs.

The pilot programs will be key to ensuring the manual’s usefulness and will yield valuable information about the strategies and models recommended. Moreover, pilot programs will allow researchers an ideal opportunity to test the impact of specific recruitment and training methods.

In carrying out this task, the IFES-PI team will undertake the following:

- finalize, with the EAC, pilot program locations and partners
- develop and finalize agreements (memoranda of understanding) with all partners
- work with partners to develop a timeline for each project
- work with partners to develop and carry out recruitment plans
- conduct training workshops for election official training staff
- monitor training
- conduct Election Day activities
- conduct post-Election survey of all participants

Pilot program locations. In consultation with the EAC, locations for the pilot programs will be selected, to represent all regions of the country. In addition, at least one of the sites will be located:

- in a jurisdiction required to provide bilingual assistance at the polls under the Voting Rights Act
- in a rural jurisdiction
- in a high-density urban jurisdiction
- in a jurisdiction where elections are conducted by a small town-ship or municipality
- in a jurisdiction where the state election office plays a key role in directing and administering the pollworker program
- in a jurisdiction implementing new voting systems
- in a jurisdiction where voters from multiple precincts vote in the same polling place

Possible sites include jurisdictions in the following states: Washington, Michigan, Texas, Missouri, North Carolina or Rhode Island.
Selection of polling place partners. In order to ensure the success of pilot programs, the IFES-PI team will select potential election official partners carefully and develop a memorandum of understanding for all participating organizations to sign. The MOU may include agreements on the following:

- specific descriptions of the roles of each partner
- IFES-PI access to pollworker database and voter registration file
- materials to be provided by IFES-PI, e.g., marketing materials, PSA copy
- resources to be provided by IFES-PI such as an online training module or workshop on adult learning
- data on outcomes

Workplans. Once the MOU has been signed, the IFES-PI team will work with the partner to develop a project workplan. The project workplan would include the following:

- Timeline of deliverables
- Meeting schedules
- Staffing assignments

Timing. Pilot programs will be conducted during the 2006 election cycle, and will include June, August or September Primaries, as well as the November 2006 General Elections.

Pollworker recruitment. Strategies and action plans for pollworker recruitment will be drawn from the collection of best practices included in the manual and will be selected for testing in pilot programs according to criteria that include the following:

- innovative use of new technology
- innovative use of new media
- innovative approaches to communication with hard-to-reach sectors of the population, e.g., people with disabilities and voters with low English proficiency
- innovative approaches to specialty recruitment drives

The IFES-PI team anticipates that some recruitment strategies will be common to all pilot projects, e.g., specialty recruitment drives, while others may be used in only one jurisdiction, e.g., recruitment of bilingual voters or web-based recruitment.

Training. Despite the critical importance of training those people who will be making sure that eligible citizens can cast their vote and have that vote counted accurately, pollworker training is low on the list of election official priorities. Often, the staff responsible for training has no relevant experience in adult training. In some jurisdictions, officials have brought in professional trainers to develop materials and conduct the training, recognizing that training requires specialized, professional expertise.

Too often, training consists of nothing more than a simple review of manuals. The time allotted does not allow for using techniques, such as hands-on demonstrations and role-playing, proven to promote better understanding and retention.

Professionalizing and improving training could significantly improve the conduct of elections. For this reason, the IFES-PI team will bring in an expert in adult learning techniques to conduct training workshops for appropriate staff.

The IFES-PI team anticipates that some training methods will be common to all pilot programs, e.g., the use of hands-on role-playing, a mock polling place and job guides, and some may be used in only one jurisdiction, e.g., online training modules.
Pollworker retention. Pollworker retention can only be accurately measured from one election cycle to the next. The IFES-PI team will implement pollworker retention strategies as part of the pilot program; however, we will not be able to evaluate their effectiveness in the course of this project.

Reporting results. Prior to conducting the pilot programs, we will develop a research plan to define the variables and measurable outcomes. At the conclusion of the pilot programs, we will survey the participants and provide a report on each pilot program.

Task 4.10 – Make recommendations for future action regarding college pollworker programs
At the conclusion of this project, the Contractor is required to provide the EAC with written report on the project. This report will include specific lessons learned, recommendations for revision of the manual developed for the project, and recommendations for future activities in support of college pollworker programs.

The IFES-PI team will carry out the following to complete Task 4.10:

- review the pilot project reports and data
- conduct follow-on interviews with selected participants
- draft report
- disseminate draft to Working Group and team members for comment
- submit edited draft report to EAC for review
- edit and submit final draft

The IFES-PI team will provide a draft of the report for review before producing the final report. The IFES-PI team shall provide to the EAC one electronic copy (in an agreed upon format) and ten hard copies of the final report.

2. PROVIDE A MATRIX OF PERSONNEL PROPOSED FOR EACH TASK AND INCLUDE RESUMES FOR ALL PROFESSIONAL PERSONNEL. RELEVANT EXPERIENCE IN ELECTION MANAGEMENT AND TRAINING MUST BE INDICATED CLEARLY.

EAC RFP #05-05, EFFECTIVE STRATEGIES AND BEST PRACTICES FOR POLL-WORKER RECRUITMENT, RETENTION AND TRAINING

Dear Ms. Mortellito:

IFES and the Poll-Worker Institute (PI) are pleased to submit this proposal to the U.S. Election Assistance Commission (EAC) in response to RFP #05-05 for program development, analysis and assistance in identifying and promulgating effective strategies and best practices for poll-worker recruitment, retention and training. This submission consists of two documents: a technical proposal and a cost proposal. The cost proposal includes PI’s budget as it will be IFES’ subcontractor whose budget exceeds $100,000.00.

IFES and PI have assembled a highly qualified team of election administrators, researchers, analysts and advocates to work on this exciting project, whose results will represent long-lasting and positive contributions to the election community nationwide.

The principal contact for this proposal is Scott Lansell, IFES Senior Program Director; 1101 15th Street, NW, Third Floor, Washington, DC 20005; Phone: (202) 350-6704; E-mail: slansell@ifes.org.

Sincerely,

Donna Fox
IFES Acting President

Enclosures: Technical Proposal
IFES Cost Proposal
PI Cost Proposal
Project Management: The proposed project team will be led by Jennifer Collins-Foley who will serve as the project's Principal Investigator. Other senior members of the proposed project team are as follows:

- Election Consultant Tracy Warren: Executive Director of The Pollworker Institute and election reform consultant.
- Election Consultant Connie Schmidt, former County Clerk, Johnson County Kansas
- Academic and Research Consultant Elizabeth Bergman, PhD, Professor at California State Polytechnic
- Election Consultant Charlotte Cleary, former General Registrar in Arlington County, Virginia
- Research and Data Collection Consultant, Kim Brace of Election Data Services
- Program Management Officer Mario Henriquez,
- Senior Researcher, Karen Buerkle, IFES Applied Research Center
- Advocacy Consultant, Jeanette Senecal, League of Women Voters Education Fund
- Adult Learning Expert

The project team will also benefit from the advisory and administrative support personnel of IFES and a graduate research assistant from American University as well as from the Board of Directors and Advisory Board of The Pollworker Institute. The qualifications of the principal investigator are discussed later in this proposal. Experience summaries for the other seven senior members of the project team are as follows:

Elizabeth Bergman.
Dr. Bergman is currently Adjunct Professor of Political Science at California State Polytechnic University, Pomona, where she has taught for three years, and where she was recently awarded a Faculty Mini-Grant to support the incorporation of civic volunteerism into Political Science courses. Dr. Bergman has been active in local and statewide politics for more than 10 years, serving on campaigns and as a lobbyist in Sacramento; most recently as a consultant to the Association of Los Angeles Deputy Sheriff's (1996-1997). As a consultant for the American Psychological Association (1993-1994), Bergman advised the member associations in California, Oregon, and Washington on effective mobilization techniques, grassroots organization, and political communication related to healthcare issues. In 1992, Bergman co-founded a Los Angeles political non-profit 501(c)(3) for the twin purposes of providing campaign training...
and fundraising assistance to women running in local elections. She has been recognized for her work in numerous publications, including the Los Angeles Times, and on local radio.

Kim Brace
Kim Brace, founder and president of Election Data Services, Inc., has 25 years of experience with the development and delivery of election-related products and services. Mr. Brace was the principal investigator for the project providing survey analysis support to the EAC in 2005 and managed several studies on voter registration systems for the Federal Election Commission and the three state boards of elections and election departments from 1995 to 1998. He supervised the development the GIS-based PRECIS® Precinct Information System as well as the construction and maintenance of nationwide databases of election returns, electoral district boundaries, and voting equipment. Mr. Brace has conducted congressional reapportionment studies and also has supervised the construction of databases for redistricting and the delivery of redistricting consulting services to some 35 redistricting commissions and state and local legislative organizations throughout the United States.

A nationally recognized expert on redistricting, the census, and election administration, Mr. Brace has delivered speeches, conducted workshops and seminars, and participated in international election conferences. He maintains affiliations with organizations such as the American Political Science Association and the Association of Public Data Users. In 1992 he edited The Election Data Book: A Statistical Portrait of Voting in America (Bernan Press). Prior to founding Election Data Services, he was an associate editor of the biweekly newsletter, Election Administration Reports. Mr. Brace is a graduate of American University in Washington, D.C.

Karen Buerkle
Dr. Buerkle is a seasoned practitioner of general and special population surveys and has surveyed such hard-to-reach populations as U.S. Senate-confirmed presidential appointees, school-based health practitioners, and local government officials in Pakistan. In her capacity as senior researcher, she formulates original research projects and implements research projects in conjunction with IFES programmatic activities. Her primary responsibilities include survey and sample design, questionnaire construction, project management, and survey data analysis. Dr. Buerkle also specializes in teaching research methods and helping indigenous research organizations build their research capacity.

Charlotte Cleary
Charlotte Cleary served as General Registrar for Arlington County, Virginia from 1985 until 2003. As General Registrar, Cleary administered the elections, including developing and conducting training programs for staff and pollworkers and writing the office procedure manual. Cleary has served on State and national committees relating to elections, including Member, Federal Election Commission Advisory Panel, 1990-2003; the Joint Election Officials Legislative Liaison Committee, 1997-2003; the Voter Registrar Association of Virginia, 1985-2003; the International Association of Clerks, Recorders, and Election Officials 1987-2003; and the Election Center 1990-2003. Cleary’s presentations include “Getting To and Through Election Day, a Step by Step Guide” for the VA State Board Training of Election Officials; Accessibility for the Disabled, at the Performance Symposium; and “Public Relations for Election Day & Communicating with Your Voters, VRAV Panel.

Jennifer Collins-Foley
(See “Principal Investigator’s qualifications” below.)
Mario Henriquez
After receiving his education in International Relations and Global Systems from George Mason University, Mario Henriquez began working for IFES in 1998. Starting as a program assistant working on projects in Haiti and San Salvador, Mario rapidly ascended the management ladder at IFES culminating with his most recent promotion to the position of Program Officer in 2002. As program officer, Mario has worked with direct supervision from the director of programs, overseeing projects in Honduras, Guatemala, Dominican Republic, Iraq, Jordan, Haiti and other parts of the Americas. Mario recently began focusing on the relatively new territory of U.S. elections. With experience in both Washington and the field, Mario plays a vital role at IFES where his language skills and background help the organization continue to reach its goals.

Jeannette Senecal
Jeannette M. Senecal is currently the Senior Manager of Elections of the League of Women Voters Education Fund. Ms. Senecal originally joined the League staff as part of the e-democracy team. Her primary focus was building the League’s DemocracyNet project, a first of its kind voter information website designed to disseminate candidate and other election information for local, state, and federal elections nationwide. Jeanette recruited, trained and oversaw the work of over 500 employees and volunteers nationwide working on DemocracyNet.

As Senior Manager of Elections, Jeanette manages and coordinates various get-out-the-vote, election reform, and civic engagement activities, including efforts to engage new and underrepresented citizens, and educate League leaders and other interested parties on the implementation of the Help America Vote Act. Ms. Senecal provides technical assistance and training to Leagues through written materials, phone consultation, online discussion and field trainings to support these activities.

Tracy Warren
Tracy Warren has more than 15 years of experience in public policy, focusing on campaigns and elections, good government and constitutional issues. She served as director of the Constitution Project’s Election Reform Initiative until January 2003. Her election reform background and capabilities include: detailed knowledge of the Help America Vote Act; broad knowledge of state election law and procedures; skills in research and analysis, consensus-building and communications; and a network of contacts that include state and local election officials, congressional staff, voting rights advocates and policy experts. Following passage of the Help America Vote Act, Ms. Warren consulted on implementation with the District of Columbia and Puerto Rico. She has researched, written and published articles and reports on interpreting and implementing the new law. She has provided consulting services for the U.S. Election Assistance Commission, drafting a report on the EAC’s first public hearing on voting technology and security issues. She assisted in compiling, drafting and editing a “tool kit” of best practices in election administration for the EAC. Warren worked with HAVA Partners to develop a template for the online management and training of pollworkers. The HAVA Partners program was deployed in Arlington County, Virginia, in 2004.

Connie Schmidt
Connie Schmidt recently retired as the Election Commissioner for Johnson County, Kansas, after being appointed to that position in 1995 by Kansas Secretary of State, Ron Thornburgh. She has been an active and innovative local official for 31 years, during which time she has received a number of important awards. Most recently, she received in December 2004 the National Association of Secretaries of
State (NASS) Medallion Award for outstanding service to American Democracy. As Election Commissioner for Johnson County, she introduced many new voter outreach and education programs, including one of the first election office web sites. She has served as the chair of the Professional Education Program Certification Boards for The Election Center and as a member of the Voting Systems Standards Board of the National Association of State Election Directors (NASED).

3. PROVIDE A BRIEF DESCRIPTION OF THE QUALIFICATIONS OF THE PRINCIPAL INVESTIGATOR RELATIVE TO PERFORMING THE TYPES OF ACTIVITIES DESCRIBED IN THE STATEMENT OF WORK.

Jennifer Collins-Foley has more than 16 years of experience developing and managing international and domestic local democratic governance programs, training and voter registration/outreach/education programs.

She recently consulted on election administration and policy for the League of Women Voters of the U.S (a survey of implementation of federal legislation) and for the U.S. Election Assistance Commission ("Best Practices in Election Administration and Management"). As a consultant for the International Foundation for Election Systems (IFES), Collins-Foley, developed pollworker training materials, training curriculum and election management recommendations for the Republic of Kyrgyzstan, the Republic of Tajikistan, Miami-Dade County, Florida, and the District of Columbia.

Collins-Foley served as Assistant Registrar Recorder/County Clerk for Los Angeles County, CA, where her responsibilities included recruiting and training 22,000 pollworkers and managing 5,000 polling places (1996-2004). Collins-Foley was Director for the National Democratic Institute in Moscow, overseeing democratic institution building and training in Russia (1994-1996) and also Program Officer for Central and Eastern Europe, United Nations Division on Economic and Social Development (UNDESD) (1989-1992). In 2003, Collins-Foley authored a practical manual for election administrators titled "Pollworker Connections: Specialty Recruitment for Student, County Employee and Bilingual Pollworkers."

Three examples of comparable work performed by Collins-Foley over the past five years are as follows:

1) "Pollworker Connections": A Manual on Specialty Recruitment for Student, County, and Bilingual Pollworkers (2003)

The "Pollworker Connections" manual was first developed in February 2002 for a training session conducted by Collins-Foley at an Election Center program. The target audience was election officials seeking new ways to recruit, retain and train a new crop of pollworkers to shore up the diminishing pool of veteran pollworkers. It was updated in 2003 to reflect lessons learned and to include new materials.

EAC RFP 065-05 EFFECTIVE STRATEGIES AND BEST PRACTICES FOR POLLWORKER RECRUITMENT, RETENTION AND TRAINING
Period of performance: February 2002-May 2003
Value of award: Self-funded by County department

Collins-Foley led a team that included Tracy Warren and Thomas Wilkey in coordinating a working group of local election officials to develop a compilation of best practices. The EAC published the toolkit prior to the 2004 election to assist local election officials confront a series of challenges, including new security concerns.

Project sponsor: U.S. Election Assistance Commission
Reference: Commissioners DeGregorio and Martinez
Telephone: (202) 566-3100
Period of performance: May 2004- August 2004
Value of award: $5,000

3) Introduction and implementation of specialty recruitment programs in Los Angeles County, California

As Assistant Registrar-Recorder/County Clerk for Los Angeles County, California, Collins-Foley was responsible for the recruitment, retention and training of 22,000 pollworkers deployed to 5,000 polling places on Election Day. In this position, Collins-Foley implemented a number of innovations in the county’s pollworker program. Most pertinent to this proposed project, Collins-Foley was instrumental in launching a series of specialty pollworker recruitment programs including programs to recruit high school pollworkers, county pollworkers, college pollworkers and bilingual pollworkers. These specialty recruitment efforts are now responsible for the recruitment of 66 percent of the county’s 22,000 pollworkers.

Period of performance: November 2000-March 2004
Value of award: N/A

4. PROVIDE FIVE (5) EXAMPLES OF COMPARABLE PROJECTS PERFORMED BY YOUR ORGANIZATION IN THE PAST FIVE (5) YEARS. BRIEFLY DESCRIBE HOW EACH EXAMPLE IS RELEVANT TO THE WORK REQUIRED. INCLUDE PROJECT TITLE, SPONSORING ORGANIZATION, THE SPONSOR’S PROJECT MANAGER WITH TELEPHONE AND EMAIL CONTACT INFORMATION, PERIOD OF PERFORMANCE AND THE VALUE OF AWARD. 3 PAGES/EXAMPLE

The Pollworker Connections pollworker program training manual was first developed in February 2002 for a training session conducted by JCF at an Election Center program. Collins-Foley designed the kit for election officials seeking new ways to recruit, retain and train new pollworkers. The manual included recruitment strategies to help expand and enhance the diminishing pool of pollworkers. The manual was updated in 2003 to reflect lessons learned and to include new materials.

Period of performance: February 2002-May 2003
Value of award: self-funded by County department

II. IFES: Recruitment and training of pollworkers for the District of Columbia Board of Elections and Ethics for the 2004 Presidential Election

The 2004 Pollworker Training and Recruitment Project, undertaken on behalf of the Government of the District of Columbia's Board of Ethics and Elections (BOEE or the Board) and directed by IFES Project Manager, Gwenn Hofmann, was designed to meet the specific training requirements of the Help America Vote Act (HAVA), a Federal law enacted in 2003. Additionally, the Board sought to address future BoEE needs for Pollworkers, especially those who speak Spanish. The Board, a permanent electoral body, is responsible for administering elections in Washington, D.C., a federal district and capital of the United States of America. The period of performance of the project was July 20, 2004, to January 31, 2005.

It has been standard Board practice that every Pollworker in the District of Columbia be trained regarding new laws, procedures, and requirements prior to each election. New in 2004 was the requirement that this training include orientation to provisions of the new HAVA law, especially educating Election Day workers regarding their responsibilities and limits with respect to technical aspects of voter education and assistance.

The training program developed by IFES for the September 2004 Primary Election and the November 2004 General Election included the new requirements of the HAVA as well as a review of all legal and procedural requirements of the Board. HAVA mandated that specific training be given to poll workers so that they would have an understanding of what constituted a "provisional ballot"; the qualifying and processing of voters; how to ensure that every voter had information pertinent to the types of voting equipment options, and to explain to voters how and when their votes would be counted. The training program included information about the two types of voting equipment, (Optical Scan and Direct Electronic) and the audio system of voting for visually impaired voters. For many voters and poll workers, this election cycle was the first time the Direct Electronic with audio voting capability was used.

Project name: IFES Pollworker Training and Recruitment Project
Awarded by: District of Columbia Board of Elections and Ethics
Project manager: William O'Field, Public Information Center, (BOEE)
Elizabeth Bergman, Ph.D.: California State Polytechnic University Student Pollworker Recruitment '04

California State Polytechnic University (Cal Poly Pomona) and the Los Angeles County Registrar Recorder/County Clerk’s office (LACRR/CC) developed a program to recruit and train college students to serve on Election Day 2004. The program covered two quarters of the school year, beginning in the summer and extending into the fall quarter of 2004. Students were recruited from Introduction to American Government courses. A total of five classes with 300 students were given the opportunity to participate in the program. More than 120 Cal Poly students participated in the traditional pollworker training program. The program offered students both “extra credit” and financial remuneration. Extra credit equivalent to 5% of the course grade was offered to participating students. In order to receive the extra credit, students were required to attend a two-hour training session and complete a 30-question survey that addressed their motivation for participating in the program, their level of political awareness, and their attitudes about civic duty. Class extra credit and pollworker service were decoupled because the summer courses and training were conducted “off cycle.”

In addition, the LACRR/CC paid participating students $25 for attending the two-hour training and $55 for being a pollworker on Election Day. The financial payment was conditioned on participation in both the training and pollworker activities; students could not collect partial payment for partaking in only one element of the LACRR/CC program. Training was conducted and curriculum provided by the LACRR/CC. The training occurred at a facility located on the Cal Poly campus. Training curriculum and trainers were the same as those utilized by the County to train all other pollworkers. Forty-four students served as pollworkers on Election Day November 2004.

Value of award: self-funded by university

Election Data Services: EAC Survey Analysis Support (2005)

In February 2005, Election Data Services (EDS) was contracted by the EAC to provide assistance with tabulating, analyzing and reporting the results of three surveys conducted by the EAC: the Election Day survey, Military and Overseas Absentee Ballot survey and the National Voter Registration Act (NVRA) survey. Responses to the survey covered 6,568 local election jurisdictions. The project included an analysis of some 43 survey questions. The results were reported in a series of 14 data tables covering voter registration and turnout, absentee voting, provisional ballots, voting equipment, pollworkers and the
accessibility of precincts. A report of the survey findings included some 40 recommendations on future data collection.

V. The Pollworker Institute: A Report to the Pew Charitable Trusts Exploring the Feasibility of Initiatives to Improve and Strengthen the Nation's Voter Registration Systems

In 2005, The Pollworker Institute was contracted by the Pew Charitable Trusts to survey state and local election officials and a broad spectrum of elections stakeholders on voter registration issues and approaches to making voter registration lists more secure and accurate. Jennifer Collins-Foley, working with Tracy Warren, conducted extensive interviews with elections officials to gather information innovative models and registration practices. The results of these conversations were compiled into a reader-friendly report with a concise list of potential actions and research projects.

5. DISCUSS WHAT YOU CONSIDER THE THREE (3) MOST SIGNIFICANT RISKS FOR SUCCESSFUL COMPLETION OF THE PROJECT. EXPLAIN WHY YOU FEEL EACH IS A RISK AND HOW YOU PLAN TO MANAGE THESE RISKS.

The three most significant risks to this project – both the development of a user-friendly manual suitable for users that include both election officials and academic partners and pilot projects in geographically and demographically diverse locales – are as follows:

- Potential problems in recruiting local partners for pilot projects
- Potential problems in recruiting appropriate focus group participation
- Potential cost overruns

Local election officials are universally short on resources and time, and at the very moment in the election cycle when recruitment and training of pollworkers begins, all the other demands of running an election rise exponentially. In the 2006 elections, these demands will be even heavier owing to HAVA's January 2006 deadlines for the implementation of new voting systems and statewide registration systems. Elec-
tion officials will likely want pollworker recruitment and training to be as efficient and trouble-free as possible. Accordingly, the challenge of implementing a new recruitment and training programs may seem daunting. The IFES-PI team anticipates that it may be difficult under these circumstances to recruit partners for the pilot projects.

The IFES-PI team, which has experience in creating and facilitating these partnerships, seeks to mitigate this risk by enlisting the extensive network of election official contacts and by offering potential partners an array of resources — templates, materials, timelines, training workshops and, not least, labor — that can reduce the burden of implementing a new program. The IFES-PI team believes the projects will only be successful if the local election official is fully committed to making the project work and overcoming the hurdles of complicated logistics, demanding schedules and unfamiliar tasks and people. The team will educate all potential partners in the requirements, risks and benefits before asking for a commitment. Once the partners agree to commit, the team will require partners to sign a memorandum of understanding defining tasks and timelines for the project.

The IFES-PI team anticipates that it may be difficult to recruit participants and, equally important, recruit participants in adequate numbers from each of the stakeholder groups. The League of Women Voters Education Fund, with access to local Leagues and other civic groups across the country, has a proven ability to reach into the community and engage members in civic participation. In addition, Karen Beurkle

This project has several components and many variables. Accordingly there is a risk that any one of the tasks will consume more hours than allowed for in the proposal. The IFES-PI team will be tracking the time and money spent and reviewing the status of the project on a monthly basis. By prompt action, we will be able to take immediate steps to address the cause of the cost overrun. In addition, we may modify the workplan accordingly. Some potential modifications include: changing focus group locations to less expensive sites and seek other options for reducing the travel costs associated with this project.

6. Discuss the top five (5) reasons that make your team the best qualified candidate to perform this work.

1. Extensive experience conducting pollworker programs in diverse localities. The IFES-PI team has rich background in pollworker programs. Three members of the team — Jennifer Collins-Foley, Connie Schmidt and Charlotte Cleary — have all had responsibility for pollworker management, recruitment, training and retention in jurisdictions with highly diverse populations. And each has a demonstrated commitment to innovation and quality. In addition, both Connie Schmidt and Charlotte Cleary oversaw pollworker training in jurisdictions that implemented new voting systems and have a first-hand knowledge of the challenge of change-management in the context of working with volunteers. Connie Schmidt's manual “Implementing a New Voting System from a Local Election Administrator’s Perspective,” addressed some of the challenges in training pollworkers to use new voting systems. Most pertinent to this proposed project, Collins-Foley was instrumental in launching a series of specialty pollworker recruitment programs including programs to recruit high school pollworkers, county pollworkers, college pollworkers and bilingual pollworkers. Specialty recruiting now accounts for 66 percent of the county's 22,000 pollworkers. Warren worked with HAVA Partners to develop a template
for the online management and training of pollworkers. The HAVA Partners program was deployed in Arlington County, Virginia, in 2004.

2. Wide network of election official contacts. With decades of elections experience, the IFES-PI team has a wide network of election colleagues. Jennifer Collins-Foley and Connie Schmidt have worked closely with the Election Center, a prominent national organization for election officials, and several other national organizations, such as IACREOT. As director of the Constitution Project's Election Reform Initiative and the author of several studies and surveys of election practices, Warren has worked with every national organization serving election officials, including NASED, NASS, NACREOC, IACREOT and NACo. Former Maryland Secretary of State, John Willis, was active in the National Association of Secretaries of State and developed contacts at the state level. Together, Warren and Willis bring a state-level perspective to the project.

The Pollworker Institute's Board of Directors is also an important resource for the IFES-PI team and will commit substantial pro bono assistance. The Pollworker Institute Board of Directors includes:

- Beverly Kaufman, County Clerk, Harris County, Texas
- Conny B. McCormick, Los Angeles County Registrar-Recorder/County Clerk
- Leonard Shambon, a D.C.-based attorney who served as counsel to congressional sponsors of the Help America Vote Act and to the Ford-Carter and Carter-Baker National Election Reform Commissions

Through the team's close connections to these individuals and organizations, the IFES-PI team can draw on vast experience and intellectual capital.

In addition, IFES developed the comprehensive Administration and Cost of Elections (ACE) Project, produced in cooperation with the International Institute for Democracy and Electoral Assistance (IDEA) and the United Nations Department of Economic and Social Affairs (UNDESA). ACE is an ongoing project to create a globally accessible repository of information and materials on election practices, including pollworker programs.

4. Research experience. Although the primary product of this project is a manual for election officials, in order to ensure the effectiveness and usability of the manual requires research and a sound methodology for analysis. The IFES-PI team includes three members who combine a research background and elections experience. Dr. Elizabeth Bergman has conducted research on college pollworker programs.
studying the results of the Los Angeles County pollworker program. In March of 2005, Bergman presented findings at two key gatherings of experts in the field, the Western Political Science Association annual meeting and the Southwestern Political Science Association Conference, where panelists called for more research on the topic of pollworkers in U.S. elections.

Karen Buerke, at IFES, implements research projects in conjunction with IFES program activities in the field and reviews IFES surveys and research projects to ensure they meet high methodological standards. Buerke's experience developing indicators and evaluation mechanisms to measure success of IFES field activities will be invaluable as the IFES-PI team develops a methodology to evaluate existing college pollworker programs.

The IFES-PI team will also draw on the resources of IFES's Applied Research Center on Democracy and Elections (ARC) has more than ten years of experience conducting innovative and effective public opinion research around the world. IFES' experience and methodological rigor in its approach to survey research led Foreign Policy Magazine to name IFES the leader in democracy and governance surveys in 2003. To date, IFES has conducted more than 60 surveys and focus group activities in the United States and dozens of countries around the world.

Kim Brace, founder and president of Election Data Services, Inc., was the principal investigator for the project providing survey analysis support to the EAC in 2005 and managed several studies on voter registration systems for the Federal Election Commission and the three state boards of elections and election departments from 1995 to 1998. Mr. Brace has conducted congressional reapportionment studies and also has supervised the construction of databases for redistricting and the delivery of redistricting consulting services to some 35 redistricting commissions and state and local legislative organizations throughout the United States. In 1992 he edited The Election Data Book: A Statistical Portrait of Voting in America (Bernan Press). Prior to founding Election Data Services, he was an associate editor of the biweekly newsletter, Election Administration Reports. Mr. Brace is a graduate of American University in Washington, D.C.

5. Understanding of the needs and resource limitations of the target audience. Every member of the team has experience working with local election offices, including members of the educators team, and understands the constraints that make innovation so difficult. This understanding will guide the team as it develops a manual that has sufficient detail and practicality to replicate the model strategies and programs in jurisdictions around the country.
Dear Ms. Mortellito,

In response to the EAC RFP# 05-05 released September 7, 2005, please find attached a technical and cost proposal submitted by The Poll worker Institute and the International Foundation for Election Systems.

IFES Cost Proposal

EAC RFP # 05-05, EFFECTIVE STRATEGIES AND BEST PRACTICES FOR RECRUITMENT, RETENTION AND TRAINING

1. RFP Number: 05-05
2. Date of Submission: 12 September 2005
3. Name and address of offeror: IFES Inc. 1101 15th Street, NW Suite 300, Washington, DC 20005
4. Employer's Identification Tax Number: [redacted]
6. Remittance address: see above
7. Classification of business: Non-profit 501c(3) organization, not a small business
8. Type of business: Non-profit 501c(3) organization, not a small business
10. Subject to the following cost accounting standards: OMB Circular A-110, A-122, and A-133
11. Payment terms: monthly
12. Proposed Cost: $378,310
13. Name, title and signature of individual authorized to commit organization: Richard W. Soudriette, President, IFES Inc.
14. The following statement:

"This proposal reflects our estimates and/or actual costs as of this date. By submitting this proposal, we grant the Contracting Officer and authorized representative(s) the right to examine, at any time before award, those records, which include books, documents, accounting procedures and practices, and other data regardless of type or form or whether specifically referenced or included in the proposal as the basis for pricing, that will permit an adequate evaluation of the proposed price."
IFES
Proposal/Project Name: Poll-Workers Training and Retention (RFP#05-05)

POLL-WORKER TRAINING AND RETENTION
RFP #05-05
PERIOD OF PERFORMANCE: SEPTEMBER 20, 2005—DECEMBER 31, 2006

BUDGET NOTES

In accordance with OMB Circular A-122, “Where an item of cost requiring prior approval is specified in the budget of an award, approval of the budget constitutes approval of that cost. Consequently, an award containing a budget constitutes prior approval of the direct cost item in the budget, unless otherwise annotated.”

Accordingly, IFES shall consider that this budget submission, if approved, constitutes prior approval of the cost items designated as requiring prior approval by OMB Circular A-122, unless the award is otherwise annotated.

1. Direct Labor
All salaries are based on estimated workload and actual labor costs. Salaries are in keeping with IFES pay scales for the stated positions. Only actual costs are billed to the project.

IFES’ employee labor year is based on an estimated 235 billable days out of 260 – the other 25 days are accounted for in fringe benefits.

IFES is required to adhere to the Fair Labor Standards Act with regard to payment of overtime at time and a half for IFES’ non-exempt employees. Pursuant to OMB Circular A-122, Cost Principles for Non-Profit Organizations, payment of premiums for overtime work are allowable as a direct cost only with the prior approval of the awarding agency. Therefore, the budget and proposal as submitted for approval anticipate this need for occasional overtime to be worked by non-exempt staff.

1) Home Office Assistance
The Senior Director of Programs is responsible for the planning, development, and delivery of projects, assuring that project
implementation is proceeding on schedule and within the budget, and monitoring project activities and their impact in light of the project objectives.

The Senior Researcher will be the primary implementer of the focus group activities. Out of headquarters in Washington, she will prepare all relevant activities prior to traveling to the field for implementation.

The Program Officer, under the direction and supervision of the program director, will provide day-to-day management/oversight of the project. The program officer is responsible for the implementation and management of the project.

ii) Travel Assistance
The Senior Researcher will take six trips to the field in order to implement the six focus groups described in the technical proposal.

The Program Officer is scheduled for one trip to the field in order to assist the management and development of the project.

iii) Fringe Benefits
Fringe benefits for IFES employees are allocated at 40% of salaries in accordance with IFES’ anticipated FY06 rates under its Negotiated Indirect Cost Rate Agreement (NICRA), which is issued and approved by its cognizant audit agency, United States Agency for International Development (USAID).

2. Sub-Awards
IFES ensures that sub-awardees and subcontractors are chosen and monitored in accordance with US Government regulations and IFES’ strict internal procedures.

IFES will build on its established methodologies to award at least two sub-awards. The first award will be provided to the League of Women Voters in the amount of $32,500.00. The services provided by the League of Women Voters are fully discussed in the technical proposal.

The second award will be provided to the Poll-Worker Institute in the amount of $274,871.00. A description of the services to be provided can be found in the technical proposal. Additionally, as this proposed sub-award exceeds $100,000.00, please find a detailed breakdown of
this budget with accompanying budget notes located in the appendix of this cost proposal.

3. Other Direct Costs

A. Travel

i) Airfare

Airfares are based on round-trip fares to each field location as determined by IFES’ contracted travel agent. Flight arrangements and fares are in keeping with USG regulations (e.g., no first class travel, and in accordance with the Fly America Act).

*Domestic Airfares* are all airfares purchased for travel within the U.S. or for airfares for travel within a country where IFES has a field office or presence.

<table>
<thead>
<tr>
<th>Senior Researcher:</th>
<th>six trips</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program Officer:</td>
<td>one trip</td>
</tr>
</tbody>
</table>

ii) Local Transportation

Local transportation costs will cover all ground transportation to/from airports and meetings in Washington, DC and when traveling.

iii) Per Diem

Per Diem rates are within the maximum allowances cited by the US State Department in the “Maximum Per Diem Allowances for Domestic Travel.” For this purposes, IFES is utilizing the Washington DC Per Diem rates as the field locations have not been determined.

B. Office Expenses

All office expenses are all determined by historical costs for programs of similar magnitude and scope.

4. Indirect Costs

IFES’ anticipated provisional indirect rates for FY06 until amended, for sub-awards and G&A are as follows:

Sub-awards: 4 % - Total of sub-award costs
G&A: 27 % - Total direct costs minus commodities and sub-award costs

POLL-WORKER TRAINING AND RETENTION
RFP #05-05
PERIOD OF PERFORMANCE: SEPTEMBER 20, 2005—DECEMBER 20, 2006

BUDGET NOTES

1. Direct Labor

Daily rates for the Poll-Worker Institute (PI) staff are subject to justification and verification by IFES prior to issuing a sub-contract.

a) Home Office Assistance
As described in the technical proposal, the President of PI will undertake the role and responsibilities of the Principal Investigator of the program.

The Executive Director will undertake a scope of work that combines specific technical implementation of the program and other managerial responsibilities.

The Research Assistant will serve as assistant to the PI staff during the course of the project.

The Accountant will manage the finances of the program, under the supervision of PI’s president and Executive Director.

b) Travel Assistance
The President/Principal Investigator will take four trips to the field in order to implement her assigned scope of work as described in the technical proposal.

Similarly, the Executive Director will take four trips to take part in the different working groups, focus groups, and pilot programs during the course of the program.

2. Consultant/Professional Services

Consultant rates are calculated on a contract basis. Rates for professional services are subject to justification and verification by IFES prior to issuing a contract. The consultant budgeted amounts are
estimates based on historical cost experience in hiring individuals of comparable qualifications and experience to implement the proposed scopes of work.

3. **Travel**

   a) **Airfare**
   Airfares are based on round-trip fares to each field location as determined by PI. *Domestic Airfares* are all airfares purchased for travel within the U.S.

   b) **Local Transportation**
   Local transportation costs will cover all ground transportation to/from airports and meetings in Washington, DC and when traveling.

   c) **Per Diem**
   Per Diem rates are within the maximum allowances cited by the US State Department in the “Maximum Per Diem Allowances for Domestic Travel.” For this purposes, PI is utilizing the Washington DC Per Diem rates as the field locations have not been determined.

4. **Office Expenses**

   All office expenses are all determined by historical costs for programs of similar magnitude and scope.

5. **Special Events**

   Expenses for Special Events listed as *Focus Groups* and *Pilot Projects* are costs associated with conducting those special events, including room rental, providing food and beverages for participants, participants, development of materials; honorariums to participants, etc.
**ELECTRONIC FUNDS TRANSFER (EFT) ENROLLMENT FORM**

Use this form to enroll in Direct Deposit of your federal payment from the General Services Administration.

Privacy Act Statement Collection of this information is authorized by 31 U.S.C. 3332(g), 3325(d) and 7701(c). The information will be used by the Government to make payments by EFT to a vendor. This information may also be used for income reporting and for collecting and reporting on any delinquent amounts arising out of a vendor's relationship with the Government. Disclosure of the information by the vendor is mandatory. Failure to provide the requested information may result in the delay or withholding of payment to the vendor.

SUMMARY OF PROFESSIONAL SKILLS

Sixteen years professional experience developing and managing international and domestic democratic governance, training and voter registration/outreach/education programs. Includes eight years in election administration, legislative analysis and voter registration/outreach with the Los Angeles County Registrar-Recorder/County Clerk (RR/CC); two years democratic institution building and training in Russia with the National Democratic Institute for International Affairs (NDIA); three years in international economic development programs in the former Soviet Union and South Africa with the United Nations.

SUMMARY OF RELEVANT WORK EXPERIENCE

Democracy and Governance Specialist (Consultant)  
Washington, DC  
March 2014-Present

- The Pew Charitable Trusts: Conduct a feasibility study to assess whether initiatives targeting the implementation of statewide voter registration systems could significantly and measurably enhance voter enfranchisement. (July 2005 – Present);

- The Pollworker Institute: Non-profit organization to conduct research on pollworker recruitment, retention and training issues, as well as to implement College Pollworker recruiting and training programs nationwide. (December 2004-Present);

- The Election Center: Member of a Consulting Team to conduct Management Audit of King County, Washington, Elections Division (Seattle, Washington, May 2005-present);

- Tamkeen/Chemionics (USAID Contractor): Provided training and materials development to Palestinian civil society organizations on planning for and conducting candidate forums and voter education forums (Palestine, March 2005);

- League of Women Voters of the U.S. (LWV): Provided high-level research and analysis of Help America Vote Act (HAVA) pre-election implementation in 10 jurisdictions (Summer/Fall 2004);

- International Foundation for Election Systems (IFES): Developed pollworker training materials and training curriculum for the Republics of Kyrgyzstan and Tajikistan (Fall 2004) and the Washington, DC, Board of Elections (Summer 2004);

Los Angeles County Registrar-Recorder/County Clerk (RR/CC)  
Norwalk, CA  
November 2000-February 2004

- Direct Election Services Bureau, including two major Divisions consisting of 130 professional and clerical permanent employees, through major changes in voting systems, in the voter registration/pollworker management system, changes in pollworker recruiting and training, etc. The Pollworker Services Division includes the Training Section, Materials Development and Delivery Section, and the recruitment and retention
of 22,000 pollworkers and 5,000 polling places. The Election Information Services Division includes the Election Information Section, Candidate Filing Unit, Campaign Finance Section, Legislative Analysis Unit, Voter Outreach/Education and lawsuit avoidance strategies. Oversight of a $4 million multilingual voter services contract and related programs, and liaison to related community organizations.

- Chair, Los Angeles County Community Voter Outreach Committee (CVOC) consisting of 120 members representing organizations including the League of Women Voters, National Association of Latino Elected Officials, Asian-Pacific American Legal Center, NAACP, Western Law Center on Disability Rights and political parties. Six action-oriented subcommittees including Help America Vote Act (HAVA), Get Out The Vote, Multilingual Voter Services, Young Voter Outreach, Voters with Disabilities and Election Day Troubleshooting. Solicited community feedback on changes in voting systems, national and state legislative initiatives and implementation and other key issues.

- Lead negotiations with the U.S. Department of Justice attorneys regarding compliance with the National Voter Rights Act multilingual provisions and Americans with Disabilities Act accessibility issues.

- Prepare and administer Election Services Bureau's $24.6 million budget within $50 million Departmental budget.

- Assess impacts of proposed state and federal legislation and develop legislative proposals, coordinating with the Office of the California Secretary of State (SOS) and the California Association of Clerks and Election Officials (CACEO) and various election organizations.

- Represent the RR/CC and election administrators at the State and national level, including representing election officials in June 2001 at a Roundtable on Accessible Elections organized by the Ford-Carter Election Reform Commission, making presentations to election officials nationwide on various issues such as voter outreach/education, serving as a resource to the Election Center's National Task Force on Election Reform.

Los Angeles County Registrar-Recorder/County Clerk
Nowalk, CA
Executive Liaison Officer
August 1996-November 2000

- Design and manage cost and lawsuit avoidance programs, including multilingual voter services and targeting program, Voters with Disabilities/Accessibility Program, Student Pollworker Program, County Pollworker Program, City Clerk/RR/CC Election Summits, Election Night Volunteer Program.

- Advise Department managers on strategic planning, program improvement and legal/legislative issues.

- Departmental liaison to State, County and City election officials; LA County Board of Supervisors, the 88 cities of Los Angeles County, California Secretary of State, community organizations (See CVOC above.)

- Launched strategic initiatives including Community Voter Outreach Committee (see above, CVOC, to improve voter registration, voter turnout, public participation in the democratic process), LA County Youth in Democracy Steering Committee (working with high schools and community organization) and RR/CC - City Clerk "Dump a Tub" Committee (to streamline election materials), RR/CC Social Committee (to improve departmental employee morale) and first-ever RR/CC Professional Student Worker (intern) Program.

