Subject IG Press Release

Commissioners,
Per the chair's request, I have drafted the following press release to communicate the commission's decision to ask the IG to review our contract procedures. Please let me know if this is okay with all of you. I would like this to go out ASAP, so if you could get back to me with any comments before noon, I would appreciate it. Sorry for the short turnaround, but I think circumstances demand that this get out immediately. Thank you.

After you give me the okay on the press release, I will send everything to staff before releasing it.

EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects

For Immediate Release
April 16, 2007

WASHINGTON -- U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission's inspector general to conduct a review of the commission's contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation.

The chair's memo to the inspector general is attached.

"The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter," said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

Last month, the commission voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report was not sufficient to draw any conclusions. The commission declined to adopt the report, but released all of the data to the public. The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at www.eac.gov.

At a public meeting in December 2006, the commission adopted Election Crimes: An Initial Review and Recommendations for Further Study, available at www.eac.gov. This report was the culmination of research conducted by Tiya Wang and Joel Serebrov, who were tasked with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the consultants were responsible for "creating a report summarizing the findings of this preliminary research effort and working group deliberations. This report should include any recommendations for future EAC research resulting from this effort."

EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

###
Sorry bout that... is this sentence acceptable to everyone? It's the last sentence in the fifth paragraph. Revised press release is attached.

"EAC staff reviewed the consultants' material, and found inconsistencies in their conclusions and the data they submitted. The material in the final report was motivated by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions."

I was referring to the fraud study and why we did not release the contractor's report

EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects

For Immediate Release
April 16, 2007

WASHINGTON – U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission’s inspector general to conduct a review of the commission’s contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair’s memo to the inspector general is attached.

“The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter,” said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

Last month, the commission voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received was not sufficient to draw any conclusions. The commission declined to adopt the report, but released all of the data to the public. The report and the research, conducted by Rutgers, the State University of New Jersey through its Eagleton Institute of Politics, are available at www.eac.gov.

At a public meeting in December 2006, the commission adopted Election Crimes: An Initial Review and Recommendations for Further Study, available at www.eac.gov. This report was the culmination of research conducted by Yaya Wang and Job Serebrov, who were tasked with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the consultants were responsible for “creating a report summarizing the findings of this preliminary research effort and working group deliberations. This report should include any recommendations for future EAC research resulting from this effort.” EAC staff reviewed the consultants’ material, and found inconsistencies in their conclusions and the data they submitted. The material in the final report was motivated by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions.

EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

---
Hello everyone,

I wanted to notify you that Chair Davidson, in agreement with the other three commissioners, has requested that our IG -- Curtis Crider -- conduct a review of our contracting procedures surrounding the voter identification and vote fraud and voter intimidation research projects. Very shortly, I will distribute her request along with a press release to the media and to all our stakeholders. However, she wanted to make sure the staff was fully informed about this action before we make this news public.

The chair’s request, the press release and all of the materials referenced in her request will be available on the home page under Announcements very shortly. Please direct anyone with questions about this action to the website. And let me know if you have questions about any of this information or if I can be of assistance answering questions from the public about this issue.

The chair wants to convey to everyone how much she appreciates your hard work, and that she is confident in our ability to work with Curtis to resolve this issue. Tom would like staff to join him at 3:30 today in the large conf. room upstairs to answer any questions you have.

MEMORANDUM

To: EAC Inspector General Curtis Crider
Fr: EAC Chair Donetta Davidson
Cc: Commissioners Rodriguez, Hillman and Hunter, Tom Wilkey, and Julie Hodgkins
RE: EAC requests review of contracting procedures

On Friday, April 13, each of my three colleagues -- Rosemary Rodriguez, Gracia Hillman, and Caroline Hunter -- agreed with my recommendation that we issue the following formal request to the Commission's Office of Inspector General to review the circumstances surrounding two recent EAC research projects -- vote fraud and voter intimidation and voter identification.

Background
The U.S. Election Assistance Commission (EAC) is an independent, bipartisan Commission created by the Help America Vote Act (HAVA) of 2002.

EAC develops guidance to meet HAVA requirements, adopts voluntary voting system guidelines, accredits voting system test laboratories, certifies voting systems and audits the use of HAVA funds. HAVA also directs EAC to maintain the national mail voter registration form developed in accordance with the National Voter Registration Act (NVRA) of 1993.

The Commission serves as a national clearinghouse and resource of information regarding election administration. It is under the Commission's clearinghouse role that research projects are conducted with the goal of providing information that will lead to improvements in election administration, as well as inform the public about how, where and when we vote.

The voter identification research was conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics ("Contractor"). The contract, awarded in May 2005, required the Contractor to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches. Last month, the commission voted
unanimously not to adopt the report, citing concerns with its methodology, but voted to release all of the data provided by the Contractor.

The vote fraud and voter intimidation research was conducted by Tova Wang and Job Serebrov ("Consultants"). The contracts, awarded in September 2005, issued to these Consultants tasked them with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the Consultants were responsible for "creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort."

Review Request
The actions taken by the Commission regarding both the voter identification and the vote fraud and voter intimidation research projects have been challenged. Specifically, Members of Congress, the media, and the public have suggested that political motivations may have been part of the Commission's decision making process regarding these two projects. Also, the Commission has been criticized for the amount of taxpayer dollars that were spent on these two projects, as well as how efficiently these projects were managed.

The Commission takes these allegations very seriously, and we request that you fully review the following issues and provide the Commission and the Congress with a report of your findings as soon as possible. The Commission stands ready to assist you in these efforts and will provide whatever information, including memos, emails and other documents you will need. Cooperating with your review will be the staff's top priority.

1. Current Commission policy regarding awarding and managing research contracts.
2. Issuance and management of the vote fraud and voter intimidation contract.
3. Circumstances surrounding the receipt of information from Consultants regarding the vote fraud and voter intimidation project.
4. Circumstances surrounding staff efforts to write a final report for Commission consideration.
5. Identification of staff members who assisted in the editing and collaboration of the final vote fraud and voter intimidation report for Commission consideration.
6. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the vote fraud and voter intimidation project.
8. Issuance and management of the voter identification contract.
9. Circumstances surrounding the receipt of information from Contractor regarding the voter identification report.
10. Identification of staff members who assisted in the editing, collaboration, and recommendation to the Commission regarding final adoption of the voter identification report.
11. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the voter identification project.
12. Circumstances surrounding Commission deliberation whether to adopt a final voter identification report.

For your information, I have attached statements and related correspondence from Members of Congress, and a statement issued by the Commission regarding the criticism.

It is our hope that your findings will instruct us how to move forward in a more efficient, effective and transparent manner. The Commission takes its mandates under HAVA very seriously, and this small Commission has an enormous amount of work to conduct, including testing and certifying voting equipment, providing guidance and assistance to election officials, and auditing the proper use of the $3.1 billion that was distributed under HAVA.

We look forward to your findings so that we may take the actions necessary to improve the way we conceive research projects, manage research contracts, and make decisions regarding the final release of data provided to the Commission from a third party.
April 12, 2007

The Honorable Donetta Davidson
Chairman
U.S. Election Assistance Commission
1225 New York Avenue, N.W.
Suite 1100
Washington, DC 20005

Dear Commissioner Davidson:

We are writing to seek a response to very troubling news reports that included allegations that the Commission may have altered or delayed release of two taxpayer-funded studies of election issues for political purposes.

While the Commission is within its rights to decide what guidance it issues to election officials, it is critical that its actions are not perceived as politically motivated and it is imperative that you provide full documentation about the Commission’s proceedings on these matters.

On Wednesday, the New York Times reported that a bipartisan team of election law experts hired by the Commission to research voter fraud in federal elections found that there was little such fraud around the nation, but the Commission revised the report to say that the pervasiveness of voter fraud was still open to debate.

On Monday, Roll Call reported that the Commission two weeks ago rejected the findings of a report, prepared as part of a $560,000 contract with Rutgers University’s Eagleton Institute and Ohio State University’s Moritz College of Law. That report found that voter identification laws may reduce election turnout, especially by minorities.
April 12, 2007

It is imperative that the Commission's actions and deliberations are unbiased, free from political influence and transparent. While the Commission does not have to agree with the experts who perform its research, it should make the research available unfettered and unfiltered.

Attached are a series of questions, we would like the Commission to address. We look forward to your timely response.

Sincerely,

[Signatures]

Richard J. Durbin
Chairman
Committee on Rules and Administration

Richard J. Durbin
Chairman
Subcommittee on Financial Services and General Government
Committee on Appropriations
We request information and documentation from the Commission that answer the following questions:

COMMISSION'S OVERSIGHT ON EAGLETON CONTRACT TO PERFORM A STUDY ON VOTER IDENTIFICATION

1. Did the Commissioners or Commission senior staff receive any outside communication or pressure to change or not release the entire draft report or portions of the draft language on the voter fraud report? If so, who made those requests?
2. Would you please provide a copy of the approved Request For Proposals, as well as any contract modifications that were agreed to between the Commission and Eagleton Institute and subcontractors?
3. Can you provide the names and qualifications of Election Assistance Commission staff that worked on the Eagleton Institute project?
4. Please indicate how many project meetings occurred during the term of the Eagleton contract, including in-person meetings, conference calls regarding the status of the report, and any meeting where Commissioners were present for at least part of the meeting. Please provide copies of any minutes from those meetings.
5. Please identify the names and affiliations of members of the Peer Review group or groups that examined the Eagleton Institute drafts. Please also indicate the dates upon which any such review of the Eagleton research was conducted, and the specific concerns or complaints that were raised by members of the Peer Review group as to either the analysis or statistical methodology, if any. Please provide copies of any minutes from those meetings.
6. If certain members of the Peer Review groups had concerns with the data or methodology of the Eagleton study, was that information communicated to Eagleton, and were any changes made to the study based on Peer Review group concerns with methodology or data?
7. Who were the individuals (and what were their academic qualifications) that advised the Commission that the data, methodology, or the results of the Eagleton Contract were so flawed that the Commission should reject the report? At what point did the Commission receive input from those individuals?
8. The Commission previewed its research on the Eagleton Institute's study on Provisional Voting at its May 2006 Advisory Board meetings—why was the Voter Identification Draft Study not discussed at that time? What is the status of the Provisional Voting report?

9. In rejecting the Eagleton report, the Commission indicated concerns that there was only one year’s worth of data. Given that this was the first year that Commission had studied the results, isn’t “one year” what was originally contemplated in the Eagleton contract? Isn’t the reason for having a major research institute conduct this study is so they can draw initial assessments from that data—even though that data can be augmented in future years? Because of the rejected report, will the Commission start anew for research in the 2008 elections?

10. What was the final, total cost of the Eagleton contract, and what was produced or released by that Commission as a result of that contract?

COMMISSION'S OVERSIGHT OVER VOTER FRAUD/INTIMIDATION STUDY

1. Did the Commissioners or Commission senior staff receive any outside communication or pressure to change or not release the entire draft report or portions of the draft language on the voter fraud report? If so, who made those requests?

2. Given the bipartisan nature of the Working Group that guided the Voter Fraud/Intimidation report, and the bipartisan nature of the contracted experts who uniformly support the results of this report, what concerns lead the Commission to determine the report should not be released?

3. If there were points in the report that the Commission objected to, were there attempts to work with the contractors to deal with specific concerns? If there were such attempts, please describe them.
4. Who drafted the Commission summary (released in December, 2006) of the Voter Fraud/Intimidation report, and what were their credentials and involvement in the original research process? Were there instructions or guidance given from Commissioners or senior staff as to what portions of the research should be emphasized? Who at the Commission reviewed the summarized report? Since the contracted experts are referred to in the Commission’s released report, were the contractors allowed a chance to review or edit that Commission’s final report that was released in December, 2006?

5. Please provide copies of any electronic or written communications between Commission employees that relate to the editing of the Voter Fraud/Intimidation report.

6. Please explain what Mr. Job Serebrov was referring to in his email referenced in the New York Times article of April 11, 2007. Please provide any documents in the Commission’s possession where employees or contracted experts discussed pressure, political sensitivities, or the failure of the Commission to adopt the Voter Fraud/Intimidation report from March 1, 2006 to present.

7. While we realize that the Commission voted to release its summary report in December 2006, was there a public vote taken to reject the Draft Voter Fraud/Intimidation report? Such a monumental decision to reject the contract experts’ work is a policy decision, and one that should be done in public. When was the decision made to reject the original report, and what notice was provided to the public that the Commission would reject that report?

8. Prior to the Draft Voter Fraud/Intimidation report’s release, had other organizations requested a copy of that original report? Please include copies of your responses to those organizations, if any.

9. Had any States requested that the Commission or staff provide guidance related to voter identification requirements in the Help America Vote Act, or identification requirements generally? Please provide those requests, and any responses from the Commission.

10. Please indicate what steps the Commission is taking to ensure that political considerations do not impact the agency’s research and that decisions are handled in a public and transparent manner.
April 12, 2007

Chairwoman Donetta Davidson
United States Election Assistance Commission
1225 New York Avenue N.W., Suite 1100
Washington, DC 20005

Dear Chairwoman Davidson:

As Chairwoman of the Committee on House Administration Subcommittee on Elections, which has oversight over the Election Assistance Commission, I was alarmed at what appears to be an emerging pattern by the EAC to hold off on publicly releasing reports as well as modifying reports that are released. Two recent instances have brought to light the increased politicalization of the EAC and this lack of transparency.

First, the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released. The EAC released report "Election Crimes: An Initial Review and Recommendations for Future Study" does not accurately reflect the research in the original report "Voting Fraud and Voter Intimidation."

Second, in addition to this report on voter fraud and intimidation, the EAC recently released a report by The Eagleton Institute of Politics at Rutgers University on voter identification. Again, the EAC did not endorse the report, citing methodological concerns, and only released it after pressure from Congress.

The EAC is charged with conducting nonpartisan research and to advise policy makers. How are we to rely on advice if instead of full and accurate reporting, we are provided an inaccurate modified version which negates clear evidence to the contrary in the original research? I am outraged that the election process is being threatened by a lack of transparency and limited discussion.

In order to preempt any further problems with the release of reports from the EAC, I request all versions of the Absentee Ballot report and the Military and Overseas report, as well as any other overdue reports, including supporting documents and research, be provided to my office by close of business Monday, April 16, 2007. These reports are overdue and I want to ensure that the delay is no way related to what appears to be an ongoing problem of politicization of the EAC.

Sincerely,

Zoe Lofgren
Member of Congress
For Immediate Release

April 11, 2007

Hinchey, Serrano Urge Non-Partisanship, Greater Transparency at Election Assistance Commission

Washington, DC - Today, Congressmen Maurice Hinchey (NY-22) and José E. Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

"The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner," said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during a subcommittee hearing last month. "The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it is has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just some of them. The EAC must never limit discussion and debate."

"The EAC is charged with helping to ensure our elections are trustworthy and administered fairly," said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget. "I'm concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information is an analysis that undermines the notion that voter fraud is rampant.

"I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people's faith in it, is far more important than any short-term political advantage."

The draft report was written by outside experts under contract with the EAC. The final report was entitled "Election Crimes: An Initial Review and Recommendations for Future Study" and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.
FOR IMMEDIATE RELEASE:
Apr 11, 2007

PRESS RELEASE

SERRANO, HINCHEY URGE NON-PARTISANSHIP, GREATER TRANSPARENCY AT ELECTION ASSISTANCE COMMISSION

Washington, DC – April 11, 2007 – Today, Congressmen Maurice Hinchey (NY-22) and José E. Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

"The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner," said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during a subcommittee hearing last month. "The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just some of them. The EAC must never limit discussion and debate."

"The EAC is charged with helping to ensure our elections are trustworthy and administered fairly," said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget. "I'm concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information is an analysis that undermines the notion that voter fraud is rampant.

"I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people's faith in it, is far more important than any short-term political advantage."

4/13/2007
The draft report was written by outside experts under contract with the EAC. The final report was entitled "Election Crimes: An Initial Review and Recommendations for Future Study" and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.

Email: jserrano@mail.house.gov
WASHINGTON – The Help America Vote Act of 2002 (HAVA) directs the Election Assistance Commission (EAC) to serve as a national clearinghouse and resource by, among other things, conducting studies with the goal of improving the administration of federal elections. To fulfill this mandate, the EAC has entered into contracts with a variety of persons and entities. Reports adopted by the EAC, a bipartisan federal entity, are likely to be cited as authoritative in public discourse. Prior to the EAC's adopting a report submitted by a contractor, the EAC has the responsibility to ensure its accuracy and to verify that conclusions are supported by the underlying research.

The Commission takes input and constructive criticism from Congress and the public very seriously. We will take a hard look at the way we do business. Specifically, we will examine both the manner in which we have awarded contracts and our decision-making process regarding the release of research and reports. The EAC takes its mandates very seriously, and we will continue to move forward in a bipartisan way to improve the way America votes.

EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

###
1. I spoke with St. Louis editorial board members Christine Bertelson and Kevin Korrigan regarding an editorial that ran today, asserting that we'd worked on the vote fraud/voter intimidation study for five years, and that the administration/White House edited the report. I told them both of these assertions were false, and I requested a correction. I gave them the details about how this project was conceived and managed. I explained that the vote fraud and voter intimidation project began in Sept. 2004. As I said, the statement that this project had been five years in the making is incorrect -- that predates the creation of the EAC. Commissioners were appointed in Dec. 2003, and the agency's first year of operations was 2004 with a $1.2 million operating budget. I said the assertion that the administration edited the document was false, and said that at no point in the process did the administration play any role. I also pointed out that the chair requested the IG to fully review the matter. They are going to run a correction. The editorial follows.

Snipe hunting in Jeff City

Tuesday, Apr. 17 2007

The Missouri Legislature's dogged efforts to crack down on voter fraud call to mind the hallowed tradition of the snipe hunt.

In a snipe hunt, gullible kids are taken out to the woods, handed sticks and gunny sacks and told to track down the elusive snipe. Meanwhile, their pals, who know a snipe is a bird of marsh and shore generally found nowhere near the woods, yuck it up.

Voter fraud is about as rare as snipe in most parts of the country, including Missouri. As evidence of that we have the testimony of (a) a five-year study by the federal Election Assistance Commission; (b) a report from the Missouri Secretary of State showing nobody in the state tried to vote with a fake I.D. in 2006; (c) Department of Justice statistics showing only 86 people were convicted of voter fraud-related crimes in the last five years, many of them on trivial errors; and (d) a federal judge's ruling last week that the justice department had failed to demonstrate that voter fraud had occurred in Missouri last year.

Undaunted by these facts, Republicans in the Legislature lurk about like Elmer Fudd with their gunny sacks and sticks, promoting bills to require voters to present photo identification before they're allowed to cast a ballot. They passed such a bill last year, but the courts threw it out as unfair to those who couldn't afford the cost and hassle involved in getting a photo I.D. card.
This year's versions of the photo I.D. bills would allow voters without photo I.D. to cast "provisional ballots," which may or may not get counted. So, despite the fact that a photo I.D. requirement would disenfranchise many voters in the cause of solving a problem that doesn't exist, the Missouri House could pass such a bill this week.

Evidence continues to mount that the hunt master for the national voter I.D. snipe hunt is none other than Karl Rove, President George W. Bush's deputy chief of staff and political guru. As The New York Times suggested Sunday, "The more we learn about the White House purge of United States attorneys, the more a single thread runs through it: the Bush administration's campaign to transform the minor problem of voter fraud into a supposed national scourge."

Not only did the administration suggest that some of the eight fired prosecutors had been insufficiently aggressive in pursuing voter fraud cases, it changed the wording of the Election Assistance Commission's findings on the voter fraud issue. What originally read, "there is widespread but not unanimous agreement that there is little polling place fraud" became "there is a great deal of debate on the pervasiveness of fraud."

Moreover, the release of the commission's report was delayed for nine months, during which period eight states, including Missouri, dealt with voter I.D. laws. Since the 3 percent to 4 percent of the electorate who don't have photo I.D.s tend to be poor, disabled or elderly voters, suppressing their vote would tend to help Republican candidates.

Investigators looking for evidence of fraud need look no further than the e-mail messages emanating from Mr. Rove's offices. Alas, thousands, perhaps millions, of those messages are now "missing." Perhaps Attorney General Alberto Gonzales will shed some light on the problem when his testimony before the Senate Judiciary Committee is rescheduled. In the meantime, Missouri lawmakers should put down the sticks and gunny sacks and back slowly out of the woods before their constituents realize they've been snookered, too.

To complete our evaluation of the contracting process and related issues for the voter fraud research and voter intimidation and voter identification research projects, we will need copies of all e-mails and a number of documents related to the projects including copies of all of the various drafts (versions) of the reports. I am requesting that all EAC personnel be notified that they are to preserve all of the documents including e-mails related to the projects. We are in the process of setting up an e-mail account to receive the documents. It is imperative that all documents related to the projects be preserved. As soon as the account is set up we will notify you of the address.

In addition, we are requesting access to the backup e-mail files maintained by GSA and EAC. As a result, we are requesting that no backup tapes or files be destroyed.

Hello Curtis:

I was reviewing the memo that you brought to the Chair today regarding the research on Voting Fraud and Voter Intimidation. I have sent electronic and hard copies to the commissioners and senior staff. However, I was wondering if there is going to be a separate memo addressing the Voter ID issues. Per your request the staff is in the process of sending emails to your designated inbox and all of those issues. Please advise.

Many thanks,

Elle

Hello everyone,

The chair wanted to distribute the attached memo from the IG, which contains guidance about how we proceed during the review of the voter ID and the vote fraud and voter intimidation research projects. She will continue to keep staff informed as this review moves forward, and she thanks everyone for their continued cooperation and hard work.

Memorandum

To: Donetta Davidson  
Chair, U.S. Elections Commission

From: Curtis Crider  
Inspector General

In your letter of April 23, 2007, you requested my comments concerning several activities that the Election Assistance Commission (EAC) was considering to undertake pending our review of the Voting Fraud and Voter Intimidation Study and on related questions. My responses to your proposed activities and questions follow:

1. The EAC would like to prepare a summary of the differences between the draft report prepared by the consultants and the final report adopted by the EAC.

   Answer: We believe that such a summary will be helpful to our investigation. Please provide us with a copy of the summary of differences upon it is completion.

2. Would there be any prohibition against the Director of Communications speaking with EAC employees, consultants or working group members when questions arise from members of the press or under the Freedom of Information Act?

   Answer: We are not aware of any prohibition. However, we suggest that EAC not comment or limit its comments on this matter because of the ongoing investigation. Any FOIA requests should be promptly responded to stating that the matter is under investigation. Once the investigation is completed, appropriate information should be made available to the FOIA requester.

3. Would there be any prohibition against EAC briefing members of the EAC Standards Board and the EAC Board of Advisors.

   Answer: We are not aware of any prohibition. Our preference, however, would be that EAC allow the investigation to be completed before conducting any briefings.

4. Would there be any prohibition against gathering information related to this project in order to respond to inquiries that have been made by members of Congress?
Answer: We are not aware of any prohibition. As previously stated, our preference is that there are no public comments while the investigation is in process or that comments be limited. However, we appreciate the sensitivity of Congressional requests, EAC must decide how best to proceed in this matter. We ask that you share any proposed responses with us prior to their release and that you provide us with a copy of final responses and any attachments.

5. Would there be any prohibition against responding to an inquiry that the Commission has received from an attorney engaged by one of the consultants?

Answer: It is the EAC’s decision whether to respond to the attorney for the consultant. We prefer that the consultants not be released from the confidentiality clause of their contracts until the OIG has completed its investigations.

We understand that EAC will want to respond to criticism of its handling of the Voter Fraud and Intimidation Study, and that management must ultimately decide how best to proceed. Our preference would be that you attempt to defer commenting until we have finished our investigation.

I appreciate you raising these matters to me before acting. Please feel free to contact me if you have any questions about this memorandum.
Good Morning,

The tally vote dated 4/30/07, Authority to Proceed with Side by Side Analysis of Draft Voter Fraud and Intimidation Report with EAC Election Crimes Report and Agreement to Release Draft with the Completed Side by Side Analysis, is withdrawn.

Thank You

Commissioners:

Today we had the following media inquiries:

(1) Leslie Robinson, a reporter for the news blog, ColoradoConfidential.com inquired about the rules and regulations that EAC board members must adhere to. She said that one of the EAC members from Colorado, Dan Kopelman, has recently been cited by the Secretary of State for his business of selling voter lists and consulting partisan candidates. She asked if these infractions cause Kopelman to withdraw from the EAC board. We explained that, according to SEC. 213 of the Help America Vote Act of 2002 (HAVA), there are two EAC Standards Board representatives from each state, that one is a local official, one is a state official and that both individuals represent their state on the Board. We said that the state representatives are selected by the Chief State election official from each state. We said that, with respect to Colorado, Mr. Kopelman was selected to serve on the Board by Colorado Secretary of State Michael Coffman. We suggested Ms. Robinson contact their office for questions regarding the appointment of state representatives from Colorado.

(2) Rose Marie Berger, Associate Editor of Sojourners/Call to Renewal, asked for the document on voter fraud authored by Tova Wang and Job Serebrov. We replied that our Inspector General is currently reviewing the circumstances surrounding this research and noted page two of the following memo from the chair. We said that when that process is complete we’ll be glad to discuss it further.

####

04/16/07 - EAC Requests Review of Voter ID, Vote Fraud & Voter Intimidation Research Projects

####
Commissioners:

Today we had the following media inquiries:

(1) Meg Cox, a freelance journalist in Chicago is working on an article about voter fraud and voter ID laws. She asked the following two questions:

1) Is the EAC still sending its "Elections Crimes" report to journalists who request the report on voter fraud and intimidation authored by Wang and Serebrov?
2) If the answer to #1 is yes, is the EAC still sending the "Election Crimes" report in these cases without comment—i.e., without indicating that it is not the Wang/Serebrov report?

We forwarded her questions to Curtis and replied to Ms. Cox that the chair has asked our Inspector General to review the circumstances surrounding this research project, as well as research done about voter ID. We said he has requested that EAC not comment on either one of these projects while his review is ongoing. We referred her to the following link: here, and said we'd be glad to make sure she receives the IG's review when it is completed.

(2) Jenna Portnoy of the Doylestown Intelligencer in Bucks Co., PA called again to ask about EAC's progress in determining the status of Pennsylvania's 102 funds. She wants to know the amount of money, if any, that they will have to return. We said that EAC is still reviewing the certifications submitted by the states and we hope to have this process completed as soon as possible. We said we are also evaluating all the reports submitted by the states regarding their 101 and 251 funds expenditures.
Commissioners:

Today Meg Cox, a freelance journalist in Chicago, sent us the same two questions she sent us last Friday (see below). She had not been satisfied with our response. She is working on an article about voter fraud and voter ID laws. She said she is concerned that journalists are receiving a substitute report from EAC and not the real thing. We replied that we directed her to the one and only report adopted by EAC -- Election Crimes: An Initial Review and Recommendations for Future Study -- We noted that it contains clear language about the role of the consultants, identifies them by name and that their bios are included in the EAC report as Appendix D here. We said we would notify her when the IG has completed his review of this subject. We also noted the following contents of the report:

- Page one: "EAC staff along with two, bipartisan consultants reviewed the existing information available about voting fraud and voter intimidation, including reading articles, books and reports; interviewing subject matter experts; reviewing media reports of fraud and intimidation; and studying reported cases of prosecutions of these types of crimes.

- Page three: To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang, who worked with EAC staff and interns to conduct the research that forms the basis of this report.

- Page four: The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

###

BACKGROUND: Last Friday's Q&A.

Meg Cox, a freelance journalist in Chicago is working on an article about voter fraud and voter ID laws. She asked the following two questions:

1) Is the EAC still sending its "Elections Crimes" report to journalists who request the report on voter fraud and intimidation authored by Wang and Serebrov?
2) If the answer to #1 is yes, is the EAC still sending the "Election Crimes" report in these cases without comment—in other words, without indicating that it is not the Wang/Serebrov report?

We forwarded her questions to Curtis and replied to Ms. Cox that the chair has asked our Inspector General to review the circumstances surrounding this research project, as well as research done about voter ID. We said he has requested that EAC not comment on either one of these projects while his review is ongoing. We referred her to the following link: here, and said we'd be glad to make sure she receives the IG's review when it is completed.
Guess Wendy changed her mind about giving me until the end of the week...

Subject: Letter Regarding Brennan Center's FOIA Request

Dear Ms. Layson:

My firm is representing the Brennan Center in connection with the FOIA requests it has made to the EAC. Attached, for your convenience, is a letter we have sent to you today by regular mail.

Sincerely,

Rowan Wilson

This e-mail is confidential and may be privileged. Use or disclosure of it by anyone other than a designated addressee is unauthorized. If you are not an intended recipient, please delete this e-mail from the computer on which you received it.
Yes, we have talked about setting up a FOIA reading room like some other agencies. Those cull the most frequently asked for info, but don’t post everything. It’s just a function of getting caught up to do that. However, I'm open to posting everything.

If we announced it, maybe we could stem the flow. We should discuss. And I do appreciate how stressful things are for you right now. My Mayor used to say that press was the hardest job in the ofc. He was under siege his first term (he served 3) and it feels for me a little like deja vu all over again because he was very misunderstood

Best.

Commissioners;
Based on our conversation yesterday concerning the letter from the Attorney representing
the Brennan Center Gavin has drafted the attached letter as our response.
Since this letter will also be copied to several members of Congress I thought it best to have you look it
over before it goes out.
Please let me know if you have any concerns, I'd like to get it out COB today.
And if I don't see you today...Have a great Mother's Day
Tom
Looks good to me, thanks Tom and Gavin.

Commissioners;
Based on our conversation yesterday concerning the letter from the letter from the Attorney representing the Brennan Center Gavin has drafted the attached letter as our response. Since this letter will also be copied to several members of Congress I thought it best to have you look it over before it goes out. Please let me know if you have any concerns, I'd like to get it out COB today. And if I don't see you today...Have a great Mother's Day

Tom

Tom,

For your review and policy determination.
Got it....thanks
Gavin advises me that we are required to have a FOIA reading room and so we will do that but may not want to admit that we haven't up to now.
Thanks
Tom
It's already been set up on the redesigned website which Jeannie hopes to unveil next week when we get out from under this paper.
The FOIA regulations have been on the Counsel's "to do" list but with everything else going on has not been completed.
We have two law clerks coming on for the summer in a couple weeks and this will be an excellent project for them to do.
Thanks
Tom

You are supposed to be relaxing

We'd better get it up before we get dinged for not having it up!

EAC Board of Advisors
EAC Standards Board

RE: EAC Election Crimes Study

Dear Members of the EAC Standards Board and EAC Board of Advisors:

The U.S. Election Assistance Commission has recently come under fire for not releasing a draft report from EAC's Voting Fraud and Voter Intimidation project, which was submitted by two contracted employees, Tova Wang and Job Serebrov. That draft report, which is attached to this letter, is a compilation of summaries from the work that they conducted. We thought it was important to explain the circumstances surrounding this project.

In 2005, the EAC Board of Advisors helped EAC prioritize its research efforts. As a result, EAC developed a research agenda that included studying voting fraud and voter intimidation. In the fall of 2005, EAC hired the two contract employees to conduct an initial review of the information available about voting fraud and voter intimidation. The employees were asked to provide two things: (1) a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; and (2) a series of recommendations on how such a future, comprehensive study could be conducted.

In May 2006, a status report regarding this study was presented at the public meetings of the EAC Standards Board and EAC Board of Advisors. Each board provided feedback on the progress of the study and the direction that it should take. Following those meetings, the project's working group convened and likewise provided feedback on the study. In July 2006, EAC received a body of research including summaries of the articles, books, interviews, and media reports that were compiled and reviewed by the contract employees. In addition, they provided a draft report of the summaries of the interviews for EAC's review and consideration.

EAC staff reviewed the material, briefed the commissioners, including at our October public meeting and presented for commissioner consideration a report, Election Crimes: An Initial Review and Recommendations for Future Study, which was adopted at our December 2006 public meeting.

After the release of EAC's report there was some debate about whether EAC should release the draft provided by our contracted employees. The Board of Advisors considered, but did not pass, a resolution urging the release of that document. Recently, EAC testified before a Congressional committee that requested the draft report. A copy was provided to the committee, which released the draft report this week.

Recently, there has been much discussion surrounding EAC's review process of the material provided by the contract employees, and how much was included in our election crimes report. After receiving the information from the consultants, EAC conducted due diligence. As you will see in the consultants' draft,
they reached conclusions in their summaries that were based almost entirely on the interviews they conducted with 24 people, not on the entire body of work they collected. EAC found the individual accounts were informative and they helped define what issues we should examine in moving forward.

We understand that the topics of voter fraud and voter intimidation are hotly debated and often divisive. We assure you that the process we took to review all of the materials and adopt a final report was not motivated by partisan politics, but by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions.

To avoid even the appearance of partisan influence in future research endeavors, EAC has established a bipartisan commission panel to oversee all research. We are currently reviewing our contracting policy and internal procedures to make certain that EAC and its consultants are clear on the products to be delivered. We will also expedite the process in which we complete these projects.

We have always taken input from our advisory boards, Congress, and the public very seriously, and we will continue to provide you with accurate, complete, and supported research, whether that research is conducted by consultants or by EAC staff.

Thank you for your service, your commitment to the election process and your support of EAC.

Also attached is a copy of EAC’s statement on this issue, as well as a statement issued by Congressmen Maurice Hinchey and José Serrano. If you have any questions regarding this study or on any other matter, please don’t hesitate to contact us.

Sincerely,

Donetta Davidson, Chair

EAC Board of Advisors
EAC Standards Board

RE: EAC Election Crimes Study

Dear Members of the EAC Standards Board and EAC Board of Advisors:

The U.S. Election Assistance Commission has recently come under fire for not releasing a draft report from EAC’s Voting Fraud and Voter Intimidation project, which was submitted by two contracted research consultants, Tova Wang and Job Serebrov. That draft report, which is attached to this letter, is a compilation of summaries from the work that they conducted. We thought it was important to explain the circumstances surrounding this project.

In 2005, the EAC Board of Advisors helped EAC prioritize its research efforts. As a result, EAC developed a research agenda that included studying voting fraud and voter intimidation. In the fall of 2005, EAC hired the two contract employees to conduct an initial review of the information available about voting fraud and voter intimidation. The employees were asked to provide two things: (1) a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; and (2) a series of recommendations on how such a future, comprehensive study could be conducted.

In May 2006, a status report regarding this study was presented at the public meetings of the EAC Standards Board and EAC Board of Advisors. Each board provided feedback on the progress of the study and the direction that it should take. Following those meetings, the project’s working group convened and...
likewise provided feedback on the study. In July 2006, EAC received a body of research including summaries of the articles, books, interviews, and media reports that were compiled and reviewed by the contract employees. In addition, they provided a draft report of the summaries of the interviews for EAC's review and consideration.

EAC staff reviewed the material, briefed the commissioners, including at our October public meeting and presented for commissioner consideration a report, *Election Crimes: An Initial Review and Recommendations for Future Study*, which was adopted at our December 2006 public meeting.

After the release of EAC's report there was some debate about whether EAC should release the draft provided by our contracted employees. A member of the Board of Advisors, Ms. Barbara Arnwine, went so far as to propose a resolution recommending that the EAC release the original "Voter Fraud and Intimidation Report" to the public, or, alternatively, to the Board of Advisors. The Board of Advisors rejected the resolution, persuaded by argument that the EAC should have complete control of the use of its commissioned research. This is an issue that the EAC, in light of recent events, must necessarily resolve with input from its Congressional Committees of Reference, and the Board of Advisors.

On March __, 2007, EAC testified before a Congressional committee that requested the draft report. A copy was provided to the committee, which released the draft report this week. The release of the draft report by members of Congress has made it widely available. Thus we attach it to this letter. We value your service on the Board of Advisors and believe that you should receive the draft directly from the EAC, and not a secondary source.
Recently, there has been much discussion surrounding EAC's review process of the material provided by the contract employees, and how much was included in our election crimes report. After receiving the information from the consultants, EAC conducted due diligence. As you will see in the consultants' draft, they reached conclusions in their summaries that were based almost entirely on the interviews they conducted with 24 people, not on the entire body of work they collected. EAC found the individual accounts were informative and they helped define what issues we should examine in moving forward.

We understand that the topics of voter fraud and voter intimidation are hotly debated and often divisive, even among members of the EAC. We assure you that we believe the process we took to review all of the materials and adopt a final report was motivated by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions.

To avoid even the appearance of partisan influence in future research endeavors, EAC has established a bipartisan commission panel to oversee all research. Commissioner Rodriguez,

Gavin's Blackberry is not working properly so he asked that I forward to you all the following response:

Julie,

My Blackberry keeps freezing up, again. Perhaps you could forward my comments.

Peggy was proposed as the point of contact for Ms. Wang because she was the original project manager and Tova's prior supervisor/COTR. Peggy would obviously staff requests.

As for Peggy's status, I was under the impression that she was still an active employee, but obviously defer that issue to Tom.

Washington, DC 20004-1206

Mr. Joseph:

This letter is in response to your April 16, 2007 inquiry in which you request that your client, Ms. Tova Wang, be authorized by the U.S. Election Assistance Commission (EAC) to discuss certain matters pertaining to her prior employment with the agency.

As I am sure you are aware, Ms. Wang was employed by the EAC under its authority to hire experts and consultants pursuant to 42 U.S.C. §3109 (as implemented by 5 C.F.R. §304). As such, her agreement with the EAC created a limited employee/employer relationship. This is clearly stated in her contract. As an employee Ms. Wang has a duty to the Commission. Without direction from the EAC, Ms. Wang has no authority to speak for the EAC, release non-public information or discuss privileged matters with third parties. As you note in your letter, this concept is also clearly stated in her employment contract. The duties and responsibilities that come with Federal service are essential to the proper functioning of our government.

Ultimately, however, Ms. Wang’s responsibilities should not have a significant impact on her ability to discuss her personal opinions on voter fraud. Per her employment contract, the project she worked on was focused on collecting existing information, defining terms and proposing future research methodology so that EAC could conduct a future research project on voter fraud and intimidation. As a result, the information gathered by Ms. Wang and other EAC employees is nothing more than a collection of articles, books and opinions that are publicly available. In fact, the EAC has published much of this information as an attachment to the final report which is available on our Web site. Ms. Wang is free to provide her personal opinion on voter fraud to anyone she wishes. Her only limitation is in speaking for the EAC or releasing privileged documents or information.

If Ms. Wang has questions concerning specific requests for information, or is requested to speak
on behalf of the EAC, she may contact her prior supervisor, Ms. Peggy Sims at (202)566-3127 for assistance.

Sincerely,

Gavin S. Gilmour
Deputy General Counsel
You know where I stand on this issue but, again, I think we should grant her request. We appear to be stonewalling and I do not think that is good for the agency nor is it good policy. I understand that we have rights to enforce the contract but we can also waive those rights and I think we ought to in this instance.

Gavin S. Gilmour

Commissioners,
Per the chair's request, I have drafted the following press release to communicate the commission's decision to ask the IG to review our contract procedures. Please let me know if this is okay with all of you. I would like this to go out ASAP, so if you could get back to me with any comments before noon, I would appreciate it. Sorry for the short turnaround, but I think circumstances demand that this get out immediately. Thank you.

After you give me the okay on the press release, I will send everything to staff before releasing it.

EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects

For Immediate Release
April 16, 2007

WASHINGTON – U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission’s inspector general to conduct a review of the commission’s contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair’s memo to the inspector general is attached.

“The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter,” said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

Last month, the commission voted unanimously to launch a comprehensive study focused on voter identification...
laws after concluding that initial research it received in a report was not sufficient to draw any conclusions. The commission declined to adopt the report, but released all of the data to the public. The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at www.eac.gov.

At a public meeting in December 2006, the commission adopted *Election Crimes: An Initial Review and Recommendations for Further Study*, available at www.eac.gov. This report was the culmination of research conducted by Tova Wang and Job Serebrov, who were tasked with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the consultants were responsible for “creating a report summarizing the findings of this preliminary research effort and working group deliberations. This report should include any recommendations for future EAC research resulting from this effort.”

**EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.**

To complete our evaluation of the contracting process and related issues for the voter fraud research and voter intimidation and voter identification research projects, we will need copies of all e-mails and a number of documents related to the projects including copies of all of the various drafts (versions) of the reports. I am requesting that all EAC personnel be notified that they are to preserve all of the documents including e-mails related to the projects. We are in the process of setting up an e-mail account to receive the documents. It is imperative that all documents related to the projects be preserved. As soon as the account is set up we will notify you of the address.

In addition, we are requesting access to the backup e-mail files maintained by GSA and EAC. As a result, we are requesting that no backup tapes or files be destroyed.

Commissioners & Tom,

After having received this request, reviewed it and discussed it with the Inspector General and Gavin, I believe that it is ill-advised to continue such a request in light of the pending investigation of this matter by the Inspector General. While I am certain that this was not the intent of this request, the inevitable appearance of this request would suggest that the Commission is seeking to influence an ongoing investigation of the IG. This appearance of inappropriate influence would arise because two employees, who will undoubtedly be contacted by and interviewed as a part of the ongoing IG investigation, are being asked to provide a statement to their supervisors prior to interviews of those persons by the IG. Furthermore, this situation could appear as an attempt by employees and/or the agency to collude on a statement prior to making a formal statement in the investigation of the IG.

This IG's investigation was requested to address issues of public perception. Thus, it is critical that this investigation proceed in a manner that leaves no room for question. As such, I believe that it is inappropriate to proceed with this request.

After much discussion today among the Commissioners would like you both to prepare an in depth overview of the work you did on this report. This would include all of the details of your work on the both the draft report and the final report adopted by the Commissioners. Jeannie has offered to help you in any way.

I will discuss this further with each of you between now and tomorrow.

I have been at the damn conference all day and have not been able to go to a single session or spend time with people.

Thanks

Tom

THIS MESSAGE IS FOR ITS INTENDED RECIPIENT ONLY. IT IS A PRIVILEGED DOCUMENT AND SHALL NOT BE RELEASED TO A THIRD PARTY WITHOUT THE CONSENT OF THE SENDER.
Mr. Joseph:

This letter is in response to your April 16, 2007 inquiry in which you request that your client, Ms. Tova Wang, be authorized by the U.S. Election Assistance Commission (EAC) to discuss certain matters pertaining to her prior employment with the agency.

As I am sure you are aware, Ms. Wang was employed by the EAC under its authority to hire experts and consultants pursuant to 42 U.S.C. §3109 (as implemented by 5 C.F.R. §304). As such, her agreement with the EAC created a limited employee/employer relationship. This is clearly stated in her contract. As an employee Ms. Wang has a duty to the Commission. Without direction from the EAC, Ms. Wang has no authority to speak for the EAC, release non-public information or discuss privileged matters with third parties. As you note in your letter, this concept is also clearly stated in her employment contract. The duties and responsibilities that come with Federal service are essential to the proper functioning of our government.

Ultimately, however, Ms. Wang’s responsibilities should not have a significant impact on her ability to discuss her personal opinions on voter fraud. Per her employment contract, the project she worked on was focused on collecting existing information, defining terms and proposing future research methodology so that EAC could conduct a future research project on voter fraud and intimidation. As a result, the information gathered by Ms. Wang and other EAC employees is nothing more than a collection of articles, books and opinions that are publicly available. In fact, the EAC has published much of this information as an attachment to the final report which is available on our Web site. Ms. Wang is free to provide her personal opinion on voter fraud to anyone she wishes. Her only limitation is in speaking for the EAC or releasing privileged documents or information.

If Ms. Wang has questions concerning specific requests for information, or is requested to speak
on behalf of the EAC, she may contact her prior supervisor, Ms. Peggy Sims at (202)566-3127 for assistance.

Sincerely,

Gavin S. Gilmour
Deputy General Counsel
Got it... thanks
Gavin advises me that we are required to have a FOIA reading room and so we will do that but may not want to admit that we haven't up to now.
Thanks
Tom
We have received your letter dated May 9, 2007, on behalf of your client, the Brennan Center for Justice ("Brennan Center"). We disagree with your client's perception that any EAC search of its records was unreasonable. While the Election Assistance Commission ("EAC") is a tiny agency and often struggles to meet the numerous requests it receives for agency documents, we take each request seriously and strive to be responsive. The EAC takes exception to the procedural, substantive and legal conclusions and representations made in your letter. We believe our search for records was conducted reasonably. Nevertheless, the EAC has decided that the best way to accommodate your request is to perform a new search for documents responsive to your request. We believe a new search will lay to rest your client's perception that our initial search was unreasonable.

The EAC has no desire to withhold information properly releasable under FOIA. Based upon the distribution of your letter, it is important for our agency to demonstrate its existing and continued policy of responsiveness by going beyond what is required and re-conducting the search that you allege was unreasonable. The EAC will essentially start over with regard to this request. As you know, Ms. Jeannie Layson has been in constant contact with Ms. Wendy Weiser of the Brennan Center during
the pendency of its FOIA request. In fact, Ms. Layson recently contacted Ms. Weiser to inform her that she had found additional responsive information in the course of EAC records reviews for similar requests for information. Additionally, Ms. Layson and Ms. Weiser were working together to provide any e-mail attachments or similar documents desired by the Brennan Center which were identified, but omitted in the original response. Due to the procedural and substantive confusion and disagreements surrounding this matter, we will terminate these piecemeal activities in order to prevent any future misunderstandings.

The EAC will conduct a second search and review of its documents. We will not charge the Brennan Center for the document collection, review or copying. For the purpose of clarity and to avoid any confusion, based upon the Brennan Center's previous requests it is seeking:

ALSO, I believe this is a great opportunity to address the larger audience by including our desire (if it exists) to improve EAC transparency by setting up - in the very near future - a FOIA reading room. I implore you to turn this correspondence into a progressive step for the agency.

Rosemary Rodriguez
Julie has already raised the point that most concerned me: I don’t think it is accurate to say the consultant’s recommendations were their findings. The recommendations were a combination of consultant recommendations and working group recommendations for future EAC action. We did not ask the consultants to provide “findings” because this research was never supposed to be the definitive study on the subject. Instead, it was supposed to be an initial effort to see what relevant information is available, to define voting fraud and voter intimidation, and to make recommendations to EAC regarding how to pursue the subject (next steps). --- Peggy

This are questions from a “freelance” reporter who is very hot about the “Tova Wang report.” Please let me know if my answers are accurate, and I welcome any suggestions you may have. I need to get your input by COB tomorrow. I am also looking for more clarification on what didn’t make it into the fraud report. She is asking if we included all of their “findings” and their “research.”

Thanks.

1) You said that the Wang/Serebrov report has not been released because it was predecisional. Was the Moritz/Eagleton report released because it was not predecisional? The Moritz/Eagleton report was a predecisional document. The commissioners took an action not to adopt a final report based upon the Moritz/Eagleton report, but to release all the predecisional information (the draft report).
2) I understood you to say that the December EAC report includes all of the Wang/Serebrov recommendations but not all of the Wang/Serebrov findings. Is that correct? The report does include all of their recommendations, which were their findings, and all of the research they conducted.

3) I understood you to say that EAC staff added results of their own research to the December EAC report. Is that correct? What I said was EAC staff reviewed the report for accuracy, for grammar and added language that reflected the commission's decision to adopt the final version based upon the initial research provided by the consultants.

4) If I'm correct on questions 2 and 3, would it be accurate to say that readers of the December report cannot tell how much of that report does and does not reflect the original Wang/Serebrov findings? The consultants' recommendations are their findings. All of the recommendations are included in the final report, so readers can make the determination regarding the recommendations.

5) I called earlier today requesting the Wang/Serebrov report, and you sent me the December EAC report. I am concerned that if I had not already been researching this closely, I would have thought that you'd sent me the Wang/Serebrov report and would have reported incorrectly that you had. Does the EAC have any comment on this manner of replying to press inquiries? (I contacted you to request the report after I read in the Statesman Journal of Salem, Oregon, an article by Marie Cocco that says: "The bipartisan commission didn't widely release the consultants' review, but makes it available on request." Did the EAC indeed give Ms. Cocco a copy of the "consultants' review"? Or has she misunderstood you in the way I'm concerned about?) I sent you a link to the "EAC report" because it is what was adopted by the commission based upon the research conducted by the consultants. The final report clearly states how it was compiled and includes bios for both of the consultants. Regarding Ms. Cocco, I explained the entire process to her. I provided the staff update on the project which was presented at a public meeting in May 2006 and the final report, which is posted on the EAC website. Regarding "this manner of responding to press inquiries," I have forwarded your comments to my supervisor so he can review my performance regarding the handling of your inquiry.

6) I understood you to say that the EAC did not release the Wang/Serebrov report in its original form because the EAC has to do due diligence and its staff is small. Do I understand you correctly? As a small agency of 23 employees, including the four commissioners, it is necessary for the agency to contract with consultants to gather the initial data for research projects. After EAC receives the initial data, the agency reviews the data for accuracy. What form of due diligence does the EAC's staff routinely conduct on research that is contracted out to experts before that research is released? You mentioned "vetting" the research. What does that vetting entail? It depends on the project. For instance, if it is information directly related to a mandate within the Help America Vote Act (HAVA), staff will make sure that the information is consistent with the law. In addition, we often ask for input from our Standards Board and Board of Advisors, which combined consist of more than 147 members. If we are using research that will eventually become guidance, we are required by HAVA to seek the input of these boards. Go here for more information about these boards and its members. If the board members have feedback, then we must make the determination whether to incorporate it, and, if so, how to incorporate their changes. If the research is focused on election laws throughout the country, we make sure the laws are cited correctly and that state legislatures haven't changed or amended these laws since the research was conducted. (As you probably know, there have been many new election laws introduced at the state level since 2004.) Througout the
process, we review for grammar as well as make sure the document flows and is arranged logically -- the basic tenets of editing.

With regard to # 3 we did add our own research, because theirs was insufficient on the definition of voting fraud and voter intimidation.

On #6, you might want to include is written in a consistent voice. This might seem elementary, but not in this case. The comments about the boards may be confusing, here, since this was not vetted through those boards.

I am comfortable with the idea that their recommendations were their findings, although I am sure that Tova would disagree. These consultant/employees were asked to provide two things: 1) a definition of the phrases "voting fraud" and "voter intimidation" and 2) recommendations on a research methodology to conduct a comprehensive review in this area. To accomplish this, we asked them to review existing information on voting fraud and voter intimidation. They wholly failed to provide a definition -- they provided a compilation -- a statement which would cover every possible connotation of those phrases. No logic or limitation was applied. A definition is by its very nature a limitation. So, we had to completely rework that -- hence the additional research referred to above. We reviewed state laws concerning voting fraud and voter intimidation to come up with a definition of "voting crimes." With regard to the second part of their charge, the consultants, as well as their working group and some of the interviewees, provided recommendations. All 16 of them were included in the final report. We did not adopt all of them, obviously, but we did adopt all or part of 6 of those recommendations.

Other statements that were contained in the report were just that ... statements, summaries, or opinions ... concerning the existing research that was out there on this topic. I would not classify those as "findings."

Subject Please review my responses

This are questions from a "freelance" reporter who is very hot about the "Tova Wang report." Please let me know if my answers are accurate, and I welcome any suggestions you may have. I need to get your input by COB tomorrow. I am also looking for more clarification on what didn't make it into the fraud report. She is asking if we included all of their "findings" and their "research."

Thanks.
1) You said that the Wang/Serebrov report has not been released because it was predecisional. Was the Moritz/Eagleton report released because it was not predecisional? The Moritz/Eagleton report was a predecisional document. The commissioners took an action not to adopt a final report based upon the Moritz/Eagleton report, but to release all the predecisional information (the draft report).

2) I understood you to say that the December EAC report includes all of the Wang/Serebrov recommendations but not all of the Wang/Serebrov findings. Is that correct? The report does include all of their recommendations, which were their findings, and all of the research they conducted.

3) I understood you to say that EAC staff added results of their own research to the December EAC report. Is that correct? What I said was EAC staff reviewed the report for accuracy, for grammar and added language that reflected the commission's decision to adopt the final version based upon the initial research provided by the consultants.

4) If I'm correct on questions 2 and 3, would it be accurate to say that readers of the December report cannot tell how much of that report does and does not reflect the original Wang/Serebrov findings? The consultants' recommendations are their findings. All of the recommendations are included in the final report, so readers can make the determination regarding the recommendations.

5) I called earlier today requesting the Wang/Serebrov report, and you sent me the December EAC report. I am concerned that if I had not already been researching this closely, I would have thought that you'd sent me the Wang/Serebrov report and would have reported incorrectly that you had. Does the EAC have any comment on this manner of replying to press inquiries? (I contacted you to request the report after I read in the Statesman Journal of Salem, Oregon, an article by Marie Cocco that says: "The bipartisan commission didn't widely release the consultants' review, but makes it available on request."
Did the EAC indeed give Ms. Cocco a copy of the "consultants' review"? Or has she misunderstood you in the way I'm concerned about?) I sent you a link to the "EAC report" because it is what was adopted by the commission based upon the research conducted by the consultants. The final report clearly states how it was compiled and includes bios for both of the consultants. Regarding Ms. Cocco, I explained the entire process to her. I provided the staff update on the project which was presented at a public meeting in May 2006 and the final report, which is posted on the EAC website. Regarding "this manner of responding to press inquiries," I have forwarded your comments to my supervisor so he can review my performance regarding the handling of your inquiry.

6) I understood you to say that the EAC did not release the Wang/Serebrov report in its original form because the EAC has to do due diligence and its staff is small. Do I understand you correctly? Where's the Voter Fraud?

Over the past month, the silence has been deafening.

For the past few years, many on the Right have been vociferously propagating the myth that voter fraud at the polling place is a rampant problem of crisis proportions. But we haven’t heard from them lately. In fact, as far as my research can discover (Nexis and Google news searches of multiple relevant terms), there has not been one confirmed report of any of these types of incidents in the 2006 election. Not one. Even the Republican National Committee’s vote fraud watch operation in their list of complaints from the 2006 election could not come up with one such case.

If you’ve been listening to the likes of John Fund, Thor Hearne, Ken Mehlman, and John Lott, you would think non-citizens are lining up to vote at the polls, mischievous partisans are voting multiple times by impersonating other voters, and dead people are voting in polling places across the country. In order to justify their argument that we need all voters to present government issued photo identification at the polls, they claim that this type of fraud is the biggest problem our electoral system confronts. They have been building and building this argument, hammering and hammering away at it to the point that it has now become the prevailing belief of the American public.

I won’t go into the recitation of all of the previous research that has been done on what a nonexistent problem polling place fraud is and the fraudulent disenfranchisement narrow voter identification requirements cause among perfectly eligible voters— disproportionately minorities, the poor, the elderly, and voters with disabilities (who by the way, according to conventional wisdom, are also all disproportionately Democratic voters). However, confronted with this continuously growing mountain of evidence undermining their case, it has been interesting to observe the evolution of the Right’s spinning of this issue of late.

In recent months, even before this election, slowly recognizing the remarkable weakness of their substantive argument, conservatives’ new tack has been to say that even if its true that there is not much polling place fraud, the simple fact that the American people believe it is occurring is a problem itself in that it is causing them to lose confidence in the election system. Well, no wonder they have the misguided belief that this is a problem— that’s the message the Right has been hammering away at them over the last few years. In any case, the argument goes that we need identification requirements not because they will in actuality do anything to enhance the integrity of the voting process, but because we need to reassure people who have the perception the process is corrupt.

Let me provide just a few examples of this. In their answer in the identification litigation in Indiana, the state outright admitted that there had never been a single, solitary case of polling place fraud in the history of the state. Nevertheless, the state argued. A state may take action to avoid the appearance of fraud as well as its actual occurrence. A Rasmussen Report poll found that 58% of Americans believed that there was a lot or some fraud in American elections, and a Gallup poll after the 2000 election showed that 67% of adults nationally had only some or very little confidence in the way votes are cast and counted in our country. Public perceptions, grounded on publicly reported evidence of fraud such as
that identified above [by the people I mentioned earlier] are a further justification for fraud prevention requirements like Indiana’s photo ID law.

During the argument over photo identification before the Supreme Court in Michigan, the assistant attorney general conceded there is no evidence of widespread voter fraud but rather “a concern about it.” The esteemed Carter-Baker Commission wrote http://www.brennancenter.org/stack_detail.asp?key=97&subkey=9857, “There is no evidence of extensive fraud in US elections or of multiple voting ... but the electoral system cannot inspire confidence if no safeguards exist to deter or detect fraud or confirm the identity of voters. ... The problem is not the magnitude of fraud ... the perception of possible fraud contributes to low confidence in the system.”

The Supreme Court may even be starting to buy into this rhetoric. In the recent Purcell case regarding Arizona’s identification law, Justice Kennedy wrote, “Confidence in the integrity of our electoral processes is essential to the functioning of our participatory democracy. Voter fraud drives honest citizens out of the democratic process and breeds distrust of our government. Voters who fear their legitimate votes will be outweighed by fraudulent ones will feel disenfranchised.”

Georgia has twice passed voter identification requirements, in 1997 and 2005, basing the need for such barriers to the vote on instances of vote buying and absentee ballot fraud—two methods of voting that identification would do nothing about. More myths.

Basing voting rights laws upon purposely created misunderstandings of what the issues are is not a sound way to develop public policy. Rather than creating fake problems and then passing disenfranchising laws that purport to address them, we might do a better job of educating the American electorate as to what the real problems are in our voting system, and what they are not. It is only then that we will begin to address the flaws in the election systems that disenfranchise tens of thousands of voters in every major election.

Toua Wang is a Democracy Fellow at The Century Foundation.
March 15, 2007

Congressman Jose Serrano, Chairman
House Appropriations Committee
Subcommittee on Financial Services
And General Government
2227 Rayburn House Office Building
Washington, DC 20515

RE: Documents requested during March 7, 2007 Hearing

Dear Chairman Serrano:

On March 7, 2007, the United States Election Assistance Commission (EAC) participated in a hearing on the issue of election integrity. During that hearing, Congressman Hinchey, a member of your subcommittee, requested that certain documents be provided to the Committee. We appreciate the Committee’s interest in EAC’s activities, and we are pleased to respond to the request. Congressman Hinchey requested three documents: EAC’s assessment report on CIBER, Inc., the draft report submitted to EAC regarding voter fraud and intimidation, and the draft report submitted to EAC concerning voter identification. For your information, the assessment report on CIBER, Inc., and the final culmination of the voter fraud and intimidation research – Election Crimes: An Initial Review and Recommendations for Further Study – are available at www.eac.gov. However, we have provided hard copies of these reports as well as the additional information requested.

Assessment Report for CIBER, Inc.

The first requested document was the report of EAC’s contracted laboratory assessor concerning the assessment and review of CIBER, Inc. under EAC’s Interim Laboratory Accreditation Program. It is important to explain the purpose and process of EAC’s Interim Accreditation Program, which was put in place after the National Institute of Standards and Technology (NIST) informed EAC that it would not complete its lab assessments until late 2006 or early 2007.

HAVA Accreditation Program Requirement. As you know, the Help America Vote Act of 2002 (Section 231(a)(1)) mandates EAC “…provide for the certification, de-certification and re-certification of voting system hardware and software by accredited laboratories.” Additionally, the statute provides that laboratories are generally to be accredited in a two step process. First, NIST conducts an evaluation of independent non-Federal test laboratories. NIST selects those laboratories technically qualified to test voting systems to federal standards (2002 Voting System Standards and 2005 Voluntary
Voting System Guidelines currently) and recommends them to EAC for accreditation. NIST has determined that it will utilize its preexisting National Voluntary Laboratory Accreditation Program (NVLAP) to perform its HAVA evaluation. Second, after receipt of NIST’s recommendation, HAVA requires EAC issue a laboratory accreditation through a vote of its commissioners. As part of this process, EAC will conduct a review of its own to address non-technical issues such as conflict of interest, financial stability and recordkeeping.

HAVA required that NIST deliver its first set of recommended labs to the EAC “[n]ot later than 6 months after the Commission first adopts the voluntary voting system guidelines.” This deadline passed in June 2006. Four laboratories applied to NIST for evaluation prior to the HAVA deadline, but the required technical reviews and on-site assessments were not completed by the deadline. The first set of NIST recommended laboratories were not received by the EAC until January 18, 2007.

The Need for EAC Interim Accreditation of Laboratories. Obviously, the need for EAC to provide accredited laboratories arose well before NIST’s January 18 recommendation. First, towards the end of 2005 NIST informed the EAC that the expected timeline to complete required document collection and review, pre-assessment and formal on-site assessments of applicants made it highly unlikely that it would be able to provide a list of recommended laboratories before the end of 2006. This determination made it clear that the EAC would need to have an alternative process in place to provide accredited laboratories if it wished to implement its certification program before that time. Furthermore, in July of 2006, the National Association of State Election Directors (NASED) informed EAC that the organization was terminating its voting system qualification program. NASED is a non-governmental, private organization that accredited laboratories and qualified voting systems to federal standards for more than a decade. The organization’s decision to terminate its voting system qualification program just before the 2006 general election required EAC to take immediate action. Without an entity to approve required voting system modifications for the 2006 election, some state election officials would be unable to field their HAVA-compliant systems. To address these situations, EAC was compelled to do two things (1) provide for interim accreditation of testing laboratories and (2) initiate a preliminary, pre-election phase of its voting system testing and certification program.¹

¹ The pre-election phase of EAC’s certification program was not originally planned, but was ultimately required to serve election officials and the public. The program began on July 24, 2006. The purpose of the pre-election phase of the program is to provide voting system manufacturers with a means to obtain a Federal Certification of voting system modifications during the vital period immediately prior to the November 2006 General Elections. Many states require a Federal or national certification as a condition of state certification. Historically, the three to four month period immediately preceding a General Election produces a number of emergent situations that require the prompt modification of voting systems. These changes are often required by state or local election officials and must be made prior to Election Day. To this end, the pre-election phase of the EAC’s Certification Program is designed to meet the immediate needs of election officials from the date NASED terminated its qualification program until after the November General Election. The pre-election requirements of the certification program are narrowly tailored to meet these needs. Additionally, the pre-election phase of the program was drastically limited in
EAC needed to provide accredited labs on a temporary, interim basis to ensure that the agency had the means to implement its certification program. Additionally, EAC would be compelled to implement a provisional, pre-election certification program to replace services offered by NASED. EAC could not wait for NIST to recommend laboratories. Fortunately, HAVA provided a mechanism for EAC to take such action in Section 231(b)(2)(B). This section requires that EAC publish an explanation when accrediting a laboratory without a NIST recommendation. A notice was published on EAC’s Web site to satisfy this requirement.

EAC’s Interim Accreditation Program. At a public meeting in August 2005 held in Denver, the commissioners received a staff recommendation outlining the details of the interim accreditation program. The staff recommendation included a process in which the three laboratories previously accredited by NASED—CIBER, SysTest Labs, and Wyle Laboratories—would be allowed to apply for interim accreditation. In December of 2005, EAC officially began accepting applications for a limited interim accreditation program. As stated in the letters, the purpose of the interim accreditation program was to provide accredited laboratories to test voting systems to federal standards, until such time as NIST/NVLAP was able to present its first set of recommended laboratories. This accreditation was limited in scope to the 2002 Voluntary Voting System Standards and required the laboratory to apply to the NVLAP program to receive a permanent accreditation. The letters also sought variety of administrative information from the laboratories and required them to sign a Certification of Laboratory Conditions and Practices. This certification required the laboratories to affirm, under penalty of law, information regarding laboratory personnel, conflict of interest policies, recordkeeping, financial stability, technical capabilities, contractors, and material changes.

In order to accredit a laboratory (even on an interim basis), EAC needed to contract with a competent technical expert to serve as a laboratory assessor. EAC sought a qualified assessor with real-world experience in the testing of voting systems. Ultimately, only one individual responded to EAC’s solicitation. The individual was (at the time) the only individual known to have the requisite experience and assessor qualifications. The contractor reviewed each of the laboratories that applied. The review was performed in accordance with international standards, the same standards used by NVLAP and other laboratory accreditation bodies. This standard is known as International Standard ISO/IEC 17025, General Requirements for the Competence of Testing and Calibration Laboratories. In addition, the EAC assessor (who also currently serves as a NVLAP assessor) applied NIST Handbooks 150, Procedures and General Requirements and NIST Handbook 150-22, Voting System Testing.

CIBER, SysTest Labs, and Wyle Laboratories applied for accreditation under the interim program. Each, as required, had previously received a NASED accreditation. EAC’s
assessor visited each of the labs and conducted a review consistent with the standards
cited above. The assessor reviewed laboratory policies, procedures and capabilities to
determine if the laboratories could perform the work required. Laboratory assessments
do not make conclusions regarding past laboratory work product. Two of the applicant
laboratories, SysTest Laboratories, L.L.C., and Wyle Laboratories, Inc. received an
interim accreditation. The assessor’s reports and EAC action regarding these laboratories
are available on the EAC Web site.2 EAC promptly published on its Web site
information regarding its decision on accreditation (August and September of 2006).
This notice provides some brief background on the interim accreditation process, starting
with the fact that three previously NASED accredited laboratories were invited to apply
to the program, including information on the program’s requirements and limitations and
ending with the identity and contact information of the two laboratories accredited.
Information was also electronically forwarded to EAC’s list of stakeholders via e-mail.
The EAC stakeholders e-mail list includes almost 900 election officials and interest
groups, nationwide. Staff members for EAC oversight and appropriations committees are
included in this list of stakeholders. In addition to EAC’s Web site and e-mail announcements, on September 21, 2006 EAC’s Executive Director reiterated the
Commission’s decision at a public meeting Web cast to the EAC Web site. This
announcement identified the interim accredited labs by name. Furthermore, in October
26, 2006, the two interim accredited laboratories testified at a nationally televised public
hearing.

The Interim Accreditation Program and CIBER. The third laboratory, CIBER, has
yet to satisfy the requirements of the interim accreditation program. The initial
assessment of CIBER revealed a number of management, procedural and policy
deficiencies that required remedial action before the laboratory could be considered for
accreditation. These deficiencies are identified in the initial CIBER/Wyle report. They
were also brought to the attention of CIBER’s President of Federal Solutions in a letter
from EAC’s Executive Director dated September 15, 2006. The letter outlines, consistent
with recommendation of EAC’s assessor, the steps the laboratory must take to achieve
compliance. The letter requires CIBER to:

a. Assign resources, adopt policies and implement systems for developing
standardized tests to be used in evaluating the functionality of voting
systems and voting system software. Neither ITA Practices, CIBER nor
any of its partners will be permitted to rely on test plans suggested by a
voting system manufacturer.

b. Assign resources, adopt policies and implement systems for quality review
and control of all tests performed on voting systems and the report of
results from those tests. This shall include provisions to assure that all

2 Note: The Wyle and CIBER assessment was completed as a joint report. The two labs have a cooperative
agreement to work together in test voting systems (Wyle performing hardware testing and CIBER software
testing).
required tests have been performed by ITA Practices, CIBER or its accredited partner lab.

Finally, the letter required an additional “follow-up” assessment of the laboratory.

The follow-up assessment of CIBER was performed by EAC’s assessor in December of 2006. The findings of this assessment were documented in a report, which is available on the EAC Web site. In the findings, the assessor recognized significant changes CIBER had made to its program in response to the initial assessment, including new policies regarding test procedures, management and personnel. The report also noted a number of non-conformities that had yet to be addressed by the laboratory.

In a letter dated January 3, 2007, CIBER provided a written response to EAC’s follow-up assessment and report. The response sought to address the deficiencies noted in the December assessment. Additionally, CIBER officials requested to meet with EAC staff to discuss their January 3 response. This meeting took place at EAC on January 10, 2007. At the meeting, EAC staff informed CIBER that their report could not serve as the basis of accreditation because it failed to resolve all outstanding issues. A number of CIBER responses to noted deficiencies were listed as “TBD.” EAC’s assessor and Certification Program Director formally reviewed CIBER’s response. EAC provided CIBER notice of the deficiencies that remained outstanding and informed them of the steps they must take to come into compliance by a letter dated February 1, 2007. Due to the fact that the purpose and usefulness of the interim accreditation program is coming to a close, EAC allowed CIBER 30 days in which to document their full compliance. After this time, the program will be closed and no further assessment actions will be performed under the interim program. CIBER was notified of this procedure by letter dated January 26, 2007, and on February 8, 2007, EAC voted to close its interim laboratory accreditation program effective March 5, 2007.

Information related to CIBER’s status in the EAC interim accreditation program was not released prior to January 26, 2007. It was EAC’s belief, in consultation with NIST, that it would be improper to release information regarding an incomplete assessment. However, on January 25, 2007, CIBER took the affirmative action of making this information available to a third party, the New York State Board of Elections. With this action, CIBER made the information public and EAC believed it was incumbent to provide this information to the public. As such, on January 26, 2007, EAC posted on its Web site assessment reports, correspondence, and responses from CIBER related to their progress in the EAC interim accreditation program.

Copies of the two reports issued by the EAC assessor concerning CIBER’s laboratory accreditation assessments are attached as Appendixes 1 and 2 to this letter.
Draft Voter Fraud and Voter Intimidation Report

The second document requested by Congressman Hinchey was the draft report prepared by Job Serebrov and Tova Wang as contracted employees to the EAC. This document was produced by contract employees of the EAC for the EAC. Thus, this draft report was and is considered predecisional under the deliberative process exemption to the Freedom of Information Act (FOIA).

As you may know, the Deliberative Process Privilege protects intra-agency documents that are (1) pre-decisional in nature and (2) part of the deliberative process. In other words, the documents must be part of a process that recommends or presents opinions on a policy matter or governmental decision before that matter is finally decided. It is a well settled matter of law that the work of contract employees and contractors ("consultants") constitute intra-agency documents. This is true even where the consultants are deemed to be independent contractors and are not subject to the degree of control that agency employment entails. The courts have made this determination after recognizing that agencies have a special need for the opinions and recommendations of temporary consultants. Ultimately, deliberative documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors, (2) to protect against premature disclosure of proposed policies and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action.

The report requested by Congressman Hinchey is a draft, representing one phase of the deliberative process—before the document was vetted by staff, approved by the Executive Director and reviewed and approved by the Commissioners (the relevant policy makers). Ultimately, the draft document was created by contract employees in order to aid the EAC's Commissioners in their decisions regarding voting fraud and voter intimidation. The contract employees had no personal interest in their submissions and had no agency decision-making authority. Each was tasked with simply providing pre-decisional research and information to the EAC. Their efforts were limited to creating a truthful, comprehensive, and unbiased draft report. Only when the report is finalized and is adopted by EAC does it constitute an EAC decision or a policy determination.

The determination of this document as predecisional is born out in the facts surrounding the project at issue, including the contract documents that gave rise to research and writing of this draft report. First, the voter fraud and intimidation study that

4 Klamath, at 10.
5 Hoover, 611 F.2d at 1138.
6 NLRB v. Sears, Roebuck & Co., 41 U.S. at 151.
was requested is a draft of a final document that has already been released after being vetted by staff and approved by the EAC Commissioners. It is available in its final form on EAC’s Web site, www.eac.gov. The draft document at issue was created by two contract employees hired pursuant to 5 U.S.C. §3109 (see 42 U.S.C. §15324(b)). Individuals hired under this authority enter into an employment relationship with the EAC. The contract employees were supervised by an EAC program director who participated directly in the project. For example, the supervisor approved, facilitated, scheduled and participated in interviews conducted for the project. Further, the contract employees were provided research materials and other support from EAC law clerks and staff. As stated by their contracts, these consultants were hired so that the EAC could “…obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation.” Moreover, the contracts clearly forbid the consultants from releasing the draft they created consistent with the privilege covering the draft report. The contract states

All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.

Finally, the purpose or subject of the draft report at issue was to make an EAC determination on how voter fraud should be studied by the agency. This was to be done by (1) assessing the nature and quality of the information that presently exists on the subject matter, (2) defining the terms and scope of EAC study as proposed by HAVA, (3) determining what is to be studied and (4) determining how it is to be studied. In addition, the Consultants were asked to develop a definition of the phrases “voting fraud” and “voter intimidation.”

EAC’s interpretation of HAVA and its determination of what it will study and how it will use its resources to study it are matters of agency policy and decision. It would be irresponsible for EAC to accept the product of contracted employees and publish that information without exercising due diligence in vetting the product of the employees’ work and the veracity of the information used to produce that product. EAC conducted this review of the draft voter fraud and intimidation report provided by Ms. Wang and Mr. Serebrov. EAC found that the draft report failed to provide a definition of the terms as required, contained conclusions that were not sought under the terms of the contract or were not supported by the underlying research, and allegations that showed bias. EAC staff edited the draft report to correct the problems mentioned above and included all of the consultants’ and working groups’ recommendations. The final report was adopted by EAC on December 7, 2007 during its public meeting. The final report as well as all of
the underlying research conducted by Mr. Serebrov and Ms. Wang are available on

EAC understands and appreciates that the a request from a Congressional committee is
exempt from the provisions of FOIA, and as such, EAC is providing this draft document
despite the fact that the deliberative process exemption clearly applies to its contents.
The draft report has been attached as Appendix 3 to this letter.

**Draft Voter Identification Report**

The third document requested is the draft report prepared by Rutgers University in
conjunction with Moritz College of Law. Rutgers and Moritz served as contractors to
EAC and produced this draft document pursuant to the provisions of the contract
governing that relationship. This draft report, like the draft voter fraud and voter
intimidation report, is predecisional under the deliberative process exemption to FOIA.

With regard to the Voter Identification draft report, it was created by Rutgers University
in conjunction with the Moritz College of Law (Ohio State University) to “...provide
research assistance to the EAC for the development of voluntary guidance on provisional
voting and voting identification procedures.” The stated objective of the contract was to:

...obtain assistance with the collection, analysis and interpretation of
information regarding HAVA provisional voting and voter identification
requirements for the purpose of drafting guidance on these topics... The
anticipated outcome of this activity is the generation of concrete policy
recommendations to be issued as voluntary guidance for States.

As with the voter fraud and intimidation study mentioned above, the contractors were
provided guidance, information, and were directed by EAC personnel. The final product
they delivered (draft report sought) was identified as “a guidance document for EAC
adoption.” Clearly, as noted by the contract, the issuance of Federal guidance to states is
a matter of government policy and limited to official EAC action. EAC has not
completed review and vetting of this document. However, initial review of this
document reveals data and analysis that causes EAC concern. The Contractor used a
single election’s statistics to conduct this analysis. The two sets of data came from the
Census Bureau and included persons who were not eligible to and did not vote. The first
analysis using averaged county-level turnout data from the U.S. Census showed no
statistically significant correlations. So, a second analysis using a data set based upon
the Current Population Survey (which was self-reported and showed a significantly
higher turnout rate than other conventional data) was conducted that produced only some
evidence of correlation between voter identification requirements and turn out.
Furthermore, the initial categorization of voter identification requirements included
classifications that actually require no identification at all, such as “state your name.”
The research methodology and the statistical analysis used by the Contractor were
questioned by independent working and peer review groups comprised of social scientists.
and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.\(^7\) After this review process is completed, EAC will make a decision whether to adopt or reject the draft report.

Again, recognizing that a request from a Congressional committee is exempt from the provisions of FOIA, EAC is providing this draft document despite the fact that the deliberative process exemption clearly applies to its contents. The draft report has been attached as Appendix 4 to this letter.

Thank you for your requests and your interest in election administration. If you have further questions, please do not hesitate to contact me.

Sincerely,

Donetta Davidson
Chair

cc: Congressman Maurice Hinchey (letter only)

---

After much discussion today among the Commissioners would like you both to prepare an in depth overview of the work you did on this report. This would include all of the details of your work on the both the draft report and the final report adopted by the Commissioners, Jeannie has offered to help you in any way. I will discuss this further with each of you between now and tomorrow. I have been at the damn conference all day and have not been able to go to a single session or spend time with people. Thanks Tom

Commissioners & Tom,

After having received this request, reviewed it and discussed it with the Inspector General and Gavin, I believe that it is ill-advised to continue such a request in light of the pending investigation of this matter by the Inspector General. While I am certain that this was not the intent of this request, the inevitable appearance of this request would suggest that the Commission is seeking to influence an ongoing investigation of the IG. This appearance of inappropriate influence would arise because two employees, who will undoubtedly be contacted by and interviewed as a part of the ongoing IG investigation, are being asked to provide a statement to their supervisors prior to interviews of those persons by the IG. Furthermore, this situation could appear as an attempt by employees and/or the agency to collude on a statement prior to making a formal statement in the investigation of the IG.

This IG's investigation was requested to address issues of public perception. Thus, it is critical that this investigation proceed in a manner that leaves no room for question. As such, I believe that it is inappropriate to proceed with this request.

THIS MESSAGE IS FOR ITS INTENDED RECIPIENT ONLY. IT IS A PRIVILEGED DOCUMENT AND SHALL NOT BE RELEASED TO A THIRD PARTY WITHOUT THE CONSENT OF THE SENDER.

Commissioners and Tom,

I have attached a draft version of the EAC Voting Fraud and Voter Intimidation report. Please have your comments ready no later than Tuesday, Nov. 28, COB, so that I will be prepared to discuss them at our briefing on Wednesday, Nov. 29 at 10:30.

You will note that there are appendixes referenced in the report. These documents are quite lengthy. Thus, I did not attach them to this email. If, however, you want to read the documents, DeAnna has access to them in my absence and can either email them to you or print them for you.

I think that the report is fairly self-explanatory. However, there are two questions that we need to address and that the Commissioners need to comment on:

1. The consultants provided summaries of articles, books, and reports that they read, as well as summaries of the interviews that they conducted. Peggy created two tables summarizing the consultants' summaries of books, article and reports as well as interviews. We need to make a determination of which summaries we want to attach as appendixes. The only issue that I am aware of (and I have a question pending to Peggy about the quality of these summaries) is a significant disagreement over the summaries...
of interviews with Craig Donsanto and John Tanner of the Dept. of Justice. They disagree with the characterization given by the consultants to what they said in the interview. Obviously, this matter would have to be resolved if we decide to use the consultants' summaries.

2. Tom and I had a conversation with Tova and Job about the fact that we are going to issue a report. Tova was quite insistent about being able to see the report before it is released. I am NOT inclined to give her a copy of the report before it is released. Neither Tova nor Job are still on contract with the EAC. Thus, they are just like any other member of the public. I believe that if we release it to them, then we may have a significant problem withholding the document from others that may ask for it via FOIA request. I believe that the course of action should be to release it to all persons simultaneously.

Happy reading and Happy Thanksgiving!

Voter Fraud & Intimidation Report.doc

The stated purpose of the EAC's recently released "fraud report" was not to draw conclusions about fraud, but determine how the subject should be studied by the EAC. As such, it would be inappropriate for the EAC to make unsupported conclusions regarding fraud in its preliminary report. Such speculative statements would only serve to compromise its future effort to study this matter in a nonpartisan fashion.

Gavin S. Gilmour

THIS MESSAGE IS FOR ITS INTENDED RECIPIENT ONLY. IT IS A PRIVILEGED DOCUMENT AND SHALL NOT BE RELEASED TO A THIRD PARTY WITHOUT THE CONSENT OF THE SENDER.
Commissioners,

(1) Leslie Clark of the Miami Herald plans to attend tomorrow's public meeting. Today she asked whether Florida is required to abide by EAC reply to their request. We said that EAC is the cognizant agency for most of the HAVA funding programs. We said that EAC therefore has the responsibility to advise and instruct states regarding the appropriate use of these funds consistent with the provisions of HAVA as well as circulars developed by OMB Circulars A-87 which governs the use of federal funds to purchase goods for state and local governments.

(2) Dana Burke, News Editor for the Citizen in Webster, TX is working on a story regarding voter identification requirements in Texas. She said Democrats opposed to the new legislation have referred to EAC's voter ID study and point to a correlation between more stringent voter id requirements and lower voter turnout, especially among minority groups. She noticed EAC's statement regarding a request for review, asked if the study is considered valid and whether the assessment by opponents of the legislation is correct. We sent her the following two links and replied that our Inspector General is currently reviewing the circumstances surrounding this research and that when that process is complete we'll be glad to discuss it further.

04/16/07 - EAC Requests Review of Voter ID, Vote Fraud & Voter Intimidation Research Projects
News Release: 3/30/07 - EAC to Launch Comprehensive Study of Voter ID Laws

###
Thank you, Julie for turning this around so quickly. I believe this is the 1st communication with the boards on research issues. I think we need to discuss research in general, then explain what has happened in the past few weeks with the voter id and fraud studies. Don’t we need to explain what has happened - Cong released, NYT, etc. Also, I believe the Advisory Bd provided comment and or action on one or both of the studies and I think that should be noted. Finally, do we think the graph with the pledge to provide accurate research would preclude our releasing the Eagleton report the way we did?

From the variety of comments it is not clear to me that there is a common understanding on how to proceed and what we should say -- or at least I am not comfortable that I understand how you all want this letter to read. So, I would suggest we spend a bit more time on the theme this morning so that I can efficiently and accurately edit the letter so that we can get it out timely today.

Keeping it narrow to the current controversy is ok with me, but I think we cannot assume people know how the recent events unfolded, ie Cong released, NYT wrote, etc.

It appears there will be a substantive rewrite so I will save my edits for that version.

However, my original suggestion was to communicate with the boards about the current controversy, not just research in general. Otherwise it looks like we are sidestepping the problem at hand, which is why we
are writing to the boards in the first place.

Commissioners:

Today we had the following media inquiries:

(1) Pam Fessler of NPR wanted to know what Congressman Hinchey requested, and whether we complied. We told her we sent everything he requested to the House Appropriations Committee, Subcommittee on Financial Services and General Government. We explained that most of what they requested was available on our website. Regarding the voter ID research project, we said that at our Feb. public meeting EAC Chair Donetta Davidson requested that staff review the initial research provided by Eagleton and produce a final report, which would include recommendations for further study on this subject. However, we provided the Committee the initial information Eagleton provided to EAC. We then explained the chronology regarding the voter fraud and intimidation, and pointed out that the final report includes all of the recommendations put forth by the consultants as well the research they provided.

(2) John Gideon of Voters Unite wanted to know why we haven't investigated the equipment used in the FL-13 CD race. We explained that EAC's voting system certification program was implemented in January of this year. Until that time, voting systems were evaluated by NASED, which is not a federal agency. We went on to explain as follows - When the Commission adopted its certification program, it decided not to grandfather or transfer any voting systems that had been qualified by NASED. The Commission felt it was important to conduct its own evaluation of voting systems that had been qualified by NASED. That's why any NASED-qualified voting system, including the one he referenced, that wants an EAC certification must be submitted for end-to-end testing. The system he referenced has not been through EAC's certification program. If and when it does, it will be our responsibility to make sure the manufacturer adheres to the terms of our program. Also, when a system comes to us for certification, relevant substantiated reports or reviews of the voting system may be taken into account. And if an instance such as this were to arise regarding an EAC-certified system, we would certainly investigate. In addition, we will make public the systems that have received EAC certification upon completion of the appropriate review process, as well as those manufacturers that have registered with EAC and those voting systems that have been submitted for certification, and we sent him to our website for a list of the information we will post.

###
All--

I received a call from the minority staff of the appropriations subcommittee. I was informed that they are thinking of asking the following questions:

1. Have states spent the $3.1 billion that we distributed under HAVA and what are we doing to monitor their spending of Federal funds?
2. Quoting from the Cal-Tech/MIT study, it appears that HAVA is improving voting and turn out, do we agree?
3. Does greater state involvement in elections equate to better election management?
4. How prevalent is voter fraud?
5. Has there ever been a documented incident of voting system tampering during an election?
6. Describe how the implementation of HAVA mandates increases voting security.
7. Will states participate in the voluntary voting system testing and certification program?
8. If the College Poll Worker program is funded, how will we determine which schools get the money?
9. Do paper trails (VVPATs) improve the security of voting systems?

If any of you took notes of the discussion during the Voting Fraud-Voter Intimidation Working Group meeting, would you please provide a copy to Devon. Devon, would you please use the meeting agenda to organize and consolidate any notes by topic, and send the consolidated notes to me? Thanks. --- Peggy
Thank you, Julie for turning this around so quickly. I believe this is the 1st communication with the boards on research issues. I think we need to discuss research in general, then explain what has happened in the past few weeks with the voter id and fraud studies. Don't we need to explain what has happened - Cong released, NYT, etc. Also, I believe the Advisory Bd provided comment and or action on one or both of the studies and I think that should be noted. Finally, do we think the graph with the pledge to provide accurate research would preclude our releasing the Eagleton report the way we did?

Commissioners,

Attached is a draft letter to the Standards Board and Board of Advisors. This draft follows our discussions earlier today. Please let me know if you have comments, edits or suggestions. I believe that the goal is to get this letter out tomorrow morning.

All,

Today we received a faxed copy of a letter signed by Jose Serrano as Chair of the Financial Services and General Government Appropriations Subcommittee. The Chairman urges the EAC to publicly release the full draft version of the Provisional Voting report prepared by Eagleton. The letter states that the Congressman was pleased with our decision to engage our Inspector General and to release the draft version of the Voter ID study (though he was disappointed that we did not adopt it).

Chairman stated in his letter that if we do not decide to release the draft report, he would like an update regarding the study's status, time line for release and a statement regarding why the EAC would deviate from the "precedent" it has now set in releasing draft studies.

It is my understanding that this report was made public at the Board of Advisor and Standards Board meetings in May 2006. I do not know if any changes were made to the document after that time. Perhaps Karen can provide additional information regarding this concern. It is also my understanding that this document has been released to third parties upon request under FOIA. Additionally, I believe a best practices document was created by the EAC based on the research. That document is on our website. Also, Stephanie informed me (and Karen confirmed) that the study is posted on Eagleton's website.

A copy of Serrano's letter is attached.

THIS MESSAGE IS FOR ITS INTENDED RECIPIENT ONLY. IT IS A PRIVILEGED DOCUMENT AND SHALL NOT BE RELEASED TO A THIRD PARTY WITHOUT THE CONSENT OF THE SENDER.
The Honorable Donetta Davidson
Chair
United States Election Assistance Commission
1225 New York Avenue Northwest, Suite 1100
Washington, DC 20005

Dear Chairwoman Davidson:

I am writing to urge the Election Assistance Commission to publicly release the full draft version of its commissioned report on provisional voting. Given the concern by members of this subcommittee, as well as other members of Congress, over the issue of transparency at the EAC, I believe that it is in the best interest of the taxpayers that they be able to see the full draft report on this topic.

As you know, the EAC commissioned a report from the Eagleton Institute of Politics at Rutgers on both voter identification and provisional voting. At some point, these two reports were split from one another. On March 30, 2007, the EAC released the draft report on voter identification, entitled “Best Practices to Improve Voter Identification Requirements.”

I was pleased with the positive precedent set by the EAC with the release of the draft report on voter identification. Although I was disappointed that the Commission did not endorse the results of the study, I strongly believe that releasing the full draft helped dispel concerns of transparency and partisanship, and allowed the public at large to help identify areas that need more in depth review. I also believe that you have made the right decision in asking the Inspector General to conduct a review of the Commission’s contracting procedures with respect to recent reports. I am hopeful that the review will conclude that greater openness and transparency is of utmost importance.

Given your request to the Inspector General and the recent controversies over the release of the draft voter identification report, as well as the draft voter fraud and intimidation report, I would...
be in the best interest of the Commission to release the draft report on provisional voting. Releasing the full draft version of this report would help to ensure that the EAC remains a transparent organization and dispel concerns that the Commission has been acting in a partisan manner.

Should the Commission decide not to release the draft report, I would then request an update as to the status of this report, a timeline for its release, as well as any compelling reasons as to why the EAC should deviate from the precedent you have now set. The public deserves the opportunity to decide whether the report is both rigorous and accurate.

As I mentioned in the hearing we held just over a month ago, I strongly believe that the EAC will be one of the most important government entities in the run up to the 2008 elections. It is of vital importance that we ensure that the EAC remains, in appearance and in fact, a bipartisan, independent agency- so that voters and election administrators across the country can trust its efforts to ensure that federal elections are safe, secure, accurate, and fair. Releasing the provisional voting report would go a long way towards that goal, and I look forward to your response.

Sincerely,

José E. Serrano
Chairman, Financial Services and General Government Appropriations Subcommittee
Dear all,

I wonder how many more requests like this are waiting in the wings? Is there any way we can anticipate these requests? How many reports are completed and outstanding? May I request a briefing?

Thanks.

If we release every single thing that comes in the door every contractor will have a platform to shop their "research" as they see fit at taxpayers expense. Further, I see no need for a Commission, there would only be a need for a research director to dole out government contracts. I am amazed that a "respected" academic institution would behave in this manner.

THIS MESSAGE IS FOR ITS INTENDED RECIPIENT ONLY. IT IS A PRIVILEGED DOCUMENT AND SHALL NOT BE RELEASED TO A THIRD PARTY WITHOUT THE CONSENT OF THE SENDER.
Deliberative Process
Privilege

**Vulnerabilities**

➤ **Provisional Voting & Voter ID**
- There is media interest in this report but internal EAC officials express concern over the potential for a perceived lack of data or “meat” in the report, which is likely to invite criticism.
- **Important Dates:**
  - Final reports in EAC staff review
  - Commissioner statement that this report would be out on March 8, 2007

➤ **Cost of Studies**
- EAC needs to be prepared to answer questions about the cost of two studies.
  - Voter Fraud and Intimidation - $100,000
    - Report is completed, next steps under review at EAC
  - Effective Design for Election Administration - $681,400
    - Final report due from contractor March 30, 2007

➤ **HAVA Funds State Reports**
- In its first review of the state reports EAC discovered widespread mistakes. Corrections requests were mailed in December and EAC is currently reviewing resubmitted reports.
- **Deadline for reports covering last year:**
  - Title I – End of February 2007
  - Title II – End of March 2007
- State funds reports have not been made readily available, they have only been given out through FOIA requests.
  - Moving forward EAC should consider making the reports available on the EAC website.

➤ **Report to Congress on State Spending**
- Report will cover what the states have spent, and what they have done with the money, over the past three years.
- **Important Date:**
  - Due to Congress end of April 2007

➤ **State Audits**
- States are audited under three types of audits – the Single Audit, the Regular Audit and the Special Audit.
- Currently the Inspector Generals Office puts all audits on the EAC website, and EAC is working to make audit resolution documents function as stand alone documents.
  - Doing so is important and could be especially helpful for media and stakeholder outreach providing a clear and concise “here’s the problem, these issues were identified, these resolutions were issued.”

➤ **Title I. Section 102 Payments**
- States had to send certification documents to EAC to prove spending, and upon review of certifications some states were required to pay money back. EAC needs to be prepared for two possible challenges:
  - Certifications
    - Certifications are scheduled to be issued by the end of May, and states can appeal EAC decisions.
    - To meet its goal of processing appeals by end of the summer, EAC must stick to submission deadlines and its own internal deadlines.
    - Decisions will be posted online after they are sent to the states and EAC needs to be prepared to conduct state official outreach.
  - There are currently three states that EAC must prepare for in terms of possible negative media coverage.
    - Arizona - EAC may face more dialogue with AZ due to its disagreement over a proof of citizenship requirement when registering to vote. Arizona does not realize yet that they will have to repay Title I funds – approximately $250,000 due to GSA miscalculating their precinct numbers. EAC was not aware until they filed their certification documents. This situation will require significant commissioner outreach.
    - New York - Did not meet deadline for spending and will have to repay all of their funds – approximately $50 million. The state has not been cooperative in the past; DOJ has sued them over HAVA compliance. EAC foresees problem getting the funding back which may lead to media/stakeholder scrutiny.
    - $53 million coming back to EAC - EAC believes that Congress did not anticipate such a large amount; 1/3 of states that received the funds have amounts to pay back. May face media/stakeholder scrutiny over program functionality.

Title I. Section 102 Funds Redistribution to Title II
- EAC will tell states, based on a formula, how much funding they will be receiving from the redistribution of Section 102 funds, and states will have to revise their state plans to account for the new funding.
- Once EAC has total funds from states needing to repay, it will take approximately 4 months to redistribute those funds under Title II.
- As the process could prove lengthy and complicated, EAC needs to be prepared for media and stakeholder outreach.

National Voter Registration Act
- EAC is required to issue regulations about registration form design but has not as of this time. Issuing regulations on registration forms is a lengthy process, so EAC needs to start immediately to address the issue before the beginning of the Presidential primaries.
- NVRA says that EAC has to develop a form and submit to Congress every two years a report assessing the impact of the Act. EAC did a report in '05 and will be issuing another report this year but has not addressed form changes.
• Form redesign has the potential to have a huge impact on the process. FEC held regional hearings when a new form was developed, and EAC would most likely need to do the same.

• Delay could produce several negative outcomes if not addressed quickly:
  o Media coverage – Why has this taken so long? Why now?
  o Changes right before the primaries could produce controversy

Labs and Systems Certification

• To leverage labs certification EAC should institute a notification and preparation policy with Burson-Marsteller for the 30-day accreditation window once EAC receives info from NIST.

• EAC has the opportunity through CYSTECH labs in Denver to conduct proactive media outreach.
  o The test lab has agreed to open itself to media - a good opportunity to create some “sunshine” on the testing process.

• EAC needs to prevent late system accreditation problems and possible blame in the public eye and with stakeholder groups. To do so, the following issues need to be addressed/actions need to be taken:
  o System accreditation takes approximately 6-8 months. EAC must set a hard deadline of June 2007 to avoid last minute system certification issues.
  o Engage the media
    • Work with the vendor community to conduct media outreach to counter the negative news cycle and leverage those vendors that have positive stories to tell and are open to press outreach.
    • Show what and how EAC is doing its testing. Use program examples such as FCC cell phone emissions testing and FAA airplanes testing.
    • Engage the blogger community
  o Engage the Secretaries of State
    • EAC needs to be particularly cognizant of the California Secretary of State who appears to be anti-voting system change; may want to focus on California-specific outreach program.
    • EAC should leverage possible positive stories/third party-spokespeople through the states of: Washington – Sam Reid; Texas – Ann McGeehan, Director of Elections; Maryland – Linda Lamone, Elections Office.
  o Leverage Cost-to-Test public education meeting with elections officials, NIST, manufacturers, legislators and advocacy groups.
    • Meeting TBD late April/early May
  o Leverage semi-annual vendor community/test lab meetings to focus outreach to Secretaries of State, election directors associations and election centers.
    • TBD Summer
• Prior to EAC, the National Association of State Elections Directors handled the testing of voting machines. EAC has some of the testing results but does not currently have a thorough inventory of what documents they have, where the documents are located and what exactly the testing results say.

• These testing results, and a lack of information internally, is a serious vulnerability and it is imperative that an accurate inventory and a thorough analysis of the reports be completed as soon as possible.

Systems and Labs Transparency Issues

• EAC not releasing source codes can be problematic for the agency.
  o EAC should develop a clear and concise public statement on source codes to be used for media questions and stakeholder questions.

• Lab accreditation conflict of interest questions have been raised. EAC needs to address this question with outreach to media and stakeholders, specifically on legislation introduced in the House.
  • HR 811 – U.S. Rep. Rush Holt
  • Possible Senate companion bill to be introduced by Feinstein or Nelson
He is quoted in this article as saying the situation surrounding our fraud report could be another Watergate, and wonders if we got our marching orders from the WH. I think we should respond directly to Rep. Serrano regarding his allegation. Say what you will about the way this has been handled, but one thing I'm sure of is that the WH did not edit or was in any way involved in this project. I suggest someone picking up the phone and calling him or his CoS. This is a serious allegation that is starting to really catch on, but now we have a member of Congress saying it.

The Fraudulence of Voter Fraud
The Bush administration purged U.S. attorneys for failing to prosecute crimes that didn't occur

By Joel Bleifuss

On April 6, 2006, in Washington, D.C., Karl Rove gave a speech to the Republican National Lawyers Association and issued this dire warning:

We are, in some parts of the country, I'm afraid to say, beginning to look like we have elections like those run in countries where the guys in charge are, you know, colonels in mirrored sunglasses. I mean, it's a real problem, and I appreciate all that you're doing in those hot spots around the country to ensure that the ballot--the integrity of the ballot--is protected, because it's important to our democracy.

When Rove talks about protecting "ballot integrity," that is shorthand for disenfranchising Democratic Party voters. Over the last several years, the Justice Department, with the help of White House operatives, has sought to boost GOP electoral fortunes by orchestrating a national campaign against voter fraud. But the administration overreached on Dec. 7, when President George W. Bush fired eight U.S. attorneys, a political scandal that some say could become this president's Watergate.

When Republicans talk about voter fraud they are referring to illegal voting by individuals, as opposed to vote fraud--systematic attempts to steal an election by an organized group of partisans. This emphasis on voter fraud has convinced eight states to pass laws requiring voters to present official photo identification in order to cast a ballot--laws that studies have shown suppress Democratic turnout among voters who are poor, black, Latino, Asian-American or disabled.

Understanding that one way to win closely contested elections is to keep Democratic voters away
from the polls, the Republican Party has tried to stoke public fears of voter fraud. On Feb. 15, 2005, the U.S. Senate Republican Policy Committee issued a report, "Putting an End to Voter Fraud," which said, "Voter fraud continues to plague our nation's federal elections, diluting and canceling out the lawful votes of the vast majority of Americans." To remedy the situation, the Senate Republicans advised Congress to "require that voters at the polls show photo identification."

But voting experts maintain that voter fraud is not a national problem. In March, Lorraine C. Minnute, a professor of political science at Columbia University, released "The Politics of Voter Fraud," a report she prepared for Project Vote, an advocacy group based in Arkansas. She writes:

The claim that voter fraud threatens the integrity of American elections is itself a fraud. It is being used to persuade the public that deceitful and criminal voters are manipulating the electoral system. ... The exaggerated fear of voter fraud has a long history of scuttling efforts to make voting easier and more inclusive, especially for marginalized groups in American society. With renewed partisan vigor, fantasies of fraud are being spun again to undo some of the progress America has made lowering barriers to vote.

This is borne out by a study from the Eagleton Institute of Politics at Rutgers University, which found that in the 2004 election, voters in states that required documentation of identity were 2.7 percent less likely to vote than voters in states where documentation was not required. Specifically, the study, commissioned by the U.S. Election Assistance Commission, found that Latinos were 10 percent less likely to vote, Asian-Americans 8.5 percent less likely to vote and blacks 5.7 percent less likely to vote.

What's more, despite GOP claims to the contrary, voter fraud is a very rare occurrence. In 2002 the Justice Department established the Ballot Access and Voting Integrity Initiative to ferret out fraudulent voters. On Oct. 4, 2005, Attorney General Alberto Gonzales, with great fanfare, proclaimed, "We've made enforcement of election fraud and corrupting offenses a top priority." Yet according to an April 12 New York Times article, only 120 people have been charged with the crime over the past five years, leading to 86 convictions. Furthermore, the Times noted, federal attorneys say that most of the transgressions have been mistakes by immigrants and felons who simply misunderstood eligibility requirements.

The extent of voter fraud is further complicated by the fact that earlier this year the Election Assistance Commission changed the conclusions of a report it had commissioned. The original report by outside election experts concluded, "There is widespread but not unanimous agreement that there is little polling place fraud." The commission deleted that sentence and replaced it with, "There is a great deal of debate on the pervasiveness of fraud."

Rep. José Serrano (D.-N.Y.), who chairs the House Appropriations subcommittee that oversees the commission, is disturbed by this apparently politically motivated substitution. He told In These Times:

This possibly could be another Watergate. We have to ask the questions, "Why was this report doctored, and how does this play into the larger picture of voter suppression and
"Intimidation?" By directing public attention to voter fraud you divert attention from the fact that Americans in certain communities are not able to cast their votes properly and that their votes are not being counted. Is this something that this small new agency thought of by themselves or did they get marching orders from somewhere else, perhaps as far up as the White House?

**Firing prosecutors**

It appears that, under Rove's direction the White House has been planning to use U.S. attorneys to fan national fears of voter fraud. In his speech to the GOP lawyers, Rove listed 11 states that would play a pivotal role in the 2008 elections. Since 2005, Bush has appointed new U.S. attorneys in nine of those states: Florida, Colorado, Wisconsin, Minnesota, Iowa, Michigan, Nevada, Arkansas and New Mexico.

What's more, the firings of U.S. attorneys in New Mexico, Arkansas and Washington appear directly related to this Republican plan to exploit the issue of voter fraud and suppress Democratic turnout.

In Arkansas, Bush fired a sitting U.S. attorney in order to appoint Rove protégé Tim Griffin. (See "The Talented Mr. Griffin" by Greg Palast on page 31.)

In Washington, fired U.S. Attorney John McKay had refused to prosecute alleged voter fraud in the 2004 Washington governor's race, in which Democrat Chris Gregoire beat Republican Dino Rossi by 129 votes.

On March 6, McKay testified before the Senate that after the election Republicans pressured him to open an investigation. He said his office had examined the allegations of voter fraud and decided there was not enough evidence to pursue a case.

"Had anyone at the Justice Department or the White House ordered me to pursue any matter criminally in the 2004 governor's election, I would have resigned," McKay told the *Seattle Times*. "There was no evidence, and I am not going to drag innocent people in front of a grand jury."

In New Mexico, David C. Iglesias was equally suspect in the eyes of the GOP. Recall that in 2000, Gore beat Bush by 377 votes in New Mexico. Consequently, in 2004, Democrat-affiliated groups initiated voter registration campaigns in New Mexico. As a result, two boys, age 13 and 15, received voter cards in the mail. Iglesias responded by setting up a bipartisan task force to investigate. This didn't satisfy attorney Mickey D. Barnett, who represented the 2004 Bush-Cheney campaign in New Mexico. He told Iglesias he should bring federal charges against a canvasser who forged their signatures, which he refused to do.

In a *New York Times* op-ed, Iglesias wrote:

> What the critics, who don't have any experience as prosecutors, have asserted is reprehensible--namely that I should have proceeded without having proof beyond a reasonable doubt. The public has a right to believe that prosecution decisions are made on legal, not political grounds.
Manufacturing voter fraud

The issue of fraudulent voters undermining American democracy did not spontaneously erupt. To promote national concern about voter fraud, in March 2005 GOP operatives with ties to the White House established a 501(c)4 organization called the American Center for Voting Rights Legislative Fund (ACVR). The group went public by establishing a Web site, ac4vr.com. (The site has since been taken down for unknown reasons.)

According to its 990 tax forms, ACVR is based in Midlothian, Va., and its executive director is Robin DeJarnette, who is also the founder and executive director of the Virginia Conservative Action PAC. However, according to the registration form for its Internet domain name, the group's address is a mailbox at a UPS Store in Dallas. The chairman of ACVR is Brian Lunde, a former Democratic National Committee official from Texas, who in 2004 was head of Democrats for Bush.

ACVR specializes in issuing studies that purport to document a host of voter fraud cases, like the report titled: "Democrat operatives far more involved in voter intimidation and suppression in 2004 than Republicans."

On March 21, 2005, four days after ACVR went public, Rep. Bob Ney (R-Ohio), then chair of the Committee on House Administration, opened hearings on 2004 election irregularities. One person who testified was ACVR National Counsel Mark "Thor" Hearne II, who described himself as "a longtime advocate of voter rights and an attorney experienced in election law." In the aftermath of the 2000 presidential campaign, Hearne was dispatched to Florida as a Republican observer in Broward County's manual recount, and in 2004 he worked as the national general counsel for Bush/Cheney '04 Inc.

In his testimony, Hearne described ACVR as "committed to defending the rights of voters and working to increase public confidence in the fairness of the outcome of elections." And he submitted to the committee a copy of the ACVR's "Ohio Election Report," of which he was the lead author. That report read in part:

This [Democratic] voter registration effort was not limited to registration of legal voters but, criminal investigations and news reports suggest, that this voter registration effort also involved the registration of thousands of fictional voters such as the now infamous Jive F. Turkey, Sr., Dick Tracy and Mary Poppins. Those individuals registering these fictional voters were reportedly paid not just money to do but were, in at least one instance, paid in crack cocaine.

And in testimony on Dec. 7, 2006, the same day the prosecutors were fired, Hearne told the Election Assistance Commission: "Recent press reports suggest that voter registration fraud remains a significant issue in the recent mid-term elections."

The press contact for ACVR is Jim Dyke, who was the communications director of the Republican National Committee during the 2004 election. In the fall of 2005 he was working in the White House trying to get Harriet Miers on the Supreme Court, before moving on to work in Vice President Dick
Cheney's office. Brad Friedman of BradBlog.com reported that according to internet records, Dyke registered the ACVR Internet domain name, ac4vr.com, in December 2004. Those records have since disappeared from public view. (The source of ACVR's funding is also mysterious. According to the Pittsburgh Tribune-Review, "When asked to name any contributors to his nonprofit, Hearne claimed he did not know but said Lunde did. When Lunde was asked, he claimed he did not know but said Hearne did.")

Dyke is a good friend of his fellow Arkansan Tim Griffin, the new U.S. attorney in Arkansas. In 2004, both worked at the Republican National Committee helping Bush get re-elected. Dyke has been a vocal defender of Griffin's appointment as U.S. Attorney. "He has a real passion for the law," Dyke told the Arkansas Democrat-Gazette.

Rounding out the GOP operatives is Pat Rogers, who sits on the board of ACVR. An attorney for the Republican Party in New Mexico, he has been a vocal critic of fired U.S. Attorney Iglesias. According to the Albuquerque Tribune, Rogers is on the short list to replace Iglesias.

Rove's role

Minnite, who did the study on voter fraud, has read through the reports prepared by ACVR and presented by Hearne at various official hearings. She noticed that the claims follow a predictable script. "It all starts to look the same," she says. "There is a pattern in the way the documents that claim to show voter fraud are put together. It is usually a compilation of news reports on allegations. There is no follow up, no research done, no analysis."

"As I delved into it, I was faced with the question: 'Why do people think there is a lot of fraud when there isn't any real evidence?' I think people are being manipulated by politics, which takes the form of these reports that are dumped on the public. It is as if you get a big enough pile maybe you will convince people that the volume of fraud is quite large and that we have a serious problem."

Wisconsin provides a case in point. At a March 13 press conference, White House Counsel Dan Bartlett identified Wisconsin as one of the states from which the White House had "received complaints about U.S. attorneys."

In 2005, U.S. Attorney Steve Biskup, who was appointed by Bush, investigated these allegations of voter fraud and reported that he found no evidence on which to press charges.

It turns out that early in 2005, Republican officials in Wisconsin prepared a report titled "Fraud in Wisconsin 2004: A Timeline/Summary." The document, which was found in White House and Justice Department records released by the House Judiciary Committee, was written by Chris Lato, the former communications director for the state Republican Party, on orders from Rick Wiley, the party's executive director. The 30-page report, which covers Aug. 31, 2004 to April 1, 2005, contains 65 entries detailing voter fraud. The final example is titled: "RPW [Republican Party of Wisconsin] News Release: Evidence of Election Fraud Piles Up."

The information contained in this Wisconsin compilation, made its way into a 78-page report released on July 21, 2005, by ACVR: "Vote Fraud, Intimidation & Suppression in the 2004
Presidential Election." In the introduction, the ACVR's Hearne and Lunde wrote that the report "documents hundreds of incidents and allegations from around the country. ... [T]housands of Americans were disenfranchised by illegal votes cast on Election Day 2004 ... [P]aid Democrat operatives were far more involved in voter intimidation and suppression activities than were their Republican counterparts. ... [R]equiring government-issued photo ID at the polls ... will help assure ... that no American is disenfranchised by illegal votes.

And who was behind this trail of misinformation? On April 7, Daniel Bice, a columnist for the Milwaukee Journal Sentinel, reported that a source familiar with the document told him, "The report was prepared for Karl Rove. Rick [Wiley] wanted it so he could give it to Karl Rove."

On April 6, 2006, in Washington, at the aforementioned speech to Republican Party attorneys, Rove began with a joke: "I ran into [ACVR's] Thor Hearne as I was coming in. He was leaving; he was smart, and he was leaving to go out and enjoy the day." Rove then told the assembled party lawyers, "We have, as you know, an enormous and growing problem with elections in certain parts of America today."

Rove should know. He helped grow the problem.

I think someone should call Serrano but I think we should issue a press release that explains what transpired with the Eagleton and fraud study. We should note that the EAC is an independent federal entity, not part of the Admin and that the WH was not involved in any way in our decision to remove conclusions not supported by the underlying data.

Subject: Rep. Serrano

He is quoted in this article as saying the situation surrounding our fraud report could be another Watergate, and wonders if we got our marching orders from the WH. I think we should respond directly to Rep. Serrano regarding his allegation. Say what you will about the way this has been handled, but one thing I'm sure of is that the WH did not edit or was in any way involved in this project. I suggest someone picking up the phone and calling him or his CoS. This is a serious allegation that is starting to really catch on, but now we have a member of Congress saying it.

The Fraudulence of Voter Fraud
The Bush administration purged U.S. attorneys for failing to prosecute crimes that didn't occur

By Joel Bleifuss

On April 6, 2006, in Washington, D.C., Karl Rove gave a speech to the Republican National Lawyers Association and issued this dire warning:

We are, in some parts of the country, I'm afraid to say, beginning to look like we have elections like those run in countries where the guys in charge are, you know, colonels in mirrored sunglasses. I mean, it's a real problem, and I appreciate all that you're doing in those hot spots around the country to ensure that the ballot--the integrity of the ballot--is protected, because it's important to our democracy.

When Rove talks about protecting "ballot integrity," that is shorthand for disenfranchising Democratic Party voters. Over the last several years, the Justice Department, with the help of White House operatives, has sought to boost GOP electoral fortunes by orchestrating a national campaign
against voter fraud. But the administration overreached on Dec. 7, when President George W. Bush fired eight U.S. attorneys, a political scandal that some say could become this president's Watergate.

When Republicans talk about voter fraud they are referring to illegal voting by individuals, as opposed to vote fraud--systematic attempts to steal an election by an organized group of partisans. This emphasis on voter fraud has convinced eight states to pass laws requiring voters to present official photo identification in order to cast a ballot--laws that studies have shown suppress Democratic turnout among voters who are poor, black, Latino, Asian-American or disabled.

Understanding that one way to win closely contested elections is to keep Democratic voters away from the polls, the Republican Party has tried to stoke public fears of voter fraud. On Feb. 15, 2005, the U.S. Senate Republican Policy Committee issued a report, "Putting an End to Voter Fraud," which said, "Voter fraud continues to plague our nation's federal elections, diluting and canceling out the lawful votes of the vast majority of Americans." To remedy the situation, the Senate Republicans advised Congress to "require that voters at the polls show photo identification."

But voting experts maintain that voter fraud is not a national problem. In March, Lorraine C. Minnite, a professor of political science at Columbia University, released "The Politics of Voter Fraud," a report she prepared for Project Vote, an advocacy group based in Arkansas. She writes:

The claim that voter fraud threatens the integrity of American elections is itself a fraud. It is being used to persuade the public that deceitful and criminal voters are manipulating the electoral system. … The exaggerated fear of voter fraud has a long history of scuttling efforts to make voting easier and more inclusive, especially for marginalized groups in American society. With renewed partisan vigor, fantasies of fraud are being spun again to undo some of the progress America has made lowering barriers to vote.

This is borne out by a study from the Eagleton Institute of Politics at Rutgers University, which found that in the 2004 election, voters in states that required documentation of identity were 2.7 percent less likely to vote than voters in states where documentation was not required. Specifically, the study, commissioned by the U.S. Election Assistance Commission, found that Latinos were 10 percent less likely to vote, Asian-Americans 8.5 percent less likely to vote and blacks 5.7 percent less likely to vote.

What's more, despite GOP claims to the contrary, voter fraud is a very rare occurrence. In 2002 the Justice Department established the Ballot Access and Voting Integrity Initiative to ferret out fraudulent voters. On Oct. 4, 2005, Attorney General Alberto Gonzales, with great fanfare, proclaimed, "We've made enforcement of election fraud and corrupting offenses a top priority." Yet according to an April 12 New York Times article, only 120 people have been charged with the crime over the past five years, leading to 86 convictions. Furthermore, the Times noted, federal attorneys say that most of the transgressions have been mistakes by immigrants and felons who simply misunderstood eligibility requirements.

Commissioners:

Jeannie issued the following media inquiries log for today:

(1) I asked Rick Hasen of Election Law Blog to please post info about our Spanish language glossary of election terms, and he did.

(2) Eliza Carney, National Journal columnist, interviewed the chair today about the recent challenges EAC has encountered. She asked about CIBER, and the chair explained the interim process, the way we modeled our interim process after NVLAP. Eliza wanted to know what EAC was doing to address some of the criticism, and the chair talked about the bipartisan subcommittees and her request to the IG. She said Rep. Hinchey told her the only reason we released the voter ID report was because he asked for it at a hearing. The chair pointed out that in Feb. she asked staff to bring the commission recommendations for wrapping it up w/n 30 days. She asked the chair about the voter fraud report, and the chair said staff reviewed it for accuracy, as we have a responsibility to do. I sent her background info on the history of certification and the voluntary nature of the guidelines and our certification program. She also asked for info about our budgets, and our employee cap, which I sent to her.

(3) David Nather of Congressional Quarterly interviewed the chair about how the agency is standing up against all of the recent criticism. She talked about the bipartisan subcommittees and the IG review request. She said if the IG identifies things that need to be changed, we'll change them. He had emails b/w Peggy and Craig Donsanto about discrepancies with his interview. Peggy talked with the reporter about the issue. She explained that she sat in on the interview, and that she agreed with Craig that they had gotten something wrong -- they stated that DOJ had moved from focusing on fraud conspiracies to individual cases. Peg and Craig agreed that what he'd said was that DOJ used to only focus on conspiracies, now they also focus on individual cases too. Peg said Craig learned of the inaccurate portrayal during his role as the technical advisor to the working group. She said none of the people interviewed were given the opportunity to review the summaries. Craig found out about his through the working group, and Tanner learned about his interview summary after the boards were briefed on the project in May. He asked me if we were finished with the following research projects: -- ballot designs, voter registration methods, recount procedures, misinformation about election times and locations, and proposals to make election day a holiday. I told him all of that research is underway. HAVA-mandated research that's been completed includes Election Crimes (vote fraud), the 2004 Uniformed and Overseas Citizens Absentee Voting Act Survey, and the 2003-2004 National Voter Registration Act Survey. We've also released the 2004 Election Day Survey. And we've issued a series of quick management start guides to election officials throughout the nation, addressing voting system security, introducing a new voting system, ballot preparation, and poll workers. Yesterday, the commission adopted the Spanish language glossary of election terms, the first project released under EAC's Language Accessibility Program, which consists of working groups comprised of local election officials, national advocacy groups and research and public policy organizations to advise the commission on how to best meet language accessibility requirements. Next we will translate the glossary in five Asian languages. We also are working on a Legal Resources Clearinghouse, which will be a web-based database containing statutes, regulations, rules, and fed. and state court decisions related to election administration. It will provide the public and election officials a central location to conduct election administration research. I pointed out to him that we have already met two of the biggest HAVA mandates -- VVSG and the certification program. He asked for the ages of all the commissioners, and I gave it him.
(4) Philip Burrowes of Congressional Quarterly asked for photos of all commissioners and their length of terms which we provided. He also asked for the names of the members of Congress who made recommendations to the White House regarding appointments. We provided the text of HAVA regarding recommendations and said he would need to ask the White House for names.

(5) Marc Songini of Computer World had the following questions, and my responses follow.

A. Is the EAC doing enough to strengthen voluntary voting system guidelines and voting system certification? EAC, the National Institute of Science and Technology (NIST), and the Technical Guidelines Development Committee (TGDC) have already completed an initial update of the 2002 standards. First, it is important to note that these guidelines are voluntary, and it is up to states whether to adopt them. The 2005 guidelines update and augment the 2002 voting system standards, as required by HAVA, to address advancements in election practices and computer technologies. After December of this year, voting systems will no longer be tested against the 2002 standards. The major changes from 2002 to 2005 fall in the areas of accessibility and usability. The changes made to these sections include a usability section which was not in the 2002 standards and increase the number of accessibility requirements from 29 to 120 and increase language accessibility requirements. The 2005 guidelines also created greater security requirements based on the new technology used in the voting machines, increasing standards in the areas of data transmission and voter verification. The 2005 guidelines also include a section on conformance testing that was not in the previous standards and included more requirements regarding wireless components. It also provides an overview of the requirements for Independent Verification systems, including requirements for a voter verified paper audit trail for states that require this feature for their voting systems. The VVSG includes the requirement that all voting system vendors submit software to a national repository, which will allow local election officials to make sure the voting system software they purchase is the same software that was certified. In addition, NIST and the TGDC are working on the next iteration of guidelines as we speak, and have said they expect to provide their recommendations to EAC by this summer. You may also want to contact Jan Kosko at NIST. Her number is 301-975-2767.

B. Regarding EAC resources, please see our operating budgets below. Note that the National Institute of Standards and Technology (NIST) receives a pass through in our budget, so that amount is not part of EAC's operating budget.

FY 2004 -- $1.2 million
FY 2005 -- $13.8 million ($2.8 million of which was a pass through for NIST)
FY 2006 -- $14 million ($2.8 million of which was a pass through for NIST)
FY 2007 -- $16.2 million ($4.95 million of which was a pass through for NIST)

C. Regarding your inquiry about what EAC is doing to strengthen the certification program, the most important issue is that it is now a role the federal government has assumed for the very first time. In the past, this was done by the National Association of State Election Directors (NASED) on a volunteer basis. NASED is not a federal agency, and it did not receive any federal funds in its efforts. EAC made the decision not to grandfather any systems certified by NASED. So any system seeking an EAC certification must be tested end to end. Under EAC's program, which is laid out in our Testing and Certification Program Manual, the federal government will not only operate a more rigorous testing and certification process, it will also have a Quality Monitoring Program in place. For the first time manufacturers will be held accountable through not only this program, but also under the decertification process, which would be the ultimate sanction against a manufacturer. If a system is decertified, the manufacturer may not represent the system as being certified, may not label the system as certified, and the system will be removed from the EAC's list of certified voting systems. Election officials will be notified about the decertification. The Quality Monitoring Program will allow election officials to report anomalies. EAC will visit facilities for quality control purposes, and we will perform site reviews per states' requests. In addition, this program will be transparent. Information about the process and the manufacturers and test labs that participate will be posted on the agency's website. Go here for the list of documents and information we will provide. In addition to holding the manufacturers accountable, any federal employees involved with this program will have their financial holdings reviewed for potential conflicts of interest.

###
Commissioners:

We just accessed the following article that appears today in Congressional Quarterly's CQ WEEKLY.

Election Board Facing Votes of No Confidence

CQ WEEKLY - IN FOCUS
Congressional Quarterly
April 23, 2007 - Page 1164
By David Nather, CQ Staff

After the turmoil over the 2000 presidential election, Congress created a bipartisan commission that was supposed to do nice, non-controversial things: hand out some federal grants, do some studies, certify voting machines, promote voting practices that seem to work well.

Instead, the Election Assistance Commission is now surrounded by controversy and tough questions. And the same lawmakers who could barely be bothered to pay attention to its creation four years ago are putting it under the microscope now.

Democrats were enraged by the commission's handling of a report on voter fraud — the panel ordered up the report (which found little evidence of fraud), sat on the document for several months, then released a rewritten version that concluded "there is a great deal of debate" about how much voter fraud takes place. Republicans have contended that voter fraud is a big problem and benefits Democrats.

A second commission report on voter identification laws found that the laws can reduce turnout, particularly among Hispanics. The panel delayed releasing that report for months, then made it public even while refusing to endorse its conclusions.

Voting rights groups have criticized the commission's handling of the reports, and two powerful Democratic senators — Dianne Feinstein of California, who chairs the Rules and Administration Committee, and Majority Whip Richard J. Durbin of Illinois, who chairs the Appropriations subcommittee that funds the commission — have asked the panel to answer a barrage of questions. More than anything, they want to know whether the commission received "any outside communication or pressure" to delay or change the reports.

The controversy has put a harsh spotlight on the commission in recent weeks, but it's hardly the only case where the panel's actions have gotten it into trouble. Last year, the commission angered Arizona's secretary of state when it refused to grant the state permission to require voters to provide proof of citizenship when they registered by mail using federal forms. Secretary of State Jan Brewer, a Republican, called the decision "inexcusably wrong" because Arizona's voters called for the requirement
in Proposition 200 and because the Department of Justice had approved it.

On top of it all, secretaries of state have been suspicious of the commission all along, fearing that it would turn into yet another federal regulatory agency. The National Association of Secretaries of State called for the commission to be abolished after the 2006 election, since its three-year authorization expired at the end of fiscal 2005. New Hampshire Secretary of State William Gardner, a Democrat, urged the group to take that position because, he said, "I could see what could potentially be coming. . . . I remember when the Federal Election Commission was basically a clearinghouse as well."

These are a lot of pressures for a four-member commission with a staff of 19 and an operating budget of just over $11 million, which got so little attention from Congress that it took a year before its first four members won Senate confirmation. The commission also has strict limits on what it can do under the 2002 election overhaul law that created it. Among other things, it's not supposed to be a regulatory agency – though it does have some authority under the National Voter Registration Act of 1993, the "motor voter" law that was at issue in the Arizona dispute.

'We Took On Too Much'

Donetta L. Davidson, the Republican who in January became the commission's third chairman, says she takes seriously the questions about the reports on voter fraud and voter identification. The commission has referred the issue to its own inspector general, asking him to take a hard look at the panel's contracting procedures for outside research projects. "We want to be as transparent as possible," Davidson said.

But Davidson, who was previously Colorado's secretary of state, says the biggest problem was that the commission may have been trying to move too many reports with a small staff that mostly works with outside contractors rather than producing its own research. "I think that was our biggest mistake – being too aggressive," she said. "We just took on too much."

That explanation won't quiet the criticism. House Majority Leader Steny H. Hoyer, a Maryland Democrat and one of the authors of the 2002 law, is concerned that the commission "may have mishandled taxpayer-financed reports" and has called for hearings, said spokeswoman Stacey Farnen Bernards. Feinstein's committee already has an oversight hearing tentatively scheduled for June.

Voting rights groups are highly suspicious of the commission's actions, though there is no evidence the administration interfered with the reports. Jonah Goldman, director of the Lawyers' Committee for Civil Rights Under Law, said it "just seems a little too convenient that there's no political motive" given that the administration reportedly fired some U.S. attorneys because they were not aggressive in prosecuting alleged voter fraud.

And even those who don't subscribe to a political conspiracy find fault with the commission's handling of the reports. "I think they're just trying to avoid controversy, and trying to avoid controversy is not what we need right now," said Richard L. Hasen, an election-law expert at Loyola Law School in Los Angeles. "With all the problems we're having with elections in this country, we need bold leadership, and they're not providing it."

Congressional Alarm Bells

Davidson insists that the commission doesn't shy away from controversial subjects. "That's our job," she said. Indeed, the law spells out a list of reports the commission is supposed to produce, and they touch on nearly every hot-button election issue imaginable: ballot designs, voter registration methods, recount procedures, the handling of misinformation about election times and locations, and even proposals to make Election Day a holiday.

Much of the commission's other work is advice and testing of voting systems. In 2005, it published guidelines that dealt with security issues, paper audit trails, and accommodations for voters with
disabilities. And last year, it started testing and certifying voting systems in preparation for the 2008 election.

Still, the way the voter fraud and identification reports were handled and the possibility that the Justice Department influenced the reports have alarmed some members of Congress.

That issue won’t be settled until the hearings have been held and the inspector general’s office has issued its report. But the back story of one incident with the voter fraud report – in which two Justice officials secured changes to the summaries of their interviews for the report – suggests the department was more than a bystander in the voter fraud study.

In the appendix, which summarizes all of the expert interviews conducted for the fraud report, two Justice officials’ interviews are included: Craig Donsanto, director of the Election Crimes Branch of the Public Integrity Section, and John Tanner, chief of the Civil Rights Division’s Voting Section. In both cases, a footnote declares that “this interviewee did not agree with the consultants’ interpretation of his interview comments” and that the commission made “clarifying edits.” No such note accompanies any of the other expert interviews.

Donsanto got to see the summary of his interview because he was a technical adviser to the working group. He thought the summary erroneously implied that his unit didn’t pursue systematic fraud schemes anymore, only individual cases like voting by felons and non-citizens. He worried that civil rights groups would think their constituencies were being singled out. Peggy Sims, an election research specialist at the commission who managed the project, agreed and had it changed.

Tanner took issue with the suggestion that he had said the Department of Justice wasn’t pursuing voter-suppression cases anymore, and provided examples of cases where it was doing just that. His remarks were corrected.

Sims said that neither Donsanto nor Tanner got to weigh in on the entire report before it was released.

Such controversies are inevitable given that some lawmakers are worried about political influence on the commission and others are concerned it might grow too powerful. Elections are emotional, and even a bipartisan panel will have disagreements. When the four commissioners tried to revisit the Arizona decision, for instance, they deadlocked on party lines, something that also happens periodically to the bipartisan Federal Election Commission.

But the commission can go a long way, voting rights groups say, simply by operating with more transparency and establishing more written procedures for making decisions. “It is a relatively young agency,” said Wendy R. Weiser of the Brennan Center for Justice at the New York University School of Law. “But they’ve been around long enough that this is no longer acceptable.”

Davidson said more transparency and better procedures are her goals as well. “Definitely I hear what Congress is saying,” she said. “We’re a bipartisan commission, and we want to do the right thing.” Now, in a year when lawmakers say they’re trying to improve oversight, it’s up to Congress to decide whether it is interested enough in its own creation to help the commissioners do the right thing.

###
Who's Who on the Commission

The Election Assistance Commission was created in 2002 to help states comply with federal laws and distribute grants for voting equipment. Its members, who serve six-year terms, are nominated by the president and confirmed by the Senate.

Deborah McDowell (Republican) was appointed in 2005 and is the current chairwoman. She had been Colorado secretary of state for six years and is also the state elections director and a county clerk in suburban Denver. Her term expires in December.

Grace M. Hillman (Democrat) is a longtime figure in the voting rights movement and a former executive director of the League of Women Voters. She was president of a Washington consulting company when appointed in 2003. Her term expired in 2005, but she is serving until a replacement is named.

Carolyn C. Hunter (Republican), was deputy director of the White House Office of Public Liaison when President Bush appointed her in 2007. She is now a senior attorney for the Republican National Committee and a former U.S. attorney for the Bureau of Immigration and Naturalization Services. Her term expires in February 2011.

Rosario LeRodriguez (Democrat) was finishing her third year on the Denver City Council when she was appointed in 2007 to replace M. Marquez. She had previously been Denver City Clerk and director of the city's elections and elections for the mayor. Her term expires in December.
Commissioners,

(1) Leslie Clark of the Miami Herald plans to attend tomorrow's public meeting. Today she asked whether Florida is required to abide by EAC reply to their request. We said that EAC is the cognizant agency for most of the HAVA funding programs. We said that EAC therefore has the responsibility to advise and instruct states regarding the appropriate use of these funds consistent with the provisions of HAVA as well as circulars developed by OMB Circulars A-87 which governs the use of federal funds to purchase goods for state and local governments.

(2) Dana Burke, News Editor for the Citizen in Webster, TX is working on a story regarding voter identification requirements in Texas. She said Democrats opposed to the new legislation have referred to EAC's voter ID study and point to a correlation between more stringent voter id requirements and lower voter turnout, especially among minority groups. She noticed EAC's statement regarding a request for review, asked if the study is considered valid and whether the assessment by opponents of the legislation is correct. We sent her the following two links and replied that our Inspector General is currently reviewing the circumstances surrounding this research and that when that process is complete we'll be glad to discuss it further.

04/16/07 - EAC Requests Review of Voter ID, Vote Fraud & Voter Intimidation Research Projects

News Release: 3/30/07 - EAC to Launch Comprehensive Study of Voter ID Laws

###
Elle:
I think our number will be about 21 (with the Working Group members, consultants, possible EAC Commissioners and staff, and the court reporter). I'll have a better idea of the final list after I brief Commissioners tomorrow morning. Devon noted that they used only tent cards for the Asian Language Working Group. That might be sufficient for this group and would cut back on some of the work we have to do in preparation. --- Peggy

Elieen L. Collver/EAC/GOV

Peggy,

In preparation for the logistics of this week's working group, I need to know how many people to expect for the meeting. Also, if you still need me to make name tags, I will need a list of attendees and the Avery label size.

Also, I will need help from Laiza on the table tents, or we can see if she has the time to help with that.

Thanks!

Elle

Attached, please find my edits. My intention was to try to explain in English how the Contractor conducted the study in the 2nd graph of the background statement. I realize I left some information out; for example, how he ran the numbers based on maximum and minimum ID requirements. I am open to any suggestions on how to better describe what they did; however, despite reading the report and Appendix C many times, I am still do not understand exactly how the study was conducted. I think we should run the 2nd graph by the Contractor to ensure its accuracy.

Commissioners-

Commissioner Hunter noted that several changes to the draft that she had recommended were not included in the latest draft that I sent to Julie and Jeannie. had.

Attached please find this new version which I hope accurately reflects her suggestions; we are asking that everyone take a look at this version.

Please get me your comments and recommended edits by Monday.

EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign their name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The contractor and the EAC agree that the report raises more questions than provides answers.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, www.eac.gov.

EAC Recommendations for further study and next steps

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the

---

1 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.
2 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.
implementation of voter identification requirements, to be a first step in the
Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research and statistical methodology the
Contractor chose to employ in order to analyze voter identification requirements and the
potential variation in turnout rates based on the type of voter identification requirements.
EAC is not adopting the report submitted by the Contractor and, therefore, is not
releasing the report.

EAC will engage in a longer-term, more systematic review of voter identification
requirements. Additional study on the topic will include more than one Federal election
cycle, additional environmental and political factors that affect voter participation, and
the numerous changes in state laws and regulations related to voter identification
requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter
  identification requirements. This will include tracking states' requirements which
  require a voter to state this or her name, to sign his or her name, to match his or
  her signature to a signature on file, to provide photo or non-photo identification or
  to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or
  influence Citizen Voting Age Population (CVAP) voter participation, including
  various voter identification requirements, the competitiveness of a race and
certain environmental or political factors. EAC will use some of the information
  collected by Eagleton as well as additional data from the states to develop this
  baseline.

- Convene, by mid-2007, a working group of advocates, academics, research
  methodologists and election officials to discuss EAC's next study of voter
  identification. Topics to be discussed include methodology, specific issues to be
covered in the study and timelines for completing an EAC study on voter
  identification.

- Study how voter identification provisions that have been in place for two or more
  Federal elections have impacted voter turnout, voter registration figures, and
  fraud. Study the effects, including voter turnout, voter registration, and fraud, of
  voter identification provisions, or the lack thereof, on early, absentee and vote-by-
  mail voting. Included in this study will be an examination of the relationship
  between voter turnout and other factors such as race and gender.

- Publish a series of best practice case studies which detail a particular state's or
  jurisdiction's experiences with educating poll workers and voters about various
voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data--aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau--the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, www.eac.gov.

EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements and the potential variation in turnout rates based on the type of voter identification requirements. EAC is not adopting the report submitted by the Contractor and, therefore, is not releasing the report.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election
cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

- Publish a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
Commissioners,

I intended to get this out to you much earlier today, but the day got away from me. After our hearing last week before the House Appropriations Subcommittee and the requests that were made for the draft reports of the Eagleton and Voter Fraud studies, I think that we must take a different approach to addressing the quality of these reports. While it may or may not be our intention to release these documents publicly, we MUST respond to the request made from a Congressional Committee and cannot use FOIA exemptions as FOIA does not apply to them. I believe that it is safe to assume that if we provide these documents to the Committee, even with a letter explaining their predecisional nature, that these documents will be released into the public spectrum. As such, I feel that EAC needs to make a statement regarding the quality of these reports and why we are making (or have made) a decision not to adopt the draft reports that were produced by our contractors.

Thus, I edited the statement that Karen produced with comments that reflect why we will not adopt the Eagleton report. That document is attached below. I would suggest that we put similar statements regarding Eagleton’s report and the Voter Fraud draft report into a letter that I am drafting to go to the Committee with the requested documents. I will edit that letter to include similar comments tonight/tomorrow morning and will circulate it to you.

Please let me know if you have any questions, concerns, comments, etc.

EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of voter identification requirements to voter turnout in the 2004 election. Using two sets of data--aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau--the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the data, analysis and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a less reliable data set based upon the Current Population Survey (which was self-reported and showed a significantly
higher turnout rate than other conventional data on that point) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as “state your name.” These data and the statistical analysis used by the Contractor were rightly criticized by independent working and peer review groups comprised of social scientists and statisticians. EAC believes that the Contractor’s recommendation or draft report is so fundamentally flawed that none of the draft findings can be adopted or rehabilitated to form a reliable, accurate and useful product. Thus, EAC will not issue a report based upon this study.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that affect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Tall et al. as well as additional data from the states to develop this baseline.

- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
Is this the latest draft?

Subject: Edited version of the Voter ID statement

Commissioners,

I intended to get this out to you much earlier today, but the day got away from me. After our hearing last week before the House Appropriations Subcommittee and the requests that were made for the draft reports of the Eagleton and Voter Fraud studies, I think that we must take a different approach to addressing the quality of these reports. While it may or may not be our intention to release these documents publicly, we MUST respond to the request made from a Congressional Committee and cannot use FOIA exemptions as FOIA does not apply to them. I believe that it is safe to assume that if we provide these documents to the Committee, even with a letter explaining their predecisional nature, that these documents will be released into the public spectrum. As such, I feel that EAC needs to make a statement regarding the quality of these reports and why we are making (or have made) a decision not to adopt the draft reports that were produced by our contractors.

Thus, I edited the statement that Karen produced with comments that reflect why we will not adopt the Eagleton report. That document is attached below. I would suggest that we put similar statements regarding Eagleton's report and the Voter Fraud draft report into a letter that I am drafting to go to the Committee with the requested documents. I will edit that letter to include similar comments tonight/tomorrow morning and will circulate it to you.

Please let me know if you have any questions, concerns, comments, etc.

No need to miss a message. Get email on-the-go with Yahoo! Mail for Mobile. Get started.
John and Tom-

EAC staff are putting the finishing touches on the statement and data it will be releasing, in the next several days, related to voter identification study.

In our brief statement we will be summarizing what Rutgers/Eagleton did when performing its statistical analysis.

Could you review the following statement for accuracy and send me any revisions and edits to it by Friday March 16, 2007?

"The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The Contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election- November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign his or her name in order to receive a ballot. The Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates 1 and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau."

Footnotes:

1 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population includes persons who are not registered to vote.

2. The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S citizens.

Thanks for your feedback

Regards

Karen Lynn-Dyson

Commissioners,

Attached below are two versions of the Voter ID statement. One shows the track changes and the other shows the document having accepted all of those changes (so that it would be easier to read). Jeannie and Tom have both taken a look at this document and we think that it captures what we discussed on Wednesday.

Please take a look and let me know if this meets with your understanding of what we discussed.

EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The Contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign their name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, www.eac.gov.

EAC Recommendations for further study and next steps

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s efforts to study the possible impact of voter identification requirements.

1 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

2 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.
However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election’s statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as “state your name.” The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor’s study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

EAC is not adopting the report submitted by the Contractor and, therefore, is not releasing the EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that affect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be addressed and the potential variation in research chosen to employ in order to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as “state your name.” The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor’s study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

EAC is not adopting the report submitted by the Contractor and, therefore, is not releasing the report.

---

covered in the study and timelines for completing an EAC study on voter identification.

- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

- Publish a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election in November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign their name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, www.eac.gov.

EAC Recommendations for further study and next steps

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s efforts to study the possible impact of voter identification requirements.

---

1 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.
2 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.
However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that affect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be

Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

- Publish a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
This looks good to me, thank you Julie. Two things—did Eagleton approve the 2nd graph and I made a minor change to the 4th bullet as a point of clarification.

EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data—aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau—the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, www.eac.gov.

EAC Recommendations for further study and next steps

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s consideration of voter identification requirements.

However, EAC has concerns regarding the data, analysis and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election’s statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a less reliable data set based upon the Current Population Survey (which was self-reported and showed a significantly
higher turnout rate than other conventional data on that point) was conducted that produced only some evidence of correlation between voter identification requirements and turn out. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." These data and the statistical analysis used by the Contractor were rightly criticized by independent working and peer review groups comprised of social scientists and statisticians. EAC believes that the Contractor’s recommendation or draft report is so fundamentally flawed that none of the draft findings can be adopted or rehabilitated to form a reliable, accurate and useful product. Thus, EAC will not issue a report based upon this study.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that affect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

• Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

• Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Singleton as well as additional data from the states to develop this baseline.

• Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

• Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
• Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by state, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, www.eac.gov.

EAC Recommendations for further study and next steps

1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.
EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

• Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

• Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

• Publish a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

EAC Recommendations for further study and next steps

1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.
2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.
3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.
EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election’s statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as “state your name.” The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor’s study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that affect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

*See EAC Public Testimony, February 8, 2007, page 109.*
• Convene, in mid 2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

• Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

• Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject: Voter ID statement

Commissioners,

Attached below are two versions of the Voter ID statement. One shows the track changes and the other shows the document having accepted all of those changes (so that it would be easier to read). Jeannie and Tom have both taken a look at this document and we think that it captures what we discussed on Wednesday.

Please take a look and let me know if this meets with your understanding of what we discussed.

I think Comm Rodriquez makes a good point about the document needing a different title. Also, it is my understanding that Jeannie has not yet edited the draft and therefore has not yet considered layout, subtitles, typos, etc.

I have raised three concerns/questions in Footnotes 2 and 4 and in the bullet that address the working group meeting.

Lastly, I have lost track of where we are with consideration of releasing the full report. The draft document does not do that, however I thought there was a suggestion that we should consider releasing the full report?
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the Contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election - November 2004. For example, the turnout rate in states that required the voter to provide a photo identification document was compared to the turnout rate in 2004 in states with a requirement that voters give their birth name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates, and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony included its summary of voter identification requirements by State, a summary of court decisions and literature on voter identification and related issues, and an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

EAC Recommendations for further study and next steps

1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.
2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.
3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

Footnotes:
1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.
2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Hi --

I wanted to let you know that the VTP issued a report this morning on voter identification and registration:

As many of our recommendations involve the EAC, I thought we'd pass this along asap.

Hope this is helpful, and we certainly continue to enjoy working with the EAC!

Mike

How is that going
No problem. I am at the Holt hearing.

Sent from my BlackBerry Wireless Handheld

Jeannie. I looked over your email on the bb so my review wasn't that complet, but it looked OK to me. Sorry I am out at NIST if you want to get ahold of me

Sent from my BlackBerry Wireless Handheld

Commissioners,

Attached is a memo outlining my suggested strategy for releasing the results of your tally vote. It includes an overall message and Q&A. Please let me know if you have any questions about this information, and I look forward to your input. Thank you.

Jeannie Layson
U.S. Election Assistance Commission

Suite 1100
Washington, DC 20005
Phone: 202-566-3100
www.eac.gov
Commissioners,

I have incorporated your edits, so please take a look at the latest drafts of both documents and let me know if you have further changes. I recommend making this public on Thursday. If possible, please let me know by the end of the day on Wed. if you have additional edits. Press release edits were made in the first two paragraphs, including backing off calling this a "multi-year study," and a more direct description of the action you took -- you declined to adopt the report. The only edit in the memo is new language in the Q&A that points out that the $500K included work for both prov. voting and voter ID.

Thank you, and let me know if you have any questions.

MEMORANDUM

To: Commissioners Davidson, Rodriguez, Hunter and Hillman
Fr: Jeannie Layson
Cc: Tom Wilkey, Julie Hodgkins, Karen Lynn-Dyson, Bryan Whitener
RE: Communications Strategy for Release of Voter ID Tally Vote Results

In anticipation of the release of the results of the tally vote and all of the information provided by the contractor, I suggest taking the following steps to effectively communicate your decision. Taking this approach will help us control how the information is distributed, how it is framed, and how to focus the discussion on the positive outcome of your decision.

The bottom line is that we want to try our best to make this a story about EAC’s decision to conduct a thorough and in-depth look into the subject of voter ID, and we have decided to release the preliminary research. We do not want this to evolve into a storyline about squabbling between EAC and Eagleton.

I have provided a suggested overall message that reflects the action taken, as well as questions we should be prepared to answer.

Please let me know if you have any questions about my proposal, and I look forward to your input.
PRELIMINARY ACTIVIES
Prior to the completion of the tally vote and the subsequent release of the results and the contractor’s materials, I suggest taking the following steps:

1. Discuss EAC’s decision with the contractors in advance of distributing the press release and discussions with reporters so that they have an opportunity to respond and also so they will be well informed and prepared to discuss the facts with reporters or others who will most likely contact them.

2. Prior to release of EAC’s decision, reach out to key Hill staffers who have been following this issue, including those members who have requested this data in the past. This should include staffers for the House Appropriations Committee Subcommittee on Financial Services and General Government since the Committee requested this information a few weeks ago. It should be made clear to committee staffers that the tally vote is the culmination of a directive made by the EAC chair in Feb. that the agency move forward to complete this project. These staffers should also be included on our list of key stakeholders.

3. Executive director should determine whether there are other key stakeholders that should be made aware of this decision from EAC personally, not from a press release. Possible candidates include members of Congress, NASS, individual secretaries of state, DOJ, and NASED.

PUBLIC ROLL-OUT
Once the above preliminary steps have been completed, EAC Communications will:

1. Post the press release and the related data on the website, with a link from the home page.

2. Prior to release of the tally vote decision and related data, call Richard Whitt of USA Today, Will Lester of AP, Chris Drew of the NYT, and Zach Goldfarb of the WaPo and let them know we are about to release the information. Offer interviews with the chair or other commissioners.

3. Send the press release (with a link to the research) to all recipients in the media database. This includes national dailies, as well as wire services such as the Associated Press.

4. Send the press release (with a link to the research) to all recipients in the stakeholder database. The database consists of election officials, advocates, and other interested parties, including representatives from organizations who have been critical of EAC, including VoteTrust USA and the People for the American Way.
OVERALL MESSAGE
Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The findings of the preliminary research, which focused exclusively on the 2004 general elections, was insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors including, the many changes in state laws and regulations that have occurred since the 2004.

Q&A
We should be prepared to answer the following questions:

Q: Why not release the draft fraud report, too?
A: EAC issued a final Voting Fraud and Voter Intimidation Report in December 2006, which included recommendations adopted by the Commission to conduct a comprehensive assessment of all claims, charges and prosecutions of voting crimes.

In the case of the voter ID report, the Commission chose not to adopt a final report because it was determined that there was insufficient data to provide meaningful conclusions.

Q: You cited concerns with the contractor’s methodology and analysis. Didn’t your contract with Eagleton include specific language regarding these issues?
A: Yes, but in retrospect, perhaps we could have done a better job articulating how we wanted this research to be conducted.

Q: During the course of the project, did you see draft reports? If so, why didn’t these concerns get addressed at that time?
A: We did receive progress reports, and when we identified areas of concern, we discussed it with the contractor. It was because of these concerns that EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

Q: During the course of the contract, did you ever express these concerns with Eagleton?
A: Yes, and as a result of these conversations, EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

Q: You spent more than $500,000 for a report the Commission doesn’t think should be adopted – so basically you’re flushing a lot of money down the drain. Is this a wise use of taxpayer dollars?
A: There is value in what Eagleton provided, and this included work they did for us regarding provisional voting. As a result of the research on provisional voting, EAC
issued a set of best practices last fall. The voter ID data will help provide a baseline for how to move forward. And even though their research raised many questions, contemplating the answers to those questions has informed us on how to move forward.

**Q:** If you were not satisfied with the final product, why did you pay for it?
**A:** We adhered to the terms of the contract.

**Q:** EAC received this data in June of last year. What has taken so long to bring it to a conclusion?
**A:** This is an important issue, one that deserves careful deliberation and a thorough approach. Yes, we like to get things done quickly, but it is more important to take the time to get things right.
TRANSITION PHRASES
To stay on message and avoid being dragged into discussions about anything other than the action taken, employ the following phrases and transition back to the overall message.

**Overall Message**
Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The findings of the preliminary research, which focused exclusively on the 2004 general elections, were insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors, including the many changes in state laws and regulations that have occurred since 2004.

**Bridge/Transition Phrases**
- What’s really important here…
- The bottom line is…
- The point is…
- We have a responsibility to…
- I’ll let others speak to that, but let me tell you what’s important to EAC…
- Everyone agrees that…
EAC to Launch Comprehensive Study of Voter ID Laws

For Immediate Release
DATE, 2007

WASHINGTON – The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws. The initial research on voter identification laws are available at www.eac.gov, but because this research focused exclusively on the 2004 general elections, included populations that are not eligible to vote, and did not take into account influential factors such as the competitiveness of campaigns, it was insufficient to provide meaningful conclusions and thus the Commission declined to adopt a report based on it.

“New voter identification laws have been enacted recently and the Commission began working to determine the possible impact of these new laws,” said EAC Chair Donetta Davidson. “After careful consideration of the initial research conducted by our contractor, the Commission decided this important issue deserves a more in-depth research approach and that it should be examined beyond only one election cycle. The bottom line is that the research raises more questions than provides answers.

EAC’s strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission’s February 8, 2007, public meeting. For more information about the public meeting agenda, transcript and testimony go to http://www.eac.gov/120807.asp.

EAC’s future research on this topic will be expanded to include more than one election cycle and to examine environmental and political factors and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC’s comprehensive research approach will undertake the following activities:

- Convene a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements that require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information already collected as well as additional data from the states to develop this baseline.
• Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

• Publish a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories, and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.
Commissioners;
The tally vote memo issued on March 28, 2007 concerning the Draft Study of Identification Requirements is hereby withdrawn.
A new memo will be re-issued to you shortly.
Tom Wilkey
If we put out the press release tomorrow, how do you want to handle press interviews? Will you be available tomorrow? Would you rather wait and do it Monday?

Commissioners,
The press release, the statement, and the draft report has been posted on our site. The press release is being distributed, and is on the way to all of you and the entire EAC staff. The following activities have occurred:
1. Press release was sent in advance to Eagleton.
2. I called Wendy Weiser of the Brennan Center and sent her the info.
3. I called and sent the info to Ray M. and Paul D.
4. I sent the info to Tom Hicks and Adam A.
5. Tom called Dan Tokaji, Dan Oak, and Rep. Hinchey's office.
6. Karen gave the three EAC experts a heads up.
7. Comm. Rodriguez was interviewed by NPR (the only outlet that showed any interest), as was Eagleton. Eagleton told NPR they are glad we are expanding the scope. Interview will run on affiliates today at approximately 5:44 pm EST.
8. I offered interviews to USA Today, WaPo, NYT, and AP but none were interested.
9. I have kept Eagleton apprised of our activities.

I'll continue to keep you apprised as the day goes on, and please let me know if there's anyone else you'd like me to contact.

Jeannie Layson

Nicely done. At the Pew event in New York there was a long hot discussion with Ray on this issue at our dinner table. Leslie and Ray were for releasing and I was opposed. Doug joined in opposing as well.

EAC to Launch Comprehensive Study of Voter ID Laws

WASHINGTON - The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report, which focused on only one election cycle, was not sufficient to draw any conclusions. The Commission declined to adopt the report, but is releasing all of the data to the public.

The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at www.eac.gov. The Commission's statement regarding its decision is attached.

"After careful consideration of the initial research, the Commission decided this important issue deserves a more in-depth research approach, and that it should be examined beyond only one election cycle," said EAC Chair Donetta Davidson. "The Commission and our contractor agree that the research conducted for EAC raises more questions than provides answers."

EAC's strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission's February 8, 2007 public meeting. For more information about the public meeting, including the agenda, transcript, and testimony go to http://www.eac.gov/Public_Meeting_020807.asp.
EAC's future research on this topic will be expanded to include more than one federal election, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC's comprehensive research approach will undertake the following activities:

* Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements.

* Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation. EAC will use some of the information collected by the contractor as well as additional data from the states to develop this baseline.

* In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification.

* Study how voter identification provisions that have been in place for two or more federal elections have impacted voter turnout, voter registration figures, and fraud.

* Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

### EAC Statement on Study of Voter Identification Requirements

**Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.
The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election - November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document* was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates* and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.*

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

**EAC Declines to Adopt Draft Report**

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.* Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

*1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted
voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

*2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

*3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

Further EAC Study on Voter Identification Requirements

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

* Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

* Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

* In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

* Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

* Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification
requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

www.eac.gov 2-9-07 Eagleton Talking Pts.doc
Remarks for Thursday’s Public Meeting

In late May, 2005 this research contract awarded to The State University of New Jersey at Rutgers—the Eagleton Institute of Politics using the Ohio State University Moritz School of Law, as its subcontractor.

The portion of the contract that was awarded related to the study and analysis of voter identification requirements was to:

- Collect and analyze state legislation, administrative procedures and court cases.

- Create a state-by-state compendium of the legislation, procedures, and litigation reviewed.

- Perform an analysis of how voter identification requirements were implemented around the country and to

- Recommend alternative approaches related to the future implementation of HAVA voter identification requirements. These recommendations were to be based on a literature review of research results, a review of data on voter identification and a diagnosis of the problems and challenges related to voter identification.

This contract was extended on two occasions to allow for additional review, including an EAC-initiated review conducted by an independently convened panel of experts who provided input to Eagleton on the first draft of its statistical analysis of voter identification requirements.

The Eagleton Institute of Politics submitted its draft report to the EAC on Best Practices to Improve Voter Identification Requirements on June 28, 2006. Findings from Eagleton’s study of provisional voting (that was a part of Eagleton’s overall study) were included in EAC’s Best Practices on Provisional Voting, which were published by EAC in October 2005.
Tom-

Just wanted to check in to determine what, if anything, I need to do in order to assist with the creation and delivery of EAC's report on the Voter ID study.

I assume that we will have to issue something on or about March 8.

Finding fabulous fares is fun.
Let Yahoo! FareChase search your favorite travel sites to find flight and hotel bargains.
Commissioners-

Attached please find the draft statement on voter ID requirement in which I have attempted to incorporate your suggested changes. Those changes are highlighted in yellow and bolded.

You'll want to pay particular attention to the options for the third paragraph in which I have offered two choices:

One choice allows you to release all of Eagleton's documents, including the testimony, the 32-page report and the statistical analysis (Appendix C).

The second choice only includes the testimony and does not include the 32 page summary or the data analysis (Appendix C).

Once you have reached a consensus on one of the choices, I'll ask Jeannie to take a close look at grammar and syntax.

Thanks
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data—aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau—the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

On February 8, 2007, in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. A summary of voter identification requirements by State, court decisions and literature on voter identification and related issues court decisions, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can be found along with the contractor’s testimony, on EAC’s website: www.EAC.gov.

OR

On February 8, 2007, in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. The contractor’s full report describing the statistical and data analysis which it performed along with the testimony that was delivered summarizing this can be found on EAC’s website. A summary of voter identification requirements by State, court decisions and literature on voter identification and related issues court decisions, the statistical and data analysis of the effect of voter identification requirements on turnout, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can also be found on EAC’s website: www.EAC.gov.
EAC Recommendations for further study and next steps

EAC finds the contractor's summary of States' voter identification requirements and summary of state laws, statutes, regulations, and litigation surrounding the implementation of voter identification requirements to be an important beginning step in the Commission's consideration of voter identification requirements. From the contractor's statistical analysis and compilation of data, EAC considers it advisable to engage in a longer-term, more systematic review of voter identification requirements and is recommending that at a minimum the agency engage on an ongoing basis in:

- A state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- To collect a baseline of information on what factors may effect or influence Citizen Voting Age Population (CVAP) voter participation. At a minimum data on voter participation statistics for the 2004 and 2008 election cycles would be collected. Other factors to be examined will include various voter identification requirements, whether or not the race was "hotly" contested and, other environmental or political factors.

From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into whether voter identification requirements have had an impact over several elections on factors such as voter turnout, registration, and fraud.

EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- Convening a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout, voter registration figures, and fraud. Included in this study would be an examination of the relationship between voter turnout and race and gender;

- Publication of a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating pollworkers and voters about various voter identification requirements. Included in the case studies would be detail on the policies and practices used to educate and inform pollworkers and voters;
• A state-by-state tracking of early voting, absentee voting, and vote-by-mail policies and procedures. The data collected through this tracking would then be compared to the various state voter identification policies and procedures described above.
Attached please find the revised EAC Statement on Voter Identification requirements.

I have attempted to craft language that expresses EAC's concern with the statistical analysis and research methodology that Eagleton employed, and to capture the essence of what EAC found problematic with that analysis.

In this draft I have kept the two options as I have not heard which option the Commissioners have chosen (e.g. for the release of all or only part of the Eagleton report)
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data—aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau—the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

On February 8, 2007 in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. A summary of voter identification requirements by state, court decisions and literature on voter identification and related issues, court decisions, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can be found, along with the contractor’s testimony, on EAC’s website: www.EAC.gov.

On February 8, 2007 in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. The contractor’s full report describing the statistical and data analysis which it performed along with the testimony that was delivered summarizing this can be found on EAC’s website. A summary of voter identification requirements by state, court decisions and literature on voter identification and related issues, court decisions, the statistical and data analysis of the effect of voter identification requirements on turnout, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can also be found on EAC’s website: www.EAC.gov.
EAC Recommendations for further study and next steps

EAC finds it important to review and compile data on voter identification requirements and the implementation of voter identification requirements. A state-by-state review, reporting and tracking of voter identification requirements is recommended to engage in an ongoing basis in:

- A state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- To collect a baseline of information on what factors may effect or influence Citizen Voting Age Population (CVAP) voter participation. At a minimum data on voter participation statistics for the 2004 and 2008 election cycles would be collected. Other factors to be examined will include various voter identification requirements, whether or not the race was “hotly” contested and, other environmental or political factors.

From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into whether voter identification requirements have had an impact over several elections on factors such as voter turnout, registration, and fraud.

EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- Convening a working group of advocates, academicians, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout, voter registration figures, and fraud. Included in this study would be an examination of the relationship between voter turnout and race and gender;

- Publication of a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating pollworkers and voters about various voter identification requirements. Included in the case studies would be detail on the policies and practices used to educate and inform pollworkers and voters;
- A state-by-state tracking of early voting, absentee voting, and vote-by-mail policies and procedures. The data collected through this tracking would then be compared to the various state voter identification policies and procedures described above.
Thank you, Karen. I believe we are getting closer to a consensus. I have a few comments which I will send to everyone soon.

Karen Lynn-Dyson/EAC/GOV

Commissioners-

Attached please find the revised EAC Statement on Voter Identification requirements.

I have attempted to craft language that expresses EAC's concern with the statistical analysis and research methodology that Eagleton employed, and to capture the essence of what EAC found problematic with that analysis.

In this draft I have kept the two options as I have not heard which option the Commissioners have chosen (e.g. for the release of all or only part of the Eagleton report)

EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review of other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

On February 8, 2007 in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. A summary of voter identification requirements by State, court decisions and literature on voter identification and related issues, court decisions, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can be found along with the contractor's testimony on EAC's website: www.EAC.gov.

OR

On February 8, 2007 in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. The contractor's full report describing the statistical and data analysis which it performed along with the testimony that was delivered is summarizing this can be found on EAC's website. A summary of voter identification requirements by State, court decisions and literature on voter identification and related issues, court decisions, the statistical and data analysis of the effect of voter identification requirements on turnout, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can also be found on EAC's website: www.EAC.gov.
EAC Recommendations for further study and next steps

EAC finds the contractor's summary of States' voter identification requirements and summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements to be an important beginning step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research and statistical methodology the contractor chose to employ in order to categorize and analyze voter identification requirements. Therefore, EAC considers it advisable to engage in a longer-term, more systematic review of voter identification requirements and is recommending that additional study on the topic must take into account more than one federal election cycle, must consider additional environmental and political factors that effect voter participation, and must take into account changing state laws and regulations related to voter identification requirements. At a minimum EAC will engage on an ongoing basis in:

- A state-by-state review, reporting and tracking of voter identification requirements. This will include tracking state requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- To collect a baseline of information on what factors may effect or influence Citizen Voting Age Population (CVAP) voter participation. At a minimum data on voter participation statistics for the 2004 and 2008 election cycles would be collected. Other factors to be examined will include various voter identification requirements, whether or not the race was "hotly" contested and, other environmental and political factors.

From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into whether voter identification requirements have had an impact over several elections on factors such as voter turnout, registration, and fraud.

EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- Convening a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout, voter
registration figures, and fraud. Included in this study would be an examination of the relationship between voter turnout and race and gender;

- Publication of a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating pollworkers and voters about various voter identification requirements. Included in the case studies would be detail on the policies and practices used to educate and inform pollworkers and voters;

- A state-by-state tracking of early voting, absentee voting, and vote-by-mail policies and procedures. The data collected through this tracking would then be compared to the various state voter identification policies and procedures described above.
Karen,

I started by adopting all of the changes made to the document that you sent me. Then I made edits. Because they are so extensive, I thought it best to note them in track changes. Once you have had a chance to read them over, you can get rid of the formatting problems by "accepting all changes" to the document.

Subject Final EAC statement on Voter ID report

Julie/Jeannie-

Attached please find the final version of the EAC statement on the Voter ID report.

As indicated, the Commissioners have asked that you all review this statement for legal accuracy, grammar, syntax, etc, before it is sent to them for final review and approval.
If you could, go ahead and make the edits without track changes (as track changes seem to create printing problems)

Once you all have edited the statement I will send the final version on to them for the tally vote.

Thanks

EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review of other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied in these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data—aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau—the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

On February 8, 2007, in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. A summary of voter identification requirements by State, court decisions, and literature on voter identification and related issues court decisions, an annotated bibliography on voter identification issues and, state statutes and regulations affecting voter identification can be found along with the contractor's testimony on EAC's website: www.EAC.gov.
EAC Recommendations for further study and next steps

EAC finds the contractor's summary of States' voter identification requirements and summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements to be an important beginning step in the Commission’s consideration of voter identification requirements.

However, EAC has concerns regarding the research and statistical methodology the contractor chose to employ in order to categorize and analyze voter identification requirements. Therefore, EAC considers it advisable to engage in a longer-term, more systematic review of voter identification requirements and is recommending that additional study on the topic must take into account more than one Federal election cycle, must consider additional environmental and political factors that affect voter participation, and must take into account changing state laws and regulations related to voter identification requirements. At a minimum, EAC will engage on an ongoing basis, in:

- A state-by-state review, reporting and tracking of voter identification requirements. This will include tracking state requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- To collect a baseline of information on what factors may effect or influence Citizen Voting Age Population (CVAP) voter participation. At a minimum, data on voter participation statistics for the 2004 and 2008 election cycles would be collected. Other factors to be examined will include various voter identification requirements, whether or not the race was “hotly” contested and, other environmental or political factors.

From this ongoing review and tracking, EAC can determine the feasibility and advisability of further research and study into whether voter identification requirements have had an impact over several elections on factors such as voter turnout, registration, and fraud.

EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- Convening a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout, voter
registration figures, and fraud. Included in this study would be an examination of the relationship between voter turnout and race and gender;

- Publication of a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating pollworkers and voters about various voter identification requirements. Included in the case studies would be detail on the policies and practices used to educate and inform pollworkers and voters;

- A state-by-state tracking of early voting, absentee voting, and vote-by-mail policies and procedures. The data collected through this tracking would then be compared to the various state voter identification policies and procedures described above.
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data—aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau—the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be an important first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements. Therefore, EAC is not adopting the Contractor's full report that was submitted and is not releasing this report.

EAC will engage in a longer-term, more systematic review of voter identification requirements and the potential variation in turnout rates based on the types of voter identification requirements. EAC's additional study on the topic will include more than
one Federal election cycle, examine additional environmental and political factors that
effect voter participation, and consider the numerous changes in state laws and
regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter
identification requirements. This will include tracking states' requirements which
require a voter to state this or her name, to sign his or her name, to match his or
her signature to a signature on file, to provide photo or non-photo identification or
to swear an affidavit affirming his or her identify.

- Establish a baseline of information that will include factors that may affect or
influence Citizen Voting Age Population (CVAP) voter participation, including
various voter identification requirements, the competitiveness of a race and
certain environmental or political factors. EAC will use some of the information
collected by Eagleton as well as additional data from the states to develop this
baseline.

- Convene, by mid-2007, a working group of advocates, academics, research
methodologists and election officials to discuss EAC's next study of voter
identification. Topics to be discussed will include specific issues to be covered in the
study, research and statistical methodologies to be employed and timelines for
completing an EAC study on voter identification.

- Study how certain voter identification provisions that have been in place for two
or more Federal elections have impacted voter turnout, voter registration figures,
and fraud. Included in the study will be an examination of the relationship
between voter turnout and other factors such as race and gender.

- Publish a series of best practice case studies which detail a particular state's or
jurisdiction's experiences with educating poll workers and voters about various
voter identification requirements. Included in the case studies will be detail on
the policies and practices used to educate and inform poll workers and voters.

- Track state policies and procedures for early voting, absentee voting, and vote-by-
mail. The data collected through this tracking will then be compared to various
state voter identification policies and procedures.
Commissioners-

As requested, Jeannie Layson will take the attached statement and prepare a final version for Commissioner's review and tally vote on Monday.

Commissioners-

It appears that I may be the latest casualty of the EAC "bug". As such, I'm leaving early today and may or may not be in the office tomorrow.

Jeannie and I have spoken of her getting the next draft of the statement from the four of you and preparing the final edited draft for the tally vote.

I would imagine Tom's office can put together the tally vote for this document and get it to you all tomorrow, if you have been able to reach a consensus on the final document. If this is not seen as urgent and I am back in the office I will be happy to get the material together for Wednesday.

Introduction

Our report, submitted to the EAC last June, provided information on voter identification practices in the 2004 election. It made recommendations for best practices to evaluate future proposals for voter ID requirements. In particular, we recommended a concerted, systematic effort to collect and evaluate information on voter ID requirements and turnout from the states. This report was a companion to our report on Provisional Voting, submitted to the EAC in November 2005.

The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. Unfortunately, our colleagues from Moritz could not be with us today because of teaching obligations.

Our work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election.

Voter ID requirements are just one set of election rules that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen chooses whether to vote by comparing costs and benefits. The benefits of voting are fairly stable—and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit may be, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decreases.

We conducted our research before last year's election, when the debate over voter ID requirements was sharp and polarized. We took seriously our charge from the EAC, which was not to enter the national debate, but rather to explore if an empirical study could suggest how we might estimate the effects of different voter ID requirements on turnout. That analysis, of course, would be a sensible first step to assess tradeoffs between ballot security and ballot access and provide valuable information for all parties to the debate.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the net integrity of the ballot may not have been improved.

A key part of our work was a statistical analysis to examine how turnout may vary under different voter identification requirements. We used this statistical study to develop a model to illuminate the relationships between voter ID requirements and turnout. The model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

Tim Vercellotti led that phase of our research and will describe his methods and conclusions.

Results of Statistical Analysis

Our research included an examination of variation in turnout based on voter ID requirements in the 50 states and the District of Columbia. We examined this question using aggregate data at...
the county level gathered from the U.S. Census and other sources, and individual-level data from the November 2004 Current Population Survey.

Drawing from the research conducted by the Moritz College of Law, we were able to classify the states into one of five voter ID categories. Voters either had to:

1. state their name,
2. sign their name,
3. match their signatures to those already on file,
4. provide a non-photo ID,
5. provide a photo ID.

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity. The five categories for minimum requirements were:

1. stating one's name,
2. signing one's name,
3. matching one's signature to a signature on file,
4. providing a non-photo identification, or
5. swearing an affidavit.

Analysis of the aggregate data showed that the average turnout in states requiring photo identification as a maximum requirement was 58.1 percent compared to 64.2 percent in states that required voters to give their name as the maximum requirement. The differences were slightly smaller when we examined states in terms of their minimum requirements, with 60.1 percent of voters turning out in states that required an affidavit compared to 63 percent in states that required voters to give their name as the minimum requirement.

The analyses of aggregate data also included models that controlled for other factors that might influence turnout, such as whether a county was in a presidential battleground state, the length of time between the close of the registration period and Election Day, and the demographic composition of the county in terms of race and ethnicity, age, and household income. Controlling for those factors, the maximum requirements of providing a signature match or a non-photo identification showed a negative effect on voter turnout when compared to counties in states that only required voters to give their names. None of the voter identification requirements showed an effect on turnout, however, in the model that coded counties according to the states' minimum requirements.

Analyses of the individual-level data from the November 2004 Current Population Survey also indicated relationships between voter ID requirements and turnout. Controlling for contextual factors, such as whether a voter resided in a presidential battleground state, and demographic characteristics, such as a voter's gender, race, ethnicity, age, and education, the data showed that registered voters in states that require photo identification as a maximum requirement were 2.9 percent less likely to say they had voted compared to registered voters in states that required less to state their names. Examining states within the context of minimum identification requirements showed that registered voters in states requiring affidavits were four
percent less likely to say they had voted compared to registered voters in states that required individuals to give their names at the polling place.

Breaking down the Current Population Survey sample by race and ethnicity also revealed interesting patterns. Photo identification and affidavit requirements were negatively associated with whether white registered voters said they voted compared to their counterparts in states requiring registered voters to give their names. But African-American, Hispanic, and Asian-American registered voters in states that required photo identification as the maximum requirement or an affidavit as the minimum requirement were no less likely to say they had voted than their racial or ethnic counterparts in states that simply required voters to give their names.

The most consistent difference emerged in states that required non-photo identification as a maximum or a minimum requirement. In five of six statistical models, African-American, Hispanic, and Asian-American registered voters in non-photo identification states were less likely to say they had voted in November 2004 than their racial or ethnic counterparts in states that required voters to state their names as a maximum or minimum identification requirement.

That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements. This observation does not answer the question as to why photo identification requirements did not have a more uniform effect across groups in 2004. Of course, photo identification was a maximum requirement in only five states, and each of those states accepted another type of identification as a minimum requirement. But the finding that photo identification requirements were associated with a lower probability that white registered voters said they had voted, and the absence of a similar relationship within other racial and ethnic groups, runs counter to concerns expressed by some in the debate over voter ID. This finding points up the need for further research in this area, perhaps with a view to comparing turnout rates over time before and after a photo identification requirement takes effect, to further isolate potential relationships between photo ID requirements and turnout.

In examining the link between voter identification requirements and turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements.

Conclusions from the Research

The statistical analysis suggests that stricter voter ID requirements can be associated with lower turnout. It was not designed, however, to look at the other side of the balance equation: do tighter ID requirements reduce multiple voting or voting by ineligible voters? The scope of our research as defined by the EAC excluded assessing the dynamics and incidence of vote fraud.
We believe, however, that sound policy on voter ID should begin with an examination of the tradeoffs between ballot security and ballot access.

The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs. The EAC’s recent study of election crimes found, for example, that there has never been a comprehensive, nationwide study of voting fraud and intimidation.

Without a better understanding of the incidence of vote fraud and its relationship to voter ID, for now, best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility. Election law should provide the clarity and certainty needed to forestall destabilizing challenges to election outcomes. Absent a sound, empirical basis for striking a wise balance between voter ID and ballot access, legal challenges may increase, not just to the process but to electoral outcomes.

The analysis of litigation conducted by the Moritz College of Law for our research suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen’s right to privacy (protecting Social Security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents.

To strike that balance requires a more precise understanding of how voter ID requirements affect turnout. A first step in that direction would be to encourage or require states to collect and report additional data, including:
- The reasons potential voters are required to cast a provisional ballot and
- The reasons for rejecting provisional ballots.

Recommendations for consideration and action by the EAC

1. Encourage or sponsor further research to clarify the connection between voter ID requirements and the number of potential voters able to cast a ballot that is counted.

2. Recommend as a best practice the publication of a “Voting Impact Statement” by states as they assess their voter ID requirements. The analysis will help focus the attention of the public and policy-makers on the tradeoff between ballot access and ballot security. A “Voter Impact Statement,” to be drafted and offered for public review and comment before the adoption of new identity requirements, would estimate the number and demographics of:
   - Eligible, potential voters who may be kept from the polls or prevented from casting a provisional ballot by a stricter ID requirement; and
   - Assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

The data collection and analysis recommended in this report would help make feasible an empirically-based assessment of the effects on voter participation of proposed identification requirements. That assessment could improve the quality of the debate on this polarizing topic.

---

3. Encourage or require the states to collect and report reliable, credible information on the relationship between ballot access and ballot security. A compilation by EAC of this information would provide a factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.

4. Encourage or require states to sponsor surveys of voters to be conducted by local election officials. Such surveys would determine why those who cast a provisional ballot were found ineligible to cast a regular ballot and illuminate the frequency with which ID issues divert voters into the provisional ballot line. The connection between Voter ID requirements and provisional ballots is, of course, close. Voters who lack required ID will likely vote provisionally, thus placing greater demands on a system that may be hard pressed to meet those demands. Asking voters what they know about ID requirements would also provide useful context for evaluating the effect of those requirements on electoral participation.2

5. Recommend as a best practice that state election officials conduct spot checks on how the identification process actually works at polling places. These spot checks could provide information on how closely actual practice tracks statutory or regulatory requirements.

6. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In 11 states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots, and the safe harbor provision in presidential elections.

A final thought

A voting system that requires voters to produce an ID may prevent the ineligible from voting. It may also prevent some eligible voters from casting a ballot. If the ID requirements block a few ineligible voters from the polls at the cost of preventing an equal or greater number of eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and what form that requirement should take) will weigh value judgments as well as available factual evidence. We did our work on the premise that increased understanding of the facts relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

2 Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it.
We hope that premise is realistic, and we also hope that this research has helped the Commission and the interested public to clarify their thinking on this polarizing topic.

On behalf of the Eagleton – Moritz research team, we thank you for the opportunity to contribute to the national debate.

IV. Commissioners Q&A

V. Chair Closes Eagleton Portion of Public Meeting

- Obviously many questions have been raised today.
- Next step is for EAC to determine how to move forward.
- I request that Tom instruct staff to provide recommendations on how to proceed within the next 30 days.
- Once we determine how to move forward and what the final culmination of this initial research will be, we will notify everyone.
- Thank you Tom and Tim for your hard work and efforts in the study of this important topic.
Remarks for Thursday’s Public Meeting

In late May, 2005 this research contract awarded to The State University of New Jersey at Rutgers-- The Eagleton Institute of Politics using the Ohio State University Moritz School of Law, as its subcontractor.

The portion of the contract that was awarded related to the study and analysis of voter identification requirements was to:

- Collect and analyze state legislation, administrative procedures and court cases.
- Create a state-by-state compendium of the legislation, procedures, and litigation reviewed.
- Perform an analysis of how voter identification requirements were implemented around the country and to
- Recommend alternative approaches related to the future implementation of HAVA voter identification requirements. These recommendations were to be based on a literature review of research results, a review of data on voter identification and a diagnosis of the problems and challenges related to voter identification.

This contract was extended on two occasions to allow for additional review, including an EAC-initiated review conducted by an independently convened panel of experts who provided input to Eagleton on the first draft of its statistical analysis of voter identification requirements.

The Eagleton Institute of Politics submitted its draft report to the EAC on Best Practices to Improve Voter Identification Requirements on June 28, 2006. Findings from Eagleton’s study of provisional voting (that was a part of Eagleton’s overall study) were included in EAC’s Best Practices on Provisional Voting, which were published by EAC in October 2005.
This agenda includes the name of the Eagleton doc, "Best Practices to Improve Voter Identification Requirements." Based on the feedback from this morning, I think it should simply be labeled as "Briefing on Eagleton's Research on Voter Identification."

Executive Summary

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data, aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau, the contractor found the overall relationship between the stringency of ID requirements and turnout to be fairly small, but statistically significant.

Based on the Eagleton Institute year-long inquiry into voter identification requirements, EAC will implement one or more of the following recommendations:

- Further research into the connection between voter ID requirements and the number of ballots cast and counted;
- A state-by-state review of the impact that voter ID requirements are having on voter's participation;
- A state-by-state review of the relationship between ballot access and ballot security and the number of voters whose ballot is counted;
- A state-by-state review of time periods between voters casting of provisional ballots and the time allowed to return with an ID as well as a review of acceptable forms of identification other than photo ID.
Introduction

This study was conducted at a time in which considerable attention is being paid to the issue of voter identification. Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for multiple voting or voting by those who are not eligible. The goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. Opponents of stricter ID requirements seek to ensure board access to a regular ballot. There is a fear that some voters -- racial and ethnic minorities, young and elderly voters-- lack convenient access to required ID documents, or that these voters may be fearful of submitting their ID documents for official scrutiny.

This report considers policy issues associated with the voter ID debate. It examines the relationships between voter ID requirements and voter turnout along with the various policy implications of the issue.

Methodology of the Study

In May 2005, under contract with the EAC, the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University undertook a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. The contract also included research and study related to provisional voting requirements. These research findings were submitted and reviewed by the EAC as a separate study.

The Eagleton Institute of Politics gathered information on the voter identification requirements in 50 states and the District of Columbia for 2004. Based on interpretations of state statutes and supplemental information provided through conversations with state election officials, state ID requirements were divided into five categories, with each category of identification more rigorous than the one preceding: stating name, signing name, signature match, presenting an ID, and the most rigorous, presenting a government photo ID. The Eagleton Institute also categorized and identified each state according to maximum and minimum identification requirements. Maximum requirements refer to the most that voters may be asked to do or show at the polling place. Minimum requirements refer to the most that voters can be required to do or show in order to cast a regular ballot. These definitions and the subsequent state-by-state analysis of voter identification requirements omitted those cases in which a particular voter’s eligibility might be questioned using a state’s voter ballot challenge process.

Two data sets were used to apply the criteria (variables) that were developed above: aggregate voter turnout data at the county level which was gathered from the EAC’s 2004 Election Day Survey and; reports of individual voters collected through the November 2004 Current Population Survey administered by the U.S. Census Bureau. Use of EAC
survey data and Census Bureau CPS data provided a way to cross-check the validity of the analysis and conclusions that would be drawn regarding the effect of voter ID requirements on voter turnout.

**Study Oversight and Methodological Review**

A draft of the Eagleton Institute report and findings on voter identification requirements was critiqued by a peer review group convened by the Eagleton Institute. A second review of the study’s research and statistical methodologies was conducted using a group of research and statistical experts independently convened by the EAC. Comments and insights of the peer review group members were taken into account in the drafting of a study report although there was not unanimous agreement among the individual reviewers regarding the study findings and recommendations.

**Summary of the Research**

**Maximum and Minimum Voter Identification Requirements**

In order to analyze what, if any, correlation may exist between a State’s voter identification requirements and voter turnout, the Eagleton Institute first coded a state according to how demanding its voter ID requirement was. The voter ID requirement, ranked from lowest to highest was as follows: stating one’s name, signing one’s name, matching one’s signature to a signature on file, providing a form of identification and, providing a form of photo identification. Several possible caveats to this ranking system were noted. For all states which had photo identification requirements in 2004, voters
without a photo ID were permitted to cast a regular ballot after signing an affidavit regarding his or her identity and eligibility. These voters were also allowed to provide other forms of ID. The researchers also noted that while each state may be assigned to a category, that categorization may not reflect the actual practice related to voter identification that may or may not have taken place at many polling places.

Research performed for this study by the Moritz College of Law found that states had five different types of maximum identification requirements in place on Election Day 2004. For the purposes of this study a requirement that called for a signed affidavit or the provision of other forms of ID was considered the most rigorous or the “maximum” requirement. At the polling place voters were asked to:

- State his or her name (10 states)
- Sign his or her name (13 states and the District of Columbia)
- Sign his or her name, which would be matched to a signature on file (seven states)
- Provide a form of identification that did not necessarily include a photo (15 states)
- Provide a photo identification (five states)

Using the same criteria, but applying them as minimum rather than maximum criteria for voting the research showed: (check this section- it doesn’t really make sense)

- State his or her name (12 states)
- Sign his or her name (14 states and the District of Columbia)
- Matching the voter’s signature to the signature on file (6 states)
- Provide a non-photo identification (14 states)
- Swear by an affidavit (4 states)

The results of the research are summarized in Table 1.

Election laws in several states offer exceptions to these ID requirements if potential voters lack the necessary form of identification. Laws in these states set a minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. In 2004 none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID were allowed to vote in all states, if he or she was able to meet another ID requirement.

**The Relationship of Voter Identification Requirements to Voter Turnout**

A statistical analysis examining the variation in turnout rates based on the type of voter ID required by each state in the 2004 election was conducted using two sets of data: 1) aggregate turnout data at the county level for each state (compiled by the Eagleton Institute of Politics—footnote about how they collected the data) and 2) individual level survey data included in the November 2004 Current Population Survey (CPS), conducted by the U.S. Census Bureau.
The analysis looked at the voter identification requirements as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements were ranked according to how demanding they were judged to be, with photo identification considered to be the most demanding requirement (what about affidavit?????). Used as discrete variable, the statistical analysis considered stating the name as the least demanding ID requirement; the other ID requirements were then compared to that requirement.

**Aggregate-level statistical analysis**

The statistical analysis performed by the Eagleton Institute of Politics found that when averaging across counties in each state, statewide turnout is negatively correlated to maximum voter identification requirements ($r=-.30, p < .05$). When a statistical analysis is performed on the other minimum voter ID requirements (with affidavit being the most demanding requirement), the correlation between voter identification and turnout is negative, but not statistically significant ($r=-.20, p=.16$). These findings would suggest that the relationship between turnout rates and minimum requirements may not be linear.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend was found when analyzing minimum ID requirements: Sixty-three percent of the voting age population turned out in states requiring voters to state their name, compared to 60.1 percent in states that required an affidavit from voters. This analysis showed there was not a clear, consistent linear relationship between turnout and minimum identification requirements.

(insert table 2- Variation in 2004 State Turnout Based on Voter Identification Requirements)

**Multivariate models of analysis using aggregate-level data**

The Eagleton Institute of Politics performed an additional analysis that would estimate the effects of voter identification requirements, that took into account the electoral context in 2004 and, the demographic characteristics of the population in each county. The model also considers such variables as whether or not the county was 1) in a presidential battleground state, 2) if the county was in a state with a competitive race for government and/or the U.S. Senate, 3) the percentage of voting-age population in each county that was Hispanic or African-American 4) the percentage of county residents age 65 and older, 5) the percent of county residents below the poverty line, and 6) the number of days between each state’s registration deadline and the election.
The results of this statistical modeling and subsequent analysis indicated that the stricter voter ID requirements of matching a voter’s signature to a signature on file or with presenting a non-photo identification are associated with lower voter turnout when compared to voter turnout in states that required voters to simply state his or her name. These conclusions were reached when variables 1-5 listed above were held constant.

Other results from the Eagleton Institute analysis of stricter voter identification requirements showed that:

- Increased voter turnout was associated with whether the county was in a battleground state or whether that state have a competitive race for governor and/or U.S. Senate.

- A slight negative effect on turnout was correlated with those state’s with a longer time between the closing date for registration and the election.

- Voter turnout declined as the percentage of Hispanics in a county’s population increased.

- Higher turnout (and a positive correlation) was associated with a higher percentage of senior citizens and household median income.

- The percentage of African-Americans in the county did not have a significant effect on turnout.

The Eagleton Institute analysis of minimum voter identification requirements showed that:

- A relationship between minimum voter ID requirements and turnout was not demonstrated.

- Battleground states and those with competitive state races had a significant and positive correlation to turnout.

- A higher percentage of senior citizens in the county and higher household median income were associated with higher turnout and showed a positive correlation to turnout.

- The percentage of Hispanics in the county was associated with reduced turnout.

- The increased number of days between the closing date for registration was associated with reduced turnout.

The analysis of these aggregate, county-level data showed a significant correlation, between maximum voter identification requirements (a signature match and non-photo
identification, but not a photo identification) and lower turnout in the 2004 election. This correlation was also significant when compared to the minimum voter ID requirement of the voter simply having to state his or her name.

**Multivariate analysis using individual level turnout data**

This analysis which used November 2004 Current Population Survey data conducted by the U.S. Census Bureau is based on reports from self-described registered voters. Not included in the analysis are persons who said they are not registered to vote, those who said they cast absentee ballots and those who said they were not U.S. citizens. The CPS’ Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. (why is the N is Table 5 54,973?)

In addition to the five maximum voter identification requirements (enumerated on page XX) the analysis performed included other socioeconomic, demographic and political factors that could have influenced turnout in the 2004 election. These independent variables were analyzed against the dependent variable of whether or not the respondent said he or she voted in the November 2004 election.

In this analysis three of the voter identification requirements were shown to have a statistically significant correlation with whether or not the survey respondents said they have voted in 2004. Lower voter turnout was associated with:

- those states with maximum voter requirements to sign one’s name,
- those states with maximum voter requirements to provide a non-photo ID or photo ID, or
- those states with the minimum voter requirement to swear by an affidavit in order to cast a ballot without the state required identification

Increased voter turnout showed:

- A significant correlation with the competitiveness of the Presidential race (explain).
- African-American voters were more likely than white or other voters to say they have voted.
- Income and marital status were positive predictors of voting (high income or low income, single, married?),
- Women were more likely to say they voted than men.
- Those ages 45 to 64 and 65 and older were more likely to say they voted than those ages 18 to 24.
- Those who earned a high school diploma, attended some college, graduated from college or attended graduate school were more likely to say they have voted than those who had not finished high school.
Analysis of the predicted probability of voter turnout using the individual data

Using this Census Bureau Current Population Survey data the Eagleton Institute of Politics performed an additional statistical analysis in which they calculated the effect of various independent variables on the probability that a respondent said he or she voted. This analysis, involving 54,973 voters cross-tabulated the maximum and minimum voter identification requirements in each state with the five levels of voting requirements: stating name, signing name, matching the signature, a non-photo ID, photo-ID signing an affidavit. The results of these Predicted Probability of Voter Turnout for all Voter tabulations are summarized in Table 3 below:

From this analysis, the Eagleton Institute of Politics found that three of the voter identification requirements (which ones?) exerted a statistically significant, negative effect on whether or not the CPS survey respondents said they had voted in 2004. That is, compared to states that require voters to only state their name, those states which require the voter to sign his or her name, to provide a non-photo ID, or to provide a photo ID as a maximum requirement, were shown to have a negative influence on turnout. Also, a negative influence on turnout was found when comparing those states that require voters to only state their name, as compared to those states which have as a minimum requirement for verifying voter ID, signing an affidavit.

This probability analysis also found that the competitiveness of the presidential race had a significant effect on turnout as well as some significant demographic and educational effects. For the entire voting population signature, non-photo identification and photo identification requirements were all associated with lower turnout rates compared to the requirements that voter simply state their names. The analysis further found that:

- The predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names and that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to only having to state one’s name.

- Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. African American and Asian-American voters were about 6 percent less likely, while white voters were about 2 percent less likely.

- Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, while they were 6.1
percent less likely to vote where non-photo identification was the minimum requirement.

- For those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in those states that required an affidavit as the minimum requirement. These percentages were arrived at when comparing these states to ones that use as a minimum or maximum requirement, the voter to merely state his or her name.

Conclusions from the statistical analysis

The statistical analysis found that as voter identification requirements vary, so do voter turnout rates. These findings were borne out through analyses conducted on aggregate data and individual-level data. There were, however, some distinctions found depending upon whether or not the state's particular voter identification requirements were set as minimums or maximums.

- The overall relationship between voter identification requirements and turnout for all registered voters was found to be small but statistically significant.

- Using the aggregate data the signature match and the non-photo identification requirement correlated with lower turnout. The photo identification requirement did not have a statistically significant effect.

- In the individual-level data the signature, no-photo identification and photo identification requirement were all correlated with lower turnout when compared to the requirements that voter simply state their names.

- Across various demographic groups (African-Americans, Asian-Americans and Hispanics) a statistically significant relationship was found between the non-photo identification requirement and voter turnout.

Caveats to the Analysis

The Eagleton Institute for Politics and the EAC make note that while this analysis is a good beginning, significant questions remain regarding the relationship between voter identification requirements and turnout. These analyses are unable, for example, to capture how or why identification requirements might lower turnout. That is, is it because voters are aware of the identification requirements and stay away from the polls because of them? Alternatively, do the requirements result in some voters being turned away when they cannot provide the identification, or must cast a provisional ballot?
Knowing more about the “on the ground” experience of voters regarding various identification requirements will guide state and local level policy markers in their efforts to educate voters about the requirements. These experiences could also help instruct election judges on how to handle questions and possible disputes over voter identification requirements.

Public Policy and Administrative Considerations

Voter Identification, often described as the critical step in protecting the integrity of the ballot, is a process which can ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot. A voting system that requires voters to produce an identification document or documents may prevent the ineligible from voting, but also may prevent the eligible from casting a ballot.

Evaluating the effect of different voter identification regimes can be most effective when based on clear legal, equitable and practical standards. The questions outlined below might point policymakers to standards that can be created around voter identification requirements.

1. Is the voter ID system designed on the basis of valid and reliable empirical studies the will address concerns regarding certain types of voting fraud?
2. Does the voter ID requirement comply with the letter and spirit of the Voting Rights Act?
3. How effective is the voter ID requirement on increasing the security of the ballot and can it be coordinated with the statewide voter registration database?
4. How feasible is the voter identification requirement? That is, are there administrative or budgetary considerations or concerns? How easy or difficult will it be for pollworkers who must administer the requirement?
5. How cost effective is the voter ID system? That is, what are the monetary and non-monetary costs to the voter and to the state for implementing the ID system?
6. If voter ID requirements are shown to reduce voter turnout (generally, or with some particular groups), what possible steps should be taken to ameliorate this problem?

Recommendations and Next Steps

As the Federal agency charged with informing election officials and the public about various issues related to the administration of elections EAC believes it should, in its capacity as a supporter of elections research, undertake additional study into the topic of voter identification requirements and the implementation of them in the following ways:

- Longitudinal studies of jurisdictions that have changed voter identification requirements.
• State-by-state and precinct-level analyses that will examine the correlations between various voter identification requirements and voter registration and turnout

• Alternative forms and methods for verifying a voter’s identity.

• Continuing research into the connection between various voter identification requirements and the number of ballots cast and counted

• A continuing state-by-state update on changes to voter identification requirements.

• Continued collection of state-by-state data which will help examine the impact that voter identification requirements are having on the number of voters who are casting provisional ballots because of voter identification verification issues.

Court Decisions

Appendix C: Annotated Bibliography on Voter Identification Issues
EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first-time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data—aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau—the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic which are detailed in the attached report.

EAC Recommendations for further study and next steps

EAC finds this initial review of States' voter identification requirements, state laws and litigation surrounding the implementation of voter identification requirements an important beginning step in its consideration of voter identification requirements. From this study and compilation of data EAC considers it advisable to engage in a longer-term, systematic review of voter identification requirements and is recommending that at a minimum the agency engage on an ongoing basis in:

- A state-by-state review, reporting and tracking of voter identification requirements.

- A review and study of how voter identification requirements are implemented and how these practices may vary from state law and statute.
From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into how voter identification requirements have had an impact over time on factors such as voter turnout and voter registration.

EAC believes that the findings from this initial study of voter identification requirements are helping inform additional studies it is conducting on a variety of related topics. The EAC study on first time voters who have registered to vote by mail and several forthcoming studies related to voter registration processes will provide necessary additional data to help inform discussions and debate related to ballot access and ballot security. The EAC also anticipates that follow-on study it does related to election crimes and various aspects of voting accessibility will also help inform and guide these ballot security and ballot access discussions.

Finally, EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout and voter registration figures;

- A research study which examines, in greater detail, the relationship between race and voter turnout, and race and methods for registering voters;

- Studies on the inter-relationship between various voter registration processes, voter turnout and number of election crimes reported or litigated;

- Publication of a series of case studies which detail a particular state’s or jurisdiction’s experiences with various voter identification and voter registration regimes;

- A policy paper or memorandum exploring the alternatives to current voter identification processes and regimes.
Chair-

Attached please find a draft of a very brief introduction that could accompany the Eagleton report on voter identification requirements.

I am out of the office for the next several days. However, when I return I will provide you with a list of possible questions the Commissioners may want to pose during the March public meeting.

Regards-

Chair Davidson and Tom-

You may recall that during your last Commissioner's meeting you requested that a draft of the EAC Voter ID report be ready by January 5. Attached please find the first draft of such a report that I have prepared, based on the Eagleton Voter ID report and study.

There are several points in the document where I raise questions about the data or Eagleton's findings from their analysis. Certainly, before we would publish this report, we would need Eagleton to review it and to verify that we have accurately represented their findings and conclusions.

Hopefully, this is a first good step towards publishing something on voter Identification. I look forward to your suggestions for next steps.

EAC Report on Voter Identification

Executive Summary

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data, aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau, the contractor found the overall relationship between the stringency of ID requirements and turnout to be fairly small, but statistically significant.

Based on The Eagleton Institute year-long inquiry into voter identification requirements EAC will implement one or more of the following recommendations:

- Further research into the connection between voter ID requirements and the number of ballots cast and counted;
- A state-by-state review of the impact that voter ID requirements are having on voter’s participation;
- A state-by-state review of the relationship between ballot access and ballot security and the number of voters whose ballot is counted;
- A state-by-state review of time periods between voters casting of provisional ballots and the time allowed to return with an ID as well as a review of acceptable forms of identification other than photo ID.
Introduction

This study was conducted at a time in which considerable attention is being paid to the issue of voter identification. Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for multiple voting or voting by those who are not eligible. The goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. Opponents of stricter ID requirements seek to ensure board access to a regular ballot. There is a fear that some voters -- racial and ethnic minorities, young and elderly voters-- lack convenient access to required ID documents, or that these voters may be fearful of submitting their ID documents for official scrutiny.

This report considers policy issues associated with the voter ID debate. It examines the relationships between voter ID requirements and voter turnout along with the various policy implications of the issue.

Methodology of the Study

In May 2005, under contract with the EAC, the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University undertook a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. The contract also included research and study related to provisional voting requirements. These research findings were submitted and reviewed by the EAC as a separate study.

The Eagleton Institute of Politics gathered information on the voter identification requirements in 50 states and the District of Columbia for 2004. Based on interpretations of state statutes and supplemental information provided through conversations with state election officials, state ID requirements were divided into five categories, with each category of identification more rigorous than the one preceding: stating name, signing name, signature match, presenting an ID, and the most rigorous, presenting a government photo ID. The Eagleton Institute also categorized and identified each state according to maximum and minimum identification requirements. Maximum requirements refer to the most that voters may be asked to do or show at the polling place. Minimum requirements refer to the most that voters can be required to do or show in order to cast a regular ballot. These definitions and the subsequent state-by-state analysis of voter identification requirements omitted those cases in which a particular voter's eligibility might be questioned using a state's voter ballot challenge process.

Two data sets were used to apply the criteria (variables) that were developed above: aggregate voter turnout data at the county level which was gathered from the EAC's 2004 Election Day Survey and; reports of individual voters collected through the November 2004 Current Population Survey administered by the U.S. Census Bureau. Use of EAC
survey data and Census Bureau CPS data provided a way to cross-check the validity of the analysis and conclusions that would be drawn regarding the effect of voter ID requirements on voter turnout.

Study Oversight and Methodological Review

A draft of the Eagleton Institute report and findings on voter identification requirements was critiqued by a peer review group convened by the Eagleton Institute. A second review of the study's research and statistical methodologies was conducted using a group of research and statistical experts independently convened by the EAC. Comments and insights of the peer review group members were taken into account in the drafting of a study report although there was not unanimous agreement among the individual reviewers regarding the study findings and recommendations.

Summary of the Research

Maximum and Minimum Voter Identification Requirements

In order to analyze what, if any, correlation may exist between a State's voter identification requirements and voter turnout, the Eagleton Institute first coded a state according to how demanding its voter ID requirement was. The voter ID requirement, ranked from lowest to highest was as follows: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification and, providing a form of photo identification. Several possible caveats to this ranking system were noted. For all states which had photo identification requirements in 2004, voters
without a photo ID were permitted to cast a regular ballot after signing an affidavit regarding his or her identity and eligibility. These voters were also allowed to provide other forms of ID. The researchers also noted that while each state may be assigned to a category, that categorization may not reflect the actual practice related to voter identification that may or may not have taken place at many polling places.

Research performed for this study by the Moritz College of Law found that states had five different types of maximum identification requirements in place on Election Day 2004. For the purposes of this study a requirement that called for a signed affidavit or the provision of other forms of ID was considered the most rigorous or the “maximum” requirement. At the polling place voters were asked to:

- State his or her name (10 states)
- Sign his or her name (13 states and the District of Columbia)
- Sign his or her name, which would be matched to a signature on file (seven states)
- Provide a form of identification that did not necessarily include a photo (15 states)
- Provide a photo identification (five states)

Using the same criteria, but applying them as minimum rather than maximum criteria for voting the research showed: (check this section- it doesn’t really make sense)

- State his or her name (12 states)
- Sign his or her name (14 states and the District of Columbia)
- Matching the voter's signature to the signature on file (6 states)
- Provide a non-photo identification (14 states)
- Swear by an affidavit (4 states)

The results of the research are summarized in Table 1.

Election laws in several states offer exceptions to these ID requirements if potential voters lack the necessary form of identification. Laws in these states set a minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. In 2004 none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID were allowed to vote in all states, if he or she was able to meet another ID requirement.

The Relationship of Voter Identification Requirements to Voter Turnout

A statistical analysis examining the variation in turnout rates based on the type of voter ID required by each state in the 2004 election was conducted using two sets of data: 1) aggregate turnout data at the county level for each state (compiled by the Eagleton Institute of Politics-footnote about how they collected the data) and 2) individual level survey data included in the November 2004 Current Population Survey (CPS), conducted by the U.S. Census Bureau.
The analysis looked at the voter identification requirements as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements were ranked according to how demanding they were judged to be, with photo identification considered to be the most demanding requirement (what about affidavit???). Used as discrete variable, the statistical analysis considered stating the name as the least demanding ID requirement; the other ID requirements were then compared to that requirement.

**Aggregate-level statistical analysis**

The statistical analysis performed by the Eagleton Institute of Politics found that when averaging across counties in each state, statewide turnout is negatively correlated to maximum voter identification requirements ($r = -.30$, $p$ less than .05). When a statistical analysis is performed on the other minimum voter ID requirements (with affidavit being the most demanding requirement), the correlation between voter identification and turnout is negative, but not statistically significant ($r = -.20$, $p = .16$). These findings would suggest that the relationship between turnout rates and minimum requirements may not be linear.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend was found when analyzing minimum ID requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their name, compared to 60.1 percent in states that required an affidavit from voters. This analysis showed there was not a clear, consistent linear relationship between turnout and minimum identification requirements.

*(insert table 2- Variation in 2004 State Turnout Based on Voter Identification Requirements)*

**Multivariate models of analysis using aggregate-level data**

The Eagleton Institute of Politics performed an additional analysis that would estimate the effects of voter identification requirements, that took into account the electoral context in 2004 and, the demographic characteristics of the population in each county. The model also considers such variables as whether or not the county was 1) in a presidential battleground state, 2) if the county was in a state with a competitive race for government and/or the U.S. Senate, 3) the percentage of voting-age population in each county that was Hispanic or African-American 4) the percentage of county residents age 65 and older, 5) the percent of county residents below the poverty line, and 6) the number of days between each state’s registration deadline and the election.
The results of this statistical modeling and subsequent analysis indicated that the stricter voter ID requirements of matching a voter's signature to a signature on file or with presenting a non-photo identification are associated with lower voter turnout when compared to voter turnout in states that required voters to simply state his or her name. These conclusions were reached when variables 1-5 listed above were held constant.

Other results from the Eagleton Institute analysis of stricter voter identification requirements showed that:

- Increased voter turnout was associated with whether the county was in a battleground state or whether that state have a competitive race for governor and/or U.S. Senate.

- A slight negative effect on turnout was correlated with those state’s with a longer time between the closing date for registration and the election.

- Voter turnout declined as the percentage of Hispanics in a county’s population increased.

- Higher turnout (and a positive correlation) was associated with a higher percentage of senior citizens and household median income.

- The percentage of African-Americans in the county did not have a significant effect on turnout.

The Eagleton Institute analysis of minimum voter identification requirements showed that:

- A relationship between minimum voter ID requirements and turnout was not demonstrated.

- Battleground states and those with competitive state races had a significant and positive correlation to turnout.

- A higher percentage of senior citizens in the county and higher household median income were associated with higher turnout and showed a positive correlation to turnout.

- The percentage of Hispanics in the county was associated with reduced turnout.

- The increased number of days between the closing date for registration was associated with reduced turnout.

The analysis of these aggregate, county-level data showed a significant correlation, between maximum voter identification requirements (a signature match and non-photo
identification, but not a photo identification) and lower turnout in the 2004 election. This correlation was also significant when compared to the minimum voter ID requirement of the voter simply having to state his or her name.

Multivariate analysis using individual level turnout data

This analysis which used November 2004 Current Population Survey data conducted by the U.S. Census Bureau is based on reports from self-described registered voters. Not included in the analysis are persons who said they are not registered to vote, those who said they cast absentee ballots and those who said they were not U.S. citizens. The CPS' Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. (why is the N is Table 3 54,973?)

In addition to the five maximum voter identification requirements (enumerated on page XX) the analysis performed included other socioeconomic, demographic and political factors that could have influenced turnout in the 2004 election. These independent variables were analyzed against the dependent variable of whether or not the respondent said he or she voted in the November 2004 election.

In this analysis three of the voter identification requirements were shown to have a statistically significant correlation with whether or not the survey respondents said they have voted in 2004. Lower voter turnout was associated with:

- those states with maximum voter requirements to sign one’s name,
- those states with maximum voter requirements to provide a non-photo ID or photo ID, or
- those states with the minimum voter requirement to swear by an affidavit in order to cast a ballot without the state required identification

Increased voter turnout showed:

- A significant correlation with the competitiveness of the Presidential race (explain).
- African-American voters were more likely than white or other voters to say they have voted.
- Income and marital status were positive predictors of voting (high income or low income, single, married?),
- Women were more likely to say they voted than men.
- Those ages 45 to 64 and 65 and older were more likely to say they voted than those ages 18 to 24.
- Those who earned a high school diploma, attended some college, graduated from college or attended graduate school were more likely to say they have voted than those who had not finished high school.
Analysis of the predicted probability of voter turnout using the individual data

Using this Census Bureau Current Population Survey data the Eagleton Institute of Politics performed an additional statistical analysis in which they calculated the effect of various independent variables on the probability that a respondent said he or she voted. This analysis, involving 54,973 voters cross-tabulated the maximum and minimum voter identification requirements in each state with the five levels of voting requirements: stating name, signing name, matching the signature, a non-photo ID, photo-ID signing an affidavit. The results of these Predicted Probability of Voter Turnout for all Voter tabulations are summarized in Table 3 below:

From this analysis, the Eagleton Institute of Politics found that three of the voter identification requirements (which ones?) exerted a statistically significant, negative effect on whether or not the CPS survey respondents said they had voted in 2004. That is, compared to states that require voters to only state their name, those states which require the voter to sign his or her name, to provide a non-photo ID, or to provide a photo ID as a maximum requirement, were shown to have a negative influence on turnout. Also, a negative influence on turnout was found when comparing those states that require voters to only state their name, as compared to those states which have as a minimum requirement for verifying voter ID, signing an affidavit.

This probability analysis also found that the competitiveness of the presidential race had a significant effect on turnout as well as some significant demographic and educational effects. For the entire voting population signature, non-photo identification and photo identification requirements were all associated with lower turnout rates compared to the requirements that voter simply state their names. The analysis further found that:

- The predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names and that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to only having to state one’s name.

- Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. African American and Asian-American voters were about 6 percent less likely, while white voters were about 2 percent less likely.

- Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, while they were 6.1
percent less likely to vote where non-photo identification was the minimum requirement.

- For those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in those states that required an affidavit as the minimum requirement. These percentages were arrived at when comparing these states to ones that use as a minimum or maximum requirement, the voter to merely state his or her name.

Conclusions from the statistical analysis

The statistical analysis found that as voter identification requirements vary, so do voter turnout rates. These findings were borne out through analyses conducted on aggregate data and individual-level data. There were, however, some distinctions found depending upon whether or not the state's particular voter identification requirements were set as minimums or maximums.

- The overall relationship between voter identification requirements and turnout for all registered voters was found to be small but statistically significant.

- Using the aggregate data the signature match and the non-photo identification requirement correlated with lower turnout. The photo identification requirement did not have a statistically significant effect.

- In the individual-level data the signature, no-photo identification and photo identification requirement were all correlated with lower turnout when compared to the requirements that voter simply state their names.

- Across various demographic groups (African-Americans, Asian-Americans and Hispanics) a statistically significant relationship was found between the non-photo identification requirement and voter turnout

Caveats to the Analysis

The Eagleton Institute for Politics and the EAC make note that while this analysis is a good beginning, significant questions remain regarding the relationship between voter identification requirements and turnout. These analyses are unable, for example, to capture how or why identification requirements might lower turnout. That is, is it because voters are aware of the identification requirements and stay away from the polls because of them? Alternatively, do the requirements result in some voters being turned away when they cannot provide the identification, or must cast a provisional ballot?
Knowing more about the “on the ground” experience of voters regarding various identification requirements will guide state and local level policy markers in their efforts to educate voters about the requirements. These experiences could also help instruct election judges on how to handle questions and possible disputes over voter identification requirements.

Public Policy and Administrative Considerations

Voter Identification, often described as the critical step in protecting the integrity of the ballot, is a process which can ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot. A voting system that requires voters to produce an identification document or documents may prevent the ineligible from voting, but also may prevent the eligible from casting a ballot.

Evaluating the effect of different voter identification regimes can be most effective when based on clear legal, equitable and practical standards. The questions outlined below might point policymakers to standards that can be created around voter identification requirements.

1. Is the voter ID system designed on the basis of valid and reliable empirical studies
   that will address concerns regarding certain types of voting fraud?
2. Does the voter ID requirement comply with the letter and spirit of the Voting
   Rights Act?
3. How effective is the voter ID requirement on increasing the security of the ballot
   and can it be coordinated with the statewide voter registration database?
4. How feasible is the voter identification requirement? That is, are there
   administrative or budgetary considerations or concerns? How easy or difficult will
   it be for pollworkers who must administer the requirement?
5. How cost effective is the voter ID system? That is, what are the monetary and
   non-monetary costs to the voter and to the state for implementing the ID system?
6. If voter ID requirements are shown to reduce voter turnout (generally, or with
   some particular groups), what possible steps should be taken to ameliorate this
   problem?

Recommendations and Next Steps

As the Federal agency charged with informing election officials and the public about various issues related to the administration of elections EAC believes it should, in its capacity as a supporter of elections research, undertake additional study into the topic of voter identification requirements and the implementation of them in the following ways:

- Longitudinal studies of jurisdictions that have changed voter identification
  requirements.
• State-by-state and precinct-level analyses that will examine the correlations between various voter identification requirements and voter registration and turnout.

• Alternative forms and methods for verifying a voter's identity.

• Continuing research into the connection between various voter identification requirements and the number of ballots cast and counted.

• A continuing state-by-state update on changes to voter identification requirements.

• Continued collection of state-by-state data which will help examine the impact that voter identification requirements are having on the number of voters who are casting provisional ballots because of voter identification verification issues.

Subject: Draft EAC report on Voter Identification

Chair Davidson and Tom-

You may recall that during your last Commissioner’s meeting you requested that a draft of the EAC Voter ID report be ready by January 5. Attached please find the first draft of such a report that I have prepared, based on the Eagleton Voter ID report and study.

There are several points in the document where I raise questions about the data or Eagleton’s findings from their analysis. Certainly, before we would publish this report, we would need Eagleton to review it and to verify that we have accurately represented their findings and conclusions.

Hopefully, this is a first good step towards publishing something on voter Identification. I look forward to your suggestions for next steps.

All,

FYI

Below please find a link to the supreme court’s decision in the AZ matter. The decision overturns the Ninth Circuit’s interlocutory injunction of proposition 200... the decision does not discuss the merits of the case. The court was very insistent on this point:

"We underscore that we express no opinion here on the correct disposition, after full briefing and argument, of the appeals from the District Court’s September 11 order or on the ultimate resolution of these cases. As we have noted, the facts in these cases are hotly contested, and “[n]o bright line separates permissible election-related regulation from unconstitutional infringements.” Timmons v. Twin Cities Area New Party, 520 U. S. 351, 359 (1997). Given the imminence of the election and the inadequate time to resolve the factual disputes, our action today shall of necessity allow the election to proceed without an injunction suspending the voter identification rules.”

Gavin S. Gilmour
Deputy General Counsel
United States Election Assistance Commission
1225 New York Ave., NW, Ste 1100
Washington, DC 20005
(202) 566-3100

THIS MESSAGE IS FOR ITS INTENDED RECIPIENT ONLY. IT IS A PRIVILEGED DOCUMENT AND SHALL NOT BE RELEASED TO A THIRD PARTY WITHOUT THE CONSENT OF THE SENDER.
PER CURIAM.