- Develop new communication tools including the Poll Cat newsletter (for pollworkers), flyers and departmental website (www.Iavote.net).

- Supervise and direct work of Public Information and Media Services Section and the
Jennifer L. Collins-Foley

Executive Office.

National Democratic Institute for International Affairs (NDIIA)  Moscow, Russia
Director/Chief of Party, Russia Office  May 1994-August 1996

- Directed NDI's democratic institution building and training program throughout Russia, including setting priorities for national and regional political party development, parliamentary development, effective local government and civic advocacy programs.
- Managed NDI outreach programs including 6,000-activist database, Vestnik newsletter/mailing every six weeks to 4,500 Russian activists, TV and radio programs.
- Organized briefings for NDI/Washington, USAID, the U.S. Embassy, GAO, the international NGO community and visiting delegations.
- Managed USAID grant for Moscow office including a yearly budget of approximately $1 million, implemented USAID directives for biannual reports (programmatic and financial), and made recommendations for exit strategies.
- Supervised 27 employees (Russian, American, Canadian, Greek and Latvian trainers, program officers and program assistants), St. Petersburg office, and Training/Technical Assistance Programs in 5 regional cities.
- Directed development of 3 independent poll monitoring centers along with a poll monitoring handbook and outreach program to train 20,000 domestic political party and NGO monitors for Russia's 1995 Parliamentary Elections and 1996 first round Presidential Elections to monitor elections and coordinate analysis of results.

United Nations Department of Economic and Social Development
Transnational Corporations and Management Division  New York, NY
Project Officer, Central and Eastern Europe  June 1990-September 1992

- Managed international accounting education/training programs for professors, upper-level university students and practitioners in Russia and Ukraine.
- Developed and implemented technical assistance accounting reform program for the USSR Ministry of Finance. Facilitate technical conferences and seminars in Moscow, Kiev and New York.
- Served as liaison to trainers/accountants from the “Big Six” accounting firms and international organizations including the World Bank, European Community/OECD, the British Council and the International Federation of Accountants (IFAC).

International Organizations of Consumers Unions (IOCU)  Washington, DC
Special Legal Consultant  January 1990-October 1993
- Advised on legal matters relating to a regulatory framework for foreign direct investment in developing countries.
- Coordinated lobbying efforts for US adoption of a UN Code of Conduct on Transnational Corporations.

United Nations Centre on Transnational Corporations  New York, NY
Intern  June-December 1989
- Organized Public Hearings on “The Effects of Sanctions and Disinvestment on Transnational Corporations in South Africa” held in Geneva, Switzerland.

EDUCATION
Jennifer L. Collins-Foley

Albany Law School of Union University
Juris Doctor

TECHNICAL PROPOSAL

1. PROVIDE A PROPOSED PROJECT WORK PLAN THAT DESCRIBES HOW TO ACCOMPLISH EACH OF THE PROJECT TASKS, INCLUDING A PERT MAJOR ACTIVITIES AND MILESTONES. ASSUME A PROJECT START DISCUSS EACH TASK IN THE STATEMENT OF WORK.

The project work plan is outlined in the Excel chart in Attachment A. The major activities proposed to accomplish tasks specified by the Statement of Work are as follows: from September 20, 2005, the project's start date, to December 31, 2006, the deadline for the final project report. The matrix in Attachment B shows the number of hours that have been allocated for the proposed activities to each member of the project team. The section details how the IFES-PI team will approach the required tasks: conducting a series of focus groups, developing an extensive manual, implementing pilot programs using strategies and materials from the manual, providing recommendations for revisions to the manual and for future activities to benefit efforts to recruit, train, and retain pollworkers. The discussion of the work plan concludes with summaries of the work experience of senior members of the proposed project team.

Project milestones are the deadlines for delivery of the following items:

- Summary of State requirements (4.5) January 6, 2006
- Summary of Focus Groups (4.7) February 3, 2006
- Outline of Manual (4.8) February 24, 2006
- First draft of Manual (4.8) April 14, 2006
- Version 1.0 of Manual (4.8) June 1, 2006
- Written Reports of Pilot Programs (4.9) As agreed with COR
- Draft project report and recommendations December 4, 2006
- Final project report and recommendations December 31, 2006

Discussion of Specific Tasks

The discussion of specific tasks begins with Task 4.4 and includes a description of each task outlined in the RFP's Statement of Work and how the IFES-PI team proposes to accomplish each task.

Task 4.4 - Develop a Project Working Group

Task 4.4 requires the Contractor to develop a working group composed of 5 individuals considered experts in the fields of elections, training, education, or possess other experience deemed relevant that would assist in the administration of the project. To accomplish this task, the IFES-PI team proposes to form a Working Group composed of five members, including the following:

- An experienced state election administrator who has demonstrated a commitment to innovative pollworker recruiting and training development programs. Recommendation: Sarah Ball Johnson, Executive Director
• An experienced local election administrator with a demonstrated commitment to innovative recruiting and training programs. Two recommendations are: Sara Harris, Deputy Director of the Montgomery County Board of Elections, or Beverly Kaufman, County Clerk in Harris County, Texas.

• A representative from a public interest organization dedicated to protecting the rights of voters with limited English proficiency, e.g., the Mexican American Legal Defense Fund (MALDEF), National Association of Latino Elected Officials (NALEO) or voters with disabilities, e.g., The Access Board, the American Association of People with Disabilities or Paralyzed Veterans of America.

• An experienced researcher in the area of elections. Recommendations: Stephen Ansola-behere at MIT, Henry Brady at the University of California-Berkeley, Michael Alvarez at CalTech, or Thad Hall at the University of Utah.

The Working Group will be asked to undertake the following:
> assist in identifying current research on State requirements relevant to pollworker programs;
> identifying best practices for pollworker recruitment, retention and training; encourage colleagues to respond to requests for information, particularly responding to a survey that will be developed to gather models and samples.
> review summary of best practices from jurisdictions already implementing innovative or cost-saving programs and make recommendations for how to effectively share these practices in the manual
> assist in designing questions for the focus group discussions
> advise on the outline of the manual and review the final draft of the manual
> review the results of the pilot programs
> review the final report to the EAC

The Working Group will meet three times, initially in Washington, D.C., and, subsequently, at other locations around the country, preferably in conjunction with another event such as an EAC hearing or project focus group. Each meeting is scheduled to last a day. In addition, to minimize costs, a monthly telephone conference will be conducted to brief members and solicit their feedback. Documents, including reports requiring the Working Groups review and comment such as drafts of the manual, will be submitted electronically. Members will be encouraged to return comments electronically as well.

Additional Pro Bono Advisors. Additionally, the IFES-PI team will benefit from the extensive pro bono contributions from the Pollworker Institute Board of Directors and Board of Advisors.

The Pollworker Institute Board of Directors includes:

• Beverly Kaufman, County Clerk, Harris County, Texas
• Conny B. McCormack, Los Angeles County Registrar-Recorder/County Clerk

Ms. Amy S. Abramson
Financial Manager
Transcend
2043 Anderson Road
Suite C
Davis, California 95616-0672

Dear Ms. Abramson:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on July 3, 2006. The request sought certain agency records concerning the agency contract awarded to The Cresston Company, LLC. Specifically, the request sought records pertaining to:

1. The full proposal submitted by the Cresston Company, LLC d.b.a. Compass Languages for RFP 06-02 (RFQ 142611);
2. A list of all offerers and the costs proposed for each; and
3. Our scores on each component of the evaluation criteria for the technical proposal and the scores of the Cresston Company technical proposal. The criteria includes:
   a. Relevant organizational experience
   b. Quality and look of samples
   c. Compliance with proposal instructions
   d. Results of reference checks

**Responsive Records.** The EAC has found records responsive to item #1 above. Please find the responsive document attached. Some of the information has been redacted. The removed portions contain confidential commercial information, such as bank account information and the names of subcontractors that must be withheld pursuant to FOIA exemption 4.

**No Records.** After a review of its files the EAC has determined that it has no list of all offerers and the costs proposed for each, in reference to item #2 noted above. However, the EAC does have an incomplete list of offerers, which does not include the Cresston Company, that we have provided.

**Withheld Records.** The four pages of documents responsive to item #3, your scores on each component of the evaluation criteria for the technical proposal and the scores of the Cresston Company technical proposal, are protected by the Deliberative Process Privilege and exempted from release under 5 U.S.C. §522(b)(5). The documents sought are pre-decisional.
policy recommendations. Such documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors, (2) protect against premature disclosure of proposed policies and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

[Signature]

Jeannie Layson
Director of Communications
U.S. Election Assistance Commission

Washington, DC 20005

re: Freedom of Information Act Request

Dear Ms. Layson,

Transcend recently submitted an offer in response to RFP 06-02 (RFQ142611). The contract was awarded to The Cresston Company, LLC d.b.a. Compass Languages.

Under the Freedom of Information Act 5 U.S.C. § 552, I would like to request copies of the following documents:

- The full proposal submitted by The Cresston Company, LLC d.b.a. Compass Languages for RFP 06-02 (RFQ142611).
- A list of all offerors and the costs proposed for each.
- Our scores on each component of the evaluation criteria for the technical proposal and the scores of the Cresston Company technical proposal. The criteria includes
  - Relevant organizational experience (max 65 points)
  - Quality & look of samples (max 10 points)
  - Compliance with proposal instructions (max 5 points)
  - Results of reference checks (max 20 points)

In order to help to determine my status to assess fees, you should know Transcend is a commercial business. Transcend is willing to pay fees for this request up to $100. If you estimate that the fees will exceed this limit, please inform me first.

Thank you for your assistance.

Sincerely yours,

Amy S. Abramson
Financial Manager

Senior Production Experience Summary

Name: Leo Brenninkmeyer
Position: President of Compass Languages

Experiences:

1. General Translation Experience
   a. 21 years of translation and/or cross-cultural communication work.
   b. Creator of the SME based translation system (Subject Matter Expert profiling)
   c. Fluent in 4 languages

2. Multi-language Translation Experience (example from last 3 months)
   a. Project Manager for Goodyear's Safety Pieces in 13 Languages.
   b. Project Manager for Eastman Chemical technical PR releases in 7 languages.
   c. Project Manager for WR Grace technical documents in 6 languages.

3. Formatting/Graphics Translation Experience
   a. Cingular Wireless – Successful development of the Cingular Wireless Spanish Bill for 5.0m Hispanic clients. Technical limitation of field size and zero layout changes permitted.
   b. GBS – Health Insurance forms – zero changes permitted in layout – translated and layout integrity safeguarded.
   c. HomeBanc – Real Estate and Mortgage forms translated within the very strict form layout constraints.

4. Deadline Project Management
   - Has maintained a 100% on time delivery record in 2004, 2005 and 2006 YTD

Select from 500 Translators Worldwide and 100 Specialist Areas

Create Client's Customized Translation Team

Your document needs to be translated by a translator who knows your business. We have a network of over 500 translators who meet the Compass Languages Quality standard and who have shown expertise in a key industry or speciality.

Quality begins with finding the right translator.
Mission
To enable quality communication through excellence in translations.

Vision
To be the leader in serving clients throughout the world who need highly accurate, culturally sensitive and punctual translations in any media that their communication strategy requires and to do so in a very friendly and easy to use manner.

Media
ALL MEDIA – Compass Languages can translate from and into all media including: Html, Illustrator, In-Design, Publisher, Quark, Visio, Excel, Word, Powerpoint, MPEG, Voice and other major media formats.

Languages
100+ LANGUAGES – Compass Languages has developed a specialty in Spanish (104 dialects, culturally neutral Spanish) but also offers ALL the major world languages (European, Eastern Bloc, Asian and Latin American).

Specialties
HISPANIC MARKET – Compass Languages can adapt the content to suit the specific Hispanic target: by country of origin (Mexico, Cuba, Puerto Rico, etc.), by demographics (income, educational level, age) and by other specific factors (ex. 1st, 2nd, 3rd generation).

Company Profile
Established in 2001, Compass Languages is a private company founded by Leo Brenninkmeyer who has extensive international experience with 20 years in cross-cultural communication. The Compass Languages team is comprised of 22 specialists involved in various areas of the translation process. We are a small business (< $5 million gross revenues) but have experienced strong growth in the last 2 years. Compass Languages maintains all professional liability insurances.

Clients Include (not a complete list)
- Cingular Wireless (Atlanta, USA)
- Harper Collins (NY, USA)
- JDB Designs (Chester, UK)
- Catholic Relief Services (Baltimore, USA)
- Henderson Shapiro (Atlanta, USA)
- Pelikan (Mexico City, Mexico)
- HomeBanc (Atlanta, USA)
- MasterMind Marketing (Atlanta, USA)
- ALMAA Organization (Annapolis, USA)

- Stone Cosmetic Surgery (Los Angeles, USA)
- Allpro (Millersville, USA)
- Group Benefit Services (Baltimore, USA)
- ITS (Atlanta, USA)
- Catapult Learning (Sylvan Learning) (Baltimore, USA)
"We are only as good as the quality of our last translation."
—Leo Brenninkmeyer, president and founder
Compass Languages

Quality Control Standards:

1. **Accuracy:** Is it an accurate reflection of the original piece?
   - Are all key messages reflected?
   - Are all details (numbers, dates, etc.) accurate?
   - Are all subtleties and nuances included?

2. **Readability:** Is the text easy to read?
   - Is there clear sentence structure?
   - Has the correct terminology been used?
   - Has the appropriate style and dialect been used?

3. **Grammar:** Have all grammar rules been followed?
   - Spelling and Orthography
   - Punctuation and Accentuation
   - Word order and Syntax
   - Capitalization
   - Conjunctions
   - Idioms
   - Agreement

4. **Consistency:**
   - Have all glossary terms been used?
   - Is the style consistent throughout?
   - Is this document consistent with previous work done?

5. **Cultural Sensitivity:**
   - Has the appropriate language dialect been used?

6. **Media Issues:**
   - Is the layout the same?
   - Graphically the same?
   - Chromatically the same?
   - Usability (Web sites)

7. **Other Quality Issues:**
   - Have we handled superscripts correctly (cell)?
   - Have we left any words in the original text for marketing or legal reasons?

The Quality Process:

- Project Review with Client – Avoid errors of understanding.
- Project Review with Translation Team – Establish key quality areas to focus on.
- Project Research – Ensure latest glossaries and previous work are at hand.
- Translation Start / Media Adaptation
- Quality Check 1 – Translator reviews document twice.
- Quality Check 2 – QCS (Quality Control Specialist) reviews document thoroughly.
- Pre-Delivery Final check – Project coordinator reviews document before sending.

Ongoing Quality Circle:

- Quality Measurement
- Rewarding Quality
- Selecting Quality Translators, QSC and media specialists.
- Reassessment of Quality Standards (RQS process)

Ms. Amy S. Abramson
Financial Manager
Transcend
2043 Anderson Road
Suite C
Davis, California 95616-0672

Dear Ms. Abramson:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on July 3, 2006. The request sought certain agency records concerning the agency contract awarded to The Cresston Company, LLC. Specifically, the request sought records pertaining to:

1. The full proposal submitted by the Cresston Company, LLC d.b.a. Compass Languages for RFP 06-02 (RFQ 142611);
2. A list of all offerers and the costs proposed for each; and
3. Our scores on each component of the evaluation criteria for the technical proposal and the scores of the Cresston Company technical proposal. The criteria includes:
   a. Relevant organizational experience
   b. Quality and look of samples
   c. Compliance with proposal instructions
   d. Results of reference checks.

No Records. After a review of its files the EAC has determined that it has no list of all offerers and the costs proposed for each, in reference to item #2 noted above. However, the EAC does have an incomplete list of offerers, which does not include the Cresston Company, that we have provided.

Withheld Records. The four pages of documents responsive to item #3, your scores on each component of the evaluation criteria for the technical proposal and the scores of the Cresston Company technical proposal, are protected by the Deliberative Process Privilege and exempted from release under 5 U.S.C. §522(b)(5). The documents sought are pre-decisional policy recommendations. Such documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors, (2) protect against premature disclosure of proposed policies and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency
Responsive Records. The EAC has found responsive records to item #1 requested above. Please find responsive document attached. Some of the information in this has been redacted. The removed portions contain financial information, such as banking account information, and the names of subcontractors based on a FOIA exemption that covers confidential commercial information.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Jeannie Layson
Director of Communications
U.S. Election Assistance Commission

AmbironTrustWave Overview

ATW is the leading provider of data security and compliance services to all businesses in the payment industry including acquirers, service providers, third-party providers, and merchants. ATW is headquartered in Chicago, Illinois and has 12 offices throughout North America and 1 in London. A summary of our payment industry credentials and information security experience is outlined below:

- **Leading Assessor** - ATW has performed more than 1,000 Level 1, 2, and 3 assessments for Merchants and Service Providers since the Visa CISP program was launched in June 2001. ATW is the only company authorized by all of the major card associations (American Express, Discover, MasterCard and Visa) to validate compliance, scan merchants, and provide computer forensic services. To date, the majority of Visa’s Payment Application Best Practices (PABP) compliant application vendors were validated by ATW’s TrustedApp® service.

- **Innovative Solutions** - ATW’s enterprise compliance suite, TrustKeeper®, has been approved by all of the card associations to validate PCI compliance and is endorsed by over 30 Merchant Acquiring Banks. TrustKeeper currently supports over 25,000 merchants in their efforts to achieve and maintain compliance. TrustKeeper is accessible through a secure easy-to-use portal backed by a multi-lingual 12x5 (12 hrs a day, five days a week) help desk. TrustKeeper can also be leveraged to validate compliance against HIPAA, GLBA, SOX, FISMA and ISO17799.

- **Data Security Experts** - For more than 10 years ATW professionals have been delivering information technology solutions to the Fortune 1000 and government agencies. ATW’s TrustSentry® suite offers customers a comprehensive array of managed security services including intrusion detection, firewall management or monitoring, VPN, anti-virus, authentication, and vulnerability scanning. The TrustSentry management console provides integrated trouble-ticketing, online help, and real-time reporting.
This Compliance Validation Services Agreement ("Agreement"), is made by and between AmbironTrustWave operating under TrustWave Holdings, Inc, a Delaware Corporation ("ATW") and Comlink, a Corporation ("Comlink"), and shall be effective as of the date of execution by both parties. ATW desires to provide Compliance Validation Services to Comlink to address the PCI Payment Application Security Standard (PASS) and Comlink wishes to receive such services.

Statement of Work

The ATW TrustedApp® Program consists of many distinct components that are described below.

Application Assessment

For each application, ATW leverages its application best practices methodology to properly address the review of the payment-based application. This methodology reviews the PCI Payment Application Security Standard (PASS) assessment requirements listed below:

1. Do not retain full magnetic stripe or CVV2 data
2. Protect stored data
3. Provide secure password features
4. Log application activity
5. Develop secure applications
6. Protect wireless transmissions
7. Test applications to address vulnerabilities
8. Facilitate secure network implementation
9. For Internet-based applications, store cardholder data in internal network only
10. Facilitate secure remote software updates
11. Facilitate secure remote access to application
12. Encrypt sensitive traffic over public networks
13. Encrypt internal administrative access

The TrustedApp® process can consist of a both remote and onsite assessment activities. The following is an overview of the TrustedApp® process. A more detailed description of each step is provided after this summary.

Kickoff Meeting - The ATW security consultant provides an overview of the TrustedApp® process and answers questions regarding the application assessment process.

Information Gathering - Remote process to gather and analyze application design and implementation information prior to the formal application review. Application architecture, coding, and development practices will be examined.

Application Review - Remote (or on-site, if applicable) review of the application by an ATW security consultant following the PCI PASS assessment procedures dictated by the credit card associations.

Application Penetration Test - As required by PCI PASS, ATW will perform an ethical hacking exercise of the application(s) being reviewed.

Reporting - ATW will develop the assessment report and identify areas of Compliance/Non-compliance with the program's best-practices. If the report is found
to be fully compliant, then it will be submitted to the card association for review and acceptance as a PCI PASS compliant application.

Client Debrief – The compliance report is delivered to Comlink. Comlink then has the opportunity to comment on findings, request clarifications, or provide additional documentation on areas of non-compliance or remedied issues.

Remediation Assistance– In the event that the application is found to be non-compliant in any number of PCI PASS areas, ATW can provide remediation assistance. Using the experience in assisting a large number of application vendors to meet PCI PASS compliance, ATW will work with Comlink to address each non-compliant item and prepare for a second round of review.

2nd Application Review– The Remote (or on-site, if applicable) review of the application by an ATW security consultant following the PCI PASS assessment procedures dictated by the credit card associations.

Final Reporting– ATW will develop the assessment report and identify areas of Compliance/Non-compliance with the program's best-practices. If the report is found to be fully compliant, then it will be submitted to the card association for review and acceptance as a PCI PASS compliant application.

Kickoff Meeting

ATW will schedule a kickoff meeting. The kickoff meeting is typically a short, targeted call intended to explain the goals of the assessment to the participants, as well as to describe the assessment methodology and final deliverables. Typical client participants in this meeting will include the primary point of contact, lead developer(s), and a senior level representative. During the kickoff meeting, ATW will discuss the TrustedApp® process, arrange for copies of software or specialized hardware to be shipped to the testing labs, and receive a preliminary overview of the application from Comlink.

Information Gathering

ATW will work with Comlink to gather and analyze information on Comlink's application. During this phase of the assessment, ATW will conduct telephone interviews with system architects, application developers, database developers, and other members of the application team. ATW will examine applicable documentation, and may request a remote demonstration of application capabilities. The goal of this phase of work is to maximize our understanding of the application's functionality, data handling processes, and design parameters, before conducting application review portion of the assessment. Specific questions to be answered during this phase of work include the following:

- Brief description of the application - to be made available to the credit card associations upon completion of the PCI PASS assessment.
- Application Name and Version Number, Operating Systems supported, Operating Systems used for development and testing
- List of dependent third-party applications and development tools used during design, code development and application integration
- Functional design and technical design documentation including description of application's data handling processes, design schema(s), data logging and error handling behavior
- Data encryption implementation technique including integration with any 3rd party secure payment card database encryption application
- Payment card application interface document illustrating application interaction and data flow exchange with 3rd parties and merchant data networks
- Transaction flow diagram illustrating the payment application's inputs, outputs to and from a merchant's network for payment card processing
- Description of payment application components that become part of the merchant's network or applications
- List of lab application testing tools, description of payment application test scripts and application test environment documentation for card processing and settlement
- Client implementation documentation including secure application integration procedures and recommendations for application integration into merchant environment
AmbironTrustWave 概况

ATW 是付款行业数据安全和一致性服务的主要提供商，面向各企业，包括兼并商、服务提供商、第三方提供商和零售商。ATW 总部设在伊利诺州芝加哥市，北美有 12 个办事处，伦敦 1 个。我们在付款行业的资历和信息安全方面的经验总结如下：

主要评估者——自 2001 年 6 月启动 Visa 卡 CISP 计划以来，ATW 已经为零售商和 / 服务提供商进行了 1000 余宗一、二、三级评估。ATW 是唯一取得所有主要信用卡公司（美国运通、Discover、万事达和 Visa）授权的公司，验证合规情况、审查零售商，并提供电脑犯罪调查服务。目前为止，大多数 Visa 付款程序最优做法（PAP）合规应用厂商都是由 ATW 的 TrustedAppR 进行的验证。

创新的解决方案——ATW 的企业合规性服务 TrustKeeper 已经获得所有信用卡行业协会的批准，验证 PCI 合规情况，并且得到 30 多家商业或银行的认可。当前 TrustKeeper 对 25000 个零售商给予支持，帮助他们实现合规。用户可以通过安全易用的端口进入 TrustKeeper，同时有多种语言支持的 12×5（1 周 5 天，每天 12 个小时）的帮助界面。TrustKeeper 还可以用来验证 HIPAA、GLBA、SOX、FISMA 和 ISO27799 的合规情况。

数据安全专家——在这 10 多年的时间里，ATW 的专家们一直致力于为《财富》1000 强企业和政府部门提供信息技术解决方案。TrustSentry® 项目为客户提供一套全面的管理安全服务，包括入侵检测、防火墙管理或监控、VPN、反病毒、验证和漏洞扫描。TrustSentry 管理控制台提供集中问题检测、在线帮助和实时报告的一条龙服务。
服务协议

本合规验证服务协议（简称“协议”）由 TrustWave 控股有限公司旗下的 AmbironTrustWave 经营公司——特拉华州公司（即“ATW”）与康联——<CLIENT_NAME> 公司（即“<CLIENT_NAME>”）共同制定，双方执行之日即为生效日。ATW 愿意向<CLIENT_NAME> 提供合规验证服务，使其符合 PCI 付款程序安全标准（PASS），同时<CLIENT_NAME> 希望获得此项服务。

工作说明

ATW TrustedApp®计划由许多特色要素组成，如下所述：

程序评估

对于每个程序，ATW 都会利用它的最优实践方法来恰当地审查付款程序。该方法审查以下 PCI 付款程序安全标准（PASS）评估要求：

1. 不保留无磁条或 CVV2 数据
2. 保护存储的商密
3. 提供安全密码功能
4. 记录程序活动
5. 开发安全程序
6. 保护无线传输
7. 测试程序是否漏洞
8. 方便安全网络运用
9. 对于网上程序，仅在内部网保存持卡人资料
10. 促进安全远程软件更新
11. 促进对程序的安全远程访问
12. 公共网络敏感信息传输加密
13. 给内部管理员的进入加密

TrustedApp®流程可以包括远程和现场评估。以下是此流程的概要，本摘要之后还有对各步骤更为详细的描述。

启动会议——ATW 安全顾问提供 TrustedApp®流程概要，并就程序评估流程回答问题。

信息采集——正式审查之前，搜集和分析程序设计和实施信息的远程流程，对程序结构、代码和开发活动进行检测。

程序审查——应信用卡协会的要求，ATW 安全顾问按照 PCI PASS 评估程序对程序进行远程（如适用的话，也可能是现场）审查。

程序渗透测试——根据 PCI PASS 的要求，ATW 将会对正在接受审查的程序进行道德黑客测试。

4a. Please indicate the greatest amount of downtime that you associate with the term "high availability" (Number of hours indicate amount of "acceptable downtime").

By "High Availability," we mean, systems or applications requiring a very high level of reliability and availability. High availability systems typically operate 24 hours a day, seven days a week and usually require built-in redundancy to minimize the risk of downtime due to hardware and/or telecommunications failures.

- 0 hours (No Downtime) (1)
- More than 0 hours and up to 1 hour (2)
- More than 1 hour and up to 2 hours (3)
- More than 2 hours and up to 4 hours (4)
- More than 4 hours and up to 8 hours (5)
- More than 8 hours and up to 12 hours (6)
- More than 12 hours and up to 24 hours (7)
- More than 24 and up to 48 hours (8)
- More than 48 to and up 72 hours (9)
- More than 72 hours (10)
- Don't Know

4b. Please indicate the greatest amount of downtime that you associate with the term "disaster recovery" (Number of hours indicate amount of "acceptable downtime").

- 0 hours (No Downtime) (1)
- More than 0 hours and up to 1 hour (2)
- More than 1 hour and up to 2 hours (3)
- More than 2 hours and up to 4 hours (4)
- More than 4 hours and up to 8 hours (5)
- More than 8 hours and up to 12 hours (6)

第2項 IT 予算と事業継続に関する全体的支出パターン

5. 2005会計年度における貴社のおおよその IT 予算はどれほどでしたか？2006年度はどうでしょうか？IT予算には貴社全体のコンピュータおよびIT関係の支出が含まれますが、これはハード、ソフト、メンテ、アウトソーシングその他の、外部からのサービスを指します（したがって社内人件費、従来型音声コミュニケーション、あるいはディスケットとかテープ、紙やインクにかかった経費はここには含まれないようにお願いします）。

July 24, 2006

To: Jeannie Layson, FOIA Officer

From: Gaylin Vogel, Law Clerk

RE: Freedom of Information Act request from Transcend dated June 28, 2006

The memo covers recommendations on documents that should be released to Transcend, the justification for the redaction of certain information contained in the responsive documents, and justification for withholding certain documents.

Background
The EAC received a Freedom of Information Act (FOIA) request from Transcend on July 3, 2006; the letter is dated June 28, 2006. Transcend requested (1) the full proposal submitted by The Creston Company, LLC d.b.a. Compass Languages for RFP 06-02 (RFQ 142611); (2) list of all offerors and the costs proposed for each; (3) Transcend's scores on each component of the evaluation criteria for the technical proposal and the scores of the Creston Company technical proposal.

Approach
In order to locate the responsive documents you sent an e-mail to all EAC staff on July 7, 2006. In the e-mail you asked for all responsive documents mentioned above. As a response to the e-mail I turned over a copy of the technical evaluations for Creston and Transcend, a copy of Creston's proposal to RFP 06-02 and a list of submitters to RFP 06-02.

Responsive Documents
A Federal agency cannot disclose proposals submitted to it in response to a solicitation request unless the proposal is incorporated by reference into a contract. In this case the EAC issued a purchase order against a GSA Schedule contract. In a telephone discussion with Linda Dunbar at GSA on or about July 9, 2006; she explained that if the proposal is mentioned as part of the purchase order then it is “incorporated”. On review of the SF 300

1 FAR Part 24.202 Prohibitions.
(a) A proposal in the possession or control of the Government, submitted in response to a competitive solicitation, shall not be made available to any person under the Freedom of Information Act. This prohibition does not apply to a proposal, or any part of a proposal, that is set forth or incorporated by reference in a contract between the Government and the contractor that submitted the proposal. (Sec 10 U.S.C. 2305(g) and 41 U.S.C. 253b(m).)
form for Creston it states “see attached for further description”. A copy of the Creston proposal was attached, as such it is deemed incorporated. The FAR exception to release of proposals applies and the proposal (item 1) should be released.

RFP 06-02 was limited to GSA schedule vendors and the order for translation services was placed against the GSA schedule. I called the National GSA Information Center 800 number on July 21, 2006 and spoke to Nancy and was told that all vendors have access to other vendors postings. Creston’s posting on the e-buy system is not working properly, but Leo Brinnkinmeyer of Creston reconfirmed that the prices Creston charged the EAC for the translation are the GSA schedule contract prices. The cost proposal should be released.

The EAC does not have a document responsive to Transcends second request but it does have an incomplete list of offerors, the winner Creston Company is not of the list. This list does not contain the price quotes. In a call to Deon, a Department of Justice FOIA Counselor, on July 21, 2006, she stated that as long as there is no competitive harm to releasing the incomplete list then the EAC can release the list. I do not see any competitive harm to releasing the list. This partial list (item 2) should be disclosed. The EAC is not required to create a document in response to a FOIA request, meaning the EAC does not have to add Creston or the price information to the list.

Redaction

The subcontractors names in the Creston proposal (item 1) should be redacted from the responsive documents based on FOIA exemption 4, which covers confidential commercial information such as names of key personnel and suppliers. When Creston Company was informed about the FOIA request they asked that the names of their subcontractors not be revealed. Creston puts significant time and effort into evaluating and selecting their subcontractors. Divulging the names would put them at a disadvantage as other translating companies may attempt to steal their human capital. Creston makes a compelling argument. I recommend that the names of the translators be redacted to protect Creston’s interest.

Withheld

The technical evaluations (item 3) should be withheld based on FOIA exemption 5, the deliberative process privilege. The privilege is designed to “prevent injury to the quality of agency decisions.” One of the goals of this exemption is to encourage open, frank discussions on matters of policy between subordinates and superiors. In order for a document to be withheld as predecisional it must be “antecedent to the adoption of an agency policy.” It must be “a direct part of the deliberative process in that it makes recommendations or expresses opinions on legal or policy matters.” Technical evaluations of a Source Selection Board, a Board which does not have authority to make a final decision, are predecisional if the results are given to a Source Selection Authority.

---

2 RMS Indus. V. DOD, No. C-92-1545, slip op at 6 (N.D. Cal. Nov 21, 1992)
4 Russell v. Dep’t of the Air Force, 682 F.2d 1045, 1048 (D.C. Cir. 1982)
5 Jordan v. United States Dep’t of Justice, 591 F.2d 753, 774 (D.C. Cir. 1978)
6 Vaughn v. Rosen, 523 F.2d 1136, 1143-44 (D.C. Cir. 1975)
who makes the final decision. The evaluations in question are predecisional and make recommendations to a decisions maker, as such should not be released.

- Technical Evaluation of Creston’s proposal in response to RFP 06-02 (2 pages)
- Technical Evaluation of Transcend’s proposal in response to RFP 06-02 (2 pages)

**Recommendation**

The responsive documents identified should be turned over to Transcend with the recommended redactions; with exception for the documents identified under the deliberative process exception discussed above.

Ms. Lillie Coney  
Associate Director  
Electronic Privacy Information Center (EPIC)  
1718 Connecticut Ave, NW  
Washington, DC 20009

Dear Ms. Coney:

This letter is in response to your two Freedom of Information Act (FOIA) requests received by the U. S. Election Assistance Commission (EAC) on February 3, 2006.

FOIA Request Number One
The first request sought records pertaining to all agency records concerning agency contracts awarded between July 9, 2004 and the date of your FOIA request, specifically documents regarding contracts involving employment of:

1. Britain Williams  
2. Paul Craft  
3. Current or former members of the Technical Guidelines Development Committee (TGDC)

No Records. After a review of its files the EAC has determined that it has no records pertaining to item 2.

Responsive records. Please find the responsive documents attached regarding Britain Williams (item 1). One three page document has been withheld. This document is covered by the Deliberative Process Privilege and exempted from release under 5 U.S.C. §522(b)(5). The document sought was a pre-decisional policy recommendation from EAC Counsel. Responsive records regarding item 3 (members of the TGDC), are similarly attached. The responsive records relate to Mr. Stephen Berger. Please note that your previous FOIA submissions also requested information pertaining to Stephen Berger, which EAC provided. Therefore, the information attached includes only new materials related to Stephen Berger that have been generated since your prior FOIA requests. Some of the communications responsive to request number one have been redacted in part. The removed portions contain personal information (such as home and e-mail addresses,
bank accounts and Social Security Numbers). This redaction is required by 5 U.S.C. §522(b)(6).

**FOIA Request Number Two**

The second request you submitted sought records concerning the EAC contract with Kennesaw State University, and the Voluntary Voting System Guidelines (VVSG) public comment process. Specifically, you requested the following:

1. Database of comments filed with the EAC on the Voluntary Voting System Guidelines tracking and management system.
2. The individuals or organizations and their comments on the Voluntary Voting System Guidelines.
3. The records related to the assignment of reference numbers as listed in the Tracking Management System.
4. Records that define or explain the meaning of the "Accept/Reject" designation in the Section Comments Sorted by Section Number document EAC provided under an earlier FOIA request.

**No Records.** EAC has determined that it has no documents related to items 3 and 4. However, even though it is not required by FOIA, we would like to take the opportunity to provide an explanation for items 3 and 4. In regards to the assignment of reference numbers, they were assigned in chronological order automatically by the database system as the comments were received. Regarding the meaning of "Accept/Reject," every comment received was reviewed. If a comment was labeled "accept," the entire comment or part of the comment was incorporated into the formation of the final VVSG. If a comment was labeled "reject," it was because it was not germane to the VVSG, or it was the same or similar to other comments. There was a third category of comments, labeled "carry-over." These comments were not incorporated into the 2005 VVSG, but were considered germane to ongoing voting system guidelines work, and were submitted to the National Institute of Standards and Technology and the Technical Guidelines Development Committee for future consideration.

**Responsive Records.** Regarding items 1 and 2, this information is available to the public on the EAC website at [www.eac.gov](http://www.eac.gov) by clicking on the VVSG link.
The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Jeannie Layson
Director of Communications
U.S. Election Assistance Commission

Organization
Dear Ms. Thompson,

This letter constitutes a request under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking all agency records concerning agency contracts awarded between July 9, 2004 and the date of the receipt of this letter. The documents sought include, but are not limited to, documents regarding contracts, memoranda of understanding, and fee-for-service agreements in the employment of Brittain "Brit" Williams and Paul Craft by the U.S. Election Assistance Commission (EAC). We also seek documents regarding contracts, memoranda of understanding, fee-for-service agreements, and employment of other current or former members of EAC's Technical Guidelines Development Committee (TGDC).

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of "news media" requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for "news media," fee status, EPIC v. Department of Defense, 241 F.Supp.2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public's understanding of the activities and operation of the government.

Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at coney@epic.org.

Sincerely,

Lillie Coney
Associate Director

RE: Freedom of Information Act Request

Dear Ms. Thompson,

This letter constitutes a request under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking the following records concerning the performance of the Election Assistance Commission's (EAC) agency contract number EAC-0544 awarded under no-bid circumstances to Kennesaw State University. The documents sought include:

- Database of Comments filed with the EAC on the Voluntary Voting System Guidelines found in the EAC's Voluntary Voting System Guidelines Tracking & Management System (see attachments). If possible, we request that you provide this on CD-Rom.
- The individuals or organizations and their comments on the Voluntary Voting System Guideline and the records related to the assignment of reference numbers as listed in the "Tracking Management System." (See attachment A).
- Records that define or explain the meaning of the "Accept/Reject" designation in the "Section Comments Sorted by Section Number" document provided by the agency under a FOIA request. (See attachment B).

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of "news media" requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for "news media," fee status, EPIC v. Department of Defense, 241 F.Supp.2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public's understanding of the activities and operation of the government.

Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at coney@epic.org.

Sincerely,

Lilli Coney
Associate Director

Ms. Coney,
The U.S. Election Assistance Commission has received the two FOIA requests you submitted on February 3, 2006. We are working to comply with your requests within 20 working days.

Please note that I am the commission's FOIA officer, and you should send any future FOIA requests to me via mail at the address below, or by using this email address, or faxing it to my attention at 202-566-3127. If you have questions, please contact me at 202-566-3103. Thank you.

Mr. Stephen Berger  
TEM Consulting, LP

RE: Personal Services Contract 06-03

Dear Mr. Berger:

Enclosed are two copies of a proposed personal services agreement whereby you would provide expert services to the United States Election Assistance Commission regarding the development and implementation of a voting system certification and testing program. Please review this document. If you agree to the terms of the proposed contract, please execute both copies. Retain one copy for your files and return the other signed original to Diana Scott, EAC, 1225 New York Avenue, NW, Suite 1100, Washington, DC 20005 in the enclosed envelope.

We look forward to working with you. If you have any questions regarding this agreement, please feel free to contact Julie Thompson or Brian Hancock at 202-566-3100.

Sincerely,

Thomas R. Wilkey  
Executive Director & Contracting Officer
EAC 06-003
Personal Services Contract for Intermittent Expert Services

Background

The Help America Vote Act of 2002 (HAVA) (42 U.S.C. §15301, et seq.), requires the U.S. Election Assistance Commission (EAC) to provide for the testing, certification, decertification, and recertification of voting systems. This mandate requires the Commission to create and manage a certification program for voting technologies. Moreover, HAVA requires the Commission to develop a program for accrediting independent, non-Federal testing laboratories. These accredited laboratories will test voting systems in accordance with the applicable Voluntary Voting Systems Guidelines and create a report which vendors will provide to the EAC for use in its system certification program.

Consistent with the HAVA requirements, above, the Commission is required to create a program that certifies voting systems. This program will be the first of its kind in the Federal government. The creation of this program is highly technical and specialized. Its development requires a high-level understanding of various technologies, standard setting, election administration and the certification process and procedure. Given these requirements, the EAC seeks an expert to assist the agency in creating its certification program.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants and experts under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such, this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). The initial appointment under this agreement shall be for the intermittent employment of an expert as defined by 5 C.F.R. §304.102(d) and (e). The expert (hereinafter “contractor”) shall work as required by the EAC, without a regularly scheduled tour of duty. Under no circumstances may contractor work more than 858 hours during the one year term of this agreement (5 C.F.R. §304.103(c)(2)(i)).

Supervision and Management.

The EAC Manager and Contracting Officer’s Representative (COR) for this effort is EAC Research Specialist Brian Hancock. Mr. Hancock will provide taskings, and authorize, supervise, review and approve all work and performance. He will also approve all labor hours on invoices and travel vouchers submitted for compensation under this agreement.

Period of Appointment.

The appointment under this contract is temporary and shall be for a period of one year.
The contract period shall begin the first Sunday after the date of award. The contract may be extended and contractor reappointed for an additional year upon agreement of both parties. (See 5 C.F.R. §304.103(c)).

Compensation

The consultant shall be paid at a rate of $135 per hour. Contractor shall perform the services prescribed by this agreement as directed by the COR on an intermittent basis. However, in any event, the contractor shall not work more that [33 hours] in either of the two week periods that make up each four week pay period. Further, as aforementioned, the contractor may not work more than 858 hours within the one year appointment. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. COR shall provide contractor notice and authorization when performance under this agreement is required.

The consultant shall not incur overtime and is not eligible for premium pay under subchapter V of chapter 55 of title 5, United States Code. (5 C.F.R. §304.106(b)). The contractor, as an intermittent appointee, is also not entitled to sick or annual leave. Contractor will not receive compensation for Federal holidays when no work is performed. (5 C.F.R. §304.106(b)). The contractor shall not receive automatic adjustments of pay based upon 5 U.S.C. §5303. Contractor’s pay rate may be increased at the sole discretion of the Contracting Officer, consistent with Federal regulations. Contractor may be reimbursed for other costs, such as local travel, consistent with this agreement if approved by the COR and submitted in writing via invoice.

Travel

The contractor may be required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC COR. The contractor will be reimbursed for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel. Compensation for travel shall be made in accordance with the rates set forth in the Federal Travel Regulation.

Release of Information

As a result of the limited employment relationship created by this agreement, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information. All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written
Compensation Procedures

Compensation shall be made for work done (labor hours) by submitting invoices. (Model Invoice Attached). Invoices shall be submitted every four weeks from the date of award. A week shall be from Sunday to Saturday. The first pay period shall begin the Sunday after the date of award. As such, there will be 13 invoice periods. Invoices must be submitted every 4 weeks when compensable work under this contract has been performed. The COR will provide the contractor with an invoice schedule, identifying each of the 13 invoice periods. Invoices shall be delivered to the COR for review and approval. Each invoice shall:

1. Identify each day (by date) that work was performed and the number of labor hours performed that day. Briefly describe the nature of the work performed for that day;
2. State the total number of labor hours that have been expended under the agreement for the invoice period;
3. State the total number of hours worked for each of the two week periods that make up the total invoice time;
4. Provide a cumulative total of hours worked during the entire contract performance period (one year);
5. Submit, as a separate line item, all reimbursable travel costs for approval. The submission must provide dates of travel, receipts and other information as required by the Federal Travel Regulation.
6. Include the contractor's signature, affirming that information contained in the invoice is accurate.