The State of Arizona and county officials from four of its counties seek relief from an interlocutory injunction entered by a two-judge motions panel of the Court of Appeals for the Ninth Circuit. JUSTICE KENNEDY has referred the applicants' filings to the Court. We construe the filings of the State and the county officials as petitions for certiorari; we grant the petitions; and we vacate the order of the Court of Appeals.

I

In 2004, Arizona voters approved Proposition 200. The measure sought to combat voter fraud by requiring voters to present proof of citizenship when they register to vote and to present identification when they vote on election day.

The election procedures implemented to effect Proposition 200 do not necessarily result in the turning away of qualified, registered voters by election officials for lack of proper identification. A voter who arrives at the polls on election day without identification may cast a conditional provisional ballot. For that ballot to be counted, the voter
is allowed five business days to return to a designated site and present proper identification. In addition any voter who knows he or she cannot secure identification within five business days of the election has the option to vote before election day during the early voting period. The State has determined that, because there is adequate time during the early voting period to compare the voters' signatures on the ballot with their signatures on the registration rolls, voters need not present identification if voting early.

Arizona is a covered jurisdiction under §5 of the Voting Rights Act of 1965. So it was required to preclear any new voting "standard, practice, or procedure" with either the United States Attorney General or the District Court for the District of Columbia to ensure its new voting policy did "not have the purpose [or] effect of denying or abridging the right to vote on account of race or color," 42 U. S. C. §1973c. See Georgia v. Ashcroft, 539 U. S. 461, 461–462 (2003). On May 6, 2005, the United States Attorney General precleared the procedures Arizona adopted under Proposition 200.

In the District Court the plaintiffs in this action are residents of Arizona; Indian tribes; and various community organizations. In May 2006, these plaintiffs brought suit challenging Proposition 200's identification requirements. On September 11, 2006, the District Court denied their request for a preliminary injunction, but it did not at that time issue findings of fact or conclusions of law. These findings were important because resolution of legal questions in the Court of Appeals required evaluation of underlying factual issues.

The plaintiffs appealed the denial, and the Clerk of the Court of Appeals set a briefing schedule that concluded on November 21, two weeks after the upcoming November 7 election. The plaintiffs then requested an injunction pending appeal from the Court of Appeals. Pursuant to
Per Curiam

the Court of Appeals' rules, the request for an injunction was assigned to a two-judge motions/screening panel. See Rule 3–3 (CA9 2002). On October 5, after receiving lengthy written responses from the State and the county officials but without oral argument, the panel issued a four-sentence order enjoining Arizona from enforcing Proposition 200's provisions pending disposition, after full briefing, of the appeals of the denial of a preliminary injunction. The Court of Appeals offered no explanation or justification for its order. Four days later, the court denied a motion for reconsideration. The order denying the motion likewise gave no rationale for the court's decision.

Despite the time-sensitive nature of the proceedings and the pendency of a request for emergency relief in the Court of Appeals, the District Court did not issue its findings of fact and conclusions of law until October 12. It then concluded that “plaintiffs have shown a possibility of success on the merits of some of their arguments but the Court cannot say that at this stage they have shown a strong likelihood.” Order in NO. CV 06–1268–PHX–ROS etc. (D. Ariz., Oct. 11, 2006), pp. 7–8, App. to Application for Stay of Injunction, Tab 5 (internal quotation marks and alterations omitted). The District Court then found the balance of the harms and the public interest counseled in favor of denying the injunction.

II

“A State indisputably has a compelling interest in preserving the integrity of its election process.” Eu v. San Francisco County Democratic Central Comm., 489 U. S. 214, 231 (1989). Confidence in the integrity of our electoral processes is essential to the functioning of our participatory democracy. Voter fraud drives honest citizens out of the democratic process and breeds distrust of our government. Voters who fear their legitimate votes will be outweighed by fraudulent ones will feel disenfranchised.
Per Curiam

"[T]he right of suffrage can be denied by a debasement or dilution of the weight of a citizen's vote just as effectively as by wholly prohibiting the free exercise of the franchise." Reynolds v. Sims, 377 U. S. 533, 555 (1964). Countering the State's compelling interest in preventing voter fraud is the plaintiffs' strong interest in exercising the "fundamental political right" to vote. Dunn v. Blumstein, 405 U. S. 330, 336 (1972) (internal quotation marks omitted). Although the likely effects of Proposition 200 are much debated, the possibility that qualified voters might be turned away from the polls would caution any district judge to give careful consideration to the plaintiffs' challenges.

Faced with an application to enjoin operation of voter identification procedures just weeks before an election, the Court of Appeals was required to weigh, in addition to the harms attendant upon issuance or nonissuance of an injunction, considerations specific to election cases and its own institutional procedures. Court orders affecting elections, especially conflicting orders, can themselves result in voter confusion and consequent incentive to remain away from the polls. As an election draws closer, that risk will increase. So the Court of Appeals may have deemed this consideration to be grounds for prompt action. Furthermore, it might have given some weight to the possibility that the nonprevailing parties would want to seek en banc review. In the Ninth Circuit that procedure, involving voting by all active judges and an en banc hearing by a court of 15, can consume further valuable time. These considerations, however, cannot be controlling here. It was still necessary, as a procedural matter, for the Court of Appeals to give deference to the discretion of the District Court. We find no indication that it did so, and we conclude this was error.

Although at the time the Court of Appeals issued its order the District Court had not yet made factual findings
to which the Court of Appeals owed deference, see Fed. Rule Civ. Proc. 52(a), by failing to provide any factual findings or indeed any reasoning of its own the Court of Appeals left this Court in the position of evaluating the Court of Appeals' bare order in light of the District Court's ultimate findings. There has been no explanation given by the Court of Appeals showing the ruling and findings of the District Court to be incorrect. In view of the impending election, the necessity for clear guidance to the State of Arizona, and our conclusion regarding the Court of Appeals' issuance of the order we vacate the order of the Court of Appeals.

We underscore that we express no opinion here on the correct disposition, after full briefing and argument, of the appeals from the District Court's September 11 order or on the ultimate resolution of these cases. As we have noted, the facts in these cases are hotly contested, and "[n]o bright line separates permissible election-related regulation from unconstitutional infringements." *Timmons v. Twin Cities Area New Party*, 520 U. S. 351, 359 (1997). Given the imminence of the election and the inadequate time to resolve the factual disputes, our action today shall of necessity allow the election to proceed without an injunction suspending the voter identification rules.

The order of the Court of Appeals is vacated, and the cases are remanded for further proceedings consistent with this opinion. Pursuant to this Court's Rule 45.3, the Clerk is directed to issue the judgment in these cases forthwith.

*It is so ordered.*

JUSTICE STEVENS, concurring.

Allowing the election to proceed without enjoining the statutory provisions at issue will provide the courts with a better record on which to judge their constitutionality. At least two important factual issues remain largely unre-
solved: the scope of the disenfranchisement that the novel identification requirements will produce, and the prevalence and character of the fraudulent practices that allegedly justify those requirements. Given the importance of the constitutional issues, the Court wisely takes action that will enhance the likelihood that they will be resolved correctly on the basis of historical facts rather than speculation.
Commissioners-

Attached please find the Eagleton report on Voter Identification which has just been received.

I look forward to our discussion of this item at Thursday's meeting.

| Alabama | Provide ID | (b) Each elector shall provide identification to an appropriate election official prior to voting. A voter required to show identification when voting in person shall present to the appropriate election official either of the following forms of identification:  
(1) A current valid photo identification.  
(2) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. The term "other government document" may include, but is not limited to, any of the following:  
a. A valid identification card issued by a branch, department, agency, or entity of the State of Alabama, any other state, or the United States authorized by law to issue personal identification.  
b. A valid United States passport.  
c. A valid Alabama hunting or fishing license.  
d. A valid Alabama permit to carry a pistol or revolver.  
e. A valid pilot's license issued by the Federal Aviation Administration or other authorized agency of the United States.  
f. A valid United States military identification card.  
g. A certified copy of the elector's birth certificate.  
h. A valid Social Security card.  
i. Certified naturalization documentation.  
j. A certified copy of court records showing adoption or name change.  
k. A valid Medicaid card, Medicare card, or an Electronic Benefits Transfer Card (formerly referred to as a "food stamp card").  
(c) For voters required to show identification when voting by mail, the voter shall submit with the ballot a copy of one of the forms of identification listed in subsection (b).  
(e) An individual required to present identification in accordance with this section who is unable to meet the identification requirements of this section shall be permitted to vote by a challenged or provisional ballot, as provided for by law.  
(f) In addition, an individual who does not have identification in his or her possession at the polls shall be permitted to vote if the individual is positively identified by two election officials as a voter on the poll list who is eligible to vote and the election official signs the voters list by where the voter signs. | Ala. Code § 17-11A-1 |
| Alaska | Provide ID | (a) Before being allowed to vote, each voter shall exhibit to an election official one form of identification, including  
(1) an official voter registration card, driver's license, state identification card, current and valid photo identification, birth certificate, passport, or hunting or fishing license; or  
(2) an original or a copy of a current utility bill, bank statement, paycheck, government check, or other government document; an item exhibited under this | Alaska Stat. § 15.15.225 |
paragraph must show the name and current address of the voter.

(b) An election official may waive the identification requirement if the election official knows the identity of the voter. The identification requirement may not be waived for voters who are first-time voters who initially registered by mail or by facsimile or other electronic transmission approved by the director under AS 15.07.050, and did not provide identification as required in AS 15.07.060.

(c) A voter who cannot exhibit a required form of identification shall be allowed to vote a questioned ballot.

effective June 17, 2003

| Arizona | Provide ID | B. If a statewide voter registration database is not yet operational, for any person who has registered to vote by mail for the first time in this state after January 1, 2003 or who is reregistering by mail after January 1, 2003 after moving from one county to another county in this state, the person shall comply with the following in order to be issued a ballot:

1. The person shall present either one of the following:

   (a) A current form of identification that bears a photograph of the person and the name of the person.

   (b) A current utility bill, bank statement, paycheck, government issued check or other government document that shows the name and registration address of the person.

2. If the person does not present a document that complies with paragraph 1, the person is only eligible to vote a provisional ballot as prescribed by § 6-584.

Effective Dec. 1, 2003

| Arkansas | Provide ID | 7-5-305. Requirements.

(a) Before a person is permitted to vote, the election official shall:
   (1) Request the voter to identify himself in order to verify the existence of his name on the precinct voter registration list;
   (2) Request the voter, in the presence of the election official, to state his address and state or confirm his date of birth;
   (3) Determine that the voter's date of birth and address are the same as those on the precinct voter registration list;
   (4) If the date of birth given by the voter is not the same as that on the precinct voter registration list, request the voter to provide identification as the election official deems appropriate;
   (5)(A) If the voter's address is not the same as that on the precinct voter registration list, verify with the county clerk that the address is within the precinct.
   (B) If the address is within the precinct, request the voter to complete a voter registration application form for the purpose of updating county voter registration record files.
   (C) If the address is not within the precinct, instruct the voter to contact the county clerk's office to determine the proper precinct;
   (6) If the voter's name is not the same as that on the precinct voter registration list, request the voter to complete a voter registration application form for purposes of updating county voter registration record files;
   (7) Request the voter, in the presence of the election official, to sign his name, including his given name, his middle name or initial, if any, and his last name in the space provided on the precinct voter registration list. If a person is unable to sign his signature or make his mark or cross, the election official shall enter his initials and the voter's date of birth in the space for the person's signature on the precinct voter registration list; and

Arkansas Code Annotated § 7-5-305
(8)(A) Request the voter for purposes of identification to provide a valid driver’s license, photo identification card issued by a governmental agency, voter card, social security card, birth certificate, United States passport, employee identification card issued by a governmental agency containing a photograph, employee identification card issued in the normal course of business of the employer, student identification card, Arkansas hunting license, or United States military identification card.

(B)(i) If a voter is unable to provide this identification, the election official shall indicate on the precinct voter registration list that the voter did not provide identification.

(ii) Following each election, the county board of election commissioners may review the precinct voter registration lists and may provide the information of the voters not providing identification at the polls to the prosecuting attorney.

(iii) The prosecuting attorney may investigate possible voter fraud; and

(9) Follow the procedures under §§ 7-5-310, 7-5-311, and 7-5-523, if the person is a disabled voter and presents himself or herself to vote.

Effective: July 16, 2003

| Colorado | Provide ID | (1) Except as provided in subsection (4) of this section, any eligible elector desiring to vote shall show his or her identification as defined in section 1-7-110, write his or her name and address on the signature card, and give the signature card to one of the election judges, ** ** **

(4) An eligible elector who is unable to produce identification may cast a provisional ballot in accordance with article 8.5 of this title.

(19.5)(a) "Identification" means:

(I) A valid Colorado driver’s license;

(II) A valid identification card issued by the department of revenue in accordance with the requirements of part 3 of article 2 of title 42, C.R.S.;

(III) A valid United States passport;

(IV) A valid employee identification card with a photograph of the eligible elector issued by any branch, department, agency, or entity of the United States government or of this state, or by any county, municipality, board, authority, or other political subdivision of this state;

(V) A valid pilot’s license issued by the federal aviation administration or other authorized agency of the United States;

(VI) A valid United States military identification card with a photograph of the eligible elector;

(VII) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the elector;

<td>Provide ID</td>
<td>(a) In each primary, election or referendum, when an elector has entered the polling place, the elector shall announce the elector's street address, if any, and the elector's name to the checkers in a tone sufficiently loud and clear as to enable all the election officials present to hear the same. Each elector who registered to vote by mail for the first time on or after January 1, 2003, and has a &quot;mark&quot; next to the elector's name on the official registry list, as required by section 9-23r, shall present to the checkers, before the elector votes, either a current and valid photo identification that shows the elector's name and address or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the elector. Each other elector shall (1) present to the checkers the elector's Social Security card or any other preprinted form of identification which shows the elector's name and either the elector's address, signature or photograph, or (2) on a form prescribed by the Secretary of the State, write the elector's residential address and date of birth, print the elector's name and sign a statement under penalty of false statement that the elector is the elector whose name appears on the official checklist. Such form shall clearly state the penalty of false statement. A separate such form shall be used for each elector. If the elector presents a preprinted form of identification under subdivision (1) of this subsection, the checkers shall check the name of such elector on the official checklist. If the elector completes the form under subdivision (2) of this subsection, the assistant registrar of voters shall examine the information on such form and either instruct the checkers to check the name of such elector on the official checklist or notify the elector that the form is incomplete or inaccurate. Effective May 10, 2004</td>

</table>
|        |             | Do I Need an I.D. to Vote on Election Day?  
Yes. Be sure to have an I.D. with a picture and signature (such as a Hawaii driver's license or state I.D. card) when you go to vote. The NVRAC card is not an acceptable form of identification. |
|        |             | From the 2004 version of the administrative code. |
|        |             | Every person upon applying to vote shall sign the person's name in the poll book prepared for that purpose. This requirement may be waived by the chairperson of the precinct officials if for reasons of illiteracy or blindness or other physical disability the voter is unable to write. Every person shall provide identification if so requested by a precinct official. A poll book shall not contain the social security number of any person. |
|        |             | After signing the poll book and receiving the voter's ballot, the voter shall proceed to the voting booth to vote according to the voting system in use in the voter's precinct. The precinct official may, and upon request shall, explain to the voter the mode of voting. |
|        |             | Last amended 2003. |
| Idaho  | Sign Name   | (1) An elector desiring to vote shall state his name and address to the judge or clerk in charge of the combination election record and poll book. |
|        |             | (2) Before receiving his ballot, each elector shall sign his name in the combination election record and poll book following his name therein. |
|        |             | (5) The elector shall then be given the appropriate ballots which have been stamped with the official election stamp and shall be given folding instructions for such ballots. |
|        |             | (Last amended in 1972) |
| Illinois | Give Name | Any person desiring to vote shall give his name and, if required to do so, his residence to the judges of election, one of whom shall thereupon announce the same in a loud and distinct tone of voice, clear, and audible; the judges of elections shall check each application for ballot against the list of voters registered in that precinct to whom absentee or early ballots have been issued for that election, which shall be provided by the election authority and which list shall be available for inspection by pollwatchers. A voter applying to vote in the precinct on election day whose name appears on the list as having been issued an absentee or early ballot shall not be permitted to vote in the precinct. All applicable provisions of Articles 4, 5 or 6 shall be complied with and if such name is found on the register of voters by the officer having charge thereof, he |
|        |             | 10 Ill. Comp. Stat. 5/17-9 |
shall likewise repeat said name, and the voter shall be allowed to enter within the
proximity of the voting booths, as above provided. One of the judges shall give
the voter one, and only one of each ballot to be voted at the election, on the back
of which ballots such judge shall indorse his initials in such manner that they
may be seen when each such ballot is properly folded, and the voter's name shall
be immediately checked on the register list. In those election jurisdictions where
perforated ballot cards are utilized of the type on which write-in votes can be
cast above the perforation, the election authority shall provide a space both
above and below the perforation for the judge's initials, and the judge shall
endorse his or her initials in both spaces. Whenever a proposal for a
constitutional amendment or for the calling of a constitutional convention is to
be voted upon at the election, the separate blue ballot or ballots pertaining
thereto shall, when being handed to the voter, be placed on top of the other
ballots to be voted at the election in such manner that the legend appearing on
the back thereof, as prescribed in Section 16-6 of this Act, shall be plainly
visible to the voter. At all elections, when a registry may be required, if the name
of any person so desiring to vote at such election is not found on the register of
voters, he or she shall not receive a ballot until he or she shall have complied
with the law prescribing the manner and conditions of voting by unregistered
voters. If any person desiring to vote at any election shall be challenged, he or
she shall not receive a ballot until he or she shall have established his right to
vote in the manner provided hereinafter; and if he or she shall be challenged
after he has received his ballot, he shall not be permitted to vote until he or she
has fully complied with such requirements of the law upon being challenged.
Besides the election officer, not more than 2 voters in excess of the whole
number of voting booths provided shall be allowed within the proximity of the
voting booths at one time. The provisions of this Act, so far as they require the
registration of voters as a condition to their being allowed to vote shall be applied
within the proximity of the voting booths at one time. The provisions of this Act, so far as they require the
registration of voters as a condition to their being allowed to vote shall not apply
to persons otherwise entitled to vote, who are, at the time of the election, or at
any time within 60 days prior to such election have been engaged in the military
or naval service of the United States, and who appear personally at the polling
place on election day and produce to the judges of election satisfactory evidence
thereof, but such persons, if otherwise qualified to vote, shall be permitted to
vote at such election without previous registration.

1. The board members of their respective precincts shall have charge of the
ballots and furnish them to the voters. Any person desiring to vote shall sign a
voter's declaration provided by the officials, in substantially the following form:

VOTER'S DECLARATION OF ELIGIBILITY

I do solemnly swear or affirm that I am a resident of the .......... precinct, ..........
ward or township, city of .........., county of .........., Iowa.

I am a registered voter. I have not voted and will not vote in any other precinct in
said election.

I understand that any false statement in this declaration is a criminal offense
punishable as provided by law.

Signature of Voter

Address

Telephone

Approved:
Board Member

2. One of the precinct election officials shall announce the voter's name aloud for the benefit of any persons present pursuant to section 49.104, subsection 2, 3, or 5. Any of those persons may upon request view the signed declarations of eligibility and may review the signed declarations on file so long as the person does not interfere with the functions of the precinct election officials.

3. A precinct election official shall require any person whose name does not appear on the election register as an active voter to show identification. Specific documents which are acceptable forms of identification shall be prescribed by the state commissioner.

A precinct election official may require of the voter unknown to the official, identification upon which the voter's signature or mark appears. If identification is established to the satisfaction of the precinct election officials, the person may then be allowed to vote.

(From 2004 version of Iowa Annotated Code; effective January 1, 1995)

Kansas

Sign Name

(b) A person desiring to vote shall provide to the election board: (1) the voter's name; (2) if required, the voter's address; and (3) the voter's signature on the registration or poll book. A signature may be made by mark, initials, typewriter, print, stamp, symbol or any other manner if by placing the signature on the document the person intends the signature to be binding. A signature may be made by another person at the voter's direction if the signature reflects such voter's intention.

<td>(1) At each election, before being given a ballot, each registered elector offering to vote shall identify himself or herself by presenting an official state identification.</td>
</tr>
</tbody>
</table>

Effective: 1/1/2002
identification card issued to that individual pursuant to Act No. 222 of the Public Acts of 1972, being sections 28.291 to 28.295 of the Michigan Compiled Laws, an operator's or chauffeur's license issued to that individual pursuant to the Michigan Vehicle Code, Act No. 300 of the Public Acts of 1949, being sections 257.1 to 257.923 of the Michigan Compiled Laws, or other generally recognized picture identification card and by executing an application showing his or her signature or mark and address of residence in the presence of an election official. If the voter registration cards are used in the precinct, the election official in charge of the precinct registration file shall compare the signature upon the application with the signature upon the registration card. If voter registration lists are used in the precinct, the election inspector shall determine if the name on the application to vote appears on the voter registration list. If the name appears on the voter registration list, the elector shall provide further identification by giving his or her date of birth or other information stated upon the voter registration list. In precincts using voter registration lists, the date of birth may be required to be placed on the application to vote. If the signature or an item of information does not correspond, the vote of the person shall be challenged, and the same procedure shall be followed as provided in this act for the challenging of an elector. If the person offering to vote has signed the registration card or application by making a mark, the person shall identify himself or herself by giving his or her date of birth, which shall be compared with the date of birth stated upon the registration card or voter registration list, or shall give other identification as may be referred to upon the registration card or voter registration list. If the elector does not have an official state identification card, operator's or chauffeur's license as required in this subsection, or other generally recognized picture identification card, the individual shall sign an affidavit to that effect before an election inspector and be allowed to vote as otherwise provided in this act. However, an elector being allowed to vote without the identification required under this subsection is subject to challenge as provided in section 727.

(2) If, upon a comparison of the signature or other identification, it is found that the applicant is entitled to vote, the election officer having charge of the registration list shall approve the application and write his or her initials on the application, after which the number on the ballot issued shall be noted on the application. The application shall serve as 1 of the 2 poll lists required to be kept as a record of a person who has voted. The application shall be filed with the township, city, or village clerk. If voter registration cards are used in the precinct, the date of the election shall be noted by 1 of the election officials upon the precinct registration card of each elector voting at an election. If voter registration lists are used in the precinct, the election official shall clearly indicate upon the list each elector voting at that election. The clerk of a city, village, or township shall maintain a record of voting participation for each registered elector.

(Effective March 31, 1997)

(a) An individual seeking to vote shall sign a polling place roster which states that the individual is at least 18 years of age, a citizen of the United States, has resided in Minnesota for 20 days immediately preceding the election, maintains residence at the address shown, is not under a guardianship in which the court order revokes the individual's right to vote, has not been found by a court of law to be legally incompetent to vote or convicted of a felony without having civil rights restored, is registered and has not already voted in the election. The roster must also state: "I understand that deliberately providing false information is a felony punishable by not more than five years imprisonment and a fine of not
more than $10,000, or both."

(b) A judge may, before the applicant signs the roster, confirm the applicant's name, address, and date of birth.

(c) After the applicant signs the roster, the judge shall give the applicant a voter's receipt. The voter shall deliver the voter's receipt to the judge in charge of ballots as proof of the voter's right to vote, and thereupon the judge shall hand to the voter the ballot. The voters' receipts must be maintained during the time for notice of filing an election contest.

(Effective January 1, 2004)

Mississippi  Sign Name  **  **
When any person entitled to vote shall appear to vote, he shall first sign his name in a receipt book or booklet provided for that purpose and to be used at that election only and said receipt book or booklet shall be used in lieu of the list of voters who have voted formerly made by the managers or clerks; whereupon and not before, the initialing manager or, in his absence, the alternate initialing manager shall indorse his initials on the back of an official blank ballot, prepared in accordance with law, and at such place on the back of the ballot that the initials may be seen after the ballot has been marked and folded, and when so indorsed he shall deliver it to the voter, which ballot the voter shall mark in the manner provided by law, which when done the voter shall deliver the same to the initialing manager or, in his absence, to the alternate initialing manager, in the presence of the others, and the manager shall see that the ballot so delivered bears on the back thereof the genuine initials of the initialing manager, or alternate initialing manager, and if so, but not otherwise, the ballot shall be put into the ballot box; and when so done one (1) of the managers or a duly appointed clerk shall make the proper entry on the pollbook. If the voter is unable to write his name on the receipt book, a manager or clerk shall note on the back of the ballot that it was receipted for by his assistance.

(Effective January 1, 1987)

Missouri  Provide ID  1. Before receiving a ballot, voters shall identify themselves by presenting a form of personal identification from the following list:

(1) Identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;

(2) Identification issued by the United States government or agency thereof;

(3) Identification issued by an institution of higher education, including a university, college, vocational and technical school, located within the state of Missouri;

(4) A copy of a current utility bill, bank statement, government check, paycheck or other government document that contains the name and address of the voter;

(5) Driver's license or state identification card issued by another state; or

(6) Other identification approved by the secretary of state under rules promulgated pursuant to subsection 3 of this section other identification approved by federal law. Personal knowledge of the voter by two supervising election judges, one from each major political party, shall be acceptable voter identification upon the completion of a secretary of state-approved affidavit that is signed by both supervisory election judges and the voter that attests to the personal knowledge of the voter by the two supervisory election judges. The secretary of state may provide by rule for a sample affidavit to be used for such purpose.

case of a primary election, that the voter is registered in a party designated on the primary election ballot. If the person's registration is confirmed by the presence of his name on the voter list or if the person presents a certificate under the seal and signature of the county clerk showing that he is entitled to vote in the election and to vote in that precinct, the judge shall announce to the election clerks the list number and the name of the voter as shown on the voter list.

E. The election clerk shall locate that list number and name on the signature roster and shall require the voter to sign his usual signature or, if unable to write, to make his mark opposite his printed name. If the voter makes his mark, it shall be witnessed by one of the judges of the precinct board. If the signature roster indicates that the voter is required to present a form of identification before voting, the election judge shall ask the voter for a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows and matches the name and address of the voter as indicated on the signature roster. If the voter does not provide the required identification, he shall be allowed to vote on a provisional paper ballot.

G. A voter shall not be permitted to vote until he has properly signed his usual signature or made his mark in the signature roster.

(From 2004 version of New Mexico Annotated Statutes, amended in 2005 to require presentation of ID)

New York  Match Sig.

1. A person before being allowed to vote shall be required, except as provided in this chapter, to sign his name on the back of his registration poll record on the first line reserved for his signature at the time of election which is not filled with a previous signature, or on the line of the computer generated registration list reserved for his signature. The two inspectors in charge shall satisfy themselves by a comparison of this signature with his registration signature and by comparison of his appearance with the descriptive material on the face of the registration poll record that he is the person registered. If they are so satisfied they shall enter the other information required for the election on the same line with the voter's latest signature, shall sign their names or initials in the spaces provided therefor, and shall permit the applicant to vote. Any inspector or inspectors not satisfied shall challenge the applicant forthwith.

2. If a person who alleges his inability to sign his name presents himself to vote, the board of inspectors shall permit him to vote, unless challenged on other grounds, provided he had been permitted to register without signing his name. The board shall enter the words "Unable to Sign" in the space on his registration poll record reserved for his signature or on the line of the computer generated registration list reserved for his signature at such election. If his signature appears upon his registration record or upon the computer generated registration list the board shall challenge him forthwith, except that if such a person claims that he is unable to sign his name by reason of a physical disability incurred since his registration, the board, if convinced of the existence of such disability, shall permit him to vote, shall enter the words "Unable to Sign" and a brief description of such disability in the space reserved for his signature at such election. At each subsequent election, if such disability still exists, he shall be entitled to vote without signing his name and the board of inspectors, without further notation, shall enter the words "Unable to Sign" in the space reserved for his signature at such election.

3. The voter's signature made by him upon registration and his signature made at subsequent elections shall be effectively concealed from the voter by a blotter or piece of opaque paper until after the voter shall have completed his signature.

4. In any case where a person who has heretofore voted has placed his voting signature on the back of his registration poll record on the first or any succeeding line or lines at the time or times of an election, instead of on the last line of the
space thereon required to be reserved for such voting signatures and on any lines
next running upward therefrom, the inspectors of election shall obliterate such
misplaced signature or signatures, initial the obliteration and require such voter
to sign his name again in the correct place on such registration poll record.

5. Any person who has heretofore registered and who at such time placed his or
her registration signature on the back of the registration poll record otherwise
than in the space required to be provided therefor at the bottom of such poll
record, shall, before being permitted to vote at any election thereafter, subscribe
a new registration signature for himself on the last line at the bottom of such poll
record, and, at the same time, if the inspectors of election are satisfied that the
signatures were made by the same person, obliterate his original registration
signature placed elsewhere than on the bottom of such record. Such obliterations
may be made by crossing out the signature so as to completely efface the same
or by affixing thereover a piece of gummed tape of a size sufficient only to cover
such signature and of a type adequate to fully conceal the same

Last Amended 1986

North Carolina Give Name (a) Checking Registration. --A person seeking to vote shall enter the voting
enclosure through the appropriate entrance. A precinct official assigned to check
registration shall at once ask the voter to state current name and residence address. The voter shall answer by stating current name and residence address.
In a primary election, that voter shall also be asked to state, and shall state, the
political party with which the voter is affiliated or, if unaffiliated, the authorizing
party in which the voter wishes to vote. After examination, that official shall
state whether that voter is duly registered to vote in that precinct and shall direct
that voter to the voting equipment or to the official assigned to distribute official
ballots. If a precinct official states that the person is duly registered, the person
shall sign the pollbook, other voting record, or voter authorization document in
accordance with subsection (c) of this section before voting.

North Dakota Provide ID 16.1-05-07 Poll clerks to check identification and verify eligibility -- Poll clerks
request, correct, and update incorrect information contained in the pollbook.

1. Before delivering a ballot to an individual according to section 16.1-13-22,
the poll clerks shall request the individual to show a driver's license issued by
the state, another form of identification displaying a photograph of the individual
and the individual's date of birth, or another appropriate form of identification
prescribed by the secretary of state. If an individual offering to vote fails or
refuses to show an appropriate form of identification, the individual may be
allowed to vote without being challenged according to section 16.1-05-06 if the
individual provides to the election board the individual's date of birth and if a
member of the election board or a clerk knows the individual and can personally
vouch that the individual is a qualified elector of the precinct. After verifying
that the individual's name is contained in the pollbook generated from the central
voter file, poll clerks shall verify the individual's residential address and mailing
address, if different from the individual's residential address.

(From 2003 version of N.D. Century Code; only amendment to this statute that
became effective in 2003 was in 2005)
| Ohio | Match Sig. | When an elector appears in a polling place to vote he shall announce his full name and address to the precinct election officials. He shall then write his name and address at the proper place in the poll lists or signature pollbooks provided therefore, except that if, for any reason, an elector shall be unable to write his name and address in the poll list or signature pollbook, the elector may make his mark at the place intended for his name and a precinct official shall write the name of the elector at the proper place on the poll list or signature pollbook following the elector's mark, upon the presentation of proper identification. The making of such mark shall be attested by the precinct official who shall evidence the same by signing his name on the poll list or signature pollbook as a witness to such mark.  
The elector's signature in the poll lists or signature pollbooks shall then be compared with his signature on his registration form or a digitized signature list as provided for in section 3503.13 of the Revised Code, and if, in the opinion of a majority of the precinct election officials, the signatures are the signatures of the same person, the clerks shall enter the date of the election on the registration form or shall record the date by such other means as may be prescribed by the secretary of state. If the right of the elector to vote is not then challenged, or, if being challenged, he establishes his right to vote, he shall be allowed to proceed into the voting machine. If voting machines are not being used in that precinct, the judge in charge of ballots shall then detach the next ballots to be issued to the elector from Stub B attached to each ballot, leaving Stub A attached to each ballot, hand the ballots to the elector, and call his name and the stub number on each of the ballots. The clerk shall enter the stub numbers opposite the signature of the elector in the pollbook. The elector shall then retire to one of the voting compartments to mark his ballots. No mark shall be made on any ballot which would in any way enable any person to identify the person who voted the ballot.  
(Effective at time of last update, 1992 H 182, eff. 4-9-93) | Ohio Rev. Code Ann. § 3505.18 |
| Oklahoma | Sign Name | Each person presenting himself to vote shall announce his name to the judge of the precinct, whereupon the judge shall determine whether said person's name is in the precinct registry.  
(Last amended in 1990)  
Persons who have been determined to be eligible to vote shall sign, in the presence of the clerk, the proper precinct registry. Said clerk shall thereupon issue proper ballots to said person. The voter's signature on said precinct registry shall be the best evidence of said voter's having voted at said election. Said precinct registry shall be retained in the office of the county election board for a period of twenty-two (22) months following the election and shall be subject to public inspection during regular office hours.  
| Oregon | Match Sig. | All elections in Oregon are Vote by Mail.  
An Elections Official will compare the signature on your ballot return envelope to the signature on your voter registration card to verify your identity  
(http://www.uhavavote.org/votingguide/votebymail.html) (unknown date, but use of wayback machine shows that this provision on site on following dates: 7/11/04, 10/20/04 and 10/29/04) | Or. Rev. Stat. § 254.385 |
| Penn. | Match Sig. | (a.3) All electors, including any elector that shows identification pursuant to subsection (a), shall subsequently sign a voter's certificate, and, unless he is a State or Federal employee who has registered under any registration act without declaring his residence by street and number, he shall insert his address therein, and hand the same to the election officer in charge of the district register. Such election officer shall thereupon announce the elector's name so that it may be heard by all members of the election board and by all watchers present in the | 25 Pa. Stat. Ann. § 3050 |
polling place and shall compare the elector's signature on his voter's certificate with his signature in the district register. If, upon such comparison, the signature upon the voter's certificate appears to be genuine, the elector who has signed the certificate shall, if otherwise qualified, be permitted to vote: Provided, That if the signature on the voter's certificate, as compared with the signature as recorded in the district register, shall not be deemed authentic by any of the election officers, such elector shall not be denied the right to vote for that reason, but shall be considered challenged as to identity and required to make the affidavit and produce the evidence as provided in subsection (d) of this section. When an elector has been found entitled to vote, the election officer who examined his voter's certificate and compared his signature shall sign his name or initials on the voter's certificate, shall, if the elector's signature is not readily legible, print such elector's name over his signature, and the number of the stub of the ballot issued to him or his number in the order of admission to the voting machines, and at primaries a letter or abbreviation designating the party in whose primary he votes shall also be entered by one of the election officers or clerks. As each voter is found to be qualified and votes, the election officer in charge of the district register shall write or stamp the date of the election or primary, the number of the stub of the ballot issued to him or his number in the order of admission to the voting machines, and at primaries a letter or abbreviation designating the party in whose primary he votes, and shall sign his name or initials in the proper space on the registration card of such voter contained in the district register.

(b) The voter shall sign the application in the presence and view of a bipartisan pair. They shall locate the voter's name on the certified voting list for the voting district. Upon finding the voter's name on the certified voting list for the district, they shall initial the ballot application in the place provided next to the word "Approved" and shall enter on the certified list of voters a proper notation that the applicant has voted in the election. They shall then return the ballot application to the voter who shall pass down the line and present it to the clerk.

After the voter has handed the approved ballot application to the clerk, the clerk shall provide the voter with the appropriate computer ballot and security sleeve, the warden shall direct the voter to the voting booth which the voter shall use, and unless the voter needs instruction or assistance as provided in this chapter, the voter shall cast his or her vote, and if he or she desires to place the voted computer ballot in a security sleeve, and shall proceed to the optical scan precinct count unit and shall personally place his or her voted ballot into the designated ballot slot on the unit, and after doing so, shall leave the enclosure at once. No voter shall remain within the voting booth longer than ten (10) minutes, and if the voter refuses to leave after the lapse of ten (10) minutes, the voter shall be removed from the voting booth by order of the warden. Except for the election officials and the election inspector, not more than two (2) voters in excess of the number of voting booths shall be permitted within the enclosed space at any time.

(Last amended 2004, Current through January 2005 Session)

South Carolina  Photo ID  § 7-13-710. Proof of right to vote; signing poll list; comparison of signatures.

When any person presents himself to vote, he shall produce his valid South Carolina driver's license or other form of identification containing a photograph issued by the Department of Motor Vehicles, if he is not licensed to drive, or the written notification of registration provided for by §§ 7-5-125 and 7-5-180 if the notification has been signed by the elector. If the elector loses or defaces the registration notification, he may obtain a duplicate notification from his county board of registration upon request in person, or by telephone or mail. After presentation of the required identification, his name must be checked by one of the managers on the margin of the page opposite his name upon the registration books, or copy of the books, furnished by the board of registration. The managers shall keep a poll list which must contain one column headed "Names of Voters". Before any ballot is delivered to a voter, the voter shall sign his name on the poll list, which must be furnished to the appropriate election officials by the State Election Commission. At the top of each page the voter's oath appropriate to the election must be printed. The signing of the poll list or the marking of the poll list is considered to be an affirmation of the oath by the voter. One of the managers shall compare the signature on the poll list with the signature on the voter's driver's license, registration notification, or other identification and may require further identification of the voter and proof of his right to vote under this title as he considers necessary. If the voter is unable to write or if the voter is prevented from signing by physical handicap, he may sign his name to the poll list by mark with the assistance of one of the managers.

Last amended: 1968

</table>
| Tennessee | Provide ID | Identification of eligible voters  
(a)(1) A voter shall sign an application for ballot, indicate the primary in which the voter desires to vote, if any, and present it to a registrar. The application for ballot shall include thereon a space for the address of the voter's current residence, and the voter shall write or print such address on the application when the voter signs it. The registrar shall compare the signature and information on the application with the signature and information on the duplicate permanent registration record. The registrar shall make a determination whether the voter's address is different from the address on the voter's permanent registration record or if the registration is in inactive status. If the voter has changed residence, or the voter's registration is inactive, the registrar shall follow the procedures for voting pursuant to § 2-7-140. If, upon comparison of the signature and other identification, it is found that the applicant is entitled to vote, the registrar shall initial the application and shall note on the reverse side of the voter's duplicate permanent registration record the date of the election, the number of the voter's ballot application, and the elections in which the voter votes. The registrar shall give the voter the ballot application which is the voter's identification for a paper ballot or ballots or for admission to a voting machine. The voter shall then sign the duplicate poll lists without leaving any lines blank on any poll list sheet.  
(2) In any computerized county, the county election commission shall have the option of using an application for a ballot as provided in this section, or using the computerized voter signature list. A computerized voter signature list shall include the voter's name, current address of residence, social security number or registration number, birth date and spaces for the voter's signature, elections voted, ballot number and precinct registrar's initials. The following procedures shall be followed in the case of computerized voter signature lists:  
(A) The voter shall sign the signature list and indicate the election or elections the voter desires to vote in and verify the voter's address in the presence of the precinct registrar;  
(B) The registrar shall compare the voter's signature and information on the signature list with other evidence of identification supplied by the voter. If, upon comparison of the signature and other evidence of identification, it is found that the applicant is entitled to vote, the registrar shall initial the signature list;  
(C) If the applicant's signature is illegible, the registrar shall print the name of the applicant on the voter list; and  
(D) If a voter is unable to present any evidence of identification specified in subsection (c), the voter shall be required to execute an affidavit of identity on a form provided by the county election commission. |
| Texas | Provide ID | (b) On offering to vote, a voter must present the voter's voter registration certificate to an election officer at the polling place. |
| Utah | Give Name | (1)(a) Any registered voter desiring to vote shall give his name, and, if requested, his residence, to one of the election judges.  
(b) If an election judge does not know the person requesting a ballot and has reason to doubt that person's identity, the judge shall request identification or have the voter identified by a known registered voter of the district.  
(3) If the election judge determines that the voter is registered:  
(a) the election judge in charge of the official register shall:  
(i) write the ballot number opposite the name of the voter in the official register; and

(ii) direct the voter to sign his name in the election column in the official register;  
(b) another judge shall list the ballot number and voter's name in the pollbook; and  
(c) the election judge having charge of the ballots shall:  
(i) endorse his initials on the stub;  
(ii) check the name of the voter on the pollbook list with the number of the stub;  
(iii) hand the voter a ballot; and  
(iv) allow the voter to enter the voting booth.

(In effect at time of last update prior to 2005: Laws 2003, c. 37, § 1, eff. May 5, 2003)

| Vermont | Give Name | Before a person may be admitted to vote, he or she shall announce his or her name and if requested, his or her place of residence in a clear and audible tone of voice, or present his or her name in writing, or otherwise identify himself or herself by appropriate documentation. The election officials attending the entrance of the polling place shall then verify that the person's name appears on the checklist for the polling place. If the name does appear, and if no one immediately challenges the person's right to vote on grounds of identity or having previously voted in the same election, the election officials shall repeat the name of the person and:  
(1) If the checklist indicates that the person is a first-time voter in the municipality who registered by mail and who has not provided required identification before the opening of the polls, require the person to present any one of the following: a valid photo identification; a copy of a current utility bill; a copy of a current bank statement; or a copy of a government check, paycheck, or any other government document that shows the current name and address of the voter. If the person is unable to produce the required information, the person shall be afforded the opportunity to cast a provisional ballot, as provided in subchapter 6A of this chapter. The elections official shall note upon the checklist a first-time voter in the municipality who has registered by mail and who produces the required information, and place a mark next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting.  
(2) If the voter is not a first-time voter in the municipality, no identification shall be required, the clerk shall place a check next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting.  

| Virginia | Provide ID | § 24.2-643. Qualified voter permitted to vote; procedures at polling place; voter identification  
A. After the polls are open, each qualified voter at a precinct shall be permitted to vote. The officers of election shall ascertain that a person offering to vote is a qualified voter before admitting him to the voting booth and furnishing an official ballot to him.  
B. An officer of election shall ask the voter for his full name and current residence address and repeat, in a voice audible to party and candidate representatives present, the full name and address stated by the voter. The officer shall ask the voter to present any one of the following forms of identification: his Commonwealth of Virginia voter registration card, his social security card, his valid Virginia driver's license, or any other identification card issued by a government agency of the Commonwealth, one of its political subdivisions, or the United States; or any valid employee identification card containing a photograph of the voter and issued by an employer of the voter in the ordinary course of the employer's business.  
If the voter's name is found on the pollbook, if he presents one of the forms of | Va. Code. Ann. |
identification listed above, if he is qualified to vote in the election, and if no
objection is made, an officer shall enter, opposite the voter's name on the
pollbook, the first or next consecutive number from the voter count form
provided by the State Board, or shall enter that the voter has voted if the
pollbook is in electronic form; an officer shall provide the voter with the official
ballot; and another officer shall admit him to the voting booth.

Except as provided in subsection E of this section, if a voter is entitled to vote
except that he is unable to present one of the forms of identification listed above,
he shall be allowed to vote after signing a statement, subject to felony penalties
for false statements pursuant to § 24.2-1016, that he is the named registered
voter who he claims to be. A voter who requires assistance in voting by reason
of physical disability or inability to read or write, and who requests assistance
pursuant to § 24.2-649, may be assisted in preparation of this statement in
accordance with that section. The provisions of § 24.2-649 regarding voters who
are unable to sign shall be followed when assisting a voter in completing this
statement.

APPENDIX B – Court Decisions and Literature on Voter Identification and Related Issues

Court Decisions

Summary of Relevant Cases:

Challenges Prevailed:

American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004
- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14th Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14th Amendment EPC: likely to prevail

Greidinger v. Davis, 1993
- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  o 14th Amendment EPC: no classification (applied strict scrutiny)
  o Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    ▪ Compelling interests: preventing voter fraud (deemed compelling)
    ▪ Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    ▪ HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

Challenges Rejected:

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters’ identifications should be verified and this method was not unreasonable or too burdensome

Colorado Common Clause v. Davidson, 2004
- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  o HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions’ purposes were to prevent voter fraud)
  o Substantive due process and equal protection
    ▪ No improper discrimination
• Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
• Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

McKay v. Thompson, 2000
• Statute: mandated disclosure of SS # as a precondition to voter registration
• Claims:
  o Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  o NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  o Substantive due process: ruled that internal use of SS# not a burden
  o Free Exercise, based on Bible’s supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  o P&I, Article IV: does not protect in-state citizens
  o P&I, 14th Amend.: no protection for privilege where Congress authorized its infringement

Kemp v. Tucker, 1975
• Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
• Claims:
  o VRA: ruled that race was not made a “qualification” for voting
  o 15th Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  o 14th Amendment EPC: ruled there was no distinction among voters

Perez v. Rhiddlehoover, 1966
• Statute: date of birth, place of birth, mother’s first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
• Claims:
  o VRA: ruled that it was not a “test or device” because it applied equally
  o 15th Amendment: same reasons

Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver’s license) for use in “completing” an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at *1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating
between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at *1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at *3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

**Greidinger v. Davis,** 988 F.2d 1344 (4th Cir. 1993).

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

**Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that
provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at *1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. Id. at *6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. Id. at *10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. Id. at 12. The Court also found no improper discrimination between voters. Id. Thus, the provision was upheld.

McKay v. Thompson, 226 F.3d 752 (6th Cir. 2000).

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. Id. at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. Id. The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. Id. The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. Id. The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. Id.

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." Id. at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. Id. at 740 n.3. Since race is just one of
several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. \textit{Id.} at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. \textit{Id.} As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. \textit{Id.} The statute was upheld.

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a “test or device.” The Court felt that this requirement was not a test or device for discrimination because it applied equally. \textit{Id.} at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. \textit{Id.}

\textit{Friendly House, et al. v. Janet Napolitano et al., CV 04-649 TUC DCB}

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. \textit{Id.} at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. \textit{Id.} at 20. Second, the lawsuit alleges violation of the Voting Rights Act. \textit{Id.} at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

\textbf{Current Litigation Concerning Voter ID Issues}\textsuperscript{1}

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

\textsuperscript{1} As of January 2, 2006
Georgia (Common Cause/Georgia v. Billups):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. Id.

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32). In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36, 38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34, 35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109, 111, 116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation. As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

Indiana (Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

---

2 Litigation documents are available at the Election Law @ Moritz website. http://moritzlaw.osu.edu/electionlaw/litigation/index.php
Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment. The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. Id. Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

4 According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.
Appendix C

Analysis of Effects of Voter Identification Requirements on Turnout
Tim Vercellotti
Eagleton Institute of Politics
Rutgers University
May 16, 2006

Introduction

A key area of disagreement in the policy debate over voter identification requirements concerns whether such requirements dampen turnout among those eligible to vote. Opponents of voter identification laws argue that they constitute an institutional barrier to voting, particularly among the poor, African-Americans, Hispanics, the elderly and people with disabilities (Baxter and Galloway 2005, Electionline.org 2002, Jacobs 2005, Young 2006). This argument holds that voter identification requirements create an extra demand on voters, and thus may discourage some of them from participating in elections. Further, critics of voter identification requirements contend that the effect is greater based on specific types of requirements. Critics argue that requiring voters to produce some form of government-issued photo identification on Election Day is more demanding than requiring, for example, that they state their names at the polling place because of the various steps needed to procure a photo identification card, such as a driver’s license. Supporters of voter identification requirements, on the other hand, argue that the requirements are necessary to combat voter fraud, safeguard the integrity of the electoral process, and engender faith in the electoral process among citizens (Young 2006).

This report examines the potential variation in turnout rates based on the type of voter identification requirement in place in each state on Election Day 2004. This report draws from two sets of data – aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. Classification of voter identification requirements comes from a review of state statutes conducted by the Moritz College of Law at the Ohio State University.

Types of voter identification requirements

Based on research by the Moritz College of Law, states had one of five types of requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (10 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states). It was then possible to code the states according to these requirements, and test the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one’s name, signing one’s name, matching one’s signature to a signature on file, providing a form of identification, and providing a form of photo identification.

5 Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.
But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). For the purposes of this analysis I also tested the array of minimum identification requirements to assess whether they posed increasing levels of demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

**Estimating turnout among citizens in the voting-age population**

This report examines turnout among U.S. citizens of voting age in both the aggregate- and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

In the aggregate data, determining the percentage of the voting-age population that has U.S. citizenship posed a methodological challenge. The Census Bureau gathers information on the citizenship status of adults ages 18 and older only during the decennial census. While the Census Bureau provides annual estimates of the population to account for changes between decennial censuses, the bureau does not offer estimates for the proportion of the adult population who are citizens as part of the annual estimates. To address this issue I estimated the 2004 citizen voting-age population for each county using a method reported in the analysis of the 2004 Election Day Survey conducted for the U.S. Election Assistance Commission (U.S. Election Assistance Commission, 2005). I calculated the percentage of the 2000 voting-age population who were citizens in 2000, and applied that percentage to the July 1, 2004 estimates for voting-age population in each county. In other words, I assumed that the percentage of the voting-age population that had U.S. citizenship in 2004 was similar to the percentage of the voting-age population who were citizens in 2000.6

**Analysis of aggregate data**

If one treats maximum voter identification requirements as a continuous variable, with photo identification as the most demanding requirement, one finds some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter

---

6 McDonald and Popkin (2001) recommend an even more stringent approach to voter turnout calculations. They point out that voting-age population estimates include adults who are ineligible to vote (such as convicted felons), and the estimates overlook eligible citizens living overseas. While estimates of the voting-eligible population are available at the state level, I was unable to find such estimates for individual counties, which provide the unit of analysis for the aggregate data analyzed here.
identification requirements \( (r = -.30, p < .05) \). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant \( (r = -.20, p = .16) \). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

[Table 1 here]

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.2 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, I opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.\(^7\)

Voter identification requirements alone do not determine voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. I estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county.

I coded the voter identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

To capture electoral context I included whether the county was in a presidential battleground state (any state in which the margin of victory for the winning candidate was five percent or less), and whether the county was in a state with a competitive race for governor and/or the U.S. Senate (also using the threshold of a margin of victory of five percent or less). Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus I added a variable to reflect the number of days between each state's registration deadline and the election.\(^8\)

\(^7\) Treating maximum voter identification requirements as a continuous variable yielded results in which voter identification requirements were negatively related to aggregate turnout. Those results can be found in Table A-1 in the Appendix to this report.

\(^8\) For states that had Election Day registration or no registration requirement (North Dakota), I assigned a value of zero to this variable.
Drawing from U.S. Census projections for 2003, I included the percentage of the voting-age population in each county that was Hispanic or African-American to control for ethnicity and race. I controlled for age using the 2003 Census projection for the percentage of county residents age 65 and older, and I controlled for socioeconomic status by including the median household income for 2002 in each county. \(^9\)

I estimated a series of random effects models to account for the likelihood that data from counties were correlated within each state (for further explanation of random effects and other multilevel models, see Bryk and Raudenbush 1992, Luke 2004, Singer 1998). \(^10\) I allowed the median income variable to have both fixed and random effects in each state to take into account variation in the cost of living in each state. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the estimated citizen voting-age population that voted in the 2004 election.

[Table 2 here]

Turning first to an analysis using the maximum identification requirements, two of the four requirements had a small and negative effect on turnout in 2004: matching one’s signature and providing a non-photo identification. Taking into account the reference variable of stating one’s name, the results indicate that turnout was lower in states that required signature matches or a non-photo identification than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Two contextual factors -- whether the county was in a state that was a battleground state and whether that state had a competitive race for governor and/or U.S. Senate-- increased voter turnout. The time between the closing date for registration and the election had a slight negative effect on turnout. As the percentage of Hispanics in the county’s population increased, turnout declined. The percentage of senior citizens in the county and household median income had positive effects on turnout. The percentage of African-Americans in the county did not have a significant effect.

The effects of the minimum voter identification requirements were non-existent. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county’s population continued to have a negative effect on turnout, as did the number of days between the closing date for registration and the election.

I then sought to test the hypothesis that voter identification requirements dampen turnout among minorities, a claim voiced by some critics of the requirements. To test this idea I incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. A chi-square test of the difference in the deviance for each model (represented by -2 log likelihood in Table 2),

---

\(^9\) To bring the income figures into a scale comparable to those of the other variables, I used the natural log of median household income.

\(^10\) The data analyses provided evidence that there was, indeed, a clustering of data within each state. The intraclass correlation, bounded by 0 and 1, measures the variation between the states. A random intercept model using only the intercept as a predictor generated an intraclass correlation of .43, indicating considerable variation between the states.
showed no significant improvement by including the interactions (p > 0.05). I report the coefficients for the models with the interactions in the Appendix in tables A-2 and A-3.

Analysis of the aggregate data at the county level generates some support for the hypothesis that as the identification requirements for voting vary, so does turnout. Specifically, in terms of the maximum requirements, the results suggest that requiring a signature match or non-photo identification is negatively related to turnout compared to requiring that a voter state his or her name. But the analysis showed that adding interactions between identification requirements and the percentage of the county that was African-American or Hispanic did not improve the fit of the model to the data.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991). Married individuals also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). To fully explore the effects of voter identification requirements on turnout, it is important to examine individual-level data as well.

Individual-level analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the advantages of the CPS is the sheer size of the sample. The survey’s Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The analyses reported here are based on reports from self-described registered voters. I omitted those who said they were not registered to vote. I also excluded those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. In addition, I eliminated from the sample respondents who said they were not U.S. citizens because the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey.

The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election. As in the analysis of aggregate data, I coded the voter

---

11 A reviewer for an earlier version of this paper recommended adding an education variable to the aggregate model. One version of the aggregate model not reported here included the percentage of adults in the county who had at least a college degree. The measure was highly collinear with the percentage of residents living below the poverty line, necessitating removal of the college degree variable from the model.

12 It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

13 The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown
identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.\textsuperscript{14}

In addition to the voter identification requirements, the models include two other state-level factors that might have influenced turnout in 2004: whether the state was considered a battleground state in the presidential election, and whether there was a gubernatorial and/or U.S. Senate race in the state (see Alvarez and Ansolabehere 2002, Alvarez et al. 2004, and Kenny et al. 1993 for similar approaches). As in the aggregate data analysis, the threshold that determined whether the state was a battleground state or had a competitive statewide race was a margin of victory of five percent or less.\textsuperscript{15} At the individual level, I controlled for gender, household income, and dummy variables for race/ethnicity, age and education. In terms of race and ethnicity, I created dummy variables to represent whether a voter was Black/non-Hispanic, Hispanic, or Asian (with white/non-Hispanic/other voters as the omitted category for reference purposes). I separated education into five dummy variables: less than high school, high school diploma, some college, college graduate, and graduate training. I omitted the "less than high school" variable from the model for reference purposes. Regarding age, I created four dummy variables to represent 18 to 24 years of age, 29 to 44, 45 to 64, and 65 years and older. I omitted the 18-to-24 category as the reference variable in the model.

Drawing on previous research on voting behavior, I also controlled for whether an individual was employed, or at least a member of the workforce (as opposed to being a full-time student, a homemaker, or retired). Both employment and workforce membership have been shown to be positive predictors of turnout (see Mitchell and Wlezien 1995). Marital status, whether one is a native-born citizen and residential mobility also have emerged as significant predictors of turnout (Alvarez and Ansolabehere 2002, Alvarez et al. 2004, Kenney et al. 1993, Wolfinger and Rosenstone 1980). I included in the model variables for whether a respondent was married (coded 1 if yes, 0 otherwise), and whether one was a native-born citizen (coded 1 if yes, 0 otherwise). I measured residential mobility by coding for whether the respondent had moved to a new address in the six months prior to the interview (coded 1 if yes, 0 otherwise).

Results

that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.\textsuperscript{14} Earlier versions of this paper included an individual-level analysis that included the five maximum voter identification requirements combined into a continuous variable. The results of that analysis, which found that voter identification requirements had a negative relationship with turnout, can be found in table A-4 in the Appendix.\textsuperscript{15} Given that the individual-level analysis focused on registered voters (as opposed to the citizen voting-age population in the aggregate analysis), I did not include the closing date for registration as a predictor of turnout in the individual-level analysis.
The dependent variable is whether a respondent said he or she voted in the November 2004 election (coded 1 for yes, 0 for no). I estimated models using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted. I estimated the models using robust standard errors to control for correlated error terms for observations from within the same state.

[Table 3 here]

The two models in Table 3 use either the maximum or minimum voter identification requirements in each state. The two models generate similar results. In each model, three of the voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. In other words, compared to states that require voters only to state their names, the requirements to sign one’s name, provide a non-photo identification, photo identification in the maximum requirements or affidavit in the minimum requires exert a negative influence on turnout.

Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had finished high school. Respondents who had moved within six months before the interview were less likely to say they had voted.

While the probit models provide statistical support for the influence of voter identification requirements and other variables on turnout, probit coefficients do not lend themselves to intuitive interpretation. Another common approach in studies of election requirements is to examine how the predicted probability of voter turnout would vary as election requirements vary. I used the probit coefficients to calculate the predicted probability of voting at each level of voter identification requirements while holding all other independent variables in the models at their means. I calculated the probabilities taking into account both maximum and minimum requirements.

[Table 4 here]

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability appear to decline from stating one’s name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names. In terms of the

16 In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).
17 The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of
minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

Race and ethnicity have generated particular interest in the debate over voter identification requirements. But incorporating dummy variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, I divided the sample into sub-samples and re-ran the probit models.

The effects of voter identification requirements were similar for white voters compared to the entire sample, which was not surprising given that white voters comprised 81 percent of the sample. Voters in states where the maximum requirement involved signing one's name, providing a non-photo identification or photo identification were less likely to vote than those in a state that required voters to give their names. Taking into consideration the minimum requirements, this was true only for voters in states that require a non-photo identification or an affidavit. White voters in photo identification states were 3.7 percent less likely to vote than were white voters in states where respondents gave their names. The difference in probability was 4.4 percent for voters in states where an affidavit was the minimum requirement.

Voter identification requirements also influenced turnout among Black voters, but to a lesser extent relative to white voters.

Of the maximum voter identification requirements, only the non-photo identification requirement reduced turnout compared to turnout in states that required voters to state their names. The predicted probability of voting was 5.7 percent lower for Black respondents in states that required non-photo identification. In terms of age, only African-Americans age 65 and older were more likely to vote than respondents in the 18 to 24 referent group. Respondents in all levels of education were more likely to vote than respondents without a high school diploma. Gender, income, living in a battleground state, being a part of the workforce and having been born in the United States also were positive predictors. Recent mobility tended to lower the probability of voting. None of the minimum identification requirements had a significant effect on voting, while most of the remaining variables had effects similar to those in the maximum requirement model.

all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.
Hispanic voters also were less likely to vote in states that required non-photo identification as opposed to stating one's name.

[Table 7 here]

Using the coefficients from Table 7 to calculate predicted probabilities, for both the maximum and minimum requirements, Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. Hispanic voters ages 45 to 64 and 65 and over were more likely to vote than their 18-to-24-year-old counterparts. Education and income also were positive predictors of voting. Interestingly, being a native-born citizen lowered the probability of voting, while native-born citizenship was a positive predictor for African-American voters and was not a predictor at all for white voters. It may be that naturalized citizens of Hispanic descent are more conscious of the value of voting rights than other groups.

Varying voter identification requirements influenced Asian-American voters as well. As with Hispanic and Black voters, Asian-American voters were less likely to turn out in states with non-photo identification requirements than in states where voters gave their names.

[Table 8 here]

Using the probit coefficients to calculate predicted probabilities, Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement. Asian-American voters also were 2.2 percent less likely to vote when signatures were the maximum requirement compared to stating one's name.

In terms of other predictors, there were no significant differences in terms of age or income. In contrast to Hispanic voters, where one was a naturalized or natural-born citizen did not affect the probability of voting. Those with high school or college diplomas or graduate training were more likely to turn out than those with less than a high school diploma. Women and married voters also were more likely to turn out than men and voters who were not married.

Discussion and conclusion

The results presented here provide evidence that as voter identification requirements vary, voter turnout does as well. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but still statistically significant.

In the aggregate data, requirements that voters match signatures on file, provide a non-photo identification or photo identification had negative effects on turnout compared to requiring that voters state their names. Interactions with specific groups – African-Americans and Hispanics – did not improve the fit of the aggregate data to the models. But differences emerged among specific groups in the individual-level data. The signature, non-photo identification and photo identification requirements all had negative effects compared to the requirement that voters simply state their names. These effects translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For
example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters (the gap widened to 3.7 percent for white voters when comparing photo identification to simply stating one's name).

That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements. This begs the question as to why photo identification requirements did not have a greater influence in 2004. It may have been due to the fact that photo identification was a maximum requirement in only five states, and each of those states accepted another type of identification as a minimum requirement.

In examining the effects of voter identification requirements on turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

\[\text{[18]}\] The individual-level data offer some insight here. If advance knowledge of the voter identification requirements were to dampen turnout, it is reasonable to expect that advance knowledge of those requirements also could discourage some individuals from registering to vote. I ran the same probit models using the November 2004 Current Population Survey data and voter registration as the dependent variable (coded 1 if the respondent said he or she was registered, and 0 if the respondent was not registered). Of all of the voter identification requirements, only requiring signatures or matching signatures had a significant effect on whether a respondent said he or she was registered to vote in 2004. In each instance the effect was negative.

APPENDIX D
Annotated Bibliography on Voter Identification Issues

Law Journals

  - Discusses HAVA a lot
  - Benefits of US adopting Mexican system of identifying voters and voter registration
  - Discusses HAVA, problems of 2000 election, discusses registration & identification
  - Discussion of HAVA requirements and voter ID, problems in 2000
  - Discusses changes in AL to their election law in 2003, including adding voter ID
  - HAVA discussed
  - Discusses challenging elections based on voter fraud & illegal votes
  - Discusses a GA law in 2001 removing hunting & fishing licenses from list of acceptable ID and a failed amendment to limit acceptable ID to photo ID only
  - General discussion of ways voters are verified, what happens when voters are challenged as illegal voters
  - Discusses a photo ID law passed in Michigan in 1997 (later declared violated EPC of 14th amendment)
  - Arguments against photo ID
  - Discusses voter registration as a way to combat fraud & several different ways to do it

Historical articles:
  - Lot of analysis on HAVA and voter ID
  - Little bit of historical
  - Arguments for and against certain types of voter ID laws
REVISED FINAL DRAFT
For review by the EAC's Advisory Boards

  - History of voting & requirements & laws throughout time
  - Future: I-voting & e-registration – improvements in voter ID which would result

Marginally relevant/limited discussion of Voter ID issues
  - Discusses HAVA & implementation
  - Discusses an AL law expanding exemptions to ID requirement if 2 poll workers identify them
  - Internet voting
  - Voter ID and Internet voting
  - Costs & Benefits of Internet voting
  - States using or examining Internet voting
  - Discusses illegal ballots, fraudulent registration
  - Anti fraud election reform in Missouri
  - Vote by mail and discusses fraud issues involved
  - Voter fraud arguments against NVRA
  - History of voting and requirements
  - Theory

Appendix E
State Statutes and Regulations Affecting Voter Identification
Compiled by The Moritz College of Law, The Ohio State University
Available in electronic form
Report to the
U. S. Election Assistance Commission
On
Best Practices to Improve Voter Identification Requirements
Pursuant to the
HELP AMERICA VOTE ACT OF 2002
Public Law 107-252

May 16, 2006
Submitted by
The Eagleton Institute of Politics, Rutgers, The State University of New Jersey
The Moritz College of Law, The Ohio State University
The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

The Eagleton Institute explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

The Moritz College of Law has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. Election Law @ Moritz illuminates public understanding of election law and its role in our nation's democracy.

A draft of this report and the statistical analysis in its appendix were critiqued by a Peer Review Group. The comments of its members improved the quality of our work. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in our recommendations.

REPORT AND RECOMMENDATIONS TO THE EAC
VOTER IDENTIFICATION ISSUES

Report Background
The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

EXECUTIVE SUMMARY AND RECOMMENDATIONS

Background and Methods
This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.
Opponents seek to forestall more stringent identification requirements, such as for government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters—such as, they argue, racial and ethnic minorities, the young, and elderly voters—may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.

Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate and investigates whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout, and important first step in assessing tradeoffs between ballot security and ballot access. The aim is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project’s effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis was conducted to examine the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model’s findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters’ access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on turnout and on vote fraud is to collect more information on both topics systematically and regularly.
Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are: the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs. Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, although it used different statistical methods and two different sets of data on turnout in 2004 election, it points to the same general finding. As discussed at greater length in the appendix to this report, stricter voter identification requirements were correlated with reduced turnout in the models employed. As explained below, these models find that a statistically significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible voters, the EAC has contracted with other researchers to study vote fraud issues.

---

1 See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985, Political Behavior, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

2 The EAC has contracted with other researchers to study vote fraud issues.

3 Appendix C: Tim Vercellotti, Eagleton Institute of Politics, Analysis of Effects of Voter Identification Requirements on Turnout.
Methodology
The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters.\(^4\) The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding that the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be asked to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be required to do or show, in order to cast regular ballot (again leaving aside a state challenge process). We have included "maximum" requirements in our analysis, and not simply "minimum" requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the "maximum" of being asked to show photo ID may deter some voters even though the "minimum" would allow them to vote without photo ID.

\(^4\) Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146
It is worth emphasizing that, at the time of the 2004 election, there was no state that had a “minimum” requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings
As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis’s aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names. With the addition of the registration closing data to the aggregate analysis, photo id is no longer a
significant predictor of turnout. Signature match and non-photo id remain significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a “maximum” requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a “minimum” requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws – such as less user-friendly voter registration systems – may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for
example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast. And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements—how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls—are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.

2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls.

---

5 Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," Arizona Republic, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.
For review by the EAC's Advisory Boards

3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC can also use this information to encourage the states to assess the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.

I. Useful information could be supplied by state-sponsored surveys of voters by local election officials. It would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.

II. Surveys to ask voters what they know about the voter ID requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.

III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks statutory or regulatory requirements. Such reports should be available to the public.

4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors:
REVISED FINAL DRAFT
For review by the EAC's Advisory Boards

the convenience of the voter, the total time allowed to evaluate ballots\(^6\), and the safe
harbor provision in presidential elections.

5. Recommendations to the states from EAC should reflect current judicial trends.
Requirements that voters provide some identifying documentation have been upheld, where
photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is
more uncertain.

SUMMARY OF RESEARCH

Background and Approach of the Study

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social
scientists have long studied how election rules affect participation in elections. The general view
today is that the individual citizen makes the choice of whether the vote in a way similar to other
decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting
are fairly stable and hard to specify given the remote probability that any one vote will make a
difference in an election. But whatever the benefit as perceived by an individual voter, as the
costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that
a citizen will vote decrease. Not all groups in the population calculate the cost of participation in
the same way, so that election laws (such as registration or identification requirements) may
affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad
consensus that the rules of elections affect turnout, but note the important differences in the
details of what groups may be most affected.

- Bowler, Brockington and Donovan in “Election Systems and Voter Turnout: Experiments
electoral systems help shape turnout by altering the benefits perceived by voters. For
example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40
  years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First."
  *American Political Science Review*. 61:2 (June 1967) found that local variations in the

\(^6\) Our research on provisional voting reveals that states that provide more than a week to evaluate
provisional ballots end up counting substantially more of those ballots than states that provide less than a
week.
rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.

- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly.* 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics.* 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.

- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior.* 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review.* 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review.* 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.

- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review.* 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior.* 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.
Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior.* 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics.*, 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

**Voter ID requirements on Election Day**

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.\(^7\) The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.\(^8\)

---

\(^7\) As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

\(^8\) Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."
We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare. Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter ID

---

9 "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." Harvard Law Review 119:1144. John Fund’s 2004 book, Stealing Elections: How Voter Fraud Threaten Our Democracy, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about disenfranchisement; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with voter fraud.
ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot. Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected. And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards --legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest 7 questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?

10 For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

11 The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. Election Day Study, Chapter 6, p. 5.

12 “Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce; in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud.” Harvard Law Review 127:1144 (2006)
2. How effective is the ID requirement in increasing the security of the ballot? How well can
it be coordinated with a statewide voter database?\(^{13}\)

3. How practical is the requirement? (Can it be administered smoothly by the staff and
budget likely to be made available? How much additional training of polling place
workers might be required?) Is it simple enough or can it be defined with sufficient clarity
that poll workers throughout the state can administer it uniformly and with a minimum of
local interpretation made on the fly under the pressure of Election Day?\(^{14}\)

4. How cost-effective is the system? Does it demonstrably increase the security of the
ballot affordably, measured in both monetary and other costs? To improve
understanding of the non-monetary component of the costs, conducting a voter impact
study might be appropriate. The voter impact study would examine, before the adoption
of the regulation, the cost of compliance by the voter (such as the cost in time and
money of acquiring a photo ID card), any offsetting benefits to voters, and the possible
disparate effects of the regulation on various groups of voters.\(^{15}\) A thorough, objective
impact statement that demonstrated the nexus between the identification regime and the
integrity of the ballot could provide protection against inevitable legal challenges.

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among
particular groups, is it possible to take other steps to ameliorate the adverse
consequences?\(^{16}\)

6. Does it comply with the letter and spirit of Voting Rights Act?

7. The seventh question is the most difficult to answer. How neutral is the effect of the
Voter ID requirement on the composition of the qualified and eligible electorate? Might it,

\(^{13}\) See the final section of this report for a brief overview of possible effects of a statewide voter database
on voter identification issues.

\(^{14}\) In New York, in 2004, disparities in training and voting information were made apparent in a study
finding elections officials had wildly varying interpretations of what the state’s voter identification
requirement actually was. Tova Wang, “Warning Bell in Ohio,” December 5, 2005. Website, the
Foundation for National Progress.

\(^{15}\) “Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures
need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-
grounded constitutional challenges that will arise in the courts. Only as states grow more adept at
administering elections will courts likely demonstrate greater willingness to uphold strict identification

\(^{16}\) For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to
a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the
new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested
combining a national voter ID with universal registration. See his “Beyond the Margin of Litigation:
Reforming U.S. Election Administration to Avoid Electoral Meltdown,” 62 Washington and Lee Law
intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

Voter ID and Turnout

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, Voter ID Requirements. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states). Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all "photo ID" states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as "maximum," the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum requirements.

---

17 Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

18 As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.
identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, no state had a "minimum" requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state's voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice. Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state's legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

19 One state election official told us that, "We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is."

20 See Appendix 1 for a more detailed summary, including citations and statutory language, of the identification requirements in each state.
### Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

* Each state applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.
1 Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.
2 Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.
3 Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.
4 Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.
5 Voters lacking a photo ID could vote by providing another form of ID in 2004.
6 Voters lacking a photo ID could vote by providing another form of ID in 2004.
7 Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.
8 Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.
Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ($r = -.30$, $p < .05$). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ($r = -.20$, $p = .16$). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

</tbody>
</table>

This table displays the mean turnout using the aggregate county level data for each state in 2004.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend
emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.\(^{21}\)

Voter identification requirements are just one factor that may affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American\(^{22}\)
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus our model takes into account the number of days between each state’s registration deadline and the election.

\(^{21}\) The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one’s name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

\(^{22}\) The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.
The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that voter identification requirements such as signature matching, a non-photo ID or a photo ID are associated with lower turnout than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election. 23

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum

23 This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.
requirements, a signature match, non-photo identification or photo identification were correlated with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from self-described registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens; the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey. In addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have

24 For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991). Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

25 It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).
influenced turnout in 2004. The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation. Table 3 below shows predicted probabilities (calculated from the probit coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.

---

26 The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.
27 The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.
28 A probit model is a popular specification of a generalized linear regression model, using the probit link function.
29 In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

N = 54,973

Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies stating one’s name to providing photo identification or an affidavit, with all other variables held constant. N.S. = nonsignificant coefficient in the probit model.

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one’s name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names. In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one’s name was the maximum or minimum requirement.

30 The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.
Race and ethnicity have generated particular interest in the debate over voter ID requirements. The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

Varying voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.
In the aggregate data, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names.

The signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names. That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state’s electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day, or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Litigation Over Voter ID Requirements
A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is not the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (Common Cause v. Billups and Indiana Democratic Party v. Rokita). Cases challenging the mandatory disclosure of voters’ Social Security numbers on privacy grounds have yielded mixed results.

Non-photo identification. For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the
In Colorado Common Cause v. Davidson, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in League of Women Voters v. Blackwell, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). Id. This was found to be consistent with HAVA.

Photo ID. Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.\(^{32}\) Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (Common Cause v. Billups, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 32 Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.
2428690, at *1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at *1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. Id. at *1, 3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

Privacy. In Greidinger v. Davis, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in McKay v. Thompson, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Developments since 2004
Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stages of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at
the polls in order to cast a regular ballot if the numbers recorded on the registration have not
been verified (or if no verifiable number appears on the registration). It recognizes the HAVA
requirement that if the number provided by the voter has not been verified and if the voter does
not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they
have to provide ID within 48 hours in order for their vote to count, as is the case with first-time
mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making
timely recommendations of best practices for all states to consider.

Conclusions
The analysis of voter ID requirements is complex. It takes into account important values
associated with an electoral process, such as ballot access and integrity. The continuing effort
to understand how voter ID requirements may affect turnout and the integrity of the ballot could
benefit from additional factual information, including statistical analyses. Our research includes
a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated
with the stringency of the voter ID requirement imposed by that state. Additional empirical
research of this nature, with additional data collected by or for the EAC, would further illuminate
the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a
strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional
research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements
will divert more voters into the line for provisional ballots. The consequence of increased
reliance on provisional ballots can be longer lines at the polls and confusion, without
necessarily a clear demonstration that the security of the ballot is correspondingly increased. 33

The debate over voter ID in the states would be improved by additional research sponsored by
the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID
requirements, as well as precinct-level analyses that would allow more finely tuned assessment
of the correlation between stricter identification requirements and turnouts. Further research
could also identify methods to eliminate the need for voters to bring specific identity documents

33 In this connection, the Brennan Center's response to the Carter-Baker Commission report observes
that, "while it might be true that in a close election "a small amount of fraud could make the margin of
difference," it is equally true that the rejection of a much larger number of eligible voters could make a
much bigger difference in the outcome." Response to the Report of the 2005 Commission on Federal
Election Reform, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf
Of The National Network on State Election Reform, September 19, 2005
with them to the polls, while assuring that each voter who casts a ballot is eligible and votes only once.
MEMORANDUM

TO: DOUG LEWIS, CHAIR
     EAC BOARD OF ADVISORS
FROM: COMMISSIONER RAY MARTINEZ
SUBJECT: CREATION OF STATEWIDE VOTER REGISTRATION LIST IMPLEMENTATION WORKING GROUP
DATE: MARCH 11, 2005

The Help America Vote Act of 2002 ("HAVA") requires that each State implement a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained and administered at the State level. Moreover, the EAC is required by HAVA to adopt voluntary guidance to assist States in meeting this important requirement.

Accordingly, to assist the EAC in developing voluntary guidance, the EAC requests your assistance in identifying up to four current members of the Board of Advisors who would be willing to serve on a Statewide Voter Registration List Implementation Working Group ("Working Group"). This Working Group will be comprised exclusively of state and local election officials drawn primarily from the current membership of the EAC’s Board of Advisors and Standards Board, in addition to representation from the Department of Justice.

The immediate objective of the Working Group will be to review the minimum requirements and essential elements to creating a "HAVA-compliant" statewide voter registration list, as well as related implementation and operational issues. On a more long-term basis, the EAC is negotiating an agreement with the National Academy of Sciences ("NAS") in order to bring members of the Working Group together with information technology experts in databases, networking and security in order to discuss lingering technology issues related to the implementation and on-going use of statewide voter registration lists.

1 Help America Vote Act, Pub.L. 107-252. Title II, § 303(a), 116 Stat. 1708 (codified at 42 U.S.C. § 15483 et seq.). An informal survey conducted by EAC staff last month found that States are in various stages of meeting this HAVA requirement.

The Working Group will begin its work via a two-day meeting to be held in Washington, D.C., on March 30 – 31, 2005. Based on the results of this initial meeting, EAC staff will produce draft voluntary guidance, which, after an appropriate public comment and hearing process, will be considered for final adoption by the EAC.3

Please forward the names and contact information of the four members of the EAC Board of Advisors who wish to participate in the Working Group no later than Friday, March 17, 2005 to Karen Lynn-Dyson. Ms. Dyson can be reached via email at klynndyson@eac.gov and telephone at (202) 566-3100.

Thank you.

3 EAC will implement a process for adoption of any final guidance which is in accordance with the public notice, comment and hearing provisions contained in HAVA, as well as a review period for the EAC's Board of Advisors and Standards Board.
MEMORANDUM

TO: MICHAEL SCIORTINO, CHAIR
    PEGGY NIGHSWONGER, VICE CHAIR
    EAC STANDARDS BOARD, EXECUTIVE BOARD

FROM: COMMISSIONER RAY MARTINEZ

SUBJECT: CREATION OF STATEWIDE VOTER REGISTRATION LIST
          IMPLEMENTATION WORKING GROUP

DATE: MARCH 11, 2005

The Help America Vote Act of 2002 ("HAVA") requires that each State implement a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained and administered at the State level.\(^1\) Moreover, the EAC is required by HAVA to adopt voluntary guidance to assist States in meeting this important requirement.\(^2\)

Accordingly, to assist the EAC in developing voluntary guidance, the EAC requests your assistance in identifying up to eight current members of the Standards Board who would be willing to serve on a Statewide Voter Registration List Implementation Working Group ("Working Group"). This Working Group will be comprised exclusively of state and local election officials drawn primarily from the current membership of the EAC’s Board of Advisors and Standards Board, in addition to representation from the Department of Justice.

The immediate objective of the Working Group will be to review the minimum requirements and essential elements to creating a “HAVA-compliant” statewide voter registration list, as well as related implementation and operational issues. On a more long-term basis, the EAC is negotiating an agreement with the National Academy of Sciences ("NAS") in order to bring members of the Working Group together with information technology experts in databases, networking and security in order to discuss lingering technology issues related to the implementation and on-going use of statewide voter registration lists.

\(^1\) Help America Vote Act, Pub.L. 107-252, Title II, § 303(a), 116 Stat. 1708 (codified at 42 U.S.C. § 15483 et seq.). An informal survey conducted by EAC staff last month found that States are in various stages of meeting this HAVA requirement.

The Working Group will begin its work via a two-day meeting to be held in Washington, D.C., on March 30 – 31, 2005. Based on the results of this initial meeting, EAC staff will produce draft voluntary guidance, which, after an appropriate public comment and hearing process, will be considered for final adoption by the EAC.³

Please forward the names and contact information of the eight members of the EAC Standards Board who wish to participate in the Working Group no later than Friday, March 17, 2005 to Karen Lynn-Dyson. Ms. Dyson can be reached via email at klynndyson@eac.gov and telephone at (202) 566-3100.

Thank you.

³ EAC will implement a process for adoption of any final guidance which is in accordance with the public notice, comment and hearing provisions contained in HAVA, as well as a review period for the EAC's Board of Advisors and Standards Board.
I think that Karen and I have captured all of the changes that needed to be made including answering the question posed by Commissioner Hillman regarding footnote #2.

Please take one final look.

EAC Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

EAC Declines to Adopt Draft Report

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations.
So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

**Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that affect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

- Publish a series of best practice case studies which detail a particular state's or jurisdiction's
experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

In fact, we did not ever meet with Eagleton on the research and statistical methodology they chose to employ with the Voter ID portion of the study.

Eagleton did brief the Commission twice but the focus on was on the provisional voting portion of the study. Certainly, in hindsight it would have been appropriate to have gotten such a briefing. I believe EAC thought it was sufficiently "covered" given the substantial involvement of a project working group that we had approved and with the use of an EAC peer review group.

Certainly, we'll be far more cautious the next time around.

Commissioners,
Attached is a draft press release about Commission actions surrounding the voter ID research. Please get your comments/edits back to me by Friday morning, and let me know if you have any questions. I will coordinate with Karen and Julie regarding its release, and tomorrow I will present you with a recommended strategy for the announcement of your decision. (Of course, it will not go out before the delivery of a related letter.)

MEMORANDUM

To: Commissioners Davidson, Rodriguez, Hunter and Hillman
Fr: Jeannie Layson
Cc: Tom Wilkey, Julie Hodgkins, Karen Lynn-Dyson, Bryan Whitener
RE: Communications Strategy for Release of Voter ID Tally Vote Results

In anticipation of the release of the results of the tally vote and all of the information provided by the contractor, I suggest taking the following steps to effectively communicate your decision. Taking this approach will help us control how the information is distributed, how it is framed, and how to focus the discussion on the positive outcome of your decision.

The bottom line is that we want to try our best to make this a story about EAC’s decision to conduct a thorough and in-depth look into the subject of voter ID, and we have decided to release the preliminary research. We do not want this to evolve into a storyline about squabbling between EAC and Eagleton.

I have provided a suggested overall message that reflects the action taken, as well as questions we should be prepared to answer.

Please let me know if you have any questions about my proposal, and I look forward to your input.
PRELIMINARY ACTIVITIES
Prior to the completion of the tally vote and the subsequent release of the results and the contractor’s materials, I suggest taking the following steps:

1. Discuss EAC’s decision with the contractors in advance of distributing the press release and discussions with reporters so that they have an opportunity to respond and also so they will be well informed and prepared to discuss the facts with reporters or others who will most likely contact them.

2. Prior to release of EAC’s decision, reach out to key Hill staffers who have been following this issue, including those members who have requested this data in the past. This should include staffers for the House Appropriations Committee Subcommittee on Financial Services and General Government since the Committee requested this information a few weeks ago. It should be made clear to committee staffers that the tally vote is the culmination of a directive made by the EAC chair in Feb. that the agency move forward to complete this project. These staffers should also be included on our list of key stakeholders.

3. Executive director should determine whether there are other key stakeholders that should be made aware of this decision from EAC personally, not from a press release. Possible candidates include members of Congress, NASS, individual secretaries of state, DOJ, and NASED.

PUBLIC ROLL-OUT
Once the above preliminary steps have been completed, EAC Communications will:

1. Post the press release and the related data on the website, with a link from the home page.

2. Prior to release of the tally vote decision and related data, call Richard Whitt of USA Today, Will Lester of AP, Chris Drew of the NYT, and Zach Goldfarb of the WaPo and let them know we are about to release the information. Offer interviews with the chair or other commissioners.

3. Send the press release (with a link to the research) to all recipients in the media database. This includes national dailies, as well as wire services such as the Associated Press.

4. Send the press release (with a link to the research) to all recipients in the stakeholder database. The database consists of election officials, advocates, and other interested parties, including representatives from organizations who have been critical of EAC, including VoteTrust USA and the People for the American Way.
OVERALL MESSAGE
Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The findings of the preliminary research, which focused exclusively on the 2004 general elections, was insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors including, the many changes in state laws and regulations that have occurred since the 2004.

Q&A
We should be prepared to answer the following questions:

Q: Why not release the draft fraud report, too?
A: EAC issued a final Voting Fraud and Voter Intimidation Report in December 2006, which included recommendations adopted by the Commission to conduct a comprehensive assessment of all claims, charges and prosecutions of voting crimes.

In the case of the voter ID report, the Commission chose not to adopt a final report because it was determined that there was insufficient data to provide meaningful conclusions.

Q: You cited concerns with the contractor's methodology and analysis. Didn't your contract with Eagleton include specific language regarding these issues?
A: Yes, but in retrospect, perhaps we could have done a better job articulating how we wanted this research to be conducted.

Q: During the course of the project, did you see draft reports? If so, why didn't these concerns get addressed at that time?
A: We did receive progress reports, and when we identified areas of concern, we discussed it with the contractor. It was because of these concerns that EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

Q: During the course of the contract, did you ever express these concerns with Eagleton?
A: Yes, and as a result of these conversations, EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

Q: You spent more than $500,000 for a report the Commission doesn't think should be adopted – so basically you're flushing a lot of money down the drain. Is this a wise use of taxpayer dollars?
A: There is value in what Eagleton provided. It will help provide a baseline for how to move forward. And even though their research raised many questions, contemplating the answers to those questions has informed us on how to move forward.

Q: If you were not satisfied with the final product, why did you pay for it?
A: We adhered to the terms of the contract.

Q: EAC received this data in June of last year. What has taken so long to bring it to a conclusion?
A: This is an important issue, one that deserves careful deliberation and a thorough approach. Yes, we like to get things done quickly, but it is more important to take the time to get things right.
TRANSITION PHRASES
To stay on message and avoid being dragged into discussions about anything other than the action taken, employ the following phrases and transition back to the overall message.

**Overall Message**
Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The findings of the preliminary research, which focused exclusively on the 2004 general elections, were insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors, including the many changes in state laws and regulations that have occurred since 2004.

**Bridge/Transition Phrases**
- What's really important here...
- The bottom line is...
- The point is...
- We have a responsibility to...
- I'll let others speak to that, but let me tell you what's important to EAC...
- Everyone agrees that...
I think we should be prepared to answer a question that may go something like: *What are your specific objections/concerns with the methodologies utilized by Eagleton?*

Subject: FOR YOUR APPROVAL: Voter ID PR and Roll Out Strategy

Commissioners,
I have incorporated your edits, so please take a look at the latest drafts of both documents and let me know if you have further changes. I recommend making this public on Thursday. If possible, please let me know by the end of the day on Wed. if you have additional edits. Press release edits were made in the first two paragraphs, including backing off calling this a "multi-year study," and a more direct description of the action you took -- you declined to adopt the report. The only edit in the memo is new language in the Q&A that points out that the $500K included work for both prov. voting and voter ID.

Thank you, and let me know if you have any questions.

Karen will present our discussion and conclusions tomorrow. However, when we left the briefing, I think everyone believed that I would provide comments since I will not be able to be on the phone. As such, I am transmitting my comments through this email. I will respond or address Eagleton's numbered paragraphs (note that there is no paragraph 4).

1. There is no need to address this as Eagleton agrees that they only reviewed one election's statistics. The statement of work for the contract told them to review the status of the law in 2004, but in no way limited their analysis to a single year.

2. I believe that Eagleton's issue here is one of semantics. They don't like the phraseology of this sentence. However, the sentence is true and is demonstrated by the sentence in paragraph 2 of the statement that they reviewed and to which they provided comments. That paragraph specifically contains the following information: "Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates (FN2) and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau (FN3)". Eagleton made two sets of comments to Footnote 2, which is imbedded in the sentence that was just quoted. They explained their methodology in those comments and that methodology was captured in footnote 2. That footnote specifically contains the following sentences: "These data did not differentiate between citizens and non-citizens;... Thus, 2004 estimates of voting age population include person who are not registered to vote."

3. Eagleton objects to the use of the word "so" in the second sentence. They believe that this creates an inference that they only used the second set of data because the first did not show significant correlations. While generally speaking, I believe that this inference is at least partially true, since researchers are always searching for a set of data that will show a statistically significant correlation and will proceed to a different set of data if the first does not show it, it is not the intended inference of these two sentences. The point is to show that of the two data sets that they used one showed no significant correlation and the second showed some correlations (however not all variables showed correlation). And, that the second set of data -- the one that showed correlation was questionable because of the unusually high turnout rate that was reported. As such, we have agreed to remove the words "so" at the beginning of the second sentence and "only" in the middle of the second sentence -- see #9).

4. There is no number 4.

5. I believe that the statement as contained in the EAC statement is TRUE. Stating one's name is not an independently verifiable form of identification, and I think those are the forms of identification that we are talking about. I can walk into any polling place in the country and state the name of any person. Unless the poll worker knows me or knows the person whose name I have used, there is no way to independently verify whether my statement is true. Conversely, my signature can be compared, my address can be verified, or my driver's license can be scrutinized to determine if I am the person that I purport to be. While it is true that I identify myself on the phone or in person all the time by stating my name, it is not for the purpose of determining my eligibility to vote in a particular precinct, etc. I believe that when the term identification is used in the context of voting that it must mean that the voter provides some independently verifiable form of identification. Having said this, I understand that this may be a point of disagreement for others. But, as for me, this statement is true.

6. Based on conversations with Karen concerning the two groups-- one assembled by Eagleton and one
assembled by EAC -- both "questioned" the methodology and statistical analysis employed by Eagleton. The group assembled by Eagleton was referred to by them in their report as their "peer review group." Karen feels that "working group" is not an accurate description of the group assembled by EAC, so she has language to use to replace "independent working group" that captures the essence of that group.

7. See response to #2, above.

8. See response to #1, above.

9. See response to #3, above.

10. See response to #6, above.

11. I believe that the Commission must act on this report. Merely stating what we will do in the future will not distance us from this work and will result in media and others quoting Eagleton's work as an "EAC" report. It has been my understanding that the consensus of the group is to "decline to adopt." I believe that this is the right action.

My flight departs at 9:20 a.m. (EDT) and I do not arrive until 12:15 p.m. (EDT). However, if you have questions concerning my comments, I will be around tonight and will be available tomorrow afternoon by Blackberry.

I have not reviewed the various laws, but I believe that it would require that kind of review to answer your question accurately. My guess is that much like other election-related provisions, the language of the statute and the placement of the statute in the code or statutory scheme will dictate the answer to the question. Some may not even be written into statute. If you want me to, I can get someone to start working on that review.

Julie, in your legal opinion, is stating one's name considered identification in the states where it is the threshold requirement?

Commissioners,

The press release, the statement, and the draft report has been posted on our site. The press release is being distributed, and is on the way to all of you and the entire EAC staff. The following activities have occurred:

1. Press release was sent in advance to Eagleton.
2. I called Wendy Weiser of the Brennan Center and sent her the info.
3. I called and sent the info to Ray M. and Paul D.
4. I sent the info to Tom Hicks and Adam A.
5. Tom called Dan Tokaji, Dan Oak, and Rep. Hinchey's office.
6. Karen gave the three EAC experts a heads up.
7. Comm. Rodriguez was interviewed by NPR (the only outlet that showed any interest), as was Eagleton. Eagleton told NPR they are glad we are expanding the scope. Interview will run on affiliates today at approximately 5:44 pm EST.
8. I offered interviews to USA Today, WaPo, NYT, and AP but none were interested.
9. I have kept Eagleton apprised of our activities.

I'll continue to keep you apprised as the day goes on, and please let me know if there's anyone else you'd like me to contact.

EAC to Launch Comprehensive Study of Voter ID Laws

WASHINGTON - The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report, which focused on only one election cycle, was not sufficient to draw any conclusions. The Commission declined to adopt the report, but is releasing all of the data to the public.

The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at www.eac.gov. The Commission's statement regarding its decision is attached.

"After careful consideration of the initial research, the Commission decided this important issue deserves a more in-depth research approach, and that it should be examined beyond only one election cycle," said EAC Chair Donetta Davidson. "The Commission and our contractor agree that the research conducted for EAC raises more questions than provides answers."

EAC's strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission's February 8, 2007 public meeting. For more information about the public meeting, including the agenda, transcript, and testimony go to http://www.eac.gov/Public_Meeting_020807.asp.

EAC's future research on this topic will be expanded to include more than one federal election, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC's comprehensive research approach will undertake the following activities:
* Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements.

* Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation. EAC will use some of the information collected by the contractor as well as additional data from the states to develop this baseline.

* In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification.

* Study how voter identification provisions that have been in place for two or more federal elections have impacted voter turnout, voter registration figures, and fraud.

* Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

###

**EAC Statement on Study of Voter Identification Requirements**

**Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing
turnout rates among states for one election - November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document* was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates* and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.*

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

EAC Declines to Adopt Draft Report

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.* Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

*1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

*2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004
estimates of voting age population include persons who are not registered to vote.

* 3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

Further EAC Study on Voter Identification Requirements

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

* Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.

* Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

* In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

* Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

* Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Hinchoy Statement on U.S. Election Assistance Commission's

Release of Report on Voter Identification Issues

Washington, DC - Congressman Maurice Hinchey (D-NY) today released the following report in response to the U.S. Election Assistance Commission's (EAC) release of a report on voter identification issues that was submitted to them by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, and Ohio State University's Moritz College of Law. Hinchey directly requested the release of the report when EAC Chairwoman Donetta Davidson appeared earlier this month before the House Appropriations Subcommittee on Financial Services, of which the congressman is a member. Davidson told Hinchey at the hearing that she would provide the subcommittee with the report that is being released to the public today. Hinchey also requested the release of a separate report on voter fraud and intimidation. The Help America Vote Act (HAVA) requires the EAC to conduct and make available to the public studies regarding certain voting issues.

"I am very pleased that following Chairwoman Davidson's appearances before Congress the EAC decided to do the right thing and make public the Eagleton Institute of Politics study on voter identification issues. I hope that this decision signals a new day of transparency and sets a precedent for all future and previous studies and reports submitted to the EAC.

"When Chairwoman Davidson came before our subcommittee a few weeks ago, I also requested that the EAC make public another report about voter fraud and voter intimidation submitted to them by two outside consultants. It is my hope they will release this report to the public as well. The EAC has the responsibility to keep the public informed on any findings it has with regards to voter fraud, intimidation, and any other electoral issues.

"As we work to increase voter turnout and make our democracy function more effectively, it is imperative that potential voters are assured that they will be able to cast their votes fairly and in an environment free of intimidation. To achieve that goal, the EAC must be open with the information it receives in order to help identify voting problems and make recommendations on fixing them."

Subject: The Side By Side Project

I have made the following suggestion to Tom:

Tom:

I am not so sure having an election official do the side by side is the best way to go. This issue is not about election officials. It is about DC rat hole politics and the presentation of research "data."

I offer the following names for consideration.

Bruce Cain and Raymond Wolfinger. Both teach at Berkeley although Wolfinger retired last spring. Both are considered at the top of the poli sci hierarchy, in terms of competence and status. I am told they are very good scholars who do not have a reputation for partisanship, although they have been involved in "the real world of politics."

Here are their Web sites:
I am going to have to learn the DC vernacular--"rat hole" is a new term for me. I think Bruce is pretty identified w Dems so I think there may be push back on him--I think that's why Tom was going for an EO, to get one of the non-partisan folks involved. We should get the best person for our audience--so I think we should identify our audience and I think that is the Congress.

So, do we now wait until a final decision is made about the release of the report, in which we might say, “EAC has voted to release the report with a side by side...etc.”?

At any rate, I urge that if we do decide to release the report, that we still send this out now and then send the side-by-side when it is ready.
Commissioners,

The chair has asked me to provide you with the memo she just submitted to Curtis Crider, requesting a review of our contracting procedures surrounding the voter identification and vote fraud and voter intimidation research projects. She has asked me to write a press release about this decision, which I will send to you shortly. She requests that we incorporate the commission's request into the letter to the advisory boards and to Congresswoman Lofgren. She also requests that we respond to Sen. Feinstein's letter, letting her know that we are working to comply with her request, but we wanted to alert her to the action we've taken.

I am going to circulate this to the staff so everyone will be aware of this action. Please let me know if you have any questions, and I will have a press release for your review shortly. Attached to the press release will be this memo, letters from Members of Congress regarding this issue, and the recent statements from Congressmen Hinchey and Serrano.

MEMORANDUM

To: EAC Inspector General Curtis Crider
Fr: EAC Chair Donetta Davidson
Cc: Commissioners Rodriguez, Hillman and Hunter, Tom Wilkey, and Julie Hodgkins
RE: EAC requests review of contracting procedures

On Friday, April 13, each of my three colleagues -- Rosemary Rodriguez, Gracia Hillman, and Caroline Hunter -- agreed with my recommendation that we issue the following formal request to the Commission’s Office of Inspector General to review the circumstances surrounding two recent EAC research projects -- vote fraud and voter intimidation and voter identification.

Background
The U.S. Election Assistance Commission (EAC) is an independent, bipartisan Commission created by the Help America Vote Act (HAVA) of 2002.
EAC develops guidance to meet HAVA requirements, adopts voluntary voting system guidelines, accredits voting system test laboratories, certifies voting systems and audits the use of HAVA funds. HAVA also directs EAC to maintain the national mail voter registration form developed in accordance with the National Voter Registration Act (NVRA) of 1993.
The Commission serves as a national clearinghouse and resource of information regarding election administration. It is under the Commission’s clearinghouse role that research projects are conducted with the goal of providing information that will lead to improvements in election administration, as well as inform the public about how, where and when we vote.
The voter identification research was conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics (“Contractor”). The contract, awarded in May 2005, required the Contractor to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches. Last month, the commission voted unanimously not to adopt the report, citing concerns with its methodology, but voted to release all of the data provided by the Contractor.
The vote fraud and voter intimidation research was conducted by Tova Wang and Job Serebrov (“Consultants”). The contracts, awarded in September 2005, issued to these Consultants tasked them with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the Consultants were responsible for “creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort.”

Review Request
The actions taken by the Commission regarding both the voter identification and the vote fraud and voter intimidation research projects have been challenged. Specifically, Members of Congress, the media, and
the public have suggested that political motivations may have been part of the Commission's decision making process regarding these two projects. Also, the Commission has been criticized for the amount of taxpayer dollars that were spent on these two projects, as well as how efficiently these projects were managed.

The Commission takes these allegations very seriously, and we request that you fully review the following issues and provide the Commission and the Congress with a report of your findings as soon as possible. The Commission stands ready to assist you in these efforts and will provide whatever information, including memos, emails and other documents you will need. Cooperating with your review will be the staff's top priority.

1. Current Commission policy regarding awarding and managing research contracts.
2. Issuance and management of the vote fraud and voter intimidation contract.
3. Circumstances surrounding the receipt of information from Consultants regarding the vote fraud and voter intimidation project.
4. Circumstances surrounding staff efforts to write a final report for Commission consideration.
5. Identification of staff members who assisted in the editing and collaboration of the final vote fraud and voter intimidation report for Commission consideration.
6. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the vote fraud and voter intimidation project.
8. Issuance and management of the voter identification contract.
9. Circumstances surrounding the receipt of information from Contractor regarding the voter identification report.
10. Identification of staff members who assisted in the editing, collaboration, and recommendation to the Commission regarding final adoption of the voter identification report.
11. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the voter identification project.
12. Circumstances surrounding Commission deliberation whether to adopt a final voter identification report.

For your information, I have attached statements and related correspondence from Members of Congress, and a statement issued by the Commission regarding the criticism.

It is our hope that your findings will instruct us how to move forward in a more efficient, effective and transparent manner. The Commission takes its mandates under HAVA very seriously, and this small Commission has an enormous amount of work to conduct, including testing and certifying voting equipment, providing guidance and assistance to election officials, and auditing the proper use of the $3.1 billion that was distributed under HAVA.

We look forward to your findings so that we may take the actions necessary to improve the way we conceive research projects, manage research contracts, and make decisions regarding the final release of data provided to the Commission from a third party.
Commissioners,

Earlier, I was asked to provide information relative to the history of how the Florida request came to the Commission and to provide any additional information that Florida has provided since that initial request. First, here is the time line of how the request came to us:

3/12/2007 - Bob West of the Florida Legislature requested information from Edgardo regarding whether HAVA funds could be used to replace DREs with touch screen systems.
3/13/2007 - Amy Tuck of the Florida Secretary of State’s office sent the same request
3/14/2007 - Edgardo, Julie and Jeannie had a conversation with Amy Tuck via telephone to discuss the question that she posed; she followed that up with an email.
4/5/2007 - Amy Tuck requested a written opinion as to the questions that had been asked previously in the telephone conversation and via subsequent emails
4/16/2007 - Julie, Tom and Edgardo had a telephone conference with the FL Secretary of State (Kurt Browning) and a host of others from his office and from the State Legislature
4/16/2007 - FL Secretary of State’s office sent via email additional information requested during the conference call with the Secretary of State and others
4/25/2007 - FL Secretary of State provided additional information regarding the $5,000,000 grant program for the purchase of ballot on demand systems
4/30/2007 - FL Secretary of State provided additional information on what systems are replaced by the $5,000,000 grant program.

Attached below are documents 1) containing emails between EAC (Edgardo) and FL; 2) containing information provided by the FL Secretary of State’s office on 4/16/2007 -- 2 documents; and 3) containing information provided by the FL Secretary of State’s office on 4/25/2007.

Juliet T. Hodgkins
General Counsel
United States Election Assistance Commission
1225 New York Ave., NW, Ste 1100
Washington, DC 20005
(202) 566-3100
Edgardo,

What are the restrictions on the use of the interest from the HAVA money and where do I find those rules. Can we use the interest to replace Florida DRE's with optical scan?

Thanks

Bob West - Legislative Analyst
Florida House of Representatives
Ethics and Elections
402 HOB
Tallahassee, FL 32399-1300

Mr. West,

You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter
regression database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state’s plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

**Costs must be Allowable, Allocable and Reasonable**

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were
HAVA FUNDING

May, 2001  Florida Legislature passes the Florida Election Reform Act that required replacement of punchcard or lever voting systems

August, 2001  Contracts sent to counties for partial payment from state general revenue fund to replace or reimburse punchcard and lever voting systems
Payment formula: $3750 for large counties, $7500 for smaller counties (per polling place as reported by counties)
Total to counties from the state: $12,046,875.00
(See Attachment A for county by county breakdown)
Please note: County contracts to replace punchcard and lever voting systems were well in excess of this state funded formula.

July, 2002  Contracts sent to counties for partial payment from state general revenue fund to replace or reimburse punchcard and lever voting systems
Payment formula: $3750 for large counties, $7500 for smaller counties (per polling place as reported by counties)
Total to counties from the state: $12,046,875.00
(See AttachmentB for county by county breakdown)
Please note: County contracts to replace punchcard and lever voting systems were well in excess of this state funded formula.

Total state payout for the replacement of punchcard or lever voting systems: $24,093,750.00

October, 2002  HAVA is passed by Congress

April, 2003  Receipt of HAVA Funding
 Initial Payment
  101: $5,000,000.00
  102: $0
  251: $0

June, 2003  Receipt of HAVA Funding
 Balance of Section 101
  102 Funds
  101: $9,447,580.00
  102: $11,581,377.00

July, 2003  Distribution of HAVA funding to the state for section 102 purchases (replacement of punchcard or lever voting systems)
Total: $11,500,000.00
Total HAVA funding from section 102 to replace punchcard or lever voting systems: $11,500,000.00

June, 2004
Receipt of HAVA Funding
Year 2003 Title II Funding
251: $47,416,833.00

September, 2004
Distribution of HAVA funding to counties for compliance with Section 251 (ADA) for accessible machines at polling places
Grant award to 51 counties to get in to compliance
Total: $11,600,000.00 from 251 funding
(See Attachment C for county by county breakdown)

December, 2004
Receipt of HAVA Funding
Year 2004 Title II Funding
251: $85,085,258.00

May, 2006
Final distribution of HAVA funding to counties for compliance with Section 251 (ADA) for accessible machines at polling places
Grant award to 16 counties that were already in compliance
Total: $13,469,378.54 from 251 funding
(See Attachment D for county by county breakdown)

Total distribution for Section 301 purposes for accessible voting systems from Section 251 funding: $25,069,378.54

April, 2007
Discussion regarding payment of Governor’s proposed legislation with HAVA funding

Governor’s proposal:
1. Optical scan in all precincts and early voting sites
   Estimated cost to state: $22,861,850.00
2. One VVPAT at each precinct for ADA purposes
   Estimated cost to state: $7,511,360.00
3. One VVPAT at each early voting site for ADA purposes
   Estimated cost to state: $304,850.00
4. Ballot on demand grant to counties that were 100% touchscreen at early voting sites in 2006 general election (to be funded per voter)
   Grant amount: $5,000,000.00

Total: $35,678,060.00*

*Please note that counties will have additional costs.

**FY 2004-05 Appropriation for Voting Systems Assistance**  
11,600,000

**Average cost per machine**  
4,515.38

From funds in Specific Appropriation 28711, $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place. No supervisor of elections shall receive any funds until the county supervisor of elections certifies to the Department of State: 1) the number of precincts in the county; 2) the number of polling places in the county; 3) the number of voting machines the county has that meet the disability requirement; 4) the county's plan for purchasing the DRE's; and 5) the date that the county anticipates being in compliance.

The Department of State will determine the number of DRE's needed in each county based on the certifications provided by the supervisors of elections. Any county that receives funds from Specific Appropriation 28711 that is not in compliance with the accessibility requirements in Section 301(a)(3) Title III of the Help America Vote Act by January 1, 2006, shall be required to return those funds to the State.

RE: Florida HAVA Funding

Tom,

Here are the counties:

100% Touch Screen
Charlotte
Collier
Hillsborough
Indian River
Lake
Lee
Martin
Nassau
Palm Beach
Pasco
Pinellas
Broward
Miami-Dade
Sarasota
Sumter

Let me know if you need anything else.

Amy,
Thanks for the information.
We need you to identify which 15 counties have DRE which need to be replaced.
Thanks
Tom

Attached is the information from the conference call this morning.

Thank you,

Amy Woodward
Executive Assistant
Office of the Secretary
April 25, 2007

Mr. Wilkey,

This letter is in response to your request dated April 25, 2007 regarding additional information. If we understand your questions correctly, the following are our responses.

The proposed $5 million cost for ballot on demand is separate from the proposed $22.8 million cost to provide for optical scan voting systems to replace touchscreen systems at precinct and early voting sites. The optical scan voting systems at early voting sites will be used in conjunction with ballot on demand.

The ballot on demand system, used in conjunction with optical scan at early voting sites, is replacing touchscreen voting systems that were "partially" financed with HAVA funds. Please note that when Florida counties originally replaced punchcard and lever voting systems with touchscreen voting systems, the counties funded a majority of the cost. Florida reimbursed itself with HAVA Section 102 funds but that only constituted a small portion of the overall cost for the voting systems. For further explanation, please see the attached timeline regarding HAVA funding in Florida.

In response to your third question, I would like to restate it to be sure that I am answering the proper question. I believe your question to be: If Florida is replacing touchscreen (HAVA funded) voting systems with optical scan systems, are we also adding ballot on demand to this scenario? The answer to this question as stated is yes as it pertains to early voting sites only. The proposal is to provide optical scan voting systems that, for some early voting sites, would work in conjunction with ballot on demand. The larger counties in Florida do not have the capacity at early voting sites to provide ballot management for the voluminous ballot styles that would be required to be provided at early voting sites. Therefore, ballot on demand alleviates this problem.
As a final note, I would like to reiterate that Florida is proposing to leave one touchscreen voting system, upgraded with a voter verifiable paper audit record, in each precinct and early voting site.

If you have any further questions or need any further information, please do not hesitate to contact me. I look forward to seeing you in Washington, D.C. next week.

Sincerely,

Kurt S. Browning
Secretary of State
### HAVA FUNDING

**May, 2001**
Florida Legislature passes the Florida Election Reform Act that required replacement of punchcard or lever voting systems

**August, 2001**
Contracts sent to counties for partial payment from state general revenue fund to replace or reimburse punchcard and lever voting systems
- Payment formula: $3750 for large counties, $7500 for smaller counties (per polling place as reported by counties)
- Total to counties from the state: $12,046,875.00
  
  (See Attachment A for county by county breakdown)

- Please note: County contracts to replace punchcard and lever voting systems were well in excess of this state funded formula.

**July, 2002**
Contracts sent to counties for partial payment from state general revenue fund to replace or reimburse punchcard and lever voting systems
- Payment formula: $3750 for large counties, $7500 for smaller counties (per polling place as reported by counties)
- Total to counties from the state: $12,046,875.00
  
  (See Attachment B for county by county breakdown)

- Please note: County contracts to replace punchcard and lever voting systems were well in excess of this state funded formula.

- Total state payout for the replacement of punchcard or lever voting systems: $24,093,750.00

**October, 2002**
HAVA is passed by Congress

**April, 2003**
Receipt of HAVA Funding
- Initial Payment
  - 101: $5,000,000.00
  - 102: $0
  - 251: $0

**June, 2003**
Receipt of HAVA Funding
- Balance of Section 101
  - 102 Funds
    - 101: $9,447,580.00
    - 102: $11,581,377.00

**July, 2003**
Distribution of HAVA funding to the state for section 102 purchases (replacement of punchcard or lever voting systems)
- Total: $11,500,000.00
Total HAVA funding from section 102 to replace punchcard or lever voting systems: $11,500,000.00

June, 2004
Receipt of HAVA Funding
Year 2003 Title II Funding
251: $47,416,833.00

September, 2004
Distribution of HAVA funding to counties for compliance with Section 251 (ADA) for accessible machines at polling places
Grant award to 51 counties to get into compliance
Total: $11,600,000.00 from 251 funding
(See Attachment C for county by county breakdown)

December, 2004
Receipt of HAVA Funding
Year 2004 Title II Funding
251: $85,085,258.00

May, 2006
Final distribution of HAVA funding to counties for compliance with Section 251 (ADA) for accessible machines at polling places
Grant award to 16 counties that were already in compliance
Total: $13,469,378.54 from 251 funding
(See Attachment D for county by county breakdown)

Total distribution for Section 301 purposes for accessible voting systems from Section 251 funding: $25,069,378.54

April, 2007
Discussion regarding payment of Governor's proposed legislation with HAVA funding

Governor's proposal:
1. Optical scan in all precincts and early voting sites
   Estimated cost to state: $22,861,850.00
2. One VVPAT at each precinct for ADA purposes
   Estimated cost to state: $7,511,360.00
3. One VVPAT at each early voting site for ADA purposes
   Estimated cost to state: $304,850.00
4. Ballot on demand grant to counties that were 100% touchscreen at early voting sites in 2006 general election (to be funded per voter)
   Grant amount: $5,000,000.00

Total: $35,678,060.00*

*Please note that counties will have additional costs.
Sorry about the yahoo address thing -- again. For some reason my system insists on picking up your yahoo address. I thought I deleted that address but apparently when there was a system restoration on my computer, it some how revived it.

At any rate, here is the original email and draft letter.

All:

Attached is a draft of the letter that I will send to Rep. Carolyn Maloney in response to the questions she raised to me at the April 18 hearing.

The draft represents consensus among Gavin, Matt, Brian and me. We know that consensus, while adding value, also adds time. I was hoping to get this letter out the door by Friday of last week but obviously that did not happen.

Nonetheless, here it is. I plan to send the letter by the end of this week so I ask that you give me your comments and edits by Close of Business tomorrow (Thursday).

Thanks,
Gracia M. Hillman
Commissioner
U.S. Election Assistance Commission
1225 New York Avenue, NW, Suite 1100
Washington, DC 20005
Tel: 202-566-3100
The Honorable Carolyn Maloney
United States House of Representatives
2331 Rayburn House Office Building
Washington, DC 20515

Dear Representative Maloney:

I am writing this letter to follow up on a conversation I had with your staff on April 23, 2007. In this conversation we clarified some of the concerns you raised in the April 18th hearing of the Subcommittee on Information Policy, Census, and National Archives, *Ensuring Fairness and Accuracy in Elections Involving Electronic Voting Systems*.

During the hearing, you indicated that you would like further explanation as to why the U.S. Election Assistance Commission (EAC) did not immediately release its Interim Accreditation Program Assessment Reports on CIBER Labs, Inc. You have expressed concern that the language in the CIBER Assessment Reports, which state that the laboratory’s test reports do not provide sufficient documentation to allow a reviewer to determine if all testing was completed, was significant and should have been immediately publicized. I appreciate the opportunity to address your question.

The CIBER Assessment Reports are a part of EAC’s temporary Interim Laboratory Accreditation Program. This interim accreditation program was a stop gap measure to serve elections officials for the November 2006 federal elections while EAC waited for the National Institute of Standards and Technology (NIST) to technically review and recommend laboratories to us, per HAVA.

The laboratory accreditation process is a review of a laboratory’s current policies, capabilities, management, personnel and procedures in order to determine its ability to comply with a set of program standards. In operating its temporary program, EAC did not create new methodology, but followed international standards, practices and processes in consultation with NIST, which operates the National Voluntary Laboratory Accreditation Program (NVLAP). Although NVLAP did not routinely make their laboratory assessment reports public, EAC always intended to...
release its assessment reports and was going to do so when a final decision on accreditation had been made.

Ultimately, the EAC did not expedite the release of the CIBER Assessment Reports, because they did not conclude that a specific voting system was compromised—only that CIBER’s test reports did not document testing sufficient to satisfy applied standards. Any conclusion as to whether proper testing was in fact done would have been made by the then governing certification authorities (the National Association of State Election Directors and the States) prior to the grant of certification. These certification bodies would have had access to the original test reports and voting systems. Nevertheless, we recognize that the public expects a very high level of transparency in the testing of voting systems. The assessment reports on CIBER and all labs under review have been posted on EAC’s website. Additionally, in a letter dated January 12, 2007 (attached), EAC urged NIST to make the laboratory assessment work that it does for EAC as transparent as possible. As a result, NIST has decided that it will publish its assessment reports on its web site. A NIST fact sheet describing its program is also attached.

In addition, a broader concern has been raised by you, the General Accounting Office (GAO) and others regarding EAC’s role as a clearinghouse of information. EAC is routinely presented third party reports, papers and findings. Often, the individuals who write or pass along these documents demand that EAC publish or forward them to our stakeholders. The nature, source and quality of these reports vary widely. As I am sure you can appreciate, EAC must be careful that its actions do not appear to be an endorsement of a non-federal entity. Further, as a body that accredits testing laboratories and certifies voting systems, EAC has a duty to remain both impartial and consistent with its published standards. And perhaps most importantly, EAC must ensure that any information it disseminates to the public is accurate and reliable so that we are not perpetuating unsubstantiated or erroneous information.

At the same time, EAC has heard loud and clear that we should move post haste to figure out how it can reasonably, timely and responsibly address these matters. Along with EAC’s other commissioners and staff, I have taken a personal and direct interest in this matter so that we can expedite this part of our planning/program implementation process. We will keep you informed of our progress and the decisions we make.

EAC’s laboratory accreditation and voting system testing and certification programs are firsts for the Federal Government. All policies, procedures and practices for this first time venture must be developed, vetted, adopted and published before the programs can be implemented. As I am sure you can appreciate, that work takes time and resources. In the context of the enormity of this work and the competing demands we face, time and resources are two things of which EAC has very little. Despite that fact, we have made enormous progress to administer and audit $3 billion
in requirements payments to states; develop and implement voting system guidelines, and laboratory accreditation, voting system testing and certification programs; provide management guidelines and guidance to the states; and develop our clearinghouse.

I hope this explanation helps to assure you that EAC is committed to responsibly providing as much information to election officials and the public as is possible. EAC is committed to transparency and public trust. We would welcome the opportunity to further brief you on our work and the progress that has been made to date. In the meantime, please be sure to let me know if you need additional information or further clarification and again, thank you for your questions and interest.

Sincerely,

Gracia Hillman
Commissioner

Subject: Re: The Side By Side Project

I am going to have to learn the DC vernacular--"rat hole" is a new term for me. I think Bruce is pretty identified w Dems so I think there may be push back on him--I think that's why Tom was going for an EO, to get one of the non-partisan folks involved. We should get the best person for our audience--so I think we should identify our audience and I think that is the Congress.

Subject: The Side By Side Project

I have made the following suggestion to Tom:

Tom:

I am not so sure having an election official do the side by side is the best way to go. This issue is not about election officials. It is about DC rat hole politics and the presentation of research "data."

I offer the following names for consideration.
Bruce Cain and Raymond Wolfinger. Both teach at Berkeley although Wolfinger retired last spring. Both are considered at the top of the poli sci hierarchy, in terms of competence and status. I am told they are very good scholars who do not have a reputation for partisanship, although they have been involved in "the real world of politics."

Here are their Web sites:
Dear colleagues:

Attached is a memo for your review. We can hopefully go over the particulars when we have our next call. Thank you for all your kind well wishes.

Donetta

Commissioner subcommittee memo 4-2-07.doc
MEMORANDUM

TO: Commissioner Hillman, Commissioner Hunter, Commissioner Rodriguez, Thomas Wilkey, Juliet Hodgkins and Jeannie Layson

FROM: Donetta Davidson

DATE: April 3, 2007

RE: New Commissioner Subcommittee

As a supplement to the memo issued on March 19th regarding the creation of commissioner subcommittees, I would like to propose the creation of one additional subcommittee.

Commissioners Hunter and Rodriguez have expressed their interest in the National Voter Registration Act (NVRA) and have volunteered to serve on a subcommittee to work on a number of issues we need to complete in the next few months.

Their willingness to take on this important subject will assist the staff in developing strategies to complete our work in a timely fashion.

RECOMMENDATION:

Create a new subcommittee on NVRA issues.
Boss:

Attached is my list of the scrubbed "must" provisions in the statute. Beyond that, I have provided my suggestion on the long lines, and on the 241 section, have BOLDED priority research, and have included notes on what might go down on certain topics.

Some comments here are just for you, so when I come in, I can clean up the first section if you want to make some copies for the other COMmissioners, please let me know.

Hope this helps.

Adam Ambrogi
1987 N. Adams St.
Arlington, VA 22201
Title III, Subtitle B requires that the EAC shall provide guidance to the states on all the requirements found in HAVA, Title III, Subtitle A.

1) **HAVA 301 (a)(4) & (5):** Legal research to be performed to determine whether the Voluntary Voting System Guidelines meet the “Alternative language accessibility” and “Error rates” legal standards found in sections of 301 (a).

2) **HAVA 302 (b):** Voting Information Requirements. Research to be completed on how the state “caused voting information” to be publicly posted, the kinds of information displayed, and the relative effectiveness of that signage. [Potential efficiencies with Design for Democracy/AIGA Research on Signage efficiency.]

3) **HAVA 303(a) (8) (A-C):** Research/Work with the Social Security Administration to understand the process by which states link to the SSA system to verify the last-4 digits of the registrant’s Social Security number. [Need to examine system, understand how it works, understand how rejected numbers are treated by the states, and provide guidance to the states on how to treat those “rejects.”]

4) **NVRA Form**
   a. Update of the form; examine form for clarity, usability, electronic capabilities, internet voter registration. [Potential work with Design for Democracy; potential ideal ballot design templates.]
   b. Examine effectiveness under the NVRA. The EAC is now the designated agency that looks at the effectiveness of the NVRA. There have been complaints from advocacy groups that the states have not fully developed the proper distribution of voter registration forms through the Voter Registration Agencies (as defined by NVRA).

5) **Help America Vote College Program.** EAC “shall create” (still in existence.)
   a. Research on the HAV College Program “Create a Poll Worker Program” Kit that can be developed/distributed to colleges, to inform them of the best method of creating poll worker volunteer organizations. Work with design organizations to plan/create such programs.
   b. Research on the best methods to train college pollworkers, potentially through partnership with the Pollworker Institute (Warren, Collins-Foley).
   c. Potential use for VA, NJ Gubernatorial elections in Nov. 05.
   d. Focus on research on how to better comply with **HAVA Sec. 501 (b)(2),** which is requires the EAC to take actions (as appropriate) to encourage State and local governments to use the services of the student participating in the Program. [Perhaps through the Pollworker Institution, or certain organizations that specialize in state/local volunteer programs.]

6) **HAVA 205 (b):** Information from other Federal Agencies. “The EAC may secure directly information from any Federal Department or agency such information as the Commission considers necessary to carry out this Act. Upon request of the Commission, the head of such department or agency shall
furnish such information to the Commission.” What information would be necessary, and from what agencies? File material from FEC? DOD UOCAVA voter statistics? US Commission on Civil Rights Florida testimony? There is a lot of essential areas that we might want for historical or clearinghouse function to have in-house, for research purposes. Research should be done as to find out the kinds and type of information that the Commission might need in carrying out duties.

7) [QUESTION FOR RM: READ CAREFULLY!! HAVA Sec. 703(b). I know that we were working on some form for UOCAVA, but it’s been a while since I’ve reviewed the report. 703(b) states that we, in conjunction with the Standards Board and Board of Advisors, “shall develop a standardized format for the reports submitted by states,...and shall make the format available to the States and units of government submitting such reports.” Have we researched/developed this form? I don’t have my work on me here.

8) [ADDITIONAL QUESTION: 801(a) States that the EAC shall be transferred all the functions which the Office of Election Administration exercised under the date of their authority from the FEC. What specific authority did the OEA have, under the FEC, or administrative rule?

My focus in a quick review of the research topics are:

1) What are the changes that HAVA makes to our elections system, and how can we prepare election administrators for that change?

2) What were the major problems individual voters and election officials had on Election Day 2004?

It strikes me that we need to tackle the issue that will have the most concern for most Americans.

On those issues that face the elections process; you would want to tackle the retrospective and the prospective. Aside from the topic below, I would recommend that:

1) Research be done on the reasons and rationale for long lines that may occur on election day, and what can be done before election day to prepare for long lines. [Handles 2004 problems as well as potentially consolidated polling places.]

HAVA Research Action [Priority Actions BOLDED]:

(1) Methods and mechanisms of election technology and voting systems used in voting and counting votes in elections for Federal office, including the over-vote and under-vote notification capabilities of such technology and systems.
(2) Ballot designs for elections for Federal office.

(3) Methods of voter registration, maintaining secure and accurate lists of registered voters (including the establishment of a centralized, interactive, statewide voter registration list linked to relevant agencies and all polling sites), and ensuring that registered voters appear on the voter registration list at the appropriate polling site.

(4) Methods of conducting provisional voting.

(5) Methods of ensuring the accessibility of voting, registration, polling places, and voting equipment to all voters, including individuals with disabilities (including the blind and visually impaired), Native American or Alaska Native citizens, and voters with limited proficiency in the English language.

(6) Nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office.

(7) Identifying, deterring, and investigating methods of voter intimidation. [Chair will likely push this compromise for the voter fraud provisions.]

(8) Methods of recruiting, training, and improving the performance of poll workers.

(9) Methods of educating voters about the process of registering to vote and voting, the operation of voting mechanisms, the location of polling places, and all other aspects of participating in elections.

(10) The feasibility and advisability of conducting elections for Federal office on different days, at different places, and Public information during different hours, including the advisability of establishing a uniform poll closing time and establishing—

(A) a legal public holiday under section 6103 of title 5, United States Code, as the date on which general elections for Federal office are held;

(B) the Tuesday next after the 1st Monday in November, in every even numbered year, as a legal public holiday under such section;

(C) a date other than the Tuesday next after the 1st Monday in November, in every even numbered year as the date on which general elections for Federal office are held; and

(D) any date described in subparagraph (C) as a legal public holiday under such section.

(11) Federal and State laws governing the eligibility of persons to vote.

(12) Ways that the Federal Government can best assist State and local authorities to improve the administration of elections for Federal office and what levels of funding would be necessary to provide such assistance.

(13)(A) The laws and procedures used by each State that govern—
(i) recounts of ballots cast in elections for Federal office;
(ii) contests of determinations regarding whether votes are counted in such elections; and
(iii) standards that define what will constitute a vote on each type of voting equipment
used in the State to conduct elections for Federal office.
(B) The best practices (as identified by the Commission) that are used by States with
respect to the recounts and contests described in clause (i).
(C) Whether or not there is a need for more consistency among State recount and contest
procedures used with respect to elections for Federal office.

(14) The technical feasibility of providing voting materials in eight or more languages for
voters who speak those languages and who have limited English proficiency.

(15) Matters particularly relevant to voting and administering elections in rural and
urban areas. [POTENTIAL: Long lines issues fits in here]

(16) Methods of voter registration for members of the uniformed services and overseas
voters, and methods of ensuring that such voters receive timely ballots that will be
properly and expeditiously handled and counted.

(17) The best methods for establishing voting system performance benchmarks,
expressed as a percentage of residual vote in the Federal contest at the top of the ballot.

(18) Broadcasting practices that may result in the broadcast of false information
concerning the location or time of operation of a polling place.

(19) Such other matters as the Commission determines are appropriate.
Proposed Amendments:

1) Amendment to Article V, Section 1(e)(ii):
A majority of Executive Members shall be present for a quorum at such time as a roll call is taken whether by physical presence, by telephone conference call, or virtual (electronic media) meeting; and to require a quorum re-establishment prior to action being taken. Postponed and referred to the Bylaws Committee.

Recommendation: Motion to strike amendment offered under Article V, Section 1(e)(ii), and insert in Article V, Section 1(e)(iii), the words “roll call” prior to the word, “vote.” The Executive Board shall agree to actions by a majority roll call vote of seated members of the Executive Board. Motion passed.

2) Amendment to Article VIII, Section 3(a):
The Standards Board shall agree to actions by majority vote of those present and voting unless otherwise specified by these bylaws, limiting the term present and voting to mean only those members present at such time as the roll call is taken whether by physical presence or presence at a virtual meeting room meeting. Postponed and referred to the Bylaws Committee.

Recommendations:

Motion to amend Article VIII, Section 1(a): A quorum shall be established when 56 Standards Board members are present for a meeting as determined by a roll call or quorum call of the Standards Boards members. Motion passed.

Motion to amend Article VIII, Section 3, by adding Article VIII, Section 3(c): Votes taken during meetings conducted by conference call and through virtual (electronic media) means shall have a quorum established prior to voting. Motion passed.

3) Motion to refer Article VII, Section 1 to the Bylaws Committee for review. Referred to the Bylaws Committee.

Recommendation: Send the matter to the General Counsel for a more detailed analysis and report. Motion passed. Johnson

4) Motion to allow the Bylaws Committee to make corrections to clerical errors. Motion passed.
Items Pending Consideration by Bylaws Committee
As of 13 March 2007

The Nominating Committee has referred the following items to the Bylaws Committee for further consideration:

- How elections will be certified in the case of a tie vote; for example between the third and fourth candidates when only three can be elected. 
  
  - straw poll, coin toss
  - Tim Hurst - language

- How elections will be certified if the elected candidates tip the balance of party affiliation on the Executive Board, as specified in HAVA (not more than five (5) of the same political party), if between existing + those elected, 6 or more of same party - Toni
  
  Whether Unaffiliated, Independent and Nonpartisan are one in the same or three separate categories of “party” affiliation. (HAVA Section 213 (c) requires a nine (9) member Executive Board. Not more than five (5) members may be of the same political party.) - Toni

- Whether the bylaws should establish regions to assure geographical representation on the Executive Board. - No action taken

- Whether there should be nominations from the floor for Executive Board elections. - Preference for closing nominations + having absentee voting Article E + eliminate proxy for Exec. Should the Election Certification Committee (for Executive Board elections) be stipulated in the bylaws. → Yes

- Whether proxy voting should be allowed.

The following item was left pending from the February Standards Board meeting:

- Frequency of meetings of EAC Standards Board

Article V 1(c-b)
Article VIII 2(d) add language that proxy voting not allowed for St. Bd. Exec. elections

By middle of June - meet in month 4/23 rd week

(1) Where should Amendments go?
(2) Research issue of whether state law defines
Call to Order:
Chair Tonni Bartholomew convened the meeting at 1:07 p.m.

Members Present:
Tonni Bartholomew, Marilyn Avery, Joanne Armbruster, and Tim Hurst

Members Not Present:
Kevin Kennedy and Howard Sholl

Other Standards Board Members Present:
Peggy Nighswonger, ex officio

EAC Personnel Present:
Commissioner Gracia Hillman (Designated Federal Officer), Tamar Nedzar (EAC Law Clerk) and Sheila Banks (Spec Asst to Comm Hillman)

Next Standards Board Meeting
Commissioner Hillman reported that the date of the next Standards Board meeting would depend on the timeline for issuing the next iteration of the VVSG. The Technical Guidelines Development Committee (TGDC) plans to send its recommendations to EAC in July. However, congressional legislation may impact current progress, which would impact when the next Standards Board meeting would be held.

As it stands, the earliest time a meeting could take place is October 2007. Subsequently, any proposed amendments from the Bylaws Committee would have to be sent to the full Standards Board 70 days before the meeting (early July).

Proposed Amendment Items
The Nominating Committee referred the following items to the Bylaws Committee for further consideration:

Item #1 How elections will be certified in the case of a tie vote; for example between the third and fourth candidates when only three can be elected.

Action Tim Hurst will research state election laws and draft wording that would address the tie vote problem. Tonni Bartholomew will find where the wording will go in the newly adopted Bylaws.
Item #2 How elections will be certified if the elected candidates tip the balance of party affiliation on the Executive Board, as specified in HAVA (not more than five (5) of the same political party).

Action All Bylaws Committee members agreed that runoff elections were not the solution to the tip the balance scenario. The committee also agreed that the solution should be placed in the bylaws. Tonni Bartholomew volunteered to research and submit recommendations.

Item #3 Whether Unaffiliated, Independent and Nonpartisan are one in the same or three separate categories of “party” affiliation and if HAVA Section 213 should apply to that category. (HAVA Section 213 (c) requires a nine (9) member Executive Board. Not more than five (5) members may be of the same political party.)

Action The Bylaws Committee agreed that unaffiliated and nonpartisan meant the same thing – not affiliated with a political party. Tonni Bartholomew will research and bring definitions back to the committee.

Item #4 Whether the bylaws should establish regions to assure geographical representation on the Executive Board.

Action Commissioner Hillman reported that the Nominating Committee could go either way on the geographical representation item. The Bylaws Committee decided to not recommend establishing regions and agreed that as long as there is visual representation (i.e. a map) showing the geographic location of current Executive Board members and nominees, Standards Board members would be able to cast their votes with geographical representation in mind.

Item #5 Whether there should be nominations from the floor for Executive Board election.

Action If nominations from the floor were eliminated, absentee voting could take place and there would no need for proxy voting for elections. Issues resulting from this elimination were identified by the Bylaws Committee and will be researched by Tamar Nedzar and Commissioner Hillman:

- not receiving a sufficient number of nominations
- deadline for sending and receiving absentee ballots

Additionally, changes would have to be made to Article V of the bylaws to address those issues.
Item #6  Should the Election Certification Committee (for Executive Board elections) be stipulated in the bylaws.

Action  The Bylaws Committee agreed that the Election Certification Committee should be appointed at the time of the Standards Board meeting. Language will need to be drafted to reflect this decision. Commissioner Hillman will have EAC determine if the new language goes into Article 5 or Article 9 of the current bylaws.

Item #7  Whether proxy voting should be allowed.

Action  Proxy voting would be allowed for business issues. EAC will draft language to be added to Article 8 of the current bylaws.

Timeline for Amendments

It was determined that proposed amendments for the items referred to the Bylaws Committee should be completed by mid-June. Tamar Nedzar will research all sections of the bylaws to identify where the recommended amendments will go.

Pending Item

The issue of the bylaws specifying the frequency of Standards Board meetings was left pending from the February board meeting. Tonni Bartholomew reviewed the EAC General Counsel’s memo on this issue, a copy of which will be provided to bylaws committee members. The committee agreed that this should be handled through a resolution and not a bylaws amendment.

The next committee meeting will take place during the week of April 23.

The meeting adjourned at approximately 1:50 p.m. (EDT).
- Look at draft minutes from May 2006 meeting - incorporate comments into draft bylaws

- Article IV - December of every year, inform appointing authority who serves on St. B.
  - Also as soon as EAC knows of vacancy

- Resolution 1x/year

- Amendment by way of substitution or other language
  - Look at legislative language

Procedures

- Notice of meeting to include when bylaws amendments are due.
  - See X (2)
BYLAWS

UNITED STATES ELECTION ASSISTANCE COMMISSION STANDARDS BOARD

The U.S. Election Assistance Commission Standards Board, hereinafter referred to as Standards Board, embodies the vision of Congress to forge a partnership among federal, state and local election officials whose goal is to promote public confidence in the conduct of federal elections in the United States.

Article I. Authority

1. Pursuant to the Federal Advisory Committee Act and the Help America Vote Act of 2002 (HAVA) [Public Law 107-252], as such statutes may be amended from time to time, the Standards Board has been granted its authority through its charter with the United States Election Assistance Commission (EAC) (filed with Congress on June 14, 2004).

Article II. Objectives:
The Standards Board will:

1. Advise the EAC through review of the voluntary voting system guidelines described in Title II Part 3 of HAVA; through review of the voluntary guidance described under Title III of HAVA; and through the review of the best practices recommendations described in Section 241 of Title II of HAVA, as required by HAVA or as may be developed by EAC.
2. Provide guidance and advice to the EAC on a variety of topics related to the administration of elections for Federal office.
3. Function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act (FACA); and all other applicable Federal laws.

Article III. Standards Board Membership

1. Pursuant to Section 213(a) of HAVA, the Standards Board shall consist of 110 members, as follows:
   a. Fifty-five (55) shall be state election officials selected by the chief State election official of each State.
   b. Fifty-five (55) shall be local election officials selected as follows:
      ii. Each state's local election officials, including the local election officials of Puerto Rico and the United States Virgin Islands, shall select a representative local election official from the state in a process supervised by the chief election official of the state.
      iii. In the case of the District of Columbia, Guam, and American Samoa, the chief election official shall establish a procedure for selecting an individual to serve as a local election official. The individual selected under such a procedure may not be a member of the same political party as the chief election official.
c. The two Standards Board members who represent the same state may not be members of the same political party.

Article IV. Standards Board Member Terms of Service and Vacancies

1. The chief election official of each state shall notify the EAC and Executive Board of the Standards Board within five (5) business days of any vacancy or membership changes to the Standards Board.

2. Members of the Standards Board shall serve for a term of two (2) years and may be reappointed.

3. Vacancy appointments to the Standards Board shall be made in the same manner as the original appointment pursuant to HAVA.

Article V. Executive Board of the Standards Board

1. Pursuant to Section 213(c) of HAVA, the Standards Board shall select nine (9) of its members to serve as the Executive Board of the Standards Board as follows:
   a. Membership.
      i. Not more than five (5) members of the Executive Board may be state election officials.
      ii. Not more than five (5) members of the Executive Board may be local election officials.
      iii. Not more than five (5) members of the Executive Board may be of the same political party.
   b. Nominations.
      i. The Nominating Committee shall solicit nominations for the Executive Board from Standards Board members. The Nominating Committee shall send to Standards Board members a solicitation no later than December 1st immediately prior to the expiration of any Executive Board member's term. The solicitations shall designate the address and form for submitting nominations.
      ii. In the event of a vacancy on the Executive Board prior to the expiration of a member's term on the Executive Board, the Nominating Committee shall send to Standards Board members a solicitation no later than sixty (60) days before the next meeting of the Standards Board. The solicitations shall designate the address and form for submitting nominations.
      iii. Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.
      iv. Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than January 15 or in the event of a vacancy, the date indicated on the solicitation.
      v. Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.
c. Elections.
   1. Elections to the Executive Board shall be by secret ballot and shall take place at a meeting of the Standards Board.
   2. The ballot shall be designed to enable Standards Board members to select candidates based on the following: (1) With which party the candidate affiliates, (2) whether the candidate is a state or local election official, (3) which state or territory the candidate represents, (4) whether the candidate was elected or appointed, and (5) in the case of state election officials, whether the candidate is a Secretary of State, a member of a Citizen Board, or a State Election Director. The ballot shall also include concise biographical information for each candidate.
   3. For nominations following the first election (2005), not including any special elections to fill unexpired terms, two (2) of the three positions shall be local election officials. For nominations following the second election (2007), two of the three positions shall be for state election officials. The number of state and local nominations shall continue to alternate in subsequent elections.
   4. Within thirty (30) days of an Executive Board election, the Executive Board members shall convene to elect a Chair, Vice-Chair, Secretary, and Parliamentarian.

d. Executive Board Members: Terms of Service and Vacancies.
   i. The Chair of the Executive Board shall notify the EAC and Nominations Committee Chair within five (5) business days of any vacancy on the Executive Board.
   ii. Members of the Executive Board shall serve for a term of two (2) years and may not serve for more than three (3) consecutive terms.
   iii. Members of the Standards Board who have previously served on the Executive Board shall be eligible to be nominated to the Executive Board no sooner than two (2) years from the last term in which they served on the Executive Board.
   iv. The Chair, Vice-Chair, Secretary, and Parliamentarian shall not serve for a term of more than one (1) year. An Executive Board member shall not serve for two (2) consecutive terms for the same office, except in the case of a member serving the unexpired term of an office, in which case the member may be elected to the same office for the succeeding terms.
   v. In the event of a vacancy in the Executive Board, the remaining members of the Executive Board may appoint an interim member of the Executive Board until the next Standards Board meeting.
   vi. An Executive Board member may be removed from the Executive Board by a vote of two-thirds (2/3) of Standards Board members at a Standards Board meeting.

e. Meetings.
   i. Any two members of the Executive Board may call an Executive Board meeting by filing the original call of the meeting with the DFO, including the stated reason for calling the meeting.
   ii. A majority of Executive Board Members shall be present for a
Article VI. Executive Board Duties

1. Chair. The Chair shall:
   a. Preside over all meetings of the Executive Board and Standards Board.
   b. Appoint the chair of standing committees and any ad hoc committees of the Standards Board.
   c. Establish the agenda for meetings of the Executive Board and Standards Board in consultation with the DFO.
   d. Call meetings of the Executive Board and Standards Board in consultation with the DFO.
   e. Act as the official liaison between the Standards Board and the EAC for all resolutions, recommendations, and information requests.
   f. Serve as an ex officio member of all committees.

2. Vice-Chair. The Vice-Chair shall:
   a. Preside over meetings of the Executive Board and Standards Board in the Chair’s absence.
   b. Perform other duties as may be appropriate in the Chair’s absence.
   c. Assist the Chair from time to time as the Chair may designate.
   d. In the event of a vacancy before the completion of the Chair’s term, serve as the Chair.

3. Secretary. The Secretary shall:
   a. Maintain the minutes at Executive Board and Standards Board meetings, with assistance from the DFO.
   b. Assist the Chair at meetings and from time to time as the Chair may designate.

4. Parliamentarian. The Parliamentarian shall:
   a. Ensure that all meetings are run in accordance with Roberts Rules of Order.
   b. Be responsible for time limitations on agenda items and holding speakers accountable to keep on time as listed (if at all) on the agenda.
   c. Serve as the Chair of the Bylaws Committee.

5. Executive Board. Generally. The Executive Board shall:
   a. Perform all duties required under HAVA and other applicable Federal law.
   b. Appoint the membership of appropriate standing committees and ad hoc committees by soliciting interest from the Standards Board membership.
   c. Meet as necessary to address issues of concern in between Standards Board meetings.
   d. Approve the minutes of the Executive Board meetings.
   e. Convene Standards Board meetings, including, but not limited to, meetings by conference call and virtual meetings. Such meetings must allow each Standards Board member to include their comments and view or hear others’ comments.
   f. Consult with the DFO to ensure compliance with federal statutes and other applicable regulations.
g. Attend Executive Board meetings, including, but not limited to, meetings by conference call and virtual meetings, in accordance with section (c), subsection (b) of this Article. In the event that an Executive Board member fails to attend Executive Board meetings within the preceding twelve (12) month period, such Executive Board member shall forfeit his or her position on the Executive Board.

h. As soon as possible, provide Standards Board Members all guidelines proposed to be adopted pursuant to Section 222(b)(3) of HAVA. Executive Board recommendations to the Standards Board pursuant to Section 222(b)(3) of HAVA shall include an appendix of all dissenting comments from Executive Board members.

i. Perform all other duties as from time to time the Standards Board may delegate to the Executive Board.

Designated Federal Officer (DFO). The DFO shall:

a. Serve as the government’s agent for all Standards Board activities.

b. Approve or call Standards Board meetings.

c. Approve agendas proposed by the Executive Committee.

d. Attend all Standards Board and Executive Board meetings.

e. Adjourn Standards Board and Executive Board meetings when such adjournment is in the public interest.

f. Provide adequate staff support to the Standards Board, to assist with:

i. Notifying members of the time and place for each meeting.

ii. Maintaining records for all meetings, including subgroup or working group activities, as required by law.

iii. Maintaining the roll.

iv. Assuring that minutes of all Standards Board and Executive Board meetings, including subgroup and working group activities are prepared and distributed.

v. Housing at the EAC and maintaining official Standards Board records, including subgroup and working group activities.

vi. Filing all papers and submissions prepared for or by the Standards Board, including those items generated by subgroups and working groups.

vii. Responding to official correspondence.

viii. Acting as the Standards Board’s agent to collect, validate, and pay all vouchers for pre-approved expenditures.

ix. Preparing and handling all reports, including the annual report as required by FACA.

x. Acting as the Standards Board’s agent to collect, validate, and pay all vouchers for pre-approved expenditures.

xi. Preparing and handling all reports, including the annual report as required by FACA.

Article VII. Meetings

The Standards Board shall meet, but not less frequently than once every two years for the purposes of selecting the Executive Board. Meetings shall be called by the DFO in consultation with the Executive Board.

The DFO shall approve the agenda for all meetings. The EAC shall distribute the agenda to Standards Board members prior to each meeting and shall publish notice of the meeting in the Federal Register as required by FACA.
3. Standards Board members and members of the public may submit agenda items to the DFO or Executive Board Chair. All meetings of the Standards Board shall be conducted in accordance with Roberts Rules of Order.

5. Open/Closed Meetings.
   a. Unless otherwise determined in advance, all Standards Board meetings will be open to the public.
   b. Once an open meeting has begun, it will not be closed unless prior approval of the closure has been obtained and proper notice of the closed session has been given to the public.
   c. Notices of closed meetings will be published in the Federal Register at least 15 calendar days in advance.
   d. If, during the course of an open meeting, matters inappropriate for public disclosure arise during discussions, the Chair will order such discussion to cease and will schedule it for closed session.
   e. All materials brought before, or presented to, the Board during the conduct of an open meeting, including, but not limited to, the minutes of the proceedings of the previous open meeting, will be available to the public for review or copying at the time of the scheduled meeting.
   f. Members of the public may attend any meeting or portion of a meeting that is not closed to the public and may, at the determination of the Chair, offer oral comment at such meeting. The Chair may decide in advance to exclude oral public comment during a meeting, in which case the meeting announcement published in the Federal Register will note that oral comment from the public is excluded. In such a case, the Standards Board will accept written comments as an alternative. In addition, members of the public may submit written statements to the EAC at any time.
   g. Standards Board meetings will be closed only in limited circumstances and in accordance with applicable law. The Standards Board must obtain prior approval to conduct a closed session. Requests for closed meetings must be submitted to EAC's Office of General Counsel a minimum of 45 days in advance of the proposed closed session.
   h. Where the DFO, in conjunction with the Office of General Counsel, has determined in advance that discussions during a Standards Board meeting will involve matters about which public disclosure would be harmful to the interests of the government, industry, or others, an advance notice of a closed meeting, citing the applicable exemptions of the Government in the Sunshine Act (GISA), shall be published in the Federal Register. The notice may announce the closing of all or just part of a meeting.

Minutes.
   i. The DFO, or his or her designee, shall assure that detailed minutes of each meeting are prepared and distributed to Standards Board members.
   ii. Minutes of open meetings shall be available to the public upon request. Minutes of closed meetings shall be available to the public upon request, subject to the Freedom of Information Act (FOIA).
   iii. Meeting minutes shall include the following: (1) Time, (2) date,
location, (4) record of persons present, including the names of Standards Board members, staff, and the names of members of the public making written or oral presentations, (5) a complete and accurate description of the matters discussed and conclusions reached, and (6) copies of all reports received, issued, or approved by the Standards Board.

All documents, reports, or other materials prepared by or for the Standards Board constitute official government records and will be housed at the EAC and maintained according to the Federal Records Act.

Article VIII. Quorum and Proxy Voting

1. A quorum shall be established when fifty percent (50%) plus one of Standards Board members is present for a meeting or are present by proxy.
   a. Only other Standards Board members may declare another Standards Board member present by proxy.
   b. Proxy designations may be submitted in writing to the Chair up to the day of the Standards Board meeting.
2. The Standards Board shall agree to actions by majority vote of those present and voting unless otherwise specified by these bylaws.
3. Proxy votes may only be cast by Standards Board members, provided proxy designations have been timely filed in advance with the Chair clearly identifying the Standards Board member to cast an absent member’s proxy vote.
   a. The Chair shall appoint a proxy committee to verify the eligibility of proxy votes.
   b. Voting procedures for the Standards Board, the Executive Board, and the subcommittees will follow the accepted procedure, in the latest edition of Robert’s Rules of Order. Votes by the Standards Board on recommendations to EAC shall have the ayes, nays, and abstentions recorded.

Article IX. Committees

In appointing members to committees, the Standards Board shall pay particular attention to ensuring diverse membership. Accordingly, the Executive Board shall do due diligence to ensure that committee members (1) affiliate with diverse parties, (2) are representative of both state and local election officials, (3) represent different states and territories, and (4) represent both elected and appointed officials.

1. Meetings.
   a. All committees may meet informally at any time for the purpose of conducting their business, including telephonically or through electronic media.
2. Standing Committees.
   a. Nominating Committee. The Nominating Committee shall:
      i. Be comprised of five (5) members.
      ii. Solicit nominations for the Executive Board from Standards Board members.
      iii. Prepare and distribute to Standards Board members ballots that include all the information listed in Article V, section 1, subsection c, paragraph
ii of these Bylaws.

b. Bylaws Committee. The Bylaws Committee shall:
   i. Be comprised of seven (7) members.
   ii. Be Chaired by the Parliamentarian.
   iii. Submit all recommended amendments to the Executive Board for a two (2) day comment period before submitting recommendations to the Standards Board for resolution and adoption.

   a. The Standards Board may, at any time, by majority vote, establish an ad-hoc committee.
   b. The Standards Board member wishing to establish an ad-hoc committee must present to the Standards Board the reason(s) he/she is requesting the committee.
   c. Once an ad-hoc committee has been established, the Executive Board shall appoint members to the ad-hoc committee.
   d. No ad-hoc committee shall be comprised of more than ten (10) Standards Board Members.

Article X. Amendments

1. The bylaws may be amended based on a two-thirds (2/3) vote of the members present and voting at any Standards Board meeting.
2. The Standards Board's Bylaws Committee shall promulgate a form for proposing an amendment to the Standards Board's Bylaws. The form shall require the specific language of the proposed amendment to be included, identify the author of the amendment, and be designed to elicit the rationale and impact statement.
3. All proposed bylaw changes must be submitted in writing to the DFO, who shall thereafter forward the proposed changes to the Standards Board, Bylaws Committee and the EAC's General Counsel.
   a. The General Counsel shall report in an expeditious manner to the Bylaws Committee and the Executive Board whether or not a proposed change to the Bylaws is consistent with federal law and/or rules.
   b. The Standards Board's Executive Committee shall place the report on the proposed change to the Standards Board's Bylaws on the agenda for the next meeting of the Standards Board.
4. The Executive Board shall forward all proposed changes to Standards Board members at least thirty-five (35) days prior to the next meeting of the Standards Board via email and U.S. Mail to the applicable address of record on file with the EAC. The Executive Board shall request that EAC post the proposed change to the bylaws and all supporting material on EAC's website at least thirty-five (35) days prior to the next meeting of the Standards Board.

Article XI. Expenses and Reimbursement.

1. Expenses related to Standards Board operations will be borne by the EAC.
2. Expenditures of any kind must be approved in advance by the DFO.
3. Standards Board members shall not receive any compensation for their services, but
shall be paid travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of federal agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in performance of their services for the Standards Board.

Section XII. Effective Date

1. These By-Laws are effective upon adoption by the Standards Board.

Section XII. Transition Procedures and Ratification

1. The adoption of the bylaws has no effect on the selection, terms or appointment of the officers or members of the Standards Board, the Executive Board, or a committee of the Board serving on the effective date of these bylaws.

2. All acts of the Standards Board, the Executive Board, or a committee of the Board are hereby ratified, except to the extent that an act does not conform with a resolution adopted by the Standards Board before the effective date of these bylaws.
BYLAWS

UNITED STATES ELECTION ASSISTANCE COMMISSION STANDARDS BOARD

The U.S. Election Assistance Commission Standards Board, hereinafter referred to as Standards Board, embodies the vision of Congress to forge a partnership among federal, state and local election officials whose goal is to promote public confidence in the conduct of federal elections in the United States.

Article I. Authority

1. Pursuant to the Federal Advisory Committee Act and the Help America Vote Act of 2002 (HAVA) [Public Law 107-252], as such statutes may be amended from time to time, the Standards Board has been granted its authority through its charter with the United States Election Assistance Commission (EAC) (filed with Congress on June 14, 2004).

Article II. Objectives:
The Standards Board will:

1. Advise the EAC through review of the voluntary voting system guidelines described in Title II Part 3 of HAVA; through review of the voluntary guidance described under Title III of HAVA; and through the review of the best practices recommendations described in Section 241 of Title II of HAVA, as required by HAVA or as may be developed by EAC.

2. Provide guidance and advice to the EAC on a variety of topics related to the administration of elections for Federal office.

3. Function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act (FACA); and all other applicable Federal laws.

Article III. Standards Board Membership

1. Pursuant to Section 213(a) of HAVA, the Standards Board shall consist of 110 members, as follows:
   a. Fifty-five (55) shall be state election officials selected by the chief State election official of each State.
   b. Fifty-five (55) shall be local election officials selected as follows:
      i. Each state’s local election officials, including the local election officials of Puerto Rico and the United States Virgin Islands, shall select a representative local election official from the state in a process supervised by the chief election official of the state.
      ii. In the case of the District of Columbia, Guam, and American Samoa, the chief election official shall establish a procedure for selecting an individual to serve as a local election official. The individual selected under such a procedure may not be a member of the same political party as the chief election official.
c. The two Standards Board members who represent the same state may not be members of the same political party.

Article IV. Standards Board Member Vacancies

1. The chief election official of each state shall notify the EAC and Executive Board of the Standards Board within five (5) business days of any vacancy or membership changes to the Standards Board.

2. Vacancy appointments to the Standards Board shall be made in accordance with Section 213(a) of HAVA.

Article V. Executive Board of the Standards Board

1. Pursuant to Section 213(c) of HAVA, the Standards Board shall select nine (9) of its members to serve as the Executive Board of the Standards Board as follows:
   a. Membership:
      i. Not more than five (5) members of the Executive Board may be state election officials.
      ii. Not more than five (5) members of the Executive Board may be local election officials.
      iii. Not more than five (5) members of the Executive Board may be of the same political party.
   b. Nominations:
      i. Expired Terms:
         a. The Nominating Committee shall solicit nominations for the Executive Board from Standards Board members. The Nominating Committee shall send to Standards Board members a solicitation no later than December 1st immediately prior to the expiration of any Executive Board member's term. The solicitations shall designate the address and form for submitting nominations.
         b. Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.
         c. Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than January 15.
         d. Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.
      ii. Vacancies Before the End of a Term:
         a. In the event of a vacancy on the Executive Board prior to the expiration of a member's term on the Executive Board, the Nominating Committee shall send to Standards Board members a solicitation no later than sixty (60) days before the next meeting of the Standards Board. The solicitations shall designate the address and form for submitting nominations.
(b) Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.

(c) Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than the date indicated on the solicitation.

(d) Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.

c. Elections.

i. Elections to the Executive Board shall be by secret ballot and shall take place at a meeting of the Standards Board.

ii. The ballot shall be designed to enable Standards Board members to select candidates based on the following: (1) With which party the candidate affiliates, (2) whether the candidate is a state or local election official, (3) which state or territory the candidate represents, (4) whether the candidate was elected or appointed, and (5) in the case of state election officials, whether the candidate is a Secretary of State, a member of a Citizen Board, or a State Election Director. The ballot shall also include concise biographical information for each candidate.

iii. For nominations following the first election (2005), not including any special elections to fill unexpired terms, two (2) of the three positions shall be local election officials. Nominations following the second election (2007), two of the three positions shall be for state election officials. The numbers of state and local nominations shall continue to alternate in subsequent elections.

iv. Within thirty (30) days of an Executive Board election, the Executive Board members shall convene to elect a Chair, Vice-Chair, Secretary, and Parliamentarian.

d. Executive Board Members Terms of Service and Vacancies.

i. Generally.

(a) The Chair of the Executive Board shall notify the EAC and Nominations Committee Chair within five (5) business days of any vacancy on the Executive Board.

(b) The Chair, Vice-Chair, and Secretary, shall not serve for a term of more than one (1) year. An Executive Board member shall not serve for two (2) consecutive terms for the same office, except in the case of a member serving the unexpired term of an office, in which case the member may be elected to the same office for the succeeding terms.

(c) An Executive Board member may be removed from the Executive Board for cause by a vote of two-thirds (2/3) of Standards Board members at a Standards Board meeting.

(d) In the event of a vacancy in the Executive Board, the remaining members of the Executive Board may appoint an interim member to the Executive Board until the next Standards Board meeting.
ii. Initial Term.

(a) Pursuant to Section 213(c)(3) of HAVA, of the members first
selected to serve on the Executive Board of the Standards Board:

   (i) Three (3) shall serve for one (1) term.
   (ii) Three (3) shall serve for two (2) consecutive terms.
   (iii) Three (3) shall serve for three (3) consecutive terms.

iii. Subsequent Terms.

(a) Pursuant to Section 213(c)(2) of HAVA, members of the Executive
Board shall serve for a term of two (2) years and may not serve for
more than three (3) consecutive terms.

(b) Members of the Standards Board who have previously served on the
Executive Board shall be eligible to be nominated to the Executive
Board no sooner than two (2) years from the last term in which they
served on the Executive Board.

e. Meetings.

i. Any two members of the Executive Board may call an Executive Board
meeting by filing the original call of the meeting with the DFO,
including the stated reason for calling the meeting.

ii. A majority of Executive Board Members shall be present for a quorum.

iii. The Executive Board shall agree to actions by a majority vote of the
Executive Board.

iv. Proxy voting will not be allowed in Executive Board votes.

v. Any member of the Standards Board may attend and at the discretion of
the Chair, may participate in any and all discussions at an Executive
Board meeting, but may not vote.

vi. If the Executive Board decides to hold an open meeting, it shall do so in
accordance with the requirements FACA.

Article VI. Executive Board Duties

1. Chair. The Chair shall:

   a. Preside over all meetings of the Executive Board and Standards Board.
   b. Appoint the chair of standing committees and any ad hoc committees of the Standards Board.
   c. Establish the agenda for meetings of the Executive Board and Standards Board in consultation with the DFO.
   d. Call meetings of the Executive Board and Standards Board in consultation with the DFO.
   e. Act as the official liaison between the Standards Board and the EAC for all resolutions, recommendations, and information requests.
   f. Serve as an ex officio member of all committees.
   g. Appoint a Parliamentarian to preside over all Standards Board meetings.

      i. The Parliamentarian shall provide advice and assistance to the Chair so that the Chair can run all meetings in accordance with Roberts Rules of Order.

2. Vice-Chair. The Vice-Chair shall:
a. Preside over meetings of the Executive Board and Standards Board in the Chair’s absence.
b. Perform other duties as may be appropriate in the Chair’s absence.
c. Assist the Chair from time to time as the Chair may designate.
d. In the event of a vacancy before the completion of the Chair’s term, serve as the Chair.

Secretary. The Secretary shall:

- Oversee preparation and transmission of the minutes at Executive Board and Standards Board meetings, with assistance from the DFO.
- Assist the Chair at meetings and from time to time as the Chair may designate.
- Convene Standards Board meetings, including, but not limited to, meetings by conference call and virtual meetings. Such meetings must allow each Standards Board member to include their comments and view or hear others’ comments.
- Consult with the DFO to ensure compliance with federal statutes and other applicable regulations.
- Attend Executive Board meetings, including, but not limited to, meetings by conference call and virtual meetings, in accordance with these bylaws. In the event that an Executive Board member fails to attend or participate in at least one (1) Executive Board meeting within the preceding twelve (12) month period, such Executive Board member shall forfeit his or her position on the Executive Board, thereby creating a vacancy which vacancy shall be filled in accordance with these bylaws.
- As soon as possible, provide Standards Board Members all guidelines proposed to be adopted pursuant to Section 222(b)(3) of HAVA. Executive Board recommendations to the Standards Board pursuant to Section 222(b)(3) of HAVA shall include an appendix of all dissenting comments from Executive Board members.
- Perform all other duties as from time to time the Standards Board may delegate to the Executive Board.

Upon notice of an Executive Board meeting, the Executive Board shall notify the Standards Board of the Executive Board meeting.

Designated Federal Officer (DFO). The DFO shall:

- Serve as the government’s agent for all Standards Board activities.
- Approve all Standards Board meetings.
- Approve agendas proposed by the Executive Committee.
- Attend all Standards Board and Executive Board meetings.
- Adjourn Standards Board and Executive Board meetings when such adjournment is in the public interest.
- Provide adequate staff support to the Standards Board, to assist with:
  - Notice. The DFO shall:
    - Notify members of the time and place for each meeting.
    - Upon notice of an open Executive Board meeting, notify the Standards Board and public of time and place for the meeting.
(c) Notify appointing authorities of any and all vacancies on the Standards Board.

ii. **Recordkeeping and Administration.** The DFO shall:

(a) Maintain records for all meetings, including subgroup or working group activities, as required by law.

(b) Maintain the roll.

(c) Assure that minutes of all Standards Board and Executive Board meetings, including subgroup and working group activities, are prepared and distributed.

(d) House at the EAC and maintain official Standards Board records including subgroup and working group activities.

(e) Filing all papers and submissions prepared for or by the Standards Board, including those items generated by subgroups and working groups.

(f) Respond to official correspondence.

(g) Prepare and handle all reports, including the annual report as required by FAA.

(h) Acting as the Standards Board’s agent to collect, validate, and pay vouchers for pre-approved expenditures.

### Article VII. Meetings

1. Pursuant to Sections 215(a)-(c) of HAVA, the Standards Board shall hold a meeting of its members:
   a. At such times as it considers appropriate for the purposes of conducting such business as it considers appropriate under HAVA.
   b. In any event, not less frequently than once every two (2) years for purposes of selecting the Executive Board.
   c. For the purpose of voting on voluntary voting system guidelines referred to it under Section 222 of HAVA, not less frequently than once every year.

2. Meetings shall be called by the DFO in consultation with the Executive Board.

3. The DFO shall approve the agenda for all meetings. The EAC shall distribute the agenda to Standards Board members prior to each meeting and shall publish notice of the meeting in the Federal Register as required by FACA.

4. Standards Board members and members of the public may submit agenda items to the DFO or Executive Board Chair.

5. Meetings:
   a. Open Meetings.
      i. 
   b. Closed Meetings.
   c. Unless otherwise determined in advance, all Standards Board meetings will be open to the public.
   d. Once an open meeting has begun, it will not be closed unless prior approval of the closure has been obtained and proper notice of the closed session has been given to the public.
e. Notices of closed meetings will be published in the Federal Register at least 15 calendar days in advance.

f. If, during the course of an open meeting, matters inappropriate for public disclosure arise during discussions, the Chair will order such discussion to cease and will schedule it for closed session.

g. All materials brought before, or presented to, the Board during the conduct of an open meeting, including, but not limited to, the minutes of the proceedings of the previous open meeting, will be available to the public for review or copying at the time of the scheduled meeting.

h. Members of the public may attend any meeting or portion of a meeting that is not closed to the public and may, at the determination of the Chair, offer oral comment at such meeting. The Chair may decide in advance to exclude oral public comment during a meeting, in which case the meeting announcement published in the Federal Register will note that oral comment from the public is excluded. In such a case, the Standards Board will accept written comments as an alternative. In addition, members of the public may submit written statements to the EAC at any time.

i. Standards Board meetings will be closed only in limited circumstances and in accordance with applicable law. The Standards Board must obtain prior approval to conduct a closed session. Requests for closed meetings must be submitted to EAC's Office of General Counsel a minimum of 45 days in advance of the proposed closed session.

j. Where the DFO, in conjunction with the Office of General Counsel, has determined in advance that discussions during a Standards Board meeting will involve matters about which public disclosure would be harmful to the interests of the government, industry, or others, an advance notice of a closed meeting, citing the applicable exemptions of the Government in the Sunshine Act (GISA), shall be published in the Federal Register. The notice may announce the closing of all or just part of a meeting.

a. The DFO or his or her designee, shall assure that detailed minutes of each meeting are prepared and distributed to Standards Board members.

b. Minutes of open meetings shall be available to the public upon request. Minutes of closed meetings shall be available to the public upon request, subject to the Freedom of Information Act (FOIA).

c. Minutes of meetings shall include the following: (1) Time, (2) date, (3) location, (4) record of persons present, including the names of Standards Board members, staff, and the names of members of the public making written or oral presentations, (5) a complete and accurate description of the matters discussed and conclusions reached, and (6) copies of all reports received, issued, or approved by the Standards Board.

d. All documents, reports, or other materials prepared by or for the Standards Board constitute official government records and will be housed at the EAC and maintained according to the Federal Records Act.

Article VIII. Quorum and Proxy Voting

Break out by 1+2
1. A quorum shall be established when fifty percent (50%) plus one of Standards Board members is present for a meeting or are present by proxy.
   a. Only other Standards Board members may declare another Standards Board member present by proxy.
   b. Proxy designations may be submitted in writing to the Chair up to the day of the Standards Board meeting.

2. The Standards Board shall agree to actions by majority vote of those present and voting unless otherwise specified by these bylaws.

3. Proxy votes may only be cast by Standards Board members, provided proxy designations have been timely filed in advance with the Chair clearly identifying the Standards Board member to cast an absent member's proxy vote.

4. The Chair shall appoint a proxy committee to verify the eligibility of proxy votes. Voting procedures for the Standards Board, the Executive Board, and the subcommittees will follow the accepted procedures in the latest edition of Robert's Rules of Order. Votes by the Standard Board on recommendations to EAC shall have the ayes, nays, and abstentions recorded.

Article IX. Committees

In appointing members to committees, the Standards Board shall pay particular attention to ensuring diverse membership. Accordingly, the Executive Board shall do due diligence to ensure that committee members (1) affiliate with diverse parties, (2) are representative of both state and local election officials, (3) represent different states and territories, and (4) are representative of both elected and appointed officials.

1. Meetings:
   a. All committees may meet informally at any time for the purpose of conducting their business including telephonically or through electronic media.

2. Standing Committees:
   a. Nominating Committee: The Nominating Committee shall:
      i. Be comprised of five (5) members.
      ii. Solicit nominations for the Executive Board from Standards Board members.
      iii. Prepare and distribute to Standards Board members ballots that include all the information listed in Article V, section 1, subsection c, paragraph 2 of these Bylaws.
   b. Bylaws Committee: The Bylaws Committee shall:
      i. Be comprised of seven (7) members.
      ii. Be chaired by the Parliamentarian.
      iii. Submit all recommended amendments to the Executive Board for a 10-day comment period before submitting recommendations to the Standards Board for resolution and adoption.

3. Ad-Hoc Committees:
   a. The Standards Board may, at any time, by majority vote, establish an ad-hoc committee.
b. The Standards Board member wishing to establish an ad-hoc committee must present to the Standards Board the reason(s) he/she is requesting the committee.

c. Once an ad-hoc committee has been established, the Executive Board shall appoint members to the ad-hoc committee.

d. No ad-hoc committee shall be comprised of more than ten (10) Standards Board Members.

Article X. Amendments

The bylaws may be amended by a two-thirds (2/3) vote of the members present and voting at any Standards Board meeting.

The Standards Board's Bylaws Committee shall formulate a form for proposing an amendment to the Standards Board's Bylaws. The form shall require the specific language of the proposed amendment to be included, identify the author of the amendment, and be designed to elicit the rationale and impact. All proposed bylaw changes must be submitted in writing to the DFO, who shall thereafter forward the proposed changes to the Standards Board Bylaws Committee and the EAC's General Counsel.

a. The General Counsel shall report in an expeditious manner to the Bylaws Committee and the Executive Board whether or not a proposed change to the Bylaws is consistent with federal law and regulations.

The Standards Board's Executive Committee shall place the report on the proposed change to the Standards Board Bylaws on the agenda for the next meeting of the Standards Board.

The Executive Board shall forward all proposed changes to Standards Board members at least thirty-five (35) days prior to the next meeting of the Standards Board via email and U.S. Mail to the applicable address of record on file with the EAC. The Executive Board shall request that EAC post the proposed change to the bylaws and all supporting material on EAC's website at least thirty-five (35) days prior to the next meeting of the Standards Board.

Article XI. Expenses and Reimbursement.

1. Expenses related to Standards Board operations will be borne by the EAC.

2. Expenditures of any kind must be approved in advance by the DFO.

3. Standards Board members shall not receive any compensation for their services, but shall be paid travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of federal agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in performance of their services for the Standards Board.

Article XII. Effective Date

Section XII. Transition Procedures and Ratification

b) Bylaws committee will transmit proposed bylaws committees to Executive Board.
1. The adoption of the bylaws has no effect on the selection, terms or appointment of the officers or members of the Standards Board, the Executive Board, or a committee of the Board serving on the effective date of these bylaws.

2. All acts of the Standards Board, the Executive Board, or a committee of the Board are hereby ratified, except to the extent that an act does not conform with a resolution adopted by the Standards Board before the effective date of these bylaws.

These bylaws were last updated 10/06 and supersede any previous versions.
BYLAWS

UNITED STATES ELECTION ASSISTANCE COMMISSION STANDARDS BOARD

The U.S. Election Assistance Commission Standards Board, hereinafter referred to as Standards Board, embodies the vision of Congress to forge a partnership among federal, state and local election officials whose goal is to promote public confidence in the conduct of federal elections in the United States.

Article I. Authority

1. Pursuant to the Federal Advisory Committee Act and the Help America Vote Act of 2002 (HAVA) [Public Law 107-252], as such statutes may be amended from time to time, the Standards Board has been granted its authority through its charter with the United States Election Assistance Commission (EAC) (filed with Congress on June 14, 2004).

Article II. Objectives:
The Standards Board will:

1. Advise the EAC through review of the voluntary voting system guidelines described in Title II Part 3 of HAVA; through review of the voluntary guidance described under Title III of HAVA; and through the review of the best practices recommendations described in Section 241 of Title II of HAVA, as required by HAVA or as may be developed by EAC.

2. Provide guidance and advice to the EAC on a variety of topics related to the administration of elections for Federal office.

3. Function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act (FACA); and all other applicable Federal laws.

Article III. Standards Board Membership

1. Pursuant to Section 213(a) of HAVA, the Standards Board shall consist of 110 members, as follows:
   a. Fifty-five (55) shall be state election officials selected by the chief State election official of each State.
   b. Fifty-five (55) shall be local election officials selected as follows:
      ii. Each state’s local election officials, including the local election officials of Puerto Rico and the United States Virgin Islands, shall select a representative local election official from the state in a process supervised by the chief election official of the state.
      iii. In the case of the District of Columbia, Guam, and American Samoa, the chief election official shall establish a procedure for selecting an individual to serve as a local election official. The individual selected under such a procedure may not be a member of the same political party as the chief election official.
c. The two Standards Board members who represent the same state may not be members of the same political party.

Article IV. Standards Board Member Vacancies

1. The chief election official of each state shall notify the EAC and Executive Board of the Standards Board within five (5) business days of any vacancy or membership changes to the Standards Board.
2. Vacancy appointments to the Standards Board shall be made in accordance with Section 213(a) of HAVA:
   a. Fifty-five (55) shall be state election officials selected by the chief State election official of each State.
   b. Fifty-five (55) shall be local election officials selected as follows:
      iv. Each state’s local election officials, including the local election officials of Puerto Rico and the United States Virgin Islands, shall select a representative local election official from the state in a process supervised by the chief election official of the state.
      v. In the case of the District of Columbia, Guam, and American Samoa, the chief election official shall establish a procedure for selecting an individual to serve as a local election official. The individual selected under such a procedure may not be a member of the same political party as the chief election official.
   c. The two Standards Board members who represent the same state may not be members of the same political party.
3. In December of each year, the EAC shall notify the appointing authority of each state or territory who represents their state or territory on the Standards Board.

Article V. Executive Board of the Standards Board

1. Pursuant to Section 213(c) of HAVA, the Standards Board shall select nine (9) of its members to serve as the Executive Board of the Standards Board as follows:
   i. Not more than five (5) members of the Executive Board may be state election officials.
   ii. Not more than five (5) members of the Executive Board may be local election officials.
   iii. Not more than five (5) members of the Executive Board may be of the same political party.

b. Nominations.
   i. Expired Terms.
      (a) The Nominating Committee shall solicit nominations for the Executive Board from Standards Board members. The Nominating Committee shall send to Standards Board members a solicitation no later than December 1st immediately prior to the expiration of any Executive Board member’s term. The solicitations shall designate the address and form for submitting nominations.
(b) Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.

(c) Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than January 15.

(d) Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.

ii. Vacancies Before the End of a Term.

(a) In the event of a vacancy on the Executive Board prior to the expiration of a member's term on the Executive Board, the Nominating Committee shall send to Standards Board members a solicitation no later than sixty (60) days before the next meeting of the Standards Board. The solicitations shall designate the address and form for submitting nominations.

(b) Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.

(c) Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than the date indicated on the solicitation.

(d) Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.

(c. Elections)

i. Elections to the Executive Board shall be by secret ballot and shall take place at a meeting of the Standards Board.

ii. The ballot shall be designed to enable Standards Board members to select candidates based on the following: (1) With which party the candidate affiliates, (2) whether the candidate is a state or local election official, (3) which state or territory the candidate represents, (4) whether the candidate was elected or appointed, and (5) in the case of state election officials, whether the candidate is a Secretary of State, a member of a Citizen Board, or a State Election Director. The ballot shall also include concise biographical information for each candidate.

iii. For nominations following the first election (2005), not including any special elections to fill unexpired terms, two (2) of the three positions shall be local election officials. For nominations following the second election (2007), two of the three positions shall be for state election officials. The number of state and local nominations shall continue to alternate in subsequent elections.

iv. Within thirty (30) days of an Executive Board election, the Executive Board members shall convene to elect a Chair, Vice-Chair, Secretary, and Parliamentarian.

d. Executive Board Members Terms of Service and Vacancies.
i. Generally.
   (a) The Chair of the Executive Board shall notify the EAC and Nominations Committee Chair within five (5) business days of any vacancy on the Executive Board.
   (b) The Chair, Vice-Chair, and Secretary, shall not serve for a term of more than one (1) year. An Executive Board member shall not serve for two (2) consecutive terms for the same office, except in the case of a member serving the unexpired term of an office, in which case the member may be elected to the same office for the succeeding terms.
   (c) An Executive Board member may be removed from the Executive Board for cause by a vote of two-thirds (2/3) of Standards Board members at a Standards Board meeting.
   (d) In the event of a vacancy in the Executive Board, the remaining members of the Executive Board may appoint an interim member of the Executive Board until the next Standards Board meeting.
   (e)

ii. Initial Term.
   (a) Pursuant to Section 213(c)(3) of HAVA, of the members first selected to serve on the Executive Board of the Standards Board:
      (i) Three (3) shall serve for one (1) term.
      (ii) Three (3) shall serve for two (2) consecutive terms.
      (iii) Three (3) shall serve for three (3) consecutive terms.

iii. Subsequent Terms.
   (a) Pursuant to Section 213(c)(2) of HAVA, members of the Executive Board shall serve for a term of two (2) years and may not serve for more than three (3) consecutive terms.
   (b) Members of the Standards Board who have previously served on the Executive Board shall be eligible to be nominated to the Executive Board no sooner than two (2) years from the last term in which they served on the Executive Board.

Meetings.
   i. Any two members of the Executive Board may call an Executive Board meeting by filing the original call of the meeting with the DFO, including the stated reason for calling the meeting.
   ii. A majority of Executive Board Members shall be present for a quorum.
   iii. The Executive Board shall agree to actions by a majority vote of the Executive Board.
   iv. Proxy voting will not be allowed in Executive Board votes.
   v. Any member of the Standards Board may attend and at the discretion of the Chair, may participate in any and all discussions at an Executive Board meeting, but may not vote.
   vi. If the Executive Board decides to hold an open meeting, it shall do so in accordance with the requirements FACA.
Article VI. Executive Board Duties

1. Chair. The Chair shall:
   a. Preside over all meetings of the Executive Board and Standards Board.
   b. Appoint the chair of standing committees and any ad hoc committees of the Standards Board.
   c. Establish the agenda for meetings of the Executive Board and Standards Board in consultation with the DFO.
   d. Call meetings of the Executive Board and Standards Board in consultation with the DFO.
   e. Act as the official liaison between the Standards Board and the EAC for all resolutions, recommendations, and information requests.
   f. Serve as an ex officio member of all committees.
   g. Appoint a Parliamentarian to preside over all Standards Board meetings.
      i. The Parliamentarian shall provide advice and assistance to the Chair so that the Chair can run all meetings in accordance with Roberts Rules of Order.

2. Vice-Chair. The Vice-Chair shall:
   a. Preside over meetings of the Executive Board and Standards Board in the Chair’s absence.
   b. Perform other duties as may be appropriate in the Chair’s absence.
   c. Assist the Chair from time to time as the Chair may designate.
   d. In the event of a vacancy before the completion of the Chair’s term, serve as the Chair.

3. Secretary. The Secretary shall:
   a. Review Executive Board minutes before distribution to Standards Board members.
   b. Ensure, with assistance from the DFO, that meeting minutes are properly on file.
   c. Assist the Chair at meetings and from time to time as the Chair may designate.

4. Executive Board, Generally. The Executive Board shall:
   a. Perform all duties required under HAVA and other applicable Federal law.
   b. Appoint the membership of appropriate standing committees and ad hoc committees by soliciting interest from the Standards Board membership.
   c. Meet as necessary to address issues of concern in between Standards Board meetings.
   d. Approve the minutes of the Executive Board meetings.
   e. Convene Standards Board meetings, including, but not limited to, meetings by conference call and virtual meetings. Such meetings must allow each Standards Board member to include their comments and view or hear others’ comments.
   f. Consult with the DFO to ensure compliance with federal statutes and other applicable regulations.
   g. Attend Executive Board meetings, including, but not limited to, meetings by conference call and virtual meetings, in accordance with these bylaws. In the event that an Executive Board member fails to attend or participate in at least one (1) Executive Board meeting within the preceding twelve (12) month period, such Executive Board member shall forfeit his or her position on the Executive Board, thereby creating a vacancy. Such vacancy shall be filled in accordance with these bylaws.
   h. As soon as possible, provide Standards Board Members all guidelines proposed to be adopted pursuant to Section 222(b)(3) of HAVA. Executive Board recommendations to the Standards Board pursuant to Section 222(b)(3) of HAVA shall include an
appendix of all dissenting comments from Executive Board members.

i. Perform all other duties as from time to time the Standards Board may delegate to the Executive Board.

j. Upon notice of an Executive Board meeting, the Executive Board shall notify the Standards Board of the Executive Board meeting.

5. Designated Federal Officer (DFO). The DFO shall:
   a. Serve as the government’s agent for all Standards Board activities.
   b. Approve or call Standards Board meetings.
   c. Approve agendas proposed by the Executive Committee.
   d. Attend all Standards Board and Executive Board meetings.
   e. Adjourn Standards Board and Executive Board meetings when such adjournment is in the public interest.
   f. Provide adequate staff support to the Standards Board, to assist with:
      i. Notice. The DFO shall:
         (a) Notify members of the time and place for each meeting.
         (b) Upon notice of an open Executive Board meeting, notify the Standards Board and public of time and place for the meeting.
         (c) Notify appointing authorities of any and all vacancies on the Standards Board.
      ii. Recordkeeping and Administration. The DFO shall:
         (a) Maintain records for all meetings, including subgroup or working group activities, as required by law.
         (b) Maintain the roll.
         (c) Assure that minutes of all Standards Board and Executive Board meetings, including subgroup and working group activities are prepared and distributed.
         (d) House at the EAC and maintain official Standards Board records, including subgroup and working group activities.
         (e) Filing all papers and submissions prepared for or by the Standards Board, including those items generated by subgroups and working groups.
         (f) Respond to official correspondence.
         (g) Prepare and handle all reports, including the annual report as required by FACA.
         (h) Acting as the Standards Board’s agent to collect, validate, and pay all vouchers for pre-approved expenditures.

Article VII. Meetings

1. Pursuant to Sections 215(a)-(c) of HAVA, the Standards Board shall hold a meeting of its members:
   a. At such times as it considers appropriate for the purposes of conducting such business as it considers appropriate under HAVA.
   b. In any event, not less frequently than once every two (2) years for purposes of selecting the Executive Board.
   c. For the purposes of voting on voluntary voting system guidelines referred to it
under Section 222 of HAVA, not less frequently than once every year.

2. Meetings shall be called by the DFO in consultation with the Executive Board.

3. The DFO shall approve the agenda for all meetings. The EAC shall distribute the agenda to Standards Board members prior to each meeting and shall publish notice of the meeting in the Federal Register as required by FACA.

4. Standards Board members and members of the public may submit agenda items to the DFO or Executive Board Chair.

5. Meetings.
   a. Open Meetings.
      i. Unless otherwise determined in advance, all Standards Board meetings will be open to the public.
      ii. Members of the public may attend any meeting or portion of a meeting that is not closed to the public and may, at the determination of the Chair, offer oral comment at such meeting. The Chair may decide in advance to exclude oral public comment during a meeting, in which case the meeting announcement published in the Federal Register will note that oral comment from the public is excluded. In such a case, the Standards Board will accept written comments as an alternative. In addition, members of the public may submit written statements to the EAC at any time.
      iii. All materials brought before, or presented to, the Board during the conduct of an open meeting, including but not limited to, the minutes of the proceedings of the previous open meeting, will be available to the public for review or copying at the time of the scheduled meeting.
      iv. Minutes of open meetings shall be available to the public upon request.
      v. Once an open meeting has begun, it will not be closed unless prior approval of the closure has been obtained and proper notice of the closed session has been given to the public. If, during the course of an open meeting, matters inappropriate for public disclosure arise during discussions, the Chair will order such discussion to cease and will schedule it for closed session.
   b. Closed Meetings.
      i. Notices of closed meetings will be published in the Federal Register at least 15 calendar days in advance.
      ii. Standards Board meetings will be closed only in limited circumstances and in accordance with applicable law. The Standards Board must obtain prior approval to conduct a closed session. Requests for closed meetings must be submitted to EAC's Office of General Counsel a minimum of 45 days in advance of the proposed closed session.
      iii. Where the DFO, in conjunction with the Office of General Counsel, has determined in advance that discussions during a Standards Board meeting will involve matters about which public disclosure would be harmful to the interests of the government, industry, or others, an advance notice of a closed meeting, citing the applicable exemptions of the Government in the Sunshine Act (GISA), shall be published in the Federal Register. The notice may announce the closing of all or just part
of a meeting.

iv. Minutes of closed meetings shall be available to the public upon request, subject to the Freedom of Information Act (FOIA).

6. Minutes.
   a. The DFO, or his or her designee, shall assure that detailed minutes of each meeting are prepared and distributed to Standards Board members.
   b. Meeting minutes shall include the following: (1) Time, (2) date, (3) location, (4) record of persons present, including the names of Standards Board members, staff, and the names of members of the public making written or oral presentations, (5) a complete and accurate description of the matters discussed and conclusions reached, and (6) copies of all reports received, issued, or approved by the Standards Board.
   c. All documents, reports, or other materials prepared by or for the Standards Board constitute official government records and will be housed at the EAC and maintained according to the Federal Records Act.
   d. Meeting minutes are considered part of the official government record.

Article VIII. Quorum and Proxy Voting

1. Quorum:
   a. A quorum shall be established when fifty percent (50%) plus one of Standards Board members is present for a meeting or are present by proxy.
   b. Proxy designations may be submitted in writing to the Chair up to the day of the Standards Board meeting.

2. Proxy Votes.
   a. Proxy votes may only be cast by Standards Board members, provided proxy designations have been timely filed in advance with the Chair clearly identifying the Standards Board member to cast an absent member’s proxy vote.
   b. The Chair shall appoint a proxy committee to verify the eligibility of proxy votes.

3. Voting Generally
   a. The Standards Board shall agree to actions by majority vote of those present and voting unless otherwise specified by these bylaws.
   b. Votes by the Standards Board on recommendations to EAC shall have the ayes, nays, and abstentions recorded.

Article IX. Committees

In appointing members to committees, the Standards Board shall pay particular attention to ensuring diverse membership. Accordingly, the Executive Board shall do due diligence to ensure that committee members (1) affiliate with diverse parties, (2) are representative of both state and local election officials, (3) represent different states and territories, and (4) representative of both elected and appointed officials.

1. Meetings.
   a. All committees may meet informally at any time for the purpose of conducting
their business, including telephonically or through electronic media.

2. Standing Committees.
   a. Nominating Committee. The Nominating Committee shall:
      i. Be comprised of five (5) members.
      ii. Solicit nominations for the Executive Board from Standards Board members.
      iii. Prepare and distribute to Standards Board members ballots that include all the information listed in Article V, section 1, subsection c, paragraph ii of these Bylaws.
   b. Bylaws Committee. The Bylaws Committee shall:
      i. Be comprised of seven (7) members.
      ii. Submit a report with all recommended amendments to the Executive Board for a seven (7) day comment period before submitting recommendations to the Standards Board for resolution and adoption.

   a. The Standards Board may, at any time, by majority vote, establish an ad-hoc committee.
   b. The Standards Board member wishing to establish an ad-hoc committee must present to the Standards Board the reason(s) he/she is requesting the committee.
   c. Once an ad-hoc committee has been established, the Executive Board shall appoint members to the ad-hoc committee.

Article X. Amendments

1. The Standards Board's Bylaws Committee shall promulgate a form for proposing an amendment to the Standards Board's Bylaws.
   a. The form shall require the specific language of the proposed amendment to be included, identify the author of the amendment, and be designed to elicit the rationale and impact of the proposed amendment.

2. All proposed bylaw changes must be submitted in writing to the DFO:
   a. No later than December 1; or
   b. Within the seventy (70) day timeframe provided by the Executive Committee.

3. After receiving proposed bylaw changes, the DFO shall forward the proposed changes to the Standards Board Bylaws Committee and the EAC's General Counsel.
   c. The General Counsel shall report in an expeditious manner to the Bylaws Committee and the Executive Board whether or not a proposed change to the Bylaws is consistent with federal law and/or rules.
   d. The Bylaws Committee shall transmit a report containing the proposed bylaws to the Executive Board.
   e. The Standards Board's Executive Committee shall place the report on the proposed change to the Standards Board's Bylaws on the agenda for the next meeting of the Standards Board.

3. The Executive Board shall forward all proposed changes to Standards Board members at least thirty (30) days prior to the next meeting of the Standards Board via email and U.S. Mail to the applicable address of record on file with the EAC. The Executive Board shall request that EAC post the proposed change to the bylaws and all
supporting material on EAC's website at least thirty (30) days prior to the next meeting of the Standards Board.

4. The bylaws may be amended by on a two-thirds (2/3) vote of the members present and voting at any Standards Board meeting.

Article XI. Expenses and Reimbursement.

1. Expenses related to Standards Board operations will be borne by the EAC.
2. Expenditures of any kind must be approved in advance by the DFO.
3. Standards Board members shall not receive any compensation for their services, but shall be paid travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of federal agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in performance of their services for the Standards Board.

Article XII. Roberts Rules

1. The rules contained in the current edition of Robert's Rules of Order Newly Revised shall govern the Standards Board in all cases to which they are applicable and in which they are not inconsistent with these bylaws and any special rules of order the Standards Board may adopt.
2. Voting procedures for the Standards Board, the Executive Board, and the subcommittees shall follow the accepted procedure, in the latest edition of Robert’s Rules of Order.

Article XIII. Effective Date

1. These By-Laws are effective upon adoption by the Standards Board.

Article XIV. Transition Procedures and Ratification

1. The adoption of these bylaws has no effect on the selection, terms or appointment of the officers or members of the Standards Board, the Executive Board, or a committee of the Board serving on the effective date of these bylaws.
2. All acts of the Standards Board, the Executive Board, or a committee of the Board are hereby ratified, except to the extent that an act does not conform with a resolution adopted by the Standards Board before the effective date of these bylaws.

BYLAWS
OF THE UNITED STATES ELECTION ASSISTANCE COMMISSION
STANDARDS BOARD

The Standards Board embodies the vision of Congress to forge a partnership among federal, state and local election officials whose goal is to promote public confidence in the conduct of federal elections in the United States.

Section I: Purpose

The purpose of the Standards Board is to review the Voluntary Voting System Guidelines and the Best Practices For Voting Processes in Federal Elections, to submit its recommendations to the U.S. Election Assistance Commission (EAC), and to provide guidance and advice to EAC on a variety of topics related to the administration of elections for federal office.

As deemed necessary, the Standards Board may convene hearings or subcommittees to support the Board's functions. The Board and its subcommittees shall function solely as an advisory body and must comply with the Federal Advisory Committee Act (FACA).

Section I: Authority

The Standards Board is a committee authorized and required by the Help America Vote Act of 2002 as such statute may be amended from time to time (HAVA). The Standards Board is subject to FACA, as outlined in its Charter and filed with the Congress on June 14, 2004; HAVA; and all other applicable Federal laws.

Section III: Membership of the Standards Board

A. Membership of the Standards Board shall be governed by Section 213 of HAVA.

B. The chief state election official of each state shall notify the Executive Board of the Standards Board and the EAC promptly of any vacancy or change of membership of the state's representatives to the Standards Board.

C. Two nonpartisan members from the same state shall not be deemed to be members of the same party as such term is used in Section 213(a)(3) of HAVA.
D. Duties of the members of the Standards Board shall be governed by HAVA.

Section IV: Executive Board

A. There shall be an Executive Board of the Standards Board that may act on behalf of the Standards Board between meetings of the Standards Board.

B. Membership of the Executive Board shall be governed by Section 213(c) of HAVA.

C. Nominations to the Executive Board shall be made in the following manner:

The Nominating Committee shall solicit nominations to the Executive Board from the membership. The solicitation shall be sent no later than December 1 before the expiration of an Executive Board member's term. Standards Board members may nominate themselves or other Standards Board members by responding to this solicitation.

Nominations shall be submitted to the DFO and shall be received no later than January 15. Nominations shall be in writing and may be submitted electronically. The solicitation shall designate the address and form for submitting nominations.

The Nominating Committee shall prepare a ballot to be distributed at the Standards Board meeting immediately following the submission deadline. The ballot shall be designed to enable the membership to select candidates based on considerations of party membership, state/local election official, geography, elected/appointed and in the case of state election officials, Secretary of State/Citizen Board. The Nominating Committee shall include a short biography of the candidates along with a description of the factors considered in designing the ballot.

For nominations for the first election following the adoption of these By-Laws (2007) there shall be two (2) positions for local election officials. For nominations for the second election following adoption of the By-Laws (2008) there shall be two (2) positions for state election officials. The number of state/local nominations shall continue to alternate in subsequent elections.

D. Elections to the Executive Board shall be governed by Section 213(c) of HAVA and shall be made at a meeting of the Standards Board.

E. Within 30 days of election of the Executive Board, the Executive Board members shall convene for the purposes of electing a Chair, Vice-Chair, and a Secretary. The term of the Chair, Vice-Chair, and Secretary shall be for one year. A member may not serve two consecutive terms for the
same office, except in the case of a member serving the unexpired term of an office then the member may be elected to the same office for the succeeding term.

F. The duties of the Chair shall include:

1. To preside at all meetings of the Executive Board.
2. To preside at all meetings of the Standards Board.
3. To appoint the chair of standing committees and any ad hoc committees of the Standards Board. The current standing committees are the Nominating Committee which shall be comprised of five (5) members and the By-Laws Committee which shall be comprised of seven (7) members.
4. To establish the agenda for meetings of the Executive Board in consultation with the EAC.
5. To establish the agenda for meetings of the Standards Board in consultation with the EAC.
6. To call meetings of the Executive Board in consultation with the EAC.
7. To call meetings of the Standards Board in consultation with the EAC.

G. The duties of the Vice-Chair shall be:

1. To preside at meetings of the Executive Board or perform other duties as may be appropriate in the absence of the Chair.
2. To preside at meetings of the Standards Board in the absence of the Chair.
3. To assist the Chair from time to time as the Chair may designate.
4. The Vice-Chair serves as the Chair-elect and serves as Chair for the unexpired term of the Chair if a vacancy occurs.

H. The duties of the Secretary shall include:

1. To maintain minutes at meetings of the Executive Board with the assistance of the DFO.
2. To maintain the record of the minutes of the Executive Board meetings.
3. To assist the Chair at meetings.

4. To assist the Chair from time to time as the Chair may designate.

I. The duties of the Executive Board shall include:

1. To establish and appoint the membership of appropriate standing committees and ad hoc committees of the Standards Board by soliciting interest from the Standards Board membership.

2. To meet as necessary to address issues of concern to the Standards Board between meetings of the Standards Board.

3. To approve the minutes of the Executive Board meetings.

4. To convene meetings of the Executive Board, including but not limited to, meetings by so-called conference calls utilizing such technology that allows each member to hear the comments of other members and to have their comments heard by other members.

5. To consult with the DFO to ensure compliance with federal statutes or other standards.

6. To attend meetings of the Executive Board, or to participate in meetings of the Executive Board when utilizing so-called conference call technology, as called by the Chair or pursuant to subparagraph (8) of this subsection. Failure to attend or participate in 25% of the meetings of the Executive Board within the preceding 12 month period shall cause a vacancy on the Executive Board held by such member.

7. To perform all duties as required under HAVA.

8. Two members of the Executive Board shall have authority to call a meeting of the Executive Board in writing by filing the original call of the meeting with the Standards Board’s Designated Federal Officer (DFO) and the purpose of the meeting shall be stated therein.

9. A majority of the members of the Executive Board shall be present for a quorum.

10. Actions of the Executive Board shall be made by majority vote of the full membership of the Executive Board. Proxy voting will not be allowed in Executive Board meetings. A representative of an Executive Board member may attend and participate in any and all discussions but may not vote.
11. A member of the Executive Board may be removed from the Executive Board by two-thirds vote of the Standards Board at a meeting of the Standards Board.

12. In the event of a vacancy in the Executive Board the remaining members of the Executive Board may appoint an interim member of the Executive Board until the next meeting of the Standards Board.

13. The Executive Board shall promptly provide to the members of the Standards Board all guidelines proposed to be adopted pursuant to Section 222(b)(3) of HAVA.

14. The recommendations made by the Executive Board to the Standards Board pursuant to Section 222(b)(3) shall include an appendix of any and all dissenting comments received from Executive Board members.

15. Such other duties as may be delegated to the Executive Board by the Standards Board from time to time.

J. The duties of the DFO shall be:

1. To serve as the government's agent for all matters related to the Standards Board's activities.

2. To approve or call the meeting of the Standards Board.

3. To approve agendas proposed by the Executive Committee of the Standards Board.

4. To attend all meetings of the Standards Board and Executive Board of the Standards Board.

5. To adjourn the meetings when such adjournment is in the public interest.

6. To provide adequate staff support to the Standards Board, including the performance of the following functions:
   a. Notifying members of the time and place for each meeting.
   b. Maintaining records of all meetings, including subgroup or working group activities, as required by law.
   c. Maintaining the roll.
of Information Act (FOIA). The minutes will include the following: the time, date and place of the Standards Board meeting; a record of the persons present (including the names of Standards Board members, names of staff, and the names of members of the public from whom written or oral presentations were made); a complete and accurate description of the matters discussed and conclusions reached; and copies of all reports received, issued or approved by the Board.

All documents, reports, or other materials prepared by, or for, the Standards Board constitute official government records and will be maintained according to the Federal Records Act.

F. Unless otherwise determined in advance, all meetings of the Standards Board will be open to the public. Once an open meeting has begun, it will not be closed unless prior approval of the closure has been obtained and proper notice of the closed session has been given to the public. All materials brought before, or presented to, the Board during the conduct of an open meeting, including the minutes of the proceedings of the previous open meeting, will be available to the public for review or copying at the time of the scheduled meeting.

Members of the public may attend any meeting or portion of a meeting that is not closed to the public and may, at the determination of the Chair, offer oral comment at such meeting. The Chair may decide in advance to exclude oral public comment during a meeting, in which case the meeting announcement published in the Federal Register will note that oral comment from the public is excluded and will invite written comment as an alternative. Members of the public may submit written statements to the EAC at any time.

G. Meetings of the Standards Board will be closed only in limited circumstances and in accordance with applicable law. The Standards Board must obtain prior approval to conduct a closed session. Requests for closed meetings must be submitted to EAC's Office of General Counsel 45 days in advance of the proposed closed session.

Where the DFO, in conjunction with the Office of General Counsel, has determined in advance that discussions during a Standards Board meeting will involve matters about which public disclosure would be harmful to the interests of the government, industry, or others, an advance notice of a closed meeting, citing the applicable exemptions of the Government in the Sunshine Act (GISA), will be published in the Federal Register. The notice may announce the closing of all or just part of a meeting. If, during the course of an open meeting, matters inappropriate for public disclosure arise during discussions, the Chair will order such discussion to cease and will schedule it for closed session. Notices of closed meetings will be published in the Federal Register at least 15 calendar days in advance.
Section VI: Voting

A. Actions taken by the Standards Board shall be by majority vote of those present and voting unless otherwise specified in these bylaws.

B. 1. Proxy designations must be submitted in writing to the Chair up to the day of the meeting of the Standards Board.

2. Proxy votes may be cast by members of the Standards Board or other designee provided the proxy designations have been timely filed in advance with the Chair clearly identifying the Board member or other designee to cast his proxy vote.

3. The Chair shall appoint a proxy committee to verify eligibility of proxy votes.

C. Voting procedures for the Standards Board, the Executive Board, and the subcommittees will follow the accepted procedure in the latest edition of Robert's Rules of Order. Votes by the Standard Board on recommendations to EAC shall have the ayes, nays, and abstentions recorded.

Section VII: Bylaws

A. General

1. The general membership of the EAC's Standards Board shall have the exclusive right to repeal and/or amend the organization's bylaws.

2. The bylaws may be amended by a two-thirds vote of the members present and voting at any Standards Board meeting, for which legal notice has been given to the Standards Board, where a quorum is present, and when at least 30 days prior notice of the vote has been given to the Standards Board members.

B. Procedures

1. The Standards Board's Bylaws Committee shall promulgate a form for proposing an amendment to the Standards Board's Bylaws. The form shall require the specific language of the proposed amendment to be included, shall identify the author of the amendment, and shall be designed to elicit the rationale and impact statement.

2. Proposed changes to the Standards Board's bylaws submitted fewer than 60 days prior to a scheduled meeting of the Standards Board shall be deferred until the meeting following that meeting of the Standards Board.
3. Proposed changes to the Standards Board’s Bylaws shall be submitted to the Standards Board’s Designated Federal Officer who shall then expeditiously forward the proposed changes to the Standard’s Board’s Bylaws Committee and to the EAC’s General Counsel.

4. The General Counsel shall report in an expeditious manner to the Bylaws Committee and the Executive Board whether or not a proposed change to the Bylaws is consistent with federal law and/or rules.

5. The Standards Board’s Bylaws Committee shall prepare and forward to the Standards Board’s Executive Committee the General Counsel’s report on the legality of the proposed change, an analysis of the impact of a proposed change and a recommendation for disposition at least 45 days prior to the next Standards Board meeting.

6. The Standards Board’s Executive Committee shall place the report on the proposed change to the Standards Board’s Bylaws on the agenda for the meeting of the Standards Board.

7. The Standards Board’s Executive Board shall forward all proposed changes along with rationale for or against the proposed change to all Standards Board members at least 35 days prior to the next meeting of the Standards Board via email and U.S. Mail to the applicable address of record on file with the EAC. The Executive Board shall request EAC post the proposed change to the bylaws and all supporting material on EAC’s website at least 35 days prior to the next meeting of the Standards Board.

Section VII: Expenses and Reimbursement

Expenses related to the operation of the Standards Board will be borne by the EAC. Expenditures of any kind must be approved in advance by the DFO.

Members of the Standards Board will not be compensated for their services but will receive reimbursement for travel expenses and subsistence. The EAC will pay travel and per diem for non-government members at a rate equivalent to that allowable for federal employees.

Section IX: Effective Date

These By-Laws are effective upon adoption by the Standards Board.

Section X: Transition Procedures and Ratification

A. The adoption of the By-Laws has no effect on the selection, terms or appointment of the officers or member of the Standards Board, the Executive Board, or a subcommittee of a Board serving on the effective date of these By-Laws.
B. All acts of the Standards Board, the Executive Board or a subcommittee of a Board are hereby ratified, except to the extent that an act does not conform with a resolution adopted by the Standards Board before the effective date of these By-Laws.
BYLAWS OF THE U.S. ELECTION ASSISTANCE COMMISSION-
BOARD OF ADVISORS

Article I: Board of Advisors, Operating Authority

1. Pursuant to the Federal Advisory Committee Act and the Help America Vote Act of 2002 (HAVA) [Public Law 107-252], the Board of Advisors has been granted its authority through its Charter with the U.S. Election Assistance Commission and will hereinafter be referred to as 'The Board'.

Article II: Objectives

1. Advise the EAC through review of the voluntary voting system guidelines described in Title II Part 3 of the HAVA; through review of the voluntary guidance described under Title III of HAVA; and through the review of the best practices recommendations contained in the report submitted under Section 242(b) of Title II (HAVA Title II section 212).
2. The Board will function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act.(Exhibit A)

Article III: Membership

1. Pursuant to HAVA Title, Section 214 (a), the Board shall consist of the following:
   a. Two members appointed by the National Governors Association;
   b. Two members appointed by the National Conference of State Legislatures;
   c. Two members appointed by the National Association of Secretaries of State;
   d. Two members appointed by the National Association of State Election Directors;
   e. Two members appointed by the National Association of Counties;
   f. Two members appointed by the National Association of County Recorders, Election Officials, and Clerks;
   g. Two members appointed by the United States Conference of Mayors;
   h. Two members appointed by the Election Center;
   i. Two members appointed by the International Association of County Recorders, Election Officials, and Treasurers;
   j. Two members appointed by the United States Commission on Civil Rights;
   k. Two members appointed by the Architectural and Transportation Barrier Compliance Board under section 502 of the Rehabilitation Act of 1973 (29 U.S.C. 792);
   l. The Chief of the Public Integrity Section of the Criminal Division of the Department of Justice, or the chief's designee;
   m. The Chief of the Voting Section of the Civil Rights Division of the Department of Justice, or the chief's designee;
   n. The Director of the Federal Voting Assistance Program of the Department of Defense;
o. Four members representing professionals in the field of science and technology, of whom
   i. One (1) each shall be appointed by the Speaker and the Minority Leader of the House of Representatives; and
   ii. One (1) each shall be appointed by the Majority Leader and the Minority Leader of the Senate.

p. Eight members representing voter interests, of whom-
   i. Four (4) members shall be appointed by the Committee on House Administration of the House of Representatives, of whom two (2) shall be appointed by the chair and two (2) shall be appointed by the ranking minority member; and
   ii. Four (4) members shall be appointed by the Committee on Rules and Administration of the Senate, of whom two (2) shall be appointed by the chair and two (2) shall be appointed by the ranking minority members.

Article IV: Terms of Service, Filling vacancies;
1. Members of the Board shall serve for a term of two (2) years and may be reappointed.
2. Vacancy appointments to the Board shall be made in the same manner as the original appointment pursuant to the HAVA.

Article V: Officers
1. The Board shall elect a Chair, Vice-Chair and Secretary from its members.
2. All votes for officers shall be by secret ballot.
3. Each position shall last a period of one year or until the next election for a specified office.
4. Officers may serve no more than two consecutive terms for a specific office.
5. The Chair shall appoint a Parliamentarian to oversee the conduct of the meeting.
6. The election of officers shall be held at the first meeting of each calendar year.

Article VI: Duties of Officers
1. The Chair shall preside over meetings of the Board of Advisors; appoint all committees and serve as official liaison to the Election Assistance Commission for all resolutions and recommendations adopted by the Board; request information from any federal agencies necessary to assist with the functions of the Board of Advisors and coordinate with the Election Assistance Commission and Standards Board meeting calls pursuant to Section 222 of the HAVA; appoint committees as necessary to carry out advisory responsibilities charged under the HAVA or as otherwise assigned by the Election Assistance Commission; serve as ex officio member of all committees.
2. The Vice-Chair, in absence of the Chair, shall serve as official liaison to the Election Assistance Commission for all resolutions and
recommendations adopted by the Board and preside over meetings of the Board of Advisors;
3. The Secretary shall be responsible for notifying the Board of Advisors on meeting calls; pending matters of business for the Board of Advisors; and serve as the Chair of the By-laws Committee.

Article VII: Meetings
1. Pursuant to the HAVA, the Board of Advisors shall conduct no less than two meetings per calendar year subject to forty-five (45) days advance notice of the meeting and proposed actions.
2. Other meetings may be called at the request of the Chair, or at the written request of a majority of the Board of Advisors, as necessary, subject to forty-five (45) days advance notice, which notice may be waived by agreement of a majority of the members to the extent permitted by law.
3. All meetings shall be subject to requirements within the Federal Advisory Committee Act.
4. To the extent permitted by law, meetings may be held by electronic means such as conference calls.

Article VIII: Quorum and Proxy Voting
1. Quorum shall consist of present and voting members of the Board.
2. Proxy designations must be submitted in writing to the Chair up to the day of the meeting of the Board.
3. Proxy votes may only be cast by members of the Board provided the proxy designations have been timely filed in advance with the Chair clearly identifying the Board member to cast his proxy vote.
4. The Chair shall appoint a proxy committee to verify eligibility of proxy votes.

Article IX: Standing Committees
Section 1- Meetings
a. All committees may meet informally at anytime for the purpose of conducting their business, including telephonically or as otherwise determined necessary by the Committee Chair.

Section 2-Bylaws Committee
a. The Secretary shall serve as Chair of the Bylaws Committee.
b. The Bylaws Committee shall be comprised of no more than five (5) individuals, including the Secretary. Each remaining member of the committee will be appointed by the Board of Advisors by majority vote.
c. All bylaws and resolutions presented to the association shall be referred to the committee for consideration and reported to the meeting prior to adoption.

Section 3-Voting System Standards Committee
a. The Chair of the Voting System Standards Committee shall be appointed by the Chair of the Board of Advisors.
b. The Chair of the Voting System Standards Committee must be acquainted with the conduct of elections and incorporation of various election technology and/or ballot design.

c. The Committee shall be comprised of no more than eleven (11) individuals. (members)

d. At least one (1) member, excluding the Chair, shall represent a disability advocacy group on this committee.

e. One (1) member, excluding the Chair, shall represent each of the following:
   i. National Association of County Recorders, Election Officials and Clerks (NACRC);
   ii. International Association of Clerks, Recorders, Election Officials and Treasurers (IACREOT);
   iii. National Association of Secretaries of State (NASS);
   iv. National Association of State Election Directors (NASED);
   v. The Election Center;

f. The Chair shall appoint other members who are not specified in Section (e).

Article X: Amendments

a. The bylaws may be amended based on a 2/3 decision of the Board.

b. All proposed bylaw changes must be submitted to the Chair for subsequent reporting to the Bylaws committee no less than thirty (30) days prior to a meeting.

c. All proposed bylaw changes should be submitted in writing and distributed to all members of the Advisory Board one (1) month prior to a meeting.

Article XI: Parliamentary Authority

§ 1. Short title

This Act may be cited as the "Federal Advisory Committee Act".

HISTORY:
(Oct. 6, 1972, P.L. 92-463, § 1, 86 Stat. 770.)

HISTORY; ANCILLARY LAWS AND DIRECTIVES

Short titles:
Act Dec. 17, 1997, P.L. 105-153, § 1, 111 Stat. 2689, provides: "This Act may be cited as the 'Federal Advisory Committee Act Amendments of 1997'." For full classification of such Act, consult USCS Tables volumes.

Interpretive Notes and Decisions:

Requirements of Federal Advisory Committee Act (5 USCS Appx §§ 1 et seq.) cannot be constitutionally applied to American Bar Association committee that advises President and Department of Justice on federal judicial nominations.
because President alone nominates candidates for federal judgeships, role of Congress is limited to Senate's advise and consent function, purposes of requirements are served through public confirmation process, and any need for applying requirements to committee is outweighed by President's interest in preserving confidentiality and freedom of consultation in selecting nominees. Washington Legal Foundation v United States Dept of Justice (1988, DC Dist Col) 691 F Supp 483, aff'd (1989) 491 US 440, 103 L Ed 2d 377, 109 S Ct 255,8, (criticized in In re Richardson (1998, BC MD La) 217 BR 479, 32 BCD 114) and (criticized in Manshardt v Fed. Judicial Qualifications Comm. (2005, CA9 Cal) 401 F3d 1014).

§ 2. Findings and purpose

(a) The Congress finds that there are numerous committees, boards, commissions, councils, and similar groups which have been established to advise officers and agencies in the executive branch of the Federal Government and that they are frequently a useful and beneficial means of furnishing expert advice, ideas, and diverse opinions to the Federal Government.

(b) The Congress further finds and declares that—

(1) the need for many existing advisory committees has not been adequately reviewed;
(2) new advisory committees should be established only when they are determined to be essential and their number should be kept to the minimum necessary;
(3) advisory committees should be terminated when they are no longer carrying out the purposes for which they were established;
(4) standards and uniform procedures should govern the establishment, operation, administration, and duration of advisory committees;
(5) the Congress and the public should be kept informed with respect to the number, purpose, membership, activities, and cost of advisory committees; and
(6) the function of advisory committees should be advisory only, and that all matters under their consideration should be determined, in accordance with law, by the official, agency, or officer involved.