Duty Location

Contractor's duty station shall be his/her home or place of business. The contractor has access to and shall supply common office equipment to include telecommunications, internet access, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word, Project and Excel). All other resources will be provided by the EAC as needed and at its discretion.

Notices

Any notice, given by any of the parties hereunder, shall be sufficient only if in writing and delivered in person or sent by telegraph, telegram, registered, or regular mail as follows:

To EAC: 1225 New York Avenue, Suite 1100, Washington, DC 20005,
Attention: Contracting Officer Representative, Brian Hancock.

To Contractor: At EAC and at the Contractor's address shown on the Cover Page of this contract or to such other address as either of such parties shall designate by
Areas of Responsibility (Statement of Work)

Generally, contractor will provide EAC with technical advice and products based upon his or her expertise and experience with similar conformity assessment programs towards the goal of implementing the EAC Voting System Testing and Certification Program following, as closely as possible, all applicable ISO guidelines as adapted to the unique needs and resources of the EAC.

The contractor will work with EAC staff to identify and develop all necessary components of a voting system Certification and Testing Program. This program is expected to include the following components: Application procedure and processes; test plan review procedures and policy; testing report review procedures and policy; policies regarding qualified test review personnel; Manufacturer (Vendor) Qualification policies; Detailed procedures and processes for appeals, formal interpretations and the granting or revocation of certifications; and Procedures for expedited testing of component parts of a previously certified voting system. Contractor will be responsible for identifying any additional polices or procedures the certification program may require.

Contractor is also responsible for assisting EAC staff in the development of materials necessary for the successful implementation of the program. These materials must include all necessary applications, forms, letters, certification notices, tracking documents and any other documents deemed necessary to allow the EAC to effectively manage and implement all phases of this program.

Terms and Conditions

The following additional terms and conditions shall apply to this personal services contract:

a. Federal Acquisition Regulation Clauses Incorporated by Reference:

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. These clauses may be obtained on the internet at http://farsite.hill.af.mil/.

- 52.203-7 Anti-Kickback Procedures (JUL 1995)
- 52.203-12 Limitation on Payments to Influence Certain Federal Transactions (Sept 2005)
- 52.215-2 Audit and Records -- Negotiation (Jun 1999)
- 52.224-1 Privacy Act Notification (APR 1984)
b. Federal Acquisition Regulation Clauses in Full Text:

**Contract Termination (FAR 52.249-12)**

The Government may terminate this contract at any time upon at least 15 days' written notice by the Contracting Officer to the Contractor. The Contractor, with the written consent of the Contracting Officer, may terminate this contract upon at least 15 days' written notice to the Contracting Officer. (End of Clause)

**Site Visit (FAR 52.237-1)**

Offerors or quoters are urged and expected to inspect the site where services are to be performed and to satisfy themselves regarding all general and local conditions that may affect the cost of contract performance, to the extent that the information is reasonably obtainable. In no event shall failure to inspect the site constitute grounds for a claim after contract award. (End of Clause)

**Protection of Government Buildings, Equipment, and Vegetation (FAR 52.237-2)**

The Contractor shall use reasonable care to avoid damaging existing buildings, equipment, and vegetation on the Government installation. If the Contractor's failure to use reasonable care causes damage to any of this property, the Contractor shall replace or repair the damage at no expense to the Government as the Contracting Officer directs. If the Contractor fails or refuses to make such repair or replacement, the Contractor shall be liable for the cost, which may be deducted from the contract price. (End of Clause)

**Covenant Against Contingent Fees (FAR 52.203-5)**

(a) The Contractor warrants that no person or agency has been employed or retained to solicit or obtain this contract upon an agreement or understanding for a contingent fee, expect a bona fide employee or agency. For breach or violation of this warranty, the Government shall have the right to annul this contract without liability or, in its discretion, to deduct from the contract price or consideration, or otherwise recover, the full amount of the contingent fee.
(b) "Bona fide agency," as used in this clause, means an established commercial or selling agency, maintained by a contractor for the purpose of securing business, that neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts nor holds itself out as being able to obtain any Government contract or contracts through improper influence.

"Bona fide employee," as used in this clause, means a person, employed by a contractor and subject to the contractor's supervision and control as to time, place, and manner of performance, who neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts nor holds itself out as being able to obtain any Government contract or contracts through improper influence.

"Contingent Fee," as used in this clause, means any commission, percentage, brokerage, or other fee that is contingent upon the success that a person or concern has in securing a Government contract.

"Improper influence," as used in this clause, means any influence that induces or tends to induce a Government employee or officer to give consideration or to act regarding a Government contract on any basis other than the merits of the matter.

(End of Clause)

Disputes (FAR 52.233-1), Alternate I

(a) This contract is subject to the Contract Disputes Act of 1978, as amended (41 U.S.C. 601-613).

(b) Except as provided in the Act, all disputes arising under or relating to this contract shall be resolved under this clause.

(c) "Claim," as used in this clause, means a written demand or written assertion by one of the contracting parties seeking, as a matter of right, the payment of money in a sum certain, the adjustment or interpretation of contract terms, or other relief arising under or relating to this contract. However, a written demand or written assertion by the Contractor seeking the payment of money exceeding $100,000 is not a claim under the Act until certified. A voucher, invoice, or other routine request for payment that is not in dispute when submitted is not a claim under the Act. The submission may be converted to a claim under the Act, by complying with the submission and certification requirements of this clause, if it is disputed either as to liability or amount or is not acted upon in a reasonable time.

(d) (1) A claim by the Contractor shall be made in writing and, unless otherwise stated in this contract, submitted within 6 years after accrual of the claim to the Contracting Officer for a written decision. A claim by the Government against the Contractor shall be subject to a written decision by the Contracting Officer.
(2)

(i) The contractor shall provide the certification specified in paragraph (d)(2)(iii) of this clause when submitting any claim exceeding $100,000.

(ii) The certification requirement does not apply to issues in controversy that have not been submitted as all or part of a claim.

(iii) The certification shall state as follows: "I certify that the claim is made in good faith; that the supporting data are accurate and complete to the best of my knowledge and belief; that the amount requested accurately reflects the contract adjustment for which the Contractor believes the Government is liable; and that I am duly authorized to certify the claim on behalf of the Contractor."

(3) The certification may be executed by any person duly authorized to bind the Contractor with respect to the claim.

(e) For Contractor claims of $100,000 or less, the Contracting Officer must, if requested in writing by the Contractor, render a decision within 60 days of the request. For Contractor-certified claims over $100,000, the Contracting Officer must, within 60 days, decide the claim or notify the Contractor of the date by which the decision will be made.

(f) The Contracting Officer's decision shall be final unless the Contractor appeals or files a suit as provided in the Act.

(g) If the claim by the Contractor is submitted to the Contracting Officer or a claim by the Government is presented to the Contractor, the parties, by mutual consent, may agree to use alternative dispute resolution (ADR). If the Contractor refuses an offer for ADR, the Contractor shall inform the Contracting Officer, in writing, of the Contractor's specific reasons for rejecting the offer.

(h) The Government shall pay interest on the amount found due and unpaid from

(1) the date that the Contracting Officer receives the claim (certified, if required); or

(2) the date that payment otherwise would be due, if that date is later, until the date of payment.

With regard to claims having defective certifications, as defined in FAR 33.201, interest shall be paid from the date that the Contracting Officer initially receives the claim. Simple interest on claims shall be paid at the rate, fixed by the Secretary of the Treasury as provided in the Act, which is applicable to the period during which the Contracting Officer receives the claim and then at the rate applicable for each 6-month period as fixed by the Treasury Secretary during the pendency of the claim.
(i) The Contractor shall proceed diligently with performance of this contract, pending final resolution of any request for relief, claim, appeal, or action arising under or relating to the contract, and comply with any decision of the Contracting Officer. (End of Clause)

Availability of Funds for the Next Fiscal Year

Funds are not presently available for performance under this contract beyond September 30, 2006. The Government’s obligation for performance of this contract beyond that date is contingent upon the availability of appropriated funds from which payment for contract purposes can be made. No legal liability on the part of the Government for any payment may arise for performance under this contract beyond September 30, 2006, until funds are made available to the Contracting Officer for performance and until the Contractor receives notice of availability, to be confirmed in writing by the Contracting Officer. (End of clause)

GENERAL SERVICES ADMINISTRATION
1. PAYING OFFICE
   GSA FORM 300 (REV. 2/03)

020556
PURCHASE ORDER TERMS AND CONDITIONS

The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

PACKING LIST (DEC 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate: (1) Name and address of consignee; (2) Name and address of consignor; (3) Government order or contract number; (4) Government bill of lading number covering the shipment; (5) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper Invoices or vouchers, the prices stipulated in this contract for supplies delivered or services performed, less any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries accepted by the Government if the material is delivered as accepted by the Government and the delivery warrants it; or (b) The Contractor requests it and the amount due on the deliveries is at least $1,000 or 50 percent of the total contract price.

DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of offers if, however, any offered discount will form a part of the award, and will be taken if payment is made within the discount period indicated in the offer by the offeror. As an alternative to offering a prompt payment discount, in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purposes of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the data on which an electronic funds transfer was made.

PROMPT PAYMENT

Prompt Payment clause 52.232-26 is incorporated in this contract by reference. The clause contains information on payment due dates, invoice requirements, constructive acceptance and interest penalties. Certain payments under prompt payment discounts shall be made in accordance with your convenience. All days referred to in the extracts below are calendar days.

(a)(2) The due date for making invoice payments by the designated payment office shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(ii) The 30th day after Government acceptance of supplies delivered or services performed by the Contractor...

(a)(4) An invoice shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice must include the items listed in ... (i) through ... (viii) ... If the invoice does not comply with these requirements, then the Contractor will be notified of the defect within 7 days after receipt of the invoice at the designated billing office. Upon notification, the invoice will be taken into account in the computation of any interest penalty owed the Contractor ...

(i) Name and address of the Contractor.

(ii) Invoice data.

(iii) Contract number or other authorization for supplies delivered or services performed by the Contractor ...

(iv) Description, quantity, unit of measure, unit price, and extended price of supplies delivered or services performed.

(v) Shipping and payment terms (e.g., shipment number and date of shipment, prompt payment discount applicable, Bill of lading number and weight of shipment will be shown on Government bills of lading).

(vi) Name and address of Contractor official to whom payment is to be sent (must be the same as that in the contract or in a proper notice of assignment)

(vii) Name (where practicable), title, phone number, and mailing address of person to be notified in event of a defective invoice.

NOTE: Invoices must include the ACT number (block 4) and shall be submitted in an original copy unless otherwise specified, to the billing office designated in block 24 to receive invoices. The remit to address must correspond to the remittance address in block 12.

(a)(6)(i) For the sole purpose of computing an interest penalty that may be due the Contractor, Government acceptance shall be deemed to have occurred on the 7th day unless otherwise specified in block 20 after the Contractor delivered the supplies or performed the services in accordance with the terms and conditions of the contract, unless there is a disagreement over quantity, quality or contractor compliance with a contract provision ...

SERVICE CONTRACT ACT OF 1965, AS AMENDED (MAY 1989)

Except to the extent that an exception, variation, or tolerance would apply if this contract were in excess of $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wage specified under Section 6, (1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-209).

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

2.203-1 Officials Not to Benefit (APR 84)

2.203-3 Gratuities (APR 84)

2.203-4 Covenant Against Contingent Fees (APR 84)

2.203-5 Restriction on Subcontractor Sales to the Government (JUL 88)

2.203-7 Anti-Kickback Procedures (JUL 88)

2.217-9 Variation in Quantity (APR 84)

2.222-3-3, 38, 39, 40 Convict Labor (APR 84)

2.222-4 Equal Opportunity (APR 84) (Applies when amount exceeds $10,000.00)

2.222-46 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84) (Applies when amount exceeds $10,000.00)

2.222-48 Affirmative Action for Handicapped Workers (APR 84) (Applies when amount exceeds $2,000.00)

2.222-37 Employment Reports on Special Disabled Veterans and Veterans of the Vietnam Era (JAN 88) (Applies whenever Class 52.222-38 is incorporated by reference)

2.223-8 Drug Free Workplace (JUL 90) (Applies if contract is awarded to an individual)

2.223-9 Buy American Act - Supplies (JAN 89)

2.223-11 Restriction on Certain Foreign Purchases (MAY 92)

2.223-26 Prompt Payment (JUL 92)

2.223-31 Disputes (DEC 91)

2.224-3 Protest After Award (AUG 89)

2.224-1 Contractor Inspection Requirements (APR 84)

2.224-8 Default (Fixed-Price Supply and Services)(APR 84)

Applicable to purchase orders for services:

2.224-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 86)(Applies when amount is between $5,000 and $10,000.00)

2.224-20 Walsh-Healy Public Contracts Act (APR 84)(Applies when amount exceeds $10,000.00)

2.224-1 Changes - Fixed Price (AUG 87)

2.291-1 Termination for Convenience of the Government (Fixed Price)(Short Form)(APR 84)

Applicable to purchase orders for services:

2.224-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 86)(Applies when amount exceeds $2,500.00)

2.224-1 Changes - Fixed Price (APR 84) - Alt. II

2.224-1 Changes - Termination for Convenience of the Government (Services)(Short Form)(APR 84)

GSA FORM 300 BACK [REV. 2-93]
November 30, 2005

Dr. Britain J. Williams

Via U.S. Mail and Facsimile Transmission

Dear Dr. Williams:

Enclosed is a signed personal services contract (EAC 05-57) for the provision of services to the U.S. Election Assistance Commission (EAC) in providing project management for the EAC’s Election Management Guidelines program. EAC has reviewed the contract and concluded that ratification of this agreement is appropriate. EAC has ratified the agreement made with you on September 19, 2005. This date remains the award date of your contract.

To acknowledge receipt of this ratification action, please countersign and date below and return the original to the EAC “attention of Nicole Mortellito.”

We appreciate your work on these important efforts.

Sincerely,

[Signature]

Chair

[Name]

Dr. Britain J. Williams
TALLY VOTE MEMORANDUM

September 15, 2005

TO: EAC Commissioners

FROM: Tom Wilkey, Executive Director
U.S. Election Assistance Commission

SUBJECT: Election Management Guidelines Contracts

BACKGROUND

On June 29 the Election Assistance Commission published its proposed 2005 Voluntary Voting System Guidelines for public comment. These guidelines update and augment the 2002 Voting Systems Standards. The first set of standards for voting machines was promulgated in 1990. While there have been three editions so far of guidelines for voting equipment, there is no companion document that covers the election administration and management aspects of the registration and voting process. It is well known that deficiencies in procedures can have just as much impact on the enfranchisement of voters and the outcome of elections as the functioning of the voting machines.

For many years, the Voting Systems Board of the National Association of State Election Directors (NASED) has been calling for the development of election management guidelines to complement the technical standards. EAC and NASED have agreed to cooperatively undertake this effort over the course of the next two to three years to create a comprehensive set of guidelines for use by local and state election officials. The approach will be to develop a comprehensive set of topics, and then to develop materials on a modular basis so that products can be distributed to the election community as they are completed. We have targeted the 2008 election cycle for completion of the effort.

To get this process underway, EAC is entering into three contracts: one with NASED for the purpose of providing administrative support for the project; one with Ms. Connie Schmidt, a former county election administrator now consulting on election administration issues, to serve as a project Co-Manager; and one with Dr. Britain Williams, member of the NASED Voting Systems Board and voting systems certification consultant to the States of Georgia, Maryland, Virginia, and Pennsylvania, to serve as a
project Co-Manager. The period of performance for this initial set of contracts is from September 2005 through December 2006. Prior to this date, an assessment of the work effort remaining to be completed will be performed and follow-on contracts scoped appropriately.

ROLES AND RESPONSIBILITIES

NASED will assemble a Management Guidelines Working Group of experienced state and local election officials to provide subject matter expertise to carry out this effort. EAC is contracting with NASED to provide overall direction and management oversight for this project in coordination with the EAC. NASED will also provide administrative support to the Working Group and to the two Co-Managers of the project, and to reimburse travel and other authorized for Working Group participants. The NASED funding may also be used for technical writing services and minor research activities that might be required to support the project.

RECOMMENDATION

Approve the award of contracts EAC 05-56, EAC 05-57, and EAC 05-58 to Ms. Connie Schmidt, Dr. Britain Williams, and NASED respectively. The amount of each Co-Manager contract is $126,000. The amount of the NASED contract is $100,000. Copies of these contracts are attached along with the resumes of Ms. Schmidt and Dr. Williams.

Contract # EAC 05-56 for Ms. Schmidt
Contract # EAC 05-57 for Dr. Williams
Contract # EAC 05-58 for NASED
In the Matter of

Ratification of Personal Service Contract with
Dr. Britain Williams (EAC 05-57)

CERTIFICATION

I, Gracia M. Hillman, Chair of the Election Assistance Commission, do hereby certify that on November 14, 2005, the Commission decided by a vote of 3-0 to take the following action(s):

1. Ratification of Personal Service Contract with Dr. Britain Williams (EAC 05-57).

Commissioners Davidson, DeGregorio, and Hillman voted affirmatively for the decision.

Attest:

Date

Gracia M. Hillman
Chair
MEMORANDUM FOR THE RECORD

Date: November 17, 2005

From: Gracia Hillman, Chair
On Behalf of the Commission

Re: Ratification of Personal Services Contract with Dr. Britain Williams (EAC Contract No. 05-57)

The purpose of this memorandum is to document the ratification of the above referenced personal services agreement. Ratification is the process proscribed to approve, by an official with the authority to do so, an agreement that was not binding on an agency because the Government representative who made it lacked authority to enter into the agreement on behalf of the government (unauthorized commitment). (FAR 1.602-3(a)). While personal services agreements are based upon EAC’s authority to contract for consultants per 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)) and not the Federal Acquisition Regulation (FAR), the FAR’s ratification provisions provide useful guidance for the action and its documentation.

Background. Information was brought to the attention of the Commission late in the week of October 10. This information suggested that communication of award for the above referenced agreement may not have been made by an individual with authority to bind the government. As such, the agreement may be viewed as an unauthorized commitment. The above referenced personal services agreement was to obtain project management services to plan for the development and create election management guidelines. For many years, the Voting Systems Board of the National Association of State Election Directors (NASED) has been calling for the development of election management guidelines to complement the technical standards. EAC and NASED have agreed to cooperatively undertake this effort over the course of the next two to three years to create a comprehensive set of guidelines for use by local and state election officials.

The Commission has considered Dr. Britain William’s qualifications and found him to be uniquely qualified through experience and education. (Attachment “1”, Resume; and Attachment “2”, Administrative Appointment Memorandum). The original agreement between the parties is evidence by the original statement of work and e-mails between the contractor and EAC employees (Attachment “3”, Statement of Work and e-mails). The decision to award the contract was made by full vote of the EAC
Commissioners on September 19, 2005 (Attachment “4”, Tally Vote Certification and Memorandum).

Award was communicated by an EAC employee immediately following the Commission’s vote to award the contract. (Attachment “5”, Statement from Brian Hancock). The award was announced by the Commission on the record at a public meeting on September 27, 2005. Work began on the contract following award notification. This was evidenced by a kickoff meeting between EAC employees and the contractor which took place on September 22, 2005. (Attachment “6”, Conference Call Notes). Also, the contractor coordinated with NASED Voting Systems Board members to identify state and local election officials qualified to serve on a working group. The consultant has similarly begun work to develop an outline of topics for the management guidelines. (Attachment “5”, Statement from Brian Hancock). Ultimately, ratification of this agreement will result in the Commission receiving all of the deliverables identified in the Statement of Work.

Funding was available in fiscal year 2005 (FY 05) for the services at issue. These FY 05 funds remain available. The funds were in fact obligated to the agreement, in the amount of $126,000.00 on September 21, 2005. This was done under the belief that a legal obligation had been created. The agreement approved for award by the Commissioners had a total estimated cost of $126,000.00.

Requirements. FAR 1.602-3 (b) and (c) set federal ratification policy and requirements. These sections note:

(1) Agencies should take action to prevent the need for ratification actions. Ratification procedures should not be used in a manner that encourages unauthorized commitments being made by government personnel. (FAR 1.602-3(b)(1)).

(2) The head of an agency’s contracting activity, unless the authority is designated higher, may ratify an unauthorized agreement. This authority may be delegated with limitations. (FAR 1.602-3(b)(2) & (3)).

(3) Agencies should process unauthorized commitments consistent with FAR 1.602-3. Such actions should not be forwarded to the General Accounting Office for resolution unless they are subject to a Contracts Dispute Act Claim or are not otherwise ratifiable under the subsection. (FAR 1.602-3(b)(4)-(5) & (d)).

(4) Consistent with FAR 1.602-3(c)(1)–(7), ratification authority may be exercised only when:
   a. Supplies or services have been provided to and accepted by the Government, or the Government otherwise has obtained or will obtain a benefit resulting from performance of the unauthorized commitment;
   b. The ratifying official has the authority to enter into a contractual commitment;
The resulting contract would otherwise have been proper if made by an appropriate contracting officer;

The contracting officer reviewing the unauthorized commitment determines the price to be fair and reasonable;

The contracting officer recommends payment and legal counsel concurs in the recommendation, unless agency procedures expressly do not require such concurrence; and

Funds are available and were available at the time the unauthorized commitment was made.

Analysis. The commitment at issue began as a routine contracting effort. EAC is an agency specifically authorized by statute to enter into personal services contracts under 5 U.S.C. §3109. See HAVA Section 204(b). Issues regarding the agreement’s unauthorized nature arose near the end of the award process. While the contract authority (Commissioners) properly took action to make an award determination, they relied on EAC employees to communicate this fact to the contractor. In doing so, the Commission failed to realize that it is the communication of acceptance and award by the appropriate person that serves to obligate the government. EAC personnel seem to have viewed the Commissioners’ recorded vote as granting them the authority to communicate award in a manner that would obligate the agency. The bottom line is that the EAC employee believed his efforts to notify the contractor of award obligated the EAC by accepting the contractor’s proposal. Based upon this, the contractor began performance on the agreement and the EAC has and will receive benefit.

Looking specifically at the requirements for ratification noted in FAR 1.602-3(c) and the facts outlined, above, the Commission finds:

a. Services Accepted or Benefit Received. Services under this agreement have been accepted by the government. Moreover the government has and will obtain needed benefit from the services provided and upon completion of the unauthorized agreement.

b. Contract Authority. The undersigned, as the chair of the EAC, has the authority to contract on behalf of the agency. Furthermore, the Chair’s signature represents the decision of the full Commission to take this ratification action. This is documented by the attached Tally Vote. (Attachment “7”, Tally Vote). EAC’s four Commissioners have the legal authority to contract and otherwise bind the agency per the specific authority of the Help America Vote Act (42 U.S.C. §15325(e)) and, generally, as agency heads (see FAR 1.601).

c. Contract Otherwise Proper. This agreement, having previously been initiated, processed, and awarded by full vote of the Commission was proper, but for the unauthorized communication of award made by an individual without authority to bind the agency. As stated previously, EAC is specifically authorized by statute to enter into personal services contracts. HAVA Section 204(b). This agreement
falls within the statute and regulations governing personal services contracts. See specifically 5 U.S.C. 3109 and 5 CFR Part 304.

d. **Price Fair and Reasonable.** The rate at which this contractor is providing services is within the amount allowable under 5 CFR Part 304.105. In addition, the rate provided in the agreement is lower than his regular rate of billing. (Attachment "2", Administrative Appointment Memorandum).

e. **Payment of Funds Recommended.** After consultation with the General Counsel, the Commission recommends payment of funds.

f. **Funds Available.** Consistent with the facts noted above, the Commission finds that funds are available and were available at the time of the unauthorized commitment.

**Prevention.** Unfortunately, there are a number of agreements which have suffered from the same deficiencies as discussed above. FAR 1.602(b)(1) makes it clear that agencies should take steps to prevent the need for ratifications and avoid using the process in a way that would encourage unauthorized commitments. The EAC must determine why these unauthorized commitments occurred and how to prevent them in the future. An initial review of EAC's contract process showed deficiencies in (1) the contracting procedure, (2) training of employees on contracting process and procedure, (3) coordination with the General Counsel's office, and (4) communication amongst contracting officers and staff that resulted in an unauthorized commitment. No new contracting should occur until issues surrounding the process have been resolved. EAC is in the process of negotiating with another government agency to handle its procurement process, thereby relieving the EAC staff of the responsibility of processing these procurements.

Contract # EAC 05-57 - Project Management Services to Assist EAC and NASED with the Development of Election Management Guidelines

Background

On June 29 the Election Assistance Commission published its proposed 2005 Voluntary Voting System Guidelines for public comment. These guidelines update and augment the 2002 Voting Systems Standards. The first set of standards for voting machines was promulgated in 1990. While there have been three editions so far of guidelines for voting equipment, there is no companion document that covers the election administration and management aspects of the registration and voting process. It is well known that deficiencies in procedures can have just as much impact on the enfranchisement of voters and the outcome of elections as the functioning of the voting machines.

For many years, the Voting Systems Board of the National Association of State Election Directors (NASED) has been calling for the development of election management guidelines to complement the technical standards. EAC and NASED have agreed to cooperatively undertake this effort over the course of the next two to three years to create a comprehensive set of guidelines for use by local and state election officials.

Roles and Responsibilities

Project management of the Election Management Guidelines effort will be shared by two Co-Managers. It is the responsibility of these individuals to devise a division of labor so that it is clear which areas each Co-Manager will have lead responsibility for, and the workload is approximately evenly divided. NASED will assemble a Working Group of experienced state and local election officials to provide subject matter expertise and work under the direction of the Co-Managers. NASED will provide administrative support services for the Co-Managers and the Working Group. NASED will cover reimbursement for travel and other authorized expenses for the Working Group members. The expenses of the Co-Managers will be paid through their individual contracts. The following tasks will be performed by the Co-Managers.

Tasks

1. Develop a comprehensive outline of topics. Drawing on their own knowledge and experience, and in consultation with the NASED Management Guidelines Working Group, the Co-Managers will develop a comprehensive outline for the Management Guidelines document. This outline should appropriately integrate with the 2005 EAC Voluntary Voting System Guidelines. This outline shall be coordinated with the NASED Executive Committee and the approved outline provided to the EAC.

2. Prioritize topics and create work plan. The Co-Managers will prioritize the topics based on degree of perceived existing deficiencies, anticipated high return in administration improvement, and other relevant criteria. The NASED Executive
Committee will recommend criteria for use in prioritizing topics. In particular, EAC suggests that topics that could be completed in time for use in the 2006 elections be given a top priority rating.

Following approval of the prioritized list by EAC and the NASED Executive Committee, the Co-Managers will create a work plan, including a timeline for the development of guidelines for each topic. While this effort is expected to take several years to complete, it is EAC's intention to proceed with the work on a modular basis, so that products on particular topics can be distributed to the election community as soon as they are completed. The work plan should be structured to accommodate this approach. The work plan should be provided to EAC following NASED Executive Committee review.

3. Manage the guidelines development effort. Following approval of the work plan by EAC and the NASED Executive Committee, the Co-Managers shall make work assignments to members of the Working Group and oversee the development of guidelines for each of the identified topics. It is anticipated that this work will draw heavily on documented best practices and procedures already in use in election jurisdictions around the country. The Co-Managers can request NASED to draw on their project funds to cover expenses to convene Working Group meetings and teleconferences, reimburse Working Group members for expenses associated with meetings, conduct limited research efforts, acquire technical writing services to assist with documentation, and other supporting services as required.

4. Report status of work effort to EAC Executive Director and NASED Executive Committee. The Co-Managers shall provide a monthly progress report that briefly describes the work performed, identifies issues and their resolution, indicates progress against the timeline, and reports on funds utilized. Periodically, the Co-Managers and the Working Group will be expected to meet with the Commission and the NASED Executive Committee to brief their activities and progress. There is also a requirement to make periodic presentations to the EAC Board of Advisors and Standards Board.

Period of Performance

The period of performance for this initial work effort is from the date of award until December 31, 2006. It is EAC's view that it will require a longer period to complete a comprehensive set of management guidelines. A program review will be conducted three months before the end date of this contract to evaluate the progress made in this initial work effort along with an assessment of the work remaining. It is anticipated that a follow-on contract will be awarded after this review, when more information is available to scope the completion of the effort.

Schedule of Deliverables

1. Draft outline of topics 1 month after contract award
2. Final outline of topics 1 week after EAC/NASED comments
3. Project work plan 1 month after final outline approved
4. Management Guidelines modules
5. Progress reports
6. Briefings
7. Program review

As specified in project work plan
Monthly
As required, at least quarterly
October 2006

Compensation

Consultant shall be paid at the rate of $120.00 per hour. Consultant shall be reimbursed for any required travel at the standard Federal government rate for airfare, hotel, ground transportation, per diem, and other allowable travel expenses. A budget of $6000.00 has been allocated for travel.

Invoicing

Consultant shall invoice monthly for all hours worked and any reimbursable expenses incurred during the month. Expenses claimed for reimbursement shall be itemized with appropriate receipts provided. Invoices shall be delivered to Ms. Diana Scott; Administrative Officer, U.S. Election Assistance Commission, 1225 New York Ave., N.W., Suite 1100, Washington DC 20005.

Contract Termination

This contract shall terminate at the end of the period of performance unless extended in writing by mutual agreement of the parties. The contract can be terminated in advance of the current end date by two weeks' notice in writing by either of the parties.
NOTES FROM CONFERENCE CALL – September 22, 2005

EAC VOTING SYSTEMS ADMINISTRATIVE MANAGEMENT GUIDELINES

Attendance: Brian Hancock, Carol Paquette, Linda Lamone, Connie Schmidt

Carol indicated that final contracts will be sent out next week. Any questions, please contact Brian.

The EAC’s timeline extends to 2008 for this project. The current contract is through December 2006. The program will be reviewed around October 2006. They will look at what work has been accomplished at that point and what remains and then new contracts for completion of the management guidelines will be discussed.

The goal is completion of the guidelines prior to the 2008 election.

First step is the appointment of the working group members. That group will develop an outline of topics. From that list, any “burning” issues for 2006 will be developed first. The priority is best practices or guidelines for 2006 elections.

Final product will probably be completed in chapters. If there is a relationship to the Voting Systems Guidelines, it should be noted.

The existing Voting Systems Guidelines have an appendix with miscellaneous best practices regarding accessibility and security. They would like all best practices taken from the VSG relating to election administration and placed within the administrative management guideline document.

The project work document includes dollars for NASED to provide administrative support to the project co-managers and the working group.

There is a need to develop a budget for the NASED dollars as it must be allocated for travel expenses for the working group, administrative support and any necessary research projects.

Tom Wilkey will be briefing the TGDC members on this project at their upcoming meeting in Boulder.

Connie and Brit will pull together a draft outline for the first working group meeting. Linda will communicate with Sandy for confirmation of working group members. Potential meeting dates discussed were 10/13-14; 10/20-21; or 10/27-28. The meeting will last 1 ½ days. Brian will email the availability of the EAC office as the meeting location.
MEMORANDUM FOR THE RECORD

Date: October 28, 2005

From: Brian Hancock

Re: Contract with Dr. Britain Williams (EAC Contract No. 05-57) and Connie Schmidt (EAC Contract No. 05-56): Election Management Guidelines Project

My name is Brian Hancock and I serve as an Election Research Manager at the Election Assistance Commission (EAC). I manage the above referenced project. In the summer of 2005, the Commission determined that the creation of Election Management Guidelines was an agency priority. The management guidelines are needed to compliment the Voluntary Voting System Guidelines that were in development. For many years, the Voting Systems Board of the National Association of State Election Directors (NASED) has been calling for the development of election management guidelines to complement the technical standards. EAC and NASED have agreed to cooperatively undertake this effort over the course of the next two to three years to create a comprehensive set of guidelines for use by local and state election officials. EAC management determined that two consultants with relevant education and experience would be needed to manage the project. The individuals would report to me as the research manager overseeing the project.

Dr. Britain Williams and Ms. Connie Schmidt were soon identified as project managers due to their excellent qualifications, experience and desire to be a part of the project. A contract was drafted and agreed to Dr. Williams and Ms. Schmidt. The Commission voted to appoint the two as personal Services Contractors on September 16, 2005. Following the Commissioner’s vote and pursuant to instruction, I contacted Dr. Williams and Ms. Schmidt to inform them that they had been awarded the contract.

The two began work on the project immediately. We held a kick-off meeting on September 22, 2005 to discuss the project, set short-term goals and assign duties. Ms. Schmidt documented the meeting and sent copies to all parties via email. Further, Dr. Williams and Ms. Schmidt coordinated with NASED Voting Systems Board members to identify state and local election officials potentially qualified to serve on a working group. The consultants have also begun work to develop and outline of topics for the management guidelines.

PURCHASE ORDER TERMS AND CONDITIONS

52.210-79 PACKING LIST (DEC 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate (1) Name and address of consignor; (2) Name and address of consignee; (3) Government order or requisition number; (4) Government bill of lading number covering the shipment if any; and (5) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

52.232-1 PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies delivered and accepted or services rendered and accepted, less any deductions provided for in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries by the Government if: (a) The amount due on the deliveries accepted by the Government is at least $1,000 or 50 percent of the total-contract price.

52.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of offers. However, any offered discount will form a part of the proposed price included in the Government quotation. As an alternative to offering a prompt payment discount in conjunction with the offer, offers awarded contracts may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the date on which an electronic funds transfer was made.

PROMPT PAYMENT

Prompt Payment clause 52.232-25 is incorporated in this contract by reference. The clause contains information on payment due dates, invoice requirements, constructive acceptance and interest penalties, and a statement that the contractor will agree to constructive acceptance for your convenience. All days referred to in the contract above are calendar days.

(a)(2) The due date for making invoice payments by the designated billing office shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(ii) The 30th day after Government acceptance of supplies delivered or services performed by the Contractor.

An invoice shall be prepared and submitted to the designated billing office specified in the contract. All invoices must include the items listed in...subject to the terms and conditions of the contract, unless there is a disagreement over quantity, quality or contractor compliance with a contract provision. . . .

52.222-40 SERVICE CONTRACT ACT OF 1986, AS AMENDED - CONTRACTS OF $2,000 OR LESS (MAY 1989)

Except to the extent that an exception, variation, or tolerance would apply if this contract were in excess of $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wage specified under Section 6 (b)(1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-206). Regulations and Interpretations of the Service Contract Act of 1966 are contained in 29 CFR Part 4.

52.222-41 SERVICE CONTRACT ACT OF 1985, AS AMENDED (MAY 1989)

52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRING (MAY 1989)

52.222-44 SERVICE CONVENE CONVENIENT OF THE GOVERNMENT (JUL 89)

NOTE: Invoices must include the ACT number (block 4) and shall be submitted in an original or, unless otherwise specified, to the billing office designated in block 24 for receive invoices. The "remittance to address must correspond to the remittance address in block 12.

(a)(b)(i) For the sole purpose of computing an interest penalty that might be due the Contractor, Government acceptance shall be deemed to have occurred constructively on the 7th day unless otherwise specified in block 20 after the Contractor delivered the services in accordance with the terms and conditions of the contract, unless there is a disagreement over quantity, quality or contractor compliance with a contract provision . . . .

52.222-45 SERVICE CONTRACT ACT OF 1985, AS AMENDED (MAY 1989)

52.222-48 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRING (MAY 1989)

52.232-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRING (MAY 1989)

The GSA Form 2166, Service Contract Act of 1985 and Statement of Equivalent Rates For Federal Hires is attached hereto and made a part hereof.

52.262-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (49 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

52.203-1 Officials Not to Benefit (APR 84)

52.203-3Gratuities (APR 84)

52.203-6Covenant Against Contingent Fees (APR 84)

52.203-8 Restriction on Subcontractor Sales to the Government (JUL 88)

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 86)

52.222-41 Service Contract Act of 1985 (MAY 1989)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

Background

On June 29, 2005, the Election Assistance Commission (EAC) published its proposed 2005 Voluntary Voting System Guidelines for public comment. These guidelines update and augment the 2002 Voting Systems Standards. The first set of standards for voting machines was promulgated in 1990. While there have been three editions of guidelines for voting equipment in the past 15 years, there is no companion document that covers the election administration and management aspects of the registration and voting process. It is well known that deficiencies in procedures can have just as much impact on the enfranchisement of voters and the outcome of elections as the functioning of the voting machines.

For many years, the Voting Systems Board of the National Association of State Election Directors (NASED) has called for the development of a set of election management guidelines to complement the technical standards for voting equipment. The EAC has also identified this activity as a high priority agency requirement. Among the stated purposes in the preamble to the Help America Vote Act (HAVA) is “... to establish the Election Assistance Commission ... to establish minimum election administration standards for States and units of local government responsible for the administration of Federal elections ...”. In addition, Subtitle C of the Act, “Studies and Other Activities to Promote Effective Administration of Federal Elections,” charges the Commission with conducting a wide variety of studies having to do with the administration of elections.

Consequently, EAC and NASED have agreed to cooperatively undertake the development of a comprehensive set of election management guidelines that will be promulgated for use by local and state election officials. NASED will work with the EAC to identify qualified state and local election officials who are willing to serve on a working group. These individuals will provide technical expertise and share various state best practices with the EAC. To manage this project, the EAC needs two experienced consultants to serve as Co-Managers for the project.

Qualifications

In order for this work to have credibility and be accepted by the election community, it needs to be carried out by members of that community, who possess the requisite knowledge and experience. In addition, there is no established academic or commercial source of supply for this work. The administration of elections is very specialized subject matter, knowledge of which is mostly gained through on-the-job training. This management guidelines effort is the first attempt to comprehensively document best practices and procedures for this field of endeavor.
To manage this project, The EAC needs two consultants to serve as Co-Project Managers for the project: one to focus on procedures related to the use of voting equipment, and one to focus on procedures for all other aspects of election administration. The individuals identified by the Commission to meet these needs are Dr. Britain Williams and Ms. Connie Schmidt, respectively. These individual possess the unique mix of professional services required to meet EAC’s needs, including: subject matter expertise regarding state and local election practices and procedures; State and Federal laws, regulations, administrative guidelines, etc. governing election administration in the 55 jurisdictions covered by HAVA; election administration customs and practices; the development of election management best practices; knowledge of the proposed EAC Voluntary Voting Systems Guidelines, and project management experience. This work also requires a demonstrated ability to work effectively with federal, state and local election officials.

Ms. Schmidt instituted many nationally-recognized and award-winning innovations and best practices as Election Commissioner of Johnson County, Kansas. These include the 1998 Digital Government Award of Excellence, the 1999 NACO Achievement Award for its bi-state public/private partnership program to recruit election workers, 2001 NACO Achievement Award for Civic Education and Public Information, 2002 NACIO Superior Award for her Congressional testimony on national election reform, and several NACIO Meritorious Awards in 2004 for publications on a variety of election administration topics. She has chaired the Professional Education Program Certification Board for The Election Center and served as a member of the NASED Voting Systems Standards Board. In December 2004 she received the National Association of Secretaries of State Medallion Award for outstanding service to American democracy. Her focus will be election management practices other than those associated with voting systems.

Dr. Williams has served on many national-level committees and boards including the Technical Guidelines Development Committee for the Voluntary Voting System Guidelines and the NASED Voting Systems Board. He chairs the ITA (test lab) Technical Subcommittee of the latter. From 1984 to the present he has worked as a consultant to the State of Georgia Secretary of State, the State Election Director, and local election officials to conduct certification and acceptance testing of electronic voting systems. He played a central role in establishing the State of Georgia’s process for voting system acquisition, acceptance, operations and maintenance, which evolved into the Center for Election Systems, the only institution of its kind in the country. His focus will be the election management practices associated with the use of voting systems.

**Determination that Pay Rate is Fair and Reasonable**

Each of the Co-Managers will be compensated at an hourly rate of $120 and reimbursed for travel and other appropriate expenses. This is the rate at which Ms. Schmidt has recently been paid for comparable work on two projects for the State of Maryland. This is a discounted rate from Dr. Williams’ established rate of $150 per hour. These hourly rates are in line with the rates being paid by EAC for consultants with comparable levels of experience and education.
Conclusion

Dr. Williams and Ms. Schmidt are well and uniquely qualified to serve as EAC consultants on the Election Management Guidelines Project. Further, their labor rate is fair and reasonable.

BEFORE THE ELECTION ASSISTANCE COMMISSION

In the Matter of
Management Guidelines

CERTIFICATION

I, Gracia M. Hillman, Chair of the Election Assistance Commission, do hereby certify that on September 19, 2005, the Commission decided by a vote of 4-0 to take the following action(s):

1. Approve the award of contracts EAC 05-56, EAC 05-57, and EAC 05-58 to Ms. Connie Schmidt, Dr. Britain Williams, and NASED respectively. The amount of each Co-Manager contract is $126,000. The amount of the NASED contract is $100,000.

Commissioners Davidson, DeGregorio, Hillman and Martinez voted affirmatively for the decision.

NOTE: The Chair approves the recommendation despite her strong objection to the high hourly rate EAC is paying the consultants.

Attest:

Gracia M. Hillman
Chair

Date: September 20, 2005
Contract # EAC 05-57 - Project Management Services to Plan for the Development and Create Election Management Guidelines

Background

On June 29 the Election Assistance Commission published its proposed 2005 Voluntary Voting System Guidelines for public comment. These guidelines update and augment the 2002 Voting Systems Standards. The first set of standards for voting machines were promulgated in 1990. While there have been three editions so far of guidelines for voting equipment, there is no companion document that covers the election administration and management aspects of the registration and voting process. It is well known that deficiencies in procedures can have just as much impact on the enfranchisement of voters and the outcome of elections as the functioning of the voting machines.

For many years, the Voting Systems Board of the National Association of State Election Directors (NASED) has been calling for the development of election management guidelines to complement the technical standards. EAC and NASED have agreed to cooperatively undertake this effort over the course of the next two to three years to create a comprehensive set of guidelines for use by local and state election officials. The purpose of the personal services contract is to obtain a project manager with significant experience in election administration to oversee the process of developing guidelines on Federal election management. This consultant will be required to manage the process and develop the guidelines in cooperation with another consultant (co-manager) and a working group of election officials from NASED.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such, this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). As a result of this unique relationship, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information. All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express permission of the EAC.

Supervision and Management.