HISTORY; ANCILLARY LAWS AND DIRECTIVES.
Other provisions:

**Transfer of certain advisory committee functions.** Ex. Or. No. 12024 of Dec. 1, 1977, 42 Fed. Reg. 61445, provided:

"By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including the Federal Advisory Committee Act, as amended [5 USCS Appx], Section 301 of Title 3 of the United States Code, Section 202 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 581c) [31 USCS § 1531], and Section 7 of Reorganization Plan No. 1 of 1977 [42 Fed. Reg. 56101 (October 21, 1977), 5 USCS § 903 note], and as President of the United States of America, in accord with the transfer of advisory committee functions from the Office of Management and Budget to the General Services Administration provided by Reorganization Plan No. 1 of 1977, it is hereby ordered as follows:

"Section 1. The transfer, provided by Section 5F of Reorganization Plan No. 1 of 1977 (42 FR 56101) [5 USCS § 903 note, and note preceding 3 USCS § 101], of certain functions under the Federal Advisory Committee Act, as amended (5 U.S.C. App. I) [5 USCS Appx.], from the Office of Management and Budget and its Director to the Administrator of General Services is hereby effective.

"Sec. 2. There is hereby delegated to the Administrator of General Services all the functions vested in the President by the Federal Advisory Committee Act, as amended [5 USCS Appx], except that, the annual report to the Congress required by Section 6(c) of that Act [5 USCS Appx] shall be prepared by the Administrator for the President's consideration and transmittal to the Congress.

"Sec. 3. The Director of the Office of Management and Budget shall take all actions necessary or appropriate to effectuate the transfer of functions provided in this Order [this note], including the transfer of funds, personnel and positions, assets, liabilities, contracts, property, records, and other items related to the functions transferred.

"Sec. 4. Executive Order No. 11769 of February 21, 1974 [formerly set out as a note to this section] is hereby revoked.

"Sec. 5. Any rules, regulations, orders, directives, circulars, or other actions taken pursuant to the functions transferred or reassigned as provided in this Order [this note] from the Office of Management and Budget to the Administrator of General Services, shall remain in effect as if issued by the Administrator until amended, modified, or revoked.

"Sec. 6. This Order [this note] shall be effective November 20, 1977.”

In suit alleging that task force, which included Vice President and government officials and gave policy recommendations to President, failed to comply with Federal Advisory Committee Act, where district court entered broad discovery orders against Vice President and government officials, appellate court prematurely terminated its writ of mandamus inquiry after Vice President refused to assert executive privilege; appellate court labored under mistaken assumption that assertion of executive privilege was necessary precondition to petitioners' separation-of-powers objections. *Cheney v United States Dist. Court (2004, US)* 159 L Ed 2d 459, 124 S Ct 2576, 32 Media L R 2121, 17 FLW Fed S 447.

Where U.S. Supreme Court Justice attended duck-hunting trip with Vice President of United States, who was defendant in official-capacity suit before Court, Justice's recusal was not required or permitted, because, inter alia, case was run-of-the-mill legal dispute about administrative decision under Federal Advisory Committee Act, *Cheney v United States Dist. Court* (2004) 541 US 913, 158 L Ed 2d 225, 124 S Ct 1391.

Working groups formed during post-judgment conference process concerning protection of endangered Snake River salmon were not advisory committees within meaning of FACA since they were not established by agency of federal government, rather were created by principals in preceding litigation, nor were they funded by or subject to management of federal government. *ALCOA v National Marine Fisheries Serv. (1996, CA9 Or)* 92 F3d 902, 96 CDOS 5952, 96 Daily Journal DAR 9735.

Alleged inadequate public notice at several steps in protracted approval process for siting new memorial was harmless since position of organization challenging procedure was main focus of each stage in approval process, was considered and simply did not prevail; notably, organization did not become involved in siting process despite numerous instances of adequate notice. *Friends of Iwo Jima v National Capital Planning Comm'n (1999, CA4 Va)* 176 F3d 768.

Letter by Attorney General's Commission on Pornography to magazine publisher asking for response to accusation that its magazine was pornographic was not unlawful since, notwithstanding any misapprehension of publisher, court did believe that Commission ever threatened to use state's coercive power against publisher. *Penthouse Intl, Ltd. v Meese (1991, App DC)* 291 US App DC 183, 939 F2d 1011, cert den (1992) 503 US 950, 117 L Ed 2d 650, 112 S Ct 1513.

Even if Federal Advisory Committee Act's requirements that agency representative approve agenda of advisory committee meeting as well as § 2's hortatory language that all matters under advisory committee's consideration should be determined by official, agency, or officer forbid advisory committee from taking any action not approved by agency representative and not included in committee's agenda, it does not mean that agency administrator or representative had duty to intervene to prevent committee from voting on resolution not on agenda. *Claybrook v Slater (1997, App DC)* 324 US App DC 145, 111 F3d 904 (criticized in *Taylor v FDIC (1997, App DC)* 328 US App DC 52, 132 F3d 753).

District court's injunction against agency's use of or reliance on report prepared by committee organized and operated in violation of FACA probably did not redress any of appellees' claimed injuries, and district court should have afforded appellees opportunity to take discovery and refine their request for equitable relief. *Natural Resources Defense Council v Pena (1998, App DC)* 331 US App DC 198, 147 F3d 1012, on remand, motion to strike den (1999, DC Dist Col) 189 FRD 4.

In suit where Vice President, and others, all defendants under Federal Advisory Committee Act suit, petitioned for writ of mandamus vacating district court's discovery orders, directing court to rule on basis of administrative record,
petitioners failed to satisfy heavy burden required to justify extraordinary remedy of mandamus as their challenges to
district court's legal rulings could be fully considered on appeal following final judgment, and their claims of harm
could be fully cured in district court; narrow, carefully focused discovery would fully protect Vice President; either Vice
President would have no need to claim privilege, or if he did, then district court's express willingness to entertain privilege
claims and to review allegedly privileged documents in camera would prevent any harm; moreover, such measures would
enable district court to resolve statutory question—whether Federal Advisory Committee Act (FACA), 5 USCS Appx § 2,
applied to energy policy commission at issue—without sweeping intrusions into Presidency and Vice Presidency. In re
S Ct 2576, 32 Media L R 2121, 17 FLW Fed S 447 and (overd as stated in'Halmon v Jones Lang Wootton USA (2005, DC
Dist Col) 355 F Supp 2d 239).

of remaining advisory committees, and preventing advisory groups from becoming self-serving. Consumers Union
of United States, Inc. v HEW (1976, DC Dist Col) 409 F Supp 473, affd without op (1977, App DC) 179 US App DC 280,
551 F2d 466.

Contention that advisory boards established by Taylor Grazing Act [43 USCS §§ 315 et seq.] were exempt from effect
of Federal Advisory Act was without merit; in choosing to terminate all advisory committees, Congress contemplated
that FAA would affect existing substantive law and that if it was later decided that a particular advisory committee was

Industry representatives did not constitute federal advisory committee within meaning of 5 USCS Appx § 2(2), where
group of cement industry representatives who submitted proposal to Environmental Protection Agency for enforcement
agreement regarding cement kiln dust was not established at request of EPA, group had no fixed membership or organized
structure, and although EPA had logistical control over group, this was not substantive control amounting to utilization

Animal rights organization is not granted preliminary injunction to enjoin members of U.S. delegation from
participating, without complying with 5 USCS Appx §§ 1–14, in working group of experts whose objective is to develop
international humane animal trapping standards, where (1) majority of members of U.S. delegation were selected by
National Governors Association with no input from federal agencies, (2) only one federal official played substantive role,
and where working group was formed at behest of international constituency, and (3) U.S. Trade Representative (USTR)
at most indirectly facilitated formation of group, because plaintiff has not demonstrated substantial likelihood of success
on merits of its claim that working group was established or utilized by USTR and is thereby subject to statute. People for
the Ethical Treatment of Animals v Barshefsky (1996, DC Dist Col) 925 F Supp 844.

Private organization representing chemical producers did not have standing to challenge composition of National
Advisory Committee for Acute Exposure Guideline Levels for Hazardous Substances as violative of "fair balance"
requirement of 5 USCS Appx § 2, given that committee had made no final decisions on any acute exposure guideline
levels and that there was no reason to believe that committee would do anything differently with one or 2 more industry
representatives serving on it. Fertilizer Inst. v United States EPA (1996, DC Dist Col) 938 F Supp 52, 43 Envt Rep Cas
1385 (criticized in Northwest Ecosystem Alliance v Office of the United States Trade Representative (1999, WD Wash)

MSPB lacked jurisdiction of employee's IRA appeal since his employer, Defense Intelligence Agency, is not covered
agency, but rather is specifically excluded from coverage of whistleblower protection provisions. Van Werry v Merit Sys.
Protection Bd. (1993, CA) 995 F2d 1048.
§ 3. Definitions.

For the purpose of this Act—

(1) The term "Director" ["Administrator"] means the Director of the Office of Management and Budget [Administrator of General Services].

(2) The term "advisory committee" means any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee or other subgroup thereof (hereafter in this paragraph referred to as "committee"), which is—

(A) established by statute or reorganization plan, or

(B) established or utilized by the President, or

(C) established or utilized by one or more agencies,

in the interest of obtaining advice or recommendations for the President or one or more agencies or officers of the Federal Government except that such term excludes (i) any committee that is composed wholly of full-time, or permanent part-time, officers or employees of the Federal Government, and (ii) any committee that is created by the National Academy of Sciences or the National Academy of Public Administration.

(3) The term "agency" has the same meaning as in section 551(1) of title 5, United States Code.

(4) The term "Presidential advisory committee" means an advisory committee which advises the President.

HISTORY:

HISTORY; ANCILLARY LAWS AND DIRECTIVES

Explanatory notes:

The bracketed words "Administrator" and "Administrator of General Services" have been inserted in para. (1) of this section on the authority of Reorg. Plan No. 1 of 1977, § 5F, 42 Fed. Reg. 56101, 91 Stat. 1634, which appears as 5 USCS § 903 note, which transferred all functions of the Office of Management and Budget and the Director thereof relating to the Committee Management Secretariat to the Administrator of General Services, effective Nov. 20, 1977, as provided by section 1 of Ex. Or. No. 12024 of Dec. 1, 1977, 42 Fed. Reg. 61445, which appears as a note to § 2 of this Act.

Amendments:

1997. Act Dec. 17, 1997, in para. (2), in the concluding matter, substituted "such term excludes (i) any committee that is composed wholly of full-time, or permanent part-time, officers or employees of the Federal Government, and (ii) any committee that is created by the National Academy of Sciences or the National Academy of Public Administration." for "such term excludes (i) the Advisory Commission on Intergovernmental Relations, (ii) the Commission on Government Procurement, and (iii) any committee which is composed wholly of full-time officers or employees of the Federal Government."
Other provisions:

"(1) In general. Except as provided in paragraph (2), this section and the amendments made by this section [redesignating § 15 of the Federal Advisory Committee Act as § 16, and adding a new § 15] shall take effect on the date of the enactment of this Act.

"(2) Retroactive effect. Subsection (a) and the amendments made by subsection (a) [amending this section] shall be effective as of October 6, 1972, except that they shall not apply with respect to or otherwise affect any particular advice or recommendations that are subject to any judicial action filed before the date of the enactment of this Act."

1. Advisory committees 2. Standing to challenge committee actions 3. Status of particular bodies as advisory committees

1. **Advisory committees**

Although National Petroleum Council had operated for considerable period of time prior to effective date of Federal Advisory Committee Act, it is clear that Council is advisory committee within meaning of § 3 of FACA and thus subject to Act's provisions. Metcalf v National Petroleum Council (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

When federal administrator establishes or utilizes advisory committee, he must comply with provisions of Federal Advisory Committee Act; it makes no difference whether committee is his own creation or pre-existing group and there is nothing in regulatory scheme of Act to suggest that Congress intended to exclude organizations fitting definition of advisory committee from coverage simply because they had existence independent of agency utilizing them. Center for Auto Safety v Cox (1978, App DC) 188 US App DC 426, 580 F2d 689.

Federal Advisory Committee Act was not intended to apply to all amorphous, ad hoc group meetings; only those groups having some sort of established structure and defined purpose may be considered as "advisory committees" within meaning of Act. Nader v Baroody (1975, DC Dist Col) 396 F Supp 1231.

National Academy of Sciences is not agency for purposes of Federal Advisory Committee Act in absence of any significant delegation of governmental authority, jurisdiction, administrative function or power; nor was Academy's Committee on Motor Vehicle Emissions "advisory committee" under FACA where legislative history of that Act evidences apparent intention on part of Congress to exclude from coverage groups providing advice to federal agencies pursuant to

Meetings held between FDA officials and representatives of Cosmetic, Toiletry and Fragrance Association were not "advisory committee meetings" within meaning of § 3(2) of FACA where, inter alia, CTFA was presenting to FDA a voluntary, industry-sponsored proposal and was seeking FDA's comments and advice, rather than FDA having solicited industry and consumer viewpoints on program proposed by FDA. *Consumers Union of United States, Inc. v HEW* (1976, DC Dist Col) 409 F Supp 792, 8 Envt Rep Cas 1084, 6 ELR 20046, affd without op (1977, App DC) 179 US App DC 280, 551 F2d 466.

Federal Advisory Committee Act was intended to apply to committees created by agencies and to those committees not originally created by agencies but subsequently used by them as advisory committees; exclusion provided by § 3(2) of FACA was applicable to committees made up wholly of federal officials, and did not apply to committee consisting of both state and federal employees. *Center for Auto Safety v Tiemann* (1976, DC Dist Col) 414 F Supp 215, remanded (1978, App DC) 188 US App DC 426, 380 F2d 689.

Requirements of Federal Advisory Committee Act (5 USCS Appx §§ 1 et seq.) cannot be constitutionally applied to American Bar Association committee that advises President and Department of Justice on federal judicial nominations because President alone nominates candidates for federal judgeships, role of Congress is limited to Senate's advise and consent function, purposes of requirements are served through public confirmation process, and any need for applying requirements to committee is outweighed by President's interest in preserving confidentiality and freedom of consultation in selecting nominees. *Washington Legal Foundation v United States Dept of Justice* (1988, DC Dist Col) 691 F Supp 483, affd (1989) 491 US 440, 105 L Ed 2d 377, 109 S Ct 2558 (criticized in *In re Richardson* (1998, BC MD La) 217 BR 479, 32 BCD 114) and (criticized in *Manshardt v Fed. Judicial Qualifications Comm.* (2005, CA9 Cal) 401 F3d 1014).

Department of Energy's (DOE) establishment and use of three of four challenged committees contravened Federal Advisory Committee Act, 5 USCS Appx where court reasoned that committees were advisory in nature; committees did not have capability of acting on their own and, rather, provided advice to DOE. *NRDC v Abraham* (2002, DC Dist Col) 223 F Supp 2d 162, set aside in part and remanded in part (2004, App DC) 359 US App DC 183, 353 F3d 40 and (ovrd in part as stated in *Int'l Brominated Solvents Ass'n v Am. Conf. of Governmental Indus. Hygienists, Inc.* (2005, MD Ga) 21 BNA OSHC 1018).

National Commission on Observance of International Women's Year (IWY) is not "advisory committee" subject to Federal Advisory Committee Act since there is nothing in Ex. Or. No. 11832 or Public Law 94-167 which assigns Commission any advisory functions; while it may make its own recommendations in report on National Conference of Women it submits to Congress and President, Commission was not "established" or "utilized" for this purpose; National Women's Conference, to be organized by National Commission on IWY which will, among other functions, make findings and recommendations on various subjects to be submitted through Commission's report to President is advisory committee subject to Federal Advisory Committee Act; State and regional meetings, organized under Public Law 94-167, have sole statutory purpose of selecting representatives to Conference, and since they are not required to make recommendations to IWY Commission and others, they are not "advisory committees", nor are State coordinating committees "advisory" since they have only operational role of organizing and conducting State or regional meetings and are, in effect, grantees of National Commission. (1977) 57 Comp Gen 51.

2. Standing to challenge committee actions

Plaintiff has standing to bring claim under Federal Advisory Committee Act where it sustains injury in fact, injury could be remedied if court invalidated committee's decision, and where interest falls within zone of interest of Federal Advisory Committee Act. *HLI Lordship Indus. v Committee for Purchase from Blind & Other Severely Handicapped* (1985, ED Va) 615 F Supp 970, revd on other grounds, remanded (1986, CA4 Va) 791 F2d 1136.

3. Status of particular bodies as advisory committees

American Bar Association's standing committee on federal judiciary, in its role of advising Justice Department...
regarding potential nominees for federal judgeships; does not constitute advisory committee for purposes of FACA because literalistic reading of definition section would bring such advisory relationship within act’s terms; such relationship was not within contemplation of President’s executive order which governed functioning of advisory committees until FACA’s passage; and FACA’s legislative history does not display intent to widen such order’s application to include advisory relationship between Committee and Justice Department. Public Citizen v United States Dep’t of Justice (1989) 491 US 440, 105 L Ed 2d 377, 109 S Ct 2558 criticized in In re Richardson (1998, BC MD La) 217 BR 479, 32 BCD 1144 and (criticized in Manshardt v Fed. Judicial Qualifications Comm. (2005, CA9 Cal) 401 F3d 1014).

Group that was organized and funded at least in part by certain federal agencies to assist agencies and other agencies with developing strategies for implementing restoration projects in Florida Everglades met definition of advisory committee set forth in 5 USCS App. 2 § 3. Miccosukee Tribe of Indians v S. Everglades Restoration Alliance (2002, CA11 Fla) 304 F3d 1076, 33 ELR 20024. 15 FLW Fed C 976 (criticized in Int’l Brominated Solvents Ass’n v Am. Conf. of Governmental Indus. Hygienists, Inc. (2004, MD Ga) 20 BNA OSHC 2070).

Committee formed to recommend nominees for certain federal appointments was not advisory committee within scope of Federal Advisory Committee Act (FACA), 5 USCS App. 2 § 3, because it was not established by statute, agency, or President; moreover, it was not utilized by President for purposes of FACA, particularly since its recommendations were not solicited by President. Manshardt v Fed. Judicial Qualifications Comm. (2005, CA9 Cal) 408 F3d 1154.

President’s Task Force on National Health Care Reform was not advisory group subject to FACA since First Lady, who was appointed to chair Task Force, was federal employee; Congress has recognized in 3 USCS § 105 that President’s spouse is functional equivalent of assistant to President; and President’s implicit authority to enlist his spouse in aid of discharge of his federal duties undermines claim that treating President’s spouse as officer or employee would violate anti-nepotism provisions of 5 USCS § 3110. Association of Am. Physicians & Surgeons v Clinton (1993, App DC) 302 US App DC 208, 997 F2d 898, 21 Media L R 1705.

Group advising U.S. Sentencing Commission on environmental crimes was not subject to FACA; Congress clearly excluded Sentencing Commission from APA, which determines FACA coverage, and group was not “utilized” by DOJ, even though members of group from DOJ were likely to exercise significant influence on group’s deliberations and ensuing recommendations, since group answered to Commission, not DOJ. Washington Legal Found. v United States Sentencing Comm’n (1994, App DC) 305 US App DC 93, 17 F3d 1446, 22 Media L R 1338, 25 ELR 21189.

Panel of experts and consumers convened by Agency for Health Care policy and Research to develop clinical practice guideline on treatment of lower back pain for health care practitioners was not advisory committee under FACA since it was created to develop guidelines for health care practitioners, not to provide advice to federal government, and fact that federal agency used guideline to formulate policy did not make panel advisory committee. Sofamor Danek Group v Gaus (1995, App DC) 314 US App DC 43, 61 F3d 929, cert den (1996) 516 US 1112, 133 L Ed 2d 841, 116 S Ct 910.

Presidential legal expense trust fund created by President and his wife to defray personal legal fees and related expenses incurred by President in legal proceedings commenced after he assumed office but unrelated to any of his official duties was not “advisory committee” since its main purpose was collecting and managing funds, not giving advice, and, even assuming advice were given, it was not directed to governmental policy. Judicial Watch v Clinton (1996, App DC) 316 US App DC 179, 76 F3d 1232.

In case involving issue whether Task Force on National Health Care Reform was advisory committee, attorney’s fee award to defendant medical associations would be reversed since evidence of government’s bad faith or lack of substantial justification for its litigation position was not clear and convincing, although district court on remand might consider whether sanctions on other grounds were warranted. Association of Am. Physicians & Surgeons, Inc. v Clinton (1999, App DC) 337 US App DC 394, 187 F3d 655.

Task forces organized by nonprofit foundation to assist Executive Committee of Private Sector Survey, appointed pursuant to Executive Order No. 12369, to conduct in-depth reviews of Executive Branch operations and to advise President, Secretary of Commerce and heads of other Federal agencies on cost-effective management, are not advisory committees within meaning of Federal Advisory Committee Act and thus subject to same procedural requirements as Executive Committee itself, since task forces do not provide advice directly to President or any agency but advise only Executive Committee. National Anti-Hunger Coalition v Executive Committee of President’s Private Sector Survey on Cost Control (1983, DC Dist Col) 557 F Supp 324, affd (1983, App DC) 229 US App DC 143, 711 F2d 1071.
Committee which has primarily operational activities and whose advisory capacity is secondary to operational activities, is not advisory committee; National Industries for the Severely Handicapped, as nonprofit corporation is not advisory committee since it is operational component of program which recommends commodities, services and prices for consideration and has limited advisory capacity. HLI Lordship Indus. v. Committee for Purchase from Blind & Other Severely Handicapped (1985, ED Va) 615 F Supp 970, rev'd on other grounds, remanded (1986, CA4 Va) 791 F2d 1136.

Six private United States citizens, each expert in nuclear physics, engineering, and systems management, informally invited by Department of Energy Secretary to examine safety of plutonium production reactor in Richland, Washington, do not constitute "advisory committee" under Federal Advisory Committee Act since (1) experts work independently and report findings alone rather than acting as a committee, and (2) legislative history indicates Act's prime concern is to prevent committees from being controlled by special interest groups, and 6 individuals gained no selfish advantage by serving on advisory panel. Natural Resources Defense Council, Inc. v Herrington (1986, DC Dist Col) 637 F Supp 116.

Expert panel of scientists is advisory committee subject to balanced membership and public meeting requirements of Federal Advisory Committee Act (5 USCS Appx §§ 1 et seq.), where FDA solicited bids for contract to provide it with counsel on important future issues concerning safety of food and cosmetics, and group awarded contract suggested and was subsequently ordered by FDA to assemble expert panel to prepare report to contractor which would review it and then report to FDA, because material facts demonstrate that expert panel was "established" by and is being "utilized" by FDA within meaning of Act. Food Chemical News v Young (1989, DC Dist Col) 709 F Supp 5. 35 CCF P 75632, revd (1990, App DC) 283 US App DC 344, 900 F2d 328, cert den (1990) 498 US 846, 112 L Ed 2d 99, 111 S Ct 132.
(2) the Federal Reserve System.

(c) Nothing in this Act shall be construed to apply to any local civic group whose primary function is that of rendering a public service with respect to a Federal program, or any State or local committee, council, board, commission, or similar group established to advise or make recommendations to State or local officials or agencies.

Interpretive Notes and Decisions:

Plain meaning of Federal Advisory Committee Act § 4(c) is clear; as proviso, it should be construed narrowly as including state and local committees functioning at state or local level and not at federal level. Center for Auto Safety v Cox (1978, App DC) 188 US App DC 426, 580 F2d 689.

Action by manufacturer of prescription medical devices used in spinal surgery, seeking to bar government from publishing its Clinical Practice Guideline (CPG) for acute low-back pain on ground that CPG was generated by panel convened in violation of Federal Advisory Committee Act (5 USCS Appx), is dismissed, where CPG panels are established by agency, not by statute, because panels do not fall within scope of Act. Sofamor Danek Group v Clinton (1994, DC Dist Col) 870 F Supp 379.
§ 5. Responsibilities of Congressional committees; review; guidelines

(a) In the exercise of its legislative review function, each standing committee of the Senate and the House of Representatives shall make a continuing review of the activities of each advisory committee under its jurisdiction to determine whether such advisory committee should be abolished or merged with any other advisory committee, whether the responsibilities of such advisory committee should be revised, and whether such advisory committee performs a necessary function not already being performed. Each such standing committee shall take appropriate action to obtain the enactment of legislation necessary to carry out the purpose of this subsection.

(b) In considering legislation establishing, or authorizing the establishment of any advisory committee, each standing committee of the Senate and of the House of Representatives shall determine, and report such determination to the Senate or to the House of Representatives, as the case may be, whether the functions of the proposed advisory committee are being or could be performed by one or more agencies or by an advisory committee already in existence, or by enlarging the mandate of an existing advisory committee. Any such legislation shall—

1. contain a clearly defined purpose for the advisory committee;
2. require the membership of the advisory committee to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee;
3. contain appropriate provisions to assure that the advice and recommendations of the advisory committee will not be inappropriately influenced by the appointing authority or by any special interest, but will instead be the result of the advisory committee's independent judgment;
4. contain provisions dealing with authorization of appropriations, the date for submission of reports (if any), the duration of the advisory committee, and the publication of reports and other materials, to the extent that the standing committee determines the provisions of section 10 of this Act to be inadequate; and
5. contain provisions which will assure that the advisory committee will have adequate staff (either supplied by an agency or employed by it), will be provided adequate quarters, and will have funds available to meet its other necessary expenses.

(c) To the extent they are applicable, the guidelines set out in subsection (b) of this section shall be followed by the President, agency heads, or other Federal officials in creating an advisory committee.

Law Review Articles:

Interpretive Notes and Decisions:
1. Balanced membership requirement

Individual nominees' challenge, to Secretary of Department of Interior's appointment of members to resource advisory councils, was dismissed in part because balanced membership requirement of 5 USCS app. 2 § 5(b)(3) did not provide meaningful standard of review for court to apply. Colo. Envtl. Coalition v Wenker (2004, CA10 Colo) 353 F3d 1221.

Executive Committee of Private Sector Survey, appointed by President pursuant to Executive Order No. 12369, is "balanced" within meaning of § 5 of Federal Advisory Committee Act (5 USCS Appx), notwithstanding that membership of 150-member committee includes no public interest advocates and no beneficiaries of Federal food assistance programs, since (1) purpose of Survey is to apply to Federal programs expertise of leaders in private sector with special abilities to give detailed advice on cost-effective management of large organizations, which purpose would not necessarily be advanced by inclusion of public interest groups or members of public receiving Federal benefits among membership of committee, and (2) Act does not explain meaning of term "balanced". National Anti-Hunger Coalition v Executive Committee of President's Private Sector Survey on Cost Control (1983, DC Dist Col) 557 F Supp 524, affd (1983, App DC) 229 US App DC 143, 711 F2d 1071.

Membership of National Advisory Committee on Microbiological Criteria for Foods is properly balanced under § 5(b) of Federal Advisory Committee Act (5 USCS Appx § 5(b)), notwithstanding claim that "consumer representative or advocate" has not been appointed; food industry employment or consulting background of several members is not to be equated with anti-regulatory sentiments. Public Citizen v National Advisory Committee on Microbiological Criteria for Foods (1988, DC Dist Col) 708 F Supp 359, affd (1989, App DC) 281 US App DC 1, 886 F2d 419.

National Women's Conference does not violate "balance" requirements of Federal Advisory Committee Act since Commission regulations on organization and conduct of State meetings, where Conference delegates are selected, afford extremely broad basis for participation and leaves degree of "balance" essentially to participants through normal democratic process; objective of balance goes only to composition of voting bodies rather than support or opposition on any given issue. (1977) 57 Comp Gen 51.

2. Review of committee actions

Federal Advisory Committee Act provides for 3 separate sources of review to insure that network of federal advisory committees is operating as effectively and efficiently as possible; first source of review is Congress itself under FACA § 5(a), second source is Director of Office of Management and Budget under authority of § 7(b), and third is head of federal agency utilizing advisory committee who monitors performance of committee under authority of § 8. Metcalf v National Petroleum Council (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

State environmental protection agency may not challenge recommendation of FDA advisory committee on grounds that advisory committee was not fairly balanced as required under 5 USCS Appx §§ 5(b)(2), (c), where committee recommended that Congress pass legislation preempting additional and conflicting state requirements, because no judicially manageable standards exist to review fair balance requirement. Public Citizen v HHS (1992, DC Dist Col) 795 F Supp 1212 (criticized in Northwest Ecosystem Alliance v Office of the United States Trade Representative (1999, WD Wash) 1999 US Dist LEXIS 21689).

3. Standing to challenge committee actions

Mine owners had standing to challenge defendant National Institution for Occupational Safety and Health's and others' alleged violation of Federal Advisory Committee Act by employing NIOSH's Board of Scientific Counselors (BSC) to peer-review protocol to govern planned study of health effects of exposure to diesel exhaust and filing BSC's charter with Interior's appointment of members. to resource advisory committee, since it suffered injury in fact in that it prevented effective congressional monitoring of BSC and mines had compelling interest in ensuring that study's results were accurate. Cargill, Inc. v United States (1999, CA5 La) 173 F3d 323, 18 BNA OSHC 1685, 1999 CCH OSHD P 31814.

In action brought by United States senator under Federal Advisory Committee Act, seeking to enjoin operation of National Petroleum Council on ground that council was illegally dominated by petroleum industry, 140 members out of 155 being affiliated with petroleum industry, district court dismissal for lack of standing by plaintiff would be affirmed, plaintiff's allegations that council's deficient advice would result in governmental policies unfavorable to consumers and to environment being purely speculative and conjectural, and his complaint that poor advice from Council would impede his efforts to produce best possible legislative product being insufficiently specific. Metcalf v National Petroleum Council (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.
Members of group denied membership on Executive Committee of Private Sector Survey, appointed by President pursuant to Executive Order No. 12389, to conduct in-depth reviews of Executive Branch Operations and to advise President, Secretary of Commerce and heads of other Federal agencies on cost-effective management have standing to challenge membership of Executive Committee on grounds of lack of "balance" as required by § 5 of Act. National Anti-Hunger Coalition v Executive Committee of President's Private Sector Survey on Cost Control (1983, DC Dist Col) 557 F Supp 524, affd (1983, App DC) 229 US App DC 143, 711 F2d 1071.

Nonprofit public interest law center has standing to assert claim against American Bar Association Standing Committee under § 5(b) of Federal Advisory Committee Act, where Committee contends center's interest in its activities of reviewing professional qualifications of and rating possible federal judgeship nominees is too remote and speculative to confer standing, because center's claim that defendant is regularly consulting with liberal public interest groups to exclusion of conservative public interest organizations like itself charges that it has been "directly affected" by lack of balance on Committee. Washington Legal Foundation v American Bar Asso. Standing Committee on Federal Judiciary (1986, DC Dist Col) 648 F Supp 1353.

"Stop ERA" group lacked standing to protest alleged violation by National Commission on Observance of International Women's Year of FACA § 5(b)(2) by support of Equal Rights Amendment. Mulqueeny v National Com. on Observance of International Women's Year, 1975 (1977, CA7 Ill) 549 F2d 1115.

§ 6. Responsibilities of the President; report to Congress; annual report to Congress; exclusion

(a) The President may delegate responsibility for evaluating and taking action, where appropriate, with respect to all public recommendations made to him by Presidential advisory committees.

(b) Within one year after a Presidential advisory committee has submitted a public report to the President, the President or his delegate shall make a report to the Congress stating either his proposals for action or his reasons for inaction, with respect to the recommendations contained in the public report.

(c) The President shall, not later than December 31 of each year, make an annual report to the Congress on the activities, status, and changes in the composition of advisory committees in existence during the preceding fiscal year. The report shall contain the name of every advisory committee, the date of and authority for its creation, its termination date or the date it is to make a report, its functions, a reference to the reports it has submitted, a statement of whether it is an ad hoc or continuing body, the dates of its meetings, the names and occupations of its current members, and the total estimated
annual cost to the United States to fund, service, supply; and maintain such committee. Such report shall include a list of those advisory committees abolished by the President, and in the case of advisory committees established by statute, a list of those advisory committees which the President recommends be abolished together with his reasons therefor. The President shall exclude from this report any information which, in his judgment, should be withheld for reasons of national security, and he shall include in such a report a statement that such information is excluded.

HISTORY:
(Oct. 6, 1972, § 6, 86 Stat. 772; Dec. 21, 1982, P.L. 97-375, Title II, § 201(c) in part, 96 Stat. 1822.)

HISTORY; ANCILLARY LAWS AND DIRECTIVES

Amendments:
1982. Act Dec. 21, 1982 (effective 7/1/83, as provided by § 201(c) in part of such Act), in subsec. (c), substituted "The President shall, not later than December 31 of each year, make an annual report to the Congress on the activities, status, and changes in the composition of advisory committees in existence during the preceding fiscal year." for "The President shall, not later than March 31 of each calendar year (after the year in which this Act is enacted [enacted Oct. 6, 1972]), make an annual report to the Congress on the activities, status, and changes in the composition of advisory committees in existence during the preceding calendar year."

Other provisions:
Termination of reporting requirements. For termination, effective May 15, 2000, of provisions of subsec. (c) of this section relating to periodic reports to Congress, see § 3003 of Act Dec. 21, 1995, P.L. 104-66, which appears as 31 USCS § 1113 note. See also page 173 of House Document No. 103-7.

Interpretive Notes and Decisions:
Group that was organized by federal agencies to render advise over restoration projects was advisory committee that was subject to obligations of Federal Advisory Committee Act, 5 USCS App. 2 § 1 et seq. Miccosukee Tribe of Indians v S. Everglades Restoration Alliance (2002, CAII Fla) 304 F3d 1076, 33 ELR 20024, 15 FLW Fed C 976 (criticized in Int'l Brominated Solvents Ass'n v Am. Conf. of Governmental Indus. Hygienists, Inc. (2004, MD Ga) 20 BNA OSHC 2070).

Although under § 6 of Federal Advisory Committee Act, there do not appear to be any statutory criteria for selection of State Coordinating Committees, it could not be argued reasonably that National Commission on Observance of International Woman's Year had not done responsible job of setting up Illinois State Coordinating Committee, even though it might be true that of 59 members, only one was in outspoken opposition to ratification of Equal Rights Amendment;
Commission had sought nominations from many diverse organizations and individuals, and asserted that in selection process there was also conscious attempt to designate people with range of views on some of more controversial issues. *Hall v Siegel (1977, SD III) 467 F Supp 750.*

§ 7. Responsibilities of the Administrator of General Services; Committee Management Secretariat, establishment; review; recommendations to President and Congress; agency cooperation; performance guidelines; uniform pay guidelines; travel expenses; expense recommendations

(a) The Director [Administrator] shall establish and maintain within the Office of Management and Budget [General Services Administration] a Committee Management Secretariat, which shall be responsible for all matters relating to advisory committees.

(b) The Director [Administrator] shall, immediately after the enactment of this Act [enacted Oct. 6, 1972], institute a comprehensive review of the activities and responsibilities of each advisory committee to determine—

1. whether such committee is carrying out its purpose;
2. whether, consistent with the provisions of applicable statutes, the responsibilities assigned to it should be revised;
3. whether it should be merged with other advisory committees; or
4. whether it should be abolished.

The Director [Administrator] may from time to time request such information as he deems necessary to carry out his functions under this subsection. Upon the completion of the Director's [Administrator's] review he shall make recommendations to the President and to either the agency head or the Congress with respect to action he believes should be taken. Thereafter, the Director [Administrator] shall carry out a similar review annually. Agency heads shall cooperate with the Director [Administrator] in making the reviews required by this subsection.

(c) The Director [Administrator] shall prescribe administrative guidelines and management controls applicable to advisory committees, and, to the maximum extent feasible, provide advice, assistance, and guidance to advisory committees to improve their performance. In carrying out his functions under this subsection, the Director [Administrator] shall consider the recommendations of each agency head with respect to means of improving the performance of advisory committees whose duties are related to such agency.

(d) (1) The Director [Administrator], after study and consultation with the Civil Service Commission [Director of the
Office of Personnel Management], shall establish guidelines with respect to uniform fair rates of pay for comparable services of members, staffs, and consultants of advisory committees in a manner which gives appropriate recognition to the responsibilities and qualifications required and other relevant factors. Such regulations shall provide that—

(A) no member of any advisory committee or of the staff of any advisory committee shall receive compensation at a rate in excess of the rate specified for GS-18 of the General Schedule under section 5332 of title 5, United States Code;

(B) such members, while engaged in the performance of their duties away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service; and

(C) such members—
(i) who are blind or deaf or who otherwise qualify as handicapped individuals (within the meaning of section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 794)), and
(ii) who do not otherwise qualify for assistance under section 3102 of title 5, United States Code, by reason of being an employee of an agency (within the meaning of section 3102(a)(1) of such title 5, may be provided services pursuant to section 3102 of such title 5 while in performance of their advisory committee duties.

(2) Nothing in this subsection shall prevent—

(A) an individual who (without regard to his service with an advisory committee) is a full-time employee of the United States, or

(B) an individual who immediately before his service with an advisory committee was such an employee, from receiving compensation at the rate at which he otherwise would be compensated (or was compensated) as a full-time employee of the United States.

(e) The Director [Administrator] shall include in budget recommendations a summary of the amounts be deems necessary for the expenses of advisory committees, including the expenses for publication of reports where appropriate.

Federal Advisory Committee Act provides for 3 separate sources of review to insure that network of federal advisory committees is operating as effectively and efficiently as possible; first source of review is Congress itself under FACA § 5(a), second source is Director of Office of Management and Budget under authority of § 7(b), and third is head of federal agency utilizing advisory committee who monitors performance of committee under authority of § 8. Metcalf v National Petroleum Council (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

Nonprofit public interest law center may not sue American Bar Association Standing Committee under § 8(b) of Federal Advisory Committee Act (5 USCS Appx I), where Committee might be advisory committee by reason of its assistance to President and Justice Department through review and rating of possible federal judgeship nominees, because Act authorizes private cause of action against government but not against private preexisting group advising government. Washington Legal Foundation v American Bar Asso. Standing Committee on Federal Judiciary (1986, DC Dist Col) 648 F Supp 1353.
§ 9. Establishment and purpose of advisory committees; publication in Federal Register; charter: filing, contents, copy

(a) No advisory committee shall be established unless such establishment is—
   (1) specifically authorized by statute or by the President; or
   (2) determined as a matter of formal record, by the head of the agency involved after consultation with the Director [Administrator], with timely notice published in the Federal Register, to be in the public interest in connection with the performance of duties imposed on that agency by law.

(b) Unless otherwise specifically provided by statute or Presidential directive, advisory committees shall be utilized solely for advisory functions. Determinations of action to be taken and policy to be expressed with respect to matters upon which an advisory committee reports or makes recommendations shall be made solely by the President or an officer of the Federal Government.

(c) No advisory committee shall meet or take any action until an advisory committee charter has been filed with (1) the Director [Administrator], in the case of Presidential advisory committees, or (2) with the head of the agency to whom any advisory committee reports and with the standing committees of the Senate and of the House of Representatives having legislative jurisdiction of such agency. Such charter shall contain the following information:
   (A) the committee's official designation;
   (B) the committee's objectives and the scope of its activity;
   (C) the period of time necessary for the committee to carry out its purposes;
   (D) the agency or official to whom the committee reports;
   (E) the agency responsible for providing the necessary support for the committee;
   (F) a description of the duties for which the committee is responsible, and, if such duties are not solely advisory, a specification of the authority for such functions;
   (G) the estimated annual operating costs in dollars and man-years for such committee;
   (H) the estimated number and frequency of committee meetings;
   (I) the committee's termination date, if less than two years from the date of the committee's establishment; and
   (J) the date the charter is filed.

A copy of any such charter shall also be furnished to the Library of Congress.

Law Review Articles:

Interpretive Notes and Decisions:

1. Generally

Before advisory committee can begin to function, it must be formally chartered in accordance with § 9(c) of Federal Advisory Committee Act and charter must contain, inter alia, information concerning committee's objectives and scope of its operations and duties; committees are chartered to one federal agency although such committee can serve as advisory committee to other federal agencies. Metcalf v National Petroleum Council (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

2. Function of committee

Presence of retired Supreme Court Justice and active circuit judge on advisory committee charged with investigating and submitting report on organized crime to President, did not prevent committee from performing its functions since inter alia, (1) judges' presence did not prevent committee from conducting hearings, preparing reports or making recommendations for legislation, (2) committee does not prosecute, indict, or legislate, and (3) while committee was empowered to issue subpoenas, enforcement of subpoenas was reserved to courts; that committee member is a judge does not inhibit use of powers imposed on members, or excuse duty to submit advisory report, ability to make findings and recommendations would be the same in absence of any judge's participation. In re President's Comm'n on Organized Crime etc. (1986, CA3 NJ) 783 F2d 370.

Advisory committee exists to advise and not to decide. Metcalf v National Petroleum Council (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

Under 5 USCS Appendix I § 9(b) advisory committee may be utilized solely for advisory functions but under 15 USCS § 776(a) Department of Energy may be able to use advisory committee to perform some operational tasks such as drafting of National Energy Policy Plan pursuant to 42 USCS § 7321. (1981) 60 Comp Gen 386.

3. Effect of failure to comply with formation requirements

When federal agency utilizes advisory committee for purpose of obtaining advice, agency must charter and establish committee in compliance with provisions of § 9 of Federal Advisory Committee Act; however, failure to comply with such requirements cannot be employed as subterfuge for avoiding public access requirements. Food Chemical News, Inc. v Davis (1974, DC Dist Col) 378 F Supp 1048.
4. Judicial review

---

§ 10. Advisory committee procedures; meetings; notice, publication in Federal Register; regulations; minutes; certification; annual report; Federal officer or employee, attendance

(a) (1) Each advisory committee meeting shall be open to the public.

(2) Except when the President determines otherwise for reasons of national security, timely notice of each such meeting shall be published in the Federal Register, and the Director [Administrator] shall prescribe regulations to provide for other types of public notice to insure that all interested persons are notified of such meeting prior thereto.

(3) Interested persons shall be permitted to attend, appear before, or file statements with any advisory committee, subject to such reasonable rules or regulations as the Director [Administrator] may prescribe.

(b) Subject to section 552 of title 5, United States Code, the records, reports, transcripts, minutes, appendixes, working papers, drafts, studies, agenda, or other documents which were made available to or prepared for or by each advisory committee shall be available for public inspection and copying at a single location in the offices of the advisory committee or the agency to which the advisory committee reports until the advisory committee ceases to exist.

(c) Detailed minutes of each meeting of each advisory committee shall be kept and shall contain a record of the persons present, a complete and accurate description of matters discussed and conclusions reached, and copies of all reports received, issued, or approved by the advisory committee. The accuracy of all minutes shall be certified to by the chairman of the advisory committee.

(d) Subsections (a)(1) and (a)(3) of this section shall not apply to any portion of an advisory committee meeting where the President, or the head of the agency to which the advisory committee reports, determines that such portion of such meeting may be closed to the public in accordance with subsection (c) of section 552b of title 5, United States Code. Any such determination shall be in writing and shall contain the reasons for such determination. If such a determination is made, the advisory committee shall issue a report at least annually setting forth a summary of its activities and such related
matters as would be informative to the public consistent with the policy of section 552(b) of title 5, United States Code.

(e) There shall be designated an officer or employee of the Federal Government to chair or attend each meeting of each advisory committee. The officer or employee so designated is authorized, whenever he determines it to be in the public interest, to adjourn any such meeting. No advisory committee shall conduct any meeting in the absence of that officer or employee.

(f) Advisory committees shall not hold any meetings except at the call of, or with the advance approval of, a designated officer or employee of the Federal Government, and in the case of advisory committees (other than Presidential advisory committee), with an agenda approved by such officer or employee.

HISTORY: ANCILLARY LAWS AND DIRECTIVES

Explanatory notes:
The bracketed word "Administrator" referring to the Administrator of General Services, is inserted in subsec. (a)(2) and (3) of this section on the authority of Reorg. Plan No. 1 of 1977, § 5F, 42 Fed. Reg. 56101, 91 Stat. 1634, which appears as 5 USCS § 903 note, which transferred all functions of the Office of Management and Budget and the Director thereof relating to the Committee Management Secretariat to the Administrator of General Services, effective Nov. 20, 1977, as provided by section 1 of Ex. Or. No. 12024 of Dec. 1, 1977, 42 Fed. Reg. 61445, which appears as a note to § 2 of this act.

Amendments:
1976. Act Sept. 13 (effective 180 days after enactment on 9/13/76, as provided by § 6 of such Act, which appears as 5 USCS § 552b note), 1976, in subsec. (d), substituted the first sentence for the one which read: "Subsections (a)(1) and (a)(3) of this section shall not apply to any advisory committee meeting which the President, or the head of the agency to which the advisory committee reports, determines is concerned with matters listed in section 552(b) of title 5, United States Code.".

Law Review Articles:

1. Generally

Under Federal Advisory Committee Act Congress has determined simply that when federal executive official utilizes advisory committee to assist him in discharging his responsibilities, in most instances he must do so openly and publicly; advisory committee has no First Amendment right to have administrator keep its communications secret. Center for Auto Safety v Cox (1978, App DC) 188 US App DC 426, 580 F2d 689.

Even if Federal Advisory Committee Act's requirements that agency representative approve agenda of advisory committee meeting as well as § 2's hortatory language that all matters under advisory committee's consideration should be determined by official, agency, or officer forbid advisory committee from taking any action not approved by agency representative and not included in committee's agenda, it does not mean that agency administrator or representative had duty to intervene to prevent committee from voting on resolution not on agenda. Claybrook v Slater (1997, App DC) 324 US App DC 145, 111 F3d 904 (criticized in Taylor v FDIC (1997, App DC) 328 US App DC 52, 132 F3d 753).

Two separate "informal" meetings with consumer and distilled spirits industry representatives relative to drafting proposed regulations of Bureau of Alcohol, Tobacco and Firearms of Treasury Department on ingredient labeling of distilled spirits were meetings of "advisory committees" used by director of bureau to obtain advice within the meaning of Federal Advisory Committee Act and therefore "open to the public". Food Chemical News, Inc. v Davis (1974, DC Dist Col) 378 F Supp 1048.

Court has no authority to order federal officials to convene Energy Conservation Advisory Committee and Solar Energy Advisory Committee specific number of times, or to direct committees themselves to issue reports to federal officials, addressing their recommendations to Solar Energy and Energy Conservation Bank, since Federal Advisory Committees, pursuant to § 10(f) may meet only at call of designated officer or employee of Federal Government, who is not required to call meetings if he does not wish to, and since there is no basis for court to direct meetings, there is also no basis to direct committees to report on their activities, since activities and reports thereof are for agency to request or not, as case may be. Dabney v Reagan (1982, SD NY) 559 F Supp 861.

Preliminary injunction is granted to prevent President's Task Force on National Health Care Reform from conducting meetings in violation of Federal Advisory Committee Act (FACA) (5 USCS Appx §§ 1 et seq.), but §§ 10(a)(1), 10(a)(3), and 10(c) are not applicable to meetings held for purpose of formulating advice and recommendations for President, because First Lady (chairperson of task force) is not federal officer or employee, making task force subject to FACA under § 3(2), but forced exposure of "recommendation" meetings under FACA provisions is unconstitutional as violation of separation of powers principles. Association of Am. Physicians & Surgeons v Clinton (1993, DC Dist Col) 813 F Supp 82, 21 Media L R 1225, revd, remanded (1993, App DC) 302 US App DC 208, 997 F2d 898, 21 Media L R 1705.

Nonprofit corporation is not entitled to records pertaining to costs of interdepartmental working group of health-care reform task force, where records were intended to help Congress in its oversight function, because such records are not within scope of § 10(b) of the Federal Advisory Committee Act and because nothing in statute or regulations creates right of public access to such records. Association of Am. Physicians & Surgeons v Clinton (1994, DC Dist Col) 879 F Supp 103, dismd (1994, DC Dist Col) 879 F Supp 106.

2. Closed meetings

Examination of legislative history of Federal Advisory Committee Act clearly indicates that although standard of openness and public inspection was to be applied liberally, it was intention of Congress to provide for closed deliberations under certain conditions, one of which is stated FACA § 10(d). Aviation Consumer Action Project v Washburn (1976, App DC) 175 US App DC 273, 535 F2d 101.

Broad application of FACA § 10(d) exemption to include all deliberative conversations to committee meetings is clearly contrary to Congressional intent and policy of Federal Advisory Committee Act. Nader v Dunlop (1973, DC Dist Col) 370 F Supp 177.

Agency's failure to charter and establish advisory committee in compliance with all terms of Federal Advisory Committee Act cannot be employed as subterfuge for avoiding public access requirements of FACA § 10. Food Chemical News, Inc. v Davis (1974, DC Dist Col) 378 F Supp 1048.
Plaintiff whose request for transcript of advisory committee meetings, which were not open to public as required by FACA § 10, was denied, has standing to sue for their production. *Center for Auto Safety v Tiemann* (1976, DC Dist Col) *414 F Supp 215*, remanded (1978, App DC) *188 US App DC 426, 580 F2d 689*.

Environmental group's challenge to EPA's refusal to open to public meetings of Governors' Forum on Environmental Management is denied, where forum made up of 9 state governors meets to help coordinate state and federal efforts to maintain clean and safe drinking water, because, even though forum was established to advise or assist EPA, it is not "advisory committee" subject to public meeting requirements of *5 USCS Appx §§ 9 and 10* since governors also act operationally as independent chief executives in partnership with federal agency. *Natural Resources Defense Council v EPA* (1992, DC Dist Col) *806 F Supp 275*.

3. Relationship with Freedom of Information Act

While extent to which exemption 5 of FOIA (5 USCS § 552(b)(5)) must be given effect in context of Federal Advisory Committee meetings is undecided, mere disclosure of intra-agency memorandum to advisory committee did not have effect of making such memorandum public information to which exemption 5 was inapplicable. *Aviation Consumer Action Project v Washburn* (1976, App DC) *175 US App DC 273, 535 F2d 101*.

Section renders disclosure provisions of FOIA applicable to advisory committees and designates each committee as appropriate repository for its own record; it does not impose upon President or office of administration special responsibility to guide document requests. *National Sec. Archive v Archivist of United States* (1990, App DC) *285 US App DC 302, 909 F2d 541; 17 Media L R 2265*.

Agency is generally obligated under § 10(b) of Federal Advisory Committee Act (FACA) to make available for public inspection and copying all materials that were made available to or prepared for or by an advisory committee, and, except for materials agency reasonably believes to be exempt from disclosure pursuant to FOIA, member of public need not request disclosure in order for FACA materials to be made available. *Food Chem. News v Department of Health & Human Servs.* (1992, App DC) *299 US App DC 25, 980 F2d 1468, 21 Media L R 1057*.

Member of advisory committee who had all necessary security clearances was entitled to information under FACA that was reviewed and relied upon by committee during its deliberations, even if that information might have been withheld from public pursuant to FOIA exemption. *Cummock v Gore* (1999, App DC) *336 US App DC 347, 180 F3d 282*.

While Federal Advisory Committee Act does not contain same express provision of Freedom of Information Act placing burden of proof on agency to sustain action under 5 USCS § 552(b), underlying policy considerations are identical and burden of proof is on advisory committee to support claimed exemption by substantial justification and explanation of basis of claim, not merely by conclusory assertions; Defense Advisory Committee on Women in the Services is not "agency" and matters before it are, therefore, not "inter-agency" within meaning of 5 USCS § 552(b) exception to openness of advisory committee meetings under FACA § 10(d). *Gates v Schlesinger* (1973, DC Dist Col) *366 F Supp 797*.

Newsletter reporter is not entitled to preliminary injunction preventing meetings of Advisory Committee on Food and Drug Administration until drafts, working papers, and other documents are publicly released under Federal Advisory Committee Act (5 USCS Appx §§ 1 et seq.), where Committee notified reporter to refer all document requests to HHS's Freedom of Information Office, because Committee properly interprets 5 USCS Appx § 10(b), which makes advisory committee documents "subject to" 5 USCS § 552 (FOIA), as incorporating FOIA procedures as well as FOIA exemptions. *Food Chemical News v Advisory Committee on Food & Drug Admin.* (1991, DC Dist Col) *760 F Supp 220, affd, clarified (1992, App DC) *299 US App DC 25, 980 F2d 1468, 21 Media L R 1057*. 

027552
§ 11. Availability of transcripts; "agency proceeding"

(a) Except where prohibited by contractual agreements entered into prior to the effective date of this Act, agencies and advisory committees shall make available to any person, at actual cost of duplication, copies of transcripts of agency proceedings or advisory committee meetings.

(b) As used in this section "agency proceeding" means any proceeding as defined in section 551(12) of title 5, United States Code.

§ 12. Fiscal and administrative provisions; recordkeeping; audit; agency support services

(a) Each agency shall keep records as will fully disclose the disposition of any funds which may be at the disposal of its advisory committees and the nature and extent of their activities. The General Services Administration, or such other agency as the President may designate, shall maintain financial records with respect to Presidential advisory committees. The Comptroller General of the United States, or any of his authorized representatives, shall have access, for the purpose of audit and examination, to any such records.

(b) Each agency shall be responsible for providing support services for each advisory committee established by or reporting to it unless the establishing authority provides otherwise. Where any such advisory committee reports to more than one agency, only one agency shall be responsible for support services at any one time. In the case of Presidential advisory committees, such services may be provided by the General Services Administration.

§ 13. Responsibilities of Library of Congress; reports and background papers; depository

Subject to section 552 of title 5, United States Code, the Director [Administrator] shall provide for the filing with the Library of Congress of at least eight copies of each report made by every advisory committee and, where appropriate, background papers prepared by consultants. The Librarian of Congress shall establish a depository for such reports and papers where they shall be available to public inspection and use.

§ 14. Termination of advisory committees; renewal; continuation

(a) (1) Each advisory committee which is in existence on the effective date of this Act shall terminate not later than the expiration of the two-year period following such effective date unless—
   (A) in the case of an advisory committee established by the President or an officer of the Federal Government, such advisory committee is renewed by the President or that officer by appropriate action prior to the expiration of such two-year period; or
   (B) in the case of an advisory committee established by an Act of Congress, its duration is otherwise provided for by law.

   (2) Each advisory committee established after such effective date shall terminate not later than the expiration of the two-year period beginning on the date of its establishment unless—
   (A) in the case of an advisory committee established by the President or an officer of the Federal Government such advisory committee is renewed by the President or such officer by appropriate action prior to the end of such period; or
   (B) in the case of an advisory committee established by an Act of Congress, its duration is otherwise provided for by law.

(b) (1) Upon the renewal of any advisory committee, such advisory committee shall file a charter in accordance with section 9(c).

   (2) Any advisory committee established by an Act of Congress shall file a charter in accordance with such section upon the expiration of each successive two-year period following the date of enactment of the Act establishing such advisory committee.

   (3) No advisory committee required under this subsection to file a charter shall take any action (other than preparation and filing of such charter) prior to the date on which such charter is filed.

(c) Any advisory committee which is renewed by the President or any officer of the Federal Government may be continued only for successive two-year periods by appropriate action taken by the President or such officer prior to the date on which such advisory committee would otherwise terminate.

"The effective date of this Act", referred to in this section, is 90 days following the enactment of Act Oct. 6, 1972, P.L. 92-463, as provided by § 15 of such Act.
Other provisions:

**Termination of certain Presidential advisory committees.** Ex. Or. No. 12007 of Aug. 22, 1977, 42 Fed. Reg. 42839 provided:

"By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in order to terminate certain advisory committees in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), it is hereby ordered as follows:

"Section 1. (a) The Citizens' Advisory Council on the Status of Women is terminated.

"(b) Executive Order No. 11126 of November 1, 1963, as amended by Executive Order No. 11221 of May 6, 1965 [42 USCS § 2000e note], is further amended as follows:

"(1) Subsection (5) of Section 102 is revoked.

"(2) Section 103, in order to delete a reference to the Council, is amended to read as follows:

'Annually the Committee shall transmit a report to the President concerning the status of women.'

"(3) Part II is revoked.

"(4) The second sentence of Section 301, in order to delete references to the Council, is amended to read as follows:

'To the extent practical and to the extent permitted by law (1) all Executive agencies shall cooperate with the Committee and furnish it such information and assistance as may be necessary for the performance of its functions, and (2) the Secretary of Labor shall furnish staff, office space, office facilities and supplies, and other necessary assistance, facilities, and services for the Committee.'

"Sec. 2. (a) The Citizens' Advisory Committee on Environmental Quality is terminated.

"(b) Part II of Executive Order No. 11472 of May 29, 1969, as amended by paragraphs (7) and (8) of Section 4 of Executive Order No. 11514 of March 5, 1970 [42 USCS § 4321 note], is revoked.

"Sec. 3. (a) The Advisory Council for Minority Enterprise is terminated.

"(b) Section 2 of Executive Order No. 11625 of October 13, 1971 [15 USCS § 631 note], is revoked.

"Sec. 4. (a) The Consumer Advisory Council is terminated.

"(b) Executive Order No. 11583 of February 24, 1971 [20 USCS § 887d note] is amended as follows:

"(1) The second sentence of subsection (b)(1) of Section 2 is amended by deleting 'including the Consumer Advisory Council established in section 5 of this order'.

"(2) Section 5 is revoked.

"Sec. 5. (a) The President's Advisory Board on International Investment is terminated.

"(b) Executive Order No. 11962 of January 19, 1977 [22 USCS § 3107 note] is revoked.

"Sec. 6. Subsections (a), (g), (i), and (j) of Section 1 of Executive Order No. 11948 of December 20, 1976 [formerly set out as a note to this section], which extended the above advisory committees until December 31, 1978, is superseded.".

**Quetico-Superior Committee terminated.** Ex. Or. No. 12029 of Dec. 14, 1977, 42 Fed. Reg. 63631 provided:

"By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in order to terminate an advisory committee in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), it is hereby ordered as follows:

"Section 1. (a) The Quetico-Superior Committee is terminated.

"(b) Executive Order No. 11342, as amended, is revoked.

"Sec. 2. Subsection (e) of Section 1 of Executive Order No. 11948 of December 20, 1976 [formerly set out as a note under this section], which extended the above advisory committee until December 31, 1978, is superseded.".

set out as an Other provisions note to 42 USCS § 2021, provided that the State Planning Council on Radioactive Waste Management "shall terminate thirty days after it transmits its final report to the President, but in no event shall it terminate later than eighteen months after the effective date of this Order."

"By the authority vested in me as President by the Constitution of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended [5 U.S.C. App.], the following Executive Orders, establishing advisory committees, are hereby revoked and the committees terminated:

(a) Executive Order No. 12059 of May 11, 1978, as amended, establishing the United States Circuit Judge Nominating Commission [former 28 USCS § 44 note];
(b) Executive Order No. 11992 of May 24, 1977, establishing the Committee on Selection of Federal Judicial Officers [former 28 USCS prec. § 1 note];
(c) Executive Order No. 12084 of September 27, 1978, as amended by Executive Order 12097 of November 8, 1978, establishing the Judicial Nominating Commission for the District of Puerto Rico [former 28 USCS § 133 note]; and
(d) Executive Order No. 12064 of June 5, 1978, establishing the United States Tax Court Nominating Commission [former 26 USCS § 7443 note].

Subsections (g), (i), (j) and (k) of Section 1-101 of Executive Order No. 12258 [former note to this section], extending these committees, are also revoked."

"By the authority vested in me as President by the Constitution and statutes of the United States of America, and to terminate the establishing authorities for committees, that are inactive or no longer necessary, it is hereby ordered as follows:

Section 1. Executive Order No. 12071, as amended [29 USCS § 1001 note], establishing the President's Commission on Pension Policy, is revoked.

Sec. 2. Executive Order No. 12042 [unclassified], creating a Board of Inquiry to Report on Labor Disputes Affecting the Bituminous Coal Industry in the United States, is revoked.

Sec. 3. Executive Order No. 12085 [unclassified], creating an Emergency Board to Investigate a Dispute Between the Norfolk and Western Railway Company and Certain of Its Employees, is revoked.

Sec. 4. Executive Order No. 12132 [unclassified], creating an Emergency Board to Investigate a Dispute Between the National Railway Labor Conference and Certain of Its Employees, is revoked.

Sec. 5. Executive Order No. 12095 [unclassified], creating an Emergency Board to Investigate a Dispute Between Wien Air Alaska, Inc., and Certain Individuals, is revoked.

Sec. 6. Executive Order No. 12159 [unclassified], creating an Emergency Board to Investigate Disputes Between the Chicago, Rock Island, Pacific Railroad and Peoria Terminal Company and Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees; and the United Transportation Union, is revoked.

Sec. 7. Executive Order No. 12182 [unclassified], creating an Emergency Board to Investigate a Dispute Between the Long Island Rail Road and Certain of Its Employees, is revoked.

Sec. 8. Executive Order No. 12207 [unclassified], creating an Emergency Board to Investigate a Dispute Between the Port Authority Trans-Hudson Corporation and Certain of Its Employees, is revoked.

Sec. 9. Executive Order No. 12262 [29 USCS § 1001 note], establishing an Interagency Employee Benefit Council, is revoked.

Sec. 10. Executive Order No. 12275 [20 USCS § 951 note], establishing the Design Liaison Council, is revoked.

Sec. 11. Executive Order No. 11829, as amended [25 USCS § 640d note], establishing the Hopi–Navajo Land Settlement Interagency Committee, is revoked.

Sec. 12. Executive Order No. 11022, as amended [42 USCS § 3001 note], establishing the President's Council on Aging, is revoked.

Sec. 13. Executive Order No. 12192 [42 USCS § 2021 note], establishing the State Planning Council on Radioactive Waste Management, is revoked.
"Sec. 14. Executive Order No. 12075 [42 USCS § 1450 note], as amended, establishing the Interagency Coordinating Council, is revoked.

"Sec. 15. Executive Order No. 11782 [12 USCS § 2281 note], establishing the Federal Financing Bank Advisory Council, is revoked.

"Sec. 16. Executive Order No. 12089, as amended [15 USCS § 2401 note], establishing the National Productivity Council, is revoked.

"Sec. 17. Executive Order No. 11330, as amended [42 USCS prec § 2711 note], establishing the President's Council on Youth Opportunity, is revoked.

"Sec. 18. Executive Order No. 11256 [unclassified], establishing the President's Committee on Food and Fiber and establishing the National Advisory Commission on Food and Fiber, is revoked.

"Sec. 19. Executive Order No. 11654 [15 USCS § 278f note], continuing the Federal Fire Council, is revoked.

"Sec. 20. Executive Order No. 12083, as amended [42 USCS § 7101 note], establishing the Energy Coordinating Council, is revoked.

"Sec. 21. Executive Order No. 12285, as amended and ratified [50 USCS § 1701 note], establishing the President's Commission on Hostage Compensation, is revoked.

"Sec. 22. Executive Order No. 12202, as amended [42 USCS § 5848 note], establishing the Nuclear Safety Oversight Committee, is revoked.

"Sec. 23. Executive Order No. 12194 [42 USCS § 4321 note], establishing the Radiation Policy Council, is revoked.

"Sec. 24. The Veterans' Federal Coordinating Committee (Weekly Compilation of Presidential Documents, volume 14, number 41, page 1743) [unclassified] is terminated.

"Sec. 25. The President's Council on Energy Efficiency (Weekly Compilation of Presidential Documents, volume 16, numbers 18 and 30, pages 790 and 1404) [unclassified] is terminated.

"By the authority vested in me as President by the Constitution and the laws of the United States of America, including the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Section 1. Each executive department and agency shall terminate not less than one-third of the advisory committees subject to FACA (and not required by statute) that are sponsored by the department or agency by no later than the end of fiscal year 1993.

"Sec. 2. Within 90 days, the head of each executive department and agency shall submit to the Director of the Office of Management and Budget, for each advisory committee subject to FACA sponsored by that department or agency: (a) a detailed justification for the continued existence, or a brief description in support of the termination, of any advisory committee not required by statute; and (b) a detailed recommendation for submission to the Congress to continue or to terminate any advisory committee required by statute. The Administrator of General Services shall prepare such justifications and recommendations for each advisory committee subject to FACA and not sponsored by a department or agency.
"Sec. 3. Effective immediately, executive departments and agencies shall not create or sponsor a new advisory committee subject to FACA unless the committee is required by statute or the agency head (a) finds that compelling considerations necessitate creation of such a committee, and (b) receives the approval of the Director of the Office of Management and Budget. Such approval shall be granted only sparingly and only if compelled by considerations of national security, health or safety, or similar national interests. These requirements shall apply in addition to the notice and other approval requirements of FACA.

"Sec. 4. The Director of the Office of Management and Budget shall issue detailed instructions regarding the implementation of this order, including exemptions necessary for the delivery of essential services and compliance with applicable law.

"Sec. 5. All independent regulatory commissions and agencies are requested to comply with the provisions of this order.

Ex. Or. No. 12974 (revoked). Ex. Or. No. 12974, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 13062 of Sept. 29, 1997, 62 Fed. Reg. 51755. It provided for continuance of certain Federal advisory committees.

"By the authority vested in me as President by the Constitution and the laws of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Sections 1-4. [Superseded—These sections provided for continuance of certain advisory committees; performance of functions of the President; revocation of certain Executive Orders which established committees that have terminated and whose work is completed; and supersession of Ex. Or. No. 12974.]

"Sec. 5. In Executive Order 13038 [47 USCS § 336 note], the second sentence of section 1 is amended by deleting '15' and inserting '22' in lieu thereof.

"Sec. 6. Executive Order 13054 [22 USCS § 3310 note] is amended by revising section 1 to read as follows: 'A United States citizen who is a family member of a Federal civilian employee who has separated from Federal service to accept employment with the American Institute in Taiwan pursuant to section 11 of Public Law 96-8 (22 U.S.C. 3310(a)) may be appointed noncompetitively in a manner similar to noncompetitive appointments under Executive Order 12721 [5 USCS § 3301 note] and implementing regulations of the Office of Personnel Management to a competitive service position in the executive branch, provided such family member meets the qualifications and other requirements established by the Director of the Office of Personnel Management, including an appropriate period of satisfactory overseas employment with the American Institute in Taiwan.'

"Sec. 7. This order shall be effective September 30, 1997."

"By the authority vested in me as President by the Constitution and the laws of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Sections 1-4. [Superseded—These sections provided for continuance of certain advisory committees; performance of functions of the President; revocation of certain Executive Orders which established committees that have terminated and whose work is completed; and supersession of Ex. Or. No. 13062.]

"Sec. 5. Executive Order 12131 [50 USCS Appx § 2401 note], as amended, is further amended by adding in section 1-102(a) a new paragraph as follows: '(9) Department of Energy.'

"Sec. 6. Executive Order 13115 [unclassified] is amended by adding the Department of the Treasury and the Office of National Drug Control Policy to the Interagency Task Force on the Roles and Mission of the United States Coast Guard, so that the list in section 1(b) of that order shall read as follows:

'(1) Department of State;
(2) Department of the Treasury;
(3) Department of Defense;
(4) Department of Justice;
(5) Department of Commerce;
(6) Department of Labor;
(7) Department of Transportation;
(8) Environmental Protection Agency;
(9) Office of Management and Budget;
(10) National Security Council;
(11) Office of National Drug Control Policy;
(12) Council on Environmental Quality;
(13) Office of Cabinet Affairs;
(14) National Economic Council;
(15) Domestic Policy Council; and
(16) United States Coast Guard.

"Sec. 7. Executive Order 12367 [unclassified], as amended, is further amended as follows:

(a) in section 1, the text 'the director of the International Communication Agency,' is deleted;
(b) in section 2, delete the first sentence and insert in lieu thereof 'The Committee shall advise, provide recommendations to, and assist the President, the National Endowment of the Arts, the National Endowment for the Humanities, and the Institute of Museum and Library Services on matters relating to the arts and the humanities. The Committee shall initiate and assist in the development of (i) ways to promote public understanding and appreciation of the arts and the humanities; (ii) ways to promote private sector support for the arts and humanities; (iii) ways to evaluate the effectiveness of Federal support for the arts and humanities and their relationship with the private sector; (iv) the planning and coordination of appropriate participation (including productions and projects) in major national cultural events, including the Millennium; (v) activities that incorporate the arts and the humanities in government objectives; and (vi) ways to promote the recognition of excellence in the fields of the arts and the humanities;'; and
(c) in section 3(b), add the following sentence after the first sentence: 'Private funds accepted under the National Endowment for the Arts or the National Endowment for the Humanities' gift authority may also be used to pay expenses of the Committee.'

"Sec. 8. Executive Order 12345 [42 USCS § 300u-5 note], as amended, is further amended by deleting the first sentence of section 2(b) and inserting in lieu thereof the following three sentences. "The council shall be composed of twenty members appointed by the President. Each member shall serve a term of 2 years and may continue to serve after the expiration of their term until a successor is appointed. A member appointed to fill an unexpired term will be appointed for the remainder of such term.'

"Sec. 9. This order shall be effective September 30, 1999."

"By the authority vested in me as President by the Constitution and the laws of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Sections 1, 2. [Superseded—These sections provided for continuance of certain advisory committees and performance of functions of the President.]

"Sec. 3. The following Executive Orders, or sections thereof, which established committees that have terminated or whose work is completed, are revoked:

"(a) Sections 5 through 7 of Executive Order 13111 [5 USCS § 4103], as amended by Executive Order 13188 and Section 3(a) of Executive Order 13218, pertaining to the establishment of the Advisory Committee on Expanding Training Opportunities;
(b) Executive Order 12975 [42 USCS § 6601 note], as amended by Executive Orders 13018, 13046, and 13137, establishing the National Bioethics Advisory Commission;
(c) Executive Order 13227 [unclassified], as amended by Executive Order 13255, establishing the President's Commission on Excellence in Special Education;
(d) Executive Order 13278 [unclassified], establishing the President's Commission on the United States Postal Service;
(e) Executive Order 13210 [unclassified], establishing the President's Commission to Strengthen Social Security;
(f) Sections 5 through 8 of Executive Order 13177 [50 USCS Appx § 2099 note], pertaining to the establishment of the President's Council on the Use of Offsets in Commercial Trade;"
"(g) Executive Order 13263 [42 USCS § 290bb-3 note], establishing the President's New Freedom Commission on Mental Health;  

"(h) Executive Order 13214 [38 USCS § 8111 note], establishing the President's Task Force to Improve Health Care Delivery for Our Nation's Veterans; and  

"(i) Executive Order 13147 [42 USCS § 287c-21 note], as amended by Executive Order 13167, establishing the White House Commission on Complementary and Alternative Medicine Policy.  

"Sec. 4. Executive Order 13225 is superseded [note to this section].  

"Sec. 5. [Omitted—This section amended Ex. Orr 12131 (50 USCS Appx § 2401 note).]  

"Sec. 6. This order shall be effective September 30, 2003.".

Continuance of certain Federal advisory committees and amendments to and revocation of other executive orders. Ex. Or. No. 13385 of Sept. 29, 2005, 70 Fed. Reg. 57989, provides:  

"By the authority vested in me as President by the Constitution and the laws of the United States of America, and consistent with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:  

"Section 1. Each advisory committee listed below is continued until September 30, 2007.  

"(a) Committee for the Preservation of the White House; Executive Order 11145 [3 USCS § 110 note], as amended (Department of the Interior).  

"(b) National Infrastructure Advisory Council; section 3 of Executive Order 13231 [6 USCS § 121 note], as amended (Department of Homeland Security).  

"(c) Federal Advisory Council on Occupational Safety and Health; Executive Order 12196 [5 USCS § 7902 note], as amended (Department of Labor).  

"(d) President's Board of Advisors on Historically Black Colleges and Universities; Executive Order 13256 [20 USCS § 1060 note] (Department of Education).  

"(e) President's Board of Advisors on Tribal Colleges and Universities; Executive Order 13270 [25 USCS § 1801 note] (Department of Education).  

"(f) President's Commission on White House Fellowships; Executive Order 11183 [unclassified], as amended (Office of Personnel Management).  

"(g) President's Committee for People with Intellectual Disabilities; Executive Order 12994 [42 USCS § 1501 note], as amended (Department of Health and Human Services).  

"(h) President's Committee on the Arts and the Humanities; Executive Order 12367 [unclassified], as amended (National Endowment for the Arts).  

"(i) President's Committee on the International Labor Organization; Executive Order 12216 [22 USCS § 271 note], as amended (Department of Labor).  

"(j) President's Committee on the National Medal of Science; Executive Order 11287 [42 USCS § 1881 note], as amended (National Science Foundation).  

"(k) President's Council of Advisors on Science and Technology; Executive Order 13226 [42 USCS § 6601 note], as amended (Office of Science and Technology Policy).  

"(l) President's Council on Bioethics; Executive Order 13237 [42 USCS § 6601 note] (Department of Health and Human Services).  

"(m) President's Council on Physical Fitness and Sports; Executive Order 13265 [42 USCS § 300u note] (Department of Health and Human Services).  

"(n) President's Export Council; Executive Order 12131 [50 USCS Appx § 2401 note], as amended (Department of Commerce).  

"(o) President's National Security Telecommunications Advisory Committee; Executive Order 12382 [unclassified], as amended (Department of Homeland Security).  

"(p) Trade and Environment Policy Advisory Committee; Executive Order 12905 [19 USCS § 2155 note] (Office of the United States Trade Representative).  

"Sec. 2. Notwithstanding the provisions of any other Executive Order, the functions of the President under the Federal Advisory Committee Act [5 USCS Appx] that are applicable to the committees listed in section 1 of this order shall be performed by the head of the department or agency designated after each committee, in accordance with the guidelines and procedures established by the Administrator of General Services.  

"Sec. 3. The following Executive Orders that established committees that have terminated or whose work is completed are revoked:  

"(a) Executive Order 13328 [50 USCS § 2301 note], establishing the Commission on the Intelligence Capabilities of the
United States Regarding Weapons of Mass Destruction; and

"(b) Executive Order 13326 [unclassified], establishing the President's Commission on Implementation of United States Space Exploration Policy.

"Sec. 4. Sections 1 and 2 of Executive Order 13316 [note to this section] are superseded by sections 1 and 2 of this order.

"Sec. 5. [Omitted—This section amended Ex. Or.: 13231 (6 USCS § 121 note).]

"Sec. 6. [Omitted—This section amended Ex. Or.: 12367 (unclassified).]

"Sec. 7. [Omitted—This section amended Ex. Or.: 12216 (22 USCS § 271 note).]

"Sec. 8. [Omitted—This section amended Ex. Or.: 13226 (42 USCS § 6601 note).]

"Sec. 9. Executive Order 13283 [3 USCS prec § 101 note] is revoked.

"Sec. 10. This order shall be effective September 30, 2005.

Construction and application of Taylor Grazing Act (43 USCS §§ 315 et seq.). 42 ALR Fed 353.

Law Review Articles:

Interpretive Notes and Decisions:
1. Generally. 2. Purpose. 3. Termination of particular committees

1. Generally

Federal Advisory Committee Act was intended to have both immediate effect, through FACA § 14, and prospective effect, through §§ 5, 6 and 7, in providing means by which advisory committees could be reviewed so that those no longer furthering purpose for which they were established could be terminated. Carpenter v Morton (1976, DC Nev) 424 F Supp 603.

Decision of whether advisory committee, terminated by FACA § 14, should be re-established is discretionary with particular administrative agency and cannot be reviewed by district court. Hiatt Grain & Feed, Inc. v Bergland (1978, DC Kan) 446 F Supp 457, 11 Envt Rep Cas 1961, affd (1979, CA10 Kan) 602 F2d 929, cert den (1980) 444 US 1073, 100 S Ct 1019.

2. Purpose

It is clear that when Congress enacted Federal Advisory Committee Act, it was concerned about proliferation of advisory committees which had outlived their usefulness; to remedy situation, Congress in FACA § 14 chose to terminate
all advisory committees and in doing so contemplated that Act would affect existing substantive law and that if it later decided advisory committees were necessary; Congress would enact legislation to recharter them. Carpenter v. Morton (1976, DC Nev) 424 F Supp 603.

3. Termination of particular committees

FACA § 14 terminated all Boards of Grazing District Advisers which were established under authority of 43 USCS §§ 315 et seq. Carpenter v. Morton (1976, DC Nev) 424 F Supp 603.

§ 15. Requirements relating to the National Academy of Sciences and the National Academy of Public Administration

(a) In general. An agency may not use any advice or recommendation provided by the National Academy of Sciences or National Academy of Public Administration that was developed by use of a committee created by that academy under an agreement with an agency, unless—

(1) the committee was not subject to any actual management or control by an agency or an officer of the Federal Government;

(2) in the case of a committee created after the date of the enactment of the Federal Advisory Committee Act Amendments of 1997 [enacted Dec. 17, 1997], the membership of the committee was appointed in accordance with the requirements described in subsection (b)(1); and

(3) in developing the advice or recommendation, the academy complied with—

(A) subsection (b)(2) through (6), in the case of any advice or recommendation provided by the National Academy of Sciences; or

(B) subsection (b)(2) and (5), in the case of any advice or recommendation provided by the National Academy of Public Administration.

(b) Requirements. The requirements referred to in subsection (a) are as follows:

(1) The Academy shall determine and provide public notice of the names and brief biographies of individuals that the Academy appoints or intends to appoint to serve on the committee. The Academy shall determine and provide a reasonable opportunity for the public to comment on such appointments before they are made or, if the Academy determines such prior comment is not practicable, in the period immediately following the appointments. The Academy shall make its best efforts to ensure that (A) no individual appointed to serve on the committee has a conflict of interest that is relevant to the functions to be performed, unless such conflict is promptly and publicly disclosed and the Academy determines that the conflict is unavoidable, (B) the committee membership is fairly balanced as determined by the Academy to be appropriate...
for the functions to be performed, and (C) the final report of the Academy will be the result of the Academy’s independent judgment. The Academy shall require that individuals that the Academy appoints or intends to appoint to serve on the committee inform the Academy of the individual’s conflicts of interest that are relevant to the functions to be performed.

(2) The Academy shall determine and provide public notice of committee meetings that will be open to the public.

(3) The Academy shall ensure that meetings of the committee to gather data from individuals who are not officials, agents, or employees of the Academy are open to the public, unless the Academy determines that a meeting would disclose matters described in section 552(b) of title 5, United States Code. The Academy shall make available to the public, at reasonable charge if appropriate, written materials presented to the committee by individuals who are not officials, agents, or employees of the Academy, unless the Academy determines that making material available would disclose matters described in that section.

(4) The Academy shall make available to the public as soon as practicable, at reasonable charge if appropriate, a brief summary of any committee meeting that is not a data gathering meeting, unless the Academy determines that the summary would disclose matters described in section 552(b) of title 5, United States Code. The summary shall identify the committee members present, the topics discussed, materials made available to the committee, and such other matters that the Academy determines should be included.

(5) The Academy shall make available to the public its final report, at reasonable charge if appropriate, unless the Academy determines that the report would disclose matters described in section 552(b) of title 5, United States Code. If the Academy determines that the report would disclose matters described in that section, the Academy shall make public an abbreviated version of the report that does not disclose those matters.

(6) After publication of the final report, the Academy shall make publicly available the names of the principal reviewers who reviewed the report in draft form and who are not officials, agents, or employees of the Academy.

(c) Regulations. The Administrator of General Services may issue regulations implementing this section.

§ 16. Effective date

Except as provided in section 7(b), this Act shall become effective upon the expiration of ninety days following the date of enactment [enacted Oct. 6, 1972].

HISTORY:

HISTORY; ANCILLARY LAWS AND DIRECTIVES

Redesignation:
The purpose of the LBL Advisory Board (Board) is to provide advice to the Secretary of Agriculture (Secretary) on the following:

- Means of promoting public participation for the land and resource management plan for LBL
- Environmental education.

A. The Secretary, in accordance with Section 522 of the LBL Protection Act, established the LBL Advisory Board. The Board is subject to the Federal Advisory Committee Act (FACA), as outlined in the amended LBL Protection Act and the current Advisory Board Charter, as filed with Congress.

B. For the purposes of National Forest System Land and Resource Management Planning under the provisions of CFR 219.19(a), November 9, 2000, this Board may be utilized as the committee that the Responsible Official (Regional Forester or Area Supervisor) may use for access to knowledge of local conditions and issues in the Forest Service planning process.

Members of the Board are appointed by the Secretary and seven state and local public officials from Kentucky and Tennessee as described in the Charter. Each member shall serve without compensation and shall not be considered an employee of the United States Department of Agriculture. Appointments will be for five years.

When vacancies occur in a primary membership, the applicable appointing official will be asked to appoint a new primary member to the Board. The designated alternate will fill in as the official representative of their appointing agency until a new primary member is appointed. If an alternate is no longer able to serve, or is appointed to the primary membership, the applicable appointing official will be asked to designate a new alternate.

Appointments are final when notification of the appointment is received by the DFO from the appointing agency. Primary members will officially begin their five-year term at the fall meeting in the year of their appointment. Alternates who move up to a primary membership will officially begin their five-year term as a primary member at
the fall meeting in the year of their appointment.

Members may not succeed themselves as primary members on the Board; however, they may be appointed to additional terms so long as no individual serves more than five consecutive years as a member of the Board. Alternates do not have a term, so there is no limit to the amount of time they may serve in that capacity. They do, however, serve at the pleasure of their appointing agency.

Membership includes the responsibility to personally attend Board meetings, and members will be expected to show commitment to the board by their attendance. If a Board member misses three consecutive meetings, the Chair may recommend their termination as a Board member to the appointing official.

Members will notify the DFO at least 2 weeks in advance if they are unable to attend a meeting so that the alternate member may be contacted. Approved alternates will have full voting rights in the absence of primary members.

SECTION IV: MEETING PROCEDURES

The Board will meet at least twice each year; however, additional meetings may be held as needed. Meetings will be called by the Board Chairperson (Chairperson) with the concurrence of the Designated Federal Official (DFO), in accordance with the following considerations:

A. Quorum and Voting

The Charter requires that nine voting members constitute a quorum for the conduct of business. Any Board recommendation to the Secretary requires an affirmative vote of at least a majority of the total Board membership on that date. Consensus on decisions and recommendations is desirable.

B. Agenda

The DFO will initiate and approve the agenda for all meetings in consultation with the Chairperson. Any member of the Board may submit items for the agenda to the DFO and/or Chairperson. Also, items may be suggested by members of the public to the Board for consideration as agenda items at future meetings. All proposed agenda items must directly relate to the purpose of the Board as described in Section I. Copies of the agenda will be distributed to the members prior to each meeting, and an outline of the agenda will be published with the notice of the meeting in the Federal Register. Meeting agendas will also be available at the LBL Administrative Office and on the LBL web page.

C. Minutes and Records

The DFO will prepare minutes of each meeting, submit them to the Chairperson for certification, and distribute copies to each Board member within 30 working days of the meeting date. Minutes will also be available for review at the LBL Administrative Office and will be accessible on the LBL web page. The minutes will include a record of the members and Forest Service staff present and the names of members of the public requested to make an oral presentation, if applicable; a complete and accurate description of the matters discussed and conclusions reached; and copies of all reports received, issued, or approved by the Board. Additionally, a cumulative listing of Board recommendations will be maintained by the DFO. The listing of Board recommendations and the meeting minutes will be available to the public upon request.

All documents, reports, or other materials prepared by, or for, the Board constitute official government records and will be maintained according to USDA and FACA policies and procedures.
D. Meeting Access

Meeting Access All meetings of the Board will be open to the public for the duration of the meeting. All materials brought before or presented to the Board during the conduct of an open meeting, including minutes of the proceedings, will be available to the public for review, subsequent to the meeting, at the LBL Administrative Office.

Written statements from the public may be submitted to the Board at any time through the DFO; however, written statements received less than 1 week prior to the meeting will not be available to the members until after the meeting.

Time will be reserved on the agenda at each meeting for Board members to discuss comments received prior to that meeting from members of the public. If the individual submitting the comment is present at the meeting, the Board may ask questions for clarification while the comment is being reviewed. This will be an informal question/answer session and time allotted will be limited. Responses will be included in the meeting notes. If a comment received falls within the two purposes of the Board, and if the Board determines that more detailed clarification is required, a time will be scheduled on the agenda at an upcoming Advisory Board meeting for the individual to provide more detailed oral clarification, pertaining to the original comment received by the Board. The individual will be required to provide a written copy of the presentation, and any handouts they will use, to the DFO two (2) weeks prior to the meeting date so copies can be sent to Board Members for their review before the meeting. Time allotted for the detailed oral clarification will be limited. All oral comments from the public, during initial clarification or further detailed clarification if requested by the Board, will be considered as information for the Board. The Chairperson will determine the extent to which the Board will respond to the statements during the meeting, and also the time allotted for clarification.

The meeting announcement published in the Federal Register and made available to public media will note if an oral clarification from a member of the public is scheduled during the meeting.

SECTION V: ROLE OF BOARD OFFICIALS

Chairperson:
The Regional Forester of the Southern Region, USDA Forest Service, serves as the Chairperson. The Deputy Regional Forester serves as the alternate Chairperson. The Chairperson is a non-voting member who works with the DFO to establish priorities, identify issues that must be addressed, and determine the level and types of staff and financial support required. The Chairperson calls meetings with the concurrence of the DFO, conducts meetings, certifies the accuracy of meeting minutes, and is responsible for notifying the public before a meeting occurs. A notice of the upcoming meeting will be placed in the Federal Register 15 calendar days prior to the meeting date and notices will also be distributed through local media 2 weeks prior to the meeting. A meeting facilitator may be employed to assist the Chairperson in conducting meetings. The Chairperson may adjourn meetings with approval of the majority of members present. The alternate Chairperson will accomplish all duties of the Chairperson in his/her absence.

Designated Federal Officer:
The LBL Area Supervisor serves as the Designated Federal Officer (DFO). The Acting Area Supervisor serves as the alternate DFO. The DFO, or the alternate DFO, serves as the government's agent for all matters related to the Board's activities. By law, the DFO must: (1) approve or call meetings of the Board; (2) approve agendas; and (3) attend all meetings. The DFO shall adjourn meetings when such adjournment is in the public interest. The alternate DFO will accomplish all duties of the Designated Federal Officer in his/her absence.

The DFO is responsible for providing adequate staff support to the Board, including: (1) notifying members of the time and place of each meeting; (2) maintaining records of all meetings, including subgroup or working group activities, as required by law; (3) maintaining the roll; (4) preparing the minutes of all meetings of the Board's
deliberations, including subgroup and working group activities; (5) attending to official correspondence; (6) maintaining official Board records and filing all papers and submissions prepared for or by the Board, including items generated by subgroups and working groups; (7) acting as the Board’s agent to collect, validate, and pay all vouchers for pre-approved expenditures; and (8) preparing and handling all reports, including the annual report as required by FACA.

SECTION VI: EXPENSES AND REIMBURSEMENT

Expenses related to the operation of the Board will be borne by USDA. Expenditures of any kind must be approved in advance by the DFO.

USDA will pay travel and per diem for Board members at a rate equivalent to that allowable for USDA employees. Members will be required to submit a travel voucher to the DFO with required receipts for out-of-pocket travel and per diem expenses attached. Alternate members will be reimbursed for travel expenses only when they attend an Advisory Board meeting as the official representative of their appointing agency in the absence of the primary member. Completed and signed travel vouchers for expenses should be submitted to the DFO within 30 days after each meeting.
(7) disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;

MEMORANDUM ORDER

AMBROSE, Chief District J.

*1 The above captioned complaint was received by
the Clerk of Court on September 16, 2005, and was
referred to United States Magistrate Judge Lisa Pupo
Lenihan for pretrial proceedings in accordance with
the Magistrates Act, 28 U.S.C. § 636(b)(1), and Rules
72.1.3 and 72.1.4 of the Local Rules for Magistrates.

The Magistrate Judge's Report and Recommendation
(Doc. No. 22), filed on November 22, 2006, recom-
manded that Defendants' Motion for Summary Judg-
ment (Doc. No. 8) be granted with regard to the issue
of the adequacy of the FOIA search, but denied
without prejudice in all other respects. The Report
and Recommendation further recommended that
Plaintiff's Rule 56(f) Motion (Doc. No. 13) be denied
without prejudice on the issue of the adequacy of the
FOIA search, but granted on the remaining issues.
Service was made on all counsel of record. Plaintiff
filed timely Objections to the Report and Recommenda-
tion (Doc. No. 23) on December 1, 2006, to
which Defendants filed a timely response on December
12, 2006 (Doc. No. 26). Defendants filed timely
Objections to the Report and Recommendation on
December 6, 2006 (Doc. No. 24), to which Plaintiff
filed a timely response on December 18, 2006 (Doc.
No. 28). After review of the pleadings and documents
in the case, together with the Report and Recommenda-
tion and the objections thereto, the following order is entered:

AND NOW, this 21st day of December, 2006,

IT IS HEREBY ORDERED that Defendants' Motion
for Summary Judgment (Doc. No. 8) is GRANTED
IN PART AND DENIED IN PART. Defendants' Motion
for Summary Judgment is GRANTED WITH
PREJUDICE as to the adequacy of the FOIA search,
and DENIED WITHOUT PREJUDICE in all other
respects.

IT IS FURTHER ORDERED that Plaintiff's Rule
56(f) Motion (Doc. No. 13) is GRANTED IN PART
AND DENIED IN PART. Plaintiff's Rule 56(f) Motion
is DENIED WITH PREJUDICE on the issue of
the adequacy of the FOIA search, and GRANTED
on the remaining issues. Plaintiff is entitled to limited
discovery on the remaining issues, the parameters of
which shall be set by the Magistrate Judge.

IT IS FURTHER ORDERED that the Report and Recom-
mandation (Doc. No. 22) of Magistrate Judge
Lenihan, dated November 22, 2006, is adopted as the
opinion of the Court.

REPORT AND RECOMMENDATION

I. RECOMMENDATION

It is respectfully recommended that Defendants' Mo-
tion for Summary Judgment (Doc. No. 8) be granted
with regard to the issue of the adequacy of the search,
and denied without prejudice in all other respects. It
is further recommended that Plaintiff's Rule 56(f)
Motion (Doc. No. 13) be denied with prejudice on the
issue of the adequacy of the search, and granted on
the remaining issues.

II. REPORT

Plaintiff, the Commonwealth of Pennsylvania De-
partment of Public Welfare ("Commonwealth"), in-
stituted this action pursuant to the Freedom of In-
formation Act ("FOIA"), 5 U.S.C. § 552, to compel the United States and its Department of Health and Human Services ("HHS") to disclose certain documents relating generally to audits conducted by HHS's Office of Inspector General ("OIG") and, specifically, to the review of Title IV-E foster care programs. The Commonwealth made five separate requests pursuant to FOIA between June 29, 2005 and July 19, 2005 for specific materials in these categories. All told, HHS has released approximately 925 pages of responsive materials to the Commonwealth, including pages with redactions, and has withheld in their entirety approximately 202 pages of responsive materials, claiming the withheld materials are exempt from disclosure under 5 U.S.C. § 552(b)(5) ("Exemption (b)(5)"). The Commonwealth disputes the applicability of Exemption (b)(5) to approximately 196 pages of responsive materials withheld by HHS, and also challenges the adequacy of the search conducted by HHS, as well as HHS's representation that it has released all responsive and reasonably segregable factual information. This Court has original subject matter jurisdiction over the action pursuant to 5 U.S.C. § 552(a)(4)(B) and 28 U.S.C. § 41331.

HHS has filed a Motion for Summary Judgment (Doc. No. 8); based on its Vaughn indices and supporting declarations. In response, the Commonwealth has filed a brief and supplemental brief in opposition, supporting affidavit, and a Rule 56(f) Motion for Discovery (Doc. No. 13). For the reasons set forth below, the Court recommends that Defendants' motion for summary judgment be granted in part and denied in part, and that Plaintiff's Rule 56(f) Motion for Discovery be granted with limitations.

A. Standard of Review-Motion for Summary Judgment

The summary judgment standard of Fed.R.Civ.P. 56(c) applies to FOIA cases as it would to any other civil action. Commw. of PA., Dep't of Public Welfare v. United States Dep't of Health & Human Serv., 623 F.Supp. 301, 303 (M.D.Pa.1985). Summary judgment is appropriate if, drawing all inferences in favor of the nonmoving party, "the pleadings, depositions, answers to interrogatories and admissions on file, together with the affidavits, if any, show that there is no genuine issue of material fact and the movant is entitled to judgment as a matter of law." Fed.R.Civ.P. 56(c). Summary judgment may be granted against a party who fails to adduce facts sufficient to establish the existence of any element essential to that party's case, and for which that party will bear the burden of proof at trial. Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S.Ct. 2548, 91 L.Ed.2d 265 (1986).

More specifically, the moving party bears the initial burden of identifying evidence which demonstrates the absence of a genuine issue of material fact. Once that burden has been met, the nonmoving party must set forth "specific facts showing that there is a genuine issue for trial " or the factual record will be taken as presented by the moving party and judgment will be entered as a matter of law. Matalashita Elec. Indus. Corp. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S.Ct. 1348, 89 L.Ed.2d 538 (1986) (quoting Fed.R.Civ.P. 56(e)) (emphasis added by Matalashita Court). An issue is genuine only "if the evidence is such that a reasonable jury could return a verdict for the non-moving party." Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S.Ct. 2505, 91 L.Ed.2d 202 (1986).

In order to prevail on a motion for summary judgment in a FOIA action, the government agency must show that there are no disputed material facts and that each page of material that falls within the requested category either has been produced, is unidentifiable, or is exempt from disclosure. Students Against Genocide v. Dep't of State, 257 F.3d 828, 833 (D.C.Cir.2001) (citations omitted); Weisberg v. U.S. Dep't of Justice, 627 F.2d 365, 368 (D.C.Cir.1980) (citation omitted). As to the second part of its burden, the agency must demonstrate that its search was adequate and that any withheld documents fall within one of the FOIA exemptions. Lee v. U.S. Dep't of Justice, 235 F.R.D. 274, 287 (W.D.Pa.2006) (citing 5 U.S.C. § 552(a)(4)(B); Carney v. U.S. Dep't of Justice, 19 F.3d 807, 812 (2d Cir.1994)). As the possessor of the records and the party responsible for conducting the search, the agency must satisfy this burden by filing a "reasonably detailed affidavit, setting forth the search terms and the type of search performed, and averring that all files likely to contain responsive materials (if such records exist) were
searched." 'Id. (quoting Valencia-Lucena v. U.S. Coast Guard, 180 F.3d 321, 326 (D.C.Cir.1999); citing Steinberg v. U.S. Dept of Justice, 23 F.3d 548, 552 (D.C.Cir.1994)). In addition, the affidavits or declarations must aver facts showing that the agency has conducted a thorough search and provide reasonably detailed explanations as to why any withheld documents fall within the claimed exemption. Id. (citing Carney v. U.S. Dept of Justice, 19 F.3d at 812; Maynard v. Cent. Intelligence Agency, 986 F.2d 547, 559-60 (1st Cir.1993); Perry v. Block, 684 F.2d 121, 126-27 (D.C.Cir.1982)). Affidavits or declarations which satisfy this burden are to be given a presumption of good faith by the district court. Id. (citing SafeCard Servs., Inc. v. Sec. & Exch. Comm'n, 926 F.2d 1197, 1200 (D.C.Cir.1991)). Thus, courts have granted summary judgment in favor of the agency when the agency's affidavits "describe the withheld information and the justification for withholding with reasonable specificity, demonstrating a logical connection between the information and the claimed exemption ..., and are not controverted by either contrary evidence in the record nor [sic] by evidence of agency bad faith." ’ Davin v. U.S. Dept of Justice, 60 F.3d 1043, 1050 (3d Cir.1995) (quoting Am. Friends Serv. Comm'n v. Dept of Defense, 831 F.2d 441, 444 (3d Cir.1987)) (other citation omitted).

*3 "[D]iscovery relating to the agency's search and the exemptions it claims for withholding records generally is unnecessary so long as the agency's submissions are facially adequate." Id. (citing Goland v. Cent. Intelligence Agency, 607 F.2d 339, 352 (D.C.Cir.1978)). If the agency's submissions are determined to be facially adequate, the district court may refuse discovery and award summary judgment based on the affidavits. Id. (citing Goland, supra ). If, however, a review of the record raises substantial doubt, especially where the requests are "well-defined" and the complainant submits positive indications of overlooked materials, summary judgment is inappropriate. Id. (citing Valencia-Lucena, 180 F.3d at 326; Founding Church of Scientology of Washington, D.C., Inc. v. Nat'l Sec. Agency, 610 F.2d 824, 830 (D.C.Cir.1979)).

B. Statement of Relevant Facts and Procedural History

On June 29, 2005, the Commonwealth sent the first of five FOIA requests to HHS requesting interagency agreements between OIG and Administration for Children and Families ("ACF"); and between OIG and the Centers for Medicare and Medicaid Programs ("CMS") regarding the performance of audits for these programs; all OIG statistical sampling policies; and contract documents relating to OIG's use of the Teammate working paper software. FN1 (Ex. A to Pl.'s Compl.) On that same date, the Commonwealth sent a second FOIA request to HHS requesting all documents evidencing or discussing any agreement between ACF or its Regional Administrator, David Lett, and OIG relating to review of Pennsylvania's Title IV-E claims for any periods of time between 1997 and 2002. FN2 (Ex. B to Pl.'s Compl.)

On June 30, 2005, the Commonwealth submitted its third FOIA request to HHS requesting documents relating to all child eligibility review instruments used by OIG auditors in ongoing or completed audits of Title IV-E maintenance payments made by states and local governments. FN3 (Ex. C to Pl.'s Compl.) Also on June 30, 2005, the Commonwealth sent a fourth FOIA request to HHS requesting any letters to state officials after January 1, 2000 announcing the initiation of an audit by OIG relative to a state Title IV-E program except for completed audits whose reports were posted on the HHS web-site or, alternatively, a letter listing the ongoing Title IV-E audits. FN4 (Ex. D to Pl.'s Compl.)

FN3. HHS assigned Case No.2005-0953-RE to the Commonwealth's third FOIA request. See Declaration of Diane J. Diggs dated 12/7/05 (attached as Ex. E to Mem. of Law
Finally, on July 19, 2005, the Commonwealth sent its fifth FOIA request to HHS requesting all documents post 1997 relating to decisions by ACF and OIG to subject Pennsylvania’s Title IV-E program to audit by OIG, discussions held by the staff of ACF, including ACF Regional Administrator David Lett, or OIG staff relative to whether Pennsylvania’s Title IV-E program should be audited by OIG, and the decision by OIG to include a cost analysis of Title IV-E provider rates in its audit of Pennsylvania’s Title IV-E program. See Diggs Decl. at 11. In this request, the Commonwealth specifically sought the release of segregable factual material contained in privileged documents.

FN4. HHS assigned Case No. 2005-0954-mb to the Commonwealth’s fourth FOIA request. See Diggs Decl. at ¶ 12.

On September 19, 2005, judgment was entered in favor of defendants in the case filed at 05-1345. The Commonwealth has appealed the judgment in Civil Action No. 05-1345 to the U.S. Court of Appeals for the Third Circuit by filing a notice of appeal on September 22, 2006.

*4 Other than acknowledging receipt of the FOIA requests and denying the Commonwealth’s requests for a fee waiver, HHS did not respond to the document requests within the time required by law. (Compl. ¶ 6.) Therefore, while HHS was processing the five FOIA requests, the Commonwealth instituted the present FOIA action on September 16, 2005.

Subsequently, on October 19, 2005, HHS responded to the Commonwealth’s fourth FOIA request (Case No. 2005-0954-mb) by producing in its entirety a list of letters announcing the initiation of audits by OIG relating to state Title IV-E programs. (Ex. 6 to Declaration of Robert Eckert dated 4/12/06 (“Eckert Decl.”).) Thereafter, the parties proposed and the Court approved a case management plan, pursuant to which HHS conducted its search for documents corresponding to the first, second, third, and fifth FOIA requests made respectively in Case Nos. 2005-0952-FW, 2005-0951-MB, 2005-0953-RE, and 2005-1000-RE.

FN5. HHS assigned Case No. 2005-1000-RE to the Commonwealth’s fifth FOIA request. See Diggs Decl. at ¶ 12.

FN6. Although the FOIA requester’s purpose for requesting the information is irrelevant, the Court notes that the majority of the information sought in the five FOIA requests here appears to be related to claims asserted by the Commonwealth in a separate lawsuit filed in this judicial district at Civil Action No. 05-1345, under the caption, “Commonwealth of Pennsylvania Department of Public Welfare v. United States, United States Department of Health and Human Services.” On September 19, 2006, judgment was entered in favor of the defendants in the case filed at 05-1345. The Commonwealth has appealed the judgment in Civil Action No. 05-1345 to the U.S. Court of Appeals for the Third Circuit by filing a notice of appeal on September 22, 2006.

FN7. The Declaration of Robert Eckert dated 4/12/06 is attached as Exhibit A to the Memorandum of Law in Support of Defendants’ Motion for Summary Judgment (Doc. No. 9).

On January 5, 2006, HHS informed the Commonwealth that after searching its records, it was able to locate approximately 1,128 pages responsive to the Commonwealth’s requests and released approximately 830 pages, some of which contained redactions. (Ex. 8 to Eckert Decl.) In this regard, HHS informed the Commonwealth that employer identification numbers under Exemption (b)(4), information documenting the deliberative process under Exemption (b)(5), and names and other identifiers of minor children under Exemption (b)(6) were redacted from the released documents. (Id.) HHS withheld the remaining 298 pages in their entirety based on Exemption (b)(5). (Id.)

FN8. Exemption (b)(4) allows the agency to withhold “commercial or financial information obtained from a person and privileged or confidential”. 5 U.S.C. § 552(b)(4).

FN9. Exemption (b)(5) allows the agency to withhold “inter-agency or intra-agency memorandums or letters which would not be
available by law to a party other than an agency in litigation with the agency. 5 U.S.C. § 552(b)(5). The courts have recognized that Exemption (b)(5) generally protects from disclosure materials that would be protected under the executive or “deliberative process” privilege, attorney-client privilege, and/or the attorney work product privilege. Coastal States Gas Corp. v. Dept of Energy, 617 F.2d 854, 862 (D.C.Cir.1980) (citations omitted).

FN12. In Vaughn v. Rosenn, 484 F.2d 820 (D.C.Cir.1974) (Vaughn I ), the Court of Appeals for the District of Columbia Circuit delineated certain information that must be provided by the agency for any documents being withheld under one of the enumerated exemptions under FOIA to satisfy its burden of proof, which has become known as the “Vaughn Index”.