The EAC Manager for this effort is Brian Hancock, EAC Research Specialist. Mr. Hancock will provide taskings, and supervise, review and approve all work and performance. He will also approve all labor hours on invoices and travel vouchers.
Areas of Responsibility

Consultant will share project management of the Election Management Guidelines effort with another consultant selected by the EAC. The consultant will be responsible for working with and sharing responsibility with this co-manager. The consultant will also be required to work with a working group of election officials. NASED will be responsible, under separate agreement with the EAC, to assemble working groups of experienced state and local election officials as required to provide EAC subject matter expertise. The consultants shall work with NASED to create a working group(s), lead the group(s), collect and document its work product and use this work product to create the Management Guidelines. Consultants will be responsible for:

1. Developing a comprehensive outline of topics. Drawing on consultant’s own knowledge and experience, and in consultation with the NASED Working Group, develop a comprehensive subject matter outline for the Election Management Guidelines document. This outline should appropriately integrate with the 2005 EAC Voluntary Voting System Guidelines.

2. Prioritizing topics and creating a work plan. The consultants will prioritize the topics based on degree of perceived existing deficiencies, anticipated high return in administration improvement, and other relevant criteria. Topics that could be completed in time for use in the 2006 elections should be given a top priority rating.

Based upon the priorities developed, consultants will create a work plan, including a timeline for the development of guidelines for each topic. This work plan and timeline are essential products as they will set forth the long-term plan for the completion of the entire guidelines project. As such, the work plan and timeline are expected to project efforts well into the future. Given the long term nature of this process, it is EAC’s intention to focus efforts on subject matter modules so that products on particular topics can be completed piecemeal and be distributed to the election community as soon as they are completed. The work plan will be structured to accommodate this approach.

3. Developing draft guidelines. Following approval of the work plan, the Consultants/EAC shall coordinate with NASED to convene a subject matter Working Group. The EAC can request NASED to convene Working Group meetings and teleconferences and conduct limited research efforts. The Consultants shall manage, lead and task these working groups. Ultimately, the Consultants shall be responsible for creating draft guideline sections for subject matters identified in the working plan. These important drafts shall be presented to the EAC for review and adoption as guidance to state election officials. It is anticipated that this work will draw heavily on documented best practices and procedures already in use in election jurisdictions around the country.

4. Creating a final work plan and report. An import objective in this agreement is the creation of a final, practical work plan that may be used by the EAC as a long-term tool to complete its Election Management Guidelines. Given this fact, prior to the end of the
submitted for compensation under this agreement.

**Period of Appointment, Compensation and Travel.**

The period of appointment under this contract shall be one year. The appointment shall constitute intermittent appointment (without a regularly scheduled tour of duty) per 5 C.F.R. §340.401(b). The consultant shall not incur overtime. The consultant shall not receive automatic adjustments of pay based upon 5 U.S.C. 5303. The consultant is not eligible for sick and annual leave, nor compensation for work performed on federal holidays. The consultant shall be paid at a rate of $120 per hour. The consultant is expected to work as needed during the one year appointment period, however, the consultant shall not work more than 37 hours in any given two week period. Further, the consultant may not work more than 1,040 hours within the one year appointment. The dates of performance are flexible but shall be based upon the needs of the project and the EAC.

Consultant’s duty station shall be his/her home or place of business. The consultant has access to and shall supply common office equipment to include telecommunications, internet access, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word, Project and Excel). Other resources will be provided by the EAC as needed and at its discretion.

The consultant is required to travel on a periodic, as needed basis, throughout the duration of their appointment. Travel and compensation shall be in accordance with Federal Travel Regulations. All travel must be pre-approved by the EAC per Federal Travel Regulations and EAC policy. The consultant will be reimbursed, at the Federal government rates, for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel.

**Compensation Procedures**

Compensation shall be made for work done (labor hours) by submitting invoices. Invoices shall be submitted every four weeks from the date of award. A week shall be from Sunday to Saturday. The first pay period shall begin the Sunday prior to the date of award. As such, there will be 14 invoice periods. Invoices must be submitted every 4 weeks even if no work was performed. Invoices shall state the number of labor hours that have been expended under the agreement. The invoice must show the number of hours worked for each of the two week periods that make up the total invoice time. It must also note the total number of days on which the work was done. As noted above, the contractor may not invoice more that 37 labor hours per two week period. Furthermore, invoices shall report a cumulative total of hours worked during the contract performance period (one year). Invoices shall be delivered to Mr. Brian Hancock for review and approval, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington DC 20005. Compensation for travel shall be submitted by travel voucher consistent with Federal Travel Regulation and EAC requirements.
agreement, consultant will be tasked with creating a report and a final version of the work plan. Using their experiences over the last year, consultants will amend the initial work plan and timeline to reflect realities inherent in the project. The goals are to provide a plan and timeline that are realistic and as accurate as possible. The final report will provide guidance to the EAC regarding the most effective and efficient processes and practices to use in researching and developing Guidelines in the future. The report will recommend a Guidelines development process. Ultimately, the plan, timeline and report will be used by the EAC to set long-term project goals and allocate staff and resources.

Project Requirements

1. Draft outline of topics
2. Final outline of topics
3. Project Timeline
4. Management Guidelines Work Plan
5. Draft of Management Guideline Sections
6. Monthly progress reports
7. Briefings
8. Program Report and Final Work Plan

Contract Termination

This contract shall terminate at the end of the period of performance unless extended in writing by mutual agreement of the parties. The contract can be terminated in advance of the current end date by two weeks’ notice in writing by either of the parties.
MEMORANDUM

TO:   Diana Scott
FROM: Brian Hancock
RE:   Personal Services Contract – Stephen Berger
DATE: January 25, 2006

Attached is the justification document for a proposed personal services contract with Stephen Berger as well as the draft agreement. Please review the justification document. If money is available in the FY06 budget sufficient to fulfill the FY06 obligation under this agreement, please sign the justification document and forward it along with the draft agreement to Tom for approval.

I have made arrangements with Bert to send this to Tom via Federal Express. I have asked that all documents be returned to you upon approval and signature for processing the needed financial paperwork to fund this agreement.

Thank you for your assistance. If you have any questions, please let me know.
Background

Section 231 of HAVA requires EAC to provide for the testing, certification, decertification and recertification of voting system hardware and software by accredited test laboratories. To carry out this mandate, EAC must define the laboratory accreditation process that will follow receipt of NIST recommendation for accreditation, and the EAC certification process. The system certification process should include the following elements: 1) submission and technical review of both voting system test plans and test reports, 2) qualification, application and training requirements for technical reviewers, 3) evaluation criteria for test plans and test reports, 4) forms and documentation requirements, 5) procedures for interpretation and clarification of the voluntary voting system guidelines, 6) procedures for the resolution of test lab and vendor disagreements on the interpretation and application of the voting system guidelines. Concurrent with assuming these responsibilities, EAC will also be responsible for appropriate record keeping and information dissemination related to these programs.

Position Description and Qualifications

The appointment related to this determination shall be for the intermittent employment of a contracted expert (contractor). The contractor will review existing EAC drafts of work processes, evaluation criteria, documentation requirements and other materials to become familiar with the current status of the work. The contractor will review technical issues identified by EAC staff related to the testing and certification program and provide recommendations for resolution. The contractor will call upon past experience with conformity assessment programs in other industries and provide an analysis of alternative methodologies and criteria and make recommendations regarding the appropriate process for application to the EAC certification model. Contractor will also assist EAC staff in completion of procedures and associated materials based on the appropriate methodology.

To complete development of the EAC testing and certification program, the project can be broken down into several discreet phases in 2006.

Phase 1 will include the development of documents and written procedures addressing manufacturer (vendor) registration, and application and evaluation criteria for technical reviewers as well as the development of training scenarios for these reviewers.

Phase 2 will include final drafting of all procedures, forms and documentation related to the actual voting system certification, decertification and recertification process, to include options for program transparency and overall public information and education initiatives.
Phase 3 will address the development of an appeal process and an interpretation and petition process related to the testing and certification program. This phase should also develop processes and procedures to address changes (both normal and expedited) to previously certified voting systems.

To accomplish these goals, the contractor must have prior experience dealing with government conformity assessment programs, and knowledge of standards, standards setting bodies and the practical applications of those standards when testing a specific product. More specifically, then contractor must have an intimate working knowledge of the FEC’s 2002 Voluntary Voting Systems Standards and the EAC’s recently adopted 2005 Voluntary Voting System Guidelines. The contractor should also have extensive knowledge of election administration in the U.S. and the interplay of voting systems in the larger election process.

**Selection Process**

As stated above, the needed expertise is unique in that the contractor must have experience and expertise in standard setting and testing as well as demonstrated knowledge of election systems and the election process. While there are a number of persons experienced in standards setting and testing, there is only one uniquely qualified individual who has experience and expertise in applying that experience to testing and certification of election systems for use in this nation’s election process.

After review and research of available and qualified individuals, H. Stephen Berger was deemed by EAC as singularly qualified to assist EAC with completing and implementing the Voting System Testing and certification program required by the HAVA because of his unique combination of experience with standards setting and testing, knowledge of the election process, experience with election system standards and testing, and other related experience and technical skills.

Mr. Berger has over 20 years of experience with product development, technology planning and conformity assessment programs. Mr. Berger’s resume is attached for reference. That document shows that as director for Field Sensing Products for EMCO, Mr. Berger worked with the test department and accomplished improving throughput of that program by five times, with no increase in personnel. This was accomplished by extensive automation and the invention of new, patented test technology. While working as a Senior Engineer in Wireless Terminals Compliance and as Project Manager for Standards and Regulations for Siemens Corporation, Mr. Berger had extensive experience interacting with all aspects of the conformance assessment program developed by the Federal Communications Commission (FCC) relating to the testing of various wireless communications devices.

Mr. Berger also has unique and extensive experience with election systems and the election process. Mr. Berger is a member of the IEEE Standards Board and chair of the IEEE EMC Society Standards Development Committee and of the IEEE Project 1583 standards for voting equipment. From 2000 to 2002, Mr. Berger assisted the Federal Election Commission (FEC) in the development of the 2002 Voluntary Voting System Standards as a member of IEEE, and currently serves on the EAC Technical Guidelines Development Committee which guided NIST.
and EAC in the development of the 2005 Voluntary Voting System Guidelines. Mr. Berger has the unique experience of working on the EAC certification program. In 2005, he worked to assist the EAC in the initial conception and initial phases of development of the voting system testing and certification program.

**Determination that Pay Rate is Fair and Reasonable**

The pay rate of $135 per hour is fair and reasonable given Mr. Berger's experience, expertise and unique qualifications. This rate is below the rate generally charged in the private sector for experts with Mr. Berger's background and technical expertise. Similarly qualified individuals routinely charge between $125 and $175 per hour for similar services as required by EAC. Furthermore, the rate contemplated for this contract is a 10% reduction in Mr. Berger's regular hourly rate.

**Determination of Funds Availability**

The proposed contract would span two federal fiscal years, FY06 and FY07. After review of the FY06 budget, it has been determined that $78,000 is available in FY06 to fund the proposed contract. Furthermore, the proposed contract will be made subject to the availability of funding in FY07. The funding needed in FY07 to fulfill obligations under the proposed contract is $38,000.

**Conclusion**

Given the reasons listed above, H. Stephen Berger is the one individual in the United States that can provide the EAC with the necessary skill sets to complete the task of developing the EAC lab accreditation and voting system testing and certification program in an expedited and cost-effective manner.

Funding Availability Confirmed by:  
Diana Scott  
Date 1/25/2006

Approved by:  
Thomas R. Wilkey, Contracting Officer  
Date 1-31-06
Diana,

Gavin will very shortly be transmitting contract documents for Stephen Berger who we are hiring as an expert to assist us in completing the implementation of the testing and certification program. Funding is available in my budget for this contract. Since the contract goes over the end of this fiscal year, the budget breakdown is below.

FY '06 compensation approx. $71,280
FY '07 compensation Approx. $35,640 (assuming available funding)
FY '06 travel approx. $6,500
FY '07 travel, approx. $1,500

Stephen's information is:

Tom,

You will shortly receive documentation which would allow us to enter into a contract with Stephen Berger. We need to enter into this contract with Mr. Berger so EAC can use his expert assistance to expeditiously complete the implementation of our voting system testing and certification program.

As you are likely aware, Mr. Berger is uniquely qualified for this task given his background in working with the FCC testing and certification program for wireless phones, as well as for his wealth of experience with the IEEE 1583 voting standards project, the FEC's 2002 Voting system Standards project, and through his role as a TGDC member in the development of our recently released 2005 VVSG. As you are also aware, Mr. Berger assisted the EAC in FY 2005 during drafting of the outlines and objectives of our testing and certification program.

Funding is available in FY 2006 to cover the cost of this contract. For FY 2006, labor and travel costs will be approximately $77,780. Subject to the availability of funds in FY 2007, the remainder of Mr. Berger's labor and travel during our next fiscal year would be approximately $37,140.

Given the above information, I recommend that we go forward and enter into this contractual agreement with Stephen Berger.

Steve,

The attached contract should be signed by Tom tomorrow. Just wanted to give you a heads-up since we have changed our contracting procedures (mostly internal changes) significantly from last year. The major change from your end will be that we are contracting with you as an individual expert and not TEM Consulting as a whole. Your hourly rate is the same as that established last year, and, of course, the task is essentially the same.

Please review this as you have time and let me know if you have any questions. Thanks.

See you soon.

Brian

Steve,

Just a quick note to let you know that the contract is now in our finance office and will be forwarded to you via fax, with a hard copy to follow in the mail. Also, if you have a brief outline of what you plan to say at the EAC Meeting on Thursday, our General Counsel would like a copy for the Commissioner Briefing Books as soon as possible. This does not have to be extensive or exhaustive. You can simply email this to me when you have a moment. Thanks. See you on Wednesday.

Excellent! I will mark my calendar. If we can begin the meeting around noon on the 27th, it will allow for working group members to arrive in the morning on the 27th, and possibly return home in the evening on the 28th.

Brit - when you have some time, let's begin discussion on a draft project outline to get the discussion started at our first working group meeting.

Sandy and Linda - let us know as soon as you have confirmed the membership of the working group.

Connie
Linda, Connie, Brit, Sandy,

Would you all be available sometime Thursday morning for a relatively brief teleconference to officially kick-off the contract for the management guidelines work. We need to have this conversation as early as possible before the end of the fiscal year, and with the TDGC Plenary Meeting next week, time is limited.

Please let me know if you can do a conference around mid-morning, say 10:00am?

Myself, Carol and perhaps Tom will be here on the EAC end of the phone.

Thanks.

NOTES FROM CONFERENCE CALL.doc
Ms. Susan Pynchon  
Florida Fair Elections Coalition  
P.O. Box 317  
DeLand, FL 32721  

Dear Ms. Pynchon:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U. S. Election Assistance Commission (EAC) on April 11, 2007. The request sought "copies of all letters and/or emails to or from the state of Florida regarding what is available to the state in 2007 through 2008 and beyond for funding for voting systems or voting system components, including but not limited to any voting equipment for disabled voters. These inquiry letters may have been received from the state of Florida in 2006 and/or 2007."

The responsive records are attached. For your information, I have also attached a copy of a letter from EAC to the State of Florida regarding HAVA funds usage that was sent after your request.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you will have an opportunity to appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of EAC’s final response letter. Please include your reasons for reconsideration and attach a copy of this and subsequent EAC responses.

Sincerely,

Jeannie Layson  
Director of Communications  
U.S. Election Assistance Commission

Receipt of HAVA Funding
Initial Payment
101: $5,000,000.00
102: $0
251: $0

June, 2003
Receipt of HAVA Funding
Balance of Section 101
102 Funds
101: $9,447,580.00
102: $11,581,377.00

July, 2003
Distribution of HAVA funding to the state for section 102 purchases (replacement of punchcard or lever voting systems)
Total: $11,500,000.00
Total HAVA funding from section 102 to replace punchcard or lever voting systems: $11,500,000.00

June, 2004
Receipt of HAVA Funding
Year 2003 Title II Funding
251: $47,416,833.00

September, 2004
Distribution of HAVA funding to counties for compliance with Section 251 (ADA) for accessible machines at polling places
Grant award to 51 counties to get in to compliance
Total: $11,600,000.00 from 251 funding
(See Attachment C for county by county breakdown)

December, 2004
Receipt of HAVA Funding
Year 2004 Title II Funding
251: $85,085,258.00

May, 2006
Final distribution of HAVA funding to counties for compliance with Section 251 (ADA) for accessible machines at polling places
Grant award to 16 counties that were already in compliance
Total: $13,469,378.54 from 251 funding
(See Attachment D for county by county breakdown)

Total distribution for Section 301 purposes for accessible voting systems from Section 251 funding: $25,069,378.54

April, 2007
Discussion regarding payment of Governor’s proposed legislation with HAVA funding

Governor’s proposal:
1. Optical scan in all precincts and early voting sites
   Estimated cost to state: $22,861,850.00
2. One VVPAT at each precinct for ADA purposes
   Estimated cost to state: $7,511,360.00
3. One VVPAT at each early voting site for ADA purposes
   Estimated cost to state: $304,850.00
4. Ballot on demand grant to counties that were 100% touchscreen at early voting sites in 2006 general election (to be funded per voter)
   Grant amount: $5,000,000.00

Total: $35,678,060.00*

*Please note that counties will have additional costs.

FY 2004-05 Appropriation for Voting Systems Assistance  
11,600,000

Average cost per machine  
4,515.38

From funds in Specific Appropriation 28711, $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place. No supervisor of elections shall receive any funds until the county supervisor of elections certifies to the Department of State: 1) the number of precincts in the county; 2) the number of polling places in the county; 3) the number of voting machines the county has that meet the disability requirement; 4) the county's plan for purchasing the DRE's; and 5) the date that the county anticipates being in compliance.

The Department of State will determine the number of DRE's needed in each county based on the certifications provided by the supervisors of elections. Any county that receives funds from Specific Appropriation 28711 that is not in compliance with the accessibility requirements in Section 301(a)(3) Title III of the Help America Vote Act by January 1, 2006, shall be required to return those funds to the State.

Amy;
Thanks for the information.
We need you to identify which 15 counties have DRE which need to be replaced.
Thanks
Tom

Attached is the information from the conference call this morning.

Thank you,

Amy Woodward
Executive Assistant
Office of the Secretary
Hi Edgardo,

Would you please give me a call. We have a question regarding the use of HAVA Section 101 funds.

Thanks,
Barbara Leonard
Florida Division of Elections
850-245-6201

This response is provided for reference only and does not constitute legal advice or representation. As applied to a particular set of facts or circumstances, interested parties should refer to the Florida Statutes and applicable case law, and/or consult a private attorney before drawing any legal conclusions or relying upon the information provided.

Please note: Florida has a very broad public records law. Written communications to or from state officials regarding state business constitute public records and are available to the public and media upon request unless the information is subject to a specific statutory exemption. Therefore, your e-mail message may be subject to public disclosure.
Edgardo,

The legislative budget issue requesting additional funds for state match was inadvertently scanned twice. It is only one page.

Thanks,
Barbara

Barbara,
Both pages in the PDF that shows the legislative budget request appear to be the same. Are the pages different or was the same page copied twice?

Edgardo,

Attached are the following documents providing updated information regarding the findings included in the Florida Auditor General's Operational Audit Report # 2006-194:

Department of State Inspector General's Follow-up Review to Auditor General Report Number 2006-194
Letter dated December 13, 2006 from Inspector General to Secretary of State Cobb
Budget issue included in the FY 2007-08 Legislative Budget Request regarding additional funds for State Match
Florida Voting Systems Certification Checklist & Test Record

If you have any questions, please let us know.

Thanks,
Barbara

Subject: Re: HAVA Funding for Voter Verifiable Paper Audit Records

Amy and Barbara,
Do you have any additional documentation for the issues identified during your state single audit. I have a copy of your response letter to the state auditor dated June 15, 2006 but many of the items are planned actions. Do you have supporting documentation to show you've completed those things? I am trying to write our audit resolution report and would prefer it show as much completed as possible rather than using the report to ask for this info. Let me know. Thanks.

Edgardo,

Attached are the following documents providing updated information regarding the findings included in the Florida Auditor General's Operational Audit Report # 2006-194:

- Department of State Inspector General's Follow-up Review to Auditor General Report Number 2006-194
- Letter dated December 13, 2006 from Inspector General to Secretary of State Cobb
- Budget issue included in the FY 2007-08 Legislative Budget Request regarding additional funds for State Match
- Florida Voting Systems Certification Checklist & Test Record

If you have any questions, please let us know.

Thanks,
Barbara

Amy and Barbara,

Do you have any additional documentation for the issues identified during your state single audit. I have a copy of your response letter to the state auditor dated June 15, 2006 but many of the items are planned actions. Do you have supporting documentation to show you've completed those things? I am trying to write our audit resolution report and would prefer it show as much completed as possible rather than using the report to ask for this info. Let me know. Thanks.

Barbara,

Sorry for the delay but I was at the NASS and NASED conference over the weekend and then we had some bad weather that kept me from coming in. In regards to question #2, this is a purchase that is solely related to the statewide voter registration and therefore does not require pre-approval from the EAC. Just make sure to keep the proper records for audit purposes. Hope this helps. Thanks.

Edgardo,

The Florida Department of State is requesting guidance regarding the use of HAVA funds for several items:

1. The computer equipment used to operate Florida's statewide voter registration system is currently housed in a state-owned facility that is in the process of being sold. As a result, the Department is moving its computer operations to a private facility.

Following our conversation this morning, the Department has determined that State funds will be used to pay for the expenses associated with moving all of the equipment (including the statewide voter registration system equipment) to the new location.

However, after the Department has completed its relocation of the computer room to another facility, it will be necessary to make rental payments to the owner of the building. Is it possible for the Department to use HAVA funds to pay a portion of the rent for the space occupied by computer equipment used to support the statewide voter registration system?

2. The Department needs to purchase additional memory in order to provide an identical back-up computer for the statewide voter registration system in case of a disaster. We have received quotes from three contractors on the State Purchasing Contract with the lowest quote being from
Hewlett Packard at $81,760. We are requesting EAC approval to use HAVA Section 251 funds for this purchase.

3. During the summer of 2006 the Department requested guidance from the EAC regarding the use of HAVA funds for annual and/or sick leave payments to employees filling HAVA-funded positions who terminated employment with the State. Could you check on the status of a response regarding this issue. If you need additional information, please let us know and we’ll forward the original questions.

If you need any additional information regarding these items, please let us know. Thank you very much for your assistance.

Barbara,

This was great information. This is the same issue I am working on in relation to the single audit. Just so you know, this means you will get the answer from me, but then it will also be addressed in an audit resolution report. That resolution report will cover this issue and the other issues identified during the single audit. Since EAC oversees HAVA funds, we are responsible for resolving issues identified during audits conducted by our Inspector General and also single audits conducted by each state. I'll keep you posted as we move forward in that process. Let me know if you have any questions. Thanks.

Subject: Leave Payments to Terminating Employees

Peggy,

The Florida Department of State is requesting guidance from the EAC regarding leave payments to employees who have resigned from the Department of State and terminated employment in state government. Upon termination from the Department, these individuals have/will be paid for annual leave hours that were accrued during their tenure as state employees. During their employment with the Department of State, each employee was assigned to a position that worked exclusively on HAVA-related activities and was funded with HAVA dollars.

One individual was employed by the Department of State for eight months. However, he had been in state government for several years and transferred to the Department of State from another state agency. During that time he accrued 386 hours of annual leave. He accrued an additional 83 hours while employed at the Department of State. Upon termination from the Department, he was paid for 470 annual leave hours.

The other employee has been employed by the Department of State since mid-September 2003 and has worked exclusively in a HAVA-funded position during this period. He will be eligible for annual leave payments upon termination from state government at the end of June 2006. All of the annual leave hours were earned while he was working on HAVA activities.

In reviewing the language in federal OMB Circular A-87, it appears that it will be necessary for the Department of State to use state funds rather than HAVA funds for the leave payments to each of these individuals. However, since one individual was employed exclusively in a HAVA-funded position and earned the leave during this time, is it possible to use HAVA funds to pay for the accrued annual leave that will be paid to the individual upon termination from state government?

The situations referenced above relate to accrued annual leave. However, the same questions will apply when an employee filling a HAVA-funded position terminates from state government and is eligible to receive payment for sick leave.

We appreciate your assistance in determining the appropriate funding source when processing leave payments to individuals who worked in a HAVA-funded position at the time of termination from state government.
government.

Edgardo,

It is the same question that I posed before regarding moving to optical scan systems and voter verifiable paper audit records. This also includes using ballot on demand and Automark. Jennifer Kennedy (Deputy Secretary of State) spoke with Tom Wilkey on Tuesday and I spoke with him on Tuesday as well. From what I understand, the decision that you previously gave me stands. However, we need something more formal in writing. As you know, we are in legislative session and this is a request not only from us, but from both of our legislative houses. I would really appreciate getting it as soon as possible.

Thank you again for all your help on this. I know you guys are busy. Please let me know if there is anything I can do to help.

Amy Tuck

---

Barbara, 
Sorry for the delay in getting back to you - we have been swamped this week. I won't be in the office tomorrow but if you can email me the question, I can work on it over the weekend to get you a response for Monday. Thanks.

Hi Edgardo,

Would you please give me a call. We have a question regarding the use of HAVA Section 101 funds.

Thanks,
Barbara Leonard
Florida Division of Elections
850-245-6201

This response is provided for reference only and does not constitute legal advice or representation. As applied to a particular set of facts or circumstances, interested parties should refer to the Florida Statutes and applicable case law, and/or consult a private attorney before drawing any legal conclusions or relying upon the information provided.

Please note: Florida has a very broad public records law. Written communications to or from state officials regarding state business constitute public records and are available to the public and media upon request unless the information is subject to a specific statutory exemption. Therefore, your e-mail message may be subject to public disclosure.
Edgardo,

Again, thanks for your quick response on all of this. One more question... If counties used a ballot on demand system, which is basically just a ballot "printing" service at the early voting sites, could HAVA funding be used? Let me know if you need me to call or explain further.

Thank you,
Amy

Subject: RE: HAVA Funding

Amy,

Sorry for the longer response on this email. Its been a pretty busy day.

With question 1, I forgot that Florida did file a certification under HAVA section 251(b)(2)(A). This means you are correct, Florida can use any remaining requirements payments for the improvement of administration of elections for federal office. No additional certification is needed. VVPAR would fall under this category. Section 101 funds can be used for this purpose without any certification.

With #2, you are correct. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds. Our initial take on the automark system is that it would fall into this category because you would be replacing the current DREs with a new system.

Again, this is our general take on this without having reviewed any detailed information about Florida's particular situation. Let me know if you need any more info. Thanks.

Sorry – one more issue. There is some consideration of using an "AutoMARK" system instead of the VVPAR. I would assume this would follow along the same lines as the considerations for the VVPAR. Let me know if you need more information on that before responding.

Thanks again.

Edgardo,

I wanted to summarize our earlier conversation to make sure I am clear on how to proceed on this issue.

1. VVPAR (Voter verifiable paper audit record)

   These can be paid for from HAVA funding under certain circumstances although this is not a requirement in HAVA and does not meet Title 3 requirements.

Section 251 funding can be used for Title 3 activities or for improving the administration of elections for federal office. Under this guideline, Florida can do the following:

a. Certify that we have met the requirements of Title 3 and use the remaining 251 funds for improving federal elections.

b. Or if we have not met the requirements for Title 3, we can certify that we will not use more than the minimum payment (est. 11.6m) for "non-Title 3" activities.

As a state, we did certify in August, 2006 that we have met the requirements for Title 3, so we would be in position a. (above). I would assume that we could then use the Section 251 funds to provide voter verifiable paper audit record devices for touchscreens under the argument that it is to improve federal elections.
Section 101 funding can be used to improve administration of elections for federal office. If Florida decided to use this funding, we would not have to certify to the EAC.

2. Optical Scan

If the touchscreens that are being replaced were purchased with HAVA funding, then further HAVA funding may not be used for this purpose. If the touchscreens were purchased from state funding, then HAVA funding could be used for this purpose. I would assume we would follow the same guidelines in #1 concerning both the 251 and 101 funding.

And, of course, we are free to use state funding (or funding from the purchase of the systems) to upgrade as long as we remain in compliance with federal and state guidelines.

Thank you (and Julie) for taking the time to speak with me today. I appreciate the time and quick response. I look forward to hearing back from you.

Sincerely,

Amy K. Tuck, Esq.

Thank you for the response. We might have some additional questions. But, again, thank you for taking the time. I appreciate it. Amy

Amy,

Sorry for the longer response on this email. It's been a pretty busy day.

With question 1, I forgot that Florida did file a certification under HAVA section 251(b)(2)(A). This means you are correct, Florida can use any remaining requirements payments for the improvement of administration of elections for federal office. No additional certification is needed. VVPAR would fall under this category. Section 101 funds can be used for this purpose without any certification.

With #2, you are correct. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds. Our initial take on the automark system is that it would fall into this category because you would be replacing the current DREs with a new system.

Again, this is our general take on this without having reviewed any detailed information about Florida's particular situation. Let me know if you need any more info. Thanks.

Sorry – one more issue. There is some consideration of using an “AutoMARK” system instead of the VVPAR. I would assume this would follow along the same lines as the considerations for the VVPAR. Let me know if you need more information on that before responding.

Thanks again.

Subject: HAVA Funding
Importance: High

Edgardo,

I wanted to summarize our earlier conversation to make sure I am clear on how to proceed on this issue.

1. VVPAR (Voter verifiable paper audit record)

   These can be paid for from HAVA funding under certain circumstances although this is not a requirement in HAVA and does not meet Title 3 requirements.

Section 251 funding can be used for Title 3 activities or for improving the administration of elections for federal office. Under this guideline, Florida can do the following:
   a. Certify that we have met the requirements of Title 3 and use the remaining 251 funds for improving federal elections.
   b. Or if we have not met the requirements for Title 3, we can certify that we will not use more than the minimum payment (est. 11.6m) for “non-Title 3” activities.

As a state, we did certify in August, 2006 that we have met the requirements for Title 3, so we would be in position a. (above). I would assume that we could then use the Section 251 funds to provide voter verifiable paper audit record devices for touchscreens under the argument that it is to improve federal elections.

Section 101 funding can be used to improve administration of elections for federal office. If Florida decided to use this funding, we would not have to certify to the EAC.

2. Optical Scan
If the touchscreens that are being replaced were purchased with HAVA funding, then further HAVA funding may not be used for this purpose. If the touchscreens were purchased from state funding, then HAVA funding could be used for this purpose. I would assume we would follow the same guidelines in #1 concerning both the 251 and 101 funding.

And, of course, we are free to use state funding (or funding from the purchase of the systems) to upgrade as long as we remain in compliance with federal and state guidelines.

Thank you (and Julie) for taking the time to speak with me today. I appreciate the time and quick response. I look forward to hearing back from you.

Subject: Response: Using HAVA funds to replace voting equipment

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.
Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services
Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.
Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems."

Subject: Response: Using HAVA funds to replace voting equipment

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously
purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.
The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating
administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

Thank you. I guess we are all a little confused. We had originally thought we could use some funding for the optical scan part of the legislation but not for the vvpats. Based on this response it would seem that we could not use any of the funding for this legislation.

Subject: Fw: Response: Using HAVA funds to replace voting equipment
Importance: High

Amy,

I am on my way to work but am delayed due to traffic. However, I am forwarding you this response I sent to Bob West from the FL legislature who asked this question on Monday. Please read this over and let me know if it helps. Thanks.

Subject: Response: Using HAVA funds to replace voting equipment  

Mr. West,

You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA).
Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable,
allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.
Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems."

ecortes@eac.gov
Mr. Cortes,

Florida is requesting guidance on whether HAVA Section 251 funds can be used to purchase optical scan voting systems to replace existing touchscreen voting systems that are compliant with HAVA Section 301(a).

Prior to passage of the Help America Vote Act, during the 2001 Legislative Session, the Florida Legislature passed the Florida Election Reform Act of 2001, Chapter 2001-40, Laws of Florida. The legislation included an appropriation of funds to be distributed to counties for voting systems assistance.

The funds were distributed to counties in equal installments over a two year period to assist with purchasing voting systems to replace lever and punch cards machines as well as paper ballot voting systems. Florida distributed $24,093,750 to assist counties with purchasing new voting systems.

At the time that counties were replacing voting systems to comply with changes to Florida law, fifteen counties opted to purchase touchscreen voting systems and the remaining counties either purchased or already had precinct-based optical scan voting systems.

We are currently in the 2007 Legislative Session. The Governor has some proposed legislation that would provide the following:

1. A precinct-based optical scan in all precincts.
2. One touchscreen with voter verifiable paper audit record in each precinct (ADA)
3. Allow for counties to either use an optical scan or touchscreen (retrofitted) for use for early voting.

In reviewing this legislation, the question has been asked as to what HAVA funds, if any, we can use to pay for these changes. Although I know we've been working off the FAQ and advice you've given other states, I thought it was important to ask based on our circumstances as to what we can and cannot fund with HAVA funds.

I realize this is late notice, but we do need an answer sooner rather than later. If you need to call to discuss further, please feel free to do so. My direct line is 850.245.6285 and my cell is 850.294.5298. I apologize for the urgency but as we move through session, it has become an issue that we need to be able to answer definitively. I look forward to hearing from you.

Thank you.

Amy K. Tuck
Director
Division of Elections
Florida Department of State
Edgardo,

What are the restrictions on the use of the interest from the HAVA money and were do I find those rules. Can we use the interest to replace Florida DRE’s with optical scan?

Thanks

Mr. West,

You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter
registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state’s plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

**Costs must be Allowable, Allocable and Reasonable**

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were
made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

**Allowable Costs**

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

**Allocable Costs**

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Bob,
I apologize for the delayed response but I have been out of the office for a few days. We have also received an almost identical question from your Secretary of State's office and are preparing a formal response in coordination with our General Counsel's office. We realize you are in currently in legislative session and need these answers as soon as possible. Please let me know if there are additional questions you would like us to include in this response. Thanks.

Subject: Response: Using HAVA funds to replace voting equipment  
Importance: High

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting
systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state’s plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

**Costs must be Allowable, Allocable and Reasonable**

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

**Allowable Costs**

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

**Allocable Costs**

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section
251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State’s threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Mr. West,

You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election

020678
information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other
departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

**Indirect Costs**

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, *Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government*, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

**Reasonable Costs**

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

**Excerpt from response to Washington State, sent August 10, 2006:**

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory
2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems.”

Subject: RE: Response: Using HAVA funds to replace voting equipment

Thank you. I guess we are all a little confused. We had originally thought we could use some funding for the optical scan part of the legislation but not for the vvpats. Based on this response it would seem that we could not use any of the funding for this legislation.

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need
further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable.
In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the state's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here
to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. Subject: Response: Using HAVA funds to replace voting equipment

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted
under part 1 of subtitle D of title II.

F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.

G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.

H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

**Costs must be Allowable, Allocable and Reasonable**

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

**Allowable Costs**
A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

**Allocable Costs**

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

**Indirect Costs**

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, *Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government*, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State’s threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

**Reasonable Costs**

A state must do some assessment as to whether the costs are reasonable. This is done by
determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

**Excerpt from response to Washington State, sent August 10, 2006:**

“The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems.”

Amy and Barbara,
Do you have any additional documentation for the issues identified during your state single audit. I have a copy of your response letter to the state auditor dated June 15, 2006 but many of the items are planned actions. Do you have supporting documentation to show you've completed those things? I am trying to write our audit resolution report and would prefer it show as much completed as possible rather than using the report to ask for this info. Let me know. Thanks.

Amy,
Sorry for the longer response on this email. Its been a pretty busy day.

With question 1, I forgot that Florida did file a certification under HAVA section 251(b)(2)(A). This means you are correct, Florida can use any remaining requirements payments for the improvement of administration of elections for federal office. No additional certification is needed. VVPAR would fall under this category. Section 101 funds can be used for this purpose without any certification.

With #2, you are correct. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds. Our initial take on the automark system is that it would fall into this category because you would be replacing the current DREs with a new system.

Again, this is our general take on this without having reviewed any detailed information about Florida's particular situation. Let me know if you need any more info. Thanks.

"Tuck, Amy K." <AKTuck@dos.state.fl.us>

Sorry – one more issue. There is some consideration of using an “AutoMARK” system instead of the VVPAR. I would assume this would follow along the same lines as the considerations for the VVPAR. Let me know if you need more information on that before responding.

Thanks again.

Subject: HAVA Funding
Importance: High
I wanted to summarize our earlier conversation to make sure I am clear on how to proceed on this issue.

1. **VVPAR (Voter verifiable paper audit record)**

   These can be paid for from HAVA funding under certain circumstances although this is not a requirement in HAVA and does not meet Title 3 requirements.

   Section 251 funding can be used for Title 3 activities or for improving the administration of elections for federal office. Under this guideline, Florida can do the following:
   a. Certify that we have met the requirements of Title 3 and use the remaining 251 funds for improving federal elections.
   b. Or if we have not met the requirements for Title 3, we can certify that we will not use more than the minimum payment (est. 11.6m) for "non-Title 3" activities.

   As a state, we did certify in August, 2006 that we have met the requirements for Title 3, so we would be in position a. (above). I would assume that we could then use the Section 251 funds to provide voter verifiable paper audit record devices for touchscreens under the argument that it is to improve federal elections.

   Section 101 funding can be used to improve administration of elections for federal office. If Florida decided to use this funding, we would not have to certify to the EAC.

2. **Optical Scan**

   If the touchscreens that are being replaced were purchased with HAVA funding, then further HAVA funding may not be used for this purpose. If the touchscreens were purchased from state funding, then HAVA funding could be used for this purpose. I would assume we would follow the same guidelines in #1 concerning both the 251 and 101 funding.

   And, of course, we are free to use state funding (or funding from the purchase of the systems) to upgrade as long as we remain in compliance with federal and state guidelines.

   Thank you (and Julie) for taking the time to speak with me today. I appreciate the time and quick response. I look forward to hearing back from you.

Sincerely,

Amy K. Tuck, Esq.

Subject: Response: Using HAVA funds to replace voting equipment

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing
provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit
an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems."

Subject: Response: Using HAVA funds to replace voting equipment

Mr. West,

You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places,
including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.

H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises
generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. Edgardo,  
Attached are the following documents providing updated information regarding the findings included in the Florida Auditor General's Operational Audit Report # 2006-194:

- Department of State Inspector General's Follow-up Review to Auditor General Report Number 2006-194
- Letter dated December 13, 2006 from Inspector General to Secretary of State Cobb
- Budget issue included in the FY 2007-08 Legislative Budget Request regarding additional funds for State Match
- Florida Voting Systems Certification Checklist & Test Record

If you have any questions, please let us know.

Thanks,  
Barbara
Subject: Re: HAVA Funding for Voter Verifiable Paper Audit Records

Amy and Barbara,

Do you have any additional documentation for the issues identified during your state single audit. I have a copy of your response letter to the state auditor dated June 15, 2006 but many of the items are planned actions. Do you have supporting documentation to show you've completed those things? I am trying to write our audit resolution report and would prefer it show as much completed as possible rather than using the report to ask for this info. Let me know. Thanks.

Edgardo,

We should be able to forward something to you next week to document the steps that have been taken. We'll check with you first to be sure we're getting the information you need for your report.

Thanks,
Barbara

Amy and Barbara,
Do you have any additional documentation for the issues identified during your state single audit. I have a copy of your response letter to the state auditor dated June 15, 2006 but many of the items are planned actions. Do you have supporting documentation to show you've completed those things? I am trying to write our audit resolution report and would prefer it show as much completed as possible rather than using the report to ask for this info. Let me know. Thanks.

Barbara,

Sorry for the delay but I was at the NASS and NASED conference over the weekend and then we had some bad weather that kept me from coming in. In regards to question #2, this is a purchase that is solely related to the statewide voter registration and therefore does not require pre-approval from the EAC. Just make sure to keep the proper records for audit purposes. Hope this helps. Thanks.

Edgardo,

Have you had a chance to review question #2 in our request below regarding the purchase of additional memory for our statewide voter registration system?

Thanks,
Barbara

I believe that question #3 is related to the state single audit findings. It was included in the Operational Audit conducted by the Florida Auditor General’s Office. I will forward you the original request for
guidance that we sent to Peggy Sims last summer in case you don’t have access to it.

Thanks,
Barbara

Subject:Guidance Regarding Use of HAVA Funds

Edgardo,

The Florida Department of State is requesting guidance regarding the use of HAVA funds for several items:

1. The computer equipment used to operate Florida’s statewide voter registration system is currently housed in a state-owned facility that is in the process of being sold. As a result, the Department is moving its computer operations to a private facility.

Following our conversation this morning, the Department has determined that State funds will be...
used to pay for the expenses associated with moving all of the equipment (including the statewide voter registration system equipment) to the new location.

However, after the Department has completed its relocation of the computer room to another facility, it will be necessary to make rental payments to the owner of the building. Is it possible for the Department to use HAVA funds to pay a portion of the rent for the space occupied by computer equipment used to support the statewide voter registration system?

2. The Department needs to purchase additional memory in order to provide an identical back-up computer for the statewide voter registration system in case of a disaster. We have received quotes from three contractors on the State Purchasing Contract with the lowest quote being from Hewlett Packard at $81,760. We are requesting EAC approval to use HAVA Section 251 funds for this purchase.

3. During the summer of 2006 the Department requested guidance from the EAC regarding the use of HAVA funds for annual and/or sick leave payments to employees filling HAVA-funded positions who terminated employment with the State. Could you check on the status of a response regarding this issue. If you need additional information, please let us know and we'll forward the original questions.

If you need any additional information regarding these items, please let us know. Thank you very much for your assistance.

Thanks,
Barbara Leonard

Barbara,  
This was great information. This is the same issue I am working on in relation to the single audit. Just so you know, this means you will get the answer from me, but then it will also be addressed in an audit resolution report. That resolution report will cover this issue and the other issues identified during the single audit. Since EAC oversees HAVA funds, we are responsible for resolving issues identified during audits conducted by our Inspector General and also single audits conducted by each state. I'll keep you posted as we move forward in that process. Let me know if you have any questions. Thanks.

Dear Barbara,

You have asked whether your state was sent a request for amended financial reports of HAVA funds. The EAC mailed a notice to your chief state election official on January 10, 2007. Attached are electronic copies of the letters that were sent regarding your state and copies of the attachments. Please let me know if you have any additional questions about this request. Thank you.

Kurt Browning  
Secretary of State  
R. A. Gray Building  
500 S. Bronough Street, Room 316  
Tallahassee, Florida 32399-0250

Dear Secretary Browning:

Attached is the final audit resolution report of the U.S. Election Assistance Commission (EAC) regarding the single audit of Help America Vote Act (HAVA) funds expended by the Florida Secretary of State’s Office. The resolution is based upon the information provided by the audit conducted by the Auditor General of the State of Florida.