FN14. These two pages are found at Bate-stamp page nos. 496 and 557.

FN15. The following Bate-stamp page numbers are assigned to these materials: 543-44, 106, 107, 108-09, 110-11, 119-193, 216, 219, 220, 225-26, 231-32, 240, and 244. Although HHS does not indicate in its Vaughn indices that page no. 244 was redacted, the Commonwealth contends that page was redacted and it is contesting the withholding of the redacted information.
FN16. The following Bate-stamp page numbers are assigned to these materials: 507-511, 547-55, 699-705, 711-24, 725-43, and 747-58.

In response, on March 28, 2006, the Commonwealth corresponded with HHS and provided a list of withheld documents which correlated to those listed in HHS's *Vaughn* indices for Case Nos.2005-1000-RE and 2005-951-MB, for which it was challenging the specific claimed exemptions. (Ex. B attached to Mem. of Law in Supp. of Defs.' Mot. for Summ. J.) Initially, in its March 28, 2006 correspondence, the Commonwealth challenged HHS's claimed exemptions for 191 pages of responsive materials—188 of the challenged pages were withheld in their entirety by HHS; the other three (3) pages were redacted and released with the *Vaughn* indices. However, a subsequent filing by the Commonwealth on June 2, 2006 (Ex. A to Rule 56(f) Declaration of Jason Manne (Doc. No. 14)) actually places 196 pages in dispute. Of these 196 pages, 29 appear to be duplicates of the withheld material. On March 28, 2006, the Commonwealth also informed HHS that it was contesting the adequacy of the search and objected to HHS's failure to disclose segregable factual material in the documents. (Id.)

FN17. The Commonwealth's March 28, 2006 challenge to the *Vaughn* indices actually lists 193 pages for which the claimed exemptions are disputed. However, that list includes Bate-stamped page nos. 219 and 220, which were released in their entirety by HHS with its *Vaughn* indices. The Commonwealth has subsequently acknowledged receipt of page nos. 00219 and 00220 and withdrawn its challenge to these pages. (Ex. C attached to Mem. of Law in Supp. of Defs.' Mot. for Summ. J.; Pl.'s Br. in Opp'n to HHS's Mot. for Summ. J. and in Supp. of its Rule 56(f) Mot. at 2 n. 2.)

FN19. The three (3) redacted pages released by HHS and challenged by the Commonwealth are Bate-stamp page nos. 496, 557, and 244. With regard to page no. 244, HHS's *Vaughn* indices do not indicate that this page was redacted in any way.

FN20. In addition to the 191 pages of withheld material challenged on March 28, 2006, the Commonwealth now appears to be challenging the exemptions claimed for eleven (11) other pages—Bate-stamp page nos. 216, 225-26, 231-32, 233-35, 238-39, and 240—as indicated in Exhibit A to the Rule 56(f) Declaration of Jason W. Manne (Doc. No. 14). However, six (6) of these pages, i.e., page nos. 216, 225-26, 231-32, and 240, appear to have been released without redaction with HHS's *Vaughn* indices, and the Commonwealth does not provide any basis for including these pages in its June 2, 2006 submission, nor is there any evidence of record to suggest that these documents contain redactions. Therefore, the Court concludes that these six (6) pages were listed in error by the Commonwealth and has not included them as part of the total number of challenged pages.

FN21. The following page numbers appear to be duplicates: Page no. 546 is a duplicate of 545; page nos. 556 and 557 are duplicates of page no. 496; page nos. 584-86, 274-76,
277-79, and 289-91 are duplicates of page nos. 526-28; page no. 836 is a duplicate of page no. 537; page no. 837 is a duplicate of page no. 538; page nos. 838 and 112 are duplicates of page nos. 539; page no. 839 is a duplicate of page no. 542; page nos. 113-14 are duplicates of page nos. 834-35; page nos. 272-73 and 285-86 are duplicates of page nos. 497-98; and page nos. 344, 345, and 346 are duplicates of page no. 343.

*5 On May 3, 2006, HHS filed a Motion for Summary Judgment, brief in support thereof, together with its supporting declarations and documents. In response, the Commonwealth filed a motion to stay the proceedings on HHS's motion for summary judgment pending discovery pursuant to Rule 56(f), along with supporting declaration and brief. The Commonwealth also filed a brief in opposition to HHS's motion for summary judgment which was also included in its brief in support of its Rule 56(f) motion. Both sides filed reply briefs, and pursuant to the order of court dated October 19, 2006, the Commonwealth filed a supplemental brief in opposition to HHS's motion for summary judgment and in support of its Rule 56(f) motion on October 25, 2006. Thus, the pending motions have been fully briefed and are ripe for disposition.

C. Analysis

FOIA was enacted by Congress for the purpose of "facilitating public access to Government documents." Davin, 60 F.3d at 1049 (quoting U.S. Dept.of State v. Ray, 502 U.S. 164, 173, 112 S.Ct. 541, 116 L.Ed.2d 526 (1991)). Consistent with the purpose of creating an expedient mechanism for disseminating information and holding government agencies accountable, FOIA directs government agencies to promptly produce any requested materials unless that information is exempt from disclosure pursuant to one of the nine exemptions enumerated in the FOIA statute, 5 U.S.C. § 552(b)(1)-(9). Id. (citing Coastal States Gas Corp. v. Dep't of Energy, 644 F.2d 969, 974 (3d Cir.1981) (quoting S.Rep.No. 813, 89th Cong., 1st Sess. 3 (1965)). Thus, the Supreme Court has held that FOIA "creates a strong presumption in favor of disclosure." Id. (citing Dep't of Air Force v. Rose, 425 U.S. 352, 361, 96 S.Ct. 1592, 48 L.Ed.2d 11 (1976)). To this end, FOIA mandates that the district court review de novo the agency's decision to withhold requested information. Id. (citing 5 U.S.C. § 552(a)(4)(B)); see also McDonnell v. United States, 4 F.3d 1227, 1241 (3d Cir.1993) (citing § 552(a)(4)(B)). The burden of demonstrating that a particular exemption applies falls squarely on the agency. Davin, 60 F.3d at 1049; McDonnell, 4 F.3d at 1241. In addition, the statute requires the agency to disclose "[a]ny reasonably segregable portion of a record ... to any person requesting such record after deletion of the portions which are exempt under section 552(b)." 5 U.S.C. § 552(b).

Because the review of FOIA cases is made difficult by the fact that the party seeking disclosure does not know the contents of the information sought and is, therefore, helpless to contradict the government's description of the information or effectively assist the trial judge," the reviewing court generally will require the government agency to prepare a Vaughn index and supporting affidavits to ensure a meaningful adversarial process. Davin, 60 F.3d at 1049 (citing Ferri v. Bell, 645 F.2d 1213, 1222 (3d Cir.1981), modified 671 F.2d 769 (3d Cir.1982); McDonnell, 4 F.3d at 1241 (citing King v. U.S. Dept.of Justice, 830 F.2d 210, 217-18 (D.C.Cir.1987)). In this regard, the Third Circuit endorsed the following observation of the United States Court of Appeals for the District of Columbia Circuit in King, supra:

*6 The significance of agency affidavits in a FOIA case cannot be underestimated. As, ordinarily, the agency alone possesses knowledge of the precise content of documents withheld, the FOIA requester and the court both must rely upon its representations for an understanding of the material sought to be protected. As we observed in Vaughn v. Rosen, "[t]his lack of knowledge by the party seeing [sic] disclosure seriously distorts the traditional adversary nature of our legal system's form of dispute resolution," with the result that "[a]n appellate court, like the trial court, is completely without the controverting illumination that would ordinarily accompany a lower court's factual determination." Even should the court undertake in camera inspection of the material-an unwieldy process where hundreds or thousands of pages
are in dispute"[t]he scope of the inquiry will not have been focused by the adverse parties...."

Affidavits submitted by a governmental agency in justification for its exemption claims must therefore strive to correct, however, imperfectly, the asymmetrical distribution of knowledge that characterizes FOIA litigation. The detailed public index which in Vaughn we required of withholding agencies is intended to do just that: "to permit adequate adversary testing of the agency's claimed right to an exemption," and enable "the District Court to make a rational decision whether the withheld material must be produced without actually viewing the documents themselves, as well as to produce a record that will render the District Court's decision capable of meaningful review on appeal." Thus, when an agency seeks to withhold information, it must provide "a relatively detailed justification, specifically identifying the reasons why a particular exemption is relevant and correlating those claims with the particular part of a withheld document to which they apply."

McDonnell, 4 F.3d at 1241 (quoting King, 830 F.2d at 218-19) (footnotes omitted). The Court of Appeals in King further opined:Specificity is the defining requirement of the Vaughn index and affidavit; affidavits cannot support summary judgment if they are "conclusory, merely reciting statutory standards, or if they are too vague or sweeping." To accept an inadequately supported exemption claim "would constitute an abandonment of the trial court's obligation under the FOIA to conduct a de novo review."

830 F.2d at 219 (footnotes omitted).

In the case at bar, HHS has filed its Vaughn indices and supporting declarations, identifying what it maintains are all of the materials responsive to the Commonwealth's FOIA requests. HHS submits that its supporting documentation establishes that its search for responsive materials to the Commonwealth's FOIA requests was reasonable, it released all reasonably segregable, non-exempt information, and that it properly withheld the challenged materials under Exemption (b)(5). Accordingly, HHS submits that it is entitled to summary judgment in its favor.

*7 In opposition, the Commonwealth submits that the search affidavits submitted by HHS are deficient on virtually all of the requirements established by the courts for adequate search affidavits and therefore HHS has failed to carry its burden on the adequacy of the search. In addition, the Commonwealth argues that HHS's affidavits are deficient in that they fail to provide any details regarding the process used to determine that all reasonably segregable factual material has been released and/or to explain why the materials withheld are not reasonably segregable. The Commonwealth contends that Bate-stamped number 545 in the Vaughn Index evidences bad faith on the part of HHS with regard to its representation that all reasonably segregable material has been released. Finally, the Commonwealth argues that HHS has not met its burden of proof with regard to the claimed exemptions from disclosure, as most of the entries in the Vaughn index have the same conclusory, boilerplate language supporting the claimed exemption and little factual detail is supplied to show why a particular exemption applies to particular documents. In light of these infirmities, the Commonwealth contends that HHS's motion for summary judgment should be denied and that it should be allowed to conduct limited discovery to flesh out the deficiencies in the HHS submission and to establish a full record for disposition by the Court.

According to the Commonwealth, the key to resolving HHS's motion for summary judgment is to determine whether the Vaughn Index and supporting declarations provide an "adequate factual basis" to grant the motion. In order to make this determination, the Commonwealth contends that this Court must answer the following four questions:

1. Do the search affidavits provide an adequate factual basis to establish the reasonableness of the search for documents;
2. Do the Vaughn index and affidavits provide an adequate factual basis to show that HHS released all segregable factual material in the withheld documents;
3. Do the Vaughn index and affidavits provide an adequate factual basis to establish the claimed exemptions from disclosure in the withheld documents; and
4. If the HHS materials are deficient, is [the Commonwealth] entitled to discovery.

See Pl.'s Br. in Opp'n to HHS' Mot. for Summ. J. and
in Supp. of its Rule 56(f) Mot. (Doc. Nos. 15 & 16). The Commonwealth submits that the answers to the first three questions must be in the negative, and therefore, it is entitled to discovery, i.e., the fourth question must be answered in the affirmative. Each of these arguments is addressed seriatim below.

1. Adequacy of Search

Generally, the courts apply a reasonableness standard to determine the adequacy of an agency's search for requested documents, which requires the agency to demonstrate that the search it conducted was "reasonably calculated to uncover all relevant documents." Moore v. Aspin, 916 F.Supp. 32, 35 (D.D.C.1996) (citing Miller v. U.S. Dep't of State, 779 F.2d 1378, 1383 (8th Cir.1985)); see also Williams v. U.S. Dep't of Justice, No. 05-2928, 2006 U.S.App. LEXIS 10493, *4 (3d Cir. Apr. 26, 2006) (citing Oglesby v. U.S. Dep't of Army, 920 F.2d 57, 68 (D.C.Cir.1990)) (agency is obligated to conduct a reasonable search for responsive records); Steinberg v. U.S. Dep't of Justice, 23 F.3d 548, 551 (D.C.Cir.1994) (citing Weisberg v. U.S. Dep't of Justice, 745 F.2d 1476, 1485 (D.C.Cir.1984)) (adequacy of search is judged by a standard of reasonableness). Stated another way, this standard requires the agency to "show that it made a good faith effort to conduct a search for the requested records, using methods which reasonably can be expected to produce the information requested." Moore, 916 F.Supp. at 35 (citing Oglesby, 920 F.2d at 68). However, the reasonableness standard does not mandate a detailed examination of every document maintained by the agency or that the agency search every record system. Id. Rather, all that is required is that the search be reasonably calculated to reveal the records sought by the requester. Id.; Steinberg, 23 F.3d at 551.

*8 An agency can satisfy its burden of establishing reasonableness by providing reasonably detailed affidavits, submitted in good faith, "setting forth the search terms and the type of search performed, and averring that all files likely to contain responsive materials (if such records exist) were searched[]."

STEINBERG

OGLESBY, 920 F.2d at 68; STEINBERG, 23 F.3d at 551 (citing Weisberg, 745 F.2d at 1485); MILLER, 779 F.2d at 1383 (citing Goland v. Cent. Intelligence Agency, 607 F.2d 339, 352 (D.C.Cir.1979); Williams, 2006 U.S.App. LEXIS 10493, at *4-5 (citing Valencia-Lucena, 180 F.3d at 326). Once the agency has met its burden of showing the search was reasonable, the burden then shifts to the requestor to rebut that evidence by demonstrating that the search was not conducted in good faith. MILLER, 779 F.2d at 1383 (citing Weisberg v. U.S. Dep't of Justice, 705 F.2d 1344, 1351 (D.C.Cir.1983)). Mere speculation on the requestor's part that uncovered documents may exist will not suffice to rebut the agency's good faith reasonable search. Steinberg, 23 F.3d at 552 (citing SafeCard Serv., 926 F.2d at 1201).

FN22. An affidavit describing in general how the agency processed the FOIA request does not satisfy the reasonableness standard. Steinberg, 23 F.3d at 552-52 (citing Weisberg v. U.S. Dep't of Justice, 627 F.2d 365, 371 (D.C.Cir.1980)). The agency affidavits must state which files were searched and by whom, must contain facts showing a systematic approach to document location, thereby providing sufficiently specific information to enable the requestor to challenge the search process engaged in by the agency. Id. at 552.

a. Declarations Submitted by HHS

To satisfy its burden of establishing the adequacy of the search, HHS has produced declarations from the following individuals: Robert Eckert, Katherine Hooten, Diane J. Diggs, Frank T. Connors, and Michael S. Marquis. In asking the Court to deny summary judgment on the adequacy of the search, the Commonwealth submits that these declarations fail to describe in the required detail the files that were searched, by whom, the search terms used, and/or the structure of the agencies' filing systems. Therefore, the Commonwealth argues, the declarations do not describe a systematic approach to document location, nor do they provide sufficient factual information to afford it a meaningful opportunity to contest the search and to allow the district court an adequate factual foundation for judicial review. In support of this argument, the Commonwealth relies primarily on
On the other hand, HHS contends that its declarations provide sufficient detail regarding the scope and method of the searches conducted, in that the declarants describe the offices to which each request was referred, provide a description of the office, explain why a particular request was referred to a specific office, provide the location of the responsive documents and/or the type of files where the records were maintained. In addition, HHS argues that the declarants also state that all files likely to contain responsive documents were searched. In support of its argument, HHS cites *Perry v. Block,* 684 F.2d 121 (D.C.Cir.1982), and *Judicial Watch, Inc. v. Food & Drug Admin.,* 407 F.Supp.2d 70 (D.D.C.2005), for the proposition that in responding to FOIA requests, an agency is not required to “set forth with meticulous documentation the details of an epic search for the requested records.” *Perry,* 684 F.2d at 126. Rather, HHS argues that all it is required to do is provide “‘affidavits that explain in reasonable detail and scope the method of the search conducted by the agency.”’ *Lechlitler v. Rumsfeld,* No. 05-4381, 182 Fed. Appx. 113, 116, 2006 WL 1506717, at *2 (3d Cir. June 1, 2006) (quoting *Ogelsby*, supra).

Moreover, HHS contends it has disclosed over 900 pages of responsive materials in this case, demonstrating that it searched the appropriate offices, and cites in support thereof, the district court’s decision in *Commw. of PA. v. U.S. Dept of Health & Human Serv.,* 623 F.Supp. 301, 304 (M.D.Pa.1985) (the “1985 case”), which involved a similar FOIA matter. HHS further argues based on the 1985 case, that the Commonwealth in this case has not identified any “blocks of requested information or documents which appear to be missing and which might be discovered by further search of different offices.” *Id.* at 304. Accordingly, HHS submits the Commonwealth’s arguments lack merit and are insufficient to raise a material question of fact regarding the adequacy of the search.

With these arguments in mind, the Court now turns to a review of the supporting declarations.

**Declaration of Robert Eckert**

**FN24**

FN24, HHS actually produced two declarations of Robert Eckert: The first one dated April 12, 2006 (“Eckert Decl. I”) addresses the search undertaken pursuant to the five FOIA requests submitted by the Commonwealth. The second declaration of Robert Eckert dated June 19, 2006 (“Eckert Decl. II”) was submitted in response to the Commonwealth’s brief in opposition to HHS’s motion for summary judgment, and addresses the segregability issue discussed infra in Part 2.

Robert Eckert is the Director of the Freedom of Information/Privacy Acts (“FOI/PA”) Division, Office of the Assistant Secretary for Public Affairs, Department of HHS. In essence, Eckert is the Freedom of Information Officer for HHS. (Eckert Decl. I at ¶ 1.) As such, his duties include responding to FOIA requests and determining whether to release or withhold records or portions of records in accordance with FOIA and HHS regulations. (Id. at ¶ 2.) Upon receipt of the five FOIA requests submitted by the Commonwealth, Eckert forwarded the requests to various offices and divisions within HHS, specifically OIG, ACF and CMS, because the requests sought records from these offices and therefore these offices were reasonably likely to possess responsive documents. (Id. at ¶¶ 6-10.) Eckert’s office responded to all five requests, releasing approximately 830 pages of documents and withholding 298 pages pur-
suant to Exemption (b)(5), and withholding small portions of 260 pages under Exemptions (b)(4) and (b)(6). (Id. at ¶ 13.) Subsequently, Eckert’s office released an additional 94 pages of documents. (Id. at ¶ 16.) Eckert further stated that there were no other reasonably likely locations for responsive documents. (Id. at ¶¶ 6-10.) Eckert does not provide any other information regarding the search for responsive documents.

Declarations of Katherine Hooten

HHS produced two declarations from Katherine Hooten. The first one is dated January 13, 2006 (“Hooten Decl. I”) and is attached as Exhibit D to HHS’s memorandum of law in support of its motion for summary judgment (Doc. No. 9). Katherine Hooten is the Freedom of Information Specialist for ACF and her duties include assembling ACF documents and recommending whether ACF documents should be released or withheld, and identifying corresponding exemptions if withholding is recommended. (Hooten Decl. I at ¶ 1.) Hooten explained that pursuant to a telephone conference she had on July 18, 2005 with counsel for the Commonwealth, Jason Manne, she referred his request in Case No. 2005-0952-FW to the Office of Family Assistance (“OFA”) and Administration for Children, Youth and Families (“ACYF”). (Id. at ¶ 4.) Both offices reported that they did not have any records responsive to the Commonwealth’s request. (Id.) No other details were provided as to who conducted the search, the search terms used, or identified the particular files searched. Finally, Hooten stated there were no other responsive documents or likely locations for responsive documents. (Id.)

*10 Hooten next explained that she forwarded the Commonwealth’s FOIA request in Case No. 2005-1000-RE to ACYF and HHS Region III, because these offices were likely locations of records pertinent to the decision to audit Pennsylvania’s title IV-E program. (Id. at ¶ 10.) The results of the search located the same documents retrieved in response to the FOIA request in Case No. 2005-0951-MB which were forwarded to Eckert. (Id.) No other details were provided as to who conducted the search, the search terms used, or identified the particular files searched. Finally, Hooten stated there were no other responsive documents or likely locations for responsive documents. (Id.)

In response to the Commonwealth’s argument in opposition that Hooten’s declaration fails to explain how the searches were conducted, HHS filed the supplemental declaration of Katherine Hooten dated June 21, 2006 (“Hooten Decl. II”) (attached as Exhibit J to HHS’s Reply Memorandum in Support of its Motion for Summary Judgment and in Opposition to Plaintiff’s Rule 56(f) Motion) (Doc. No. 17)). In her supplemental declaration, Hooten provides information regarding who conducted the searches and the files searched in response to the FOIA requests in Case Nos. 2005-0952-FW and 2005-0951-MB. In particular, as to the FOIA request in Case No. 2005-0952-FW for interagency agreements between OIG and ACF and OIG and CMS, Hooten states that the searches were conducted by a “Program Analyst” within OFA; the “Team Leader for Audit Liaison/Debt Management Team, Division of Financial Integrity, Office of Financial Services, Office of Administration/ACF”; and within ACYF, a “Policy Specialist,” and the “Director of Program Implementation.” (Hooten Decl. II at ¶ 4.) The program analyst with OFA searched OFA’s Program Policy Files, which include the Intranet policy file and the paper program files and contain all of the documents in OFA, for any agreements between OIG and ACF regarding audits of ACF programs. The program analyst also consulted with the Director of
Division of State TANF Policy and they agreed that if any agreement existed it would be located in the Office of Administration. The Team Leader then searched the OIG Website for work plans for fiscal years 2006, 2005 and 2004, without locating any of the requested interagency agreements. Within ACYF, the program manager, policy specialist, and director of program implementation searched all electronic and paper files for any agreements between OIG and ACF regarding audits of ACF programs. Hooten then indicated that there were no other likely locations for responsive documents to the FOIA Request in Case No.2005-0952-FW.

FN25. Hooten does not specifically identify the searchers by name.

The Commonwealth submits that Hooten's supplemental declaration is still deficient with regard to the June 29, 2005 FOIA request for certain interagency agreements with OIG (Case No.2005-0952-FW), as Hooten fails to list the specific files searched or the search terms used, fails to describe the structure of the agency's file systems, and therefore, the declaration fails to provide evidence of a systematic approach to document location. Specifically, the Commonwealth takes issue with Hooten's failure to explain (1) why she limited her search to OFA when the FOIA request covered all programs with ACF, and (2) why it was reasonable for HHS to search OFA Program Policy files when looking for intra-agency agreements which would more likely be found in administrative type files. The Commonwealth further argues that Hooten's assertion that the OFA Intranet policy file and paper program files contain all the documents in OFA fails to take into account any files maintained by individual employees, such as correspondence files and administrative files. Next, although it was determined by the OFA program analyst and Director of Division of State TANF Policy that the Office of Administration was the likely location for any intra-agency agreements, the Commonwealth notes that the team leader does not appear to have searched the files at the Office of Administration, but rather, this unnamed individual searched the "OIG Website for work plans for Fys 2006, 2005, and 2004." The Commonwealth takes issue with both the failure to search the files of the Office of Admin-

*11 As to the FOIA request in Case Nos.2005-0951-MB and 2005-1000-RE for any agreements or discussions between, and any decisions by, ACF, David Lett, and/or all ACF staff and OIG, regarding a review or audit of Pennsylvania's Title IV-E claims/programs, Hooten avers in her supplemental declaration that the searches were conducted within ACYF by "several Policy Specialists" and the "Director of Program Implementation"; and within Region III, by a "Program Manager in Child Welfare", a "Grants Officer", and a "Program Specialist in Child Welfare." FN26 (Hooten Decl. II at ¶ 5.) According to Hooten, the files searched by these individuals consisted of "electronic and paper files" within ACYF; "Region III's electronic and paper Title IV-E files"; the "Child Welfare Unit's Title IV-E official program files for Pennsylvania (which contain letters and reports by year);" the "individual electronic files for any emails or reports involving Pennsylvania Title IV-E information;" and the "Regional Office's grants management files for Pennsylvania's Title IV-E program." (Id.)

FN26. Hooten does not specifically identify the searchers by name.

The Commonwealth contends that Hooten's supplemental declaration does not evidence a systematic approach to the search conducted by the unnamed policy specialists and the director of program implementation within ACYF because it states only that these unnamed individuals searched unspecified electronic and paper files. Moreover, the Commonwealth contends Hooten fails to provide the search terms used, denote which files were searched, or explain the structure of agency filing system, and fails to indicate whether the files of the individuals involved with Pennsylvania's OIG audits were searched. With regard to the searches conducted within Region III by an unnamed program manager, grants officer and program specialist, the Commonwealth again takes issue with Hooten's failure to specify the search terms.
used or explain the structure of the agency files within Region III. In addition, the Commonwealth notes Hooten's supplemental declaration does not indicate that individual employees' paper files were searched and withholds the names of the individuals whose electronic files were searched, thereby precluding the Commonwealth from determining whether HHS searched the files of all individuals it knows were involved with the OIG audits.

Declaration of Diane J. Diggs

HHS produced one declaration from Diane J. Diggs, dated December 7, 2005 ("Diggs Decl.") which is attached as Exhibit E to HHS's memorandum of law in support of its motion for summary judgment (Doc. No. 9). Diane Diggs is the Freedom of Information Specialist for the Office of Secretary, Office of Inspector General, Department of HHS, and her duties include assembling OIG documents in response to a FOIA request and recommending whether OIG documents should be released or withheld and identifying corresponding FOIA exemptions if withholding is recommended. (Diggs Decl. at ¶ 1.) When she receives a FOIA request from HHS's FOI/PA Division, Diggs stated that she logs it into her database. (Id. at ¶ 2.) Diggs then forwards the request to the component within OIG, including OIG regional offices, which she believes may have responsive documents. (Id. at ¶ 3.) All five FOIA requests were forwarded to Diggs for processing. (Id. at ¶ 4.) With regard to all five FOIA requests, Diggs determined that the Office of Audit Services ("OAS") within OIG was the likely location to have responsive documents because OAS is responsible for: (1) the performance of audits relative to ACF and CMS programs; (2) conducting audits of HHS programs and grantees, including Title IV-E audits; (3) all ongoing audits by OIG of Title IV-E programs; and (4) policy decisions regarding whether a HHS program or grantee should be audited by the OIG. (Id. at ¶¶ 6, 8, 10, 11, 13.) Therefore, Diggs forwarded all five FOIA requests to OAS. Documents responsive to all five FOIA requests were located and retrieved from the records maintained in the Audit Office Program Files, photocopied and sent to HHS's FOI/PA Division. (Id.) No further information regarding the search is provided. Diggs further stated that there were no other likely locations for responsive records. (Id.)

*12 In response to Diggs's declaration, the Commonwealth argues that she fails to explain or otherwise identify the "Audit Office Program Files" and her declaration is uninformative regarding the search methodology.

Declarations of Frank T. Connors

HHS produced two declarations from Frank T. Connors. The first one is dated April 13, 2006 ("Connors Decl. I") and is attached as Exhibit F to HHS's memorandum of law in support of its motion for summary judgment (Doc. No. 9). Frank Connors is the Program Analyst for OAS, Office of Inspector General, Department of HHS, and his duties include reviewing FOIA requests, coordinating searches for responsive documents within OAS, and assembling OAS documents for submission to OIG. (Connors Decl. I at ¶ 1.) When he receives a FOIA request from OIG, Connors stated that he logs it into his database. (Id. at ¶ 4.) Connors received all five FOIA requests from Diane Diggs. (Id. at ¶ 5.) With regard to these requests, Connors essentially identifies by title the individuals within OAS, Region III, Grants and Internal Activities ("GIA") Division, and the Office of Counsel to the Inspector General ("OCIG"), with whom he consulted and/or referred the document requests, and explains why these offices/divisions are likely to have any responsive documents. Connors goes on to state whether these individuals located any responsive documents after conducting a search. However, other than indicating that the responsive records were maintained in the "Audit Office Program Files," no other information is given regarding the search terms used, the structure of the agency's file system, or the names of the specific files searched.

In response to the Commonwealth's brief in opposition challenging the sufficiency of Connors' first declaration as completely lacking any details regarding the search terms or methodology used, and the structure of the agency's filing system, HHS filed the supplemental declaration of Frank T. Connors dated June 21, 2006 ("Connors Decl. II") (attached as Exhibit K to the reply memorandum in support of HHS's motion for summary judgment and opposition to
Plaintiff’s Rule 56(f) motion (Doc. No. 17)). In his supplemental declaration, Connors first explains that the files in OAS are known simply as “program audit files” or “audit work files.” (Connors Decl. II at ¶ 4.) He then goes on to explain, in some detail, the search process employed for the first FOIA request dated June 29, 2005 (Case No.2005-0952-FW). Connors consulted with a senior auditor within OAS who conducted a search of paper and electronic work files for any inter-agency agreements between OIG and ACF regarding the performance of audits going back six years from 2005. (Connors Decl. II at ¶ 5.) Connors also consulted with other staff members and he details the searches conducted by these individuals regarding the second, third and fourth items in this FOIA request.

With regard to OAS’s processing of the second FOIA requests dated June 29, 2005 (Case No.2005-0951-MB), Connors explained that a Supervisory Auditor within the GIA Division, a Supervisory Auditor within Region III, and a senior attorney within the OCIG searched paper and electronic audit work files for the period 1997-2002 for all documents, including e-mail, file notes, meeting notices, and correspondence, evidencing or discussing any agreement between ACF, its Regional Administrator, David Lett, and OIG relative to a review of Pennsylvania’s Title IV-E claims. (Id. at ¶ 6.) Connors further stated that the searches conducted by the Supervisory Auditors at GIA and Region III, and the senior attorney at OCIG located responsive documents maintained in paper and electronic audit work files and these documents were forwarded to him in paper form. (Id.)

*13 With regard to the third FOIA request dated June 30, 2005 (Case No.2005-0953-RE) requesting all documents relating to all child eligibility review instruments used by OIG auditors in ongoing or completed audits of Title IV-E maintenance payments made by States and local governments, Connors explained that a Supervisory Auditor within GIA searched all paper and electronic audit work files for responsive documents and did not locate any documents within the scope of the request. (Id. at ¶ 7.) Supervisory Auditors within Regions I, II and III also searched all paper and electronic audit work files for documents responsive to the third FOIA request and located and submitted all responsive documents. (Id.) Supervisory Auditors from Regions IV, V and IX each searched paper and electronic audit work files within their respective offices but had no responsive documents. (Id.) A senior attorney from OCIG also searched paper and electronic audit work files for documents responsive to the third FOIA request but did not locate any documents within the scope of the request. (Id.)

With regard to the fourth FOIA request dated June 30, 2005 (Case No.2005-0954-mb), Connors explained a Supervisory Auditor provided him with the requested list of all ongoing audits of Title IV-E programs in paper form, from an electronic audit work file. (Id. at ¶ 8.)

As to the fifth FOIA request dated July 19, 2005 (Case No.2005-1000-RE), requesting all documents post 1997 relating to decisions by ACF and OIG to subject Pennsylvania’s Title IV-E program to audit by OIG, including discussions by ACF staff, ACF Regional Administrator David Lett, or OIG staff regarding same, and the decision of OIG to include a cost analysis of Title IV-E provider rates in its audit of Pennsylvania’s Title IV-E program, Connors stated that a Supervisory Auditor within GIA, a Supervisory Auditor within Region III, and a senior attorney within OCIG all searched paper and electronic audit work files from 1997 to present for responsive documents. (Id. at ¶ 9.) Connors further stated that all three individuals located and forwarded responsive documents maintained in paper and electronic audit work files to Connor in paper form. (Id.)

However, in its supplemental reply brief, the Commonwealth challenges Connors’ supplemental declaration as still devoid of either a description of the search terms used to search these “electronic” or “paper” files, or the names of the particular folders within the program audit files or audit work files which were searched. The Commonwealth also contends that the search is deficient in that none of the individuals with whom Connors consulted regarding the search for responsive records indicated that the personal filing systems and computer hard drives of individual employees were searched, or that either

the "program audit files" or "audit work files" contained the files of any individuals, including the ACF staff and David Lett.

Declaration of Michael S. Marquis

Finally, HHS presented one declaration from Michael S. Marquis dated January 24, 2006 ("Marquis Decl."), which is attached as Exhibit G to HHS's memorandum of law in support of its motion for summary judgment (Doc. No. 9). Michael Marquis is the Director of the Freedom of Information Group ("FIG"), Office of Strategic Operations and Regulatory Affairs, Centers for Medicare and Medicaid Services ("CMS"), U.S. Department of HHS, and as such, is the Records Access Officer for CMS. Marquis's duties include responding to FOIA requests for records of CMS, determining whether to release or withhold records or portions of records, and overseeing all FOIA activities within CMS. (Marquis Decl. at ¶ 1.) Marquis received from HHS FOI/PA Division one FOIA request dated June 29, 2005 for inter-agency agreements between OIG and CMS for the performance of audits relative to CMS programs (Case No.2005-0952-FW). (Id. at ¶ 4.) In his declaration, Marquis identifies the offices/divisions likely to possess responsive documents, and the basis for this conclusion, i.e., generally the relationship between the office/division and the documents requested. Marquis does not provide any detail regarding the types of files searched or the structure of the referred offices' file systems. Marquis does indicate that the searches conducted by the offices to whom he forwarded the FOIA request resulted in the retrieval of approximately 174 pages of responsive records from OAGM and OFM, which were forwarded to HHS's FOI/PA Division. (Id. at ¶¶ 7, 10.) Marquis further stated that there were no other likely locations for responsive documents and all located responsive documents were provided to HHS's FOI/PA Division. (Id. at ¶¶ 9, 12.)

The Commonwealth objects to the sufficiency of the Marquis declaration, for essentially the same reasons given as to the four previous declarations: Failure to identify the specific files searched and to explain the manner in which the search was conducted.

Reviewing the declarations of Eckert, Hooten, Diggs, Connors, and Marquis, the following conclusions can be drawn regarding the adequacy of the searches. Based on the information requested in the five FOIA requests, it was determined by the declarants that responsive materials were most likely located within the following agencies, offices, and/or divisions of HHS: ACF, and its offices/divisions OFA, ACYF; the regional offices of HHS Regions I, II, III, IV, V, and IX; OIG and its offices/divisions OAS, GIA, and OCIG; and CMS and its offices/divisions OSORA, OAGM, CBC, CMSO, and OFM. Collectively, the declarants adequately explained how and why a particular FOIA request was referred to a particular agency/office/division. The declarants also stated that these offices/divisions were searched because they were the likely locations for records responsive to the five FOIA requests submitted by the Commonwealth. In addition, the declarants indicated the filing systems or types of files searched, i.e., "Audit Office Program Files," "Program audit files," or "audit work files," and within these files, whether both paper and/or electronic files were searched, and in some cases, whether individual files maintained by employees/staff were searched. Moreover, the Court notes that through their respective positions within HHS and its offices and divisions, the declarants are charged with the responsibility of processing all FOIA requests referred to HHS or their agency/office/division, and therefore, are deemed to have some expertise in processing FOIA requests. Indeed, the Commonwealth has not pointed to any reason or basis for a contrary conclusion. Accordingly, the Court finds the declarations provide sufficient factual detail to show that the searches were reasonably calculated to uncover the records requested by the Commonwealth and indeed, HHS produced approximately 925 documents (260
pages of which contained redactions of personal information pursuant to Exemptions (b)(4) and (b)(6)), thereby demonstrating that HHS searched the appropriate offices for responsive documents. Inasmuch as the Commonwealth has failed to provide any rebuttal evidence showing the searches were not conducted in good faith, the Court finds HHS has met its burden regarding the adequacy of the search. Therefore, the Court finds that HHS is entitled to summary judgment with regard to the adequacy of the search.

FN28. The Court finds no merit to the Commonwealth's argument that HHS's failure to specifically identify the names of the employees and/or staff who maintained individual files and to indicate whether these particular files were searched precludes the Commonwealth from a meaningful opportunity to contest the adequacy of the search. HHS provided the Commonwealth with approximately 925 pages of documents. Certainly, the Commonwealth has had an adequate opportunity to review these documents and determine whether there appear to be any missing documents from individuals with whom the Commonwealth has dealt with regard to the Title IV-E audits and which the Commonwealth has reason to believe exist and were not produced. Yet, in its submissions to this Court, the Commonwealth does not identify any individuals whose records appear to be missing. Accordingly, the Commonwealth's argument amounts to nothing more than speculation as to what types of records might theoretically exist based on its prior dealings with HHS, rather than on any actual evidence of overlooked materials. Such speculation is insufficient to raise an issue of material fact with regard to the adequacy of the search.

2. Reasonably Segregable Factual Material

*15 The Commonwealth also challenges the adequacy of HHS's proof in support of its statement that it has released all reasonably segregable factual information. First, the Commonwealth argues that HHS's declarations and Vaughn indices are legally deficient with regard to the required factual details and explanation necessary to show that all reasonably segregable factual information has been released. In support of this argument, the Commonwealth cites Krikorian v. Dep't of State, 984 F.2d 461, 466-67 (D.C.Cir.1993), and Rugerio v. U.S. Dep't of Justice, 257 F.3d 534, 553 (6th Cir.2001). Second, the Commonwealth offers evidence of bad faith on the part of HHS with regard to segregability by pointing to one of the withheld pages for which HHS is claiming an exemption under 5 U.S.C. § 552(b)(5), but which the Commonwealth obtained outside the FOIA request, i.e., Bate-stamped page no. 545. With regard to page no. 545, the Commonwealth argues that there are non-exempt portions of that page which reasonably could have and should have been segregable from the exempt portion and therefore disclosed. HHS counters that based on the supplemental declaration of Robert Eckert and its Vaughn indices, it has conducted a satisfactory segregability analysis and released all segregable factual material. For the reasons set forth below, the Court finds the Commonwealth's arguments have substantial merit and recommends summary judgment be denied on this issue.

HHS also has the burden of demonstrating that it has released all reasonably segregable portions of each of the withheld documents or portions of documents, or providing a factual recitation as to why certain materials are not reasonably segregable. Davin, 60 F.3d at 1052 (citing 5 U.S.C. § 552(a)(4)(B)). Because the emphasis of FOIA is on information rather than documents, an agency cannot base withholding an entire document or page of information simply on a showing that it contains some exempt material. Mead Data Central, Inc. v. U.S. Dep't of Air Force, 566 F.2d at 242, 269 (D.C.Cir.1977) (emphasis added). In 1974, Congress amended FOIA to specifically incorporate this requirement. See 5 U.S.C. § 552(b).
FN29. Section 552(b) states in relevant part:

"Any reasonably segregable portion of a record shall be provided to any person requesting such record after deletion of the portions which are exempt under [§ 552(b)]."

In determining whether the agency has satisfied its burden on segregability, the court must narrowly construe the exemptions with the focus on disclosure. Davin, 60 F.3d at 1052 (citing Wightman v. Bureau of Alcohol, Tobacco & Firearms, 755 F.2d 979, 982 (1st Cir.1985)). A conclusory statement to the effect that the agency has provided the requestor with all reasonably segregable portions of the non-exempt information, without any supporting justification, will not satisfy the agency's burden regarding segregability on summary judgment. Davin, 60 F.3d at 1052; Mead Data Central, 566 F.2d at 261. Rather, the agency must provide a detailed justification for its decision that non-exempt material is not segregable, which includes a description of "what proportion of the information in a document is non-exempt and how that material is dispersed throughout the document." Mead Data Central, 566 F.2d at 261 (footnote omitted). In determining whether the agency has satisfied its burden of proof regarding segregability, the Court of Appeals in Davin required the agency to "describe the process by which [it] determined that all reasonably segregable material of each of the withheld documents or portions of documents had been released" and to "provide a factual recitation of why certain materials [were] not reasonably segregable." Davin, 60 F.3d at 1052. The Court of Appeals rejected as wholly conclusory a declaration that was "comprised of assertions that documents were withheld because they contain the type of information generally protected by a particular exemption." Id.

*16 Moreover, it is of no moment for the agency to argue that this process will cause it to incur significantly increased costs. As the Court of Appeals explained in Mead Data Central, these "burdens may be avoided at the option of the agency ... by immediate disclosure." 566 F.2d at 261. The Court of Appeals further opined:

Requiring a detailed justification for an agency's decision that non-exempt material is not segregable will not only cause the agency to reflect on the need for secrecy and improve the adversarial position of FOIA plaintiffs, but it will also enable the courts to conduct their review on an open record and avoid routine reliance on in camera inspection. It is neither consistent with the FOIA nor a wise use of judicial resources to rely on in camera review of documents as the principal tool for review of segregability disputes. See Vaughn I, supra, 484 F.2d at 825-26. If an agency has provided the description and justification suggested by this opinion, a district court need not conduct its own in camera search for segregable non-exempt information unless the agency response is vague, its claims too sweeping, or there is a reason to suspect bad faith. Weissman v. CIA I, 565 F.2d 692, at 697-698 (D.C.Cir.) 1977.

Mead Data Central, 566 F.2d at 216-62 (footnotes omitted).

In the case at bar, the only declaration submitted initially by HHS to satisfy its burden of proving that all reasonably segregable, non-exempt material was released is that of Robert Eckert (Eckert Decl. I). FN30 At the end of his first declaration, Eckert states in conclusory fashion that "[a]ll reasonably segregable, non-exempt information has been released. For records withheld in their entirety, there was no reasonably segregable, non-exempt information." (Eckert Decl. I at ¶ 20.) In response to the Commonwealth's argument in opposition that such a conclusory statement without any explanation is insufficient to satisfy its burden, HHS filed the supplemental declaration of Robert Eckert dated June 19, 2006 ("Eckert Decl. II") (attached as Exhibit L to HHS's Reply Memorandum in Support of its Motion for Summary Judgment and in Opposition to Plaintiff's Rule 56(f) Motion) (Doc. No. 17)). In his supplemental declaration, Eckert states that he evaluated "each individual piece of information with careful consideration to determine segregability." (Eckert Decl. II at ¶ 5.) In this regard, Eckert further stated:

FN30. HHS also provided the declarations of Michael Leonard (Exhibit H) and Richard Stern (Exhibit I) in support of its motion for summary judgment with regard to its decision to withhold approximately 202 pages.
of responsive documents. However, neither of these declarations addresses the decision-making process and/or justification for finding that "[a]ll reasonably segregable, non-exempt information has been released. For records withheld in their entirety, there was no reasonably segregable, non-exempt information."

Documents were withheld in full either because all the information contained in the documents was exempt from disclosure or the redaction of exempt material would have left only mere templates or unintelligible or meaningless words and phrases because such non-exempt information was so inextricably intertwined with exempt material. For example, in some instances, what would remain after the redaction of the exempt information would have little or no value, amounting to barely more than the date of the draft or the email transmitting such draft and the names of the parties and the subject line-all information contained in the Vaughn index. In other instances, the withheld material contains confidential communications including facts and materials submitted in confidence to an attorney for purposes of seeking legal advice. In still other instances, the withheld material contains attorney work-product, including both factual and deliberative material, prepared in reasonable anticipation of litigation.

*17 Eckert Decl. II at ¶ 6. Finally, regarding Bates-stamped page no. 545 which HHS withheld in its entirety but which the Commonwealth was able to obtain outside of the FOIA request, Eckert stated that he made the determination to withhold page no. 545 under the deliberative process privilege of Exemption (b)(5), and still maintains that page no. 545 is exempt as deliberative, even after learning that the Commonwealth possessed a copy of that page. (Id. at ¶ 7.) Eckert disclaimed any prior knowledge that the Commonwealth possessed page no. 545 or how the Commonwealth came to possess it. (Id.)

The Court finds that HHS’s supporting evidence is woefully inadequate on segregability. First of all, the explanation of Robert Eckert paints with too broad a brush—he speaks in general terms, without any identification of the specific pages to which the explanation is said to apply. This approach was specifically rejected by the Courts of Appeals in Mead Data Central and Davin, supra. In addition, for each page withheld in its entirety, HHS fails to provide a factual recitation as to why the information on that page was not reasonably segregable.

Second, the required explanation also cannot be found in the Vaughn indices provided by HHS, despite HHS’s representation that its Vaughn indices “specify in detail which portions of the documents are discloseable and which are exempt.” See Reply Mem. in Supp. of Dfs.’ Mot. for Summ. J. & Opp’n to Pl.’s Rule 56(f) Mot. at 8. The “Bases for Exemption” set forth in the Vaughn Index assert that the documents were withheld because they contain the type of information generally protected by a particular exemption and, in some instances, provide additional detail regarding the contents of the documents to support application of the privilege claimed. However, none of the “Bases for Exemption” offers any explanation or description of how it was determined that all reasonably segregable, non-exempt portions of the documents were released, or that there was no reasonably segregable, non-exempt information.

HHS counters that under the attorney work-product privilege and attorney-client privilege, the release of segregable factual information is not required, and cites in support of this argument, Commonwealth of PA., 623 F.Supp. at 307 (release of segregable factual information is not required with regard to material appropriately withheld under the attorney work-product privilege). While that may be an accurate statement of the law, HHS must first demonstrate the applicability of the attorney work-product privilege under Exemption (b)(5) to the withheld pages in this case. As explained below, HHS has failed to satisfy its burden of proof in claiming the attorney work-product privilege. Accordingly, to the extent HHS has rested its segregability analysis on the attorney work-product privilege, its analysis is likewise flawed.

Third and finally, the Commonwealth has presented actual evidence of bad faith on the part of HHS relative to segregability. In this regard, the Commonwealth argues that the first paragraph on page no. 545

contains obviously segregable, factual background material that was withheld without justification or explanation. Although the Vaughn Index describes page no. 545 as containing predecisional opinions and strategy, the Commonwealth submits that in actuality, the page communicates the fact that the Commonwealth rejected a settlement offer, and that OAS “may initiate completion of the review that began in 2000, pursuant to the agreement between ACF and the Office of the Inspector General....” See Pl.'s Br. in Opp'n to HHS Mot. for Summ. J. & in Supp. of its Rule 56(f) Mot. at 18 (quoting Vaughn Index of Withheld Documents from HHS Release Dated Jan. 5, 2006 for Case Nos. 2005-1000RE and 2005-951MB at 18 (attached as Ex. 9 to Eckert Decl. I).) The Commonwealth contends that this page is clearly a non-exempt, post-decisional document that communicates a decision to another HHS component, and therefore, neither the claimed exemption nor the description in the Vaughn Index are supportable.

The Court finds that the Commonwealth's point regarding page no. 545 is well-taken. An examination of page no. 545 reveals that the first paragraph does indeed contain segregable, non-exempt, factual background information that does not involve predecisional opinions and strategy, as does the third paragraph. Moreover, this factual information does not appear to be inextricably intertwined with exempt material, nor does it reveal the deliberative process within ACF, OAS, or OIG. Accordingly, at the very least, the first and third paragraphs of page no. 545 should have been released as segregable, non-exempt factual information.

The fact that HHS still maintains that page no. 545 is exempt in its entirety as deliberative, after receiving the Commonwealth's challenge, is troublesome.

In this case, the claimed exemption for the 196 pages of responsive materials in dispute is Exemption (b)(5) of FOIA, which allows a government agency to withhold responsive records to a FOIA request that consist of “inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency[.]” Jordan v. U.S. Dep't of Justice, 591 F.2d 753, 772 (D.C.Cir.1978), overruled in part on other grounds in Crooker v. Bureau of ATF, 670 F.2d 1051 (D.C.Cir.1981) (en banc)). This exemption has been construed to encompass three privileges: the deliberative process privilege, the attorney work-product privilege, and the attorney-client privilege on grounds of confidentiality.
torney-client privilege. See *EPA v. Mink*, 410 U.S. 73, 85-90, 93 S.Ct. 827, 35 L.Ed.2d 119 (1973) (deliberative process privilege); *NLRB v. Sears, Roebuck & Co.*, 421 U.S. 132, 154, 95 S.Ct. 1504, 44 L.Ed.2d 29 (1975) (attorney work-product privilege); and *Mead Data Central*, 566 F.2d at 252-55 (attorney-client privilege). All three of these privileges have been asserted by HHS in this case.

FN35. HHS claims the deliberative process privilege as to all 202 withheld pages, and for 104 of these pages, it is also claiming the attorney-client privilege; it is also claiming the attorney-work product privilege for 133 of the 202 withheld pages.

In support of its motion for summary judgment on the issue of withholding under Exemption (b)(5), HHS argues that it has provided sufficient descriptions for each withholding in its *Vaughn* indices to satisfy its burden on summary judgment to show that the documents or information are exempt from disclosure under Exemption (b)(5). HHS further argues that paragraphs 18 and 19 of Eckert's first declaration, as well as the declarations of Stern and Leonard, underscore that the documents withheld under Exemption (b)(5) generally consisted of drafts, predecisional advice, recommendations, suggestions, opinions, as well as confidential attorney-client communications and attorney work-product concerning an audit of Pennsylvania's foster care program, and therefore, HHS has demonstrated that it reasonably withheld the challenged documents under FOIA Exemption (b)(5).

*19 The Commonwealth disputes that the *Vaughn* indices and declarations submitted by HHS provide sufficient detail to support the claimed privileges and therefore argues HHS has failed to carry its burden to entitle it to summary judgment on this issue.

The Attorney-Client Privilege

The attorney-client privilege is intended to protect "only those disclosures necessary to obtain informed legal advice which might not have been made absent the privilege." *Coastal States Gas Corp.*, 617 F.2d at 862-63 (quoting *Fisher v. United States*, 425 U.S. 391, 403, 96 S.Ct. 1569, 48 L.Ed.2d 39 (1976)).

The purpose behind this privilege is to encourage a relationship of trust and free discussion between attorneys and their clients. *Id. at 862; Mead Data Central*, 566 F.2d at 253. Therefore, the application of this privilege is not restricted to communications that are made in relation to litigation or to a particular dispute, but extends to all situations in which an attorney's counsel is sought on a legal matter. *Coastal States Gas Corp.*, 617 F.2d at 862. However, a fundamental prerequisite to assertion of the privilege is the demonstration of "confidentiality both at the time of the communication and maintained since. The burden is on the agency to demonstrate that confidentiality was expected in the handling of these communications, and that it was reasonably careful to keep this confidential information protected from general disclosure." *Id. at 863.* The test applied by the courts in determining confidentiality is "whether the agency is able to demonstrate that the documents, and therefore the confidential information contained therein, were circulated no further than among those members "of the organization who are authorized to speak or act for the organization in relation to the subject matter of the communication." *Id. (quoting Mead Data Central, 566 F.2d at 253 n. 24).* "If the information has been or is later shared with third parties, the privilege does not apply." *Mead Data Central*, 566 F.2d at 253 (footnote omitted).

FN36. There is no question that this privilege applies to agency attorneys and their clients, i.e., the agencies. See, e.g., *Coastal States Gas Corp.*, 617 F.2d at 863; *Mead Data Central*, 566 F.2d at 252.

One of the measures used to determine confidentiality is the degree of care exhibited in the handling of
the documents. Coastal States, 617 F.2d at 864. In this regard, the courts should ask what evidence exists to indicate that the person requesting the advice from the agency attorney had any expectation of confidentiality. Id. In Coastal States, the court of appeals found there was no evidence in the record from which it could conclude that there was any expectation of confidentiality. In support of its conclusion, the court of appeals noted the agency failed to establish that some attempt had been made to limit disclosure of the confidential documents to appropriate agency personnel, or that it made any attempt at all to protect the confidential communications within the agency, as the agency admitted that it did not know who had access to the documents, and undisputed testimony existed to the effect that in some regions copies of the memoranda were circulated to all area offices, filed and indexed for future reference, relied on as precedent, and used as training materials for new personnel. Id. at 863-64.

*20 In a prior FOIA case between the same parties to the instant litigation, the district court found that HHS failed to establish the confidentiality of the documents for which it was claiming nondisclosure under the attorney-client privilege. In the 1985 case between the Commonwealth and HHS, HHS provided a Vaughn index and two affidavits in support of its claimed exemptions for withholding fifteen documents. 623 F.Supp. at 305. The Vaughn index in the 1985 case set forth the date, author, recipient, subject matter, length of each document, the circumstances of its preparation, and the exemptions being claimed. The affidavits of two agency attorneys provided greater detail regarding the preparation of the withheld documents, 11 out of 15 of which were claimed to have been generated in preparation for litigation before the Grant Appeals Board. Although the district court found that given the detail of its affidavits and Vaughn index, HHS met its burden of providing the Commonwealth with sufficient information to effectively challenge the claimed exemptions for 15 documents, the court nonetheless concluded that HHS had not met its burden of proving the application of the attorney-client privilege to 8 of the withheld documents. Id. at 305-06. The district court found that at best, the Vaughn index and affidavits showed only that documents 2-9 were intended to be confidential at the time they were made. Id. The district court found lacking any assertion or proof that the matter discussed in the documents remained confidential at the present time, "or that the documents were circulated only to those in the agency authorized to speak or act for the agency on the subject matter of the communications." Id. at 306.

In the present action, HHS asserts the attorney-client privilege for 104 of the 196 withheld pages, and in support thereof, offers the explanations contained in its Vaughn indices supplemented by the declarations of Michael Leonard and Richard Stern. In its Vaughn indices, HHS states as the basis for claiming the attorney-client privilege, for almost all of the pages withheld under this privilege, that "in addition," or "further," or "moreover," "the withheld material contains confidential attorney-client communications." This is the only explanation provided in the Vaughn indices for 81 of the pages withheld under the attorney-client privilege. These 81 pages contain the following Bate-stamp page numbers: 490-91, 499, 500-06, 512, 529, 530, 533, 542, 831, 832, 839, 84-85, 89-90, 92-93, 97, 99-100, 101-02, 103, 104-05, 205-06, 209-11, 212-15, 223-24, 241, 242, 243, 248, 249-50, 251, 252-53, 254-55, 256-57, 258-59, 260-61, 262-64, 265, 266-67, 268, 269, 270-71, 280-84, 287-88, 292, and 465. In its opening memorandum of law in support of its motion for summary judgment ("HHS's opening memorandum"), HHS includes Bate-stamp page nos. 496, 556, 557, and

833 in the list of pages withheld under the attorney-client privilege. (Doc. No. 9 at page 25) However, an examination of the Vaughn indices reveals that the only claimed privilege for page nos. 496, 556, 557, and 833 is the deliberative process privilege. In addition, page nos. 233-35 are not included in HHS's list in its opening memorandum because these pages were added by the Commonwealth in its June 2, 2006 submission which post-dates the filing of HHS's opening memorandum.

FN38. Although the Vaughn indices do list the author and recipients of the documents (in most instances), the Court has no way of knowing if these individuals are authorized to act or speak on behalf of the agency on the subject matter of the communication.

For Bate-stamp page numbers 538, 539, 837, 838, and 112, the only explanation given by HHS in its Vaughn indices is “In addition, the withheld material contains confidential attorney-client communications pertaining to a legal matter for which client has sought professional advice.” For three (3) pages, Bate-stamp page nos. 233-35, no explanation is given in the Vaughn index, other than the initial claim that the “withheld material is protected by the ... attorney-client privilege...” Again, these explanations alone are clearly insufficient to establish confidentiality.

*21 For 15 of the withheld pages under this privilege, Bate-stamp page nos. 526-28, 584-86, 274-76, 277-79, and 289-91, HHS provides the same statement as provided for the above 81 pages, but also adds that “The document is clearly marked as ‘CONFIDENTIAL-ATTORNEY/CLIENT PRIVILEGED MEMORANDUM.’” While such a designation on the pages demonstrates the existence of an expectation of confidentiality, it still falls short of the required showing. Just because a document is designated as “CONFIDENTIAL-ATTORNEY/CLIENT PRIVILEGED” does not mean that the Court can assume that the information contained therein was continually maintained as such. HHS asks this Court to make too great of a leap, especially since it bears the burden of proving that the claimed privilege applies.

HHS must meet this burden by providing evidence, either through affidavit or some other means, that established that the particular confidential materials have not been circulated beyond those authorized to speak on its behalf on the subject matter contained in the communication.

The Declaration of Michael Leonard (“Leonard Decl.”) fails to add anything to support the application of the attorney-client privilege. Leonard is an attorney in Region III of the Office of the General Counsel (OGC) of HHS and he either authored or received nine (9) of the pages withheld by HHS. (Leonard Decl. at ¶1, 5.) Leonard addresses the attorney-client privilege claimed for seven (7) of these pages, Bate-stamp page numbers 490-91, 529, 530, and 262-64, in his declaration. However, he does not provide any more information or explanation regarding page numbers 529, 530, and 262-64, than that already contained in the Vaughn indices. (Leonard Decl. at ¶10-12.) For page nos. 490-91, Leonard adds only that he provided input into the draft letter and advice to HHS employees concerning the letter. (Id. at ¶7.) Leonard's declaration is completely devoid of any proof that there was an expectation of confidentiality or that the materials containing the confidential information were circulated no further than among the employees of HHS who are authorized to speak or act on behalf of it in relation to the subject matter of the communication.

Likewise, the Declaration of Richard Stern (“Stern Decl.”) does not add significantly to the explanations provided in the Vaughn indices for the attorney-client privilege. Stern is an attorney in the OCIG of the OIG of HHS, and he either authored or received 85 of the pages withheld by HHS. (Stern Decl. at ¶¶1, 4-5.) Sixty (60) of these pages were withheld on the basis of the attorney-client privilege. For the following Bate-stamp page numbers, Stern stated merely that the pages contain a confidential exchange of emails between himself and agency attorneys and employees concerning either a draft document to the Commonwealth of Pennsylvania, or an audit of Pennsylvania's Title IV-E Foster Care Program or the Title IV-E audit: 490-91, 831, 832, 84-85, 90-90, 92-93, 101-02, 103, 241, 249-50, 251, 252-53, 254-55, 256-57, 258-59, 260-61, 262-64, 265, 266-67, 268, 269,
270-71, and 292. (Id. at ¶8, 9-11, 14, 16, 21-22, 32, 35-48.) Stern's explanation is simply a reiteration of that given in the Vaughn indices. For Bate-stamp page numbers 500-06, 104-05, 112, 209-11, 212-15, 223-24, 242, and 243, Stern stated that the pages contain a confidential legal memorandum, prepared by him to agency attorneys and/or employees regarding the audit of Pennsylvania's foster care claims or its Title IV-E program. (Id. at ¶91 8, 23-24, 29-31, 33.) Again, Stern's explanation adds nothing to the Vaughn indices. Finally, Stern stated that Bate-stamp page numbers 99-100 contain a confidential exchange of emails between himself and an agency attorney and agency employees regarding Title IV-E regulations. (Id. at ¶ 20.) Stern's explanation is simply a reiteration of that given in the Vaughn indices. However, at the end of his declaration, Stern makes the following statement with regard to all of the pages he authored or received:

*22 The documents at issue contain confidential communications from OIG to me as OIG's attorney and vice versa, for the purpose of advising and assisting OIG, and in a few instances, their HHS partner in these activities, ACF, with legal issues. My advice in these communications was advisory in nature and did not represent statements of agency policy or the final agency decision on a particular matter. OIG attorneys provide options and advice to OIG, which the agency can choose to adopt or not, depending on both legal consequences and other policy considerations. Moreover, both the attorneys and clients who received these communications had a clear expectation that they would remain confidential. Indeed, all e-mail communications from the Office of Counsel to the Inspector General include a warning that they contain information protected by the attorney-client, attorney work product, deliberative process, or other privilege, or protected by Federal confidentiality laws.

Id. at ¶ 49 (emphasis added). Based on Stern's statement in paragraph 49, HHS has offered some evidence of an expectation of confidentiality. However, this offer of proof still falls short of the mark. Despite his statement that all e-mail communications from the Office of Counsel to the Inspector General contain a warning that the information contained therein is protected by various privileges, there is no indication in the Vaughn indices that this warning appears on the emails. FN39 Moreover, most law firms and corporate and government legal departments include this warning on all of their emails as a matter of course. That does not mean, however, that all of the information contained in those emails is confidential, or has continued to remain confidential. At best, Stern's declaration establishes an expectation of confidentiality at the time the document was drafted, but as explained earlier, this alone is not enough to carry HHS's burden. It is clear from the above case law that HHS must also establish that the pages for which it is claiming the attorney-client privilege were not circulated to any persons not authorized to speak on its behalf regarding the subject matter or to third parties. Currently, there is nothing in the record that allows the Court to make this conclusion.

Since HHS bears the burden of proof on the application of a claimed exemption and it has failed to do so based on the attorney-client privilege, HHS will not be entitled to summary judgment on its withholding of the 104 pages unless it demonstrates that these within Exemption (b)(5) for some other reason. FN40

FN40. A great deal of overlap exists between the attorney-client privilege and the deliberative process privilege of Exemption (b)(5), with respect to materials containing legal opinions and advice. Mead Data Central, 566 F.2d at 254 n. 28. However, these two privileges are distinct in that the "attorney-client privilege permits nondisclosure of an attorney's opinion or advice in order to protect the secrecy of the underlying facts, while the deliberative process privilege directly protects advice and opinions and does not permit the nondisclosure of underlying facts unless they would indirectly reveal the advice, opinions, and evaluations circulated within the agency as part
of its decision-making process." Id. (emphasis added). Moreover, the courts have held that if withheld materials are exempt only based on the deliberative process privilege, the agency is required to describe the factual content of the materials and disclose it or provide an adequate justification for concluding that it is not segregable from the exempt portions of the materials. Id.

Attorney Work-Product Privilege

HHS also asserts the attorney work-product privilege as a basis for withholding 133 pages of responsive material. FN41 This privilege "protects disclosure of materials prepared by attorneys, or non-attorneys supervised by attorneys, in contemplation of litigation, that reveal information about an attorney's preparation and strategy relating to a client's case." Judicial Watch, Inc. v. U.S. Postal Serv., 297 F.Supp.2d 252, 268 (D.D.C.2004) (citing Coastal States, 617 F.2d at 866); Wilderness Society v. U.S. Dep't of Interior, 344 F.Supp.2d 1, 17 (D.D.C.2004) (citing Judicial Watch, supra ). The purpose of the attorney work product privilege is to provide "a working attorney with a 'zone of privacy' within which to think, plan weigh facts and evidence, candidly evaluate a clients case, and prepare legal theories." Coastal States, 617 F.2d at 864. Moreover, factual information in attorney work-product will also be protected unless the requesting party can demonstrate a substantial need for the material and an inability to obtain it without suffering undue hardship. Judicial Watch, 297 F.Supp.2d at 268 (citing Fed.R.Civ.P. 26(b)(3); Putnam v. U.S. Dep't of Justice, 873 F Supp. 705, 711 n. 4 (D.D.C.1995)). "The work-product privilege can be waived, however, if the work product is disclosed to a third party who does not share a 'common interest in developing legal theories and analyses of documents' with the primary party." Id. (quoting In re Sealed Case, 676 F.2d 793, 817 (D.C.Cir.1981)) (other citations omitted).

*23 The cornerstone of this privilege is that the documents were prepared in anticipation of litigation. Id. (citing Jordan, 591 F.2d at 775) (emphasis added). Therefore, the attorney work product privilege may only be invoked to exempt those documents prepared in anticipation of litigation, and not "'every written document generated by an attorney.'" Judicial Watch, 297 F.Supp.2d at 268 (quoting Senate of the Commw. of Puerto Rico v. U.S. Dept of Justice, 823 F.2d 574, 586 (D.C.Cir.1987)). The agency's burden of proving application of the attorney work-product privilege is two-fold: The agency must (1) show that the "documents must at least have been prepared with a specific claim supported by concrete facts which would likely lead to litigation in mind," Coastal States, 617 F.2d at 865, and (2) "provide some indication whether the documents have been shared with third parties, which would amount to a waiver of the privilege," Wilderness Society, 344 F.Supp.2d at 17 (citing Judicial Watch, 297 F.Supp.2d at 268). As to the first requirement, there must be some "indication in the Vaughn index or affidavits that there was even the dimmest expectation of litigation when the [ ] documents were drafted," Coastal States, 617 F.2d at 865 (emphasis added).

FN42 The district court in Judicial Watch explained that in a normal, adversarial proceeding in which the parties are presumed to have equal access to the facts, on a waiver of privilege claim, the party asserting waiver would have the burden of proving that the privilege had been waived. However, in a FOIA case, where the agency possesses almost exclusive access to the facts, the court has required the agency to prove that it has not waived the privilege because the requester is not in a position to disprove it. 297 F.Supp.2d at 269 (citing King v. U.S.
In *Judicial Watch, Wilderness Society, and King*, the courts refused to allow the agencies to withhold documents pursuant to the attorney work product privilege because in all three cases, the agencies failed to provide the courts with sufficient facts, in either their affidavits or *Vaughn* indices, to allow the courts to conclude that specific claims had arisen and were likely to be pursued to the point of litigation by the agency.

Similarly, in the case at bar, HHS fails to provide both the court and the Commonwealth with sufficient facts in either its declarations or *Vaughn* indices to determine whether the work product privilege applies to each of the claimed 133 pages. Indeed, the *Vaughn* indices for the 133 pages withheld pursuant to the attorney work product privilege state merely that the "withheld material is an intra-agency memorandum containing predecisional analysis and opinions concerning the audit of Pennsylvania's Title IV-E program ... [and] contains confidential ... attorney work-product, prepared in reasonable anticipation of litigation or administrative proceedings between HHS and Pennsylvania." This explanation is stated for each of the 133 pages claimed as exempt under the attorney work product privilege. In addition, the declarations of Michael Leonard and Richard Stern fail to provide the necessary detail for the court to determine that these pages were drafted in anticipation of litigation. As to establishing this requirement, both declarations are utterly devoid of detail, stating only that "[t]he documents at issue were either obtained or prepared in contemplation of litigation with the Commonwealth of Pennsylvania concerning an audit of Pennsylvania's Title IV-E program." Stern Decl. at ¶ 52; Leonard Decl. at ¶ 16. Stern goes on to state that "[i]ndeed, a large majority of the documents reflect [his] own legal opinions and mental processes prepared in anticipation of the very litigation that Pennsylvania has initiated in [Commw. of PA Dept' of Public Welfare v. United States, U.S. Dept' of Health & Human Serv., C.A. No. 05-1345 (W.D.Pa.)]." Stern Decl. at ¶ 52. However, what Mr. Stern and HHS have failed to realize is that they have provided no factual basis for the Court to make the giant leap they suggest between the dates the documents were created (many of which occurred in 2000), and the litigation filed in 2005 as to how those documents could have been prepared in anticipation of litigation when the litigation was not filed, in many instances, until 5 years later.

*24 There is no indication at the time the particular document was drafted what claims or litigation were anticipated, especially since there may have been numerous audits of Pennsylvania's Title IV-E programs since 1997, and it is not clear whether every audit resulted in some sort of claim, administrative proceeding, or federal court case. For each document or page claimed as exempt under the attorney work-product privilege, HHS must identify the particular audit (by date or some other basis) which it anticipated would result in litigation (including an administrative proceeding), and specifically identify the administrative proceeding and/or federal court case which resulted, if any. In addition, HHS provides no indication of whether the documents have been shared with third parties and, therefore, whether the privilege has been waived. For example, if agency attorneys prepared any of these documents in response to litigation, and had filed substantially similar material with a court or other administrative body such that they were publicly available, HHS would have waived the privilege.

For these reasons, HHS has failed to satisfy its burden of proving that the 133 pages are exempt from disclosure pursuant to the attorney work-product privilege. Therefore, unless HHS demonstrates that these documents fall within Exemption (b)(5) under the deliberative process privilege, the Court will not be able to find that HHS is entitled to summary judgment in its favor on the withheld documents.

**Deliberative Process Privilege**

HHS has invoked the deliberative process privilege of Exemption (b)(5) as the basis for withholding all of the pages challenged by the Commonwealth. This privilege "protects from disclosure documents reflecting advisory opinions, recommendations and deliberations comprising part of a process by which governmental decisions and policies are formulated."
In order to withhold documents under the deliberative process privilege, an agency must demonstrate that its decision is both (1) predecisional and (2) deliberative. Coastal States, 617 F.2d at 866; Wilderness Society, 344 F.Supp.2d at 10 (citing Nat’l Ass’n of Home Builders v. Norton, 309 F.3d 26, 39 (D.C.Cir.2002); Judicial Watch, 297 F.Supp.2d at 259 (citations omitted). “A document is predecisional if it was ‘prepared in order to assist an agency decision-maker in arriving at his decision,’ rather than to support a decision already made.” Wilderness Society, 344 F.Supp.2d at 10 (quoting Petroleum Info. Corp. v. U.S. Dep’t of Interior, 976 F.2d 1429, 1434 (D.C.Cir.1992)(other citation omitted)). In other words, a predecisional document is one that is “‘antecedent to the adoption of agency policy.’” Judicial Watch, 297 F.Supp.2d at 259 (quoting Jordan, 591 F.2d at 774). An agency will satisfy its burden as to the predecisional requirement if it “pinpoints[s] an agency decision or policy to which the document contributed,” Senate of Puerto Rico, 823 F.2d at 585, or “identif[i]es a decision-making process to which a document contributed,” Judicial Watch, 297 F.Supp.2d at 259 (citation omitted).

As to the second requirement, that the document be deliberative, the agency must show that the document is “‘a direct part of the deliberative process in that it makes recommendations or expresses opinions on legal or policy matters.”’ Wilderness Society, 344 F.Supp.2d at 11 (quoting Vaughn v. Rosen, 523 F.2d 1136, 1144 (D.C.Cir.1975)) (“Vaughn II”); Judicial Watch, 297 F.Supp.2d at 259 (citing same). The deliberative document “must reflect the ‘give-and-take of the consultative process.’” Wilderness Society, 344 F.Supp.2d at 11 (quoting Senate of Puerto Rico, 823 F.2d at 585). “In determining whether the deliberative process privilege should apply to a particular document, courts often look at “the nature of the decision making authority vested in the officer or person issuing the disputed document,’ and the relative position in the agency’s ‘chain of command’ occupied by the document’s author and recipient.”’ Id. (quoting Animal Legal Defense Fund, Inc. v. Dep’t of Air Force, 44 F.Supp.2d 295, 301 (D.D.C.1999)). In this regard, generally employee to supervisor correspondence is more likely than other intra-agency communications to be exempt under the deliberative process privilege. Judicial Watch, 297 F.Supp.2d at 264 (citing Access Reports v. Dep’t of Justice, 976 F.2d 1192, 1195 (D.C.Cir.1991)) (“A document from a junior to a senior is likely to reflect his or her own subjective opinions .... By contrast, one moving from senior to junior is far more likely to manifest decisionmaking authority and to be the denouement of the decisionmaking rather than part of itsgive and take.”) (citing Senate of Puerto Rico, 823 F.2d at 586; Coastal States, 617 F.2d at 868). Also, simply because a document has been designated as a “draft” does not automatically entitle the agency to withhold it based on the deliberative process privilege. Wilderness Society, 344 F.Supp.2d at 14 (citing Arthur Andersen & Co. v. I.R.S., 679 F.2d 254, 257 (D.C.Cir.1982)). For each document designated as a “draft,” the agency must indicate whether the “draft” was “‘(1) adopted formally or informally, as the agency position on an issue; or (2) ‘used by the agency in its dealings with the public.’” Id. (quoting
*26 Generally, factual information contained in a document which is withheld pursuant to the deliberative process privilege must be disclosed. Judicial Watch, 297 F.Supp.2d at 261.

J udicial Watch, 297 F.Supp.2d at 261 (citing Petroleum Info. Corp., 976 F.2d at 1434; Mead Data Central, 566 F.2d at 256). However, where the factual material may expose the policy judgments or reasoning of the author, and therefore the deliberative process of the agency, the factual information will also be exempt. Id. at 262 (citing Mead Data Central, 566 F.2d at 256; Mapother v. Dep't of Justice, 3 F.3d 1533, 1539 (D.C.Cir.1993); Petroleum Info. Corp., 976 F.2d at 1437-38); Wilderness Society, 344 F.Supp.2d at 14.

In the latter instance, the agency must provide the required justification for not releasing segregable factual information as outlined in Part 2 above.

In addition, the Court of Appeals for the District of Columbia has repeatedly emphasized that an agency will not satisfy its burden of establishing its right to withhold records with a conclusory assertion of privilege. Id. (citing Senate of Puerto Rico, 823 F.2d at 585 (quoting Coastal States, 617 F.2d at 861)). Rather, "[t]he agency must identify the role of a contested document in a specific deliberative process, Coastal States, 617 F.2d at 868, in order to `show by specific and detailed proof that disclosure would defeat, rather than further, the purposes of the FOIA."

Judicial Watch, 297 F.Supp.2d at 259 (quoting Mead Data Central, 566 F.2d at 258) (other citations omitted). Moreover, "[s]ince the applicability of the deliberative process privilege depends on the content of each document and the role it plays in the decision-making process, an agency's affidavit must correlate facts in and about each withheld document with the elements of the privilege." Id. at 259-60 (citing Senate of Puerto Rico, 823 F.2d at 585; Coastal States, 617 F.2d at 866; Mead Data Central, 566 F.2d at 251); see also Wilderness Society, 344 F.Supp.2d at 14 (to qualify redacted and withheld documents as exempt under the deliberative process privilege, the agency must "identify the 'function and significance ... in the agency's decision making process' " of these documents (citing Arthur Andersen, 679 F.2d at 258)). "Without a sufficiently specific affidavit or Vaughn Index, a court cannot decide, one way or the other, a deliberative process privilege claim." Id. at 260 (citing Senate of Puerto Rico, 823 F.2d at 585) (other citation omitted).

In the case at bar, neither the Vaughn indices nor the declarations of Leonard and Stern provide sufficient detail to enable this Court to decide HHS's claim of deliberative process privilege. Although the explanations for many of the withheld pages state that the documents make recommendations or express opinions regarding legal or policy matters, the Vaughn indices and declarations fail to provide any details regarding the give-and-take and/or supervisor/employee relationship between the author and recipient(s) in all but a few entries. Moreover, none of the explanations identify the specific agency decision or policy to which a particular document contributed, or state what role the document played in the deliberative process. For example, the entry for Bate-stamp page no. 520 identifies a specific review-Pennsylvania's Title IV-E foster care program for federal fiscal years 1998, 1999 and 2000—but neglects to identify the agency decision to which the document contributes and/or the role the document played in the decision. As another example, most entries describe the subject matter of the documents as relating to either a Pennsylvania Title IV-E program, an audit of that program, or a proposed settlement agreement. Not only does this description fail to identify the particular audit or program under consideration, it fails to identify the specific agency decision and the date thereof to which the particular document contributed and the way it contributed. Certainly, more than one audit has been conducted or contemplated by HHS and/or OIG with regard to Pennsylvania since 1997, yet no distinction is made as to which audit a particular document referring. At the very least, HHS must identify the specific audit and/or program discussed in each withheld document, the particular agency decision to which the document contributed, and how the document contributed to it.

*27 Nor does HHS correlate any facts about the withheld material with the elements of the privilege. Rather, the explanation merely reiterates the required elements of the deliberative process privilege. For many of the entries, the author and/or recipient(s) are unknown, so that a particular individual cannot be
linked to a document. In this situation, "it becomes difficult if not impossible, to perceive how the disclosure of such documents would result in a chilling effect upon the open and frank exchange of opinions within the agency." Wilderness Society v. D.E.R., 344 F. Supp. 2d at 15 (quoting Ethyl Corp. v. U.S. E.P.A., 25 F.3d 1241, 1250 (4th Cir. 1994)). At the very least, HHS should provide information regarding the source of the documents' origination or the location where these documents were found, in order for the Court to assess what role, if any, a document played in the decision-making process.

In a few cases, where the document is described as a "draft," (see e.g., Bate-stamp page nos. 513-16), HHS states that the documents do not represent the final agency decision. But the documents still do not fall within the deliberative process privilege because they fail to articulate with the required detail any particular agency decision or correlate the facts with the elements of the privilege.

In order for HHS to prove it is entitled to withhold 196 pages of materials under the deliberative process privilege, it must show that each document is both predecisional and deliberative. However, on the current record, the Court cannot make a determination whether any of the entries challenged by the Commonwealth satisfy this test.

Accordingly, because HHS's Vaughn indices and declarations fail to provide sufficient detail to show that either the attorney-client privilege, attorney work-product privilege, or the deliberative process privilege applies to the withheld materials, the Court recommends that Defendants' motion for summary judgment on this issue be denied.

4. Policy Considerations

Finally, HHS argues that policy considerations also support granting summary judgment in its favor. In this regard, HHS accuses the Commonwealth of instituting the instant FOIA case with the sole purpose of conducting discovery in Civil Action No. 05-1345 (W.D.Pa.), thereby intentionally sidestepping the federal rules of discovery and this Court's instruction that discovery in Civil Action No. 05-1345 be stayed until the dispositive motions were resolved. See Reply Mem. in Supp. of Defs.' Mot. for Summ. J. & Opp'n to Pl.'s Rule 56(f) Mot. at 13. Such a tactic, according to HHS, is squarely against the spirit and purpose of FOIA, as explained by numerous courts, including the Supreme Court and Court of Appeals for the Third Circuit. FN43 HHS argues that essentially, these cases hold that FOIA was not intended to be a private discovery tool or to replace or supplement the discovery of litigants, but rather, is a public disclosure statute, fundamentally designed to inform the public about agency action, and not to benefit private litigants. Despite the express purpose of FOIA, HHS submits that counsel for the Commonwealth "has converted FOIA into his own personal discovery tool in an effort to avoid and/or supplement the Federal Rules of Civil Procedure." (Id. at 14.) HHS further argues that if every plaintiff in a civil action against the United States filed a corresponding FOIA case in order to sidestep the federal rules of discovery, the drain of resources on the government and the Court system would be immeasurable. HHS posits that the Commonwealth should not be permitted to continue misusing and abusing the FOIA.

FN43. NLRRB v. Robbins Tire & Rubber Co., 437 U.S. 214, 292, 98 S.Ct. 2311, 57 L.Ed.2d 159 (1978) ("The basic purpose of FOIA is to ensure an informed citizenry ... FOIA was not intended to be a private discovery tool"); Metex Corp. v. ACS Ind., Inc., 748 F.2d 150, 155 (3d Cir. 1984) (rejecting requester's argument that information requested is necessary to resolve underlying civil litigation as FOIA is public disclosure statute and not intended to replace or supplement discovery of private litigants); Newry Ltd. v. U.S. Customs & Border Prot. Bureau, No. Civ. A. 04-02110 HHK, 2005 WL 3273975, at *4 (D.D.C. July 29, 2005) (FOIA requesters' position as an entity whose merchandise was seized and the subject of administrative forfeiture proceeding had no bearing on its "right" to documents in question); Changzhou Laosan Group v. U.S. Customs & Border Prot. Bureau, No. Civ. A. 04-1919(EHS), 2005 WL 913268.

*28 The Commonwealth disputes this accusation, and submits that HHS's own practice manual provides that litigants are permitted to use FOIA during the pendency of litigation against the agency. See HHS Departmental Appeals Board Appellate Division-Practice Manual FAQ, which is posted on the internet at http://www.hhs.gov/dab/appellate/faq.html#25. Specifically, the Commonwealth points to the following frequently asked question and the agency's response thereto:

What is the relationship between discovery processes at the DAB and requests under the Freedom of Information Act (FOIA)? An appellant has a right to seek information from the Department under FOIA which is unaffected by the existence or use of DAB processes. FOIA and DAB processes sometimes intersect, as when an appellant has a pending FOIA request which the appellant anticipates will produce information to be used in DAB proceedings. To avoid delay and misunderstanding about the rights and obligations of the parties under the two separate processes, appellants are urged to ask the DAB to convene a telephone conference when a FOIA request related to the case is involved.

*29 The Court finds HHS's policy argument unpersuasive. The Court does not read the cases cited by HHS as authority for preventing a party to an administrative proceeding or a lawsuit from submitting a FOIA request for information that relates to the subject matter of those proceedings, nor does this authority prevent the agency from processing and responding to such a FOIA request. Rather, the cases cited by HHS support the proposition that a FOIA requester does not have a right to receive and examine documents just because the information may have some special significance to the requester but not to the public at large. Moreover, the Commonwealth posits that resort to FOIA is necessary due to the DAB's restrictive policies on discovery. *Id. Therefore, the Commonwealth asserts that it routinely files FOIA litigation early into any audit that is likely to be contested due to the lag time between presenting the FOIA request and receiving responsive documents, and that such practice is expressly permitted by HHS as indicated in its DAB practice manual.

As to the cases cited by HHS for the proposition that FOIA was not intended to be a private discovery tool, the Commonwealth acknowledges that FOIA was not designed to supplement the rules of civil discovery. The Commonwealth argues, nonetheless, that it is well established that a requester's rights are not diminished because of its status as a litigant, citing *NLRB v. Robbins Tire & Rubber Co., 437 U.S. 214, 242 n. 23, 98 S.Ct. 2311, 57 L.Ed.2d 159 (1978) (stating that a person's rights under FOIA are neither diminished nor enhanced by his "litigation-generated need" for agency documents), and *State of Maine v. U.S. Dept of the Interior, 298 F.3d 60, 66 (1st Cir. 2002). The Commonwealth further submits that the reasons that a person makes a request under FOIA are "simply not relevant to the merits of a FOIA request", *Solar Sources, Inc. v. United States, 142 F.3d 1033, 1039 n. 6 (7th Cir.1998), and that a plaintiff's rights in a FOIA case "do not depend on his or her identity", *North v. Walsh, 881 F.2d 1088, 1096 (D.C.Cir.1989). Thus, the Commonwealth contends it has a right to have its FOIA litigation decided independently of what happens in the case filed at docket no. 05-1345.
suggest that a plaintiff may not use FOIA to request information needed for an underlying civil case, nor does it suggest in any way that what the Commonwealth is doing here is an abuse or misuse of FOIA. As the district court observed in Inter Ocean Free Zone, Inc. v. U.S. Customs Serv., "[t]he identity of the FOIA requester and the requester's reasons for making the request have no bearing upon its entitlement to the information... what is given to one requester is what is available to all who make the same request." 982 F.Supp. 867, 871 (S.D.Fla.1997) (citing U.S. Dept of Justice v. Reporters Comm. for Freedom of Press. 489 U.S. 749, 771, 109 S.Ct. 1468, 103 L.Ed.2d 774 (1989)). That is all the Commonwealth can and is asking for here. "[FOIA's] sole concern is with what must be made public or not made public." Reporters Comm.. 489 U.S. at 772 (quoting Davis, The Information Act: A Preliminary Analysis, 34 U.Chi.L.Rev. 761, 765 (1966-67)) (other citation omitted). Thus, to the extent the Commonwealth's FOIA request seeks information that must be made available to the public, the Commonwealth has not abused or misused FOIA. For HHS to argue otherwise is disingenuous, especially in light of its own policy in the DAB practice manual. Indeed, HHS actually released approximately 925 pages of materials relating to the Pennsylvania's Title IV-E programs, some of which are at issue in Civil Action No. 05-1345, in response to the Commonwealth's FOIA requests in this case, which suggests, at the very least, that such "tactics" are permissible and not abusive.

Of course, Congress has built a safeguard into FOIA to protect agencies from having to disclose information that would contravene national security, privacy interests, law enforcement investigations, the attorney-client or work-product privileges, and deliberative process privilege, by enacting exemptions to FOIA's disclosure requirements. These exemptions ensure that FOIA requester, who also happens to be a private litigant, does not obtain information that is not discoverable in a lawsuit. Therefore, it cannot be said that the Commonwealth is abusing or misusing FOIA to obtain non-disclosable documents since these documents would be exempt under either the attorney-client, attorney work-product or deliberative process privileges, so long as sufficiently detailed affidavits and Vaughn indices have been provided by the agency to justify their non-disclosure. However, in this case, HHS has failed to meet its burden and would have this Court hold the Commonwealth responsible. That the Court will not do. Accordingly, the Court finds no merit to HHS's argument that policy considerations also support the granting of its motion for summary judgment.

5. Appropriate Relief & Commonwealth's Rule 56(f) Motion

*30 The Court has found that HHS's Vaughn indices and declarations are so deficient with regard to its segregability analysis and proving its entitlement to withholding materials or portions of materials pursuant to Exemption (b)(5) that the Court is unable to make a de novo determination on these issues, and similarly, the Commonwealth is unable to articulate its challenges. In this instance, the Court has several options in fashioning the appropriate relief, including inspecting the withheld materials in camera, allowing the plaintiff to conduct discovery, and requesting further affidavits and/or an amended Vaughn index from the agency. See Judicial Watch. 297 F.Supp.2d at 270 (citing Spirko v. U.S. Postal Serv.. 147 F.3d 992, 997 (D.C.Cir.1998)). The Court will review each of these options in turn.

One option is to order an in camera review of the withheld materials, and in fact, HHS has indicated that it is not opposed to such review in the event that the Court concludes HHS is not entitled to summary judgment as to HHS's claims of exemption. The Court has broad discretion in determining whether an in camera review should be conducted in a particular case. Spirko.. 147 F.3d at 997. " 'The ultimate criterion is simply this: Whether the district judge believes that in camera inspection is needed in order to make a responsible de novo determination on the claims of exemption.' " Id. at 996 (quoting Ray v. Turner. 587 F.2d 1187, 1195 (D.C.Cir.1978)). Two factors here counsel against in camera review. First, conducting an in camera review is generally disfavored and appropriate "only when the issue could not be otherwise resolved." NLRB v. Robbins
Tire & Rubber Co.. 437 U.S. at 224. As explained below, the Court believes the best way to resolve the deficiencies here is through limited discovery. The second factor is the relatively large number of pages at issue. For some of the withheld materials, HHS is in the best position to provide the necessary factual information to prove the claimed exemptions, especially where the required details may not appear in the documents themselves, such as facts demonstrating documents were prepared in anticipation of litigation, or identifying the agency decision to which a particular document contributed. Conducting an in camera review of close to 200 pages of unreleased materials to determine whether the withheld materials are exempt under one of the claimed privileges would place a substantial burden on judicial resources, and is especially not warranted here in light of HHS’s failure to supply the Court and the Commonwealth with even the minimal information necessary to make a de novo review and challenge the bases for withholding the materials, respectively. Another factor militating against in camera review is the general disfavor of in camera review by the courts as the principal means for resolving segregability disputes, as it impedes the adversarial position of the requester and is inconsistent with FOIA. Accordingly, the Court declines to order an in camera review at this time.

Specifically, the Commonwealth requests that it be allowed to inquire as to (1) how HHS went about identifying segregable factual material, and (2) with regard to the claimed privileges, whether the withheld materials meet the requirements for withholding, including (i) the role of particular documents in the deliberative process, and (ii) whether attorney-client privilege documents have been kept confidential. In addition, although not raised directly in its Rule 56(f) motion, the Commonwealth challenges the assertion of the attorney work-product privilege on the basis that HHS has not met its burden of proof of establishing that the documents were prepared in anticipation of litigation, and therefore, by implication, suggests discovery is needed on this issue as well.

In support of its Rule 56(f) motion, the Commonwealth submits the declaration of Jason Manne, counsel for the Pennsylvania Department of Public Welfare dated June 2, 2006 (“Manne Decl.”). (Doc. No. 14.) In his declaration, Manne states that based on his prior experience, which spans twenty-five years...
of handling Federal-State grant litigation including 12 FOIA lawsuits, he has a reasonable belief that HHS may not have released all segregable factual information in exempt documents and may be claiming exemptions improperly, as the official making the determination has historically lacked the program-specific knowledge necessary to make that determination. Manne specifically points to Bate-stamp page no. 545 as evidence of HHS's failure to release all segregable factual information. (Manne Decl. at ¶ 1, 5-6.) Manne further states that without knowing precisely how the decision to withhold information was made, he cannot adequately respond to the issue of segregability in HHS's motion for summary judgment. (Id. at 5.) In addition, Manne asserts that he cannot adequately respond to HHS's claimed exemptions without additional information regarding each document and how the document relates to the claimed privilege, as more fully explained in the Commonwealth's brief. (Id. at 6.)

HHS opposes the Commonwealth's Rule 56(f) motion, and in support thereof, advances two arguments. First, HHS submits that where the court already has sufficient information, consisting of Vaughn indices and declarations, to conclude the agency has fully complied with FOIA, discovery is generally unavailable. This argument is flawed however, because HHS assumes, incorrectly, that Court will find its Vaughn indices and declarations to be sufficiently detailed. As explained above, that is not the present case. Nonetheless, HHS cites a number of cases in which courts have denied discovery requests in FOIA cases. FN48 However, the Court finds none of these cases dispositive here as the agencies in those cases submitted sufficiently detailed affidavits and/or there was no evidence of bad faith on the part of the agency, thereby making discovery unnecessary, unlike HHS in the case at bar.

*32 Second, HHS submits that there is no need here to conduct an in camera review, but if the Court is dissatisfied with the information supplied, it has the discretion to order a more specific index or order an in camera review. According to HHS, given the number and similarity of the documents at issue, an in camera inspection would (1) show that the documents were appropriately withheld, (2) would completely eliminate the need for discovery on the FOIA exemptions, and (3) allow the Court to make its own segregability determination. By so arguing, however, HHS attempts to improperly shift its burden of proof to this Court. As stated earlier, the Court finds an in camera review would substantially burden judicial resources.

Clearly, there is precedent for allowing limited discovery in FOIA cases where the affidavits and/or Vaughn index are deficient and national security is not involved. See, e.g., Commw. of PA Dep't of Public Welfare v. United States, U.S. Dep't of Health & Human Serv., Civ. A. No. 99-175, 1999 U.S. Dist. LEXIS 17978, *7-8 (W.D.Pa. Oct. 12, 1999) (citing Church of Scientology v. IRS, 991 F.2d 560, 563 (9th Cir.1993), vacated in part on other grounds, 30 F.3d 101 (9th Cir.1994); Benavides v. DEA, 968 F.2d 1243, 1249-50 (D.C.Cir.), mod. on other grounds, 976 F.2d 751 (D.C.Cir.1992)); see also Schiller v. L.N.S., 205 F.Supp.2d 648, 653 (W.D.Tex.2002) (noting numerous district court cases holding that discovery in FOIA cases is limited to determining whether withheld items are exempt from disclosure or whether a thorough search for documents has been made). Because a FOIA plaintiff "obviously cannot know the facts [it] does not know," without discovery, it is virtually impossible for a FOIA plaintiff to know whether the agency has complied with FOIA's mandate. Id. at *8 (quoting Hanover Potato Prods., Inc. v. Shalala, 989 F.2d 123, 129 (3d Cir.1993)). As the Court of Appeals for this Circuit observed in Davin, supra: "The review of FOIA cases is made difficult by the fact that the party seeking disclosure does not know the contents of the information sought and is, therefore, helpless to contradict the govern-
The decision whether to allow discovery lies within the discretion of this Court. Schiller, 205 F.Supp.2d at 653 (citing Rugiero v. U.S. Dept. of Justice, 257 F.3d 534, 544 (6th Cir.2001)) (other citations omitted). The courts have uniformly held that discovery in a FOIA case is permitted "when factual issues arise about the 'adequacy or completeness of the government search and index' and this issue can arise 'only after the government files its affidavits and supporting memorandum of law'". Id. (quoting Murphy v. F.B.I., 490 F.Supp. 1134, 1137 (D.D.C.1980)). Therefore, given that the discovery the Commonwealth seeks to conduct is limited to the issue of the completeness of HHS's Vaughn indices and declarations as to segregability of non-exempt factual information and the claimed exemptions for withholding materials, and that HHS has already filed its Vaughn indices and supporting declarations, the Court finds that limited discovery is appropriate here.

*33 In lieu of discovery and an in camera review, the Court may order the agency to provide supplemental declarations or an amended Vaughn index to correct the deficiencies. In light of the fact that HHS has already had two opportunities to provide sufficiently detailed affidavits and has failed both times, the Court finds the better approach is to allow the Commonwealth to conduct limited discovery as outlined above.

Accordingly, the Court recommends that the Commonwealth's Rule 56(f) motion be granted and limited discovery allowed with regard to the completeness of the Vaughn indices and declarations on the segregability of non-exempt factual information and the claimed exemptions for the withheld materials. At the conclusion of discovery, if HHS still wishes to withhold materials or portions of materials, it will be allowed to renew its motion for summary judgment, and the Commonwealth will be permitted to file a cross-motion for summary judgment.

III. CONCLUSION

While the claimed privileges for a number of the documents appear plausible on the surface, HHS has failed to provide sufficiently detailed declarations and Vaughn indices to show that it has met all of the criteria for the respective privileges. Ultimately, the Court may well find that the withheld materials are exempt under either the attorney-client privilege, attorney work-product privilege, or the deliberative process privilege. However, on the current record, the Court cannot determine whether any of the claimed privileges apply as the declarations and Vaughn indices fail to provide the required detail.

Therefore, for this reason and the reasons set forth above, it is recommended that Defendants' Motion for Summary Judgment (Doc. No. 8) be granted with regard to the issue of the adequacy of the search, and denied without prejudice in all other respects. It is further recommended that Plaintiff's Rule 56(f) Motion (Doc. No. 13) be denied with prejudice on the issue of the adequacy of the search, and granted on the remaining issues.

In accordance with the Magistrates Act, 28 U.S.C. § 636(b)(1)(B) and (C), and Rule 72.1.4(B) of the Local Rules for Magistrates, the parties are allowed ten (10) days from the date of service to file objections to this report and recommendation. Any party opposing the objections shall have seven (7) days from the date of service of objections to respond thereto. Failure to file timely objections may constitute a waiver of any appellate rights.

CIVIL ACTION No. 01-2385-KHV, CIVIL ACTION No. 01-2386-KHV

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF KANSAS

2002 U.S. Dist. LEXIS 25111

December 23, 2002, Decided

DISPOSITION: [*1] Plaintiffs' Motion to Compel Production of Documents denied in part.

COUNSEL: For LOUISE SAWYER, plaintiff: Scott A. Wissel, Lewis, Rice & Fingersh, L.C., Kansas City, MO.
For SOUTHWEST AIRLINES, defendant: John W. Cowden, Mary C. O’Connell, Baker, Sterchi, Cowden & Rice, L.L.C., Kansas City, MO. Todd W. Amrein, Phoenix, AZ.

JUDGES: David J. Waxse, United States Magistrate Judge.

OPINION BY: David J. Waxse

OPINION:

MEMORANDUM AND ORDER

This matter is before the Court on Plaintiffs’ Motion to Compel Production of Documents (doc. 72). Plaintiffs ask the Court to overrule Defendant Southwest Airlines’ (“Southwest”) objections to Plaintiff Grace Fuller’s First Request for Production of Documents that are based on the assertion of attorney-client privilege and work product protection and to compel production of the alleged privileged and protected documents. For the reasons set forth below, the Court will deny the motion to compel except as to six documents, which the Court will inspect in camera to determine whether they are protected by work product [*2] immunity.

I. Factual Background

In these two consolidated cases, Plaintiffs assert civil rights claims pursuant to 42 U.S.C. § 1981. In addition, Plaintiff Fuller alleges claims for intentional and negligent infliction of emotional distress, while Plaintiff Sawyer alleges only a claim for intentional infliction of emotional distress.

Global Aerospace (“Global”) is Southwest’s insurer and has a duty to defend Southwest with respect to the claims asserted in these consolidated cases. n1 At issue in this motion to compel are documents that were exchanged between Southwest and Global in connection with this action.

n1 Ida Loubier Aff, Ex. 1 attached to doc. 73.

In its August 17, 2002 responses to the requests for production, Southwest objected to producing any documents that were protected by the attorney-client privilege and work product doctrine. Southwest also objected to producing certain documents that it contended were protected from disclosure by the insurer/insured
privilege. [*3] Southwest did not provide a privilege log until September 23, 2002. On October 4, 2002 Southwest served a consolidated privilege log, and Plaintiffs filed the instant motion to compel on October 17, 2002. Southwest responded to the motion to compel and provided an amended version of the privilege log ("Amended Privilege Log") on October 28, 2002.

In its response to the motion to compel, Southwest states that it has abandoned its assertion of the insurer/insured privilege and has provided to Plaintiffs the documents it withheld based on that privilege. Thus, those objections and documents are no longer at issue. The objections at issue are only those based upon the attorney-client privilege and work product doctrine.

II. Analysis

A. Did Southwest Waive the Right to Assert Attorney-Client Privilege and Work Product Protection by Failing to Timely Serve a Privilege Log?

Plaintiffs first argue that the motion to compel should be granted because Southwest waited more than two months after it served its initial responses to the requests for production to provide a meaningful privilege log. The Court will decline to find waiver. The Court will therefore proceed to analyze [*4] the merits of Southwest's privilege and work product objections and determine whether the Amended Privilege Log is sufficient to satisfy Southwest's obligations.

B. Attorney-Client Privilege

1. Applicable law

Whether the court applies federal or Kansas law generally makes no difference in determining whether the attorney-client privilege applies. [*5] This is because the essential elements of the attorney-client privilege are nearly identical under both Kansas and federal law. [*6] Moreover, "the Kansas statute concerning the attorney-client privilege and its exceptions is typical of the laws of other jurisdictions." [*7]

Under Kansas law, the essential elements of the privilege are:

(1) Where legal advice is sought (2) from a professional legal advisor in his capacity as such, (3) the communications made in the course of that relationship (4) made in confidence (5) by the client (6) are permanently protected (7) from disclosures by the client, the legal advisor, or any other witness (8) unless the privilege is waived. [*5]

Similarly, the essential elements of the privilege under federal common law are:

(1) Where legal advice of any kind is sought (2) from a professional legal adviser in his capacity as such, (3) the communications relating to that purpose, (4) made in confidence (5) by the client, (6) are at his instance permanently protected (7) from disclosure by himself or by the legal adviser, (8) except the protection be waived. [*6]

Under both Kansas and federal law, the attorney-client privilege protects confidential communications made by a client to an attorney in order to obtain legal assistance from the attorney in his or her capacity as a legal advisor. [*7] Under both laws, the term "communications" includes advice given by the attorney in the course of representing the client. [*8] It also includes disclosures by the client to the attorney's representative or employee incidental to the professional relationship. [*9]
2. Is the attorney-client privilege applicable here and has it been waived?

Plaintiffs assert that Southwest has waived any attorney-client privilege existing between Southwest and its attorney John Cowden by disclosing the documents to Global. Southwest responds that Global is also a client of Southwest's attorney John Cowden, and, thus, an attorney-client relationship also exists between Global and Cowden. Southwest further asserts that a claims attorney for Global requested legal advice and consultation from Cowden and that he provided that legal advice and consultation through written communications that are the subject of the motion to compel. In reply, Plaintiffs argue that the mere fact that Global is also a client of Cowden's does not save the privilege or protection. They argue that regardless of the attorney-client relationship between Global and Cowden, Global is still a third-party to any communications between Southwest and Cowden, and thus, when the communications between Cowden and Southwest were disclosed to Global, the privilege was waived. Plaintiffs claim that the proper objection in such a situation would have been for Southwest to assert objections based on either the joint defense doctrine or the common interest doctrine. Plaintiffs argue that because Southwest has never asserted either of these objections, any privilege existing under those doctrines has been waived.

The Court disagrees, and, for the reasons discussed below, finds the common interest doctrine to be applicable here. Although Southwest has not expressly asserted the doctrine by name, Southwest has established all of the necessary elements of the doctrine.

3. The common interest doctrine

Generally, when a communication between a client and an attorney occurs in the presence of third parties, the attorney-client privilege is waived. n10 The common interest doctrine, however, affords two parties with a common legal interest a safe harbor in which they can openly share privileged information without risking the wider dissemination of that information. n11 The common interest doctrine can only exist where there is an applicable underlying privilege, such as the attorney-client privilege or the work-product doctrine. n12

Admittedly, there is no Kansas statute or case that recognizes the common interest doctrine as a distinct privilege. n13 The Court, however, does not find that to be fatal to the assertion of the doctrine. Most commentators and courts view it not as a separate privilege, but as an exception to waiver of the attorney-client privilege. n14 The common interest doctrine thus acts as an exception to the general waiver rule by facilitating cooperative efforts among parties who share common interests. n15

n12 Cavallaro v. U.S., 284 F.3d 236, 240 (1st Cir. 2002); In re Megan-Racine, 189 Bankr. 562, 571.

n13 In State v. Maxwell, 10 Kan.App.2d 62, 691 P.2d 1316 (1984), the Kansas Court of Appeals addressed a similar doctrine relating to an attorney's joint defense of two or more clients. The Court finds that doctrine inapplicable here, however, as Global is not a co-defendant of Southwest in this litigation.

(S.D. N.Y., Oct. 11, 2002) ("the joint defense privilege or common interest rule is not really a separate privilege. Rather, it is a limited exception to the general rule that the attorney-client privilege is waived when a protected communication is disclosed to a third party outside the attorney-client relationship.") (citation omitted); Johnson Matthey, Inc. v. Research Corp., 2002 U.S. Dist. LEXIS 13560, No. 01 CIV.8115MBMFM, 2002 WL 1728566, at *6 (S.D. N.Y. July 24, 2002) ("The common interest exception is not an independent privilege, but an extension of the attorney-client privilege which serves to protect the confidentiality of communications passing from one party to the attorney for another party where a joint defense effort or strategy has been decided upon and undertaken by the parties and their respective counsel."); Miller v. Alagna, 138 F. Supp. 2d 1252, 1256 (C.D. Cal. 2000) (California law recognizes a "joint client" or "common interest" exception to the attorney-client privilege); Roberts Aircraft Co. v. Kern, No. 96- N-1214, 1997 WL 524894, at 3 (D. Colo. March 20, 1997) ("The 'common interest' doctrine is an exception to an otherwise applicable attorney-client privilege.").

For the common interest doctrine to attach, "most courts . . . insist that the two parties have in common an interest in securing legal advice related to the same matter -- and that the communications be made to advance their shared interest in securing legal advice on that common matter." n16 "The key consideration is that the nature of the interest be identical, not similar, and be legal, not solely commercial." n17

n16 First Pacific Networks, Inc. v. Atlantic Mut. Ins. Co., 163 F.R.D. 574, 581 (N.D. Cal. 1995) (citations omitted); accord Strougo v. BEA Assoc., 199 F.R.D. 515, 525 (S.D. N.Y. 2001) (to invoke the "common interest" exception, a party must show that the communications were made in the course of a joint defense effort or that the clients share a common legal interest, and that the statements were designed to further the common effort); Libbey Glass, Inc. v. Oneida, Ltd., 197 F.R.D. 342, 348 (N.D. Ohio 1999) (parties must have a common legal, as opposed to commercial, interest and show that the communications are made in the course of formulating a common legal strategy).