After careful consideration of all the facts presented, EAC has determined that the state must submit documentation that details the new state procedures to maintain an accurate and current list of voting systems in the state. The state must submit a timeline to the EAC indicating when the revised state plan will be submitted to EAC for publication in the Federal Register. The state must submit a copy of the new department policy indicating the requirement to sign salary certification statements.

If the state believes that anything in this final management decision is an adverse action and the state does not agree, the state shall have 30 days to appeal EAC’s management decision. The appeal must be made in writing to the Chairman of the EAC. Within 30 days of receiving the appeal, the Commission may hold a hearing to consider the appeal, take evidence or testimony related to the appeal, and render a decision on the appeal, if appropriate at that time. The Commission will render a final and binding decision on the appeal no later than 60 days following the receipt of the appeal or the receipt of any requested additional information. If the state does not file an appeal, this decision will become final and binding at the expiration of the appeal period.

We appreciate your cooperation in this matter as we work together to ensure that HAVA funds are used in accordance with the law.

Sincerely,

[Signature]

Thomas R. Wilkey  
Executive Director
Final Audit Resolution Report
Florida Single Audit – Assignment No. E-SA-FL-11-06
Issued March 30, 2007

Summary of Decision
The U.S. Election Assistance Commission (EAC or Commission) has determined that the state must submit documentation that details the new state procedures to maintain an accurate and current list of voting systems in the state. The state must submit a timeline to the EAC indicating when the revised state plan will be submitted to EAC for publication in the Federal Register. The state must submit a copy of the new department policy indicating the requirement to sign salary certification statements.

Background
The EAC is an independent, bipartisan agency created by Help of America Vote Act of 2002 (HAVA). It assists and guides state and local election administrators in improving the administration of elections for federal office. EAC provides assistance by dispersing federal funds to states to implement HAVA requirements, adopting the voluntary voting system guidelines, and serving as a national clearinghouse and resource of information regarding election administration. EAC is also responsible for the accreditation of testing laboratories and the certification, decertification, and recertification of voting systems.

In addition to EAC’s role in distributing HAVA funds, the agency is responsible for monitoring the fiscally responsible use of HAVA funding by the states. The EAC seeks to ensure funds distributed under HAVA are being utilized for the purposes mandated by HAVA to ultimately improve the administration of federal elections. To fulfill this responsibility, the EAC conducts periodic fiscal audits of state HAVA fund expenditures and determines the any corrective actions necessary to resolve issues identified during audits. EAC is also responsible for resolving issues identified during state single audits conducted under the Single Audit Act. The EAC Office of Inspector General (OIG) has established a regular audit program in order to review the use of HAVA funds by states. The OIG’s audit plan and audit findings can be found at www.eac.gov.

The Audit Follow-up Policy approved by the Commission authorizes the EAC Executive Director to issue the management decision for external audits and single audits. The Executive Director has delegated the evaluation of final audit reports provided by the OIG and single audit reports issued by the states to the EAC Programs and Services Division. The Division provides a recommended course of action to the Executive Director for resolving questioned costs, administrative deficiencies, and other issues identified during an audit. The EAC Executive
Director issues a Final Audit Resolution (management decision) that addresses the findings of the audit and details corrective measures to be taken by the state.

When an audit identifies questioned costs, the EAC considers not only whether the state followed proper procurement procedures, but also whether the expenditures actually served to further the goals of HAVA. EAC has identified three methods of resolution regarding questioned costs: 1) Expenditures that were identified as permissible under HAVA and federal cost principles, but did not follow appropriate procedures do not have to be repaid; 2) Expenditures that may have been permissible under HAVA but lacked adequate documentation must be repaid to the state election fund, which was created in accordance with HAVA section 254(b)(1); and 3) Expenditures that were clearly not permissible under HAVA or federal cost principles must be repaid to the U.S. Treasury. In addition to repayment of funds, the EAC may require future reporting by a state to ensure that proper internal controls and procedures have been established to prevent future problems.

States may appeal the EAC management decision. The EAC Commissioners serve as the appeal authority. A state has 30 days to appeal EAC’s management decision. All appeals must be made in writing to the Chair of the Commission. The Commission will render a decision on the appeal no later than 60 days following receipt of the appeal or, in the case where additional information is needed and requested, 60 days from the date that the information is received from the state. The appeal decision is final and binding.

Audit History

The Auditor General of the State of Florida conducted an audit under the Single Audit Act that covered the use of HAVA funds provided to Florida. The single audit report (Assignment No. E-SA-FL-11-06) for the State of Florida identified six issues that require EAC resolution.

Audit Resolution

The following categories explain the results of the audit outlined in the final audit report and how the EAC reached its final audit resolution regarding the issues identified by the OIG.

State did not maintain a current list of certified voting systems used by counties

EAC agrees with the finding that the state did not maintain a current listing of voting systems certified and in use by the counties. The state is creating new procedures to update the state list of voting systems on a regular basis, updated the list of voting systems certified and in use by Florida counties, and made the list available on its website at http://election.dos.state.fl.us. Within 30 calendar days, the state must submit documentation that details the new state procedures to maintain an accurate and current list of voting systems in the state.

State incorrectly calculated Maintenance of Effort

EAC agrees with the findings that the state did not properly calculate the required maintenance of effort and did not maintain this level of expenditure for the 2004-2005 fiscal year. The state must update its HAVA state plan to account for the maintenance of effort. The state has indicated it has begun the process of updating the state plan. The
updated state plan must include how the state will spend the $7,630 shortfall in maintenance of effort spending during the 2004-2005 fiscal year in the future. Within 30 calendar days, the state must submit a timeline to the EAC indicating when the revised state plan will be submitted to EAC for publication in the \textit{Federal Register}.

**Salaries were not properly supported**

We agree with the findings that the state did not maintain appropriate records to document employee time spent on HAVA activities. EAC has requested that the OIG conduct a more in-depth review of these salary expenses to determine if costs allocated to salaries should be questioned in addition to the finding on lack of supporting documentation. In response to the findings on supporting documentation for salary costs, Florida has implemented new policies and procedures to appropriately track employee time spent on HAVA related activities. Within 30 calendar days, the state must submit a copy of the new department policy indicating the requirement to sign salary certification statements.

**Payments for unused leave to terminated employees was charged as a direct cost**

The state has repaid the state election fund for all unused leave payments made to terminated employees and charged as a direct cost to HAVA funds. The state has also requested the EAC to issue guidance on this issue to assist states in appropriately paying out unused leave to terminated employees working on HAVA programs. EAC will issue guidance on this matter during the 2007 federal fiscal year. No further action is required by the state on this matter at this time.

**Proper supporting documentation for expenditures was not always maintained**

EAC agrees with the finding that the state did not always properly support expenditures made with HAVA programs. The amount of expenditures that were not properly supported was not quantified during the single audit and no expenditures made with HAVA funded contracts were questioned. EAC will not make any determinations on potential repayment of unsupported costs until the OIG conducts a full audit of Florida's usage of HAVA funds through the regular OIG audit program. The state has detailed the new procedures it has put in place to ensure that all future payments made with HAVA funds have all the necessary supporting documentation prior to payment by the state. No further action is required by the state on this matter at this time.

**State did not follow federal requirements for interagency agreements**

EAC agrees with the finding that the state did not follow federal requirements for interagency agreements financed with HAVA funds. The state has detailed the new procedures it has put in place to ensure that all future interagency agreements made with HAVA funds meet all the necessary federal requirements and that appropriate monitoring is conducted by the state. No further action is required by the state on this matter at this time.
Final Management Decision

EAC has determined that the state must submit documentation that details the new state procedures to maintain an accurate and current list of voting systems in the state. The state must submit a timeline to the EAC indicating when the revised state plan will be submitted to EAC for publication in the Federal Register. The state must submit a copy of the new department policy indicating the requirement to sign salary certification statements. All additional information requested from the state must be submitted to the EAC within 30 calendar days.

Florida shall have 30 days to appeal EAC's management decision. The appeal must be made in writing to the Chairman of the EAC. Within 30 days of receiving the appeal, the Commission may hold a hearing to consider the appeal, take evidence or testimony related to the appeal, and render a decision on the appeal, if appropriate at that time. The Commission will render a final and binding decision on the appeal no later than 60 days following the receipt of the appeal or the receipt of any requested additional information. If the state does not file an appeal, this decision will become final and binding at the expiration of the appeal period.
Final Audit Resolution Report

Florida Single Audit – Assignment No. E-SA-FL-11-06

Attachment 1
Memorandum

To: Thomas Wilkey
   Executive Director

From: Curtis W. Crider
   Inspector General

Subject: Findings in the State of Florida Auditor General Audit of the Department of State Help America Vote Act and the Florida Registration System (Assignment No. E-SA-FL-11-06)

The subject report (Attachment 1) contains several findings related to the Florida Department of State’s (Department) administration of Help America Vote Act (HAVA) funds. The audit was performed by the Auditor General of the State of Florida, who is responsible for the report’s findings.

The findings and recommendations are summarized below and presented in further detail in the attachment.

**Finding 3:** The Department did not maintain a current listing of voting systems certified and in use by the counties.

**Recommendation:** The Department should develop a current, reliable control listing; establish procedures to ensure that Supervisors of Elections submit all voting system information required by State law, and periodically confirm the accuracy of its listing with the Supervisor of Elections. Such confirmations should be made in connection with the Department’s periodic reconciliation of its control listing to the voter systems information provided and on file at the Department.

**Proposed Corrective Actions:** The Department agreed that updated information was essential to determining whether the voting systems used by the counties met the requirements of the law. The Department indicated that it would institute a process to periodically confirm with the Supervisor of Elections that the information they have filed with the Department is accurate and that all information required by law is on file with the Department.
Finding 4: The Department incorrectly calculated the required Maintenance of Effort (MOE) and did not maintain the required level of expenditures for the 2004-2005 fiscal year.

Recommendation: The Department should update the HAVA Plan to reflect the revised MOE amount. The Department should ensure that the required MOE level is met each fiscal year.

Proposed Corrective Actions: The Department agreed to update the State of Florida HAVA plan to reflect the revised required MOE amounts. In addition, the Department indicated that it will continue to review state expenditures in future years to ensure that the MOE threshold is exceeded. The Department indicated that in future years, the level of state effort should exceed the required threshold, compensating for the $7,630 MOE shortfall for the 2004-2005 fiscal year.

Finding 5: Salary certifications required for employees who worked solely on HAVA were not maintained. Activity reports were not always maintained to support personnel costs charged to the HAVA program.

Recommendation: The Department’s procedures should ensure that required documentation supporting charges to the HAVA Program (including certifications and personnel activity report) is properly and timely prepared and maintained. For any costs improperly charged to the HAVA Program, appropriate corrections should be made.

Proposed Corrective Actions: The Department indicated that it has instituted a procedure for obtaining time certifications from employees in HAVA funded positions. The certifications will be obtained on a semi-annual basis. If the Department becomes aware that any employee has worked on activities not related to the HAVA program, the costs associated with those other activities will be reimbursed to the HAVA program.

Finding 6: Contrary to Federal cost principles, payments for unused leave to terminated employees was charged as a direct cost instead of being allocated as a general administrative expenses to all activities of the governmental unit.

Recommendation: The Department, in compliance with Federal cost principles; allocate as a general administrative expense unused leave payments. In addition, any costs improperly charged to the HAVA Program should be corrected.

Proposed Corrective Actions: The Department indicated that it would seek guidance from the Elections Assistance Commission on the proper disposition of unused leave payments.

Finding 8: HAVA program, expenditures were not always properly supported.

Recommendation: The Department should ensure that required contractual terms are met and services are received prior to payment. In addition, the Department should only pay contractors in amounts agreed upon by specific contract or purchase order.
Proposed Corrective Actions: The Department indicated that the contract manager would review and certify that the requests for payment were properly supported and that contract requirements, milestones, and deliverables have been met prior to submitting the requests to Budget and Financial Services.

Finding 9: The Department did not always follow Federal requirements with regards to awards to other State agencies.

Recommendation: The Department should take steps to ensure that interagency agreements include all applicable Federal information and requirements and that appropriate monitoring is performed.

Proposed Corrective Actions: The Department indicated that it will ensure that interagency agreements with state agencies Utilizing HAVA funds include all of the information required by Federal standards. In addition, the Department would obtain the appropriate documentation to evidence expenditure of HAVA funds by the other State agencies.

Based on the findings, we recommend that the EAC ensure that the department completes its planned corrective actions. Please provide us with documentation of the action(s) taken to implement this recommendation by November 1, 2006. If you have any questions about this matter, please call me at (202) 566-3125.

cc: Chairman, U.S. Election Assistance Commission

Attachment

020733
This operational audit focused on the Department of State's administration of the Federal Help America Vote Act of 2002 (HAVA) during the period July 1, 2004, through February 28, 2006, and selected actions taken through May 23, 2006. In addition, we evaluated the effectiveness of selected controls related to the Florida Voter Registration System, implemented to satisfy specific requirements of the Act for a computerized Statewide voter registration list. Through June 30, 2005, the Department has been awarded $160 million in HAVA funding on behalf of Florida.

HELP AMERICA VOTE ACT

Finding No. 1: The Department did not have a procedure in place to evidence for the public record that voting systems being certified had met the requirements of Florida law.

Finding No. 2: The Department's established procedures did not prohibit the Secretary of State and any examiners from having a pecuniary (financial) interest in the examination of and approval of voting equipment.

Finding No. 3: The Department did not maintain a current, reliable control listing of voting systems certified and in use by the counties. In addition, the Department did not have a procedure in place to ensure that voting system information was on file with the Department.

Finding No. 4: The Department incorrectly calculated the required maintenance of effort that was included in the State of Florida HAVA Plan and also did not maintain the required level of expenditures for the 2004-05 fiscal year.

Finding No. 5: Salary certifications required for employees who worked solely on the HAVA Program were not maintained. Also, personnel activity reports were not always maintained to support personnel costs charged to the HAVA Program.

Finding No. 6: Contrary to Federal cost principles, payment for unused leave to a terminating employee was charged as a direct cost to the Program instead of being allocated as a general administrative expense to all activities of the governmental unit.

Finding No. 7: Controls to ensure that voter education programs were in compliance with Florida law and Department rule were insufficient.

Finding No. 8: HAVA Program expenditures were not always properly supported.

Finding No. 9: The Department did not always follow Federal requirements with regards to awards to other State agencies.

FLORIDA VOTER REGISTRATION SYSTEM (FVRS)

Finding No. 10: Improvements were needed in the Department's Information Technology (IT) risk management practices.

Finding No. 11: The Department had not adopted a governance model addressing the management, use, and operation of FVRS commensurate with its authority and...
responsibility to ensure the system's security, uniformity, and integrity.

Finding No. 12: Although the Department had put measures in place to help ensure the integrity of data in FVRS, improvements were needed in the processes for identifying duplicate registrations and ineligible voters.

BACKGROUND

With the passage and signing of the Help America Vote Act (HAVA) on October 29, 2002, election reform began throughout our nation. HAVA contains numerous requirements that every state must meet to improve election administration in many areas. The requirements, most of which were to take effect between January 1, 2004, and January 1, 2006, include replacing punch card and lever-operated voting machines, allowing voters to verify their votes before casting their ballots, providing voters with provisional ballots, providing access for voters with disabilities, and creating a Statewide voter registration list.

HAVA created the Election Assistance Commission (EAC) as an independent commission to administer the provisions of the Act. Specifically, HAVA charges the EAC with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, and developing a national certification program for voting systems. The EAC also serves as a national clearinghouse and resource of information regarding election administration.

Funding comes from four different HAVA programs. As shown on Appendix A, through June 30, 2005, the Department had been awarded $160,207,602 in HAVA funding on behalf of Florida relating to Titles I and II. For each of the four programs, HAVA limits the use of funds to particular purposes as follows:

- Title II, Section 251 funding allows states to meet uniform minimum voting system standards; provide a provisional voting mechanism, as well as minimal voter information requirements; and maintain a single computerized statewide voter registration list. However, states, once meeting these requirements, can use the funds to improve the administration of Federal elections.

Appendix B shows for each of the four programs the funds received, amounts spent or obligated, and the available balances.

In response to audit inquiry, the Department provided us with a document titled Funds Revenue and Usage Life of HAVA Grant that projects HAVA funds being fully depleted sometime during the 2019-20 fiscal year. For the majority of the awarded funds, there is no deadline by which the Department must expend the funds received. However, included in the award total is $1.676 million in Title II, Section 261 funds that are available for drawdown from the Federal Government as expended. These funds must be expended within five years of the original award year.

HAVA requires all states to develop and implement a Statewide plan that includes 13 primary elements. The State of Florida HAVA Plan incorporated these 13 primary elements, and Appendix C contains a listing of the elements. Florida enacted legislative and local reforms to ensure that the elements are consistent with and clearly outlined in Florida Statutes, Florida System Voting Standards (Standards), rules, and regulations.

The administration of elections in Florida occurs at the State and local levels. The Secretary of State is the Chief Election Officer under Florida law. As Chief Election Officer, the Secretary of State is responsible for the coordination of the State's responsibilities under HAVA.

1 Section 97.012, Florida Statutes.
FINDINGS AND RECOMMENDATIONS

Help America Vote Act (HAVA)

Finding No. 1: Voting System Certification Checklist

In accordance with Florida law, the Department is to examine all makes of electronic or electromechanical voting systems submitted to it by any person owning (such as vendors) or interested in an electronic or electromechanical voting system (such as boards of county commissioners of any county seeking approval of a given system) and determine whether such systems comply with the voting systems requirements provided in Section 101.5606, Florida Statutes. Additionally, the Department has developed Standards that provide information and guidance on the State's requirements and evaluation methods for voting system certification. Upon determining that the voting system complies with such requirements, the Department issues a certificate.

Our audit disclosed that the Department had implemented voter system certification procedures that incorporated the requirements included in Section 101.5606, Florida Statutes. However, we noted that a procedure was not in place to evidence for the public record that the voting systems being certified had met the requirements of Florida law. Therefore, a determination could not be made by us as to whether the requirements of Florida law had been met with regard to voter system certifications.

Department personnel indicated during our field work that a document titled Florida Voting Systems Certification Checklist & Test Record (Checklist) had been drafted that would provide a mechanism to document the Department's processes performed relating to Section 101.5606, Florida Statutes. However, this Checklist was not in use during the audit period and no other document was available for such purposes.

Finding No. 2: Pecuniary Interests

Florida law states that neither the Secretary of State nor any examiner shall have any pecuniary (financial) interest in the examination and approval of voting equipment.

In response to audit inquiry as to Department procedures to ensure compliance with the above-noted Florida law, Department staff referred us to the section of the Department of State Employee Handbook (Handbook) titled "Relationships with Regulated Entities." This section of the Handbook requires employees to disclose in writing to the Secretary of State or his/her designee of a financial interest in a regulated entity. While the Handbook provision may provide some assurance of the disclosure of pecuniary interests should they exist, a procedure requiring an affirmation as to the absence of pecuniary interests may be more effective and responsive to the significant loss of credibility that would result should the existence of a conflict of interest go undisclosed.

Recommendation: We recommend that the Department establish procedures requiring the periodic affirmation of the absence of pecuniary and other conflicts of interests.

Finding No. 3: Certified Voting Systems

Florida election laws require the Department, among other duties, to:

- Examine and approve voting systems through a public process to ensure that the voting systems meet the standards outlined in Section 101.5606, Florida Statutes, and similar standards outlined in HAVA requirements under Section 301 of Title III. (Section 101.5605, Florida Statutes.)

---

2 Sections 101.5605(1) and (2), Florida Statutes.
3 Section 101.5605(2)(e), Florida Statutes.
Maintain voting system information including copies of the program codes, user and operator manuals, software, and any other information, specifications, or documentation relating to an approved electronic or electromechanical voting system and its equipment. (Section 101.5607, Florida Statutes.)

The Department is also responsible for demonstrating compliance with Federal laws, regulations, and contracts governing the use of HAVA funds.

To allow for a ready demonstration of record that all voting systems meet the requirements of State laws and HAVA requirements, the Department should have in place a current inventory of the voting systems in place in each county. To ensure the accuracy and completeness of voting system records and files, this inventory should then be compared periodically to the voting system information maintained on file pursuant to State law. Our audit tests disclosed that such procedures were not in place. Specifically:

- The Department did not maintain a current, reliable control listing of specific certified voting systems and system configurations implemented in each county. In response to our request for an official control listing of voting systems currently in use by all 67 counties, the Bureau Chief of Voting Systems Certification referred us to a Web site maintained by the Department that provides a link to information about specific certified voting systems and the system configurations being implemented by each county and stated, "The web site is updated as we receive 'system acquisition' reports from the counties. There may be a lag between the time a county acquires its system and the time we receive such a report. In some cases, a county may forget to notify us. In addition, I don't think there is any such 'official' listing." Our review of the Web site and other listings provided by the Department disclosed several instances in which the voting systems shown were not HAVA compliant.

Absent a current, reliable control listing of specific certified voting systems and system configurations implemented in each county, the Department cannot be assured and demonstrate that voting systems in use by the counties meet the standards outlined in Section 101.5606, Florida Statutes, and similar standards outlined in HAVA requirements.

The Department did not have a procedure in place to ensure that copies of program codes, user and operator manuals, software, and any other information, specifications, or documentation related to an approved electronic or electromechanical voting system and its equipment were on file with the Bureau of Voting Systems Certification. Section 101.5607(1)(a), Florida Statutes, requires that this information be filed with the Department by the Supervisor of Elections at the time of purchase or implementation. An appropriate procedure would include a periodic comparison of the control listing referenced in the preceding bullet to the voting system information on file at the Department.

During the audit period, funds were provided to counties for the purpose of purchasing accessible voting systems as required by Title III, Section 301, HAVA. We selected disbursements made to four counties and requested documentation from the Department demonstrating compliance with Section 101.5607(1)(a), Florida Statutes. Specifically, we examined Department records to determine if such information for the counties was on file. Our examination disclosed that voting system information was not available for one county; incomplete voting system information was available for another county; and, although some voting system information was on file for a third county, the information on file did not appear to reflect the purchase of the accessible voting system.

In response to audit inquiry, we were informed that the Department requests this information from the counties when the Department becomes aware that a county has purchased new equipment and that the Department currently has no procedures in place for routinely requesting such information periodically from each of the counties.

State law requires the Department to maintain voting system information and provides that any such information or materials that are not on file with and approved by the Department, including any updated or modified materials, may not be used in an election. This is especially important because voting systems are upgraded, modified, and changed both before and after delivery to the counties, and the Department has a responsibility to maintain current and accurate voting system information for each county.

* Section 101.5607, Florida Statutes.

5 Section 101.5607(1)(a), Florida Statutes.
Details of the exceptions noted in the bullets above were provided by us to the Department for immediate resolution.

Recommendation: We recommend that the Department develop a current, reliable control listing; establish procedures to ensure that Supervisors of Elections submit all voting system information required by State law, and periodically confirm the accuracy of its listing with the Supervisors of Elections. Such confirmations should be made in connection with the Department's periodic reconciliation of its control listing to the voting systems information provided and on file at the Department.

Finding No. 4: Maintenance of Effort

For activities funded by HAVA, the Department is to maintain the expenditures of the State at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ended June 30, 2000. The State of Florida HAVA Plan stated that, in determining Florida's maintenance of effort (MOE) expenditures, the Division of Elections' calculation included 1999-00 fiscal year expenditures for salaries and benefits, operating capital outlay, and voter fraud programs for the Division of Elections' Director's Office and the portion of the Bureau of Election Records' expenditures pertaining to election administration. The amount calculated and reported in the State of Florida HAVA Plan for the 1999-00 MOE totaled $3,082,224.

Our tests of the data supporting the Department's MOE calculation disclosed that the Department failed to use the final expenditure data reported in the State's accounting system (Florida Accounting Information Resource Subsystem). The amounts used were those recorded as of June 28, 2000. Our tests also disclosed that the Department's calculation included, in some instances, budgeted rather than actual salary expenditures.

The final expenditure data as of June 30, 2000, as shown by the State's accounting system totaled $3,570,408 (or $488,184 more than the MOE expenditure amount reported in the HAVA Plan). In addition, our tests disclosed that the Department MOE for the 2004-05 fiscal year totaled $3,562,778, resulting in the Department failing to meet the required MOE of $3,570,408 by $7,630.

Recommendation: The Department should update the State of Florida HAVA Plan to reflect the revised required MOE amount and ensure that the required MOE level is met each fiscal year in accordance with HAVA requirements.

Finding No. 5: Salary Certifications and Activity Reports

Federal cost principles require that charges for salaries for employees who are expected to work solely on a single Federal award or cost objective be supported by periodic certifications that indicate that the employee worked solely on that program for the period covered by the certification. These certifications are to be prepared at least semiannually and signed by the employee or supervisory official having first-hand knowledge of the work performed by the employee. These principles also require that charges for salaries of employees who work on multiple activities or cost objectives should be distributed and supported by personnel activity reports or equivalent documentation.

In response to audit inquiry, the Department provided us with a listing of employees who worked solely on the HAVA Program during the period July 1, 2004, through February 28, 2006. We then requested certifications for each of the employees identified by the Department. We also selected nine employees who the Department represented to us had worked solely on the HAVA Program to verify that they had not worked on any other activity. These audit procedures disclosed the following deficiencies:

- Certifications were not always prepared in compliance with Federal cost principles. Specifically, certifications were not prepared for 12 employees who worked solely on the HAVA Program during the period July 1, 2004, through June 30, 2005. The salaries and benefits for these

---

6 Section 101.5607(1)(e), Florida Statutes.
12 employees totaled $524,787.63. Additionally, for 25 of the 27 employees who worked solely on the HAVA Program during the period July 1, 2005, through December 31, 2005, certifications were not obtained until April 2006. For 2 of the 27 employees, no certifications were on file. In response to audit inquiry, Department staff provided one certification that was signed on May 12, 2006, by an employee's supervisor attesting that the employee had worked solely on the HAVA Program. The employee had resigned on October 31, 2005. For the other instance, the Department stated that the employee worked on non-HAVA related activities and, since there are no time reports documenting the employee's work activities, the Department estimated that approximately 10 percent of the employee's time during the July 2005 through January 2006 period was related to non-HAVA related activities and that the Department was currently preparing correcting entries to reimburse the HAVA Program for the improper costs.

For another employee working on multiple activities, charges were not supported by personnel activity reports, contrary to Federal cost principles. The employee, even though he had completed a certification that he worked solely on the HAVA Program, indicated to us that only approximately 75 percent of the time worked was related to the HAVA Program. However, the employee's personnel activity report did not identify the specific program areas worked on and, as a result, salary and benefits totaling approximately $3,600 monthly were charged to the HAVA Program.

Without adequate procedures and supporting documentation, the Department cannot ensure that Federal funds have been expended only for authorized purposes.

In response to audit inquiry, Department staff stated, "After the Department of State became aware of the requirement for individuals filling HAVA-funded positions to complete certifications regarding work performed, a form was developed that could be customized for each employee. The certifications will be prepared on a semi-annual basis to coincide with the first and last six months of the state fiscal year. The first work certification forms cover the period from July 2005 through December 2005." The Department further indicated that it was in the process of developing written procedures to address the certification requirements.

Recommendation: We recommend that the Department's procedures ensure that required documentation supporting charges to the HAVA Program (including certifications and personnel activity reports) is properly and timely prepared and maintained. For any costs improperly charged to the HAVA Program, appropriate corrections should be made.

Finding No. 6: Unused Leave Payments

Federal cost principles provide that payments to terminating employees for unused leave are allowable in the year of payment provided the payments are allocated as a general administrative expense to all activities of the governmental unit or component.

Our tests of salary expenditures disclosed that the Department did not allocate as a general administrative expense an unused leave payment, contrary to Federal cost principles. An employee terminated employment on October 31, 2005, and was paid $22,274 for 470 hours of unused annual leave. The entire amount was paid from HAVA funds.

In response to audit inquiry, Department staff indicated that this payment was made in compliance with Department of Management Services Rule 60L-34.0041(6)(b), Florida Administrative Code. The Rule provides that a senior management service or selected exempt service employee who separates from State government shall be paid for unused annual leave up to a maximum of 480 hours. Department staff further indicated that Federal cost principles supported this unused leave payment. We disagree, as discussed above, because Federal cost principles require that such payments be allocated as a general administrative expense to all activities of the governmental unit or component.
Recommendation: We recommend that the Department, in compliance with Federal cost principles, allocate as a general administrative expense unused leave payments. We also recommend that, for any costs improperly charged to the HAVA Program, appropriate corrections be made.

Finding No. 7: Voter Education

To receive Federal funds under HAVA, the Department is required to describe how the State will provide for voter education. Under Florida law, the Legislature appropriated $3,000,000 from HAVA funds in each of the 2004-05 and 2005-06 fiscal years to the Department to be distributed to county Supervisors of Elections for voter education. To receive funds from these appropriations, Supervisors of Elections were required to submit to the Department a detailed description of the voter education program (Plan). Additionally, counties were required to certify to the Department that the county would provide matching funds for voter education in the amount equal to 15 percent of the amount received from the State.

We examined payments made to three counties from funds provided under Florida law. We noted that each of the counties had entered into a Memorandum of Agreement for Receipt and Use of Voter Education Funds (Agreement). This Agreement required Supervisors of Elections to annually submit a report to the Department detailing the actual expenditures made under the Plan.

Our audit disclosed:

- The Plan for one county failed to include four of the five voter education elements contained in the Standards for Nonpartisan Voter Education (Department rule). The Plan failed to address a high school voter registration/education program; a college voter registration/education program; voter registration workshops; and the conduct of demonstrations of county voting equipment. Voter education funds received by the county totaled $27,127. Absent the voting education activities described above, the Department has no assurance that State law and HAVA requirements will be met.

- The activities, as reported in the expenditure report for another county, included $109,021 for banner and billboard advertisements. This type of activity was not included in the county's Plan submitted to the Department. However, if included in the Plan, these expenditures would have been allowable. Subsequent to audit inquiry, Department staff stated that it appears that some counties had utilized voter education funds for activities that were not included in their Plans and that changes would be made to Department procedures to compare county-planned activities with actual voter education activities.

- The expenditure report for one county failed to delineate, as required by the standard reporting form, the State and county funds expended. Therefore, the Department could not determine from a review of the report if appropriate matching funds for voter education had been expended by the county. The county received State funds totaling $180,910 and certified matching funds totaling $27,136. Subsequent to audit inquiry, Department staff stated they will include language in the Agreements requiring a separate accounting for expenditures made with State and county funds.

In the instances noted above, the Department failed to ensure that the required Plans and expenditure reports submitted by the Supervisors of Elections were in compliance with Department rules and Agreements. This failure by the Department could result in noncompliance with Florida law and rules and HAVA requirements. (See Appendix C, Element 3.)

Recommendation: We recommend that the Department ensure that all Plans are in compliance with Department rules and Agreements and that voter education expenditures correspond with detailed descriptions in the Plans. In addition, we recommend the Department ensure that the matching expenditures are reported separately on the expenditure report.

---

9 Section 254a3, HAVA.
12 Department of State Rule 15-2.033, Florida Administrative Code.
Finding No. 8: Program Expenditures

Federal cost principles\(^{13}\) require appropriate documentation of expenditures. Absent such documentation, expenditures are not allowable for payment by Federal award. The Division of Elections is responsible for tracking and monitoring the use of HAVA funds in accordance with established State procedures, and the Director of the Division of Elections has final signature authority for HAVA expenditures. Our audit included examining Department records related to 19 HAVA expenditures totaling approximately $8.9 million, excluding salary expenditures. We noted:

- A $3,333.33 monthly payment was not supported by evidence showing that the required work had been completed. This payment was made pursuant to a contract for consulting services related to assisting the 67 counties in developing and implementing plans mandated by HAVA for the accessibility of polling places and voting equipment for persons with disabilities. The agreement, providing for payments totaling $50,000, specified that a progress report was to be provided with the invoice. Subsequent to audit inquiry, Department staff stated that, rather than progress reports, the vendor was submitting weekly activity reports to the Assistant Secretary of State and the Director of the Division of Elections. Our review of the activity reports subsequently provided by the Department disclosed one activity report had been requested, after audit inquiry, on May 16, 2006, and another one was received after the invoice was paid. In addition, there was no evidence that the Department had reviewed the activity reports prior to making the payment. Also, the listed activity (traveling to Washington, D.C., to meet with congressional representatives) for one weekly activity report (week beginning November 2, 2004) did not appear to relate to the activities set out in the contract.

The process of receiving weekly activity reports from the contractor did not comply with the contract terms and did not allow for a proper preaudit as such documentation apparently was not forwarded to appropriate staff responsible for processing payments to the contractor.

A $39,645.48 payment to a contractor was not properly supported by evidence showing that the invoiced items were received. The payment related to uniform voter registration application forms that were to be provided to various cities. Documentation supporting the payment did not evidence that the forms ordered were shipped to and received in the proper quantities or types by the various cities listed on the vendor invoice. Such documentation may include, for example, notes on Department confirmation with the cities that the forms had been received. In addition, we noted that the combined payments to this contractor exceeded the purchase order total of $75,750 by $1,253. Department staff indicated that an appropriate change order had not been prepared.

For the instances described above, absent documentation to support the expenditures, the Department cannot demonstrate that, at the time of payment, the services or activities had been delivered or received and that the expenditures were allowable for payment by Federal award.

Recommendation: We recommend that the Department ensure that required contractual terms are met and services are received prior to payment. In addition, we recommend that the Department only pay contractors in amounts agreed upon by specific contract or purchase order.

Finding No. 9: Interagency Agreements

According to HAVA,\(^{14}\) each state is to implement a computerized statewide voter registration list containing the name and registration of every legally registered voter in the state. The Department was awarded Federal funds on behalf of the State of Florida to meet the HAVA requirements.

Chapter 2003-397, Laws of Florida, appropriated the Department a lump sum totaling $2,114,814 to implement HAVA and also provided that both the Florida Department of Law Enforcement (FDLE) and the Florida Department of Highway Safety and Motor Vehicles (DHSMV) each would receive two full-time equivalent positions and $145,830 to assist in the development of the Statewide voter registration list.

\(^{13}\) Office of Management and Budget Circular No. A-87.

\(^{14}\) Section 303, HAVA.
The Department was required to enter into interagency agreements with both of these agencies prior to the release of the funds.

As the Department is using HAVA funds to develop the Statewide voter registration system, the Department should ensure that the interagency agreement includes all the specific Federal information associated with the HAVA program. Our review of one of the interagency agreements (FDLE) disclosed that the agreement did not provide all of the specific information related to the HAVA program. Specifically, we noted that the agreement did not include the:

- CFDA title and number.
- Name of the Federal agency.
- Requirements of Federal laws and regulations.
- Requirement of access to records by the Department and its auditors.

In addition, our examination of the $145,830 interagency payment to FDLE disclosed that the Department failed to obtain evidence that the agency used the $145,830 for only HAVA activities. Such evidence should include applicable salary records evidencing payroll amounts and salary certifications or activity reports.

Subsequent to audit inquiry, the Department requested and received salary certifications from FDLE evidencing that the employees assigned to the positions worked solely on the HAVA activities. However, no documentation was provided to evidence that the $145,830 was actually expended for salary and benefit costs.

When the Department fails to monitor and include in interagency agreements specific Federal information associated with the HAVA program, assurance is reduced that Federal funds will be expended for allowable activities and accounted for in accordance with Federal cost principles and, if applicable, subject to audit in compliance with the applicable Federal requirements.

Recommendation: We recommend that the Department take the necessary steps to ensure that the interagency agreements include all applicable Federal information and requirements and that appropriate monitoring is performed.

**FLORIDA VOTER REGISTRATION SYSTEM (FVRS)**

The Department began developing FVRS in 2003 to comply with HAVA requirements. The State received a waiver from the EAC, permitted under HAVA provisions, and was granted an extension from January 1, 2004, until January 1, 2006, to implement FVRS. Pivotal to the design of FVRS was the retention of county voter registration systems. Each of the 67 counties was to remediate its registration systems to accommodate the FVRS interface and operating specifications. FVRS communicated with county voter registration systems using a service-oriented architecture that supported establishing communication and information exchange by providing a platform for receiving requests and generating response messages that were processed by county voter registration systems.

In accordance with Florida law, each Supervisor of Elections maintained responsibility for updating voter registration information, entering new voter registrations into the Statewide voter registration system, and acting as the official custodian of documents received by the Supervisor of Elections related to the registration and changes in voter registration status of electors of the Supervisor of Elections county. While the Department was responsible for the overall security and integrity of FVRS, each Supervisor of Elections was responsible for ensuring that all voter registration and list maintenance procedures conducted were in compliance with any applicable requirements prescribed by rules of the Department through the Statewide voter registration system or prescribed by the Voting Rights Act of 1965, the National Voter Registration Act of 1993, or HAVA.

15 Section 98.015, Florida Statutes.
Finding No. 10: Information Technology Risk Management

An effective risk management process is an important component of a successful information technology (IT) security program. Risk management is the process of identifying vulnerabilities and threats to IT resources used by an organization in achieving business objectives and deciding what measures, if any, to take in reducing risk to an acceptable level. Risk assessment is a tool that can provide information for the design and implementation of internal controls and in the monitoring and evaluation of those controls. Risk analysis forms the basis for developing effective security practices that include periodic reviews of user access rights and comparison of resources with recorded accountability to reduce the risk of errors, misuse, or unauthorized alteration.

During the audit, we noted certain deficiencies in the Department's IT risk management practices as follows:

- The Department had not completed a formal risk assessment for FVRS. In October 2005, the Department contracted with Integrated Computer Systems, Inc. (ICS), to perform an information security assessment on its network infrastructure and major applications in place at the time of the assessment. This assessment was completed before FVRS was fully implemented. In February 2006, the Department contracted with ICS to perform a complete assessment of FVRS. This assessment commenced in April 2006 and is scheduled for completion in June 2006.

- Authorizations for access to Department resources had not been properly documented for all FVRS users and access capabilities were not timely revoked or modified as necessary for individuals who had terminated employment. In addition, the Department did not have a formal process in place for the periodic monitoring of actual access capabilities through comparison to the authorizations. Good access controls include instituting policies and procedures for authorizing access to information resources, documenting such authorizations, and then periodically monitoring actual access capabilities through comparison to the authorizations. Department policy required that, immediately upon initial employment, reassignment, or termination, the designated division manager inform the Service Request Desk at the Central Computing Facility (CGF) via the Control Access form. Of 21 authorizations tested, we noted 19 instances where proper access documentation was not maintained. In addition, we noted two users with improper access capabilities to Department network resources. One user was added in error and the other had not had access capabilities properly revoked upon the completion of a contracted engagement. In response to audit inquiry, the Department indicated that access capabilities for these individuals had since been revoked.

When access capabilities are not limited to what is authorized and approved by management, the risk is increased of inappropriate use of information resources. In addition, without formal procedures for the periodic monitoring of actual access capabilities against what is authorized, the risk is increased that unauthorized access will not be identified and corrected in a timely manner.

Recommendation: Upon completion of the FVRS risk assessment, the Department should implement policies and procedures to mitigate identified risks, including ensuring that all access to Department systems is documented in a uniform manner according to policy, maintained in a central location, and periodically reviewed.

Finding No. 11: IT Governance Model

An IT governance model contributes to the reliability and integrity of an application system and data processed therein and includes developing and maintaining procedures to ensure the proper use of the application and technological solutions put in place and proper data management. A consistent managed approach to securing all system environment components increases assurance that due diligence is exercised by all individuals involved in the management, use, maintenance, and operation of information systems.

---

16 Information Technology Operating Procedure Number IT001, Logical Access Control.
According to HAVA, adequate technological security measures shall be provided to prevent unauthorized access to the computerized voter registration list. Florida law further directs the system to provide secured access for authorized voter registration officials and states that the Department may adopt rules governing the access, use, and operation of the Statewide voter registration system to ensure security, uniformity, and integrity of the system.

According to FVRS design, counties are to retain the greatest level of autonomy over county registration assets while still meeting the overall security objectives of FVRS, and the Department is responsible for the overall security and integrity of FVRS. Multiple entities are, therefore, working towards the common business purpose FVRS is to serve. Our audit focused on the important requirement of ensuring FVRS has adequate security structures and solutions in place for conducting business. We noted certain control deficiencies as follows:

Aligning systems security with a business strategy requires centralized direction. A security program establishes a common framework and principles for assessing risk, developing and implementing consistent security procedures, and monitoring the effectiveness of those procedures. The Department, in conjunction with the county Supervisors of Elections' offices, had not developed a formal security program for FVRS. Prior to the implementation of FVRS, the Department prepared a FVRS Security Approach Plan which was intended to later serve as a roadmap for developing a comprehensive FVRS System Security Plan (SSP) that would include all applicable system security policies and procedures. In response to audit inquiry, Department staff indicated that the SSP continued to be in development.

The Guide to FVRS (Guide) was developed by the Department and distributed to the Supervisors of Elections as a precursor to the implementation of FVRS. The Guide states that the counties are responsible for security, including securing the physical location of equipment hosting the application or communications devices related to the local county system and securing network systems providing access to the local voter registration system. However, the Department had not developed formal written directives or guidance to ensure a consistent approach and enforcement across all environments in such matters as configuration management, virus protection, system software maintenance and updates, and patch management.

Consistent user security mandates also require aligning system security with the business objective. Each county was responsible for designating a System Security Administrator (SSA) to assign and manage user access to the local county voter registration system along with network resources, as well as to FVRS. Guidelines to promote consistent, effective policies and procedures related to information resource classification and control, access authorization and review, distribution of user roles, logical access controls, and user security awareness training had not been developed by the Department. Additionally, while the Guide stated that training in user/identity management will be required of State and county SSAs, the Department had not yet conducted a formal training program.

The Department was in the process of, but had not completed, the integration of FVRS system planning into its overall IT disaster recovery plan. In addition, although the Department indicated that disaster recovery plans had been requested from each county, there was no formal, written process in place for receiving and evaluating those plans to ensure their adequacy in recovering timely from a disruption to operations. As HAVA requires all voter registration information obtained by any local election official in the State to be electronically entered into the computerized voter registration list on an expedited basis at the time the information is provided to the local official, absent or inadequate procedures to resume operations in a timely manner may cause delays in updating FVRS, thereby jeopardizing the accuracy and completeness of registration data.

Section 303(a)(3), HAVA.
Sections 98.035(2) and 98.035(5), Florida Statutes.

19 Section 303 (a)(1)(A)(vi), HAVA.
Proper security administration ensures that violation and security activity is logged, reported, reviewed, and appropriately escalated on a regular basis to identify and resolve incidents involving unauthorized activity. The design of FVRS included the capability to log unauthorized attempts to penetrate the system and unauthorized procedures by authorized users. As of the completion of our audit field work, the Department had not devised a formal process for review and retention of these logs. However, in response to audit inquiries, Department staff indicated their intent to establish a process for monitoring the logs in near real time.

The Department had not designated any individual positions in connection with FVRS or the Division of Elections as positions of special trust. Florida law\(^20\) states that agencies shall designate positions that, because of the special trust or responsibility or sensitive location of those positions, require that persons occupying those positions be subject to a security background check, including fingerprinting, as a condition of employment. Further, it requires that persons of such positions undergo background investigations using level two screening standards, which include fingerprinting used for checks against statewide criminal and juvenile records through the Florida Department of Law Enforcement (FDLE) as well as checks for Federal criminal records through the Federal Bureau of Investigation. In fulfillment of their assigned responsibilities related to verification of voter registration records and determination of reliability and credibility of matching information, Bureau of Voter Registration Services' (BVRS) employees who have signed the Department-required Standards of Conduct Statements, had access to statutorily designated\(^21\) confidential and publicly exempted information, records, and data including social security numbers, driver’s license numbers, Florida identification (ID) numbers, and voter signatures. In addition, the BVRS Bureau Chief and backup delegate had access to records of individuals registered to vote as protected persons, whose personal information including home address and telephone number were exempt from disclosure by Florida law.\(^22\) The Department had not designated BVRS employees as being in positions of special trust. Therefore, level two screenings had not been performed. The Department did conduct level one background screenings, that include employment history checks as well as Statewide criminal correspondence checks through FDLE on all new employees. Without adequate background checks, including fingerprinting, the risk is increased that a person could inappropriately be employed in a position of special trust.

Security controls and procedures that vary in placement and degree among the Department and the counties may not provide for the achievement of a sustainable capability for proactive mitigation of security risks or incidents. Without a common foundation for applying management and security procedures for IT resources and data, security controls necessary to adequately protect information systems that support the operations, mission, and legal responsibility of FVRS may fail to be identified and consistently applied.

**Recommendation:** The Department should, in coordination with the county Supervisors of Elections, adopt a governance model that includes security measures in support of, and for the protection of, the FVRS business purpose and the confidentiality, availability, and integrity of data contained therein. Specifically, written procedures should be established to address those areas noted above with consistent application to ensure the system’s security, uniformity, and integrity.

**Finding No. 12: FVRS Data Integrity**

The Department’s HAVA Plan specifies that the effective and efficient administration of elections depends on the completeness and accuracy of voter registration lists. Florida law\(^23\) provides that the Department shall protect the integrity of the electoral process by ensuring the maintenance of accurate and current voter registration records. In the pursuit of this goal, the Department is directed by law to identify voters who are deceased, registered more than once, convicted of a felony and whose voting rights have not been restored, or adjudicated mentally incompetent and whose voting rights have not been

---

\(^20\) Section 110.1127, Florida Statutes.
\(^21\) Sections 97.0585 (1)(c) and 97.0585 (2), Florida Statutes.
\(^22\) Section 119.071(4)(d)(4), Florida Statutes.
\(^23\) Section 98.075, Florida Statutes.
restored. For those voters who have been identified as potentially ineligible due to felony conviction or adjudication of mental incompetence, the Department is directed to determine if such information is credible and reliable. Upon determination of the reliability and credibility of the information, the Department is required to forward such information to the appropriate Supervisor of Elections for final determination of voter ineligibility and removal from the voter system.

During the audit, we noted the following deficiencies in this process:

> Some circumstances were noted that may increase the possibility of duplicate registrations in FVRS. During the implementation of FVRS, the voter records used to populate the FVRS database were provided by individual county Supervisor of Elections offices from their voter registration systems. Counties were responsible for managing their duplicate records using FVRS transactions after migration was completed. The Department indicated that there were approximately 30,000 duplicate records identified prior to implementation. However, the Department had not determined whether these 30,000 records had been resolved by the counties. The Department had not yet implemented a systematic process to periodically scan for and identify duplicate registrations. Instead, manual checks were made by the Supervisors of Elections or the Department, for new or updated registrations received, at the time of initial entry into FVRS to help ensure that no new duplicate records were created. Department staff, on May 24, 2006, subsequent to our audit field work, indicated that a systematic matching process had been put into place. In addition, prior to the implementation of statutory changes in 1999, the uniform voter registration application did not require applicants to supply the last four digits of their social security number and either a Florida driver's license number or Florida ID card number. Therefore, records for applicable voters in FVRS whose voter registration pre-dated these added requirements did not have any of these unique identification numbers associated with their record which would otherwise allow for more accurate matching of duplicate registrations and comparison of data in determination of ineligibility. The Department indicated that it initiated a process for populating the blank fields with unique identifiers (i.e., Florida driver's license numbers or Florida ID card numbers) when available for applicable registered voters, from records provided by the Department of Highway Safety and Motor Vehicles (DHSMV).

> Although the Department had a systematic process in place for identifying potential felon matches within FVRS, it had not completed a comprehensive check of all felony convictions against all voters. As noted in the previous bullet, the FVRS database was populated from data in the individual county voter registration databases. FVRS, implemented in January 2006, is the successor to the Central Voter Database (CVDB) that was established in 2001. CVDB was designed as a tool to assist the Supervisors of Elections with their responsibility to perform final voter eligibility determinations. CVDB was to perform initial voter eligibility determinations to identify duplicate registrations, as well as voters who were deceased, convicted of a felony and had not had their voting rights restored, or adjudicated mentally incompetent and had not had their voting rights restored. The activation of the felon-matching component of CVDB was delayed until May 7, 2004, and was deactivated on July 10, 2004, upon the discovery of its inability to match felons to registered voters of Hispanic origin. FVRS was similar to CVDB in that it was also populated with voter data received from each of the 67 county voter registration databases. However, unlike CVDB, FVRS was designated by Florida law as the official list of registered voters in the State. Additionally, the identification of potential felon-registered voter matches under FVRS was distinct from the automated process implemented under CVDB. Initial potential matches from FVRS underwent comprehensive staff review and evaluation.

The Department's systematic process to identify potential felons consisted of preliminary assessments conducted by FDLB of voters who may have been convicted of a felony based on voter registration records provided to FDLB by the Department. Each new voter registration application and any updates to existing registration records which occurred after January 1, 2006, were submitted to FDLB for evaluation. The Department also provided FDLB with all active and inactive voter registrations maintained by FVRS on a monthly basis. These records were compared to felony convictions reported in the

24 Section 97.052 (2), Florida Statutes.
Verification and validation of voter information relies on information received from the external agencies, including the Florida Department of Health (Office of Vital Statistics), Clerks of the Circuit Court, United States Attorney's Office, FDLE, Board of Executive Clemency, Florida Department of Corrections, and DHSMV. Following input of a completed voter registration application into FVRS by an election official and verification of an applicant's Florida driver's license number, Florida ID card number, or the last four digits of the social security number through DHSMV and the Social Security Administration, the applicant was registered and eligible to vote. After this registration process takes place, automated matches of potential ineligibility based on death, adjudication of mental incapacity, or felony conviction were generated by daily comparisons of data from the external agency databases and voter registration information in FVRS. BVRS was responsible for manually evaluating those automated matches of potential ineligibility for credibility and reliability. Following match resolution by BVRS, only those matches determined to be credible and reliable were sent in the form of case files to the Supervisors of Elections for review.

The Department indicated that there had been instances where data supplied by other agencies was not accurate or timely. For example, the Department indicated that records which were supplied by the Office of Vital Statistics for the purposes of matching for deceased voters have, at times, contained inaccurate social security numbers. In response, the Department had put in place manual procedures to help mitigate this known data problem. Additionally, the Department indicated that data received from the Office of Vital Statistics, though received regularly, may lag as much as two to three months.

Recommendation: The Department should implement FVRS matching functionality, as planned, to allow for systematic identification of possible duplicate voters. In addition, the Department should expand, as planned, current systematic felon matching to include matching of all existing registrations against all felony records. The Department should also implement a formalized process to determine if Supervisors of Elections have satisfactorily met certification requirements prescribed by Florida Statutes. Further, the Department should continue to work with agencies that supply the Department with data for matching and verification purposes to increase data reliability, integrity, and timeliness.

Pursuant to Florida law, the Department maintains oversight of registration records maintenance activities conducted by the Supervisors of Elections through certification. Each Supervisor of Elections is required to certify, no later than July 31 and January 31 of each year, to the Department activities conducted, during the first and second six months of the year, respectively, regarding procedures for removal of voters determined as ineligible. Should the Department determine that a Supervisor of Elections has not satisfied these requirements, it will be necessary for the Department to satisfy the requirements. Although the first certification is not due from the counties until July 2006, the Department had not formalized a process by which to determine whether Supervisors of Elections have satisfactorily met these statutory requirements.

The issues noted above may increase the risk that ineligible and duplicate voter registrations exist in FVRS, putting at risk the integrity and accuracy of the voter registration list.

Recommendation: The Department should implement FVRS matching functionality, as planned, to allow for systematic identification of possible duplicate voters. In addition, the Department should expand, as planned, current systematic felon matching to include matching of all existing registrations against all felony records. The Department should also implement a formalized process to determine if Supervisors of Elections have satisfactorily met certification requirements prescribed by Florida Statutes. Further, the Department should continue to work with agencies that supply the Department with data for matching and verification purposes to increase data reliability, integrity, and timeliness.
OBJECTIVES, SCOPE, AND METHODOLOGY

This operational audit focused on the Department's administration of the Federal Help America Vote Act of 2002. In addition, we evaluated selected controls related to the Florida Voter Registration System. Our objectives were to:

- Evaluate the effectiveness of related controls.
- Evaluate the extent to which the Department has complied with selected controlling laws, administrative rules, and other guidelines.

In conducting our audit, we interviewed Department personnel, observed selected operations, tested selected Department records, and completed various analyses and other procedures. Our audit included examinations of various documents (as well as events and conditions) applicable to the period July 1, 2004, through February 28, 2006, and selected actions taken through May 23, 2006.

MANAGEMENT RESPONSE

In a response letter dated June 15, 2006, the Secretary of State generally concurred with our audit findings and recommendations. The Secretary's response is included in its entirety at the end of this report as Appendix D.
Note 1: Includes Title III activities (e.g., Sections 301-Voting System Standards, 302-Provisional Voting and Voting Information Requirements, 303-Statewide Voter Registration List, etc.).

**Source:** Department's budget and accounting records.
Appendix C

Element 1 How the State will use the requirements payment to meet the requirements of Title III and, if applicable under Section 251(a)(2), HAVA, to carry out other activities to improve the administration of elections.

Element 2 How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in Element 1, including a description of:
   A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and
   B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted in Element 8.

Element 3 How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III, HAVA.

Element 4 How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301, HAVA.

Element 5 How the State will establish a fund described in Section 254(b), HAVA, for purposes of administering the State's activities under this part, including information on fund management.

Element 6 The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on:
   A) The costs of the activities required to be carried out to meet the requirements of Title III, HAVA;
   B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and
   C) The portion of the requirements payment which will be used to carry out other activities.

Element 7 How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Element 8 How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Element 9 A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under Section 402, HAVA.

Element 10 If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Element 11 How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change:
   A) Is developed and published in the Federal Register in accordance with Section 256, HAVA, in the same manner as the State plan;
   B) Is subject to public notice and comment in accordance with Section 256, HAVA, in the same manner as the State plan; and
   C) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Element 12 In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Element 13 A description of the committee which participated in the development of the State plan in accordance with Section 255, HAVA, and the procedures followed by the committee under such Section and Section 256, HAVA.

Mr. William O. Monroe, CPA
Auditor General
874 Claude Pepper Building
111 West Madison Street
Tallahassee, Florida 32399-1450

Dear Mr. Monroe:

Please find enclosed the Department of State’s response to the Auditor General’s May 30, 2006, Preliminary and Tentative Audit Findings on the Help America Vote Act (HAVA) and the Florida Voter Registration System (FVRS).

First I would like to thank you and your staff for the extraordinary effort that you have made to accommodate our request for this review of Florida’s compliance with HAVA and the new FVRS. Despite a short timeframe and a very busy schedule, your team headed by Dorothy Gilbert, was courteous and thorough in their approach and handling of this assignment.

Over the course of the last two years the Department has been focused on meeting the January 2006 deadline imposed on all 50 states by HAVA. This effort has allowed little opportunity for the Department’s staff to become familiar with all the nuances of a large Federal grant program. Your staff’s expertise has afforded us the advantage of addressing these salient issues early in the life of this program and has allowed us to make the necessary adjustments to ensure our compliance with HAVA.

Please contact me at 245-6500 if you need further information or have additional questions.

Sincerely,

Sue M. Cobb
Secretary of State

Enclosure

Appendix D

Management Response

Florida Department of State
Response to Preliminary and Tentative Audit Findings
Help America Vote Act (HAVA) and Florida Voter Registration System (FVRS)
June 15, 2006

HELP AMERICA VOTE ACT

Finding No. 1: The Department did not have a procedure in place to evidence for the public record that voting systems being certified had met the requirements of Florida law.

Response: The Department agrees that the draft checklist should be completed and incorporated into the certification process to provide a visual aid to indicate compliance to the statutory elements. The checklist will be finalized and will be used in future certification tests.

Finding No. 2: The Department’s established procedures did not prohibit the Secretary of State and any examiners from having a pecuniary (financial) interest in the examination of and approval of voting equipment.

Response: The Department will implement procedures to require that the Secretary of State and all persons employed by the Department who examine voting systems for compliance with the requirements of Section 101.5605, Florida Statutes, periodically certify in writing that they have no pecuniary interest in any voting equipment.

Finding No. 3: The Department did not maintain a current, reliable control listing of voting systems certified and in use by the counties. In addition, the Department did not have a procedure in place to ensure that voting system information was on file with the Department.

Response: The Division of Elections website containing the list of certified voting systems by county is updated based upon receipt of objective evidence (i.e., acquisition report) provided by the county Supervisor of Elections. The Division has attempted during the last two years to bring this list up to date. In the first attempt, the poor response from the counties forced the Division to contact the vendors in order to update this list. The second attempt during the past nine months has also not produced up to date information, despite an attempt by the Division to create a simple checklist to facilitate the filing of the acquisition reports.

The Department agrees that updated information from the counties is essential in determining whether the voting systems used by the counties meet the requirements of law. The Department will institute a process by which to periodically confirm with the Supervisor of Elections that the information they have filed with the Department is accurate and to confirm that all information required by law is on file with the Department.

Finding No. 4: The Department incorrectly calculated the required maintenance of effort that was included in the State of Florida HAVA Plan and also did not maintain the required level of expenditures for the 2004-05 fiscal year.

Response: The Department will update the State of Florida HAVA plan to reflect the revised required Maintenance of Effort (MOE) amounts. In addition, the Department will continue to review state expenditures in future years to ensure that the MOE threshold is exceeded. In future years, the level of state effort should exceed the required threshold, compensating for the $7,630 MOE shortfall for the 2004-05 fiscal year.
Florida Department of State
Response to Preliminary and Tentative Audit Findings
Help America Vote Act (HAVA) and Florida Voter Registration System (FVRS)
June 15, 2006

Finding No. 5: Salary certifications required for employees who worked solely on the HAVA Program were not maintained. Also, personnel activity reports were not always maintained to support personnel costs charged to the HAVA Program.

Response: As indicated in the audit findings, the Department has begun a procedure for obtaining time certifications from employees in HAVA-funded positions. These certifications will be obtained on a semi-annual basis. If the Department becomes aware that any employee has worked on activities not related to the HAVA program, the costs associated with those other activities will be reimbursed to the HAVA program.

Finding No. 6: Contrary to Federal cost principles, payment for unused leave to a terminating employee was charged as a direct cost to the Program instead of being allocated as a general administrative expense to all activities of the governmental unit.

Response: The Department will seek further guidance from the cognizant Federal agency (the Elections Assistance Commission) on the proper disposition of unused leave payments. It should be noted that the proper disposition of unused leave payments may be impractical across agency lines, and sufficient resources may not be available in the Department’s budgeted general administrative expense of the governmental unit. The Department will make every effort to distribute the salary expenditure appropriately, however availability of general revenue funds may require that the Department use specific program funds to comply with Federal cost principles.

Finding No. 7: Controls to ensure that voter education programs were in compliance with Florida law and Department rule were insufficient.

Response: It is the Department’s understanding that HAVA funds paid to counties under the voter education program are not required to be expended for all elements shown in the Department’s rule applicable to minimum standards for voter education. For many counties, especially the smaller rural counties, the amount of HAVA funds received for voter education programs is insufficient to cover the full costs of all elements in the rule. In these instances, counties must provide the additional funds needed to implement all voter education activities listed in the rule. Therefore, the Department has not required counties to include each element in the rule in their voter education plans. They have been required to include only the voter education activities that will be paid for with HAVA funds. However, the Department does recognize that counties are required to implement all of the elements of the rule and will monitor each county’s activities as shown in their voter education reports following each general election to make sure that the required elements are completed.

In the future, the Department will closely monitor the counties’ annual expenditure reports to ensure that the counties expend HAVA funds in accordance with approved plans and will require reimbursement for all expenditures not approved. Also, the Department will ensure that counties report the expenditures made with HAVA funds separately from expenditures made with county funds. Finally, the Department will make changes to its Memorandum of Agreement with the counties to implement these requirements.

Finding No. 8: HAVA Program expenditures were not always properly supported.
Management Response

Florida Department of State
Response to Preliminary and Tentative Audit Findings
Help America Vote Act (HAVA) and Florida Voter Registration System (FVRS)
June 15, 2006

Response: The designated contract manager will review and certify that the request for payment is properly supported and contract requirements, milestones, and deliverables have been met prior to submitting the request to Budget and Financial Services. The accounts payable supervisor in Budget and Financial Services will verify the contract manager has certified that the request for payment is properly supported and the required milestones or deliverables have been met prior to issuing the payment.

Finding No. 9: The Department did not always follow Federal requirements with regards to awards to other State agencies.

Response: The Department will ensure that interagency agreements with state agencies utilizing HAVA funds include all of the information required by Federal standards. In addition, the Department will obtain the appropriate documentation to evidence the expenditures of HAVA funds by the other State agencies.

FLORIDA VOTER REGISTRATION SYSTEM (FVRS)

Finding No. 10: Improvements were needed in the Department's Information Technology (IT) risk management practices.

Response: Upon completion of the FVRS Risk Assessment the Department plans to implement policies and procedures to mitigate identified risks. Access to Department systems will be documented according to policy and maintained in a central location at the Central Computing Facility (CCF). Periodic reviews will be performed.

Finding No. 11: The Department had not adopted a governance model addressing the management, use, and operation of FVRS commensurate with its authority and responsibility to ensure the system's security, uniformity, and integrity.

Response: The Department plans to continue to work with the Supervisors of Elections in the development of a governance model. The Department Information Security Manager plans to continue to develop the System Security Plan (SSP) and formal training program. System log retention and review will be included in the SSP. Written system configuration and management guidelines will be developed and provided to the counties. The Department will continue to incorporate the FVRS into the Information Technology Disaster Response Plan and develop a statewide regional response COOP plan.

The Department will designate all employees within the Bureau of Voter Registration Services as positions of special trust and will take the necessary steps to insure that this issue is addressed appropriately.

Finding No. 12: Although the Department had put measures in place to help ensure the integrity of data in FVRS, improvements were needed in the processes for identifying duplicate registrations and ineligible voters.

Response: On May 1, 2006, the Department implemented a duplicate matching process to identify names of voters who appear more than one time on the FVRS. The first matching process identified all existing voters who appeared to be duplicates. This match produced 80,151 potential duplicates which were sent to the counties for evaluation. The duplicate matching process is now ongoing on a continual basis and
Appendix D

Management Response

Florida Department of State
Response to Preliminary and Tentative Audit Findings
Help America Vote Act (HAVA) and Florida Voter Registration System (FVRS)
June 15, 2006

each time a new applicant is entered into the FVRS, a search is made to the existing voters to determine if the new applicant appears to be a duplicate.

The Department plans to expand the systematic felon matching of all existing registrations against all felony records as time and resources allow. The Department continues to coordinate with other agencies who are providing data for matching and verification purposes to increase the reliability and timeliness of the information. The Department also plans to develop a formal process to determine whether Supervisors of Elections have met record maintenance activities. The first certification is due to the Department by the Supervisors of Elections on July 31, 2006.
Final Audit Resolution Report

Florida Single Audit – Assignment No. E-SA-FL-11-06

Attachment 2
December 13, 2006

500 South Bronough Street
Tallahassee, FL 32399-0250

Re: Follow-Up Review Applicable to Auditor General Report #2006-194, Help America Vote Act (HAVA) and the Florida Voter Registration System (FVRS) – Operational.

Dear Secretary Cobb:

Pursuant to Section 20.055(5)(g), Florida Statutes, the Office of Inspector General (OIG) conducted a follow-up review applicable to the Auditor General’s Report as referenced above. We have attached a copy of our report for your review.

As required by law, we have published our report on the status of the corrective actions taken by the Department and filed a copy of such response with the Legislative Auditing Committee.

If you require additional information on this matter please contact me.

Sincerely,

Kirby J. Mole, CIA
Inspector General

Att.

cc. Mr. Terry L. Shoffstall, Director, Legislative Auditing Committee
Thomas Wilkey, Executive Director, U.S. Election Assistance Commission
Derry Harper, Chief Inspector General, Executive Office of the Governor
David E. Mann, Assistant Secretary of State
Heidi Hughes, Chief of Staff/General Counsel
Dawn Roberts, Director, Division of Elections
Sarah Smith, Chief Information Officer

R. A. Gray Building • 500 South Bronough Street • Tallahassee, Florida 32399-0250
Telephone: (850) 245-6500 • Facsimile: (850) 245-6125 • http://www.dos.state.fl.us
The purpose of this follow up review is to report on the current status of corrective actions taken by the Department of State (Department) in response to the recommendations made by the Auditor General. The Auditor General's operational audit focused on the Department's administration of the Federal Help America Vote Act of 2002 during the period July 1, 2004, through February 28, 2006, and selected actions taken through May 23, 2006. Also, the audit included an evaluation of the effectiveness of selected controls related to the Florida Voter Registration System.

Auditor General’s Finding No. 1 The Department did not have a procedure in place to evidence for the public record that voting systems being certified had met the requirements of Florida law.

Auditor General’s Recommendation We recommend that the Department finalize the Checklist and utilize it to document for the public record that its voting system certification procedures meet the requirements of Florida law.

Department’s Statement of Corrective Action(s) Implemented The Bureau of Voting Systems Certification has finalized a test record checklist that includes an indication of compliance to the voting system’s relevant statutory requirements. The final version of the test record checklist will be used for future certification efforts until the effective date of the 2007 revision to the Florida Voting System Standards. At that time, this checklist will be integrated into a larger certification test record that will track all the requirements of the 2007 Florida Voting System Standards.

Status of Corrective Actions The Department’s Bureau of Voting Systems Certification has finalized the Florida Voting Systems Certification Checklist & Test Record and is utilizing it to evidence that voting systems certified by the Bureau met Florida Law.

Auditor General’s Finding No. 2 The Department’s established procedures did not prohibit the Secretary of State and any examiners from having a pecuniary (financial) interest in the examination of and approval of voting equipment.

Auditor General’s Recommendation We recommend that the Department establish procedures requiring the periodic affirmation of the absence of pecuniary and other conflicts of interests.

Department’s Statement of Corrective Action(s) Implemented The Department has included a section in the Employee Handbook regarding ‘Special Disclosure Requirements for Certain Employees in the Division of Elections, Bureau of Voting Systems Certification’ concerning this
issue. Pursuant to the section, employees in the Bureau of Voting Systems Certification are required to certify in writing that they do not have a pecuniary interest in any voting equipment.

The Department has developed a certification statement that employees who are involved in examining voting systems equipment for certification are required to sign. The certification statements are maintained in the Division of Elections.

Status of Corrective Actions The Department added a section to its Employee Handbook that prohibits the Secretary of State or any person who examines voting equipment for compliance with Section 101.5606, Florida Statutes, from having a pecuniary interest in such equipment. Also, certified statements applicable to pecuniary interests from the Secretary of State and employees of the Bureau of Voting Systems Certification were reviewed and are on file in the Division of Elections.

Auditor General's Finding No. 3 The Department did not maintain a current, reliable control listing of voting systems certified and in use by the counties. In addition, the Department did not have a procedure in place to ensure that voting system information was on file with the Department.

Auditor General's Recommendation We recommend that the Department develop a current, reliable control listing; establish procedures to ensure that Supervisors of Elections submit all voting system information required by State law [Section 101.5607(1)(a), Florida Statutes]; and periodically confirm the accuracy of its listing with the Supervisors of Elections. Such confirmations should be made in connection with the Department's periodic reconciliation of its control listing to the voting systems information provided and on file at the Department.

Department’s Statement of Corrective Action(s) Implemented The Bureau of Voting Systems Certification examined the voting system acquisition records for all 67 Florida counties. The Bureau identified the county records that were incomplete and/or obsolete.

In addition, the Bureau initiated an effort to actively pursue obtaining each county’s current system acquisition information on a periodic basis. As each county’s record became complete relative to the requirements of Section 101.5607(1)(a), Florida Statutes, the Bureau updated the voting system database to reflect this information. The information contained in this database is correct for all 67 counties and is available for public examination on the Division of Elections' website.

During this process, the Bureau created a work instruction to serve as guidance for ascertaining each county’s current acquisition status, maintaining this information, and updating the relevant database. The work instruction is still under development.

Status of Corrective Actions The Bureau of Voting Systems Certification updated its information and created a control list of voting systems for all 67 counties. Also, the Bureau is drafting working instructions to specific procedures necessary to maintain an accurate and current voting system control list to be completed in the first quarter of 2007.
Auditor General's Finding No. 4 The Department incorrectly calculated the required maintenance of effort that was included in the State of Florida HAVA Plan and also did not maintain the required level of expenditures for the 2004-05 fiscal year.

Auditor General's Recommendation The Department should update the State of Florida HAVA Plan to reflect the revised required MOE amount and ensure that the required MOE level is met each fiscal year in accordance with HAVA requirements.

Department's Statement of Corrective Action(s) Implemented The HAVA State Planning Committee held two meetings on September 21, 2006 and October 12, 2006 in order to revise the HAVA State Plan. The updated plan includes the revised maintenance of effort level that the state must maintain as required by HAVA. In addition, the Department conducted a review of FY 2005-06 expenditures and initial calculations indicate that expenditures exceeded the MOE threshold.

Status of Corrective Actions The Department has drafted an update to the State of Florida HAVA Plan which includes a section on maintenance of effort. The Department stated that the plan is required to be posted in the Federal Register for 30 days for public comments and anticipates completion in approximately two months.

Auditor General's Finding No. 5 Salary certifications required for employees who worked solely on the HAVA Program were not maintained. Also, personnel activity reports were not always maintained to support personnel costs charged to the HAVA Program.

Auditor General's Recommendation We recommend that the Department's procedures ensure that required documentation supporting charges to the HAVA Program (including certifications and personnel activity reports) is properly and timely prepared and maintained. For any costs improperly charged to the HAVA Program, appropriate corrections should be made.

Department's Statement of Corrective Action(s) Implemented Salary Certification statements are obtained every six months from all employees filling a HAVA-funded position. The certifications are maintained in the Division of Elections.

Status of Corrective Actions The Division of Elections implemented a control procedure to ensure that all HAVA-funded employees signed salary certification forms.

Auditor General's Finding No. 6 Contrary to Federal cost principles, payment for unused leave to a terminating employee was charged as a direct cost to the Program instead of being allocated as a general administrative expense to all activities of the governmental unit.

Auditor General's Recommendation We recommend that the Department, in compliance with Federal cost principles, allocate as a general administrative expense unused leave payments. We also recommend that, for any costs improperly charged to the HAVA Program, appropriate corrections be made.

Department's Statement of Corrective Action(s) Implemented The Department submitted a request for guidance to the U. S. Election Assistance Commission (EAC) regarding leave
payments to terminating employees. Pending receipt of a response from the EAC, all payments for unused leave to employees who have terminated from state government have been transferred from the Grants and Donations Trust Fund to General Revenue.

**Status of Corrective Actions** The Department has requested but not received guidance from the U.S. Election Assistance Commission. All payments made by the Department for leave due terminated employees were transferred to the General Revenue Fund.

**Auditor General’s Finding No. 7** Controls to ensure that voter education programs were in compliance with Florida law and Department rule were insufficient.

**Auditor General’s Recommendation** We recommend that the Department ensure that all Plans are in compliance with Department rules and Agreements and that voter education expenditures correspond with detailed descriptions in the Plans. In addition, we recommend the Department ensure that the matching expenditures are reported separately on the expenditure report.

**Department’s Statement of Corrective Action(s) Implemented** The Department is preparing a survey regarding voter education activities that will be sent to all Supervisors of Elections following the 2006 general election. Information from the survey will be used to determine each county’s compliance with elements listed in the Department’s rule on minimum standards for voter education. The survey is organized so that counties will report voter education expenditures made with HAVA/state funds separately from expenditures made with county funds. As required by Section 98.255, Florida Statutes, the Department will prepare a report that will be available by January 31, 2007, regarding the voter education programs and activities conducted by Supervisors of Elections during the 2006 general election period.

The Department has revised the language in its memorandum of agreement with Supervisors of Elections in order to implement changes regarding voter education plans and reporting requirements.

**Status of Corrective Actions** The Department prepared a survey to obtain information from Supervisors of Elections applicable to voter educational activities and compliance with specific laws, rules, and agreements. The Department intends to compare the survey’s information with the Supervisor’s approved voter educational plans as part of its compliance monitoring procedures. Also, the Department will use the surveys to obtain the amount of expenditures made from county match and HAVA funds. On November 14, 2006, the Department sent the Supervisors of Elections a new memorandum of agreement that included these new survey procedures. On November 21, 2006, the Department sent the survey to the Supervisors of Elections.

**Auditor General’s Finding No. 8** HAVA Program expenditures were not always properly supported.

**Auditor General’s Recommendation** We recommend that the Department ensure that required contractual terms are met and services are received prior to payment. In addition, we recommend that the Department only pay contractors in amounts agreed upon by specific contract or purchase order.
Department's Statement of Corrective Action(s) Implemented  Employees in the Office of Support Services will, upon receipt of a payment request or invoice, contact the contract manager if required documentation has not been received. Invoices will not be processed for payment until the contract manager certifies to Support Services that the deliverables have been met.

Working with the Office of Support Services, the accounts payable supervisor in the Budget and Financial Services Program checks for a certification that the required milestones and deliverables have been met. A payment will not be vouchered if the required certification is not included.

Status of Corrective Actions  The Department has implemented the process as stated above to ensure receipt of deliverables and payment authorization.

Auditor General's Finding No. 9  The Department did not always follow Federal requirements with regards to awards to other State agencies.

Auditor General's Recommendation  We recommend that the Department take the necessary steps to ensure that the interagency agreements include all applicable Federal information and requirements and that appropriate monitoring is performed.

Department's Statement of Corrective Action(s) Implemented  All interagency agreements entered into or renewed after July 1, 2006, between the Department of State and governmental agencies such as the Florida Department of Highway Safety and Motor Vehicles or the Florida Department of Law Enforcement as they pertain to HAVA funds for election administration and/or voting purposes shall:

- Include standard provisions relating to federal and state audit, monitoring and reporting requirements.

- Identify, for audit purposes, the title and number of the appropriate type of federal assistance program (known as the Catalog of Federal Domestic Assistance) from which the funds are being made available.

- Condition the receipt and use of HAVA funds on the submission, review, and approval of specified written certifications and plans for use of these funds or the inclusion of comprehensive written specifications or terms in return for receipt and use of the funds, whichever is applicable.

- Require the recipient of HAVA funds to report to the Department of State any change or deviation from any plan originally submitted for review and approval for receipt and use of such funds, or to require the mutual written agreement to modify any material change to written specifications or terms in the agreement.

- Require any governmental official or entity to receive federal HAVA funds to complete federal ED Form GCS-009, 6/88, "Certification Regarding Debarment, Suspension,
Ineligibility and Voluntary Exclusion Lower Tier Covered Transactions” (created pursuant to Executive Order 12549 (46CFR 1183.35). Such form must be completed and submitted prior to the Department entering into or renewing any agreement.

Existing interagency agreements with Florida Department of Law Enforcement and Florida Department of Highway Safety and Motor Vehicles are currently under review and will be revised to include the above-referenced provisions since the Department’s and these agencies’ focus on Florida Voter Registration System has now evolved from development and implementation to operation and maintenance of the system.

**Status of Corrective Actions** As of this report date, the Department has not entered into any new agreements with the Florida Department of Law Enforcement or the Department of Highway Safety and Motor Vehicles. The Department is in the process of reviewing current agreements for appropriate revisions.

**Auditor General’s Finding No. 10** Improvements were needed in the Department’s Information Technology (IT) risk management practices.

**Auditor General’s Recommendation** Upon completion of the FVRS risk assessment, the Department should implement policies and procedures to mitigate identified risks, including ensuring that all access to Department systems is documented in a uniform manner according to policy, maintained in a central location, and periodically reviewed.

**Department’s Statement of Corrective Action(s) Implemented** A baseline Risk Assessment was completed on the FVRS in June 2006. A corrective action plan has been established and is in the execution phase. Additionally, a Department employee has been reassigned to the position of Information Security Administrator and Network Administrator.

IT Security Policies have been updated at the department level and authorization procedures have been updated.

**Status of Corrective Actions** On July 5, 2006, the Department received its final risk assessment report prepared by an independent contractor. Based upon this risk assessment the Department and the State Information Security Office prepared a corrective action plan. As of this date, the Department completed and continues to implement corrective actions identified in the plan. Also, the Department reassigned an employee to the position of Information Security Administrator and Network Administrator in order to enhance improvements needed in the Department’s information risk management practices as identified by the Auditor General. Finally, the Department prepared the FVRS Information Security Plan which is pending final approval from the Department’s senior management.

**Auditor General’s Finding No. 11** The Department had not adopted a governance model addressing the management, use, and operation of FVRS commensurate with its authority and responsibility to ensure the system’s security, uniformity, and integrity.
**Auditor General's Recommendation**  The Department should, in coordination with the county Supervisors of Elections, adopt a governance model that includes security measures in support of, and for the protection of, the FVRS business purpose and the confidentiality, availability, and integrity of data contained therein. Specifically, written procedures should be established to address those areas noted above with consistent application to ensure the system's security, uniformity, and integrity.

**Department's Statement of Corrective Action(s) Implemented**  The Department has created a System Security Plan (SSP). In addition, a memorandum of understanding regarding information security issues has been executed with each Supervisor of Elections.

The Division of Elections Continuity of Operations Plan is in the final stages of development and includes a regional response plan involving all Supervisors of Elections.

User audit capabilities have been improved and development in this area continues.

Each employee with access to FVRS or access to data of confidentiality has signed a strict standard of conduct regarding the protection and security of that data. The Department is reviewing the duties of positions with access to FVRS to determine which of these positions should be classified as positions of special trust.

**Status of Corrective Actions**  The Department created a System Security Plan and executed, with each Supervisor of Elections, a Memorandum of Agreement For Minimum Security Standards For The Florida Voter Registration System. The Department is finalizing the Division of Elections Continuity of Operations (COOP) Plan, including a Regional Response Plan for all Supervisors of Elections. Also, each Department employee with access to FVRS or confidential data executed an acknowledgment statement titled, Standards of Conduct Governing Access To The Florida Voter Registration System and Other Agency Records.

**Auditor General's Finding No. 12**  Although the Department had put measures in place to help ensure the integrity of data in FVRS, improvements were needed in the processes for identifying duplicate registrations and ineligible voters.

**Auditor General's Recommendation**  The Department should implement FVRS matching functionality, as planned, to allow for systematic identification of possible duplicate voters. In addition, the Department should expand, as planned, current systematic felon matching to include matching of all existing registrations against all felony records. The Department should also implement a formalized process to determine if Supervisors of Elections have satisfactorily met certification requirements prescribed by Florida Statutes. Further, the Department should continue to work with agencies that supply the Department with data for matching and verification purposes to increase data reliability, integrity, and timeliness.

**Department's Statement of Corrective Action(s) Implemented**  FVRS continues to perform a duplicate matching process on a continual basis which to date has identified 86,008 potential duplicates which have been sent to the counties for evaluation. The Division continues to work with the Supervisors of Elections' vendors of local election administration systems to streamline the duplicate matching process recognizing there will be programming adjustments necessary.
The Department developed a form for Supervisors of Elections to report list maintenance activities. Certifications regarding list maintenance activities have been received from all Supervisors of Elections covering activities between January 1, 2006 and June 30, 2006.

**Status of Corrective Actions** The Department implemented the FVRS matching functionality for systematic identification of possible duplicate voters and continues to work with the Supervisor of Elections to improve the matching process. However, as of this date, the Department has not expanded its current felon matching process to include registered voters prior to January 1, 2006, except for voters that incurred a change in their voter registration after January 1, 2006. The Department has stated its intent to expand its felon matching search based upon resources available. Also, the Department has developed a process to determine and document certification of voter registration activities by the Supervisors of Elections.

3.3.2 Voting Functions

3.3.2.1 Polling Place Verification
Provides a means for verifying:
- Equipment is installed at the correct polling place
- Equipment is in its initialized state
- Equipment is ready for casting of ballots
- Proper execution is verified by means of an equipment-generated record, retained as part of the audit record

3.3.2.2 Party Selection
- Allows casting for the party of choice in a primary election and for all non-partisan candidates and measures, while preventing voting for a candidate of another party
- Provides a means in a general election to select any candidate and to select any measure on the ballot

3.3.2.3 Ballot Sub-setting
- Provides a means of disabling that portion of a ballot for which the voter is not entitled to vote

3.3.2.4 Enabling the Ballot
- Provides a means for enabling the recording of votes

3.3.2.5 Candidate and Measure Selection
- Method of voting complies with the following sections of 101.5606, F.S.
  - (1) Permits and requires voting in secrecy.
  - (2) Permits each elector to vote at any election for all persons and offices for whom and for which the elector is lawfully entitled to vote, and no others; to vote for as many persons for an office as the elector is entitled to vote for; and to vote for or against any question upon which the elector is entitled to vote.
  - (3) Rejects a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast.
  - (4) Accepts a rejected ballot pursuant to subsection (3) for a marksense ballot, if a voter chooses to cast the ballot, but records no vote for any office that has been overvoted or undervoted.
  - (5) Capable of correctly counting votes.
(6) Permits each voter at a primary election to vote only for the candidates seeking nomination by the political party in which such voter is registered, for any candidate for nonpartisan office, and for any question upon which the voter is entitled to vote.

(7) Permits each elector by one operation, to vote for all presidential electors of a party or for all presidential electors of candidates for President and Vice President with no party affiliation.

(8) Provides a method for write-in voting.

(9) Capable of accumulating a count of the specific number of ballots tallied for a precinct, accumulating total votes by candidate for each office, and accumulating total votes for and against each question and issue of the ballots tallied for a precinct.

(10) Capable of tallying votes from ballots of different political parties from the same precinct, in the case of a primary election.

(11) Capable of automatically producing precinct totals in printed, marked, or punched form, or a combination thereof.

(12) Permits each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed, if it is of a type which registers votes electronically.

(13) Capable of providing records from which the operation of the voting system may be audited.

(14) Uses a precinct-count tabulation system.

(15) Does not use an apparatus or device for the piercing of ballots by the voter.

3.3.2.6 Standards for Equally Accessible Electronic Voter Interfaces

Method of voting complies with the following sections of 101.56062, F.S.

(1) Has the capability to install accessible voter interface devices in the system configuration which allow the system to meet the following requirements:

(a) Provides a tactile input or audio input device, or both.

(b) Provides a method by which voters can confirm any tactile or audio input by having the capability of audio output using synthetic or recorded human speech that is reasonably phonetically accurate.

(c) Any operable controls on the input device which are needed for voters who are visually impaired must be discernible tactually without actuating the keys.

(d) Audio and visual access approaches must be able to work both separately and simultaneously.

(e) If a non-audio access approach is provided, the system may not require color perception. The system must use black text or graphics, or both, on white background or white text or graphics, or both, on black background, unless the office of the Secretary of State approves other high-contrast color combinations that do not require color perception.

(f) Any voting system that requires any visual perception must offer the election official who programs the system, prior to its being sent to the polling place, the capability to set the font size, as it appears to the voter, from a minimum of 14 points to a maximum of 24 points.

(g) The voting system must provide audio information, including any audio output using synthetic or recorded human speech or any auditory feedback tones that are important for the use of the audio approach, through at least one mode, handset or headset, in enhanced auditory fashion (increased amplification) and must provide incremental volume control with output amplification up to a level of at least 97 dB SPL.

(h) For transmitted voice signals to the voter, the voting system must provide a gain adjustable up to a minimum of 20 dB with at least one intermediate step of 12 dB of gain.

(i) For the safety of others, if the voting system has the possibility of exceeding 120 dB SPL, then a mechanism must be included to reset the volume automatically to the voting system's default volume level after every use, for example when the handset is
replaced, but not before. Also, universal precautions in the use and sharing of the
headsets should be followed.

☐ (j) If sound cues and audible information such as "beeps" are used, there must be
simultaneous corresponding visual cues and information.

☐ (k) Controls and operable mechanisms must be operable with one hand, including
operability with a closed fist, and operable without tight grasping, pinching, or twisting
of the wrist.

☐ (l) The force required to operate or activate the controls must be no greater than 5 pounds
of force.

☐ (m) Voting booths must have voting controls at a minimum height of 36 inches above the
finished floor with a minimum knee clearance of 27 inches high, 30 inches wide, and
19 inches deep, or the accessible voter interface devices must be designed so as to
allow their use on top of a table to meet these requirements. Tabletop installations
must include adequate privacy.

3.3.2.7 Audio Ballots
Note: The functionalities required for the audio ballot may be satisfied by either the voting
device or by the entire voting system.