The Court finds that these elements have been satisfied here. Southwest has established that Southwest and Global, who has a duty to defend Southwest in this case, have an interest in common and that the interest of a legal and not commercial nature. Southwest has provided the affidavit of Ida Loubier, n18 a claims attorney for Global. Her affidavit establishes that, pursuant to Global's duty to defend Southwest, she retained Cowden as the attorney to defend Southwest in these consolidated cases and to provide legal advice in connection with all matters relating to the lawsuits. Her affidavit also establishes that, as a representative of Global, she requested and obtained legal advice from Cowden in connection with matters relating to the cases.

n18 See Ex. 1, attached to doc. 73.

In light of the above, the Court holds that Southwest has [n12] established sufficient evidence to warrant application of the common interest exception to the waiver of any attorney-client privilege. Although Southwest did not use the term "common interest" doctrine or exception in asserting that the documents were privileged, it has shown that the necessary elements exist with respect to the claimed privileged documents. To fault Southwest for not using the correct terminology, when all of the elements have been satisfied, would elevate form over substance and would contravene the important policies underlying the attorney-client privilege. As the Kansas Supreme Court has emphasized, "the attorney-client privilege is important to the
administration of justice and should not be set aside lightly." n19

In sum, the Court holds that the common interest doctrine applies here and the documents exchanged between Southwest and Global retain [*13] their attorney-client privileged status. Plaintiffs' motion to compel will therefore be denied with respect to the documents that Southwest has asserted are attorney-client privileged.

B. Work Product Protection

The Court will now proceed to determine whether Southwest has properly asserted work product protection. Of the hundreds of documents listed in the Amended Privilege Log, only sixteen are identified solely as work product. n20 This analysis thus pertains to only those sixteen documents.

n20 Most of the documents identified in the Amended Privilege Log as work product are also identified as attorney-client privileged communications. Because the Court has upheld the assertion of the attorney-client privilege, the Court need not determine whether those documents are also protected by work product immunity.

1. Are the documents protected by work product immunity?

"Unlike the attorney client privilege, the work product privilege is governed, even in diversity cases, by a uniform federal standard [*14] embodied in Fed.R.Civ.P. 26(b)(3)." n21 Thus, the Court will apply federal law to determine whether Southwest's assertion of work product protection should be upheld.

As the party asserting work product protection, Southwest has the burden of establishing that the work product doctrine applies. n22 To carry that burden, Southwest must make a "clear showing" that the asserted objection applies. n23 Southwest must show that "(1) the materials sought to be protected are documents or tangible things; (2) they were prepared in anticipation of litigation or for trial; and (3) they were prepared by or for a party or a representative of that party." n24

n23 Id. (citations omitted).

Applying these standards here, the Court finds that Southwest has established that all but the following documents are protected by work product immunity: PRIV 157, 158, 219, 245, 246, and 328. Southwest has failed to show that these six documents were prepared in anticipation of litigation or for trial. Southwest shall provide copies of those documents to the Court for an in camera inspection so that the Court may determine whether they are in fact protected by work product immunity. Southwest shall submit these documents to the Court within seven (7) days of the date of this Memorandum and Order.

2. Are Plaintiffs entitled to review the work product documents regardless of their protected status?

Plaintiffs assert that even if the Court finds that the documents are protected work product, Plaintiffs have a substantial need for these documents and that they should therefore be produced pursuant to Fed.R.Civ.P. 26(b)(3). Under that rule, a party may discover work product "upon [*16] a showing that the party seeking discovery has substantial need of the materials in the preparation of the party's case and that the party is unable without undue hardship to obtain the substantial equivalent of the materials by other means." n25

n25

Plaintiffs have made no showing of "substantial need." The Court will therefore deny the motion to compel as it pertains to the documents that the Court has determined are protected by work product immunity.

**IT IS THEREFORE ORDERED** that Plaintiffs' Motion to Compel Production of Documents (doc. 72) is denied in all respects except with respect to the six documents identified as PRIV 157, 158, 219, 245, 246, and 328 in Southwest's Amended Privilege Log. Within seven (7) days of the date of this Memorandum and Order, Southwest shall provide copies of those documents to the Court for the Court's *in camera* inspection. The Court will defer ruling on the Motion to Compel as it pertains to those six documents until the Court has [*17] reviewed said documents.

**IT IS SO ORDERED.**

Dated in Kansas City, Kansas on this 23rd day of December 2002.

David J. Waxse
United States Magistrate Judge
Before the Court are Plaintiff's Motion to Compel (DN 103), Plaintiff's supplement (DN 116), Defendant's response (DN 120), Plaintiff's reply (DN 129), and Defendant's sur-reply (DN 142). At issue are documents that Defendant has withheld from production on claim of work-product protection, the attorney-client privilege, and/or the joint defense/common interest privilege. Pursuant to an earlier order (DN 132), Defendant submitted directly to the undersigned for in camera inspection all documents that it has withheld from production on claim of privilege or work-product protection. For the reasons set forth below, Plaintiff's motion is granted in part and denied in part.

Pursuant to Rule 26(b)(1), discovery must be "relevant to the claim or defense of any party." Fed.R.Civ.P. 26(b)(1)(2000 Amendment), Advisory Committee's Note, 2000 amendments; see Phalp v. City of Overland Park, Kansas, 2002 U.S. Dist. LEXIS 9684, 2002 WL 1162449, *3 fn.3 (D.Kan. 2002). The undersigned notes that four of the documents withheld by Defendant are joint defense agreements. See 007382-007392, 00751-007581, 008962-008966, 008967-008976. The parties have argued vigorously on the question of whether these documents are privileged. However, both seemed to have overlooked a precedent...
issue. Specifically, are these documents relevant within the meaning of Rule 26(b)(1)? While these documents may be helpful to the Court in addressing this discovery dispute, they are not "relevant to the claim or defense of any party." Fed.R.Civ.P. 26(b)(1). For this reason, the undersigned concludes the joint defense agreements are not discoverable. [**3]

Defendant appears to concede that the remainder of the withheld documents are relevant (DN 120). For this reason the undersigned will turn to Defendant's claim or claims of privilege as to each document withheld from production. The parties agree that federal common law on privilege applies to this discovery dispute.

Rule 26(b)(1) of the Federal Rules of Civil Procedure mandates that privileged matters are afforded an absolute protection from discovery. This is distinguishable from the qualified protection from discovery that is afforded work-product. n1 Fed.R.Civ.P. 26(b)(3); In re Perrigo Company, 128 F.3d 430, 437 (6th Cir. 1997) (citations omitted); Toledo Edison Co., 847 F.2d 335, 338-341 (6th Cir. 1988).

n1 The protection afforded work-product is not a privilege as the term is used in the Rules of Civil Procedure or the Law of Evidence. Hickman v. Taylor, 329 U.S. 495, 509-510, 67 S. Ct. 385, 91 L. Ed. 451 & n. 9 (1947). If an adverse party demonstrates substantial need and an inability to obtain the equivalent without undue hardship then the Court may order such work-product be produced, provided it does not reveal an attorney's mental impressions and opinions. In re Perrigo Company, 128 F.3d 430, 437 (6th Cir. 1997) (citations omitted); Toledo Edison Co., 847 F.2d 335, 338-341 (6th Cir. 1988).

[**4]

B

Defendant has asserted only the attorney-client privilege as to documents 007283-07286, 007564, 007650-007651, 007654, 007662, 007665, 007671-007672, 007685, 007688-007689, 007690-007692, 007693, 007698-007699, 007759-007760, 007761, and 007806.

Case law often articulates the elements of the attorney-client privilege as follows:

"(1) Where legal advice of any kind is sought (2) from a professional legal adviser in his capacity as such, (3) the communications relating to that purpose, (4) made in confidence (5) by the client, (6) are at his instance permanently protected (7) from disclosure by himself or by the legal adviser, (8) unless the protection is waived." Reed v. Baxter, 134 F.3d 351, 355-356 (6th Cir. 1998) (citations omitted). However, these elements apply to only a portion of the confidential communications that courts have deemed subject to the attorney-client privilege. For example, the privilege applies to confidential communications from counsel to client that set forth legal advice or reveal the substance of the client confidence. United States v. Defazio, 899 F.2d 626, 635 (7th Cir. 1990) (citations omitted); Bank Brussels Lambert v. Credit Lyonnais, 160 F.R.D. 437, 441-442 (S.D.N.Y. 1995) [**5] (citations omitted). The attorney-client privilege also extends to communications made by noncontrol group employees (1) at the direction of their superiors, (2) in order to secure legal advice for the corporation, (3) about matters within the scope of the employee's corporate duties; and (4) while the employees were aware that they were being questioned in order that the corporation could obtain legal advice. Upjohn Co. v. United States, 449 U.S. 383, 394, 101 S. Ct. 677, 66 L. Ed. 2d 584 (1981). Additionally, confidential communications disclosed to or made in the presence of certain agents of the attorney (e.g., accountants, engineers, or experts) to further the rendition of legal advice or in connection with the legal representation are subject to the attorney-client [*219] privilege. See e.g., United States v. Schwimmer, 892 F.2d 237, 243 (2d Cir. 1989). Further, the privilege extends to communications among corporate employees that reflect legal advice rendered by counsel to the corporation. In re Grand Jury 90-1,758 F.Supp. 1411, 1413 (D.Colo. 1991) (President of the corporation conveyed in a letter to the Board of Directors legal advice he received from outside counsel); [**6] SCM Corp. v. Xerox Corp., 70 F.R.D. 508, 518 (D. Conn.) appeal dismissed, 534 F.2d 1031, 1032 (2d Cir. 1976) ("A privileged communication should not lose its protection if an executive relays legal advice to
another who shares responsibility for the subject matter underlying the consultation.

After considering the arguments of the parties and conducting a review of documents 007283-07286, 007564, 007650-007651, 007662, 007665, 007671-007672, 007685, 007688-007689, 007690-007692, 007693, 007698-007699, 007759-007760, 007761, and 007806, the undersigned concludes that Defendant has satisfied its burden of demonstrating that each communication or note summarizing a communication is subject to the attorney-client privilege.

C

Defendant has asserted the joint defense/common interest privilege as to the remainder of the documents it has withheld from production. n2

n2 In a few instances Defendant has also asserted the attorney-client privilege. See documents 007380-007381, 007559, 007560, 007652-007653, 007660-007661, 007666-007667, 007673-007674, 007675-007676, 007679-007680, 007681-007682, 007683-007684, 007686-007687, 007694-007695, 007696-007697, 007700-007701, 007709-007714, and 007820. For the reasons set forth in this section, the assertion of both privileges is redundant.

"The common interest privilege is not an independent basis for privilege, but an exception to the general rule that the attorney-client privilege is waived when privileged information is disclosed to a third party." Edna Selan Epstein, The Attorney-Client Privilege and the Work-Product Doctrine, American Bar Association Section of Litigation at 196 (4th ed. 2001). For this reason, it "assumes the existence of a valid underlying [*8] privilege." Id. Additionally, it assumes "there is a valid basis for exchanging information with a third party without undermining the requirement of confidentiality for the attorney-client privilege to apply." Id. "In effect, it states that privileged communications shared among and within some group of people will be deemed to have been made in confidence." Id.

Essentially, there are three situations where this exception is deemed to apply. Id. at 200-206. The first being a single attorney representing multiple clients in the same matter. Id. at 200-201. The first situation does not apply to the circumstances herein.

Another situation where the common interest is deemed sufficient to preclude waiver is when parties share a common defense. Id. at 201. This joint defense concept developed in the "criminal context when multiple defendants, each having separate counsel, share information to effect a united defense." Id. More and more, to protect the joint defense privilege, parties enter into written joint defense agreements in an effort to assure that information shared among the attorneys for each of the defendants will remain privileged despite the sharing. [**9] Id. Here, Defendant and the other six members of the mortgage insurance industry in the United States did just that in May 2003. All seven signatories to this agreement appreciated the need to pool their resources in preparing a common or united defense to the claims asserted in an alleged class action suit filed against one of its members, Mortgage Guaranty Insurance Corporation ("MGIC") (DN 120, Exhibit 1, Affidavit of Earl Wall; 007382-007392). Essentially, all seven members [*220] recognized they may become co-defendants in that action or become defendants in an alleged class action raising the same claims (DN 120, Exhibit 1, Affidavit of Earl Wall; 007382-007392). While the seven members of the mortgage insurance industry did not become co-defendants in the same civil action, all but one are presently defending against the same claims asserted in six alleged class action lawsuits prosecuted by the same law firm.

The third and final situation where the common interest is deemed sufficient to preclude waiver is "when two or more clients share a common legal or commercial interest and, therefore, share legal advice with respect to that common interest." Id. at 203. "The common [*10] interest doctrine encourages parties working with a common purpose to benefit from the guidance of counsel,
and thus avoid pitfalls that otherwise might impair their progress toward their shared objective." Id. The doctrine has evolved from *Duplan Corp. v. Deering Milliken*, 397 F.Supp. 1146 (D.S.C. 1974), "which was limited to a common shared legal, rather than a common shared financial or commercial, interest." Epstein, supra, at 203. Notably, "[u]nlike the joint defense privilege, the common interest does not require or imply that an actual suit is or ever will be pending." Id.

After considering the arguments of the parties as well as the affidavits of Earl F. Wall, General Counsel of Defendant, and Suzanne C. Hutchinson, Executive Vice-President of the Mortgage Insurance Companies of America ("MICA"), the undersigned concludes the third situation applies to the circumstances herein. True, the seven members of the mortgage insurance industry did enter into a joint defense agreement in May of 2003. However, as evidenced by many of the documents withheld and indicated in Mr. Wall's affidavit, these seven companies and the trade organization they created, [*11] MICA, have clearly shared a "common legal interest" that extends beyond pooling their resources to prepare a common or united defense to the claims asserted in an alleged class action suit. Defendant has satisfied its burden of demonstrating a "common legal interest" with the other six members in the industry and MICA that extends to legislative and regulatory matters, as well as in matters in litigation or which could lead to litigation. For this reason, the undersigned finds Defendant's assertion of the common interest privilege well-taken, including the communications made years before the filing of this action and made after Radian Guaranty, Inc. ("Radian") withdrew as a member of MICA in July of 2003. [*12]

Notably, the common interest doctrine, "does not encompass a joint business strategy which happens to include as one of its elements a concern about litigation." Id.

*n4* The undersigned concludes that Radian's business dispute with MICA on an unrelated matter does not prevent it from continuing to share this "common legal interest" with Defendant, the other five members of the industry and MICA.

Defendant recently produced the Property Casualty Insurers Association of America ("PCIAA") documents discussed in Plaintiff's motion to compel. *n5* Thus, the Court need not address Plaintiff's arguments regarding those documents.

*n5* Defendant provided this information in the cover letter that accompanied the withheld documents it submitted to the undersigned for an *in camera* review.

The undersigned has considered Plaintiff's argument regarding document 007566-007568 (DN 129 at page 2 and footnote 3) and concludes the common interest privilege does apply because on March 6, 1998, Amerin was a mortgage insurance company that [*221] shared a common legal interest with Defendant, the other members in [*13] the industry and MICA. According to Defendant, Amerin subsequently merged with another mortgage insurance company to form Radian in 1999 (DN 142 at 3).

The undersigned has also considered Plaintiff's
argument regarding 007431-007433, 007434-007436, 007887-007889. An in camera review of these documents reveals that each document sets forth a series of emails, the earlier of which were copied to Pete Mills with Countrywide, a lender. Certainly, the common interest privilege does not apply to the emails that were copied to Mr. Mills. However, the common interest privilege does apply to the subsequent emails. In sum, Defendant may redact from each document the emails that were not copied to Pete Mills before it produces the three documents.

Next, the undersigned concludes that no privilege applies to the following documents 007438-007441, 007443-007458, 007461-007496, 007584-007620, 007704-007706, 007765-007771, 007773-007779, 008168-008234. These non-privileged documents are attachments to communications that are subject to privilege. The undersigned has considered whether these attachments are protected from discovery under the work-product doctrine. n6 While each of these documents [**14] were prepared or obtained before or during this litigation, the undersigned concludes only 007584-007620 was obtained or prepared because of litigation and not for some other purpose. Toledo Edison Co., 847 F.2d 335, 339, 341 (6th Cir. 1988); Edna Selan Epstein, The Attorney-Client Privilege and the Work-Product Doctrine, American Bar Association Section of Litigation at 506 (4th Ed. 2001). Reading the material at 007584-007620 could very well reveal the mental impressions, opinions, and trial strategy of Defendant's counsel. Since case law and Rule 26(b)(3) imply a near absolute protection is to be accorded to such work-product, the undersigned concludes it should not be produced to Plaintiff. Hickman v. Taylor, 329 U.S. 495, 510-513, 67 S. Ct. 385, 91 L. Ed. 451 (1947); see also Ujohn Co. v. United States, 449 U.S. 383, 400-402, 101 S. Ct. 677, 66 L. Ed. 2d 584 (1981); In re Perrigo Company, 128 F.3d 430, 437 (6th Cir. 1997) (citations omitted); Toledo Edison Co., 847 F.2d at 338-341. Notably, "only disclosures that are 'inconsistent with the adversary system' are deemed to waive work-product protection." Epstein, supra, at 610. Since the material has [**15] not been disclosed to an adversary the undersigned concludes a waiver has not occurred. In sum, Defendant shall produce 007438-007441, 007443-007458, 007461-007496, 007704-007706, 007765-007771, 007773-007779, and 008168-008234 because they are not subject to privilege.

n6 If the document can be said to have been obtained or prepared in anticipation of litigation then it is entitled to a qualified protection from discovery. See In re Perrigo Company, 128 F.3d 430, 437 (6th Cir. 1997); Toledo Edison Co., 847 F.2d 335, 338-341 (6th Cir. 1988); see also Arkwright Mutual Insurance Co. v. National Union Fire Insurance Co., 1994 U.S. App. LEXIS 3828, 1994 WL 5899, * 3 (6th Cir. 1994) (unpublished opinion).

IT IS HEREBY ORDERED that Plaintiff's motion to compel is GRANTED IN PART AND DENIED IN PART.

IT IS FURTHER ORDERED that on or before August 28, 2006, Defendant shall produce to Plaintiff redacted versions of 007431-007433, 007434-007436, 007887-007889. Specifically, Defendant [**16] may -redact from each document the emails that were not copied to Pete Mills.

IT IS FURTHER ORDERED that on or before August 28, 2006, Defendant shall produce copies of 007438-007441, 007443-007458, 007461-007496, 007704-007706, 007765-007771, 007773-007779, 008168-008234.

RENEGOTIATION BOARD v. GRUMMAN AIRCRAFT ENGINEERING CORP.

No. 73-1316

SUPREME COURT OF THE UNITED STATES

Argued January 14, 1975
April 28, 1975

PRIOR HISTORY:

CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA CIRCUIT

SUMMARY:

An action instituted by a government defense contractor under the Freedom of Information Act (5 USCS 552) in the United States District Court for the District of Columbia raised the issue whether the Act required public disclosure of various documents generated by the Renegotiation Board and its Regional Boards in determining whether government defense contractors were liable to the government for excessive profits realized on government contracts subject to the Renegotiation Act of 1951 (50 USCS App 1211 et seq.)--the specific documents involved having been issued with regard to renegotiation proceedings with certain contractors during a period ending in 1965. The plaintiff sought disclosure of (1) those Regional Board Reports which had been submitted to the Renegotiation Board, and which recommended that "clearances" be issued to the contractor on the basis of findings that no excessive profits had been realized, the Board having subsequently approved the "clearances," and (2) Division Reports which had been submitted to the Renegotiation Board by a "division" of the Board (usually consisting of three of its five members) assigned to determine the amount of excessive profits after the contractor was unable to agree with a Regional Board as to such amount, and which included recommendations for final disposition of the cases, along with any additional or contrary views of division members. The District Court held that the reports were "final opinions," within the Freedom of Information Act's disclosure provisions (5 USCS 552(a)(2)(A)), and were not within the Act's fifth exemption (5 USCS 552(b)(5)) from disclosure for "inter-agency or intra-agency memorandums" (325 F Supp 1146, 20 ALR Fed 370). The United States Court of Appeals for the District of Columbia Circuit affirmed (157 App DC 121, 482 F2d 710, 20 ALR Fed 383).

On certiorari, the United States Supreme Court reversed. In an opinion by White, J., expressing the views of seven members of the court, it was held that (1) the reports involved were not "final opinions" subject to disclosure under the Freedom of Information Act, but
instead fell within the Act's fifth exemption for "inter-agency or intra-agency" memoranda, since (a) only the full Renegotiation Board had the power by law to decide whether excessive profits existed, neither the Regional Boards nor the divisions of the Renegotiation Board having any decisional authority, (b) both types of reports were prepared for use by the Renegotiation Board in its deliberations, thus constituting the kind of predecisional recommendations contemplated by the Act's fifth exemption, and (c) there was no showing that the reasoning in the reports was adopted by the Board as its reasoning, even when it agreed with the conclusion of the report; and (2) it was unnecessary to determine whether the Regional Boards were "agencies" for the purposes of the Act, since if they were separate agencies, their final recommendations are "inter-agency" memoranda under the Act's fifth exemption, and if they are not agencies separate from the Renegotiation Board, their recommendations are "intra-agency" memoranda under the exemption.

Douglas, J., dissented.

Powell, J., did not participate.

LAWYERS' EDITION HEADNOTES:

[***LEdHN1]
LAW §64
WAR §15.3
Freedom of Information Act -- Renegotiation Board -- disclosure of Regional Board Reports --
Headnote:[1A][1B][1C]

Certain Regional Board Reports submitted to the Renegotiation Board and recommending that "clearances" be issued to government defense contractors on the basis of findings that no excessive profits had been realized by the contractors under contracts subject to the Renegotiation Act of 1951 (50 USCS App 1211 et seq.)--the Renegotiation Board having subsequently approved the "clearances"--are not "final opinions" made in the adjudication of cases within the meaning of the Freedom of Information Act provision making such final opinions available for public inspection (5 USCS 552(a)(2)(A)), but instead fall within the Act's fifth exemption from disclosure for "inter-agency or intra-agency memorandums" (5 USCS 552(b)(5)), where (1) only the Renegotiation Board has the power by law to decide whether excessive profits existed, the Regional Boards having no decisional authority whatever, (2) the Regional Board Reports were prepared prior to the Renegotiation Board's decision and were used by the Board in its deliberations, thus constituting the kind of predecisional deliberative advice and recommendations contemplated by the Act's fifth exemption, and (3) there was no showing that the reasoning in the reports was adopted by the Renegotiation Board; it is unnecessary to determine whether the Regional Boards are themselves "agencies" for the purposes of the Freedom of Information Act, since if they are separate agencies, their final recommendations are "inter-agency" memoranda under the Act's fifth exemption, and if they are not agencies separate from the Renegotiation Board, their recommendations are "intra-agency" memoranda under the exemption.

[***LEdHN2]
LAW §64
WAR §15.3
Freedom of Information Act -- Renegotiation Board -- disclosure of Division Reports --
Headnote:[2A][2B]

Division Reports, which were submitted to the Renegotiation Board by a "division" of the Board (usually consisting of three of its five members) assigned to determine the amount of excessive profits realized by a government defense contractor after the contractor was unable to agree with a Regional Board as to the amount of excessive profits recoverable by the government under the Renegotiation Act of 1951 (50 USCS App 1211 et seq.), and which included a recommendation for final disposition of the matter, along with any additional or contrary views of division members, are not "final opinions, including concurring and dissenting opinions," made in the adjudication of cases within the meaning of the Freedom of Information Act provision making such "final opinions" available for public inspection (5 USCS 552(a)(2)(A)), but instead fall within the Act's fifth exemption from disclosure for "inter-agency or intra-agency memorandums" (5 USCS 552(b)(5)), where (1) only the full Renegotiation Board has the power by law to decide whether excessive profits existed, a division of the Board having no legal decisional authority but merely analyzing and recommending; (2) the Division Reports were prepared prior to the Board's decision for use in the deliberations by the full Board, including the members of the division who might change their minds and who might have included thoughts or arguments in the report with which they were not in
agreement or which were not tentative; and (3) there was no showing that the reasoning in the reports was adopted by the Board as its reasoning, even when it agreed with the conclusion of a report.

Freedom of Information Act -- exemption of intra-government memoranda --

Headnote: [3A][3B]

Subsection (b)(5) of the Freedom of Information Act (5 USCS 552(b)(5)) which exempts from public disclosure inter-agency or intra-agency memoranda that would not be available by law to a party other than an agency in litigation with the agency, does not include documents which are "final opinions" made in the adjudication of cases, subject to disclosure under the Act (5 USCS 552(a)(2)(A)).

Freedom of Information Act -- exemption of "inter-agency" memoranda --

Headnote: [4]

Subsection (b)(5) of the Freedom of Information Act (5 USCS 552(b)(5)) which exempts from public disclosure inter-agency or intra-agency memoranda that would not be available by law to a party other than an agency in litigation with the agency, incorporates the privileges which the government enjoys under the relevant statutory and case law in the pretrial discovery context; and both the Freedom of Information Act's provision and the case law which it incorporates distinguish between predecisional memoranda prepared in order to assist an agency decisionmaker in arriving at his decision, which are exempt from disclosure, and postdecisional memoranda setting forth the reasons for an agency decision already made, which are not.

Freedom of Information Act -- agency opinions --

Headnote: [5]

Since the exemption of certain memoranda from public disclosure contained in subsection (b)(5) of the Freedom of Information Act (5 USCS 552(b)(5)) includes "inter-agency" memoranda as well as "intra-agency" memoranda, the exemption is intended to permit one agency possessing decisional authority to obtain written recommendations and advice from a separate agency not possessing such decisional authority without requiring that the advice be any more disclosable than similar advice received from within the agency.

Freedom of Information Act -- applicability to Renegotiation Board --

Headnote: [6A][6B]

Congress intended the Renegotiation Board to be subject to the provisions of the Freedom of Information Act (5 USCS 552).

Freedom of Information Act -- necessity of written opinions --

Headnote: [7]

Since the Renegotiation Act of 1951 (50 USCS App 1221) exempts the Renegotiation Board from all provisions of the Administrative Procedure Act (5 USCS 551 et seq.) except for the Public Information Section (Freedom of Information Act, 5 USCS 552), the opinion writing section of the Administrative Procedure Act (5 USCS 557) is inapplicable to Board decisions; and the Board has no affirmative obligation under the Freedom of Information Act to write opinions.

Freedom of Information Act -- agency opinions --

Headnote: [8]

The Freedom of Information Act (5 USCS 552) imposes no independent obligation on agencies to write opinions; it simply requires them to disclose the opinions which they do write.

Renegotiation Board documents -- public disclosure --

matter for Congress --
Headnote:

It is not for the United States Supreme Court, under the purported authority of the Freedom of Information Act (5 USCS 552), to require disclosure of documents of the Renegotiation Board and its Regional Boards which are not final opinions, which do not accurately set forth the reasons for the Board’s decisions, and the disclosure of which would impinge upon the Board’s pre-decisional processes; if the public interest suffers by reason of the Board’s failure to explain some of its decisions, the remedy is for Congress to require it to do so.

SYLLABUS:

Pursuant to the Government contract renegotiation process in effect under the Renegotiation Act of 1951 for so-called Class A cases (those in which the contractor reported profits of more than $800,000 on the relevant contracts) during the period involved in this case, if the Regional Board made a recommendation as to the amount of excessive profits in the year in issue rather than recommending a clearance, i.e., a unilateral determination that a contractor realized no excessive profits during the year in issue, the case, if the contractor declined to enter into an agreement, would be reassigned to the Renegotiation Board (Board). The case file, including the Regional Board Report, was then transmitted to the Board and assigned to a division of the Board, usually consisting of three of its five members, which in due course would make its own decision and submit to the full Board a Division Report, including a recommendation for final disposition of the case. If the Regional Board concluded that no excessive profits had been realized and that a clearance should therefore issue, a “final recommendation” that a clearance be issued was sent to the Board, which considered the case on the basis of the Regional Board Report. Respondent brought an action pursuant to the Freedom of Information Act (FOIA), 5 U.S.C. § 552, seeking disclosure of certain Regional Board Reports resulting in a recommendation of clearance and Board approval, and of Division Reports in other cases, all related to and issued during renegotiation proceedings involving 14 other companies during the period 1962-1965. The District Court ultimately granted relief on the grounds that both the Regional Board and Division Reports are “final opinions” within the meaning of § 552(a)(2)(A), which requires a Government agency to make available to the public “final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases,” and were not exempt from disclosure under § 552(b)(5) (Exemption 5) as “inter-agency or intra-agency memorandums . . . which would not be available by law to a party other than an agency in litigation with the agency.” The Court of Appeals affirmed, further holding that even if the Regional Board Reports were not “final opinions” of the Board, they were disclosable as final opinions of the Regional Board, which was to be considered an “agency” for purposes of the FOIA. Held: Neither the Regional Board nor Division Reports are final opinions and they do fall within Exemption 5, since (1) only the full Board has the power by law to make the decision whether excessive profits exist; (2) both types of reports are prepared prior to that decision and are used by the Board in its deliberations; and (3) the evidence fails to support the conclusion that the reasoning in the reports is adopted by the Board as its reasoning, even when it agrees with a report’s conclusion. Pp. 183-190.

(a) The Regional Board Reports, being prepared long before the Board reached its decision and being used by it as a basis for discussion, are precisely the kind of predecisional deliberative advice and recommendations contemplated by Exemption 5 which must remain uninhibited and thus undisclosed, in order to supply maximum assistance to the Board in reaching its decision. Regardless of whether the Regional Boards are agencies for Class A purposes so that their final recommendations are inter-agency memoranda, or are not agencies separate from the Board so that their recommendations are intra-agency memoranda, the Regional Boards’ total lack of decisional authority brings their reports within Exemption 5 and prevents them from being “final opinions.” Pp. 185-188.

(b) Since the Division Reports were prepared before the Board reached its decision and to assist it in its deliberations, and were used by the full Board as a basis for discussion, the Board should not be deprived of such a thoroughly uninhibited version of this valuable deliberative tool by making such reports public on the unsupported assumption that they always disclose the final views of at least some Board members. Pp. 189-190.

WHITE, J., delivered the opinion of the Court, in which BURGER, C. J., and BRENNAN, STEWART, MARSHALL, BLACKMUN, and REHNQUIST, JJ., joined. DOUGLAS, J., dissented. POWELL, J., took no
part in the consideration or decision of the case.

COUNSEL:

Allan Abbot Tuttle argued the cause for petitioner. With him on the brief were Solicitor General Bork, Assistant Attorney General Hills, Leonard Schaitman, and David M. Cohen.

Tom M. Schaumberg argued the cause for respondent. With him on the brief was Frederick B. Abramson. *

* Melvin L. Wulf, Carol A. Cowgill, and Marvin M. Karpatick filed a brief for the American Civil Liberties Union et al. as amici curiae urging affirmance.

JUDGES:

Burger, Douglas, Brennan, Stewart, White, Marshall, Blackmun, Rehnquist; Powell took no part in the consideration or decision of the case.

OPINION BY:

WHITE

OPINION:

[*170] [***62] [**1493] MR. JUSTICE WHITE delivered the opinion of the Court.

The issue in this case is whether certain documents - documents generated [*63] by the Renegotiation Board (Board) and by its Regional Boards in performing their task of deciding whether certain Government contractors have earned, and must refund, "excessive profits" on their Government contracts - are "final opinions" explaining the reasons for agency decisions already made, and thus expressly subject to disclosure pursuant to the Freedom of Information Act (Act), 5 U.S.C. § 552(a)(2)(A), or are instead predecisional consultative memoranda exempted from disclosure by § 552(b)(5). See NLRB v. Sears, Roebuck & Co., ante, p. 132.

Essential to the consideration of whether the documents at issue in this case must be disclosed pursuant to the relevant provisions of the Act is an understanding of the renegotiation process, a process that itself serves to define the documents in issue and hereinafter described. n1 [*171] Under the Renegotiation Act of 1951, 65 Stat. 7, as amended, 50 U.S.C. App. § 1211 et seq., the Government is entitled to recoup from those who hold contracts or subcontracts with certain departments of the Government [*1494] any "excessive profits" received by such persons on such contracts. The amount of the profits which will be considered "excessive" in connection with a particular contract depends upon the statutory factors which are set forth in the margin. n2 As the Board's name suggests, it [*172] endeavors to, and in fact does, conclude the vast majority of its cases by agreement. 50 U.S.C. App. § 1215(a) [***64] (1970 ed., Supp. I). Absent an agreement, however, the Board must decide either to issue a "clearance," i.e., a unilateral determination that the contractor realized no excessive profits during the year in issue, or to issue a unilateral order fixing excessive profits at a specified amount and directing the contractor to refund them. The unilateral order is final unless a de novo determination regarding excessive profits is sought within 90 days before the Court of Claims. n3 It is in those cases not terminated by agreement that the documents at issue in this case were generated. n4 With this in mind, we turn to the details of the renegotiation process as it existed during the period relevant to the decision in this case. n5

n1 See generally S. Rep. No. 93-927, pp. 1-2 (1974); Staff Review of Recommendations Made on the Renegotiation Process: A Preliminary Report 3-5 (1974) (prepared for the use of the House Committee on Ways and Means and the Senate Committee on Finance by the staff of the Joint Committee on Internal Revenue Taxation (hereinafter Staff Review)).

n2 Title 50 U.S.C. App. § 1213 (e) reads as follows:

"(e) The term 'excessive profits' means the portion of the profits derived from contracts with
the Departments and subcontracts which is determined in accordance with this title [§§ 1211 to 1224 of this Appendix] to be excessive. In determining excessive profits favorable recognition must be given to the efficiency of the contractor or subcontractor, with particular regard to attainment of quantity and quality production, reduction of costs, and economy in the use of materials, facilities, and manpower; and in addition, there shall be taken into consideration the following factors:

"(1) Reasonableness of costs and profits, with particular regard to volume of production, normal earnings, and comparison of war and peacetime products;

"(2) The net worth, with particular regard to the amount and source of public and private capital employed;

"(3) Extent of risk assumed, including the risk incident to reasonable pricing policies;

"(4) Nature and extent of contribution to the defense effort, including inventive and developmental contribution and cooperation with the Government and other contractors in supplying technical assistance;

"(5) Character of business, including source and nature of materials, complexity of manufacturing technique, character and extent of subcontracting, and rate of turn-over;

"(6) Such other factors the consideration of which the public interest and fair and equitable dealing may require, which factors shall be published in the regulations of the Board from time to time as adopted."

These statutory "factors" were developed by the War Contracts Price Adjustment Board during World War II, were incorporated by Congress into the original Renegotiation and Revenue Acts of that era, were continued in the Renegotiation Act of 1951, and have undergone little change since their initial development. Staff Review, supra, n. 1, at 23 and nn. 34-36.

n3 Prior to July 1971, de novo review was by the Tax Court. See 85 Stat. 98.

n4 Through June 30, 1970, 3,524 out of 4,006 cases not resulting in clearances terminated by agreement. Of the remaining 482 cases, the Board's unilateral orders were challenged in court in 203 cases.

n5 The description of the renegotiation process is of the process existing between 1962 through 1965 - the period in which the documents relevant to this case were generated within the Board - notwithstanding changes made since. Unless otherwise indicated, all citations to the Code of Federal Regulations throughout this opinion are to the Renegotiation Board's regulations in effect during this period (i.e., the Code as revised January 1, 1967).

Persons holding contracts or subcontracts with certain departments of the Government were required to file financial statements as prescribed by the Board, 50 U.S.C. App. § 1215(e)(1) (1964 ed.); 32 CFR Part 1470, if their receipts from those contracts met the requisite jurisdictional amount, 50 U.S.C. App. § 1215(f). These statements [*173] were reviewed by the staff of the Board, and, if that initial review indicated the possibility that the contractor realized "excessive" profits, the "case" was referred to one of two Regional Boards for further action. n6 At the time of this assignment, [**1495] each case was designated as a Class A case or a Class B case: the former if the contractor had reported profits of more than $ 800,000 on the relevant contracts covered in his financial statement, and the latter in all other cases. n7 The principal difference between Class A cases and Class B cases was that the Regional Boards had some final decisional authority in the latter and none in the former. 32 CFR §§ 1471.2(b), 1473.2(a), 1474.3(a), and 1475.3(a). Since the documents sought by respondent in this case were all generated in Class A cases, only the procedure applicable to those cases will be discussed.

n6 The reference is normally made on the basis of geographical considerations, 32 CFR § 1471.2(a). These Regional Boards were established in 1952 by regulation, 32 CFR § 1451.32, pursuant to statutory authorization, 50 U.S.C. App. § 1217(d). Unlike members of the
Board, who are appointed to the Board by the President, Regional Board members are civil servants.

n7 Under certain circumstances, cases may be redesignated after their initial designation. 32 CFR § 1471.2(f).

After reference to a Regional Board, a case was usually assigned to a staff team consisting of an accountant and a renegotiator. n8 This team, after determining what further information from the contractor was required, secured such information and received any submissions the contractor might have wanted to make with regard to his case, including his position concerning the statutory factors that largely determined whether he had received "excessive profits," 50 U.S.C. App. § 1213 (e). A document entitled "Report of Renegotiation" was then prepared by the team. Part I of that report, the accountant's section, contained pertinent financial and accounting data and was furnished to the contractor upon request. n9 Part II of the Report of Renegotiation, prepared by the renegotiator, and not furnished to the contractor, generally contained "an analysis and evaluation of the case; and a recommendation with respect to the amount, if any, of excessive profits for the fiscal year under review." 32 CFR § 1472.3 (d). According to testimony given in this case, a Part II in outline form would be as follows: S

"A. Sources of Information
"B. Application of Statutory Factors:
"1. Character of Business
"2. Capital Employed
"3. Extent of Risk Assumed
"4. Contribution to the Defense Effort
"5. Efficiency
"6. Reasonableness of Costs and Profits
"(a) Costs
"(b) Pricing

"(c) Profits
"C. Special Matters
"D. Conclusion and Recommendation.

n8 During the years 1962-1965, a renegotiator might be a staff member employed by the Regional Board or a member of the Regional Board itself. Under the Board's current regulations, a member of the Regional Board who acts as a renegotiator in a specific case is thereafter barred from participation in the case as a member of the Regional Board. 32 CFR § 1472.3 (d) (1974). There was no comparable regulation in effect during the period relevant to this case.

n9 32 CFR § 1472.3 (d). Under 1972 amendments to the regulations, the Report of Renegotiation was discontinued and was replaced by other reports not relevant to this case. See generally 32 CFR §§ 1472.3 (e)-(g), and (i) (1974).

After a Report of Renegotiation was prepared, but prior to its submission to the Regional Board, the team assigned to the case endeavored to meet with the contractor to resolve "any issues or disputed matters of fact, law or accounting." 32 CFR § 1472.3 (b). The report was then submitted to the Regional Board.

After reviewing the Report of Renegotiation and the case file, the Regional Board would make a "tentative recommendation" with respect to the amount of excessive profits realized in the fiscal year under review." 32 CFR § 1472.3 (e). n10 This "tentative recommendation" could "be in an amount greater than, equal to, or less than the amount recommended in the Report of Renegotiation." Ibid. After a "tentative recommendation" was made, the contractor, unless he declined, attended a meeting with the renegotiation team at which he was informed of the tentative recommendation of the Regional Board, as well as the Regional Board's reasons therefor, and was afforded the opportunity to respond. The Regional Board would then enter a "final recommendation" either that a clearance be issued or that excessive profits be found in an amount greater than, equal to, or less than the tentative
recommendation reached previously. If this final recommendation of the Regional Board corresponded to that of the staff team or panel, the report would be signed by the chairman of the Regional Board, signifying the approval of the staff or panel recommendation; if the Regional Board's final recommendation differed from the prior recommendation, an addendum would be attached to the report. The Report of Renegotiation with addenda, if any, will hereafter be referred to for convenience as the Regional Board Report.

n10 Under current regulations, the Regional Board no longer makes this "tentative recommendation" in Class A cases, 32 CFR §§ 1472.3 (k) and (l) (1974).

[*176] (i)

Assuming the Regional Board did not recommend a clearance, it notified the contractor of its final recommendation in an effort to obtain an agreement. Toward this end, the contractor, upon request, would be furnished a "summary of the facts and reasons" (Summary) upon which the recommendation was based. 32 CFR § 1472.3 (i). n11 If a contractor did not request such a document, there is no indication that one was ever prepared in his case.

n11 This document was made available to the general public by regulation on February 24, 1971. 32 Fed Reg 3808, 32 CFR § 1480.5 (a) (1972). When the Board first made the summaries of facts and reasons available to the public by regulation, it specifically stated that its action was taken "[w]ithout regard to the provisions of 5 U.S.C. [§] 552 (a)(2)...." Ibid. Subsequent to the effective date of that regulation, the District Court in this case, notwithstanding the fact that the controversy over respondent's access to the summaries of facts and reasons sought in this action had apparently been mooted, held that these documents must be made available under the ACT as "final opinions" of either the Board or the Regional Board, except in certain circumstances. 325 F. Supp. 1146, 1151-1152 (DC 1971). The Board has since amended its regulations, indicating that its own interpretation of the Act as to these documents is now consistent with that of the District Court. 32 CFR § 1480.5 (a) (1974). Under current Board regulations, the contractor automatically receives a document entitled "Proposed Opinion," if he has not indicated a willingness to enter into an agreement with the Board. 32 CFR § 1477.3 (a) (1974).

If the contractor declined to enter into an agreement, the case was then reassigned to the Board, to which the case file including the Regional Board Report was transmitted. The case was then assigned to a "division" of the Board, usually consisting of three of its five members, which would undertake a study of the case. Staff personnel would go over both Part IA and Part II of the Regional Board Report and indicate, in memoranda, their agreement or disagreement with the recommendation made by the Regional Board. At an appropriate juncture, the contractor would be afforded an opportunity to meet with the division members to discuss his case and submit additional relevant material. The division, in due course, would reach its own decision as to what recommendation should be made to the Board, "not... bound or limited in any manner [**1497] by any evaluation, recommendation or determination of the Regional Board." 32 CFR § 1472.4 (b). The division would then submit to the full Board a report of the case, prepared by one of the members (Division Report), and including a recommendation for final disposition along with additional or contrary views, if [***67] any, of the other division members. The Division Report is one of the categories of documents sought by respondent under the Act.

The Board would then meet, each member having had the opportunity to study the case file and the report submitted on behalf of the division, discuss the case, and vote on a final disposition. Neither the Board nor any of its members were bound by any prior recommendations. The Board was free, after discussion, to reject the proposed conclusion reached in the Division Report, or to accept it for reasons other than those set forth in the report. 32 CFR § 1472.4 (d). Assuming the Board did not decide that a clearance should issue, the contractor was then notified of the Board's conclusion and would be given, at his request, a Summary to enable him to decide whether to enter into an agreement with the Board. If an agreement was not reached, the Board would then enter a unilateral order within a specified time, 32 CFR Part 1475, and would issue, pursuant to statute, at the request...
of the contractor, a "statement of such determination, of
the facts used as a basis therefor, and of its reasons for
such determination. " 50 U.S.C. App. [*178] § 1215 (a)
(Statement). n12 Absent a contractor's request for a
Statement, there is no indication that one was ever
prepared in his case. For this type of case, the
renegotiation process thus came to an end. n13

n12 The "Summaries" and "Statements" were
similar in both format and content. App. 35-41;
32 CFR § 1477.4. Under current Board
regulations, the Regional Board now issues to the
contractor a "Proposed Opinion," in lieu of the
"summary of facts and reasons" discussed above,
and furnishes to the contractor a "Regional Board
Opinion" when the Regional Board's
recommendation is forwarded to the Board. 32
CFR §§ 1477.3 (a) and (c) (1974). The Board also
issues a "Final Opinion" in place of the Statement
at the same time as it enters a unilateral order. 32
CFR § 1477.3 (b) (1974). All of these documents
are available to the public. 32 CFR § 1480.5 (a)
(1974).

n13 A dissatisfied contractor had the right at
this point to bring an action in the Tax Court,
which had jurisdiction to determine de novo
whether excessive profits had been realized (see
n. 3, supra); jurisdiction of these cases has
subsequently been transferred to the Court of
Claims. See Renegotiation Board v. Banner

(ii)

If the Regional Board concluded that no excessive
profits had been realized by a particular contractor and
that a clearance should therefore issue - or if the
contractor agreed with the Regional Board as to an
amount of excessive profits before the case was
reassigned to the Board - then a Division Report was
never created in that case. Instead, a "final
recommendation" that a clearance be issued or that the
agreement be consummated was sent to the Board, and
the Board considered the case on the basis of the
Regional Board Report, together with comments made by
the Board's accounting and review divisions. After
meeting and discussing the case on the basis of these
documents, the Board decided whether to approve the
Regional Board's conclusion. If it did, appropriate closing
documents were prepared by the [*179] Regional Board.
No explanation of the Board's reasons for agreeing with
the Regional Board's recommendation was prepared or
sent to the contractor; and it is not possible to know
whether the Board agreed with the reasoning [***68] of
the Regional Board Report or just its conclusion. If the
conversion of the Regional Board was not approved,
[*1498] the case was either returned to the Regional
Board for further factfinding, or assigned to a division of
the Board as though no recommendation agreeable to the
contractor had ever been made. The Regional Board
Reports in the category of cases in which clearances were
recommended and approved by the Board - and therefore
in which no Division Report was created - is the other
type of document in issue in this case.

II

Against the foregoing backdrop, respondent filed a
complaint, pursuant to the Act, in the District Court on
June 27, 1968, seeking disclosure of "certain final
opinions, orders and identifiable records" related to or
issued during renegotiation proceedings involving 14
other companies during the period 1962-1965. n14
Respondent additionally sought certain documents related
to its then-pending renegotiation proceedings before the
Board for 1965, but later agreed that it was not seeking
access to "[i]ntra-agency memoranda and
communications consisting of advisory [*180] opinions,
conclusions recommendations, and analyses prepared by
personnel and members of the Board" in its own case.
The District Court denied relief. On appeal, the Court of
Appeals appears to have assumed that the "opinions"
sought by respondent were limited to Statements and
Summaries as defined in 32 CFR § 1480.8. n15 138 U.S.
On this basis, the Court of Appeals reversed, rejecting the
claim of the Renegotiation Board that the documents
sought were "completely immune" from disclosure under
5 U.S.C. § 552(b)(4), the provision of the Act exempting
certain privileged or confidential information submitted
to the Government by any person. n16 The court, stating
that the Board was required to make available "final
opinions, including concurring and dissenting [***69] opinions," n17 remanded the case to the Court of
Claims for further proceedings in which the requested documents
were to be made available after "suitable deletions." 138
By reference in its complaint to correspondence between it and the Board of April 26, 1968, respondent requested access to "final opinions, determinations, unilateral orders, agreements, clearance notices and letters not to proceed issued in the adjudication of renegotiation cases" and "written summaries of the facts and reasons upon which such final opinions, determinations, unilateral orders and agreements have been reached." Nothing in the complaint or the letter suggests that, at that time, respondent sought the Regional Board Report, or the Division Report, in any of these renegotiation cases.

Title 32 CFR § 1480.8 read in pertinent part:

"Except as authorized... opinions and orders will not be published or made available to the public... inasmuch as they are regarded as confidential... by reason of the confidential data furnished by contractors.... For the purposes of this paragraph, the term 'opinion' includes a statement furnished pursuant to [32 CFR Part 1477] and the term 'order' includes an agreement to eliminate excessive profits, as well as a unilateral determination. Opinions and orders are not cited as precedents in any renegotiation proceedings." Part 1477, as written during the period 1962-1967, included only Statements and Summaries.

Title 5 U.S.C. § 552(b)(4) exempts from disclosure "trade secrets and commercial or financial information obtained from a person and privileged or confidential matters."

A more detailed description of the documents sought is set out in the opinion written by the District Court after the initial remand from the Court of Appeals, 325 F. Supp., at 1151.

Subsequent to the remand of the case by the Court of Appeals, the Board turned over to respondent certain documents, including Statements and Summaries, in attempted compliance with the mandate of that court. Respondent, not satisfied with the documents so disclosed, moved in the District Court for the disclosure, inter alia, of (1) Division Reports in all cases in which neither "Statements" nor "Summaries" were created; (2) Regional Board Reports resulting in a clearance; and (3) any document concurring in or dissenting from (1) and (2) above.

On the question whether these documents were "final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases," 5 U.S.C. § 552(a)(2)(A), the District Court permitted respondent to take the deposition of the then Chairman of the Board. That deposition of the Chairman constitutes almost the only evidence of record in this case bearing on this question other than the pertinent statutes and regulations. Although conceding, as it had to on the basis of the Chairman's deposition, that only the Board had final decisional authority, and that it studies and considers, but does not adopt Regional Board or Division Reports, the District Court held that these reports were "final opinions" for purposes of the Act and rejected the Board's contention that the documents were specifically exempted from disclosure under subsection (b)(5) of the Act, 5 U.S.C. § 552(b)(5) (Exemption 5), which encompasses:

"inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency."

As to the Regional Board Reports in clearance cases, the court characterized the clearance as the "decision" of the Regional Board "unless the Board is not in accord"; and held that "[i]n order for the public to be fully informed, the reasons behind the clearance... must be made available and in this type of case such... reasons are found in the Regional Board's report." As to the Division Reports, the court said that, although the Board may disagree with the reasoning of the report, "[i]t is in fact the last document which explains reasons for the Board's decision," it should "at the very least... reflect the analysis of one member," and thus it must be disclosed at least as a "concurring [or] dissenting opinion." 5 U.S.C. § 552(a)(2)(A). On appeal, the Court of Appeals affirmed the "findings of fact" and "conclusions" reached by the District Court and found two additional grounds supportive of the lower court's judgment as to the Regional Board Reports. The court held that, even if the Regional Board Reports recommending a
clearance subsequently approved by the Board were not "final opinions" of the Board; they were disclosable as final opinions of the Regional Board: the Regional Board itself was to be considered an "agency" for purposes of the Act, and the reports were certainly its "final opinions" and, as such, they were disclosable under the express provisions of 5 U.S.C. § 552(a)(2)(A) and therefore outside the scope of Exemption 5. In concluding that the Regional Boards are agencies, the court relied in part on the power of the Regional Boards finally to dispose of certain Class B cases. n19 In concluding that its decisions were "final," notwithstanding inevitable Board review, it analogized the power of the Regional Board in Class A cases to the power of a United States district court: the former's decisions being reviewable by the Board and the latter's by a United States court of appeals. The fact that the Regional Board's decisions were subject to review did not obviate the fact, any more than it does in the case of a United States district court, that its decisions are "final." 157 U.S. App. D.C. 121, 128, 482 F.2d 710, 717 (1973), and that its report leading to a clearance was perforce a "final opinion" of an "agency" subject to disclosure under the Act. The Court of Appeals additionally held that the Regional Board Reports were, in any event, "identifiable records," 5 U.S.C. § 552(a)(3), which are disclosable, unless exempt, and that these reports were not within the purview of Exemption 5 of the Act, because they "are not solely part of the consultative and deliberative process, but rather reflect actual decisions communicated outside the agency." 157 U.S. App. D.C., at 129, 482 F.2d, at 718. See NLRB v. Sears, Roebuck & Co., ante, p. 132.

The Board brought the case to this Court and we granted certiorari, 417 U.S. 907 (1974), setting the case for argument with NLRB v. Sears, Roebuck & Co., ante, p. 132, in order to resolve the important questions presented particularly with respect to the proper construction and interpretation of Exemption 5 of the Act. For reasons set forth hereafter, we reverse the judgment of the Court of Appeals.

III

n19 The District Court had held the reports of Regional Boards to be disclosable only in instances where a regional Board made a final recommendation for a clearance and the Board concurred in the recommendation. Id., at 1154. The Court of Appeals did not purport to extend the holding of the District Court to Regional Board Reports in other contexts.

n21 Grumman claims that the documents are "final opinions" expressly made disclosable, pursuant to 5 U.S.C. § 552(a)(2)(A). However, as we noted in the companion case of NLRB v. Sears, Roebuck & Co., ante, at 147-148, a conclusion that the documents are within...
Exemption 5 would be dispositive in the Government's favor, since the Act "does not apply" to such documents; and a contrary conclusion would be dispositive against the Government, since it concedes that the documents are "identifiable records" otherwise disclosable pursuant to 5 U.S.C. § 552(a)(3). Thus, strictly speaking, the question whether the documents are "final opinions" is relevant only in deciding whether Exemption 5 applies to them and is important only because we have construed Exemption 5 in NLRB v. Sears, Roebuck & Co., ante, at 153-154, not to include "final opinions" within the meaning of 5 U.S.C. § 552(a)(2)(A).

A. Regional Board Reports

It is undisputed that the Regional Boards had no legal authority to decide whether a contractor had received "excessive profits" in Class A cases. n22 [**1501] In such cases, the Regional Boards could investigate and recommend, but only the Board could decide. 32 CFR §§ 1472.3-1472.4. The reports were prepared long before the Board reached its decision. The Board used the Regional Board Report as a basis for discussion and, even when it agreed with the Regional Board's conclusion, it often did so as a result of an analysis of the flexible statutory factors completely different from that contained in the Regional Board Report. Chairman Hartwig testified: I

"[W]hen the recommendation clearance of the Regional Board comes up on the Board agenda, the Board simply approves or disapproves the clearance. It does not adopt any of the memoranda that are before it. It does not ratify or [***72] adopt any of these staff memoranda. It simply, in the exercise of its judgment, says it is a clearance or it isn't a clearance. [*186]

And there is no Board-adopted document which you could call an opinion." App. 79.

n22 We decline to consider whether this case would be different if the Regional Boards had de facto decisional authority - i.e., if, instead of making up its own mind in each case, the Board "reviewed" the Regional Board's recommendation under a clearly erroneous or some other deferential standard; or if the Board failed even to review the vast bulk of the reports, absent special circumstances. There is no evidence in the record indicating that the Regional Boards had such de facto authority. Indeed, the evidence is to the contrary. In a recent review by the Comptroller General of 209 cases, the Board concurred in the Regional Board's recommendation only 85 times. Comptroller General, Report to the Congress: The Operations and Activities of the Renegotiation Board 33-34 (B-163520 - May 1973).

[***LedHR1B] [1B]The Regional Board Reports are thus precisely the kind of predecisional deliberative advice and recommendations contemplated by Exemption 5 which must remain uninhibited and thus undisclosed, in order to supply maximum assistance to the Board in reaching its decision. Moreover, absent indication that its reasoning has been adopted, there is little public interest in disclosure of a report. "The public is only marginally concerned with reasons supporting a [decision] which an agency has rejected, or with reasons which might have supplied, but did not supply, the basis for a [decision] which was actually adopted on a different ground." NLRB v. Sears, Roebuck & Co., ante, at 152. Indeed, release of the Regional Board's reports on the theory that they express the reasons for the Board's decision would, in those cases in which the Board had other reasons for its decision, be affirmatively misleading. Sterling Drug, Inc. v. FTC, 146 U.S. App. D.C. 237, 246-247, 450 F. 2d 698, 707-708 (1971); International Paper Co. v. FPC, 438 F. 2d 1349, 1358 (CA2), cert. denied, 404 U.S. 827 (1971). Accordingly, these reports are not "final opinions," they do fall within the protection of Exemption 5, and they are not subject to compulsory disclosure pursuant to the Act.

The Court of Appeals' attempt to impute decisional authority to Regional Boards by analogizing their final recommendations to the final decisions of United States district courts must fail. The decision of a United States district court, like the decision of the General Counsel of the NLRB discussed in NLRB v. Sears Roebuck & Co., ante, at 158-159, n. 25, has real operative effect independent of "review" by a court of appeals: absent appeal by one of the parties, the decision has the force of law; and, even if an appeal is filed, the court [*187] of appeals will be bound, within limits, by certain of the
The recommendation of a Regional Board, by contrast, has no operative effect independent of the review: consideration of the case by the Board is not dependent on the decision by a party to "appeal" - such consideration is an inevitable event without which there is no agency decision; and the recommendation of the Regional Board carries no legal weight whatever before the Board - review by the latter is, as the Court of Appeals conceded, de novo. Indeed, "review" is an entirely inappropriate word to describe the process by which the Board decides whether to issue a clearance following a recommendation to that effect by the Regional Board. The latter's recommendation is functionally indistinguishable from the recommendation of any agency staff member whose judgment has earned the respect of a decisionmaker. There is simply no sense in which Regional Boards have the power to make "final dispositions" and thus no sense in which the explanations of their recommendations can be characterized as "final opinions." n24 See NLRB v. Sears, Roebuck & Co., ante, at 158-159.

n23 Fact determinations, for example, are reviewable under a "clearly erroneous" standard and certain legal judgments only for abuse of discretion.

n24 The distinction, between "recommendations" and "final opinions" subject to review, for Exemption 5 purposes is compelling. In order that a decisionmaker consider all the arguments in support of all the options, those who recommend should be encouraged to make arguments which they would not make in public and with which they may even disagree. However, if their recommendations were to have operative effect and thus qualify as decisions - even though subject to review - they should be discouraged from basing their decisions on arguments which they would not make publicly and with which they disagree.

In concluding that the Regional Board Reports are within the scope of Exemption 5, it is unnecessary to decide whether, as respondent strenuously argues and the Court of Appeals concluded, the Regional Boards are themselves "agencies" for the purposes of the Act. Respondent and the court below proceed on the premise that the final written product of an "agency's" deliberations may never fall within Exemption 5, and reason that since the Regional Board Report is the final product of the Regional Board, it must therefore be disclosable if the Regional Board is a separate agency. n25 The premise is faulty, however, overlooking as it does the fact that Exemption 5 does not distinguish between inter-agency and intra-agency memoranda. By including inter-agency memoranda in Exemption 5, Congress plainly intended to permit one agency possessing decisional authority to obtain written recommendations and advice from a separate agency not possessing such decisional authority without requiring that the advice be any more disclosable than similar advice received from within the agency. Thus, if the Regional Boards are agencies for Class A purposes, their final recommendations are inter-agency memoranda; and, if they are not agencies separate from the Board, their recommendations are intra-agency memoranda. In either event, the Regional Boards' total lack of decisional authority brings their reports within Exemption 5 and prevents them from being "final opinions."

n25 We note in passing that, while the conclusion of the court below that the Regional Board's status as an agency stemmed from its power to issue "orders" in Class B cases finds support in the cases, International Paper Co. v. FPC, 438 F.2d 1349, 1359-1359 (CA2), cert. denied, 404 U.S. 827 (1971); Washington Research Project, Inc. v. Department of HEW, 164 U.S. App. D.C. 169, 504 F. 2d 238 (1974), cert. pending, No. 74-736, the Court of Appeals never considered the possibility that the Regional Board might be an agency for Class B purposes and not for Class A purposes.

[*189] B. Division Reports

[***LedHR2B] (2B) It is equally clear that a division of the Board has no legal authority to decide. Once again, it may analyze and recommend, but the power to decide remains with the full Board. The evidence is uncontradicted that the Division Reports were prepared before the Board reached its decision, were used by the
full Board as a basis for discussion, and, as the Chairman testified, were "prepared for and designed to assist the members of the Board in their deliberations"; nor is the discussion limited to the material and analysis contained in the Division Report. Following the discussion, any Board member may disagree with the report's conclusion or agree with it for reasons other than those contained in the report. Indeed, as Chairman Hartwig testified, it is likely that this will occur because of the highly judgmental nature of the Board's decisions given the number and generality of the statutory criteria. In any event, the reasoning of the Division Report is never adopted - though its conclusion may be - and no effort is made to reach agreement on anything but the result.

It is true that those who participate in the writing of the Division Report are among those who participate in the Board's decision, and that, human nature being what it is, they may not change their minds after discussion by the full Board. This creates a greater likelihood that the Board's decision will be in accordance with the Division Report than is the case with respect to a Regional Board Report and that, where the Board's decision is different, the Division Report will reflect the final views of at least one of the Board's members. See NLRB v. Sears, Roebuck & Co., ante, at 158-159, n. 25. However, this is not necessarily so. The Board obviously considers its discussion following the creation of the Division Report to be of crucial importance to its decision for, notwithstanding the fact that a division is made up of a majority of the Board, it has been delegated no decisional authority. The member of the Board who wrote the report may change his mind as a result of the discussion or, consistent with the philosophy of Exemption 5, he may have included thoughts in the report with which he was not in agreement at the time he wrote it. The point is that the report is created for the purpose of discussion, and we are unwilling to deprive the Board of a thoroughly uninhibited version of this valuable deliberative tool by making Division Reports public on the unsupported assumption that they always disclose the final views of at least some members of the Board. n26

n26 Since all of the members of the division are free to change their minds after deliberation and are free to place thoughts or arguments in the Division Reports which were only tentative in the first place, we need not reach the question whether a concurring or dissenting opinion must be disclosed even where no opinion expressing the view of the agency is written.

Respondent argues that Division Reports, as well as concurrences or dissents thereto, constitute "final opinions" of the Board or individual members of the Board, relying on a specific reference, assertedly made to such documents, in the House Report which accompanied the Act, H.R. Rep. No. 1497, 89th Cong., 2d Sess. (1966). That report, in speaking to the Committee's understanding of what is now codified as 5 U.S.C. § 552(a)(2)(A), stated:

"[Subsection (A)] requires concurring and dissenting opinions to be made available for public inspection. The present law, requiring most final opinions and orders to be made public, implies that dissents and concurrences need not be disclosed. As a result of a Government Information Subcommittee investigation a number of years ago, two major regulatory agencies agreed to make public the dissenting opinions of their members, but a recent survey indicated that five agencies - including... the Renegotiation Board - do not make public the minority views of their members." H.R. Rep. No. 1497, supra, at 8.

This statement from the legislative history of the Act supports the proposition that Congress intended the Board to be subject to the Act's provisions, and at first blush lends support to respondent's contention that Congress assumed, in passing the Act, that the Board was issuing "final opinions" in cases, that the Board was withholding concurrences and dissents to those final opinions, and that § 552(a)(2)(A) was designed to put an end to this practice. Our research convinces us, however, that this language from the House Report is not to be so read. The "survey" referred to in the report was conducted in 1963 by the Foreign Operations and Government Information Subcommittee of the Committee on Government Operations of the
House. The unpublished data gathered during that survey indicate that, in response to three questions submitted by the subcommittee to the Board, concerning its practices with respect to opinion writing and publication, the Board stated:

"Except as authorized in Renegotiation Board Regulations 1480.4 (a) (attached), opinions and orders of the Renegotiation Board are not published or made available to the public (see RBR [32 C.F.R. § 1480.8])...."

As our prior discussion of 32 CFR § 1480.8, n. 15, supra, makes clear, the "opinions" to which the Board referred were Statements and Summaries. Thus, the reference to concurring and dissenting opinions in the House Report, with respect to the Renegotiation Board, was not to Division Reports but was to nonexistent concurrences to and dissents from Statements and Summaries which were already being made public.

[*191]

The judgment of the Court of Appeals is
Reversed.

Mr. JUSTICE DOUGLAS dissents.

Mr. JUSTICE POWELL took no part in the consideration or decision of this case.

UNITED STATES COURT OF APPEALS, FIFTH CIRCUIT

613 F.2d 1314; 1980 U.S. App. LEXIS 19498; 27 Cont. Cas. Fed. (CCH) P80,280

March 19, 1980

PRIOR HISTORY: [**1]

Appeal from the United States District Court for the Northern District of Texas.

COUNSEL:

Alice Mattice, Leonard Schaitman, Dept. of Justice, Appellate Section, Washington, D. C., for defendant-appellant.

Wesner & Wyler, C. Thomas Wesner, Jr., Dallas, Tex., for plaintiffs-appellees.

JUDGES:

Before BROWN, TJOFLAT and GARZA, Circuit Judges.

OPINION BY:

BROWN

OPINION:

[*1315]

After its bid for a contract to overhaul airborne generators was rejected by the Air Force, Appellee Shermco Industries, Inc. (Shermco) filed a protest with the General Accounting Office (GAO) and requested from the Air Force the production of several documents in connection with this protest. [*1316] The Air Force produced all but seven of these documents and Shermco sued for their disclosure under the Freedom of Information Act, 5 U.S.C. § 552 (1977) (FOIA). The District Court ordered the production of the documents, holding that the exemptions of 5 U.S.C. §§ 552(b)(4) and (5) were inapplicable. n1 We reverse.

I. Factual [**2] Background

In 1976, Shermco had a five-year contract with the Air Force to overhaul airborne generators at McClellan Air Force Base near Sacramento, California. The Air Force terminated the contract in its third year, citing "quality problems," and solicited offers from a number of contractors, including Shermco, to continue the work. On October 14, 1976, Shermco was informed that Tayko Industries, Inc. (Tayko) was the lowest acceptable bidder and that Shermco's bid was rejected. On October 22, 1976, Shermco filed a protest with the GAO pursuant to 4 CFR Part 20 (1979). Shermco and its president made several requests to the Air Force for information...
concerning Tayko's bid to help Shermco implement its protest. These requests included ones made under FOIA and the Privacy Act. n2 The Air Force produced twenty-four of the requested items but withheld seven others: three legal memoranda which had been attached to the Air Force's response to the protest, the contracting officer's recommendation prepared in connection with the protest, n3 and three documents containing Tayko's basic pricing information, including "items, quantities and unit prices." On November 10, 1977, Shermco filed suit [**3] against the Secretary of the Air Force to obtain these documents, pursuant to FOIA and the Privacy Act.

n3. Since the Air Force has decided to release the contracting officer's recommendation, the disclosure of this document is not at issue on this appeal.

The District Court held that FOIA required the disclosure of all seven documents requested. The Secretary appeals this holding and we reverse. n4

n4. At oral argument, this Court learned that in December, 1978, the GAO denied Shermco's protest. At first glance it seems that this would give the Air Force the right to make a final award of the contract to Tayko and moot the central issue of this appeal, whether or not the Air Force's decision is final. However, Shermco can request reconsideration of the decision by the GAO. 4 CFR § 20.9 (1979). Moreover, Congress has amended the Small Business Administration Act to give the SBA the power to determine the competency of a small business to perform a government procurement contract. This Certificate of Competency, once awarded, is deemed conclusive proof of the small business' abilities, and the contract must be awarded to it. Pub.L. 95-89, Title V, § 501, Aug. 4, 1977, 91 Stat. 561; 15 U.S.C. § 637(b)(7) (West Supp.1979). See House Conference Report 95-535, 1977 U.S.Code Cong. & Admin.News vol. 2 at 821, 851-52. The current status of the proceedings in this case is that the Air Force has not yet awarded the contract to Tayko but is doing the work internally. Thus, there has not yet been a final decision, and since the Appellee still has remedies it can seek from the GAO and the SBA, this appeal is not moot.

[**4]

II. The Cost Proposals And Exemption 4

The Air Force's basis for the withholding of Tayko's cost proposals was Exemption 4 of FOIA, 5 U.S.C. § 552(b)(4), which provides that the Government is not required to disclose

trade secrets and commercial or financial information obtained from a person and privileged or confidential . . . .

The Air Force argued that because there had not been a final award of the contract, this information should remain confidential until a final award was made. To disclose this information before a final decision was made would make it more difficult for the Air Force to make its final decision and would be prejudicial to the low bidder, undermining his competitive advantage.

[*1317] The District Court conceded that the decision was not yet technically final (452 F. Supp. at 322) and that, if there were no final award, Exemption 4 would apply (Id. at 324). However, the Court found that, for purposes of FOIA, the decision was final (Id. at 322), and that "(a)ny need for secrecy (was) no longer present because the award (would) be made either to the successful bidder or the protester . . . ." Id. at 324. Therefore, the Court concluded, the [**5] cost proposals were no longer confidential nor exempt.

The purpose of Exemption 4 is twofold to protect the interests of individuals who disclose confidential information to government agencies and to protect the Government as well. National Parks and Conservation Association v. Morton, 162 U.S.App.D.C. 223, 228, 498 F.2d 765, 770 (D.C. Cir. 1974). n5 This information concerning Tayko's cost proposals, in the hands of a competitor prior to the time of a final award, would jeopardize the Air Force's ability to discern clearly which bidder could do the best job for the lowest price. Moreover, the nondisclosure of this information is in keeping with the Armed Services Procurement Regulations (ASPR) policy prohibiting bidding with knowledge of competing bids. n6 Nondisclosure prior to final award also encourages competing bidders to enter
bids which accurately reflect their capabilities and their costs; this secrecy protects the bargaining power of each competitor's bid. Absent the assurance of this confidentiality, bidders might be reluctant to disclose such information to the procuring government agency.

n5. In Federal Open Market Committee of the Federal Reserve System v. Merrill, 443 U.S. 340, 355-360 99 S. Ct. 2800, 2810-2812, 61 L. Ed. 2d 587, 601-03 (1979), the need for nondisclosure of information received by an agency concerning the award of a contract, prior to the award of that contract, is acknowledged and discussed in the context of Exemption 5, the exemption for certain intra- and inter-agency memoranda (discussed infra at 1318-1319. Further discussion of the Merrill opinion is at note 11, infra. We believe the need for secrecy of commercial information prior to the award of a contract is equally, if not more important in the context of Exemption 4, where the information is derived from a private party, rather than a government agency.

n6. ASPR 3-805.3(b) & (c); 32 CFR 3.805.3(b) & (c) (1976):

3-805.3 Discussions With Offerors.

(b) Discussions shall not disclose the strengths or weaknesses of competing offerors, or disclose any information from an offeror's proposal which would enable another offeror to improve his proposal as a result thereof.

(c) Auction techniques are strictly prohibited; an example would be indicating to an offeror a price which must be met to obtain further consideration, or informing him that his price is not low in relation to another offeror. On the other hand, it is permissible to inform an offeror that his price is considered by the Government to be too high.

On appeal, the Air Force reasserts the same argument that their selection of Tayko as the lowest acceptable bidder did not amount to a final award. To support this contention it cites GAO briefing papers stating that the effect of a GAO ruling in favor of a protestor in a pre-award protest is not necessarily that he will be awarded the contract. It may mean the contract bidding will be reopened to choose the next lowest responsible bidder. [**7] Therefore, the reasons for withholding the cost proposals pursuant to Exemption 4 still exist.

We feel that the District Court misunderstood the bid protest procedure when it characterized the award as a final decision. The October 14th notice to Shermco was of a proposed award to Tayko; it was not a final decision. The District Court's statement that there was no need for secrecy because the award would be made either to Tayko or to Shermco is contrary to GAO protest procedure. It is amply clear from the record and from oral argument that there is a possibility that if the protest were to succeed either before the GAO, the SBA or some other forum, the bidding could be reopened. Thus, the Tayko pricing information [*1318] is covered by Exemption 4 and should not have been disclosed. n7

n7. Recently, in Audio Technical Services, Ltd. v. Department of Army, C.A. 487 F. Supp. 779 (1979), the Federal District Court of the District of Columbia specifically rejected the position of the Northern District of Texas in Shermco and held that bid proposals of a successful bidder for a government contract, sought by an unsuccessful bidder in conjunction with a GAO protest, fell within Exemption 4. Interestingly, the District of Columbia Court so held, even though it characterized the award of the contract as final. Instead, the Court relied solely on the policy considerations, holding Sub silentio that the need for secrecy remains even after a final award.

III. The Legal Memoranda And Exemption 5

The refusal of the Air Force to disclose three legal memoranda attached to its response to Shermco's protest was based on Exemption 5 of FOIA, 5 U.S.C. § 552(b)(5):

inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than
The District Court found the Air Force memoranda to be "legal opinions prepared to assist the contracting officer in making his decision awarding the overhauling contract," which would not normally have been releasable because of this exemption. 452 F. Supp. at 322. However, since, according to the District Court, the Air Force award of the contract to Tayko was a final decision, these intra-agency memoranda in defense of the bid protest became part of the basis of that decision and were releasable under NLRB v. Sears-Roebuck & Co., 421 U.S. 132, 95 S. Ct. 1504, 44 L. Ed. 2d 29 (1975). Moreover, it was the District Court's opinion that by sending these memoranda to the GAO, the Air Force had waived its rights to assert the confidentiality of these otherwise internal staff opinions. 452 F. Supp. at 322. These memoranda had become part of the Air Force's "official position" against the protest by Shermco. For both reasons, these documents were deemed releasable.

A. The Executive Privilege For Communications Relating To Governmental Deliberations

Exemption 5 incorporates at least two types of privileges traditionally available to the Government in civil litigation (i) the attorney-client and attorney work-product privileges and (ii) the executive privilege for information relating to governmental deliberations. NLRB v. Sears Roebuck & Co., supra, 421 U.S. at 149-54; 95 S. Ct. at 1515-1518, 44 L. Ed. 2d at 47-48. See Mead Data Central, Inc. v. United States Department of Air Force, 184 U.S. App. D.C. 350, 225-226, n. 28, 566 F.2d 242, 254-55, n. 28 (D.C. Cir. 1977). For this reason, the Supreme Court has distinguished between pre-decisional communications which are exempt from disclosure and post-decisional communications which are not. NLRB v. Sears, 421 U.S. at 152-53, 95 S. Ct. at 1517, 44 L. Ed. 2d at 49-49; Renegotiation Board v. Grumman Aircraft Engineering Corp., 421 U.S. 168, 184, 95 S. Ct. 1491, 1500, 44 L. Ed. 2d 57, 71 (1975). See Audio Technical Service v. Army, supra. Disclosure of pre-decisional communications presents more danger that governmental sources of information and advice will be inhibited. Besides, there is less public concern for this information, whereas the public is vitally interested in learning an agency's reasons for a final decision which has the effect of law. NLRB v. Sears, supra, 421 U.S. at 151-52, 95 S. Ct. at 1516-1517, 44 L. Ed. 2d at 47-48.

In Sears, the Supreme Court emphasized that this distinction is supported by FOIA itself 5 U.S.C. § 552(a)(2)(A) n10 which requires the disclosure of all final agency opinions. 421 U.S. at 153, 95 S. Ct. at 1517, 44 L. Ed. 2d at 49. Thus, the Supreme Court concluded that if an advisory opinion of an agency staff member is expressly incorporated into a final agency decision, the policy considerations supporting the nondisclosure of this type of pre-decisional communication are no longer operable. Once the agency adopts its employee's advice as its own, the agency will defend its employee and he need no longer be concerned with adverse consequences if his communication becomes a matter of public record. Moreover, his advice, as part of a final agency opinion, has now become a matter of more profound public interest. 421 U.S. at 161, 95 S. Ct. at 1521, 44 L. Ed. 2d at 53. Thus, in effect, what was once a pre-decisional communication becomes post-decisional and is no longer exempt from disclosure under Exemption 5.

n10. S 552. Public information; agency rules, opinions, orders, records, and proceedings
(a) Each agency shall make available to the public information as follows:

(2) Each agency, in accordance with published rules, shall make available for public inspection and copying

(A) final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases;

Grumman, supra, 421 U.S. at 184, 95 S.Ct. at 1500, 44 L. Ed. 2d at 71, lists the criteria for identifying a post-decisional communication: (i) The decision must, of course, be final. (ii) The agency of which the information is demanded must possess the power to make the final decision into which the pre-decisional information is incorporated. (iii) Finally, the information must be adopted as part of the agency's reasoning for its decision. Because the Grumman decision relied on Sears, its companion case, we believe these criteria also should apply to the Sears hybrid, the pre-decisional communication turned post-decisional. With respect to the third criterion, Sears goes even further than Grumman and holds that the hybrid, to become a post-decisional communication, must be "expressly adopt(ed) or incorporate(d) by reference" into the final opinion. 421 U.S. at 161, 95 S.Ct. at 1521-1522, 44 L. Ed. 2d at 53.

In holding that the three legal memoranda submitted to the GAO by the Air Force did not fall within Exemption 5, the District Court followed Sears but then held that these once pre-decisional memoranda, by being submitted to the GAO in connection with the Shermco protest, were [*1312] incorporated into the Air Force's final decision to award the contract to Tayko, and therefore had become post-decisional.

In the leap from Sears to this case we find this conclusion unacceptable for two reasons. First, as we stated earlier in this opinion, the proposed award of the contract to Tayko was not the final opinion of the Air Force. Because the decision was not yet final, all the considerations [*1320] which support the nondisclosure of pre-decisional communications were still in effect, as was Exemption 5. Second, even if it were a final decision, these memoranda were not expressly incorporated by reference into the opinion. They had been used by the Air Force internally in reaching their initial conclusion that Tayko was the lowest bidder, and they were produced to the GAO in aid of their defense against Shermco's protest, but they were never attached to any formal written decision by the Air Force.

n11. Shermco cites Federal Open Market Committee v. Merrill, supra, "for the proposition that as soon as the Government awards a contract, any protection under Exemption 5 for any information generated in the process leading up to the award of the contract expires."

The specific holding of the Supreme Court in Merrill was "that Exemption 5 incorporates a qualified privilege for confidential commercial information, at least to the extent that this information is generated by the Government itself in the process leading up to awarding a contract." 443 U.S. at 360, 99 S.Ct. at 2812, 61 L. Ed. 2d at 603. This newly created but qualified exception is in addition to the two traditional Exemption 5 privileges for attorney work-products and executive deliberations. We do not believe this new category of Exemption 5 information includes legal memoranda prepared by an agency to aid in its deliberations at issue in this case. We find two passages in Merrill to support this conclusion.

First, the Supreme Court found support for the creation of this privilege in F.R.Civ.P. 26(c)(7). This procedural rule permits a District Court to issue a protective order so "that a trade secret or other confidential research, development or commercial information not be disclosed or be disclosed only in a designated way." The analogous privilege under Exemption 5 was created by the Supreme Court only for confidential commercial information, and did not mention confidential research, a category in which we believe legal memoranda more readily fall. We decline to read "Exemption 5 confidential commercial information" so broadly as to include every type of information which could be protected under Rule 26(c)(7) because the Merrill opinion expressly states "that Exemption 5 was (not) intended to incorporate every privilege known to civil discovery." 443 U.S. at 360, 99 S.Ct. at 2809, 61 L. Ed. 2d at 599.
Second, the Supreme Court distinguishes between pre-decisional deliberations (and we have already held that the legal memoranda in the case before us are pre-decisional) and confidential commercial information which there is no need to protect after a contract is awarded. 443 U.S. at 360, 99 S. Ct. at 2812, 61 L. Ed. 2d at 603. To us this is another indication that pre-decisional deliberations and confidential commercial information are not the same thing.

The language in the Merrill opinion on which Shermco relies in support of its proposition that the right to invoke Exemption 5 disappears as soon as a contract is awarded is as follows:

By including Inter-Agency memoranda in Exemption 5, Congress plainly intended to permit one agency possessing decisional authority to obtain written recommendations and advice from a separate agency not possessing such decisional authority without requiring that the advice be any more disclosable than similar advice received from within the agency.

Waiver occurs when an agency makes its information more broadcast than is allowed by its own regulations, Cooper v. Department of Navy, 594 F.2d 484 (5th Cir. 1979), but it does not occur when an agency whose action is being reviewed forwards to a reviewing agency legal memoranda in support of its position:

The theory behind a privilege for confidential commercial information generated in the process of awarding a contract, however, is not that the flow of advice may be hampered, but that the Government will be placed at a competitive disadvantage or that the consummation of the contract may be endangered. Consequently, the rational for protecting such information expires as soon as the contract is awarded or the offer withdrawn.

443 U.S. at 360, 99 S. Ct. at 2812, 61 L. Ed. 2d at 603.

Not only are the legal memoranda at issue in this case not confidential commercial information, but we do not believe the Supreme Court, when it made the above statement, was necessarily creating a rule which applies to all communications exempt under § 552(b)(5). Moreover, we do not believe the Supreme Court was attempting to define a final decision as equivalent to the award of a contract or pinpoint when the final award of a contract technically is made. The finality of an agency decision was not even at issue in Merrill. For all of the reasons we state above, we do not think the Merrill case is applicable here.

In sum, we hold that the Air Force's notice to Shermco was a proposed, and not a final, award of the contract to Tayko. There is a possibility that, if the GAO or its successor under the new law, the SBA, upholds the protest, that bidding will be reopened. All the policy reasons for exempting from disclosure both the Tayko cost proposals and the legal memoranda of the Air Force still operate to make this information immune from disclosure within the language of Exemptions 4 and 5. Accordingly, we reverse the judgment of the District Court and remand this cause with orders to enter judgment in favor of the Appellant Air Force.
n12. The Air Force also has sought review of the District Court's award of attorney's fees to Shermco under 5 U.S.C. § 552(a)(4)(E). Because we reverse on all of the substantive claims of this appeal, Shermco has no longer "substantially prevailed" in this action, and the award of attorney's fees is also reversed.

REVERSED and REMANDED.
A Caution

Docket No. 01-6243

UNITED STATES COURT OF APPEALS FOR THE SECOND CIRCUIT

312 F.3d 70; 2002 U.S. App. LEXIS 23672; 90 A.F.T.R.2d (RIA) 7320; 59 Fed. R. Serv. 3d (Callaghan) 1285

July 15, 2002, Argued
November 15, 2002, Decided

PRIOR HISTORY: [**1]

DISPOSITION:

Affirmed.

COUNSEL:

JOHN J. TIGUE, JR., Morvillo, Abramowitz, Grand, Iason & Silberberg, P.C., New York, NY (Daniel B. Kosove, on the brief) for Plaintiffs-Appellants.

DANIEL S. ALTER, Assistant United States Attorney, (James Comey, United States Attorney for the Southern District of New York, Gideon A. Schor, Assistant United States Attorney, on the brief) for Defendants-Appellees.

JUDGES:

Before: CABRANES, SOTOMAYOR, Circuit Judges, and GLEESON, * District Judge.

* The Honorable John Gleeson, United States District Judge for the Eastern District of New York, sitting by designation.

OPINION BY:

SOTOMAYOR

OPINION: [*73] SOTOMAYOR, Circuit Judge:

This appeal was brought by a lawyer and his law firm seeking access under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552(b), to a memorandum ("the Neiman Memorandum" or "Memorandum") prepared by
the Southern District's opinions and recommendations as an assistant [**2] United States Attorney in the Southern District of New York ("Southern District") and sent to a public commission. The Neiman Memorandum outlines the Southern District's opinions and recommendations as to how the Internal Revenue Service ("IRS") should conduct criminal tax investigations. The Memorandum was written for, and forwarded to, the Criminal Investigation Division Review Task Force headed by Judge William Webster ("the Webster Commission"), which was established by the IRS to gather information and make suggestions on how to reform its Criminal Investigations Department ("CID"). The district court held that the government did not have to produce the Neiman Memorandum because it was shielded by the FOIA's exemption for documents reflecting an agency's deliberative processes, relying on 5 U.S.C. § 552(b)(5).

On appeal, plaintiffs claim that the Neiman Memorandum was not an intra- or inter-agency document as required for exemption under § 552(b)(5) because it was provided to the Webster Commission, an independent task force that intended to issue a public report of its findings, and that it is not privileged as material of an agency consultant. Plaintiffs [**3] also contend that the Neiman Memorandum is not "predecisional" because it was prepared to assist the Webster Commission rather than the IRS and does not relate to a sufficiently specific agency decision. They further argue that even if the deliberative process exemption applies, the government waived that protection by reproducing a quotation from the memorandum in the report published by the Webster Commission ("Webster Report" or "Report"). Finally, they argue that if the document is protected, any purely factual sections should be made [*74] available. We disagree. We hold that (1) the Webster Commission was a consultant to the IRS that was charged with assisting the agency in developing its policy, rendering a memorandum sent from the Southern District to the Webser Commission an inter-agency document; (2) because the IRS created the Webster Commission in order to help it decide whether and how to reform the CID, the document is predecisional; (3) because the Webster Commission's Report was not a final decision, the government did not waive executive privilege; and (4) after in camera review, the district court properly found that there were no reasonably segregable parts of the [**4] Neiman Memorandum subject to disclosure.

**BACKGROUND**

During his confirmation hearings before the Senate in the fall of 1997, IRS Commissioner Charles Rossotti made a commitment to improving the quality of service provided by each of the major components of the agency. To that end, in July 1998, Rossotti asked Judge William Webster, former director of both the FBI and the CIA, to establish a task force to conduct an "independent review" of the IRS's CID to "determine [CID's] effectiveness in accomplishing its mission, and make recommendations for improvement." Judge Webster recruited a number of experts with extensive experience in criminal investigations, law enforcement and federal prosecution to serve on the Webster Commission.

The Webster Commission spent nine months reviewing "countless" documents and interviewing over 600 people, including a number of law enforcement officials. The Webster Commission specifically requested the opinions of the Southern District because it handled more tax investigations than any other district. Then-Deputy U.S. Attorney Shirah Neiman wrote a sixteen-page memorandum expressing the views of the Southern District on "the various agency components [**5] involved in criminal tax enforcement; ... the then existing focus of tax investigations and prosecutions and the deployment of IRS resources; ... the difference[s] between [the Southern District's] position on various issues and that of other agency components; ... and [the Southern District's] recommendations to ensure the continuation of vigorous criminal tax enforcement." According to Neiman, the Neiman Memorandum expressed the views of the Southern District and not those of the Department of Justice as a whole or Neiman as an individual, and her expectation that the memorandum would remain confidential contributed to her willingness to express the Southern District's opinions and policies about tax investigations.

The Webster Commission released its Report on April 9, 1999 to significant media attention. The 113-page Report includes both a factual inquiry into the practices of the CID and a set of recommendations about how the CID should be improved. Included in the Report is a letter from Commissioner Rossotti stating that the Report "will guide us to improve the work of this critically important component of tax administration for many years to come" and that the IRS concurred [**6] with the specific recommendations in the Report, although noting that "some of the recommendations, particularly those concerning organization structure, need
further analysis and design work in coordination with our other organizational changes.

The Neiman Memorandum is mentioned twice in the Report. First, the Neiman Memorandum is referenced in a footnote as representing an opposing view to the position held by the leadership of the Department of Justice Criminal Division, most United States Attorneys, and other important figures in criminal enforcement, all of whom apparently believe that the CID should continue to investigate money laundering and narcotics cases. Later in the Report, it is quoted as criticizing the use of administrative investigations and IRS summons because they are slower than grand jury subpoenas: "service of an administrative summons simply does not convey the urgency of a grand jury subpoena, and is not as readily enforceable as a subpoena, and represented subjects of administrative investigations often succeed in dragging out these investigations for unimaginably long periods."

Plaintiff John Tigue, an attorney whose law firm, Morvillo, Abramowitz, Grand, Jason & Silberberg, P.C., often represents individuals in connection with federal grand jury tax investigations and IRS administrative investigations, enforcement actions, and prosecutions, obtained a copy of the Report and noticed the reference to the Neiman Memorandum. Believing that review of the Neiman Memorandum would improve his understanding of Southern District policy and thus allow him to represent his clients better, Tigue and his law firm submitted a FOIA request for the Neiman Memorandum on August 18, 1999. Following a period of delay in which the Department of Justice and the IRS attempted to discern which agency should respond to the FOIA request, the DOJ denied the application on April 28, 2000, and, on September 28, 2000, denied the appeal, citing 5 U.S.C. § 552(b)(5), which protects the so-called "deliberative process privilege."

On February 14, 2001, plaintiffs filed suit against the IRS and the DOJ in the United States District Court for the Southern District of New York. The parties cross-moved for summary judgment. Following oral argument on October 23, 2001, Judge Hellerstein ruled that the Neiman Memorandum met the requirements of § 552(b)(5) and was therefore exempt from production under the FOIA, and that the government had not waived the privilege by citing to and quoting from the Neiman Memorandum in the published Report. At that time the court also requested that the government review the Neiman Memorandum to determine whether any sections of the document could be produced as purely factual. On October 29, 2001, after in camera review of a marked copy of the Neiman Memorandum, the district court issued an order finding that the Memorandum was "predominantly evaluative, evaluating both policies and procedures of the United States Attorney for the Southern District of New York in criminal Investigations involving tax matters and those of the Internal Revenue Service, and recommending procedures for the Internal Revenue Service." The district court also found that "there is no factual material in the report that is not inextricably intertwined with evaluations, and recommendations of policy" and thus denied plaintiffs' alternative request for partial production of the Neiman Memorandum.

Plaintiffs appeal both the October 23, 2001 and October 29, 2001 rulings.

DISCUSSION

This Court reviews de novo a district court's grant of summary judgment in FOIA litigation. Halpern v. FBI, 181 F.3d 279, 288 (2d Cir. 1999). This Court also reviews de novo a district court's decisions whether to require partial production of documents following in camera review, in keeping with the spirit and the text of the FOIA and its presumption in favor of disclosure. Grand Cent. P'ship, Inc. v. Cuomo, 166 F.3d 473, 478 n.2 (2d Cir. 1999).

[**76] The FOIA, 5 U.S.C. § 552, was enacted to ensure public access to information created by the government in order "to hold the governors accountable to the governed." NLRB v. Robbins Tire & Rubber Co., 437 U.S. 214, 242, 57 L. Ed. 2d 159, 98 S. Ct. 2311 (1978). Thus, "upon request, FOIA mandates disclosure of records held by a federal agency unless the documents fall within enumerated exemptions." Dep't of the Interior v. Klamath Water Users Protective Ass'n, 532 U.S. 1, 7, 149 L. Ed. 2d 87, 121 S. Ct. 1060 (2001) (internal citations omitted). The Supreme Court has counseled that these exceptions are to be interpreted narrowly in the face of the overriding legislative intention to make records public. See id. at 7-8.

At issue here is FOIA Exemption 5, which protects from disclosure "inter-agency or intra-agency memorandums or letters which would not be available by
law to a party other than an agency in litigation with the agency." 5 U.S.C. § 552(b)(5). "Stated simply, agency documents which would not be obtainable by a private litigant in an action against the agency under normal discovery rules (e.g., attorney-client, work-product, executive privilege) are protected from disclosure under Exemption 5." n1 Grand Cent. P'ship, 166 F.3d 473 at 481 (internal quotation marks and citation omitted).

n1 "This discovery standard can only serve as a rough guide to the courts, since decisions as to discovery are usually based on a balancing of the relative need of the parties, and standards vary according to the kind of litigation involved. Furthermore, the most fundamental discovery and evidentiary principle, relevance to the issues being litigated, plays no part in FOJA cases. Coastal States Gas Corp. v. Dept of Energy, 199 U.S. App. D.C. 272, 617 F.2d 854, 862 (D.C. Cir. 1980) (internal citations and quotation marks omitted); accord EPA v. Mink, 410 U.S. 73, 86, 93 S. Ct. 827 (1973).

[**11]

Specifically, the government claims that the deliberative process privilege, a sub species of work-product privilege that "covers 'documents reflecting advisory opinions, recommendations and deliberations comprising part of a process by which governmental decisions and policies are formulated," Klamath, 532 U.S. at 8 (quoting NLRB v. Sears, Roebuck & Co., 421 U.S. 132, 150, 44 L. Ed. 2d 29, 95 S. Ct. 1504 (1975)), permits withholding of the Neiman Memorandum. The rationale behind this privilege is "the obvious realization that officials will not communicate candidly among themselves if each remark is a potential item of discovery and front page news, and its object is to enhance the quality of agency decisions,' by protecting open and frank discussion among those who make them within the Government." 532 U.S. 1 at 8-9 (quoting Sears, 421 U.S. at 151); accord Coastal States, 617 F.2d at 866 ("The [deliberative process] privilege has a number of purposes: it serves to assure that subordinates within an agency will feel free to provide the decisionmaker with their uninhibited opinions and recommendations without fear of later being subject to public ridicule or criticism; to protect against premature disclosure of proposed policies before they have been finally formulated or adopted; and to protect against confusing the issues and misleading the public by dissemination of documents suggesting reasons and rationales for a course of action which were not in fact the ultimate reasons for the agency's action.").

In-order for a document to be protected by deliberative process privilege, it must be: (1) an inter-agency or intra-agency document; (2) "predecisional"; and (3) deliberative. See Klamath, 532 U.S. at 8 (discussing the agency-origin [**77] requirement); Local 3, Int'l Bhd. of Elec. Workers v. NLRB, 843 F.2d 1177, 1180 (2d Cir. 1988) (enumerating the predecisional and deliberative requirements); Lead Indus. Ass'n, Inc. v. OSHA, 610 F.2d 70, 83 (2d Cir. 1979) (same). Plaintiffs concede that the Neiman Memorandum is, at least in part, deliberative, but challenge the government's right to withhold the Memorandum on the other two grounds.

I. Intra- and inter-agency communications

As noted above, Exemption 5 protects only "intra-agency" or "inter-agency" [**13] communications. While "intra-agency" documents are those that remain inside a single agency, and "inter-agency" documents are those that go from one governmental agency to another, they are treated identically by courts interpreting FOIA. Renegotiation Bd. v. Grumman Aircraft Eng'g Corp., 421 U.S. 168, 188, 44 L. Ed. 2d 57, 95 S. Ct. 1491 (1975) ("Exemption 5 does not distinguish between inter-agency and intra-agency memoranda."). The question at issue regarding the intra- or inter-agency requirement is whether the document either originated from or was provided to an entity that is not a federal government agency, in which case the document is not protected by the exemption.

The Supreme Court has cautioned that the term "intra-agency" is not "just a label to be placed on any document the Government would find it valuable to keep confidential." Klamath, 532 U.S. at 12. By statutory definition, "agency' means each authority of the Government of the United States," with certain exemptions not relevant here. 5 U.S.C. § 551(1). It is undisputed that the Webster Commission was not an "agency." See Meyer v. Bush, 299 U.S. App. D.C. 86, 981 F.2d 1288, 1298 (D.C. Cir. 1993) [**14] (holding that a task force created by the President to study
preparing the Webster Report for the IRS, the district consultant to the IRS, an agency, in soliciting the Neiman Memorandum, and relied on the Neiman Memorandum in preparing the Webster Report for the IRS, the district court properly concluded that the Neiman Memorandum was an intra-agency communication. The government also argues that the Neiman Memorandum could be deemed an inter-agency communication because it was provided by the Southern District for use in the IRS decision-making process. For the reasons that follow, we conclude that because the Webster Commission was acting as a consultant to the IRS when it solicited the Neiman Memorandum, and the Neiman Memorandum was prepared by the Southern District, an agency, to assist the IRS with determining how best to reform the CID, the Neiman Memorandum is an inter-agency communication.

In considering the scope of Exemption 5, this Circuit has recognized that agencies may require assistance from outside consultants in formulating policy, and has held that "nothing turns on the point that ... reports were prepared by outside consultants ... rather than agency staff." Lead Indus., 610 F.2d 70 at 83 (citing Soucie v. David, 145 U.S. App. D.C. 144, 448 F.2d 1067, 1078 n.44 (D.C. Cir. 1971)); accord Ryan v. Dept of Justice, 199 U.S. App. D.C. 199, 617 F.2d 781, 790 (D.C. Cir. 1980) ("When an agency record is submitted by outside consultants as part of the deliberative process, and it was solicited by the agency, we find it entirely reasonable to deem the resulting document to be an 'intra-agency' memorandum for purposes of determining the applicability of Exemption (*78) 5."). n2 Instead, "whether a particular document is exempt under (b)(5) depends not only on the intrinsic character of the document itself, but also on the role it played in the administrative process." Lead Indus., 610 F.2d 70 at 80.

n2 In Klamath, the Supreme Court recently considered claims that documents submitted by various Indian tribes to the Department of the Interior expressing the tribes' positions on a water allocation project were "intra-agency" documents entitled to protection under Exemption 5. Klamath, 532 U.S. at 7-16. In rejecting that argument, the Court observed that "although neither the terms of the exemption nor the statutory definitions say anything about communications with outsiders, some Courts of Appeals have held that in some circumstances a document prepared outside the Government may nevertheless qualify as an 'intra-agency' memorandum under Exemption 5." Id. at 9 (citing Hoover v. U.S. Dept of Interior, 611 F.2d 1132, 1137-38 (5th Cir. 1980); Lead Indus., 610 F.2d 70 at 83; Soucie, 448 F.2d at 1067). While the Supreme Court declined to rule on the validity of this "consultant corollary," it distinguished the tribes from consultants, noting that the latter typically "have not been communicating with the Government in their own interest or on behalf of any person or group whose interest might be affected by the Government action addressed by the consultant [and thus] may be enough like the agency's own personnel to justify calling their communications 'intra-agency.'" Klamath, 532 U.S. at 11, 12. Unlike in Klamath, plaintiffs in this case do not argue that the Webster Commission is an interested party.

Plaintiffs acknowledge that this Court has held that communications with consultants may be considered intra-agency, but argue, relying heavily on the D.C. Circuit's opinion in Dow Jones & Co. v. Dept of Justice, 286 U.S. App. D.C. 349, 917 F.2d 571, 574 (D.C. Cir. 1990), that because the memorandum was prepared to assist the Webster Commission with its decisionmaking and was never reviewed by any IRS decisionmaker, the consultant principle is inapposite. In Dow Jones, the government had argued that documents provided by the Department of Justice to Congress were protected as inter-agency documents. The D.C. Circuit rejected that position on the grounds that documents prepared to assist with Congress's deliberative process could not be entitled to Exemption 5 privilege because Congress was not an agency for FOIA purposes. Id. Here, in contrast, the Webster Commission was not acting on its own behalf in requesting the Neiman Memorandum from the Southern District--rather, it was acting as a consultant to the IRS, an agency, to assist that agency with developing policy recommendations regarding the CID. Plaintiffs recognize, as they must, that the privilege would have been maintained had Neiman given her memorandum directly to the IRS. Renegotiation Bd., 421 U.S. at 188 ("By
including inter-agency memoranda in Exemption 5. Congress plainly intended to permit one agency possessing decisional authority to obtain written recommendations and advice from a separate agency not possessing such decisional authority without requiring that the advice be any more disclosable than similar advice received from within the agency. The fact that Neiman transmitted it to the Webster Commission for use in the Commission's recommendations on IRS policy does not alter our view of the matter.

Plaintiffs also contend that an agency consultant's source material cannot be withheld under Exemption 5 where the author had no reasonable expectation that her material would be kept confidential. According to plaintiffs, "where there is no fear of publicity, there is no basis in policy for extending Exemption 5 to consultants' work, especially where the statutory language does not provide for such a result." The issue here, however, is not whether the Webster Commission's public Report is exempt, but rather, whether the Commission may be considered a part of the IRS for purposes of determining whether the Neiman Memorandum falls within the scope of Exemption 5 as an inter-agency communication. Although the Webster Commission may have had no intention to keep private its findings and recommendations, this has no bearing on the Southern District's expectation that its opinions would be kept confidential by the Webster Commission and the IRS. In fact, this Court has held that editorial decisions such as determining which parts, if any, of a confidential document to include in a public record are precisely the type of internal agency decisions that Exemption 5 was designed to protect. See Lead Indus., 610 F.2d 70 at 86 ("If the segment appeared in the final version, it is already on the public record and need not be disclosed. If the segment did not appear in the final version, its omission reveals an agency deliberative process: for some reason, the agency decided not to rely on that fact or argument after having been invited to do so.").

Just as predecisional documents prepared by the Webster Commission for the IRS would be deemed intra-agency communications, see 610 F.2d 70 at 83, otherwise privileged communications by another agency intended to assist the Commission with its ultimate responsibilities to the IRS are, for purposes of the FOIA, inter-agency communications with the IRS. Cf. Dow Jones, 917 F.2d 571 at 575 ("Exemption 5 permits an agency to protect the confidentiality of communications from outside the agency so long as those communications are part and parcel of the agency's deliberative process."). The Webster Commission was acting as a consultant to the IRS when it solicited the Memorandum. It was charged with assisting the IRS with determining how best to reform the CID, and the Commission's Report proposed solutions to specific problems within the CID based on the information conveyed to the Commission by the Southern District, among its other sources. To conclude that the deliberative process privilege does not apply when an outside consultant to an agency receives information from another agency effectively would condition the use of consultants on both agencies' willingness to disclose any information the consultant reviews in the process of its work and would unreasonably hamper agencies in their decision-making process.

Insofar as the communications were between the Southern District and a consultant for the IRS, the Neiman Memorandum is more properly considered an inter-agency document than an intra-agency document, in that it was prepared by one governmental agency for use by another agency. The interposition of the Webster Commission between the two agencies does not alter this result. We therefore find the Neiman Memorandum eligible for protection under the first prong of Exemption 5.

n3 To the extent that plaintiffs argue that the publication of the Report with a reference to the Neiman Memorandum suggests that there is no basis to protect the Memorandum as a consultant's source material, that argument is addressed in greater detail below in the discussion of waiver.

n4 Although plaintiffs state that the Webster Commission "essentially functioned as a watchdog, providing some measure of public oversight over the IRS," they acknowledge that part of the Commission's assignment included evaluating CD. Policies and making recommendations for improvement.

n5 Alternatively, as a document prepared for use by a consultant to an agency, the Neiman Memorandum is more properly considered an inter-agency document than an intra-agency document, in that it was prepared by one governmental agency for use by another agency. The interposition of the Webster Commission between the two agencies does not alter this result. We therefore find the Neiman Memorandum eligible for protection under the first prong of Exemption 5.
Memorandum perhaps could also be viewed as an intra-agency document, as the district court concluded. Because we find that the Memorandum is an inter-agency document, we do not decide that issue.

II. Predecisional

"A document is predecisional when it is prepared in order to assist an agency decisionmaker in arriving at his decision." Grand Cent. Partnership, 166 F.3d at 473 at 482 (internal quotation marks and citations omitted). Protected by this privilege are "recommendations, draft documents, proposals, suggestions, and other subjective documents which reflect the personal opinions of the writer rather than the policy of the agency." Id. (internal quotation marks and citations omitted). However, "the privilege does not protect a document which is merely peripheral to actual policy formation; the record must bear on the formulation or exercise of policy-oriented judgment." Id. (quoting Ethyl Corp. v. EPA, 25 F.3d 1241, 1248 (4th Cir. 1994) (internal quotation marks omitted)).

Plaintiffs argue that because the Neiman Memorandum was provided to the Webster Commission, rather than to the IRS, it cannot be deemed predecisional, as it was never relied upon by any IRS decisionmaker. As source material for the Webster Report, however, the Neiman Memorandum was prepared for the Commission in order to assist the IRS in its decisionmaking regarding the future of the CID. This decisionmaking is precisely the type contemplated by Grand Central Partnership.