☐ Complies with standards for electronic voter interfaces
☐ Controls are discernable tactilely without actuating the controls
☐ Provide a voter operated volume control
☐ Method of voting complies with the following subsections of 101.56062(1)(n), F.S.
  ☐ (1) After the initial instructions that the system requires election officials to provide to each
  voter, the voter should be able to independently operate the voter interface through the final
  step of casting a ballot without assistance.
  ☐ (2) The voter must be able to determine the races that he or she is allowed to vote in and to
determine which candidates are available in each race.
  ☐ (3) The voter must be able to determine how many candidates may be selected in each race.
  ☐ (4) The voter must be able to have confidence that the physical or vocal inputs given to the
  system have selected the candidates that he or she intended to select.
  ☐ (5) The voter must be able to review the candidate selections that he or she has made.
  ☐ (6) Prior to the act of casting the ballot, the voter must be able to change any selections
  previously made and confirm a new selection.
  ☐ (7) The system must communicate to the voter the fact that the voter has failed to vote in a race
  or has failed to vote the number of allowable candidates in any race and require the voter to
  confirm his or her intent to undervote before casting the ballot.
  ☐ (8) The system must prevent the voter from overvoting any race.
  ☐ (9) The voter must be able to input a candidate's name in each race that allows a write-in
  candidate.
  ☐ (10) The voter must be able to review his or her write-in input to the interface, edit that input,
  and confirm that the edits meet the voter's intent.
  ☐ (11) There must be a clear, identifiable action that the voter takes to "cast" the ballot. The
  system must make clear to the voter how to take this action so that the voter has minimal
  risk of taking the action accidentally but, when the voter intends to cast the ballot, the
  action can be easily performed.
  ☐ (12) Once the ballot is cast, the system must confirm to the voter that the action has occurred
  and that the voter's process of voting is complete.
  ☐ (13) Once the ballot is cast, the system must preclude the voter from modifying the ballot cast
  or voting or casting another ballot.
The purpose of this follow up review is to report on the current status of corrective actions taken by the Department of State (Department) in response to the recommendations made by the Auditor General. The Auditor General’s operational audit focused on the Department’s administration of the Federal Help America Vote Act of 2002 during the period July 1, 2004, through February 28, 2006, and selected actions taken through May 23, 2006. Also, the audit included an evaluation of the effectiveness of selected controls related to the Florida Voter Registration System.

**Auditor General’s Finding No. 1** The Department did not have a procedure in place to evidence for the public record that voting systems being certified had met the requirements of Florida law.

**Auditor General’s Recommendation** We recommend that the Department finalize the Checklist and utilize it to document for the public record that its voting system certification procedures meet the requirements of Florida law.

**Department’s Statement of Corrective Action(s) Implemented** The Bureau of Voting Systems Certification has finalized a test record checklist that includes an indication of compliance to the voting system’s relevant statutory requirements. The final version of the test record checklist will be used for future certification efforts until the effective date of the 2007 revision to the Florida Voting System Standards. At that time, this checklist will be integrated into a larger certification test record that will track all the requirements of the 2007 Florida Voting System Standards.

**Status of Corrective Actions** The Department’s Bureau of Voting Systems Certification has finalized the Florida Voting Systems Certification Checklist & Test Record and is utilizing it to evidence that voting systems certified by the Bureau met Florida Law.

**Auditor General’s Finding No. 2** The Department’s established procedures did not prohibit the Secretary of State and any examiners from having a pecuniary (financial) interest in the examination of and approval of voting equipment.

**Auditor General’s Recommendation** We recommend that the Department establish procedures requiring the periodic affirmation of the absence of pecuniary and other conflicts of interests.

**Department’s Statement of Corrective Action(s) Implemented** The Department has included a section in the Employee Handbook regarding ‘Special Disclosure Requirements for Certain Employees in the Division of Elections, Bureau of Voting Systems Certification’ concerning this...
issue. Pursuant to the section, employees in the Bureau of Voting Systems Certification are required to certify in writing that they do not have a pecuniary interest in any voting equipment.

The Department has developed a certification statement that employees who are involved in examining voting systems equipment for certification are required to sign. The certification statements are maintained in the Division of Elections.

**Status of Corrective Actions** The Department added a section to its Employee Handbook that prohibits the Secretary of State or any person who examines voting equipment for compliance with Section 101.5606, Florida Statutes, from having a pecuniary interest in such equipment. Also, certified statements applicable to pecuniary interests from the Secretary of State and employees of the Bureau of Voting Systems Certification were reviewed and are on file in the Division of Elections.

**Auditor General’s Finding No. 3** The Department did not maintain a current, reliable control listing of voting systems certified and in use by the counties. In addition, the Department did not have a procedure in place to ensure that voting system information was on file with the Department.

**Auditor General’s Recommendation** We recommend that the Department develop a current, reliable control listing; establish procedures to ensure that Supervisors of Elections submit all voting system information required by State law [Section 101.5607(1)(a), Florida Statutes]; and periodically confirm the accuracy of its listing with the Supervisors of Elections. Such confirmations should be made in connection with the Department’s periodic reconciliation of its control listing to the voting systems information provided and on file at the Department.

**Department’s Statement of Corrective Action(s) Implemented** The Bureau of Voting Systems Certification examined the voting system acquisition records for all 67 Florida counties. The Bureau identified the county records that were incomplete and/or obsolete.

In addition, the Bureau initiated an effort to actively pursue obtaining each county’s current system acquisition information on a periodic basis. As each county’s record became complete relative to the requirements of Section 101.5607(1)(a), Florida Statutes, the Bureau updated the voting system database to reflect this information. The information contained in this database is correct for all 67 counties and is available for public examination on the Division of Elections’ website.

During this process, the Bureau created a work instruction to serve as guidance for ascertaining each county’s current acquisition status, maintaining this information, and updating the relevant database. The work instruction is still under development.

**Status of Corrective Actions** The Bureau of Voting Systems Certification updated its information and created a control list of voting systems for all 67 counties. Also, the Bureau is drafting working instructions to specific procedures necessary to maintain an accurate and current voting system control list to be completed in the first quarter of 2007.
Auditor General's Finding No. 4  The Department incorrectly calculated the required maintenance of effort that was included in the State of Florida HAVA Plan and also did not maintain the required level of expenditures for the 2004-05 fiscal year.

Auditor General's Recommendation  The Department should update the State of Florida HAVA Plan to reflect the revised required MOE amount and ensure that the required MOE level is met each fiscal year in accordance with HAVA requirements.

Department's Statement of Corrective Action(s) Implemented  The HAVA State Planning Committee held two meetings on September 21, 2006 and October 12, 2006 in order to revise the HAVA State Plan. The updated plan includes the revised maintenance of effort level that the state must maintain as required by HAVA. In addition, the Department conducted a review of FY 2005-06 expenditures and initial calculations indicate that expenditures exceeded the MOE threshold.

Status of Corrective Actions  The Department has drafted an update to the State of Florida HAVA Plan which includes a section on maintenance of effort. The Department stated that the plan is required to be posted in the Federal Register for 30 days for public comments and anticipates completion in approximately two months.

Auditor General's Finding No. 5  Salary certifications required for employees who worked solely on the HAVA Program were not maintained. Also, personnel activity reports were not always maintained to support personnel costs charged to the HAVA Program.

Auditor General's Recommendation  We recommend that the Department's procedures ensure that required documentation supporting charges to the HAVA Program (including certifications and personnel activity reports) is properly and timely prepared and maintained. For any costs improperly charged to the HAVA Program, appropriate corrections should be made.

Department's Statement of Corrective Action(s) Implemented  Salary Certification statements are obtained every six months from all employees filling a HAVA-funded position. The certifications are maintained in the Division of Elections.

Status of Corrective Actions  The Division of Elections implemented a control procedure to ensure that all HAVA-funded employees signed salary certification forms.

Auditor General's Finding No. 6  Contrary to Federal cost principles, payment for unused leave to a terminating employee was charged as a direct cost to the Program instead of being allocated as a general administrative expense to all activities of the governmental unit.

Auditor General's Recommendation  We recommend that the Department, in compliance with Federal cost principles, allocate as a general administrative expense unused leave payments. We also recommend that, for any costs improperly charged to the HAVA Program, appropriate corrections be made.

Department's Statement of Corrective Action(s) Implemented  The Department submitted a request for guidance to the U. S. Election Assistance Commission (EAC) regarding leave
payments to terminating employees. Pending receipt of a response from the EAC, all payments for unused leave to employees who have terminated from state government have been transferred from the Grants and Donations Trust Fund to General Revenue.

**Status of Corrective Actions** The Department has requested but not received guidance from the U.S. Election Assistance Commission. All payments made by the Department for leave due terminated employees were transferred to the General Revenue Fund.

**Auditor General's Finding No. 7** Controls to ensure that voter education programs were in compliance with Florida law and Department rule were insufficient.

**Auditor General's Recommendation** We recommend that the Department ensure that all Plans are in compliance with Department rules and Agreements and that voter education expenditures correspond with detailed descriptions in the Plans. In addition, we recommend the Department ensure that the matching expenditures are reported separately on the expenditure report.

**Department's Statement of Corrective Action(s) Implemented** The Department is preparing a survey regarding voter education activities that will be sent to all Supervisors of Elections following the 2006 general election. Information from the survey will be used to determine each county’s compliance with elements listed in the Department’s rule on minimum standards for voter education. The survey is organized so that counties will report voter education expenditures made with HAVA/state funds separately from expenditures made with county funds. As required by Section 98.255, Florida Statutes, the Department will prepare a report that will be available by January 31, 2007, regarding the voter education programs and activities conducted by Supervisors of Elections during the 2006 general election period.

The Department has revised the language in its memorandum of agreement with Supervisors of Elections in order to implement changes regarding voter education plans and reporting requirements.

**Status of Corrective Actions** The Department prepared a survey to obtain information from Supervisors of Elections applicable to voter educational activities and compliance with specific laws, rules, and agreements. The Department intends to compare the survey’s information with the Supervisor’s approved voter educational plans as part of its compliance monitoring procedures. Also, the Department will use the surveys to obtain the amount of expenditures made from county match and HAVA funds. On November 14, 2006, the Department sent the Supervisors of Elections a new memorandum of agreement that included these new survey procedures. On November 21, 2006, the Department sent the survey to the Supervisors of Elections.

**Auditor General's Finding No. 8** HAVA Program expenditures were not always properly supported.

**Auditor General's Recommendation** We recommend that the Department ensure that required contractual terms are met and services are received prior to payment. In addition, we recommend that the Department only pay contractors in amounts agreed upon by specific contract or purchase order.
**Department’s Statement of Corrective Action(s) Implemented** Employees in the Office of Support Services will, upon receipt of a payment request or invoice, contact the contract manager if required documentation has not been received. Invoices will not be processed for payment until the contract manager certifies to Support Services that the deliverables have been met.

Working with the Office of Support Services, the accounts payable supervisor in the Budget and Financial Services Program checks for a certification that the required milestones and deliverables have been met. A payment will not be vouchered if the required certification is not included.

**Status of Corrective Actions** The Department has implemented the process as stated above to ensure receipt of deliverables and payment authorization.

**Auditor General’s Finding No. 9** The Department did not always follow Federal requirements with regards to awards to other State agencies.

**Auditor General’s Recommendation** We recommend that the Department take the necessary steps to ensure that the interagency agreements include all applicable Federal information and requirements and that appropriate monitoring is performed.

**Department’s Statement of Corrective Action(s) Implemented** All interagency agreements entered into or renewed after July 1, 2006, between the Department of State and governmental agencies such as the Florida Department of Highway Safety and Motor Vehicles or the Florida Department of Law Enforcement as they pertain to HAVA funds for election administration and/or voting purposes shall:

- Include standard provisions relating to federal and state audit, monitoring and reporting requirements.

- Identify, for audit purposes, the title and number of the appropriate type of federal assistance program (known as the Catalog of Federal Domestic Assistance) from which the funds are being made available.

- Condition the receipt and use of HAVA funds on the submission, review, and approval of specified written certifications and plans for use of these funds or the inclusion of comprehensive written specifications or terms in return for receipt and use of the funds, whichever is applicable.

- Require the recipient of HAVA funds to report to the Department of State any change or deviation from any plan originally submitted for review and approval for receipt and use of such funds, or to require the mutual written agreement to modify any material change to written specifications or terms in the agreement.

- Require any governmental official or entity to receive federal HAVA funds to complete federal ED Form GCS-009, 6/88, “Certification Regarding Debarment, Suspension,
Ineligibility and Voluntary Exclusion Lower Tier Covered Transactions” (created pursuant to Executive Order 12549 (46CFR 1183.35). Such form must be completed and submitted prior to the Department entering into or renewing any agreement.

Existing interagency agreements with Florida Department of Law Enforcement and Florida Department of Highway Safety and Motor Vehicles are currently under review and will be revised to include the above-referenced provisions since the Department’s and these agencies’ focus on Florida Voter Registration System has now evolved from development and implementation to operation and maintenance of the system.

**Status of Corrective Actions** As of this report date, the Department has not entered into any new agreements with the Florida Department of Law Enforcement or the Department of Highway Safety and Motor Vehicles. The Department is in the process of reviewing current agreements for appropriate revisions.

**Auditor General's Finding No. 10** Improvements were needed in the Department's Information Technology (IT) risk management practices.

**Auditor General's Recommendation** Upon completion of the FVRS risk assessment, the Department should implement policies and procedures to mitigate identified risks, including ensuring that all access to Department systems is documented in a uniform manner according to policy, maintained in a central location, and periodically reviewed.

**Department’s Statement of Corrective Action(s) Implemented** A baseline Risk Assessment was completed on the FVRS in June 2006. A corrective action plan has been established and is in the execution phase. Additionally, a Department employee has been reassigned to the position of Information Security Administrator and Network Administrator.

IT Security Policies have been updated at the department level and authorization procedures have been updated.

**Status of Corrective Actions** On July 5, 2006, the Department received its final risk assessment report prepared by an independent contractor. Based upon this risk assessment the Department and the State Information Security Office prepared a corrective action plan. As of this date, the Department completed and continues to implement corrective actions identified in the plan. Also, the Department reassigned an employee to the position of Information Security Administrator and Network Administrator in order to enhance improvements needed in the Department’s information risk management practices as identified by the Auditor General. Finally, the Department prepared the FVRS Information Security Plan which is pending final approval from the Department’s senior management.

**Auditor General's Finding No. 11** The Department had not adopted a governance model addressing the management, use, and operation of FVRS commensurate with its authority and responsibility to ensure the system’s security, uniformity, and integrity.
**Auditor General’s Recommendation**  The Department should, in coordination with the county Supervisors of Elections, adopt a governance model that includes security measures in support of, and for the protection of, the FVRS business purpose and the confidentiality, availability, and integrity of data contained therein. Specifically, written procedures should be established to address those areas noted above with consistent application to ensure the system’s security, uniformity, and integrity.

**Department’s Statement of Corrective Action(s) Implemented**  The Department has created a System Security Plan (SSP). In addition, a memorandum of understanding regarding information security issues has been executed with each Supervisor of Elections.

The Division of Elections Continuity of Operations Plan is in the final stages of development and includes a regional response plan involving all Supervisors of Elections.

User audit capabilities have been improved and development in this area continues.

Each employee with access to FVRS or access to data of confidentiality has signed a strict standard of conduct regarding the protection and security of that data. The Department is reviewing the duties of positions with access to FVRS to determine which of these positions should be classified as positions of special trust.

**Status of Corrective Actions**  The Department created a System Security Plan and executed, with each Supervisor of Elections, a Memorandum of Agreement For Minimum Security Standards For The Florida Voter Registration System. The Department is finalizing the Division of Elections Continuity of Operations (COOP) Plan, including a Regional Response Plan for all Supervisors of Elections. Also, each Department employee with access to FVRS or confidential data executed an acknowledgment statement titled, Standards of Conduct Governing Access To The Florida Voter Registration System and Other Agency Records.

**Auditor General’s Finding No. 12**  Although the Department had put measures in place to help ensure the integrity of data in FVRS, improvements were needed in the processes for identifying duplicate registrations and ineligible voters.

**Auditor General’s Recommendation**  The Department should implement FVRS matching functionality, as planned, to allow for systematic identification of possible duplicate voters. In addition, the Department should expand, as planned, current systematic felon matching to include matching of all existing registrations against all felony records. The Department should also implement a formalized process to determine if Supervisors of Elections have satisfactorily met certification requirements prescribed by Florida Statutes. Further, the Department should continue to work with agencies that supply the Department with data for matching and verification purposes to increase data reliability, integrity, and timeliness.

**Department’s Statement of Corrective Action(s) Implemented**  FVRS continues to perform a duplicate matching process on a continual basis which to date has identified 86,008 potential duplicates which have been sent to the counties for evaluation. The Division continues to work with the Supervisors of Elections’ vendors of local election administration systems to streamline the duplicate matching process recognizing there will be programming adjustments necessary.
The Department developed a form for Supervisors of Elections to report list maintenance activities. Certifications regarding list maintenance activities have been received from all Supervisors of Elections covering activities between January 1, 2006 and June 30, 2006.

**Status of Corrective Actions** The Department implemented the FVRS matching functionality for systematic identification of possible duplicate voters and continues to work with the Supervisor of Elections to improve the matching process. However, as of this date, the Department has not expanded its current felon matching process to include registered voters prior to January 1, 2006, except for voters that incurred a change in their voter registration after January 1, 2006. The Department has stated its intent to expand its felon matching search based upon resources available. Also, the Department has developed a process to determine and document certification of voter registration activities by the Supervisors of Elections.
December 13, 2006

Sue M. Cobb, Secretary of State
Florida Department of State
R.A. Gray Building
500 South Bronough Street
Tallahassee, FL 32399-0250

Re: Follow-Up Review Applicable to Auditor General Report #2006-194, Help America Vote Act (HAVA) and the Florida Voter Registration System (FVRS) – Operational.

Dear Secretary Cobb:

Pursuant to Section 20.055(5)(g), Florida Statutes, the Office of Inspector General (OIG) conducted a follow-up review applicable to the Auditor General’s Report as referenced above. We have attached a copy of our report for your review.

As required by law, we have published our report on the status of the corrective actions taken by the Department and filed a copy of such response with the Legislative Auditing Committee.

If you require additional information on this matter please contact me.

Sincerely,

Kirby J. Mole, CIA
Inspector General

Att.

cc. Mr. Terry L. Shoffstall, Director, Legislative Auditing Committee
Thomas Wilkey, Executive Director, U.S. Election Assistance Commission
Derry Harper, Chief Inspector General, Executive Office of the Governor
David E. Mann, Assistant Secretary of State
Heidi Hughes, Chief of Staff/General Counsel
Dawn Roberts, Director, Division of Elections

3.3.2 Voting Functions

3.3.2.1 Polling Place Verification
Provides a means for verifying:
- Equipment is installed at the correct polling place
- Equipment is in its initialized state
- Equipment is ready for casting of ballots
- Proper execution is verified by means of an equipment-generated record, retained as part of the audit record

3.3.2.2 Party Selection
- Allows casting for the party of choice in a primary election and for all non-partisan candidates and measures, while preventing voting for a candidate of another party
- Provides a means in a general election to select any candidate and to select any measure on the ballot

3.3.2.3 Ballot Sub-setting
- Provides a means of disabling that portion of a ballot for which the voter is not entitled to vote

3.3.2.4 Enabling the Ballot
- Provides a means for enabling the recording of votes

3.3.2.5 Candidate and Measure Selection
- Method of voting complies with the following sections of 101.5606, F.S.
  - (1) Permits and requires voting in secrecy.
  - (2) Permits each elector to vote at any election for all persons and offices for whom and for which the elector is lawfully entitled to vote, and no others; to vote for as many persons for an office as the elector is entitled to vote for; and to vote for or against any question upon which the elector is entitled to vote.
  - (3) Rejects a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast.
  - (4) Accepts a rejected ballot pursuant to subsection (3) for a marksense ballot, if a voter chooses to cast the ballot, but records no vote for any office that has been overvoted or undervoted.
  - (5) Capable of correctly counting votes.
6. Permits each voter at a primary election to vote only for the candidates seeking nomination by the political party in which such voter is registered, for any candidate for nonpartisan office, and for any question upon which the voter is entitled to vote.

7. Permits each elector by one operation, to vote for all presidential electors of a party or for all presidential electors of candidates for President and Vice President with no party affiliation.

9. Capable of accumulating a count of the specific number of ballots tallied for a precinct, accumulating total votes by candidate for each office, and accumulating total votes for and against each question and issue of the ballots tallied for a precinct.

10. Capable of tallying votes from ballots of different political parties from the same precinct, in the case of a primary election.

11. Capable of automatically producing precinct totals in printed, marked, or punched form, or a combination thereof.

12. Permits each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed, if it is of a type which registers votes electronically.

13. Capable of providing records from which the operation of the voting system may be audited.

14. Uses a precinct-count tabulation system.

15. Does not use an apparatus or device for the piercing of ballots by the voter.

### 3.3.2.6 Standards for Equally Accessible Electronic Voter Interfaces

- Method of voting complies with the following sections of 101.56062, F.S.

1. Has the capability to install accessible voter interface devices in the system configuration which allow the system to meet the following requirements:
   - a. Provides a tactile input or audio input device, or both.
   - b. Provides a method by which voters can confirm any tactile or audio input by having the capability of audio output using synthetic or recorded human speech that is reasonable phonetically accurate.
   - c. Any operable controls on the input device which are needed for voters who are visually impaired must be discernible tactically without actuating the keys.
   - d. Audio and visual access approaches must be able to work both separately and simultaneously.
   - e. If a non-audio access approach is provided, the system may not require color perception. The system must use black text or graphics, or both, on white background or white text or graphics, or both, on black background, unless the office of the Secretary of State approves other high-contrast color combinations that do not require color perception.
   - f. Any voting system that requires any visual perception must offer the election official who programs the system, prior to its being sent to the polling place, the capability to set the font size, as it appears to the voter, from a minimum of 14 points to a maximum of 24 points.
   - g. The voting system must provide audio information, including any audio output using synthetic or recorded human speech or any auditory feedback tones that are important for the use of the audio approach, through at least one mode, handset or headset, in enhanced auditory fashion (increased amplification) and must provide incremental volume control with output amplification up to a level of at least 97 dB SPL.
   - h. For transmitted voice signals to the voter, the voting system must provide a gain adjustable up to a minimum of 20 dB with at least one intermediate step of 12 dB of gain.
   - i. For the safety of others, if the voting system has the possibility of exceeding 120 dB SPL, then a mechanism must be included to reset the volume automatically to the voting system's default volume level after every use, for example when the handset is
replaced, but not before. Also, universal precautions in the use and sharing of the headsets should be followed.

- (j) If sound cues and audible information such as "beeps" are used, there must be simultaneous corresponding visual cues and information.
- (k) Controls and operable mechanisms must be operable with one hand, including operability with a closed fist, and operable without tight grasping, pinching, or twisting of the wrist.
- (l) The force required to operate or activate the controls must be no greater than 5 pounds of force.
- (m) Voting booths must have voting controls at a minimum height of 36 inches above the finished floor with a minimum knee clearance of 27 inches high, 30 inches wide, and 19 inches deep, or the accessible voter interface devices must be designed so as to allow their use on top of a table to meet these requirements. Tabletop installations must include adequate privacy.

3.3.2.7 Audio Ballots

Note: The functionalities required for the audio ballot may be satisfied by either the voting device or by the entire voting system.

- Complies with standards for electronic voter interfaces
- Controls are discernable tactilely without actuating the controls
- Provide a voter operated volume control
- Method of voting complies with the following subsections of 101.56062(1)(n), F.S.
  - (1) After the initial instructions that the system requires election officials to provide to each voter, the voter should be able to independently operate the voter interface through the final step of casting a ballot without assistance.
  - (2) The voter must be able to determine the races that he or she is allowed to vote in and to determine which candidates are available in each race.
  - (3) The voter must be able to determine how many candidates may be selected in each race.
  - (4) The voter must be able to have confidence that the physical or vocal inputs given to the system have selected the candidates that he or she intended to select.
  - (5) The voter must be able to review the candidate selections that he or she has made.
  - (6) Prior to the act of casting the ballot, the voter must be able to change any selections previously made and confirm a new selection.
  - (7) The system must communicate to the voter the fact that the voter has failed to vote in a race or has failed to vote the number of allowable candidates in any race and require the voter to confirm his or her intent to undervote before casting the ballot.
  - (8) The system must prevent the voter from overvoting any race.
  - (9) The voter must be able to input a candidate's name in each race that allows a write-in candidate.
  - (10) The voter must be able to review his or her write-in input to the interface, edit that input, and confirm that the edits meet the voter's intent.
  - (11) There must be a clear, identifiable action that the voter takes to "cast" the ballot. The system must make clear to the voter how to take this action so that the voter has minimal risk of taking the action accidentally but, when the voter intends to cast the ballot, the action can be easily performed.
  - (12) Once the ballot is cast, the system must confirm to the voter that the action has occurred and that the voter's process of voting is complete.
  - (13) Once the ballot is cast, the system must preclude the voter from modifying the ballot cast or voting or casting another ballot.
**AGENCY ISSUE NARRATIVE:**

2007-2008 BUDGET YEAR NARRATIVE:  

"Amended 2007-08 Narrative after February 2, 2007"

A routine audit by the Auditor General of the State of Florida has determined that the State is short of the required Help America Vote Act (HAVA) state match by the above amount. The State referred to a U.S. Election Assistance Commission Office of the Inspector General Report on the Administration of HAVA payments by the Illinois State Board of Elections. The calculation methodology was different than that used by the State of Florida and included in the HAVA Planning Committee report, leaving the State short of the required match.

Florida calculated match based on multiplying the total of HAVA requirements by 5% and matching that amount. Below is a table detailing the correct calculation and showing the shortage.

| Section 251 Revenue Received | $47,416,833 |
| Subtotal | $132,502,091 |
| Multiply by .95 | $129,475,865 |
| Less 251 Payments | $132,502,091 |
| Required 5% | $6,972,794 |
| State of Florida Match & 5% of Sec. 251 | $6,628,018 |
| Additional Match Required for 251 | $345,776 |

**Estimated interest lost**  

$30,000

**Total Issue**  

$375,776

"Summary: This is a new issue."
A routine audit by the Auditor General of the State of Florida has determined that the State is short of the required Help America Vote Act (HAVA) state match by the above amount. The State referred to a U.S. Election Assistance Commission Office of the Inspector General Report on the Administration of HAVA payments by the Illinois State Board of Elections. The calculation methodology was different than that used by the State of Florida and included in the HAVA Planning Committee report, leaving the State short of the required match. Florida calculated match based on multiplying the total of HAVA requirements by 5% and matching that amount. Below is a table detailing the correct calculation and showing the shortage:

DeForest B. Soaries, Jr., Chairman  
Election Assistance Commission  
1225 New York Avenue, N.W., Suite 1100  
Washington, D.C. 20005  

Dear Mr. Soaries:

As Chief Election Officer of the State, I am pleased to present the State of Florida’s HAVA Plan which has been revised for FY 2004. As indicated in the initial Plan submitted in 2003, Florida has already succeeded in meeting many of the requirements in HAVA. During Florida’s Fiscal Year 2003-04, a number of additional requirements were met including the development of performance goals and measures. These are reflected in the revised Plan.

Florida’s revised plan was developed through the Help America Vote Act Planning Committee, a group of dedicated individuals representing various constituency groups throughout the State. This Committee developed Florida’s original HAVA Plan and agreed to serve again in 2004. Although the Florida Department of State does not necessarily agree with all of the Committee’s recommendations and conclusions, I commend the Committee for its continuing hard work and diligence in developing revisions to the Plan.

The revised Plan recognizes that additional resources are required in order for our Supervisors of Elections to provide continuing voter education to the citizens of the State, to recruit qualified poll workers, and to provide the necessary training for those workers. As chief Election Officer, I am committed to working closely with and supporting our Supervisors as we continue to ensure Florida voters have every confidence that their vote counts.

We have accepted the Committee’s work without revision, however, we will revise and update the Plan as necessary to reflect the progress made in implementing HAVA and to chart the future goals and plans for elections. We look forward to continuing our election reform efforts to make this state the model for elections reform throughout the nation.

Sincerely,

Glenda E. Hood

Glenda E. Hood
Introduction

Since the aftermath of the General Election of 2000, Florida has led the nation in its election reform efforts to ensure that every registered voter should have the opportunity to vote and to ensure that every vote counts.

The goal is perfection. Reaching that goal in an ever changing democracy and within a diverse population is an ongoing task that requires constant experimentation and learning. The people and the leadership of Florida have dedicated themselves to this course of action.

The struggle for improving our election process reveals itself in many ways. Citizens have increased their involvement by serving on local and State election task forces, researching new voting technologies, debating new standards for poll worker training, increasing voter education opportunities, and registering new voters. The people of Florida continue to make election reform a top priority.

The leadership of Florida has also acted decisively. Florida has enacted legislative and local reforms during the last two years that lead the nation. These reforms include cutting-edge voting system standards, millions of dollars for new voting technology, expanded voter education efforts, and thousands of newly trained poll workers. A statewide poll taken the day of the 2002 General Election found that Floridians gave high marks to the election reform changes including a 91% "excellent-good" rating for poll workers and an 88% confidence rating from voters that their votes will count. These results are not "perfect," but Florida is moving in a positive direction to make all facets of the election process better each time an election is held.

With the passage and signing of the Help America Vote Act of 2002 (HAVA) on October 29, 2002, election reform will spread throughout the nation. The new federal law asks States to develop election reform plans that will improve election administration in many areas. Florida embraces the new federal law and hopes that other States will use it as an opportunity to share new election reform ideas and practices with one another.

The people of Florida have learned many things about election reform. Yet, there are enduring principles which are reflected within many recommendations and changes of Florida’s election reform efforts. These principles were developed by Florida’s first task force in the aftermath of the 2000 General Election:

Enduring Principles of Elections

- Elections are first and foremost acts of millions of individual people: citizens who register and vote; candidates who offer themselves and their platforms for public judgment; poll workers who put in long days at precincts; and election officials who
supervise the process. Honest, responsible, intelligent people will make most technology systems work well.

- Voting should be a simple, convenient and friendly process that encourages each citizen to express his or her choices.
- Voting systems should be designed to determine voter intent, to the extent that is humanly possible.
- Voting methods for statewide and national elections should meet uniform standards and national standards for fairness, reliability and equal protection of voting opportunity.
- Elections must meet two competing objectives: certainty (making every vote count accurately) and finality (ending elections so that governing can begin).
- While voting should be individual and private, procedures for counting and challenging votes should be open, transparent, and easily documented to ensure public confidence in the results.

Fulfilling the promises of these enduring principles will require continued vigilance and action. With this HAVA Plan, Florida continues its journey to mount an increasingly open and fair system of determining the will of the people.

The Help America Vote Act of 2002 requires all States to develop and implement a statewide plan. Listed below are the thirteen primary elements that must be addressed in the plan.

**Help America Vote Act of 2002 (HAVA)**
Public Law 107-252 – October 29, 2002

SEC. 254. STATE PLAN.
(a) IN GENERAL.—The State plan shall contain a description of each of the following:

**Element 1.**
How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

**Element 2.**
How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and
B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Element 3.
How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Element 4.
How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

Element 5.
How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

Element 6.
The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on —
A) The costs of the activities required to be carried out to meet the requirements of Title III;
B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and
C) The portion of the requirements payment which will be used to carry out other activities.

Element 7.
How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Element 8.
How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.
Element 9.
A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Element 10.
If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Element 11.
How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change —
   A) Is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;
   B) Is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and
   C) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Element 12.
In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Element 13.
A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.
Element 1. Use of Title III Requirements Payments:

A. Voting Systems

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction

Following the 2000 General Election, the people of Florida made a concerted effort to improve all facets of its election procedures, standards and voting systems. The first major changes were the recommendations advanced by the 2001 Governor's Select Task Force on Election Procedures, Standards and Technology followed by the passage of the Florida Election Reform Act of 2001. A central component of Florida's new election law mandated the replacement of punch card voting systems, lever machines, paper ballots and central count optical scanning systems with precinct tabulated Marksense voting systems or the Direct Recording Electronic voting systems. The new voting systems were put into service to reduce voter error, to improve tabulation accuracy, and to restore voter confidence in Florida's elections.

Florida has adopted voting system standards which meet and exceed standards established by the Federal Election Commission. Florida's voting system standards are reviewed every two years to determine whether they are adequate and effective in carrying out fair and impartial elections. The Bureau of Voting Systems Certification within the Department of State has statutory authority to adopt rules which establish minimum standards for voting systems purchased and used in Florida. Florida's 67 counties have authority to purchase and to maintain the appropriate certified voting system for their registered voters. Since 2001, the State of Florida has provided $24 million to assist counties in purchasing new certified voting systems.

Only two types of voting systems are certified for use in Florida's 67 counties—Direct Recording Electronic (DRE or “touchscreen”) voting systems and Marksense with precinct-based tabulation.

There are three manufacturers who have certified voting systems for use in Florida: Diebold; Elections Systems and Software, Inc. (ES&S); and Sequoia Voting Systems, Inc. (SP). The Diebold system that has been certified by the State of Florida consists of a Global Election Management System Software (GEMS) Voting System consisting of GEMS, Release 1-18-19; one or more AccuVote TS R6 Touch Screen Ballot Station Version 4.3.15D (Windows CE 3.0) devices; one or more AccuVote-OS Optical Scan Tabulators with Firmware Version 1.94w and VLR firmware 13.9; Key Card Tool Version 1.0.1; Voter Card Encoder Version 1.3.2; and optionally one or more AccuFeed units, Revision D or E OS (optical scan) Firmware 1.94w.

The following chart details the types of voting systems used in Florida, the respective manufacturer, and the number of counties using the voting systems.

The Help America Vote Act of 2002 (HAVA) establishes new minimum requirements for administering federal elections. These new voting system requirements are found in Title III of the federal law. The new requirements shape the performance and the administration of voting systems. Florida is in compliance with many of these new federal directives and these are addressed in the HAVA State Plan.

Section 301(a) of HAVA requires that Florida's voting systems meet the following requirements by January 1, 2006. Florida will be in compliance with all of these requirements by the federal deadline of January 1, 2006.
Section 301(a) Voting System Standards and Requirements

**Section 301(a)(1)(A)(i):** Do Florida's voting systems permit the voter to verify in a private and independent manner the votes selected by the voter before the ballot is cast and counted?

Yes, and no further actions are required.

Section 101.5606(1), *Florida Statutes*, states that no voting system in Florida shall be approved by the Department of State unless it “permits and requires voting in secrecy.”

Florida Voting System Standards (April 2002) state that “the voter must be able to review the candidate selections, which he or she has made. Prior to the act of casting a ballot, the voter must be able to change any selection previously made and confirm the new selection.” (p. 21)

Florida Voting System Standards (April 2002) state that the voting function standards applicable to all Electronic Voter Interfaces must provide “after the initial instructions, which the system requires election officials to provide to each voter, the voter should be able to independently operate the voter interface through the final step of casting a ballot without assistance.” (p. 20)

**Section 301(a)(1)(A)(ii):** Do Florida's voting systems provide the voter with the opportunity in a private and independent manner to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct the error)?

Yes, and no further actions are required.

Florida Voting System Standards (April 2002) state that “the voter must be able to review the candidate selections, which he or she has made. Prior to the act of casting a ballot, the voter must be able to change any selection previously made and confirm the new selection.” (p. 21)

Section 101.5606(12), *Florida Statutes*, requires that electronic voting systems should “permit each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed.”

Section 101.5608(2)(b), *Florida Statutes*, requires that “Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, the ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide..."
Section 101.5611(1), Florida Statutes, requires that the “supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth.”

**Section 301(a)(1)(A)(iii): If the voter selects votes for more than one candidate for a single office, do Florida’s voting systems: (1) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (2) notify the voter before the ballot is cast and counted of the effect of casting the multiple votes for the office; and (3) provide the voter with the opportunity to correct the ballot before the ballot is cast?**

**Yes, and no further actions are required.**

Section 101.5606(3), Florida Statutes, requires voting systems to immediately reject “a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast.”

Section 101.5606(4), Florida Statutes, requires that systems using paper ballots accept a rejected ballot if the voter chooses to cast the ballot after it has been rejected, but the ballot will record no vote for any office that has been overvoted or undervoted.

Section 101.5608(2)(b), Florida Statutes, provides that “Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, a ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in an envelope.”

Section 101.5611(1), Florida Statutes, requires that the “supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth.”

Florida Voting System Standards (April 2002) state that “the system must prevent the voter from over voting any race.” In addition, “there must be a clear, identifiable action, which the voter takes to ‘cast’ the ballot. The system must make clear to the voter how to take this action, such
that the voter has minimal risk of taking the action accidentally, but when the voter intends to cast the ballot, the action can be easily performed.” (p. 21)

Florida Voting System Standards (April 2002) state that “Marksense systems shall reject blank ballots and ballots with overvoted races. Electronic voter interfaces shall prevent a voter from overvoting a race, and shall provide a means of indicating, to the voter, any races that may have been undervoted before the last step necessary to cast the ballot.” (p. 22)

Section 301(a)(1)(B): Does Florida’s mail-in absentee and mail-in ballot process meet the requirements of subparagraph (A)(iii) by: (i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple ballots for an office; and (ii) providing the voter instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)?

Yes, and no further actions are required.

The Florida Legislature has amended Section 101.65, Florida Statutes, to require the instructions for absentee voters to include the following language:

Mark only the number of candidates or issue choices for a race as indicated on the ballot. If you are allowed to “Vote for One” candidate and you vote for more than one candidate, your vote in that race will not be counted.

In addition, Rule 1S-2.032, Florida Administrative Code (F.A.C.), (Uniform and General Election Ballot Design) instructs all voters on how to correct their ballots and how to request a replacement ballot if the voter is unable to change or correct the original ballot.

Instructions on how to correct the error through issuance of a replacement ballot are:
If you make a mistake, don’t hesitate to ask for a new ballot. If you erase or make other marks, your vote may not count.

The HAVA Planning Committee also suggested that absentee voters should be given clear notification that the deadline for submitting absentee ballots is by 7:00 p.m. of election night and that mailing the ballot may not ensure that it will arrive in time to be counted.
Section 301(a)(1)(C): Does Florida’s absentee and mail-in ballot process preserve the privacy of the voter and the confidentiality of the ballot?

Yes, and no further actions are required.

Section 101.65, Florida Statutes, requires supervisors of elections to enclose with each absentee ballot a separate printed instruction form, a secrecy envelope, a Voter’s Certificate and a mailing envelope. The instructions provide the following guidelines:

- Mark your ballot in secret as instructed on the ballot. You must mark your own ballot unless you are unable to do so because of blindness, disability, or inability to read or write.
- Place your ballot in the enclosed secrecy envelope.
- Insert your secrecy envelope into the enclosed mailing envelope which is addressed to the supervisor.

Section 101.68(2)(d), Florida Statutes, contains a detailed policy and procedure instructing the local canvassing boards in the manner of handling absentee ballots to ensure that the confidentiality of the ballot is maintained.

Section 301(a)(2)(A): Do Florida voting systems produce a record for audits?

Section 301(a)(2)(B): Do the voting systems produce a permanent paper record with a manual audit capacity?

Section 301(a)(2)(C): Is the paper record produced in subparagraph (A) available as an official record for any recount conducted with respect to any election in which the system is used?

Yes, and no further actions are required.

The HAVA Planning Committee determined through research conducted by staff, through testimony offered by Congressional staff, and through testimony given by staff from the Division of Elections that Florida complies with the HAVA audit requirement. Florida voting system standards require DRE machines to maintain a random sorted file of ballot images for every vote cast, and they also have to maintain detailed logs for each election from the time they are first programmed for an election until the results are copied to archival media. Certified voting systems in Florida are required to print out a paper tape of summary totals in each precinct. The paper record is produced to reconcile the consolidated totals for the county in the event of a recount.

Staff from the Division of Elections testified before the HAVA Planning Committee that Florida’s State and local security measures make it highly unlikely any tampering could take place with the voting systems. In addition, staff also testified that Florida’s certified voting
systems are tested in public forums for logic and accuracy before the election. There are also thorough procedural and security controls in place at the local level to safeguard against someone tampering with the voting systems. The Division of Elections' staff cited Rule IS-2.015(5)(m3.a., F. A. C., relating to minimum election security procedures which requires the "printing of precinct results and results from individual tabulating devices" for every election. In addition, the Florida Legislature has authorized the Department of State to promulgate rules which would require supervisors to check those paper totals against electronic totals during machine recounts. The following statutes and rules lay the groundwork for Florida's ability to comply with the audit requirements of HAVA:

Section 101.015(5)(a), Florida Statutes, requires the Department of State to adopt rules which establish standards for voting systems, including audit capabilities.

Section 101.5606(11 & 13), Florida Statutes, requires the Department of State to approve only voting systems that are capable of automatically producing precinct totals in printed, marked, or punched form or a combination thereof. The voting systems must be capable of providing records from which the operating system of the voting system may be audited.

Florida Voting System Standards (April 2002) provide general functional requirements of voting systems which "shall include the capability to produce records, generated by the system components, or in some cases, by the system operators from which all operations may be audited. Except for the storage of vote images, which shall be maintained in a random sequence, the records shall be created and maintained in the sequence in which the operations were performed." (pp. 16-17)

Florida Voting System Standards (April 2002) require precinct count systems to provide a means for obtaining a printed report of the votes counted on each voting device, and to provide a means for extracting this information to a transportable memory device or data storage medium. (p. 23)

Florida Voting System Standards (April 2002) require the generation of reports by the system to be performed in a manner which does not erase or destroy any ballot image, parameter, tabulation or audit log data. The system shall provide a means for assuring the maintenance of data integrity and security for a period of at least 22 months after the closing of the polls. (p. 24)

Section 102.166(5)(d), Florida Statutes, requires the Department of State to adopt detailed rules prescribing additional manual recount procedures for each certified voting system which shall be uniform to the extent practicable. The rules shall address, at a minimum, the following areas:

- Security of ballots during the recount process
- Time and place of recounts
- Public observance of recounts
- Objections to ballot determinations
- Record of recount proceedings
- Procedures relating to candidate and petitioner representatives

**Section 301(a)(3)(A):** Does Florida have certified voting systems for individuals with disabilities, including non-visual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters?

**Section 301(a)(3)(B):** Does Florida meet the requirement in subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place?

**Partially meets, and further actions are required.**

In 2001, the Secretary of State appointed a task force to conduct a comprehensive review of Florida’s election laws and procedures. The task force recommended legislation to insure that Florida’s voters with disabilities could fully exercise their right to a secret ballot, as guaranteed by Florida’s Constitution. Many of the recommendations of the task force were passed by the Legislature and signed into law by Governor Bush in 2002 and are found in Chapter 2002-281, *Laws of Florida.* Several sections of the law, including sections setting forth specific standards that voting systems must meet, did not become effective immediately, however. They were made contingent on further appropriations by the Legislature, in expectation of the receipt of federal funding as now provided in HAVA.

HAVA requires that all voting systems be accessible to persons with disabilities by January 1, 2006, but does not specifically define what is required to accomplish this. HAVA’s definition of what constitutes a voting system, however, found in Section 301(b), is comprehensive. Florida has already done the difficult and time consuming work of defining what makes a Florida voting system accessible for persons with disabilities and these standards are found in Chapter 2002-281, *Laws of Florida.* However, as noted above, many sections are not currently in effect. Some slight additional changes to Florida law will need to be made to include provisional ballots, which HAVA requires to be accessible, within Florida’s accessibility requirements.

Not only has Florida already enacted much of the required accessibility reforms required by HAVA, but the intent of the Legislature to comply fully with Federal requirements is clearly set out in statute. Section 101.56063, *Florida Statutes,* provides that:

> It is the intent of the Legislature that this state be eligible for any funds that are available from the Federal Government to assist states in providing or improving accessibility of voting systems and polling places for persons having a disability. Accordingly, all state laws, rules, standards, and codes governing voting systems and polling place accessibility must be maintained to ensure the state's eligibility to receive federal funds. It is the intent
of the Legislature that all state requirements meet or exceed the minimum federal requirements for voting systems and polling place accessibility.

In addition to the above, Florida must take steps now in the certification and system procurement processes to insure that it is able to meet the HAVA requirements in time. HAVA requires that voting systems themselves, not just Florida law, must meet the accessibility requirements by January 1, 2006. The HAVA Planning Committee heard testimony from Division of Elections' staff who cautioned that Florida cannot compel any voting systems vendor to bring equipment to the State for certification. Staff testimony further noted that the lack of available certifiable equipment has been a significant problem in the past that continues to the present. With the proper incentives for vendors and tools for counties to require compliance with accessibility standards, Florida will be able to comply with HAVA requirements by January 1, 2006.

Accordingly, the HAVA Planning Committee recommends that the Division, beginning immediately, require that all new certified voting systems comply with the requirements of Section 101.56062, Florida Statutes. Further, any purchase of a voting system by a governmental entity after July 1, 2004 should be required to include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, Florida Statutes. Finally, all voting systems in use as of January 1, 2006, should be required to be both certified to meet, and be deployed in a configuration that meets, the requirements of Section 101.56062 and Section 101.5606, Florida Statutes.

The Florida Legislature during the 2004 Session triggered the accessibility standards found in Chapter 2002-281 by making HAVA funds available to counties through the Department of State. The language is as follows:

From the funds in Specific Appropriation 2871I, $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place.

The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place. No supervisor of elections shall receive any funds until the county supervisor of elections certifies to the Department of State: 1) the number of precincts in the county; 2) the number of polling places in the county; 3) the number of voting machines the county has that meet the disability requirement; 4) the county's plan for purchasing the DRE's; and 5) the date that the county anticipates being in compliance. The Department of State will determine the number of DRE's needed in each county based on the certifications provided by the supervisors of elections. Any county that receives funds from Specific Appropriation 2871I that is not in compliance with the accessibility requirements in Section 301(a)(3) Title III of the Help America Vote Act by January 1, 2006, shall be required to return those funds to the State.
The HAVA Planning Committee encourages the Legislature to continue to support accessible voting for persons with disabilities by mandating that provisional ballots for voters with disabilities shall be provided to them by a system that meets the requirements of Section 101.56062, Florida Statutes, by January 1, 2006.

The HAVA Planning Committee encourages the Legislature to continue to support accessible voting for persons with disabilities by enacting a HAVA Implementation Bill which immediately requires:

A. All electronic and electromechanical voting systems certified by the State must meet the requirements of Section 101.56062, Florida Statutes, (except subsection (1)(d), which is exempted in the statute);

B. Any purchase of a voting system by any county, municipality or by the State must include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, Florida Statutes; and

C. All electronic and electromechanical voting systems in use on or after January 1, 2006 must be certified to meet and be deployed in a configuration which meets the requirements of Section 101.56062 and Section 101.5606, Florida Statutes.

The HAVA Planning Committee also discussed polling place accessibility even though this topic is not required to be addressed in the HAVA plan. It was noted that the State of Florida has taken the initiative to contract with the Disability Relations Group to help it comply with HAVA. In addition, the Division of Elections has applied for polling place accessibility funding with the U.S. Department of Health and Human Services. The Division of Elections has been awarded two grants in the amount of $687,278 and of $492,941.

Several members of the HAVA Planning Committee also noted there is a sense of urgency to bring polling places into compliance. One Committee member referred to a recent United States Supreme Court decision that requires government to comply with the Americans With Disabilities Act. The HAVA Planning Committee recommended that the State of Florida address the polling place issue quickly by asking the Governor to provide emergency funding to bring polling places into ADA compliance.

Section 301(a)(3)(C): Will Florida purchase voting systems with funds made available under Title II on or after January 1, 2007, that meet the voting system standards for disability access (as outlined in this paragraph)?

Yes, and no further actions are required.
Section 301(a)(4): Does Florida have certified voting systems that provide alternative language accessibility pursuant to the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a)?

Yes, and no further actions are required.
In order to be certified for use in Florida, DRE voting systems must provide alternative language accessibility for all interfaces in order to meet the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa through 1a). Florida Voting System Standards (April 2002) require that all configurations must support all voter interface functions in at least the following languages: English, Spanish, and Haitian Creole. (p. 22)

Counties using Marksense voting systems must meet the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa through 1a) by printing ballots in the required languages.

Section 301(a)(5): Does Florida have certified voting systems that comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Elections Commission which are in effect on the date of the enactment of this Act?

Yes, and no further actions are required.
Florida Voting System Standards (April 2002) contain voting system accuracy standards which exceed the error standards established by the Federal Elections Commission. (pp. 35-36)

Section 301(a)(6): Has Florida adopted uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting systems used in the State?

Yes, and no further actions are required.
Section 102.166(5)(a), Florida Statutes, states that “a vote for a candidate or ballot measure be counted if there is a clear indication on the ballot that the voter has made a definite choice.”

Section 102.166(5)(b), Florida Statutes, requires the Department of State to “adopt specific rules for each certified voting system prescribing what constitutes a ‘clear indication on the ballot that the voter has made a definite choice.’ The rules may not:

1. Exclusively provide that the voter must properly mark or designate his or her choice on the ballot; or
2. Contain a catch-all provision that fails to identify specific standards, such as ‘any other mark or indication clearly indicating that the voter has made a definite choice.’”

Rule IS-2.027, F. A. C., entitled “Clear Indication of Voters Choice on a Ballot” provides specific standards for determining votes on optical scan ballots.
Element 1. Use of Title III Requirements Payments:  
B. Provisional Voting and Voting Information

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Section 302(a) Provisional Voting Requirements
The Help America Vote Act of 2002 (HAVA) requirements for provisional voting state that if an individual declares that he or she is a registered voter in the jurisdiction in which they are attempting to vote but their name does not appear on the official list of eligible voters, they are to be permitted to cast a provisional ballot.

**Section 302(a)(1) Do Florida’s election laws require election officials at the polling place to notify individuals that they may cast a provisional ballot?**

Yes, and no further actions are required.
Section 101.031(2), *Florida Statutes*, states that the supervisor of elections in each county shall have posted at each polling place in the county the Voter’s Bill of Rights and Responsibilities. Included in the Voter’s Bill of Rights is the right of each registered voter to cast a provisional ballot, if his or her registration is in question.

The Division of Elections’ Polling Place Procedures Manual instructs poll workers to read informational signs that appear in print on the walls of the polling place and to offer magnifying sheets for visually impaired voters.

In addition, modifications to Section 101.043(3), *Florida Statutes*, were included in Chapter 2003-415, *Laws of Florida*, which was effective January 1, 2004. This change provided that certain first-time voters would be allowed to vote a provisional ballot.

**Section 302(a)(2) Do Florida’s election laws state that any person attempting to vote whose name does not appear on the official list of eligible voters be permitted to cast a provisional ballot at the polling place upon the execution of a written affirmation by the individual that they are: (A) a registered voter in the jurisdiction in which the individual desires to vote; and (B) eligible to vote in that election?**

Yes, and no further actions are required.
Section 101.048(1), *Florida Statutes*, states that any voter claiming to be properly registered and eligible to vote, but whose eligibility cannot be determined, will be given a provisional ballot. A Provisional Ballot Voter’s Certificate and Affirmation must be completed by the individual casting a provisional ballot indicating that they are registered to vote and are a qualified voter of
the county in which they are attempting to vote, and that they have not previously voted in the election.

In addition, according to Section 101.048(2), Florida Statute, if it is determined that the person voting the provisional ballot was not registered or entitled to vote at the precinct where the person cast a vote in the election, the provisional ballot shall not be counted and the ballot shall remain in the envelope containing the Provisional Ballot Voter's Certificate and Affirmation and the envelope shall be marked "Rejected as Illegal."

Currently, in Florida, in order for provisional ballots to count they must be cast in the precinct in which the voter is registered. This means that votes for President, U.S. Senate or other statewide officials such as Governor and Attorney General, would not be counted if a voter cast a provisional ballot at a wrong precinct.

Under HAVA, Section 302 requires: If an individual states that [s/he] is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for Federal office, but the name of the individual does not appear on the official list of eligible voters for the polling place...such individual shall be permitted to cast a provisional ballot...

(2) The individual shall be permitted to cast a provisional ballot at that polling place upon the execution of a written affirmation ...stating that the individual is—

(A) a registered voter in the jurisdiction in which the individual desired to vote; and

(B) eligible to vote in that election.

HAVA does not define jurisdiction, but the National Voter Rights Act (NVRA) defines jurisdiction for federal purposes as the largest geographic area governed by a unit of government (municipality or larger) that performs all the functions of a voting registrar. The HAVA Planning Committee concludes that the provisional ballot set forth in HAVA reinforces protections that the NVRA affords voters who move within the registrar's jurisdiction without updating their registration information, the ability to vote. The HAVA Planning Committee would like to offer Florida voters this same certainty and recommends to the Florida Legislature that the meaning of the term "jurisdiction" in Florida Statutes be changed from "precinct" to "county."

Section 302(a)(3) Do Florida’s election laws require a completed provisional ballot be given to an appropriate State or local election official to determine whether the individual is eligible under State law to vote?

Yes, and no further actions are required.
Section 101.048(1), *Florida Statutes*, states that all provisional ballots are placed in a secrecy envelope and then sealed in a provisional ballot envelope. All provisional ballots shall remain sealed in their envelopes for return to the supervisor of elections.

Section 101.048(2)(a), *Florida Statutes*, states the county canvassing board shall examine each provisional ballot envelope to determine if the person voting that ballot was entitled to vote at the precinct where the person cast a vote in the election and that the person had not already cast a ballot in the election.

Section 302(a)(4) Is the provisional ballot counted if the appropriate State or local election official determines the individual is eligible under State law to vote?

Yes, and no further actions are required.

Section 101.048(2)(b)1, *Florida Statutes*, states that if it is determined that the person was registered and entitled to vote at the precinct where the person cast a ballot, the canvassing board will compare the signature on the provisional ballot envelope with the signature on the voter’s registration record and, if it matches, will count the ballot.

Section 302(a)(5)(A) Are the individuals who cast a provisional ballot given written information that states that any individual who casts a provisional ballot will be able to ascertain whether the vote was counted and, if not, the reason that the vote was not counted?

Yes, and no further actions are required.

Section 101.048(5)(6), *Florida Statutes*, provides that each person casting a provisional ballot shall be given written instructions and information on how to determine whether their vote was counted.

Section 302(a)(5)(B) Has the appropriate State or local election official established a free access system to provide this information to individuals casting provisional ballots?

Yes, and no further actions are required.

Section 101.048(5)(6), *Florida Statutes*, requires each supervisor of elections to establish a free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why.

Section 101.048, *Florida Statutes*, states:
(5) Each person casting a provisional ballot shall be given written instructions regarding the free access system established pursuant to subsection (6). The instructions shall contain information
on how to access the system and the information the voter will need to provide to obtain information on his or her particular ballot. The instructions shall also include the following statement: “If this is a primary election, you should contact the supervisor of elections’ office immediately to confirm that you are registered and can vote in the general election.”

(6) Each supervisor of elections shall establish a free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why. Information regarding provisional ballots shall be available no later than 30 days following the election. The system established must restrict information regarding an individual ballot to the person who cast the ballot.

It is recommended that each county, as a minimum, provide to voters who cast provisional ballots written notification by mail informing them of whether their ballot was counted and, if not, why it was not counted. Supervisors of elections are also strongly encouraged to develop a toll-free number or access to this information via the Internet.

Each supervisor of elections has established the free access system for their county.

**Section 302(a)(5)(B) Has the appropriate State or local official established procedures to protect the security, confidentiality and integrity of the personal information collected and stored by the free access system, restricting access to the individual who cast the ballot?**

Yes, and no further actions are required.

Section 101.048, *Florida Statutes*, requires the free access system established by the supervisors of elections to restrict access to information regarding an individual ballot to the person who cast the ballot.

**Section 302(b) Voting Information Requirements**

HAVA requirements for voting information state that the appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.

**Section 302(b)(2)(A) Is a sample version of the ballot that will be used for that election posted?**

Yes, and no further actions are required.

Section 101.20, *Florida Statutes*, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. The sample ballots shall be in the form of the official ballot as it will appear at the polling place on election day. Sample ballots shall be open to inspection by all electors in any election.
Section 302(b)(2)(B) Is information regarding the date of the election and the hours during which polling places will be open posted on election day?

Yes, and no further actions are required.
Information such as the hours of operation of polling places and the date of the election are provided on instructional cards and sample ballots. Section 101.031, Florida Statutes, requires the Department of State, or in case of municipal elections the governing body of the municipality, to print, in large type on cards, instructions for the electors to use in voting. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

Currently, all cards that are posted in polling places include the hours the polls will be opened.

Section 101.20(1), Florida Statutes, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. Sample ballots shall be open to inspection by all electors in any election, and a sufficient number of reduced-size ballots may be furnished to election officials so that one may be given to any elector desiring same.

Currently, all sample ballots posted in polling places include the date of the election.

Section 302(b)(2)(C) Are instructions on how to vote, including how to cast a vote and how to cast a provisional ballot posted on election day?

Yes, and no further actions are required.

Section 101.031, Florida Statutes, states the Department of State, or in case of municipal elections the governing body of the municipality, shall print, in large type on cards, instructions for the electors to use in voting. It shall provide not less than two cards for each voting precinct for each election and furnish such cards to each supervisor upon requisition. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

In addition, Section 101.5611, Florida Statutes, states the supervisor of elections shall provide instruction at each polling place regarding the manner of voting with the system. The supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction.
During the 2002 legislative session, Senate Bill 1350 was passed amending Section 97.026, *Florida Statutes*, and stated that all forms required to be used in chapters 97 through 106 shall be made available upon request, in alternative formats. Although this statute is not in effect during the development of this Plan, the Department produces forms in alternative formats upon request.

The Division of Elections has updated and reprinted the posters that provide instructions to voters which will be displayed at each polling place on election day. These posters have been distributed to all 67 counties. The posters have been updated to inform voters when they would need to vote a provisional ballot as well as providing instructions on how to cast a provisional ballot. A copy of each version of the poster (touch screen and optical scan) in English and Spanish is included in Appendices A-D. In Miami-Dade and Broward counties, the posters are printed in English, Spanish and Creole.

Included in the new instructions: *If you need instructions on how to use the voting equipment ask a poll worker to assist you. After you have been given instructions, the officer assisting you will leave so that you can cast your vote in secret.*

For touch screen systems: *When you are finished voting your ballot, be sure to press the VOTE or CAST BALLOT button to cast your vote.*

For optical scan systems: *When you are finished marking you ballot, take your ballot and put it into the precinct tabulator.*

*If your eligibility is questioned or you are a first-time voter who registered by mail and do not have a photo ID, you will be allowed to vote a provisional ballot. Once you have marked this paper ballot, place it in the envelope provided to you and fill out the Voter's Certificate on the back of the envelope. Your ballot will be presented to the County Canvassing Board for a determination as to whether your ballot will be counted.*

**Section 302(b)(2)(D) Are instructions for mail-in registrants and first-time voters under section 303(b) posted on election day?**

*Yes, and no further actions are required.*

Under Section 101.031(1), *Florida Statutes*, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.
The Division of Elections has updated and reprinted the posters that provide instructions to voters and are displayed at each polling place on election day. These posters have been distributed to all 67 counties. The posters have been updated to include instructions for mail-in registrants and first-time voters. A copy of each version of the poster (touch screen and optical scan) in English and Spanish is included as Appendices A-D. In Miami-Dade and Broward counties, the posters are printed in English, Spanish and Creole.

The new instructions state: *If you are a first-time voter who registered by mail and have not already provided identification to the supervisor of elections, you must provide a photo ID with signature. If you do not have the proper ID, you are allowed to vote a provisional ballot.*

**Section 302(b)(2)(E) Is general information on voting rights, including information on the right of an individual to cast a provisional ballot posted on election day?**

Yes, and no further actions are required.

Section 101.031(2), *Florida Statutes*, requires the supervisor of elections in each county to have posted at each polling place the Voter’s Bill of Rights and Responsibilities. The Voter’s Bill of Rights states that each registered voter in this State has the right to:

1. Vote and have his or her vote accurately counted.
2. Cast a vote if he or she is in line at the official closing of the polls in that county.
3. Ask for and receive assistance in voting.
4. Receive up to two replacement ballots if he or she makes a mistake prior to the ballot being cast.
5. An explanation if his or her registration is in question.
6. If his or her registration is in question, cast a provisional ballot.
7. Prove his or her identity by signing an affidavit if election officials doubt the voter's identity.
8. Written instructions to use when voting, and, upon request, oral instructions in voting from elections officers.
9. Vote free from coercion or intimidation by elections officers or any other person.
10. Vote on a voting system that is in working condition and that will allow votes to be accurately cast.

**Section 302(b)(2)(E) Is contact information posted for voters who allege their rights have been violated?**

Yes, and no further actions are required.

Under Section 101.031(1), *Florida Statutes*, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information
about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.

The Division of Elections has updated and reprinted the Voter’s Bill of Rights posters that provide voters with a list of their rights as registered voters. These posters are displayed at each polling place on election day and have been distributed to all 67 counties. The posters have been updated to provide voters with contact information if they believe their voting rights have been violated. A copy of the poster in English and Spanish is included as Appendices E and F. In Miami-Dade and Broward counties, the posters are printed in English, Spanish and Creole.

The specific instruction states: You may have other voting rights under state and federal laws. If you believe your voting rights have been violated, please contact Florida Department of State, Division of Elections, 1-877-868-3737.

In the next reprint of these posters, the Division of Elections will modify the instructions to indicate that the number to call (1-877-868-3737) is a toll-free number.

Section 302(b)(2)(F) Is information on laws regarding prohibitions on acts of fraud and misrepresentation posted?

Yes, and no further actions are required.
Section 101.5611(2), Florida Statutes, requires the supervisor of elections to have posted at each polling place a notice that reads: “A person who commits or attempts to commit any fraud in connection with voting, votes a fraudulent ballot, or votes more than once in an election can be convicted of a felony of the third degree and fined up to $5,000 and/or imprisoned for up to 5 years.”

Section 302(c) Are individuals who vote in an election as a result of a court order or any other order extending the time established for closing the polls by a State law required to cast a provisional ballot? This provisional ballot must be separated and held apart from other provisional ballots cast by those not affected by the order.

Yes, and no further actions are required.

Section 101.049, Florida Statutes, permits, under special circumstances, any person voting in an election after the regular poll-closing time pursuant to a court or other order extending the statutory polling hours to vote a provisional ballot. Once voted, the provisional ballot shall be placed in a secrecy envelope and sealed in a provisional ballot envelope. All such provisional ballots will remain sealed and transmitted to the supervisor of elections separate and apart from all other ballots. The supervisor shall ensure that late-voted provisional ballots are not commingled with other ballots.
Section 302(d) The effective date for complying with the Provisional Voting and Voting Information requirements is on and after January 1, 2004.

The Provisional Voting and Voting Information Requirements was completed as required by HAVA on January 1, 2004.
Element 1. Use of Title III Requirements Payments:

C. Voter Registration

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction
The Help America Vote Act of 2002 (HAVA) establishes minimum requirements for a single, centralized, computerized statewide voter registration list and for mail registration as a part of establishing and maintaining such a list.

The effective and efficient administration of elections depends in a major way on the completeness and accuracy of voter registration lists that can be checked quickly and reliably by election workers. Section 303(a) of HAVA establishes minimum requirements for a “single, uniform, official, centralized, interactive, computerized, statewide voter registration list which shall be the single system for storing and managing the list of registered voters throughout the state for the conduct of all federal elections.”

Because many voters register by mail instead of in person, the procedures used for mail registration are an important component of establishing and maintaining a complete and accurate statewide voter registration list. Section 303(b) of HAVA requires that a state’s mail voter registration system be administered in a “uniform and nondiscriminatory manner” and establishes minimum requirements for such a system.

Until recently, Florida’s voters have relied primarily on voter registration lists established and maintained by independent supervisors of elections in each of Florida’s 67 counties. These lists are governed by Florida law that specifies qualifications to register or vote, a registration oath, a uniform statewide voter registration application form, acceptance of applications by supervisors of elections, closing of registration books, late registration, declinations to register, special registration for electors requiring assistance, registration identification card, disposition of applications and procedures for cancellation, notices of changes of address, and operation of registration offices. See Sections 97.032 through 97.055, 97.058 through 97.105, 98.015 through 98.095, and 98.101 through 98.491, Florida Statutes.

law implemented those Federal laws in the State by providing for registration of voters by the Department of Highway Safety and Motor Vehicles, voter registration agencies, and qualifying educational institutions.

In 1997, the Florida Legislature established a “central voter file” in the Division of Elections that contained voter registration information from all counties. Section 98.097, Florida Statutes.

Following the 2000 General Election, the Florida Legislature enacted the Florida Election Reform Act of 2001 that took additional steps to require complete and accurate voter registration lists in the counties and to establish a statewide voter registration database. Sections 98.0977 through 98.0979, Florida Statutes, authorized the Department of State to “…analyze, design, develop, operate, and maintain a statewide, on-line voter registration database and associated website, to be fully operational statewide by June 1, 2002. The database shall contain voter registration information from each of the 67 supervisors of elections in this state and shall be accessible through an Internet website. The system shall provide functionality for ensuring that the database is updated on a daily basis to determine if a registered voter is ineligible to vote for any of the following reasons, including, but not limited to:

(a) The voter is deceased;

(b) The voter has been convicted of a felony and has not had his or her civil rights restored; or

(c) The voter has been adjudicated mentally incompetent and his or her mental capacity with respect to voting has not been restored.

The database shall also allow for duplicate voter registrations to be identified.”

This statewide database was established in time for use in the 2002 General Elections. Requirements for pre-clearance by the U.S. Department of Justice (DOJ) and negotiations for settlement of a lawsuit by the NAACP delayed use of parts of the database concerning eligibility of voters identified as potentially ineligible because of a felony conviction or adjudication of mental incapacity. With the receipt of DOJ clearance and settlement of the lawsuit now accomplished, the Division of Elections has begun running matches.

---

2 A “voter registration agency” is defined by Section 97.012(37), Florida Statutes, as “…any office that provides public assistance, any office that serves persons with disabilities, any center for independent living, or any public library.”
Section 303(a) Computerized Statewide Voter Registration List Requirements

Section 303(a)(1)(A)(i)-(vii) and 303(a)(2): Does Florida’s existing statewide database meet requirements for implementing and maintaining a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State and includes information specified in HAVA?

No, and further actions are required.
Florida has made great strides in recent years in establishing a centralized, computerized statewide voter registration database but that database does not meet the requirements of HAVA Section 303(a)(1)(A) for a single statewide voter registration list “...defined, maintained, and administered at the State level...[with] a unique identifier [assigned] to each legally registered voter in the State...” which serves, under HAVA Section 303(a)(1)(A)(vii), as “...the official voter registration list for the conduct of all elections for Federal office in the State.” HAVA Section 303(a)(1)(A)(i) further defines this requirement by specifying that “The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.” HAVA Section 303(a)(1)(A) also specifies that the chief State election official (in Florida the Secretary of State) shall implement and maintain the single statewide voter registration list.

Florida currently has 67 official voter registration lists, one established and maintained in each county, that are compiled into the statewide voter registration database required by the Florida Election Reform Act of 2001. The 67 county-based lists, not the statewide database, are the official voter registration lists for voters in Florida. The statewide database is intended primarily to assist supervisors of elections to determine if voters are ineligible to vote (deceased, convicted felons who have not had civil rights restored, or adjudicated as mentally incompetent). It also is intended to identify those voters who are listed more than once. It is not intended to serve as “...the single system for storing and managing the official list of registered voters throughout the State...” as required by HAVA. Information in the statewide database is made available to county supervisors of elections who are responsible for making final determinations of a voter’s eligibility and for updating voter registration records.

HAVA’s requirement for a single computerized statewide voter registration list cannot be fulfilled quickly. In addition to designing and implementing such a single system that is interactive and assigns unique identifiers to each voter, HAVA requires the system to have adequate technological security measures [HAVA Section 303(a)(3)], meet minimum standards of accuracy and currency [HAVA Section 303(a)(4)], provide for verification with other information such as driver’s license numbers and Social Security numbers [HAVA Section 303(a)(5)], and meet other standards. Meeting these requirements and standards will take time, expertise and money.
The Legislature appropriated $1.6 million and nine staff positions to create a master design, including a business plan and budget, for a single statewide voter registration system by January 2004. This design permitted the 2004 Legislature to take action to authorize the implementation of a new single computerized statewide voter registration list in time for the 2006 elections. The State of Florida was granted a waiver under HAVA to have a single statewide voter registration system in place by January 1, 2006, instead of the existing deadline of January 1, 2004. (The requirement for a waiver is discussed subsequently.)

The Division of Elections has been meeting with representatives of the Florida State Association of Supervisors of Elections, the Department of Highway Safety and Motor Vehicles, the Department of Law Enforcement, the Board of Executive Clemency, the State Technology Office and health officials to begin to find ways to coordinate databases maintained by those agencies as part of the single centralized statewide voter registration list. Because HAVA Sections 303(a)(5)(A)(i)(I) and (II) require an applicant for voter registration to provide either a current and valid driver's license number or supply the last four digits of the applicant’s Social Security number, HAVA Sections 303(a)(5)(B)(i)-(ii) require that the State enter into agreements to share such information with the Department of Highway Safety and Motor Vehicles and with the Social Security Administration.

HAVA’s requirements are minimum requirements. Florida may establish technology and administrative requirements that are stricter than the Federal requirements as long as they are not inconsistent with HAVA’s requirements and other laws, such as the Motor Voter Act, or in conflict with the privacy provisions of the Florida Constitution. See HAVA Section 304.

**Florida Voter Registration System - Proposed System Design and Requirements**

**Strategy to Develop and Implement**

The Florida Legislature has directed the Department of State to begin development of a statewide voter registration system that meets the requirements of HAVA. Accordingly, the 2003 Legislature provided $1.6 million to begin implementation of the system. Funds include $1 million for the Needs Assessment Phase along with nine positions to support design, development and implementation of the HAVA requirements. Of the nine positions, five reside in the Department of State and two each in the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement.

The Division of Elections has been tasked with the responsibility to develop specifications for design and implementation of the Florida Voter Registration System (FVRS). The Division of
Elections has allocated one of the five HAVA-funded positions for a project manager tasked with the responsibility to direct and coordinate development of a comprehensive set of functional requirements, design specifications and preparation of progress reports. The Business Owner of the FVRS is the Director of the Division of Elections and the Project Sponsor is the Florida Secretary of State. The Project Director, Project Executive and Project Administrator are all Division of Elections staff.

The project team has taken every effort to identify alternative approaches to development of the FVRS and assess the relative merits of each approach. Visits to, and interviews with, other states with centralized voter registration have provided insight into the technical, administrative and political systems necessary for successful implementation. Interviews with election officials in other states that are in more advanced stages of meeting HAVA requirements have contributed much to identify the best practices approach.

The project team has also relied heavily on input from the supervisors of elections, their staff and vendors of voter registration systems currently in use throughout the State. A committee drawn from the 67 supervisors of elections was appointed to work with the project team. Additionally, a series of technical workgroups was established to identify issues and assess alternatives in a number of specific areas including:

- maintenance of address systems;
- interfacing of local voter registration systems;
- document and contract management;
- petitions;
- polling place activities;
- security; and
- statutory and legal issues.

The table below provides a proposed project schedule.

Section 303(d) Deadlines for Computerized Statewide Voter Registration List

Section 303(d)(1)(A): Can Florida meet HAVA's requirement to have operational a computerized statewide voter registration list, as defined by HAVA, by January 1, 2004?

No, and further actions are required.
The State practically could not meet the January 1, 2004 deadline. Substantial professional and technical work must be done to design and establish a computerized statewide voter registration list that meets HAVA's standards. Chapter 2003-415, Laws of Florida, authorizes the State to seek a waiver from the Federal Election Assistance Commission permitted under HAVA Section 303(d)(1)(B) from January 1, 2004, to January 1, 2006, if the State “…will not meet the deadline...for good cause and includes in the certification the reasons for the failure to meet such deadline....”

The Florida Division of Elections has filed with the Federal Election Assistance Commission the appropriate waiver seeking an extension for the development and implementation of the Computerized Statewide Voter Registration list from January 1, 2004 to January 1, 2006. A copy of this letter is included as Appendix G.

Section 303(b) Requirements for Voters Who Register By Mail

Section 303(b)(1) through (4): Does Florida meet HAVA's identification requirements for a voter who registers by mail and has not previously voted in an election for Federal office in the State or registers by mail, has not previously voted in the jurisdiction and is in a State that does not have a computerized statewide voter list that meets HAVA's requirements?

Yes, and no further actions are required.
HAVA requires persons who register by mail and have not voted in an election for federal office to provide identification prior to voting. If the State is able to match the voter’s driver’s license number or Social Security number against an existing State record bearing the same number, name and date of birth, further identification by the voter is not required.

HAVA Sections 303(b)(2)(i) through (ii) require that a first-time voter who votes in person may be identified by a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. A voter who votes by mail may include with the ballot a copy of a current and valid photo identification or a copy of the other documents listed for the voter who appears in person. An exception is made in HAVA Section 303(b)(3) for mail registrants who provide a copy of required identification at the time of registering, mail registrants whose driver’s license number or last 4 digits of the Social Security number are matched with an existing State record, and for those who vote under the Uniformed and Overseas Citizens Absentee Voting Act, the
Voting Accessibility for the Elderly and Handicapped Act, or under some other provision of Federal law (in which case the specific standards of those acts must be met).

Chapter 2003-415, *Laws of Florida*, amends the following sections of Florida law to conform to HAVA’s mail registration and other voter registration requirements:

Section 97.052(3)(g), *Florida Statutes*, to require a statement with the uniform statewide voter registration form that informs the applicant that if the form is submitted by mail and the applicant is registering for the first time, the applicant will be required to provide identification prior to voting for the first time.

Section 97.053(5)(a), *Florida Statutes*, that permits the use of a valid Florida driver’s license number or the identification number from a Florida identification card issued under Section 322.051, *Florida Statutes*, for purposes of voter registration.

Section 97.0535, *Florida Statutes*, that specifies at length the requirements for identification that a first-time voter can use and that complies with other HAVA requirements outlined previously.

Section 101.043, *Florida Statutes*, (a transfer and renumbering of Section 98.471, *Florida Statutes*) to permit a voter to submit to a poll worker at the time of voting a current and valid picture identification with a signature.

**Section 303(b)(4): Does Florida meet HAVA’s requirement for language in the mail voter registration form under Section 6 of the National Voter Registration Act of 1993?**

Yes, and no further actions are required.

HAVA requires that mail voter registration forms under Section 6 the National Voter Registration Act shall include the following:

"(i) The question ‘Are you a citizen of the United States of America?’ and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.

(ii) The question ‘Will you be 18 years of age on or before election day?’ and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on election day.

(iii) The statement ‘If you checked ‘no’ in response to either of these questions, do not complete this form.’

(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.”
Section 97.052(2)(b) and (r), *Florida Statutes*, requires that the uniform statewide voter registration form must be designed to elicit information from the applicant about the applicant’s date of birth and whether the applicant is a citizen of the United States. The form itself, available on the Division of Elections’ website at [http://election.dos.state.fl.us](http://election.dos.state.fl.us), asks for date of birth and asks “Are you a U.S. citizen?” It does not use the specific language required by HAVA.

Chapter 2003-415, *Laws of Florida*, amends Section 97.052, *Florida Statutes*, by adding subsection (g) that requires language about the need for appropriate identification for first time mail applications. It does not require the specific HAVA language about age and citizenship.

The Division of Elections has reviewed this matter orally with Federal legislative and executive representatives and has concluded that the requirement applies only to Federal applications under Section 6 of the National Voter Registration Act. It believes that putting such language on State application forms will confuse voters and discourage first-time registrants. The age question, for instance, does not specify the exact election day to which it is referring and assumes that young voters may be applying to register for a specific election rather than pre-registering as 17 year-olds in order to vote in all elections after they reach the age of 18. The Division notes that the forms used by Florida already elicit the information required by asking for date of birth and citizenship. The forms do not discourage voters by telling them to stop with the application if they must answer “No” to either question. The Division is complying with the substance of HAVA if not with the exact form of the question.
Element 2. Local Government Payments and Activities

How the State will distribute and monitor the distribution of the requirements payments to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Introduction
The Florida Legislature has broad constitutional authority for appropriating federal and State funds annually through the appropriations bill which is eventually signed by the Governor into law. During the annual appropriations process, the Florida Legislature assesses the needs of the State and makes policy and budget decisions which impact every level of government including local government.

The funding of elections in Florida is primarily a local government responsibility since the constitutional authority for running elections rests with the local supervisor of elections. Funding authority for elections resides with the Boards of County Commissioners. Each of Florida’s 67 Boards of County Commissioners receives a budget request from the supervisor of elections and then the Board makes policy and budget decisions based upon county priorities.

There has been one major exception to this election funding scenario. Following the controversial 2000 General Election, the Governor and the citizens of Florida asked the Legislature to enact broad election reforms which included providing State financial assistance to local governments. Over a two-year period, the Legislature provided over $32 million in State funds to supplement local election budgets and to quicken the pace of election reform in Florida. Most of the State funds were appropriated to the Boards of County Commissioners using two different formulas for accomplishing distinct policy goals—to replace voting systems designated to be decertified and to enact comprehensive voter education programs in every county.

The funding formula used to upgrade voting systems had two important policy goals—to provide a minimum voting system standard of precinct-based optical scanning systems throughout Florida and to provide funding assistance to small counties with very small tax bases. The resulting formula achieved that policy goal and was as follows:
• Small Counties (population 75,000 or below) received $7,500/precinct
• Large Counties (population 75,001 and above) received $3,750/precinct

The Legislature used a different formula to provide State funds for voter education and poll worker recruitment and training. This formula was based upon taking available State funds and distributing them on a per registered voter basis per county. The resulting formula was determined by taking approximately $6,000,000 in available State funds and dividing it by the number of registered voters during the 2000 General Election and appropriating that money on a pro-rata basis to each county. The resulting appropriation provided $5,949,375 to counties to fund comprehensive voter education programs and poll worker recruitment and training programs. The combined State and local efforts led to greater voter satisfaction during the 2002 General Election.

Pursuant to the appropriation, the Florida Legislature required each county supervisor of elections to submit a detailed description of the plans to be implemented and also a detailed report on the success of the voter education effort. These reports were sent to the Division of Elections and subsequently compiled by the Division into a report sent to the Governor and Florida Legislature.

While the State funds were widely valued, the counties still provided a majority of funding for election reform efforts. According to the 2002 Governor’s Select Task Force on Election Procedures, Standards and Technology, a survey of 33 county governments revealed they spent nearly $110 million toward new voting systems before the 2002 primary and general elections.

If the Florida Legislature determines that it will provide funding for units of local governments and other entities, then how will the requirements payments be distributed and monitored, including—

A. A description of the criteria used to determine the eligibility of such units and entities for receiving payment.

B. A description of the methods to be used by Florida to monitor the performance of the units of entities to whom the payments is distributed, consistent with the performance goals and measures adopted under paragraph (8).

The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. During HAVA Planning Committee discussions, members proposed several recommendations that would provide funding for units of local government. The recommended payments to local government are listed below:
Replacement and Reimbursement for Punch Card And Lever Machines

The HAVA Planning Committee recommended that the estimated $11.74 million received pursuant to Section 102 of HAVA be distributed by the Florida Legislature to the State and to the counties on a pro-rated basis for their respective contributions to replace punch cards and lever machines during the 2001-2002 and 2002-2003 fiscal years.\(^3\)

The Florida Legislature acted in 2003 to distribute Section 102 federal funds in the amount of $11,581,377 to the State of Florida and not the counties. The $11,581,377 reimbursement is almost one-half the amount the State of Florida invested to replace outdated voting machines between 2001 and 2003.

Accessible Voting Systems for Voters with Disabilities

The HAVA Planning Committee recommended that HAVA funds should be distributed to counties during the 2004-2005 fiscal year to help them meet Section 301 Title III accessibility requirements by the January 1, 2006 deadline. The estimated amount to comply with this requirement is $11.6 million and the funds would be distributed according to the number of machines accessible for persons with disabilities needed for each county to have one per polling place. The Division of Elections would have the responsibility for determining eligibility of counties receiving HAVA funds.

Secondly, if HAVA funds are available, the HAVA Planning Committee recommends that HAVA funds be distributed as a reimbursement on a pro-rated basis to local governments that purchased accessible voting systems and components during the 2001 and 2002 fiscal years.

The 2004 Legislature provided the following in the 2004 General Appropriations Act:

From the funds in Specific Appropriation 2871I, $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place.

No supervisor of elections shall receive any funds until the county supervisor of elections certifies to the Department of State:

1) the number of precincts in the county;
2) the number of polling places in the county;
3) the number of voting machines the county has that meet the disability requirement;
4) the county’s plan for purchasing the DRE’s; and
5) the date that the county anticipates being in compliance.

\(^3\) The 2003 General Appropriations Act passed by the Legislature required the Department of State to transfer all amounts eligible for reimbursement under Section 102 of HAVA to the State’s Working Capital Fund.
Statewide Voter Education Program

For FY 2003-2004, $2,976,755 was appropriated and available to each county for voter education programs. From funds in Specific Appropriation 2871I for FY 2004-2005, $3,000,000 shall be distributed to county supervisors of elections for the following purposes relating to voter education: mailing or publishing sample ballots; conducting activities pursuant to the Standards for Nonpartisan Voter Education as provided in Rule 1S-2.033, F.A.C.; print, radio, or television advertising to voters; and other innovative voter education programs, as approved by the Department of State. No supervisor of elections shall receive any funds until the county supervisor of elections provides to the Department of State a detailed description of the voter-education programs, such as those described above, to be implemented. The HAVA Planning Committee also recommends that local governments receive $3,000,000 for comprehensive voter education efforts in FY 2005-2006.

In FY 2003-2004, distribution was based on a funding level per individual voter multiplied by the number of registered voters in each county for the 2002 General Election. To determine the funding level per individual voter, the Division of Elections divided the total amount of funds appropriated in FY 2003-2004 by the total number of registered voters in the State of Florida for the 2002 General Election.

In FY 2004-2005, the Department shall distribute an amount to each eligible supervisor of elections equal to the funding level per voter multiplied by the number of registered voters in the county for the 2004 Presidential Preference Primary. The Department shall determine the funding level per voters in the state for the 2004 Presidential Preference Primary.

In order for a county supervisor of elections to be eligible to receive state funding for voter education, the county must certify to the Division of Elections that the county will provide matching funds for voter education in the amount equal to fifteen percent of the amount to be received from the state. Additionally, to be eligible, a county must segregate state voter education distributions and required county matching dollars in a separate account established to hold only such funds. Funds in this account must be used only for the activities for which the funds were received. Any funds remaining in the fund at the end of the fiscal year shall remain in the account to be used for the same purposes for subsequent years or until such funds are expended.

Through the 2005-2006 fiscal years, the HAVA Planning Committee recommends that local governments receive a total of $9 million dollars ($3 million each fiscal year) for comprehensive voter education efforts. HAVA funds for voter education should be distributed using a similar formula as used in 2003-2004. The Division of Elections should be responsible for determining eligibility of any county for the receipt of State or federal funds used in HAVA election reform activities.
The Division of Elections will monitor the performance of the contract agreements entered into between the State and each county, in accordance with State procedures. Each county must meet the contractual requirements before payment is approved.

Standard auditing procedures for monitoring the use of federal funds will be used for the receipt and the distribution of HAVA funds. These standard procedures may include random program audits by the Department of State’s Inspector General as well as an annual audit by the Florida Auditor General’s office to ensure funds are being expended for the authorized purposes.

Payments to Other State Entities
Through the 2005-2006 fiscal years, the Division of Elections recommends that the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement receive HAVA funding to assist in the development of the new statewide voter registration system. The Division of Elections will enter into a contractual agreement with these other state-level departments and monitor the contracts in accordance with standard auditing procedures for monitoring the use of federal funds.
Element 3. Voter Education, Election Official Education & Training, Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Introduction
A wide array of national and State task force reports have highlighted the need for a more informed electorate. To achieve this goal, voters, election officials, and poll workers must receive better information and training. Florida assigns the primary responsibility for these daunting tasks to the Department of State and the county supervisors of elections. Following election 2000, the Legislature has more clearly delineated the role of each in improving the education of voters, election officials, and poll workers.

The Florida Election Reform Act of 2001 set deadlines, included a wide array of topics to be addressed by State and county election officials, granted rule making authority to the Department of State, and established a procedure for measuring the effectiveness of the programs and making recommendations to the Governor and the State Legislature. Various acts passed during the 2002 legislative session broaden the scope of voter education responsibilities, more definitively spell out voter rights, and ensure that Florida's electoral system conforms to the Americans with Disabilities Act of 1990. Each of these changes has been communicated to election officials at all levels and to the public at-large.

The Election Reform Act of 2001 required all 67 county supervisors of elections to file voter education plans with the Division of Elections in the Department of State in order to qualify for State funds. (The Act appropriated nearly $6 million for voter education in fiscal year 2001-2002 in addition to $24 million for purchase of new voting equipment, fiscal years 2001-2003.) The Department of State, as directed by the Legislature, established minimum standards for nonpartisan voter education to be met by each county.