Plaintiffs further contend, citing Maricopa Audubon Society v. United States Forest Service, 108 F.3d 1089, 1094 (9th Cir. 1997), that the district court erred in failing to identify any specific decision connected to the Memorandum. In Maricopa, the government had argued that "because agencies are involved in a continual process of self-examination, [they] need not identify a specific decision in which [documents claimed to be protected under Exemption 5] will culminate in order for those materials to be 'predecisional.'" Id. The Ninth Circuit disagreed, holding that while an agency need not actually demonstrate that a specific decision was made in reliance on the allegedly predecisional material, the government must show that the material was prepared to assist the agency in the formulation of some specific decision. Id. In other words, while the agency need not show ex post that a decision was made, it must be able to demonstrate that, ex ante, the document for which executive privilege is claimed related to a specific decision facing the agency. See Sears, 421 U.S. at 151 n.18. The Neiman Memorandum, however, meets the criteria established in Maricopa, as it is "not merely part of a routine and ongoing process of agency self-evaluation," Maricopa, 108 F.3d at 1094, but rather was specifically prepared for use by the Webster Commission in advising the IRS on its future policy with respect to the CID. As in Maricopa, the fact that the government does not point to a specific decision made by the IRS in reliance on the Neiman Memorandum does not alter the fact that the Memorandum was prepared to assist IRS decisionmaking on a specific issue.

We therefore conclude that the district court did not err in holding that the Neiman Memorandum falls within the Exemption 5 privilege.

III. Waiver

Even though protected by Exemption 5, the government nonetheless may be required to disclose the Neiman Memorandum if it waived the deliberative process privilege. Consistent with 5 U.S.C. § 552(a)(2), which requires disclosure of final agency decisions, the Supreme Court held in Sears that production of ostensibly predecisional material may be compelled where "an agency [**24] chooses expressly to adopt or incorporate by reference an intra-agency memorandum previously [*81] covered by Exemption 5 in what would otherwise be a final opinion." Sears, 421 U.S. at 161. In so concluding, the Supreme Court reasoned that:

the probability that an agency employee will be inhibited from freely advising a decisionmaker for fear that his advice, if adopted, will become public is slight. First, when adopted, the reasoning becomes that of the agency and becomes its responsibility to defend. Second, agency employees will generally be encouraged rather than discouraged by public knowledge that their policy suggestions have been adopted by the
agency. Moreover, the public interest in knowing the reasons for a policy actually adopted by an agency supports the District Court's decision below.

Id.

Plaintiffs contend that the citation to and publication of an excerpt of the Neiman Memorandum in the Webster Report, which was ultimately made public, was a waiver of the privilege provided by Exemption 5. Under the circumstances here, however, the minor references to the Neiman Memorandum cannot be said to be an express adoption or incorporation. [**25] See Access Reports v. Dept' of Justice, 288 U.S. App. D.C. 319, 926 F.2d 1192, 1197 (D.C. Cir. 1991) (distinguishing between "reference to a report's conclusions [and] adoption of its reasoning," and noting that "it is the latter that destroys the privilege"); Common Cause v. IRS, 207 U.S. App. D.C. 321, 646 F.2d 656, 660 (D.C. Cir. 1981) (holding that a "casual allusion in a post-decisional document to subject matter discussed in some pre-decisional, intra-agency memoranda" does not waive Exemption 5). Accordingly, we conclude that the government did not waive its right to assert the deliberative * process privilege as to the Neiman Memorandum.

n6 We also note that this "waiver by incorporation" doctrine applies only where the agency expressly adopts or incorporates an inter-agency memorandum "in what otherwise would be a final opinion." Sears, 421 U.S. at 161 (emphasis added). Arguably, as the Webster Report was not drafted by IRS decisionmakers, and it was prepared to aid the IRS in making its decision about internal reforms, it was not a "final opinion."

[**26]

We also reject plaintiffs' position that Neiman's knowledge that the Webster Commission would issue a published report constitutes a waiver of the deliberative process privilege. Even if Neiman could have been expected to know that a report would be published, we find no reason to doubt that she expected that her Memorandum would remain confidential. As previously noted, she prepared the Memorandum to give the Southern District's recommendations, based on its experience, to the IRS, for use in the IRS's internal evaluation through the Webster Commission. In choosing to reveal the existence of the Memorandum and to publish a very brief excerpt, the Commission exercised its discretion by revealing only information that it determined should be made public and withholding the rest. Cf Rockwell Int'l Corp. v. Dept' of Justice, 344 U.S. App. D.C. 226, 235 F.3d 598, 603-04 (D.C. Cir. 2001)(rejecting claim that partial publication of a document waived the attorney-client privilege as to the remainder of that document). Although the fact that the agency in Rockwell International took additional steps to ensure confidentiality also factored into the D.C. Circuit's finding [**27] that the attorney-client privilege had not been waived in that case, we conclude that, for purposes of the deliberative process privilege, the incorporation of one sentence from the Neiman Memorandum in the published Report is not inconsistent with the IRS's or the Southern District's "desire to keep the rest secret." 235 F.3d 598 at 605.

[*82] IV. In camera review

Finally, plaintiffs urge us to release any portions of the Neiman Memorandum that contain purely factual information. The FOJA requires that "any reasonably segregable portion of a record shall be provided to any person requesting such record after deletion of the portions which are exempt under this subsection." 5 U.S.C. § 552(b).

At oral argument, we requested that the government provide a redacted version of the Neiman Memorandum indicating what factual information, if any, was within the public domain. The government compiled, but continued to maintain that this information should be withheld because it was intertwined with and provided insight into privileged material. After de novo in camera review of the original and redacted memoranda, we conclude that the district court properly found [**28] that "the document is predominantly evaluative, evaluating both policies and procedures of the United States Attorney for the Southern District of New York in criminal investigations involving tax matters and those of the Internal Revenue Service, and recommending procedures for the Internal Revenue Service." We also conclude that even the limited factual material admittedly in the public domain is too intertwined with evaluative and policy discussions to require disclosure. See Lead Indus., 610 F.2d 70 at 85.
CONCLUSION

For the foregoing reasons, we affirm the orders of the district court granting defendants' motion for summary judgment and denying plaintiffs' cross motion for summary judgment.

House Appropriations Subcommittee on Financial Services and General Government  
Page 3  

EAC needed to provide accredited labs on a temporary, interim basis to ensure that the agency had the means to implement its certification program. Additionally, EAC would be compelled to implement a provisional, pre-election certification program to replace services offered by NASED. EAC could not wait for NIST to recommend laboratories. Fortunately, HAVA provided a mechanism for EAC to take such action in Section 231(b)(2)(B). This section requires that EAC publish an explanation when accrediting a laboratory without a NIST recommendation. A notice was published on EAC's Web site to satisfy this requirement.  

EAC's Interim Accreditation Program. At a public meeting in August 2005 held in Denver, the commissioners received a staff recommendation outlining the details of the interim accreditation program. The staff recommendation included a process in which the three laboratories previously accredited by NASED – CIBER, SysTest Labs, and Wyle Laboratories – would be allowed to apply for interim accreditation. In December of 2005, EAC officially began accepting applications for a limited interim accreditation program. As stated in the letters, the purpose of the interim accreditation program was to provide accredited laboratories to test voting systems to federal standards, until such time as NIST/NVLAP was able to present its first set of recommended laboratories. This accreditation was limited in scope to the 2002 Voluntary Voting System Standards and required the laboratory to apply to the NVLAP program to receive a permanent accreditation. The letters also sought variety of administrative information from the laboratories and required them to sign a Certification of Laboratory Conditions and Practices. This certification required the laboratories to affirm, under penalty of law, information regarding laboratory personnel, conflict of interest policies, recordkeeping, financial stability, technical capabilities, contractors, and material changes.  

In order to accredit a laboratory (even on an interim basis), EAC needed to contract with a competent technical expert to serve as a laboratory assessor. EAC sought a qualified assessor with real-world experience in the testing of voting systems. Ultimately, only one individual responded to EAC's solicitation. The individual was (at the time) the only individual known to have the requisite experience and assessor qualifications. The contractor reviewed each of the laboratories that applied. The review was performed in accordance with international standards, the same standards used by NVLAP and other laboratory accreditation bodies. This standard is known as International Standard ISO/IEC 17025, General Requirements for the Competence of Testing and Calibration Laboratories. In addition, the EAC assessor (who also currently serves as a NVLAP assessor) applied NIST Handbooks 150, Procedures and General Requirements and NIST Handbook 150-22, Voting System Testing.  

CIBER, SysTest Labs, and Wyle Laboratories applied for accreditation under the interim program. Each, as required, had previously received a NASED accreditation. EAC's

\[027647\]
assessor visited each of the labs and conducted a review consistent with the standards noted above. The assessor reviewed laboratory policies, procedures and capabilities to determine if the laboratories could perform the work required. Laboratory assessments do not make conclusions regarding past laboratory work product. Two of the applicant laboratories, SysTest Laboratories, L.L.C., and Wyle Laboratories, Inc. received an interim accreditation. The assessor's reports and EAC action regarding these laboratories are available on the EAC Web site.2 EAC promptly published on its Web site information regarding its decision on accreditation (August and September of 2006).

This notice provides some brief background on the interim accreditation process, starting with the fact that three previously NASED accredited laboratories were invited to apply to the program, including information on the program’s requirements and limitations and ending with the identity and contact information of the two laboratories accredited.

Information was also electronically forwarded to EAC’s list of stakeholders via e-mail. The EAC stakeholders e-mail list includes almost 900 election officials and interest groups, nationwide. Staff members for EAC oversight and appropriations committees are included in this list of stakeholders. In addition to EAC’s Web site and e-mail announcements, on September 21, 2006 EAC’s Executive Director reiterated the Commission’s decision at a public meeting Web cast to the EAC Web site. This announcement identified the interim accredited labs by name. Furthermore, in October 26, 2006, the two interim accredited laboratories testified at a nationally televised public hearing.

The Interim Accreditation Program and CIBER. The third laboratory, CIBER, has yet to satisfy the requirements of the interim accreditation program. The initial assessment of CIBER revealed a number of management, procedural and policy deficiencies that required remedial action before the laboratory could be considered for accreditation. These deficiencies are identified in the initial CIBER/Wyle report. They were also brought to the attention of CIBER’s President of Federal Solutions in a letter from EAC’s Executive Director dated September 15, 2006. The letter outlines, consistent with recommendation of EAC’s assessor, the steps the laboratory must take to achieve compliance. The letter requires CIBER to:

a. Assign resources, adopt policies and implement systems for developing standardized tests to be used in evaluating the functionality of voting systems and voting system software. Neither ITA Practices, CIBER nor any of its partners will be permitted to rely on test plans suggested by a voting system manufacturer.

b. Assign resources, adopt policies and implement systems for quality review and control of all tests performed on voting systems and the report of results from those tests. This shall include provisions to assure that all

Note: The Wyle and CIBER assessment was completed as a joint report. The two labs have a cooperative agreement to work together in test voting systems (Wyle performing hardware testing and CIBER software testing).
required tests have been performed by ITA Practices, CIBER or its accredited partner lab.

Finally, the letter required an additional “follow-up” assessment of the laboratory.

The follow-up assessment of CIBER was performed by EAC’s assessor in December of 2006. The findings of this assessment were documented in a report, which is available on the EAC Web site. In the findings, the assessor recognized significant changes CIBER had made to its program in response to the initial assessment, including new policies regarding test procedures, management and personnel. The report also noted a number of non-conformities that had yet to be addressed by the laboratory.

In a letter dated January 3, 2007, CIBER provided a written response to EAC’s follow-up assessment and report. The response sought to address the deficiencies noted in the December assessment. Additionally, CIBER officials requested to meet with EAC staff to discuss their January 3 response. This meeting took place at EAC on January 10, 2007. At the meeting, EAC staff informed CIBER that their report could not serve as the basis of accreditation because it failed to resolve all outstanding issues. A number of CIBER responses to noted deficiencies were listed as “TBD.” EAC’s assessor and Certification Program Director formally reviewed CIBER’s response. EAC provided CIBER notice of the deficiencies that remain outstanding and informed them of the steps they must take to come into compliance by a letter dated February 1, 2007. Due to the fact that the purpose and usefulness of the interim accreditation program is coming to a close, EAC allowed CIBER 30 days in which to document their full compliance. After this time, the program will be closed and no further assessment actions will be performed under the interim program. CIBER was notified of this procedure by letter dated January 26, 2007, and on February 8, 2007, EAC voted to close its interim laboratory accreditation program effective March 5, 2007.

Information related to CIBER’s status in the EAC interim accreditation program was not released prior to January 26, 2007. It was EAC’s belief, in consultation with NIST, that it would be improper to release information regarding an incomplete assessment. However, on January 25, 2007, CIBER took the affirmative action of making this information available to a third party, the New York State Board of Elections. With this action, CIBER made the information public and EAC believed it was incumbent to provide this information to the public. As such, on January 26, 2007, EAC posted on its Web site assessment reports, correspondence, and responses from CIBER related to their progress in the EAC interim accreditation program.

Copies of the two reports issued by the EAC assessor concerning CIBER’s laboratory accreditation assessments are attached as Appendixes 1 and 2 to this letter.

And the current status is...
Congressman Jose Serrano, Chairman
House Appropriations Subcommittee on Financial Services and General Government
Page 7

was requested is a draft of a final document that has already been released after being vetted by staff and approved by the EAC Commissioners. It is available in its final form on EAC’s Web site, www.eac.gov. The draft document at issue was created by two contract employees hired pursuant to 5 U.S.C. §3109 (see 42 U.S.C. §15324(b)). Individuals hired under this authority enter into an employment relationship with the EAC. The contract employees were supervised by an EAC program director who participated directly in the project. For example, the supervisor approved, facilitated, scheduled and participated in interviews conducted for the project. Further, the contract employees were provided research materials and other support from EAC law clerks and staff. As stated by their contracts, these consultants were hired so that the EAC could “...obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation.” Moreover, the contracts clearly forbid the consultants from releasing the draft they created consistent with the privilege covering the draft report. The contract states:

All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.

Finally, the purpose or subject of the draft report at issue was to make an EAC determination on how voter fraud should be studied by the agency. This was to be done by (1) assessing the nature and quality of the information that presently exists on the subject matter, (2) defining the terms and scope of EAC study as proposed by HAVA, (3) determining what is to be studied and (4) determining how it is to be studied. In addition, the Consultants were asked to develop a definition of the phrases “voting fraud” and “voter intimidation.”

EAC’s interpretation of HAVA and its determination of what it will study and how it will use its resources to study it are matters of agency policy and decision. It would be irresponsible for EAC to accept the product of contracted employees and publish that information without exercising due diligence in vetting the product of the employees’ work and the veracity of the information used to produce that product. EAC conducted this review of the draft voter fraud and intimidation report provided by Ms. Wang and Mr. Serebrov. EAC found that the draft report failed to provide a definition of the terms as required, contained conclusions that were not sought under the terms of the contract or were not supported by the underlying research, and allegations that showed bias. EAC staff edited the draft report to correct the problems mentioned above and included all of the consultants’ and working groups’ recommendations. The final report was adopted by EAC on December 7, 2007 during its public meeting. The final report as well as all of

was there more than one?
Congressman Jose Serrano, Chairman  
House Appropriations Subcommittee on Financial Services and General Government  
Page 8

the underlying research conducted by Mr. Serebrov and Ms. Wang are available on EAC's Web site, www.eac.gov.

EAC understands and appreciates that the request from a Congressional committee is exempt from the provisions of FOIA, and as such, EAC is providing this draft document despite the fact that the deliberative process exemption clearly applies to its contents. The draft report has been attached as Appendix 3 to this letter.

**Draft Voter Identification Report**

The third document requested is the draft report prepared by Rutgers University in conjunction with Moritz College of Law. Rutgers and Moritz served as contractors to EAC and produced this draft document pursuant to the provisions of the contract governing that relationship. This draft report, like the draft voter fraud and voter intimidation report, is predecisional under the deliberative process exemption to FOIA.

With regard to the Voter Identification draft report, it was created by Rutgers University in conjunction with the Moritz College of Law (Ohio State University) to “…provide research assistance to the EAC for the development of voluntary guidance on provisional voting and voter identification procedures.” The stated objective of the contract was to:

…obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics… The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

As with the voter fraud and intimidation study mentioned above, the contractors were provided guidance, information, and were directed by EAC personnel. The final product they delivered (draft report sought) was identified as “a guidance document for EAC adoption.” Clearly, as noted by the contract, the issuance of Federal guidance to states is a matter of government policy and limited to official EAC action. EAC has not completed review and vetting of this document. However, initial review of this document reveals data and analysis that causes EAC concern. The Contractor used a single election’s statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turn out. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as “state your name.” The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists.
Congressman Jose Serrano, Chairman
House Appropriations Subcommittee on Financial Services and General Government
Page 9

and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers. After this review process is completed, EAC will make a decision whether to adopt or reject the draft report.

Again, recognizing that a request from a Congressional committee is exempt from the provisions of FOIA, EAC is providing this draft document despite the fact that the deliberative process exemption clearly applies to its contents. The draft report has been attached as Appendix 4 to this letter.

Thank you for your requests and your interest in election administration. If you have further questions, please do not hesitate to contact me.

Sincerely,

Donetta Davidson
Chair

cc: Congressman Maurice Hinchey (letter only)

EAC Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, www.eac.gov.

EAC Declines to Adopt Draft Report

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the

1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers included non-citizens, the Contractor reduced the numbers by the same percentage that the U.S. Census Bureau estimated non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

3 The Current Population Survey is based on reports from self described registered voters who also describe themselves as U.S. citizens.
implementation of voter identification requirements, to be a first step in the
Commission’s efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the
Contractor used to analyze voter identification requirements to determine if these laws
have an impact on turnout rates. The Contractor used a single election’s statistics to
conduct this analysis. The two sets of data came from the Census Bureau and included
persons who were not eligible to and did not vote. The first analysis using averaged
county-level turnout data from the U.S. Census showed no statistically significant
correlations. So, a second analysis using a data set based upon the Current Population
Survey (which was self-reported and showed a significantly higher turnout rate than other
conventional data) was conducted that produced only some evidence of correlation
between voter identification requirements and turnout. Furthermore, the initial
categorization of voter identification requirements included classifications that actually
require no identification at all, such as “state your name.” The research methodology and
the statistical analysis used by the Contractor were questioned by independent working
and peer review groups comprised of social scientists and statisticians. The Contractor
and the EAC agree that the report raises more questions than provides answers.4 Thus,
EAC will not adopt the Contractor’s study and will not issue an EAC report based upon
this study. EAC, however, is releasing the data and analyses conducted by Contractor.

Further EAC Study on Voter Identification Requirements

EAC will engage in a longer-term, more systematic review of voter identification
requirements. Additional study on the topic will include more than one Federal election
cycle, additional environmental and political factors that affect voter participation, and
the numerous changes in state laws and regulations related to voter identification
requirements that have occurred since 2004.

EAC will undertake the following activities:

• Conduct an ongoing state-by-state review, reporting and tracking of voter
  identification requirements. This will include tracking states’ requirements which
  require a voter to state this or her name, to sign his or her name, to match his or
  her signature to a signature on file, to provide photo or non-photo identification or
  to swear an affidavit affirming his or her identity.

• Establish a baseline of information that will include factors that may affect or
  influence Citizen Voting Age Population (CVAP) voter participation, including
  various voter identification requirements, the competitiveness of a race and
certain environmental or political factors. EAC will use some of the information
  collected by Eagleton as well as additional data from the states to develop this
  baseline.

---

• In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

• Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

• Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
EAC Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

EAC Declines to Adopt Draft Report

1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens. Because these numbers include non-citizens, the Contractor reduced the numbers by applying the same percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated non-citizens in 2000 voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.
EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election’s statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as “state your name.” The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor’s study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

Further EAC Study on Voter Identification Requirements

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.

- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

---

• In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

• Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

• Publish a series of best practice case studies which detail a particular state’s or jurisdiction’s experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
After having read the Eagleton draft report, I have some thoughts and questions:

I am troubled by the concept that Eagleton compared states as if they were equal. They assume that, all factors being equal, that the voter turn out in each state would be equal. I am not at all certain that this is the case. Further, there is no evidence that the statisticians actually compared previous years’ turnout in the same state to determine whether 2004 was some sort of anomaly for that state (high or low). Long story short, I am very skeptical of the data that they used to draw conclusions. We should ask questions about what data they used, how they parsed it, why they used the data, what other data could have been used to provide better, more reliable results.

My second concern is how they (statistically speaking) differentiate between a minimum requirement (i.e. state name, photo i.d., etc) and a maximum requirement (i.e., state name, photo i.d., etc.). It makes no sense to me how they could possibly arrive at a different percentage for these requirement levels.

My third issue is the persistent use of the phrases "ballot access" and "ballot integrity" without some definition or some explanation of what those concepts are.
ATTORNEY-CLIENT PRIVILEGED COMMUNICATION

MEMORANDUM

TO: Commissioners DeGregorio, Martinez, Davidson & Hillman

FROM: Juliet Thompson Hodgkins

DATE: February 6, 2006

RE: Open Meetings

BACKGROUND

Based upon the number of questions that we have recently had concerning meetings of the Commission and meetings that groups of Commissioners want to have with various of our stakeholders, I thought it prudent to distribute this memorandum that sets forth the basic principles of the federal open meetings law, what is an open meeting and which meetings must be publicized.

WHAT IS A MEETING?

A meeting is considered to be the gathering and deliberation of a sufficient number of the agency members to constitute a quorum that can act on behalf of the agency and wherein the members conduct or dispose of official agency business:

the deliberations of at least the number of individual agency members required to take action on behalf of the agency where such deliberations determine or result in the joint conduct or disposition of official agency business, but does not include deliberations required or permitted by subsection (d) or (e)...

5 U.S.C. 552b(a)(2).

Each agency should have a set of regulations that further defines meetings for purposes of the Government in the Sunshine Act. For example, the FEC has defined meeting to exclude the type of circulation voting procedure that this
Commission has adopted. This agency has not yet adopted regulations governing its public meetings, but should do so in this fiscal year.

In addition to these statutory and regulatory provisions, case law has interpreted the meaning of meeting. Discussions between Commission staff and the Commissioners as well as circulation of memoranda regarding a subject are not considered a meeting for purposes of the Government in the Sunshine Act.

Discussions between members of Civil Aeronautics Board and staff and circulation of memoranda among Board members were activities common to any body of responsible public officials preparing to make important decision, and the kind of activity forbidden by Sunshine Act did not occur. Republic Airlines, Inc. v. C.A.B., C.A.8 1985, 756 F.2d 1304.

Furthermore, meetings to discuss whether to have another meeting are not considered to be covered by the Sunshine Act.

This section exempts from its definition of "meeting" deliberations about whether to schedule future meetings with shorter than seven-day notice; thus, meeting at which Federal Communications Commission did no more than set a date to consider applicant's amended application for transfer of television status was not subject to notice provisions of this section. Washington Ass'n for Television and Children v. F. C. C., C.A.D.C.1981, 665 F.2d 1264, 214 U.S.App.D.C. 446.

**WHEN MUST A MEETING BE OPEN?**

Federal law requires that meetings of a government agency be open.

Members shall not jointly conduct or dispose of agency business other than in accordance with this section. Except as provided in subsection (c), every portion of every meeting of an agency shall be open to public observation.

5 U.S.C. 552b(b).

For purposes of this requirement, the term agency means:

any agency, as defined in section 552(e) of this title, headed by a collegial body composed of two or more individual members, a majority of whom are appointed to such position by the President with the advice and consent of the Senate, and any subdivision thereof authorized to act on behalf of the agency;

There are ten statutory exemptions for the requirement of an open meeting. In these instances, a meeting may be closed by vote of the Commission:

(1) disclose matters that are
  (A) specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and
  (B) in fact properly classified pursuant to such Executive order;
(2) relate solely to the internal personnel rules and practices of an agency;
(3) disclose matters specifically exempted from disclosure by statute (other than section 552 of this title), provided that such statute
  (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or
  (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
(4) disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;
(5) involve accusing any person of a crime, or formally censuring any person;
(6) disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;
(7) disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would
  (A) interfere with enforcement proceedings,
  (B) deprive a person of a right to a fair trial or an impartial adjudication,
  (C) constitute an unwarranted invasion of personal privacy,
  (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source,
  (E) disclose investigative techniques and procedures, or
  (F) endanger the life or physical safety of law enforcement personnel;
(8) disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;
(9) disclose information the premature disclosure of which would—
  (A) in the case of an agency which regulates currencies, securities, commodities, or financial institutions, be likely to
(i) lead to significant financial speculation in currencies, securities, or commodities, or
(ii) significantly endanger the stability of any financial institution; or
(B) in the case of any agency, be likely to significantly frustrate implementation of a proposed agency action, except that subparagraph (B) shall not apply in any instance where the agency has already disclosed to the public the content or nature of its proposed action, or where the agency is required by law to make such disclosure on its own initiative prior to taking final agency action on such proposal; or
(10) specifically concern the agency's issuance of a subpoena, or the agency's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the agency of a particular case of formal agency adjudication pursuant to the procedures in section 554 of this title or otherwise involving a determination on the record after opportunity for a hearing.

5 U.S.C. 552b(c)(1) – (10).

Obviously, numbers 1, 8, 9, and 10 do not and will not apply to this Commission.

REQUIREMENTS OF AN OPEN MEETING

Notice must be provided at least one week in advance of the meeting.

In the case of each meeting, the agency shall make public announcement, at least one week before the meeting, of the time, place, and subject matter of the meeting, whether it is to be open or closed to the public, and the name and phone number of the official designated by the agency to respond to requests for information about the meeting. Such announcement shall be made unless a majority of the members of the agency determines by a recorded vote that agency business requires that such meeting be called at an earlier date, in which case the agency shall make public announcement of the time, place, and subject matter of such meeting, and whether open or closed to the public, at the earliest practicable time.

5 U.S.C. 552b(e)(1).

In addition, each and every portion of the meeting must be open to the public unless the meeting is closed by vote due to the discussion of a topic covered under the exemptions discussed above. (See 5 U.S.C. 552b(b) and (c)(1) – (10))
CONCLUSION

A quorum for this Commission is set by statute. HAVA provides that any action requires a vote of three Commissioners. As such, the presence and deliberation of three Commissioners constitute a quorum of the Commission.

Meetings must be held in compliance with the Government in the Sunshine Act. Thus, all meetings of the Commission (that is where 3 or more Commissioners and present and deliberating) shall be noticed and open to the public, unless one or more exceptions for closure of the meeting applies. No meetings of three or more Commissioners should be held with persons other than staff of this Commission without following the provisions of the Government in the Sunshine Act.
ATTORNEY-CLIENT PRIVILEGED COMMUNICATION

MEMORANDUM

TO: Chairman Soaries

FROM: Julie Thompson

RE: Open Meetings

DATE: November 12, 2004

The open meetings requirement is found in 5 USC § 552b. Generally, that statute defines a meeting of a covered agency to be:

the deliberations of at least the number of individual agency members required to take action on behalf of the agency where such deliberations determine or result in the joint conduct or disposition of official agency business, but does not include deliberations required or permitted by subsection (d) or (e)

5 USC 552b(a)(2). The statute, further specifically prohibits the conduct or disposition of agency business other than in accordance with the provisions of the open meetings law. 5 USC 552b(b). There are several enumerated exceptions to what must be conducted in an open and public meeting:

(1) disclose matters that are (A) specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and (B) in fact properly classified pursuant to such Executive order;
(2) relate solely to the internal personnel rules and practices of an agency;
(3) disclose matters specifically exempted from disclosure by statute (other than section 552 of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
(4) disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;
(5) involve accusing any person of a crime, or formally censuring any person;
(6) disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;
(7) disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;
(8) disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;
(9) disclose information the premature disclosure of which would--
(A) in the case of an agency which regulates currencies, securities, commodities, or financial institutions, be likely to (i) lead to significant financial speculation in currencies, securities, or commodities, or (ii) significantly endanger the stability of any financial institution; or
(B) in the case of any agency, be likely to significantly frustrate implementation of a proposed agency action,
except that subparagraph (B) shall not apply in any instance where the agency has already disclosed to the public the content or nature of its proposed action, or where the agency is required by law to make such disclosure on its own initiative prior to taking final agency action on such proposal; or
(10) specifically concern the agency's issuance of a subpoena, or the agency's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the agency of a particular case of formal agency adjudication pursuant to the procedures in section 554 of this title or otherwise involving a determination on the record after opportunity for a hearing.

5 USC §552b(c). In addition, the exceptions to the public records law, those documents which are not required to be made open and available to the public, are also exceptions to items that must be discussed in an open and public meeting.

(1) (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified pursuant to such Executive order;
(2) related solely to the internal personnel rules and practices of an agency;
(3) specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute (A) requires that the matters be withheld from
the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;

(6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (A) could reasonably be expected to interfere with enforcement proceedings, (B) would deprive a person of a right to a fair trial or an impartial adjudication, (C) could reasonably be expected to constitute an unwarranted invasion of personal privacy, (D) could reasonably be expected to disclose the identity of a confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of a record or information compiled by criminal law enforcement authority in the course of a criminal investigation or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (F) could reasonably be expected to endanger the life or physical safety of any individual;

(8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(9) geological and geophysical information and data, including maps, concerning wells.

5 USC § 552(b).

The open meetings law does not require the agency to hold meetings. Rather, if the agency holds a meeting it must comply with the open meeting requirements where applicable. This is why the agency can use notation voting (tally votes) in lieu of a meeting.

With regard to the specific discussion that we had concerning the possibility of holding a meeting with certain advocacy groups, I believe that this will run afoul of the open meetings law, as such meeting will inevitably reveal information and spur deliberations, analysis and ultimately decisions related to the past election. It would be preferable to have these advocacy groups present at a public meeting of the Commission for a number of reasons: (1) it would allow an open and public discussion of their impressions of the election; (2) it would allow the Commission to invite all advocacy groups with an interest in this topic; and (3) it would prevent any allegations that the Commission met behind
closed doors with certain but not all advocacy groups – thus avoiding any appearance of favoritism. We have already discussed the possibility of having a public meeting on December 16 (or the date that is finally selected) where certain elections stakeholders are asked to give reports on their sense of the election. In addition, we have discussed the possibility of having public hearings in the field wherein we gather information regarding the positives and negatives associated with the November 2, 2004 election. These would be perfect opportunities to publicly gather the information that we are seeking through a meeting with the advocacy groups.
Kind of tough. Let me know what you think.

John Weingart  
Associate Director  
Eagleton Institute of Politics  
Rutgers University  
New Brunswick, NJ

Dear Mr. Weingart:

Thank you for your recent inquiry of August 16, 2006 regarding the anticipated release of data contained in the Eagleton Institute of Politics and Moritz College of Law studies on provisional voting and voter identification, which were conducted for the U.S. Election Assistance Commission.

While your assertion that election officials could benefit from the data compiled in the course of your research may be true, I would urge Eagleton and Moritz to exercise caution in the release of this information without further work to ensure its accuracy and completeness. Eagleton and Moritz received information from several election officials at the Standards Board and Board of Advisors meetings that information contained in the data set and draft report are inaccurate or incomplete. Furthermore, as you will recall, EAC accepted the report based on this data in “draft” as the completion of your contract due to our concerns about the data and the analysis of that data. In light of those concerns, EAC has not yet completed its review of the “draft” report and has not made final determinations on the release of any future document based on that data and draft report.

As such, any release of the data gathered by Eagleton or Moritz may not be released in conjunction with or using EAC’s name as endorsing the content, quality or veracity of such data. I trust that this clarifies how Eagleton and Moritz may use the data gathered in the performance of its contract with the EAC. If you have any questions, please feel free to contact me.

Sincerely,

Thomas Wilkey  
Executive Director
Commissioners,

I intended to get this out to you much earlier today, but the day got away from me. After our hearing last week before the House Appropriations Subcommittee and the requests that were made for the draft reports of the Eagleton and Voter Fraud studies, I think that we must take a different approach to addressing the quality of these reports. While it may or may not be our intention to release these documents publicly, we MUST respond to the request made from a Congressional Committee and cannot use FOIA exemptions as FOIA does not apply to them. I believe that it is safe to assume that if we provide these documents to the Committee, even with a letter explaining their predecisional nature, that these documents will be released into the public spectrum. As such, I feel that EAC needs to make a statement regarding the quality of these reports and why we are making (or have made) a decision not to adopt the draft reports that were produced by our contractors.

Thus, I edited the statement that Karen produced with comments that reflect why we will not adopt the Eagleton report. That document is attached below. I would suggest that we put similar statements regarding Eagleton's report and the Voter Fraud draft report into a letter that I am drafting to go to the Committee with the requested documents. I will edit that letter to include similar comments tonight/tomorrow morning and will circulate it to you.

Please let me know if you have any questions, concerns, comments, etc.

EAC Statement on Future Study of Voter Identification Requirements

Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data--aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau--the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research data, analysis and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements and the potential variation into determine if these laws have an impact on turnout rates based on the type of voter identification requirements. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a less reliable data set...
based upon the Current Population Survey (which was self-reported and showed a
significantly higher turnout rate than other conventional data on that point) was
conducted that produced only some evidence of correlation between voter identification
requirements and turnout. Furthermore, the initial categorization of voter identification
requirements included classifications that actually require no identification at all, such as
"state your name." These data and the statistical analysis used by the Contractor were
rightly criticized by independent working and peer review groups comprised of social
scientists and statisticians. EAC believes that the Contractor’s recommendation or draft
report is so fundamentally flawed that none of the draft findings can be adopted or
rehabilitated to form a reliable, accurate and useful product. Thus, EAC is not adopting
the report submitted by the Contractor and, therefore, is not releasing the will not issue a
report based upon this study.

EAC will engage in a longer-term, more systematic review of voter identification
requirements. Additional study on the topic will include more than one Federal election
cycle, additional environmental and political factors that effect voter participation, and
the numerous changes in state laws and regulations related to voter identification
requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter
  identification requirements. This will include tracking states’ requirements which
  require a voter to state this or her name, to sign his or her name, to match his or
  her signature to a signature on file, to provide photo or non-photo identification or
to swear an affidavit affirming his or her identity.

- Establish a baseline of information that will include factors that may affect or
  influence Citizen Voting Age Population (CVAP) voter participation, including
  various voter identification requirements, the competitiveness of a race and
  certain environmental or political factors. EAC will use some of the information
  collected by Egelton as well as additional data from the states to develop this
  baseline.

- Convene, by mid-2007, a working group of advocates, academics, research
  methodologists and election officials to discuss EAC’s next study of voter
  identification. Topics to be discussed include methodology, specific issues to be
  covered in the study and timelines for completing an EAC study on voter
  identification.

- Study how voter identification provisions that have been in place for two or more
  Federal elections have impacted voter turnout, voter registration figures, and
  fraud, study the effects of voter identification provisions, or the lack thereof, on
  early, absentee and vote-by-mail voting. Included in this study will be an
  examination of the relationship between voter turnout and other factors such as
  race and gender.
• Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.
I have not reviewed the various laws, but I believe that it would require that kind of review to answer your question accurately. My guess is that much like other election-related provisions, the language of the statute and the placement of the statute in the code or statutory scheme will dictate the answer to the question. Some may not even be written into statute. If you want me to, I can get someone to start working on that review.

Juliet T. Hodgkins

Karen will present our discussion and conclusions tomorrow. However, when we left the briefing, I think everyone believed that I would provide comments since I will not be able to be on the phone. As such, I am transmitting my comments through this email. I will respond or address Eagleton’s numbered paragraphs (note that there is no paragraph 4).

1. There is no need to address this as Eagleton agrees that they only reviewed one election’s statistics. The statement of work for the contract told them to review the status of the law in 2004, but in no way limited their analysis to a single year.
2. I believe that Eagleton's issue here is one of semantics. They don't like the phraseology of this sentence. However, the sentence is true and is demonstrated by the sentence in paragraph 2 of the statement that they reviewed and to which they provided comments. That paragraph specifically contains the following information: "Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates (FN2) and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau. (FN3)" Eagleton made two sets of comments to Footnote 2, which is imbedded in the sentence that was just quoted. They explained their methodology in those comments and that methodology was captured in footnote 2. That footnote specifically contains the following sentences: "These data did not differentiate between citizens and non-citizens;... Thus, 2004 estimates of voting age population include person who are not registered to vote."

3. Eagleton objects to the use of the word "so" in the second sentence. They believe that this creates an inference that they only used the second set of data because the first did not show significant correlations. While generally speaking, I believe that this inference is at least partially true, since researchers are always searching for a set of data that will show a statistically significant correlation and will proceed to a different set of data if the first does not show it, it is not the intended inference of these two sentences. The point is to show that of the two data sets that they used one showed no significant correlation and the second showed some correlations (however not all variables showed correlation). And, that the second set of data -- the one that showed correlation was questionable because of the unusually high turnout rate that was reported. As such, we have agreed to remove the words "so" at the beginning of the second sentence and "only" in the middle of the second sentence -- see #9).

4. There is no number 4.

5. I believe that the statement as contained in the EAC statement is TRUE. Stating one's name is not an independently verifiable form of identification, and I think those are the forms of identification that we are talking about. I can walk into any polling place in the country and state the name of any person. Unless the poll worker knows me or knows the person whose name I have used, there is no way to independently verify whether my statement is true. Conversely, my signature can be compared, my address can be verified, or my driver's license can be scrutinized to determine if I am the person that I purport to be. While it is true that I identify myself on the phone or in person all the time by stating my name, it is not for the purpose of determining my eligibility to vote in a particular precinct, etc. I believe that when the term identification is used in the context of voting that it must mean that the voter provides some independently verifiable form of identification. Having said this, I understand that this may be a point of disagreement for others. But, as for me, this statement is true.

6. Based on conversations with Karen concerning the two groups-- one assembled by Eagleton and one assembled by EAC -- both "questioned" the methodology and statistical analysis employed by Eagleton. The group assembled by Eagleton was referred to by them in their report as their "peer review group." Karen feels that "working group" is not an accurate description of the group assembled by EAC, so she has language to use to replace "independent working group" that captures the essence of that group.

7. See response to #2, above.

8. See response to #1, above.

9. See response to #3, above.

10. See response to #6, above.

11. I believe that the Commission must act on this report. Merely stating what we will do in the future will not distance us from this work and will result in media and others quoting Eagleton's work as an "EAC" report. It has been my understanding that the consensus of the group is to "decline to adopt." I believe that this is the right action.

My flight departs at 9:20 a.m. (EDT) and I do not arrive until 12:15 p.m. (EDT). However, if you have
questions concerning my comments, I will be around tonight and will be available tomorrow afternoon by Blackberry.

SECTION 551 DEFINITIONS

RULE MAKING:
Agency process for making, changing or repealing a rule.

RULE:
An agency statement of general or particular applicability AND future effect -- Designed to

- implement, interpret, or prescribe law or policy OR...
- describing the organization, procedure or practice requirements of the agency...

AND includes the approval or prescription for the future OF:

- rates,
- wages,
- corporate or financial structures or reorganizations thereof,
- prices,
- facilities,
- appliances, services or allowances therefore or of valuations,
- costs,
- or accounting,
- or practices bearing on any of the above.

AJUDICATION:
Agency process for formulating an ORDER.

ORDER:
Final disposition (affirmative or negative) of an agency in a matter other than rule making but including licensing.

LICENSING:
Agency process granting, renewing, denying, suspending, revoking, etc... a license.

LICENSE:
Whole or part of any agency permit, certificate, approval, registration... or other form of permission.

SECTION 553 Rule Making

1) General Notice Required... Notice of proposed rule making published in Federal Register.
   a. No timeline noted.
   b. Exceptions. Such notice not required for interpretive rules, general statements of policy, or rules of agency organization, procedure or practice... OR finding of good cause shows such filing is impractical unnecessary, etc...
2) After notice, above, agency shall give the public an opportunity to participate in the rulemaking through submissions of written data... or oral presentations.

3) After consideration of the relevant materials presented, the agency shall incorporate in the rules adopted, a concise general statement of their basis and purpose. If statutes require a hearing on the record different rules apply (sec 556 & 557)

4) Publication of the substantive rule must be made 30 days before in become effective. (exceptions are noted).

SEC 554 ADJUDICATIONS (Agency process for making orders —final decisions that are not rules—includes licensing (i.e. certification/approval permit)

Applies only when adjudication required by statute to be determined on the record after opportunity to be heard. ??? does HAVA require this... it is silent to the whole process.
Section set rules for such a proceeding

SEC 556 HEARINGS....

This section on hearings applies only when required by the Rule Making Section (553) or the Adjudication Section (554). Under both sections hearings are only required when required be statute.
Per your question concerning draft documents and agency policies, my experience is that such documents are rarely released. First, the basis for withholding such documents is a litigation privilege referred to as the deliberative process privilege. FOIA (as a matter of necessity) incorporates litigation privileges as a statutory exemption. Like most privileges, the deliberative process privilege can be waived by the agency. As such, it is a voluntary exemption under FOIA (unlike exemptions for other matters like the withholding of classified information).

Agencies do have FOIA regulations. I am familiar with the Air Force regulation and took a quick look at those of the DOL and DOE. The regulations are generally focused upon procedure (how a request is processed, appealed, etc...) . Sometimes a regulation will outline or summarize exemptions for the benefit of its employes (the Air Force did this). Generally, they do not contain specific policies regarding the retention of drafts. The closest you will see agencies come to this is a general statement of policy relating to dealing with non-mandatory exemptions. For example the DOE states: "[t]o the extent permitted by other laws, the DOE will make records available which it is authorized to withhold under 5 U.S.C. § 522 whenever it determines that such disclosure is in the public interest." 10 C.F.R. § 1004.1. HOWEVER, given that the deliberative process privilege is a privilege based upon public policy (i.e. to protect decision making and avoid public confusion) it is unlikely that this policy would support the release of most drafts. In fact, I pulled a DOE decision on a FOIA appeal regarding a drafts and found this to be the case.(Case No. VFA-0558, 27 DOE 80,270).
The purpose of this document is to provide a broad overview of the trade secrets and commercial and financial information exemption of the Freedom of Information Act (FOIA) (Exemption 4). The document should be a useful tool in responding to FOIA request. It should also serve as a helpful reference during the creation of the EAC’s Voluntary Voting System Certification Program. The certification program should be created with the understanding that the EAC has an interest, legal obligation and responsibility to protect certain proprietary information. Such forethought will make for a more efficient and compliant program in the long run. Please note that this document is a simple overview and should not serve as a replacement for legal counsel, independent research and cases by case—fact specific—analysis.

Exemption 4 of FOIA

The Freedom of Information Act (5 U.S.C. §552(b)(4)) provides for the release of documents to the public upon proper request. The statute does, however, exempt certain documents from release. One such exemption, Exemption 4, protects “trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential.” This exemption serves to protect both the government and persons who provide information to the government. It does this by ensuring that the government will be able to obtain complete, accurate and useful information and safeguarding those who provide such information from competitive harm.

Generally, FOIA Exemption 4 is viewed in two parts or categories: (1) trade secrets and (2) commercial or financial information. If a document meets the definition of a trade secret no additional inquiry is necessary, it is exempt from the requirements of FOIA.\(^1\) If a document is not a trade secret, it must be reviewed to determine if it is commercial or financial information which is privileged or confidential. This requires an involved analysis under standards set by the courts.\(^2\) Ultimately any determination that Exemption 4 of FOIA applies to a request for information, will require that the information be withheld. This is because the Trade Secrets Act (18 U.S.C. §1905), a criminal statute prohibiting the release of certain information by the government, has been read as coextensive with Exemption 4.\(^3\) Thus, in practice, there may be no discretionary release of materials covered by Exemption 4.

Trade Secrets

The term “trade secrets” is not defined in FOIA and has different meanings under the common law. The courts have determined that in the FOIA context, the term trade secrets should be defined

\(^3\) CNA Fin. Corp. v. Donovan, 830 F.2d 1132 (D.C. Cir. 1987).
narrowly. For the purpose of FOIA Exemption 4, the term has been defined “as a secret, commercially valuable plan, formula, process, or device that is used for the making, preparing, compounding, or processing of trade commodities and that can be said to be the end product of either innovation or substantial effort.” Ultimately, trade secrets information “relates to the productive process itself.” It deals with information describing how a product is made. It does not relate to information describing end product capabilities, features, or performance.

Commercial or Financial Information

Exemption 4 of FOIA provides that documents containing information that is “commercial or financial” may be withheld if it was obtained from “a person” and is “privileged or confidential.” First, the terms “commercial” and “financial” should be given their ordinary meaning. As such, the terms may be read broadly and include records in which a submitter has any commercial interest. As for the term “person,” it is also read broadly. The FOIA phrase “obtained from a person” encompasses a wide range of entities, including: corporations and state governments who provide information to the government. This leaves the more complex determination of whether information is privileged or confidential.

The standard for determining whether information is confidential depends upon whether its submission to the government was voluntary or required. Information given to an agency voluntarily is provided greater protection from release. Such information is categorically protected if it is NOT customarily disclosed to the public by the submitter. Case law and Department of Justice guidance dictate that determining whether a submitter voluntarily provided information is not based upon the nature of their participation in the activity, but whether the information was required if they chose to participate. Thus, despite the fact that the EAC’s voting system certification program will be “voluntary,” it is likely that the documents which vendors provide will be required by the EAC as a condition of participation.

Information required to be submitted to an agency is confidential if its disclosure is likely to produce either of the following effects: (1) impair the government’s ability to obtain necessary information in the future (“impairment prong”) OR (2) cause substantial harm to the competitive position of the submitter (“competitive harm prong”).

Impairment Prong.

Looking first to the impairment prong, in the context of required information, the government’s ability to collect needed information will be impaired when disclosure under FOIA would result in a

7 Public Citizens Health Research Group, 704 F.2d at 1290.
11 National Parks & Conservation Association, 498 F.2d at 770.
diminution of the reliability or quality of the required submissions. Such a determination by the Government requires a finding that impairment would be significant, this requires the rough balancing of the extent of impairment with the public’s interest in disclosure. This should be considered a high standard. Moreover, such impairment seems unlikely in the certification context, where the reliability and quality of the information provided will be independently determined and provided by an EAC accredited testing laboratory. Furthermore, a lapse in the reliability or quality of information is less likely when a submitter’s certification may depend upon such factors.

Competitive Harm Prong

Looking next to the competitive harm prong, required information is confidential if its release “is likely… to cause substantial harm to the competitive position of the person from whom the information was obtained.” This harm is focused on that harm “flowing from the affirmative use of proprietary information by competitors,” rather than any competitive injury such as that harm associated with angry customers or employees. Before an agency may make a determination regarding the release of information that might cause competitive harm, it must provide the submitter with an opportunity to share its views. This coordination is required by Executive Order 12,600. Coordination with the submitter does not relieve the agency of its responsibility to make a final, independent determination. Ultimately, any determination of competitive harm is highly fact sensitive. The same types of information have been found releasable or not releasable depending on other surrounding facts.

Additional Criteria for Confidentiality (“The Third Prong”)

The Courts have held that the impairment and competitive harm prongs laid out in case law are not “the exclusive criteria for determining confidentiality.” The key issue is whether the release of information will harm an “identifiable private or government interest which the Congress sought to protect by enacting Exemption 4.” Specifically, courts have found records that are “intrinsically valuable” meet this definition and should not be release. This includes records that are themselves valuable commodities sold in the marketplace.

Summary Tool

The below is a graphic summary of the information provided above. It may be used to assist individuals in the decision making process. All decision regarding the release of materials should be make on a cases by case basis after due consideration of the facts and law.

---

12 Critical Mass, 975 F.2d at 878 and see Department of Justice, Freedom of Information Act Guide, Exemption 4, Impairment Prong of National Parks Test (May 2004) (See guidance and various case law cited therein.)
13 Such a determination usually requires the agency to contact the submitter and have them make a statement regarding their practice.
14 Washington Post Co. v. HHS, 690 F.2d 252, 269 (D.C. Cir. 1993)
15 National Parks & Conservation Association, 498 F.2d at 770.
16 Public Citizens Health Research Group, 704 F.2d at 1291.
17 9 to 5 Organization for Women Office Workers v. Board of Governors of the Federal Reserve System, 721 F.2d 1, 10 (1st Cir. 1983).
I. In order to determine if a document is protected from release under Exemption 4 of FOIA, you must first ask whether meets the definition of a Trade Secret.

**Trade Secret:** A secret, commercially valuable plan, process, or device that is used for the making or processing of a product and that is the end product of either innovation or substantial effort. It relates to the productive process itself, describing how a product is made. It does not relate to information describing end product capabilities, features, or performance.

**EXAMPLES**

<table>
<thead>
<tr>
<th>Trade Secret</th>
<th>Not a Trade Secret</th>
</tr>
</thead>
<tbody>
<tr>
<td>➢ Plans, schematics and other drawings useful in production.</td>
<td>➢ Information pertaining to a finished product’s capabilities or features.</td>
</tr>
<tr>
<td>➢ Specifications of material used in production.</td>
<td>➢ Information regarding a finished product’s performance (including testing results of an end product).</td>
</tr>
<tr>
<td>➢ Source code used to develop software where release would reveal actual programming.</td>
<td>➢ Information regarding product components that would not reveal any commercially valuable information regarding production.</td>
</tr>
<tr>
<td>➢ Technical descriptions of the manufacturing processes, quality control methodology and other information directly related to production.</td>
<td>➢ Test results (compliance testing) performed on unfinished products.</td>
</tr>
<tr>
<td>➢ Test results (compliance testing) performed on unfinished products.</td>
<td></td>
</tr>
</tbody>
</table>

II. If a document does not contain a “Trade Secret,” you must determine whether the information is protected as commercial or financial under FOIA Exemption 4. This involves a three part test. Information must meet each part of this test to be withheld under Exemption 4.

**Test.** Exemption 4 also covers information that is (1) obtained from “a person,” (2) commercial or financial and (3) is “privileged or confidential.”

(A) **The first two elements of the test are the most simple to apply. Exemption 4 requires information to have been obtained from a “person” and be “commercial or financial” in nature.**

**Person.** The term “person,” is read broadly and includes corporations and state governments. **AND** **Commercial and Financial.** The terms are given their ordinary meaning and read broadly. They include records in which a submitter has any commercial interest.

19 In compliance testing, where a product awaited marketing approval from the FDA, a court has found the product to be NOT FINISHED—and the testing a Trade Secret.
Next the information must meet the more complicated third part of the test, it must be privileged or confidential. This requires yet another series of analysis.

1. Was the information required or provided voluntarily?

Voluntary or Required? Information given to an agency voluntarily is provided greater protection from release. Most information provided the EAC via its certification program will not be voluntarily provided (despite the voluntary nature of the program), because it was most likely provided as a condition of participation. If this is not the case, the information may be withheld if it is not customarily released by the submitter. Such a determination should involve a statement from the submitter and an analysis of the relevant community practices.

2. If the information was required, would release (i) impair the government's ability to obtain necessary information in the future (“impairment prong”) OR (ii) cause substantial harm to the competitive position of the submitter (“competitive harm prong”)? If either of the below is true than the information may be considered confidential.

Impairment Prong
The government’s ability to collect needed information will be impaired when disclosure under FOIA would result in a diminution of the reliability or quantity of the required submissions. The impairment MUST BE SIGNIFICANT. This is a high standard, unlikely to apply to certification.

Competitive Harm Prong
Release would likely cause substantial harm to the competitive position of the submitter. The harm at issue must come from the use of proprietary information BY COMPETITORS. This is a fact specific analysis.

3. If the release of information that may cause competitive harm is contemplated, the submitter must be contacted.

Contact Requirement. Before an agency may make a determination regarding the release of information that might cause competitive harm, it must provide the submitter with an opportunity to share its views. This does not relieve the agency of its responsibility to make the final determination. This action is required by Executive Order.
1. Federal Advisory Committees (FACs) are entities that provide guidance to Federal agencies. They are heavily regulated. There is the Federal Advisory Committee Act (FACA), a FACA regulation published by GSA, and relevant Executive Orders. You are collecting, maintaining and managing information on behalf of your commissioner who serves as an EAC Designated Federal Officer.

Designerated Federal Officer ("DFO"), means an individual designated by the agency head, for each advisory committee for which the agency head is responsible, to implement the provisions of sections 10(e) and (f) of the Act and any advisory committee procedures of the agency under the control and supervision of the CMO. The DFO shall:

(a) Approve or call the meeting of the advisory committee or subcommittee;
(b) Approve the agenda, except that this requirement does not apply to a Presidential advisory committee;
(c) Attend the meetings;
(d) Adjourn any meeting when he or she determines it to be in the public interest; and
(e) Chair the meeting when so directed by the agency head.

2. All EAC FACS are mandated by Congress via HAVA. Thus they are non-discretionary committees.

Non-discretionary advisory committee means any advisory committee either required by statute or by Presidential directive. A non-discretionary advisory committee required by statute generally is identified specifically in a statute by name, purpose, or functions, and its establishment or termination is beyond the legal discretion of an agency head.

3. An agency should also have a Committee Management Officer (I am not sure if we do). They are responsible for ensuring FACA policies and records are maintained Agency-wide.

4. EAC is also required to have guidelines on managing FACAs. We do not... yet....

DOCUMENTATION:

1. Advisory committee records. Official records generated by or for an advisory committee must be retained for the duration of the advisory committee. Upon termination of the advisory committee, the records must be processed in accordance with the Federal Records Act (FRA), 44 U.S.C. Chapters 21, 29–33,
and regulations issued by the National Archives and Records Administration (NARA) (see 36 CFR parts 1220, 1222, 1228, and 1234),

2. Documentation and consultation with the FACA Secretariat (GSA) was originally required when our FACs were created and drafted their Charter. To the extent we have this documentation; it should be sought, gathered and maintained.

3. At a minimum, we need to find copies of the FACA Charters, Bylaws and changes thereto. We also need to maintain accurate lists of all FACA members. Finally, all FACA meetings are required to be reduced to minutes. We must maintain all of these minutes.

4. Must maintain copies of all documents provided to or produced by the FACA.

   Subject to section 552 of title 5, United States Code, the records, reports, transcripts, minutes, appendixes, working papers, drafts, studies, agenda, or other documents which were made available to or prepared for or by each advisory committee shall be available for public inspection and copying at a single location in the offices of the advisory committee or the agency to which the advisory committee reports until the advisory committee ceases to exist."

5. Reports

   Annual comprehensive review of Federal advisory committees. To conduct an annual comprehensive review of each advisory committee as specified in section 7(b) of the Act, GSA requires Federal agencies to report information on each advisory committee for which a charter has been filed in accordance with § 102-3.70, and which is in existence during any part of a Federal fiscal year. Committee Management Officers (CMOs), Designated Federal Officers (DFOs), and other responsible agency officials will provide this information by data filed electronically with GSA on a fiscal year basis, using a Government wide shared Internet-based system that GSA maintains. This information shall be consistent with specific guidance provided periodically by the Secretariat. The preparation of these electronic submissions by agencies has been assigned interagency report control number (IRCN) 0304–GSA–AN.

   Annual report of closed or partially-closed meetings. In accordance with section 10(d) of the Act, advisory committees holding closed or partially closed meetings must issue reports at least annually, setting forth a summary of activities and such related matters as would be informative to the public consistent with the policy of 5 U.S.C. 552(b).

   Advisory committee reports. Subject to 5 U.S.C. 552, 8 copies of each report made by an advisory committee, including any report of closed or partially-closed
meetings as specified in paragraph (c) of this section and, where appropriate, background papers prepared by experts or consultants, must be filed with the Library of Congress as required by section 13 of the Act for public inspection and use at the location specified § 102–3.70(a)(3).

PUBLISHING MEETINGS.

We are required to publish an announcement of a FACA meeting in the Federal Register 15 day in advance of the meeting. Thus BEFORE (AT LEAST 4 WORKING DAYS BEFORE) THE 15 DAY DEADLINE YOU NEED TO PROVIDE BRYAN WHITENER AND COUNSEL SPECIFIC INFORMATION ABOUT THE MEETING. If any part of the meeting is to be closed to the public this needs to be discussed with counsel in advance. FACA requires the following info:

How are advisory committee meetings announced to the public?
(a) A notice in the Federal Register must be published at least 15 calendar days prior to an advisory committee meeting, which includes:
(1) The name of the advisory committee (or subcommittee, if applicable);
(2) The time, date, place, and purpose of the meeting;
(3) A summary of the agenda, and/or topics to be discussed;
(4) A statement whether all or part of the meeting is open to the public or closed; if the meeting is closed state the reasons why, citing the specific exemption(s) of the Government in the Sunshine Act, 5 U.S.C. 552b(c), as the basis for closure;
and (5) The name and telephone number of the Designated Federal Officer (DFO) or other responsible agency official who may be contacted for additional information concerning the meeting.
(b) In exceptional circumstances, the agency or an independent Presidential advisory committee may give less than 15 calendar days notice, provided that the reasons for doing so are included in the advisory committee meeting notice published in the Federal Register.
The purpose of this paper is to provide background and make recommendations regarding the procedure for certifying or decertifying a voting system under the EAC’s proposed voluntary voting system certification program. The document focuses on the fundamental requirements of due process in the context of this program.

BACKGROUND

EAC’s voluntary voting system certification program will provide vendor’s the opportunity to have their voting systems tested and ultimately certified by the Federal government. This program is strictly voluntary.1 The Federal government places no restrictions or requirements nor grants any privileges regarding the sale or operation of voting systems on the basis of its certification. However, states may condition the use of such systems on the receipt of an EAC certification. Thus, at some level, voluntary EAC accreditation may impact the ability of a voting system manufacturer to sell its product. The question is whether or not this impact is proximate enough to trigger due process requirements and what these requirements would be. To start this analysis one must first look to the relevant law. The two principle authorities to consider are (1) the Administrative Procedures Act (APA) and (2) Due Process under the 5th Amendment to the U.S. Constitution (Due Process).

The APA. The APA sets forth procedural requirements for rule making, adjudication and licensing.2 It is improbable that a court would find that these APA provisions apply to the EAC’s voluntary certification program. Congress (through HAVA) has specifically withheld rulemaking authority from the EAC in all areas impacting state or local governments, with one exception (dealing with the National Voter Registration Act).3 Moreover, legislative rule making requires a specific statutory grant of authority.4 As the EAC has not been given this authority, the rule making provisions of the APA cannot apply.

Similarly, the adjudication provisions of the APA (which deals with the process for formulating an order) are triggered only when such determinations are “required by statute to be determined on the record after opportunity for an agency hearing.”5 HAVA contains no such requirements with regard to certification determinations. Further, the APA’s adjudication section specifically exempts from its coverage “proceedings in which

2 5 U.S.C. §§ 553, 554 and 558 (respectively). See also 5 U.S.C. §§ 556, 557, 558 (regarding prescribed procedures)
3 HAVA, 42 U.S.C. §15329
5 5 U.S.C. §§ 554(a)
decisions rest solely on inspections, test or elections.” This exemption arguably covers
the proposed certification program which is based primarily on a test report.

Finally, the APA definition of license includes an “agency certificate… or other
form of permission.” This definition has been read liberally by the courts. However,
under the definition, a license must (at least) include some form of “permission.” Under
HAVA, the recipient of a certification receives no benefit, access or right provided by the
Federal government. Moreover, even if an EAC certification can be viewed as a license
as defined by the APA, the statute requires that such a license be “required by law”
before it applies. Again, there is no requirement under HAVA that a party hold an EAC
certification to participate in any Federal program or receive any Federal benefit.

While the procedural provisions of the APA do not apply to the EAC’s
Certification program, a review of the statute’s processes may be helpful in the program’s
development. This review does not suggest that the EAC should or has made the APA
applicable as a matter of policy. The following are a few APA provisions with some
relevance to the EAC certification program.

1. In hearings a party is entitled to present his case by oral OR documentary
evidence, to submit rebuttal evidence and confront the evidence against them.

2. In applications for initial licenses an agency may adopt procedures for the
submission of evidence in written form.

3. The suspension or withdrawal of a license requires, (1) written notice by the
agency of the facts that warrant the action and (2) the opportunity to demonstrate
OR achieve compliance with all lawful requirements.

4. A license of a continuing nature does not expire until a final agency determination
has been made, if the licensee has timely filed an application for a renewal or a
new license.

Due Process. The Due Process clause states that “No person shall… be deprived
of life, liberty, or property, without due process of law.” Any analysis under this
provision must be twofold. First one must determine if government action will deprive a
person of life, liberty or property to determine if due process is required. Next, one must
determine “how much process is due.” At this point we must answer the first question.
Ultimately, the issue is limited to whether a voting system vendor has a property interest
in the receipt, denial or loss of an EAC certification. As noted above, this is a
complicated question. While an EAC certification allocates no rights, privileges or

7 5 U.S.C. §§ 551(8) (see 5 U.S.C. §§ 554(9) for definition of “licensing”).
8 Horn Farms Inc. v. Veneman, 319 F.Supp 2d 902 (N.D. 2005) (citing North America v. Dept. of
Transportation, 937 F.2d 1427, 1437 (9th Cir. 1991)).
9 5 U.S.C. §§ 556(d)
10 5 U.S.C. §§ 556(d)
11 5 U.S.C. §§ 558 (c)
12 5 U.S.C. §§ 554(c)
benefits, it is likely that states may tie such benefits to the Federal certification. Is this connection proximate enough to create a property interest in an EAC certification?

Ultimately, we do not need to settle this matter at this time. As a matter of policy, the EAC has determined that voting system manufacturers shall be given an opportunity to be heard in the certification process. While we do not find that constitutional due process applies, prudence dictates that if procedural rights are to be granted, they meet the minum due process requirements.

DUE PROCESS REQUIREMENTS

"The fundamental requirement of due process is the opportunity to be heard 'at a meaningful time and in a meaningful manner.'" 14 "Due process is flexible and calls for such procedural protections as the particular situation demands." 15 Using these principles, the Supreme Court developed a three factor balancing test to determine what type of process is due before the government can deprive a person or entity of a protected interest. Due process requires consideration of three factors: (1) the private interest that will be affected by the official action; (2) the risk of an erroneous deprivation of such interest through the procedures used, as well as any value of adding additional safeguards; and (3) the Government's interest, "including the function involved and the fiscal and administrative burdens," that additional procedural requirements would entail. 16

Ultimately, a review and balancing of these factors indicate that an informal, written, pre-deprivation hearing (without additional post deprivation proceedings) is sufficient to meet due process. Looking at the first factor, the interest of voting system manufacturers is substantial (though somewhat tenuous). It is possible that the denial of system certification may impact a manufacturer's business interests by limiting the number of states in which they sell their system. However, the courts have affirmed an informal written hearing process in official actions effecting far more significant private interests. Such interests include disability benefits, 17 employment, 18 right to issue government insured mortgages, 19 and the deprivation of money. 20

Further, the risk of erroneous deprivation is low and not significantly improved by adding additional safeguards (factor 2). Holding an oral informal or evidentiary hearing would add nothing to the process except cost. Consider the following: (1) The certification process is primarily an objective, technical and scientific one. Such

---

16 Id. at 335.
17 See Mathews, 424 U.S. 319.
20 FDIC v. Bank of Coushatta, 930 F. 2d 1122 (5th Cir. 1991) and Quivara Mining Co. v. NRC, 866 F.2d 1246 (10th Cir. 1989).
processes lend themselves to written communication. The certification process will be almost entirely a written procedure. It will be base primarily on a written test report. An oral proceeding will add little to the process. (3) Along these lines, the outcome of a certification does not depend upon the truth and veracity of witnesses, but technical data. Traditionally, oral hearings are called for when the veracity of witnesses are a key factor in the agency's decision. (4) The parties at issue are well educated and sophisticated. Voting system manufacturers and the test labs they contract with are professional, highly qualified organizations in the business of developing and testing voting systems. They are quite capable of using the written process to make themselves heard.

Finally, the public and government interests are best served through a written hearing procedure. The EAC is a small agency with limited means, manpower (23 fulltime employees) and resources. Offering an oral hearing each time a member of the voting systems manufacturing industry seeks certification of a new system or upgrades a system would be an overwhelming burden. Moreover, such a procedure would significantly slow the certification process. Often, prompt action is required to allow a voting system to be fielded in time for a Federal election. The timely holding of elections is a preeminent public concern.

RECOMMENDED PROGRAM ELEMENTS

NOTE NEED TO ADD A SECTION REGARDING THE STANDARD OR REVIEW.

Ultimately, if we assume that voting system manufacturers have a property interest in the certification process sufficient to trigger due process, the analysis above concludes that a written pre-deprivation hearing process would provide the necessary procedural protections. An oral hearing is not required by law and, ultimately, would add little to the process, bar cost. The purpose of this final section is to recommend broad procedures that would define the written hearing process. Ultimately, the EAC's voting system certification program must be put forth such that it offers participants a meaningful opportunity to be heard at a meaningful time. The discussion will be split in two parts: a proposed process for (1) initial certification and (2) decertification.

Initial Certification. Initial certification is the process whereby the EAC makes a determination denying the certification of a voting system never before certified by the EAC. This would include the denial to certify such a system when paired with a new component or software modification (assuming such a pairing has not previously received an EAC certification). The following is a brief outline of this process.

1. Initial determination. Initial determination made regarding voting system (denial).

2. Notice. Notice of initial decision provided participant. This written notice would contain:

---

21 Mathews, at 345 - 346; see also York, 774 F.2d at 421.
22 See Mathews, at 333 - 334 (see also Goldberg v. Kelly, 397 U.S. 254 (1970)).
23 See Mathews at 345 - 346 (Physicians better able to communicate in writing than welfare recipients).
a. Initial decision.
b. Reasons for the decision.
c. Access to the information that served as the basis for the decision.
d. An opportunity to cure.
e. An opportunity for respondent to be heard (right to request reconsideration).

3. Reconsideration. Participant is given the opportunity to be heard on the matter by the individual who made the initial determination. This opportunity would take place before the decision is final. This individual must have the authority to grant relief. Participant must be allowed:
   a. Access the information that served as the basis for the initial decision (ideally provided during notice, above).
   b. To present additional facts and information in written form.
   c. To present a written argument responding to the initial decision.
   d. To have their relevant submissions considered.
   e. A reasonable deadline for submissions.

4. Agency Final Determination. Determination authority reviews the request for reconsideration and makes a Final Agency Determination.

5. Notice of Final Decision. Notice of Final Decision provided participant. This written notice would contain:
   a. Final decision.
   b. Reasons for the decision which specifically addresses the matters raised by participant during the reconsideration process.
   c. Notice of appeal rights.

6. Appeal. Participant may request an appeal of the agency final decision. After a timely request for an appeal, the participant shall be allowed:
   a. Access to all information that served as the basis for the initial and final decisions; including the previous decisions themselves and the information previously provided by participant ("the record").
   b. Opportunity to provide additional, written arguments responding to the initial and final decisions.
   c. A review of presented materials (by a different decision authority) with the power to grant relief.
   d. A reasonable deadline for submissions.

7. Decision on Appeal. Appellate authority reviews the request for appeal and makes a Decision on Appeal.

   a. Decision on Appeal.
b. Reasons for the decision which specifically address the matters raised by participant during the appeal process.
c. Notice that the decision is final.

**Decertification.** Decertification is the process in which the EAC revokes certification previously granted. Any EAC certification shall remain valid until such time as the decertification process has been completed. The following is a brief outline of this process.

1. **Informal Investigation.** Informal efforts by the agency upon receipt or discovery of information suggesting non-conformance. The end product is a memorandum of recommendation for or against the initiation of a Formal Investigation.

2. **Formal Investigation.** An official investigation into potential non-conformance. Initiated upon recommendation of informal investigation. Must be initiated by the Formal Investigation Authority.

   a. **Notice of Formal Investigation.** Upon determination of the need for a formal investigation notice must be given the interested party. Notice shall include:
      i. A description of the matter being investigated (with specificity).
      ii. An opportunity to provide relevant information.
      iii. A timeline for the investigation.
   
   b. **Report of Investigation (ROI).** The end result of a Formal Investigation is an ROI. The ROI shall collect and analyze all relevant information. The report will either substantiate or unsubstantiate the non-compliance investigation. A copy of the report will be provided the interested party.

3. **Notice of Non-Compliance (NNC).** If the formal investigation is substantiated, the interested party shall receive a NNC. The notice will provide the interested party the following:

   a. The ROI.
   b. A Statement of Non-Compliance outlining the relevant non-compliance with specificity.
   c. A statement informing the party that the EAC will make a determination regarding compliance.
   d. Opportunity to Cure.
   e. Opportunity to provide information in writing.
   f. Opportunity to provide a written argument.
   g. A reasonable deadline for submissions.

4. **Determination of Compliance or Non-Compliance.** The EAC must make a written compliance determination after consideration of the information, above. This written decision must address all relevant fact (including those submitted by the interested party).
a. **Compliance.** In the event the relevant authority determines that a voting system is substantively or procedurally compliant, he or she will make a formal, written determination. This determination will be forwarded to the interested party.

b. **Non-compliance.** In the event the relevant authority determines that a voting system is substantively or procedurally non-compliant, he or she will make a formal, written determination. The official will send the interested party a Notice of Intent to Decertify.

5. **Notice of Intent to Decertify.** If non compliance has been determined, the interested party will receive a notice of intent to decertify. This notice will include:
   a. Statement of the basis if decertification.
   b. The ROI, and all other factual materials that serve as the basis for the decision.
   c. Opportunity to cure.
   d. Opportunity to submit additional written information.
   e. Opportunity to present written argument.
   f. A reasonable deadline for submissions.

6. **Final Decision on Decertification.** Notice of Final Decision provided participant. This written notice would contain:
   a. Final decision.
   b. Reasons for the decision which specifically addresses the matters raised by participant during the reconsideration process.
   c. Notice of appeal rights.

7. **Appeal.** The interested party may request an appeal of the agency final decision. After a timely request for an appeal, the participant shall be allowed:
   a. Access to all information that served as the basis for the initial and final decisions; including the previous decisions themselves and the information previously provided by participant ("the record").
   b. Opportunity to provide additional, written arguments responding to the initial and final decisions.
   c. A review of presented materials (by a different decision authority) with the power to grant relief.
   d. A reasonable deadline for submissions.

8. **Decision on Appeal.** Appellate authority reviews the request for appeal and makes a Decision on Appeal.

9. **Notice of Decision on Appeal.** Notice of Decision on Appeal provided participant. The notice would contain:
   a. Decision on Appeal.
   b. Reasons for the decision which specifically address the matters raised by participant during the appeal process.
c. Letter of decertification.
d. Notice that the decision is final.
BACKGROUND:

Section 231 of the Help America Vote Act (HAVA) requires the U.S. Election Assistance Commission (EAC) to provide for the testing, certification, decertification, and recertification of voting system hardware and software by accredited laboratories. The vendors who participate in the testing and certification process are mainly private parties, many of whom are in competition with each other. However, the testing and certification process is an agency action subject to Freedom of Information Act (FOIA) requests. Therefore, the EAC wishes to develop and implement a policy consistent with FOIA that would protect private and proprietary information from public dissemination.

**FOIA**

FOIA requires that each agency publish in the Federal Register descriptions of its central organization and methods by which the public may obtain information. In addition, each agency must provide (1) a description of all formal and informal procedures available, (2) rules of procedure, (3) the location of forms, (4) instructions for forms, (5) substantive rules of general applicability, and (5) statements of general policy or interpretations of general applicability formulated and adopted by the agency.\(^1\)

Once the agency receives a FOIA request, the agency is required to determine within twenty days whether to comply with the request. Once the agency decides whether to comply with the request, it must immediately notify the requester of its decision,

---

\(^1\) 5 U.S.C.A. § 552(1) (1996)
including reasons for the determination. The determination of whether to comply with the request is within the agency’s discretion, but each agency must do due diligence to disclose as much information as possible. If the decision is to deny a request, the requester must be allowed to appeal to the head of the agency. Responses to appeals must be made within twenty days of the appeal.\(^2\) If the agency will be unable to comply with the request within the prescribed time limits because of unusual circumstances, it may extend the time limits by written notice only.\(^3\) The agency is also required under FOIA to promulgate regulations pursuant to notice and comment for the expedited processing of requests.\(^4\)

FOIA also requires each agency to promulgate regulations, including a notice and comment period, detailing the fees that may be associated with a FOIA request. Although fees should be limited to reasonable standard charges for searching, duplication, and review, if records are requested other than for commercial use, the fees should be lowered to the extent feasible.\(^5\) Any fees that the agency charges may not be requested in advance unless the requester has previously failed to pay fees in a timely fashion. The total amount the agency charges cannot exceed $250.\(^6\)

Since the purpose of FOIA is to make government action more transparent, the Act is meant to include as much information as possible. To that end, Congress has provided for only 9 exceptions to the rule requiring agency disclosure.\(^7\) Unless otherwise specified in the Act or superseded by another statute\(^8\), each agency is required to provide

\(^8\) For example, the Trade Secrets Act, 18 U.S.C.A. § 1905 (2000)
as much information as possible to a requestor. The information can be transmitted in any reasonable form the requester indicates, and fees must be tailored to the kind of media used to send information. For example, the agency may reasonably charge for photocopies, but may not charge for duplication if information is sent via email.

**EAC Certification Process**

The EAC’s proposed testing and certification process requires vendors to submit their technical data package (TDP) to the EAC, which then assigns the product an application number and develops a test plan. Once the test plan has been established, EAC Technical Review Consultants (TRC) will review the test plan, and approve or disapprove of it. If approved, the system is tested at a Voting System Test Laboratory (VSTL). Next, the TRC reviews the test report and submits approval or disapproval with a recommendation. The EAC Certification Committee then reviews the results and issues documented interpretation for the public record.

**NONDISCLOSURE OF CONFIDENTIAL INFORMATION:**

Under 5 U.S.C.A. § 552(b)(4) ("Exemption 4"), an agency may not disclose trade secrets and commercial or financial information obtained from a person if the information is privileged and confidential. The purpose of Exemption 4 is to protect the confidentiality of information submitted to the government. However, the purpose of the FOIA is to make government as transparent as possible. Therefore, in deciding what proprietary information it will exempt from responses to FOIA requests, an agency

---

should err on the side of disclosure and construe the exemption narrowly in accord with previous court interpretations.10

Traditionally, the determination of whether information qualifies for Exemption 4 is twofold. If the government compels the submission of information regarding trade secrets or commercial or financial information, the information will be considered confidential under Exemption 4 if the government can show that disclosure will not (1) impair the government's ability to obtain necessary information in the future, or (2) cause substantial harm to the competitive position of the submitter.11 In all cases where an agency claims that information fits into an exception, the government has the burden of providing sufficient specificity and justifications for its decision12.

**Government's Ability to Obtain Future Information**

The government's ability to obtain necessary information in the future is impaired when disclosure would induce private parties making submissions to exclude (a) innovative ideas13 or, (b) information necessary for the agency to fulfill its mandate14.

In *Orion Research, Inc. v. Environmental Protection Agency*15, the Supreme Court upheld EPA's decision not to disclose technical information in proposals for a government contract, finding that such disclosure would impair the government's ability to obtain information in the future because it would make potential bidders less likely to disclose novel ideas. The Court further held that the agency is in the best position to determine the effect of disclosure on its ability to obtain necessary technical

---

12 See *Neely v. FBI*, 208 F.3d 461 (4th Cir. 2000).
information. Consequently, a private party that submits information to an agency cannot argue on behalf of the government that the agency would be impaired. Finally, an agency’s assessment of whether its ability to gain information would be impaired in the future is quintessentially a managerial judgment not subject to judicial review.

Similarly, in Comstock International, Inc. v. Export-Import Bank, a FOIA requester sought disclosure of documents pertaining to an international loan made by the agency. The court recognized that there was no risk of impairing the agency’s ability to obtain this sort of information in the future, since, as a lender, it would always have direct access to loan-related documents. However, noting that commercial banks and borrowers were reluctant to negotiate loan agreements with the agency absent assurances of confidentiality, the court held that disclosure would interfere with the agency’s ability to promote United States exports, which was an essential part of its mandate.

Similar to the situation in Orion, if the EAC were to disclose certain information vendors submit in their TDPs (specifically unique technical data), it might make vendors less likely to supply necessary information in the future and thereby inhibit the EAC’s ability to obtain the information in the future. Also, like the situation in Comstock, the EAC is statutorily required to establish a certification process. If it discloses technical or financial information that vendors submit to the agency, the EAC may be in a position where such disclosure would limit its ability to satisfy its mandate. Therefore, the EAC should treat technical and financial data submitted by vendors as confidential to avoid inhibiting the attainment of similar information in the future or fulfilling its mandate.

17 Id.
20 Id.
**Harm to Submitter’s Competitive Position**

The government’s disclosure of information causes harm to the submitter’s competitive position when (a) such disclosure could allow competitors to underbid or undercut the submitter\(^{21}\), and (b) the information disclosed is not publicly available elsewhere\(^{22}\).

In *Lion Raisins v. U.S. Dept. of Agriculture*\(^{23}\), the 9th Circuit upheld the Department of Agriculture’s decision not to disclose Line Check Sheets related to USDA raisin inspections conducted at appellant’s competitors’ facilities. The court found that the agency’s decision was reasonable because disclosure of appellant’s competitors’ information would allow appellant to infer the volume of competitors’ sales. Sales data would in turn allow appellant to use the information to underbid its competitors in future transactions with public and private entities\(^{24}\).

By contrast, in *Continental Stock Transfer & Trust Co. v. SEC*\(^{25}\), a corporation requested that the SEC treat the information they submitted in an application for registration as transfer agents confidentially. The SEC denied the request, claiming that the information was not confidential and was therefore subject to disclosure in a FOIA request. The court agreed, holding that the applicant’s information was subject to disclosure since 95% of the information contained in the application was already available to the public through commercial publications. Therefore, disclosure could not be said to cause substantial competitive harm to the applicants\(^{26}\).

\(^{21}\) See *Lion Raisins v. U.S. Dept. of Agriculture*, 354 F.3d 1072 (9th Cir. 2004).
\(^{22}\) See *Continental Stock Transfer & Trust Co. v. SEC*, 566 F2d 373 (2d Cir. 1977).
\(^{23}\) See 354 F.3d 1072 (9th Cir. 2004).
\(^{24}\) See 354 F.3d 1072 (9th Cir. 2004).
\(^{25}\) See 566 F2d 373 (2d Cir. 1977).
\(^{26}\) Id.
Similar to the circumstances in *Lion Raisins*, if the EAC were to disclose
technical data or financial information, it might enable the submitting vendors'
competitors to use the information to underbid them in selling voting systems to the
states. Disclosing technical data especially might allow competitors to modify their own
systems to be more competitive. Finally, unlike the situation in *Continental Stock*, since
the information vendors submit will likely not be available publicly through other means,
the EAC's disclosure of technical or financial information might subject submitting
vendors to unforeseen harms. Therefore, the EAC should classify technical and financial
information as confidential to avoid exposing submitting vendors to potential harm.

CONCLUSIONS:

Section 231 of HAVA requires the EAC to provide for the testing, certification,
decertification, and recertification of voting system hardware and software by accredited
laboratories. During this process, private corporations will be submitting a technical data
package (TDP) to the EAC. Each vendor's TDP will likely contain information unique to
the submitter. The TDP will be used by Technical Review Consultants (TRC), and the
Voting System Test Laboratory, after which the TRC will submit approval or disapproval
of each system with a recommendation.

Once the EAC establishes its testing procedures, interest groups, corporations,
and private persons may make FOIA requests about the EAC's certification process. It is
likely that disclosure of either coding information or financial information would cause
substantial competitive harm to the submitter and inhibit the EAC's ability to obtain
similar information in the future as required by its mandate. In responding to such
requests, the EAC should disclose enough information to comply with FOIA's broad
mandate to make government more transparent, while not inhibiting its ability to get similar information in the future or causing harm to the vendors. Accordingly, the EAC should:

- **Only Disclose Non-Unique Data:** Any data that is unique to the vendor should not be disclosed to the public in a FOIA request. Data the EAC should identify as unique includes, but is not limited to, computer coding, technical platform data, security encryption, and data encoding practices. In addition, any financial information a vendor submits to the EAC should be redacted before responding to a FOIA request.

- **Issue Public Rules:** Since FOIA is intended to make government more transparent, it is advisable that the EAC adopt, by notice and comment, rules clearly delineating what information the EAC will and will not disclose concerning the voting system certification process. These rules will serve the dual purposes of (1) giving vendors notice before they make submissions, and (2) enabling potential vendors to participate in the rule-making process. In addition, issuing rules should lower the likelihood that a vendor would challenge an EAC decision in the future since vendors were invited to participate in the rulemaking.

- **Clearly Identify Confidential Vendor Data:** After establishing clear guidelines concerning confidential information, the EAC should mark each document a vendor submits as part of the certification process either confidential or not confidential, depending on the content of the document. This process should be internal, and a vendor’s marking something confidential should not have any bearing on the EAC’s decision to treat something as confidential or not.
• **Inform Vendors Upon Submission:** The EAC should, in response to any submission by a vendor, respond by sending a one-page summary of the EAC’s policies regarding disclosure of information to FOIA requesters. This will provide vendors with additional notice and should inform their future submissions.

• **Classify Documents When Submitted or Created:** Given the EAC’s small staffing level, and because the EAC has 20 business days to respond to requests, it is imperative that the EAC classify documents as they come in or are created to lower the administrative burden of responding to FOIA requests. During the certification process, the EAC should, for each document submitted or created, classify it as (1) confidential/needs redaction, (2) public, or (3) internal\(^\text{27}\) to make responding to FOIA requests more efficient.

**ADDITIONAL RECOMMENDATIONS:**

**I. The EAC Is Required by Law to Publish FOIA Guidance in the Federal Register**

FOIA requires that every agency subject to the Act make certain information available to the public.\(^\text{28}\) Accordingly, the EAC must publish in the Federal Register:

- Descriptions of its central and field organization and established places at which, the employees from whom, and the methods whereby, the public may obtain information, make submittals or requests, or obtain decisions.

---

\(^{27}\) Under 5 U.S.C.A. § 552(b)(5) (1996), interagency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency are exempt from FOIA requests.

• Statements of general course and method by which its functions are channeled and determined, including the nature and requirements of all formal and informal procedures available.

• Rules of procedure, descriptions of forms available or the places at which forms may be obtained, and instructions as to the scope and contents of all papers, reports, or examinations.

• Substantive rules of general applicability adopted as authorized by law, and statements of general policy or interpretations of general applicability formulated and adopted by the agency.

II. The EAC Is Required by Law to Adopt a Fee Structure

FOIA requires that every agency subject to the Act adopt and publish a fee structure applicable to the processing of requests and procedures and guidelines for determining when such fees should be waived or reduced. Accordingly, the EAC must publish in the Federal Register:

• A comprehensive fee structure for incoming requests, including the EAC’s classification of requesters and the appropriate reductions or waivers available to each classified group.

  o The fee structure shall provide for the recovery of direct costs only for the following: (1) search, (2) duplication, or (3) review. *Review costs may not include the costs incurred in resolving issues of law or policy that may be raised in the course of processing a FOIA request.

---

The EAC may not require advance payment of fees unless a requester has previously failed to pay fees in a timely fashion, or the EAC has determined that the cost of retrieving the requested information will exceed $250.

- Guidelines and procedures for making a FOIA request, including:
  - Where forms are available to requesters. Each form should (1) indicate that the EAC needs requests to be as specific as possible, (2) ask that the requester classify itself in one of the categories established in the fee structure regulations, (3) ask for the requester's contact information, and (4) ask for the medium in which the requester would like information.
  - The EAC's policies for disclosure of information. The policies should clearly indicate how the EAC determines what information is exempt from FOIA requests and the reasons why EAC may choose not to disclose (e.g. Confidential, internal, etc.).
  - Statutorily-mandated timelines and exceptions for unusual circumstances.
  - Procedures for appealing an EAC decision to not disclose information, including contact information, the appeals process provided for in FOIA, and any other internal policies the EAC adopts in accord with FOIA's express provisions.

### III. The EAC Should Implement an Internal FOIA Request Tracking Mechanism

As the EAC grows, it is likely that the number of FOIA requests the agency receives will also increase. Accordingly, the EAC should the following internal policies to expedite the resolution of FOIA requests:
The EAC should issue a tracking number to each FOIA request by fiscal year. For example, the first request in fiscal year 2006 would be numbered 0601.

- Each request should be date-stamped when received. Requests received after 1 PM should be date-stamped the next business day.
- Each request should be date-stamped the date the EAC is required by law to respond to the request (20 business days unless unusual circumstances).

The EAC should allow for one business week during the processing of FOIA requests for the legal department to review all documents the EAC plans to disclose.

The EAC should, for each document submitted to the agency or created by the agency, classify it as (1) confidential/needs redaction, (2) public, or (3) internal\(^{30}\) to make responding to FOIA requests more efficient.

---

\(^{30}\) Under 5 U.S.C.A. § 552(b)(5) (1996), interagency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency are exempt from FOIA requests.
This is how I propose responding to Kim Brace's question about what PRA covers.

The Paperwork Reduction Act (PRA) requires Federal agencies to, prior to collecting information, submit an Information Collection Request to the Director of the Office of Management and Budget, publish notice in the Federal Register, and incorporate public comments for any information collection of ten or more persons (See 44 USCS section 3501 et seq.). Accordingly, the EAC anticipates that completion of the focus groups will require compliance with PRA.

Julie and Karen, what do you think?

I have not reviewed the various laws, but I believe that it would require that kind of review to answer your question accurately. My guess is that much like other election-related provisions, the language of the statute and the placement of the statute in the code or statutory scheme will dictate the answer to the question. Some may not even be written into statute. If you want me to, I can get someone to start working on that review.

Subject: Comments on Eagleton's response

Karen will present our discussion and conclusions tomorrow. However, when we left the briefing, I think everyone believed that I would provide comments since I will not be able to be on the phone. As such, I am transmitting my comments through this email. I will respond or address Eagleton's numbered paragraphs (note that there is no paragraph 4).

1. There is no need to address this as Eagleton agrees that they only reviewed one election's statistics. The statement of work for the contract told them to review the status of the law in 2004, but in no way limited their analysis to a single year.
2. I believe that Eagleton's issue here is one of semantics. They don't like the phraseology of this sentence. However, the sentence is true and is demonstrated by the sentence in paragraph 2 of the statement that they reviewed and to which they provided comments. That paragraph specifically contains the following information: "Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates(FN2) and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.(FN3)" Eagleton made two sets of comments to Footnote 2, which is imbedded in the sentence that was just quoted. They explained their methodology in those comments and that methodology was captured in footnote 2. That footnote specifically contains the following sentences: "These data did not differentiate between citizens and non-citizens;... Thus, 2004 estimates of voting age population include person who are not registered to vote."

3. Eagleton objects to the use of the word "so" in the second sentence. They believe that this creates an inference that they only used the second set of data because the first did not show significant correlations. While generally speaking, I believe that this inference is at least partially true, since researchers are always searching for a set of data that will show a statistically significant correlation and will proceed to a different set of data if the first does not show it, it is not the intended inference of these two sentences. The point is to show that of the two data sets that they used one showed no significant correlation and the second showed some correlations (however not all variables showed correlation). And, that the second set of data -- the one that showed correlation was questionable because of the unusually high turnout rate that was reported. As such, we have agreed to remove the words "so" at the beginning of the second sentence and "only" in the middle of the second sentence -- see #9.

4. There is no number 4.

5. I believe that the statement as contained in the EAC statement is TRUE. Stating one's name is not an independently verifiable form of identification, and I think those are the forms of identification that we are talking about. I can walk into any polling place in the country and state the name of any person. Unless the poll worker knows me or knows the person whose name I have used, there is no way to independently verify whether my statement is true. Conversely, my signature can be compared, my address can be verified, or my driver's license can be scrutinized to determine if I am the person that I purport to be. While it is true that I identify myself on the phone or in person all the time by stating my name, it is not for the purpose of determining my eligibility to vote in a particular precinct, etc. I believe that when the term identification is used in the context of voting that it must mean that the voter provides some independently verifiable form of identification. Having said this, I understand that this may be a point of disagreement for others. But, as for me, this statement is true.

6. Based on conversations with Karen concerning the two groups-- one assembled by Eagleton and one assembled by EAC -- both "questioned" the methodology and statistical analysis employed by Eagleton. The group assembled by Eagleton was referred to by them in their report as their "peer review group." Karen feels that "working group" is not an accurate description of the group assembled by EAC, so she has language to use to replace "independent working group" that captures the essence of that group.

7. See response to #2, above.

8. See response to #1, above.

9. See response to #3, above.

10. See response to #6, above.

11. I believe that the Commission must act on this report. Merely stating what we will do in the future will not distance us from this work and will result in media and others quoting Eagleton's work as an "EAC" report. It has been my understanding that the consensus of the group is to "decline to adopt." I believe that this is the right action.
questions concerning my comments, I will be around tonight and will be available tomorrow afternoon by Blackberry.

RECOMMENDATIONS FOR FURTHER EAC ACTIVITY ON VOTER FRAUD AND INTIMIDATION

Consultant Recommendations

- **Greatly expand the scope of individuals interviewed.** Time and resource constraints prevented the consultants from interviewing the full range of participants in the electoral process. As a result, we recommend that in the next phase of this project, further interviews be conducted. In particular, a greater sampling of state and local election officials from different parts of the country should be interviewed. These individuals have first hand information and experience in the operation of elections.

We also recommend that in the next phase interviews be conducted with people in law enforcement, specifically Federal District Election Officers ("DEOs") and local district attorneys and attorneys defending those accused of election crimes or civil violations. In many instances it is the local district attorney who will investigate election fraud and suppression complaints. Attorneys who defend people accused of election crimes will have a different perspective on how the system is working to detect, prevent, and prosecute election fraud.

- **Conduct Follow-Up Nexis Research.** The Nexis search conducted for this phase of the research was based on a list of search terms agreed upon by both consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. However, without being able to go beyond the search terms, we

---

1 The Public Integrity Section of the Criminal Division of the Department of Justice has all of the 93 U.S. Attorneys appoint Assistant U.S. Attorneys to serve as DEOs for two years. DEOs are required to screen and conduct preliminary investigations of complaints, in conjunction with the FBI and PIN, to determine whether they constitute potential election crimes and should become matters for investigation; oversee the investigation and prosecution of election fraud and other election crimes in their districts; coordinate their district’s (investigative and prosecutorial) efforts with DOJ headquarters prosecutors; coordinate election matters with state and local election and law enforcement officials and make them aware of their availability to assist with election-related matters; issue press releases to the public announcing the names and telephone numbers of DOJ and FBI officials to contact on election day with complaints about voting or election irregularities and answer telephones on election day to receive these complaints; and supervise a team of Assistant U.S. Attorneys and FBI special agents who are appointed to handle election-related allegations while the polls are open on election day. *Department of Justice's Activities to Address Past Election-Related Voting Irregularities: General Accounting Office, October 14, 2004, GAO-04-1041R*
could not determine whether there was any action taken regarding the allegations, investigation or charges brought. Consequently, it is impossible to know if the article is just reporting on “talk” or what turns out to be a serious affront to the system. We recommend that follow up Nexis research be conducted to establish what, if any, resolutions or further activity there was in each case.

We also believe that in the second phase of this project, there should be a sampling of local newspapers from around the country to analyze for articles on voter fraud and voter intimidation. This will lead to a better idea of problems that occur on city and county levels that are often not reported statewide.

- **Conduct follow-up research to the literature reviews.** Similarly, many allegations are made in the reports and books that we analyzed and summarized. Those allegations are often not substantiated in any way and are inherently time limited by the date of the writing. Despite this, various interested parties frequently cite such reports and books as evidence of fraud or intimidation. Therefore, we recommend as a follow up to the literature review, an analysis of the resolution, if any, of specific instances of fraud and intimidation cited in the books and reports reviewed in the first phase.

- **Review a sampling of state district court cases.** In the first phase, we read and analyzed over 44,000 cases. Unfortunately, few of these were found to be on point. We therefore recommend that in the second phase, research should be concentrated on a national sampling of state district court level electoral cases. Often the district courts settle important issues that are not subsequently appealed. We believe that there could be a storehouse of information regarding vote fraud and intimidation in these cases.

- **Survey state election fraud and intimidation laws.** We recommend that there be a sampling of state electoral laws (including criminal penalty provisions), in order to aid in the development of model legislation that would address voter fraud and intimidation.

- **Review which states collect data on fraud and intimidation.** Evidently a few states, such as Arkansas and Georgia, collect and maintain data on complaints of fraud and intimidation and the disposition of those allegations at the state level. Phase two should examine what other states have such information and seek to obtain it for review and analysis. Policies and protocols on gathering such information in these states should also be looked at as possible models for the states that do not employ this practice.

- **Analyze data collected by various organizations in the 2006 election.** Several organizations, such as Election Protection, 1-800-MYVOTE1, and the parties will be setting up hotlines and sending people into the field during the upcoming mid-term elections both to assist voters and compile complete records of complaints and incidents from the period of voter registration through Election Day. Some of
these organizations have already agreed to share their data with the phase two EAC project consultants. We recommend that such data be used to the greatest extent possible to assess the incidence and the nature of the fraud and intimidation that occurred.

- **Obtain and analyze data retained by the Department of Justice.** Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice tracks complaints of voter intimidation in a variety of ways, the Section was extremely reluctant to provide the consultants with useful information. Further attempts should be made to obtain relevant data. This includes the telephone logs of complaints the Section keeps and information from the database – the Interactive Case Management (ICM) system – the Section maintains on complaints received and the corresponding action taken. We also recommend that further research include a review and analysis of the observer and monitor field reports from Election Day that must be filed with the Section.

- **Obtain and analyze a sampling of DEO Reports.** Similarly, the consultants believe it would be useful for any further research to include a review of the reports that must be filed by every DEO to the Public Integrity Section of the Criminal Division of the Department of Justice. As noted above, the DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or kept confidential.

- **Attend the Department of Justice's Ballot Access and Voting Integrity Symposium.** The consultants also believe it would be useful for any further activity in this area to include attendance at the next Ballot Access and Voting Integrity Symposium. According to the Department, DEOs are required to attend annual training conferences centered on combating election fraud and voting rights abuses. These conferences sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, feature presentations by civil rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices.

- **Consult with an academic/academic institution with unimpeachable political science statistical research credentials.** Included in this report is a summary of

---

2 By attending the symposium researchers could learn more about the following:

How DEOs are trained, e.g. what they are taught to focus their resources on; How they are instructed to respond to various types of complaints; How information about previous elections and voting issues is presented; and, How the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.
various methodologies political scientists and others suggested to measure voter fraud and intimidation. While we note the skepticism of the Working Group in this regard, we nonetheless recommend that in order to further the mission of providing unbiased data, further activity in this area include an academic institution and/or individual that focuses on sound, statistical methods for political science research.

- **Review and Assess Whether Current Federal Laws on Fraud and Intimidation are Adequate.** Finally, we recommend that phase two project researchers review federal laws to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threats.

According to Craig Donsanto, long-time director of the Public Integrity Section of the Criminal Division of the Department of Justice,

> As with other statutes addressing voter intimidation, in the absence of any jurisprudence to the contrary, it is the Criminal Division’s position that section 1973gg-10(1) applies only to intimidation which is accomplished through the use of threats of physical or economic duress. Voter “intimidation” accomplished through less drastic means may present violations of the Voting Rights Act, 42 U.S.C. § 1973i(b), which are enforced by the Civil Rights Division through noncriminal remedies.

Mr. Donsanto reiterated these points to us on several occasions, including at the working group meeting.

The second phase of this project should examine if current laws can be revised or new laws drafted that would address voter intimidation that does not threaten the voter physically or financially, but rather threatens the voter’s right to vote as something of tangible value in itself. Such legislation would penalize all forms of voter intimidation, regardless of the motivation. The law would, for example, potentially cover letters and postcards with contain language meant to deter voters from voting and pre-Election and Election Day challenges that are clearly illegitimate.

In the alternative to finding a way to penalize such behavior, researchers might examine ways to deter and punish voter intimidation under civil law. For example, there might be a private right of action created for voters or groups who have been subjected to intimidation tactics in the voting process. Such an action could be brought against individual offenders; any state or local actor where there is an unchecked pattern of repeated abuse; and organizations that intentionally engage in intimidating practices. Civil damage penalties and attorney fees should be included. Another, more modest measure, as has been suggested by Ana Henderson
and Christopher Edley,iv would be to bring fines for violations under the Voting Rights Act up to parity. Currently, the penalty for fraud is $10,000 while the penalty for acts to deprive the right to vote is $5,000.

---

i *Department of Justice's Activities to Address Past Election-Related Voting Irregularities*: General Accounting Office, October 14, 2004, GAO-04-1041R, p. 4. This same report criticizes some of the procedures the Section used for these systems and urged the Department to improve upon them in time for the 2004 presidential election. No follow-up report has been done since that time to the best of our knowledge.

iv Ana Henderson and Christopher Edley, Jr., *Voting Rights Act Reauthorization: Research-Based Recommendations to Improve Voting Access*, Chief Justice Earl Warren Institute on Race, Ethnicity and Diversity, University of California at Berkeley, School of Law, 2006, p. 29
Working Group Recommendations

1. **Use the 2006 and/or 2008 elections as a laboratory by employing observers.**
   At the working group meeting, there was much discussion about using observers to collect data regarding fraud and intimidation at the polls in the upcoming elections. Mr. Ginsberg recommended using representatives of both parties for the task. Mr. Bauer and others objected to this, believing that using partisans as observers would be unworkable and would not be credible to the public.

   There was even greater concern about the difficulties in getting access to poll sites for the purposes of observation. Most states strictly limit who can be in the polling place. In addition, there are already so many groups doing observation and monitoring at the polls, administrators might object. There was further concern that observers would introduce a variable into the process that would impact the outcome. The very fact that observers were present would influence behavior and skew the results.

   Moreover, it was pointed out, many of the problems we see now with respect to fraud and intimidation does not take place at the polling place, e.g. absentee ballot fraud and deceptive practices. Poll site monitoring would not capture this activity. Moreover, with increased use of early voting, poll site monitoring might have to go on for weeks to be effective, which would require tremendous resources.

   Mr. Weinberg suggested using observers in the way they are utilized in international elections. Such observers come into a jurisdiction prior to the election, and use standardized forms at the polling sites to collect data.

2. **Do a study on absentee ballot fraud.** The working group agreed that since absentee ballot fraud is the main form of fraud occurring, and is a practice that is great expanding throughout the country, it would make sense to do a stand-alone study of absentee ballot fraud. Such a study would be facilitated by the fact that there already is a great deal of information on how, when, where and why such practices are carried out based on cases successfully prosecuted. Researchers could look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

3. **Use risk analysis methodology to study fraud.** Working group members were supportive of one of the methodologies recommended for studying this issue, risk analysis. As Mr. Bauer put it, based on the assumption that people act rationally, do an examination of what types of fraud people are most likely to commit, given the relative costs and benefits. In that way, researchers can rank the types of fraud that are the easiest to commit at the least cost with the greatest effect, from

---

1 See Appendix C, and section on methodology
most to least likely to occur. This might prove a more practical way of measuring the problems than trying to actually get a number of acts of fraud and/or intimidation occurring. Mr. Greenbaum added that one would want to examine what conditions surrounding an election would be most likely to lead to an increase in fraud. Mr. Rokita objected based on his belief that the passions of partisanship lead people to not act rationally in an election.

4. **Conduct research using a methodology of database comparison.** Picking up on a suggestion made by Spencer Overton and explained in the suggested methodology section, Mr. Hearne recommended studying the issue using statistical database matching. Researchers should compare the voter roll and the list of people who actually voted to see if there are “dead” and felon voters. Because of the inconsistent quality of the databases, however, a political scientist would need to work in an appropriate margin of error when using such a methodology.

5. **Conduct a study of deceptive practices.** The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of groups, including the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices, which may be available for review and analysis. This is also an area in which there is often tangible evidence, such as copies of the flyers and postcards themselves. All of this information should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

6. **Study use of HAVA’s administrative complaint procedure to see if it can be used to measure some forms of fraud and intimidation.** The EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

7. **Examine the use of special election courts.** Given that many state and local judges are elected, it may be worth exploring whether special election courts that are running before, during and after election day would be an effective means of disposing with complaints and violations in an expeditious manner. Pennsylvania employs such a system, and the EAC should consider investigating how well it is working to deal with fraud and intimidation problems.
Defining Election Fraud

Note: The definition provided below is for the purposes of this EAC project. Most of the acts described come within the federal criminal definition of fraud, but some may not.

Election fraud is any intentional action, or intentional failure to act when there is a duty to do so, that corrupts the election process in a manner that can impact on election outcomes. This includes interfering in the process by which persons register to vote; the way in which ballots are obtained, marked, or tabulated; and the process by which election results are canvassed and certified.

Examples include the following:

- falsifying voter registration information pertinent to eligibility to cast a vote, (e.g. residence, criminal status, etc.);
- altering completed voter registration applications by entering false information;
- knowingly destroying completed voter registration applications (other than spoiled applications) before they can be submitted to the proper election authority;
- knowingly removing eligible voters from voter registration lists, in violation of HAVA, NVRA, or state election laws;
- intentional destruction by election officials of voter registration records or balloting records, in violation of records retention laws, to remove evidence of election fraud;
- vote buying;
- voting in the name of another;
- voting more than once;
- coercing a voter's choice on an absentee ballot;
- using a false name and/or signature on an absentee ballot;
- destroying or misappropriating an absentee ballot;
- felons, or in some states ex-felons, who vote when they know they are ineligible to do so;
- misleading an ex-felon about his or her right to vote;
- voting by non-citizens who know they are ineligible to do so;
- intimidating practices aimed at vote suppression or deterrence, including the abuse of challenge laws;
- deceiving voters with false information (e.g.; deliberately directing voters to the wrong polling place or providing false information on polling hours and dates);
• knowingly failing to accept voter registration applications, to provide ballots, or to accept and count voted ballots in accordance with the Uniformed and Overseas Citizens Absentee Voting Act;
• intentional miscounting of ballots by election officials;
• intentional misrepresentation of vote tallies by election officials;
• acting in any other manner with the intention of suppressing voter registration or voting, or interfering with vote counting and the certification of the vote.

Voting fraud does not include mistakes made in the course of voter registration, balloting, or tabulating ballots and certifying results. For purposes of the EAC study, it also does not include violations of campaign finance laws.
Key Working Group Comments and Observations

1. **The main problems today are structural barriers to voting and administrative error.** Mr. Perez observed that, in accordance with the research, the biggest issues today are structural barriers to voting, not stealing votes. Election administrators share this view. Election fraud is negligible, and to the extent it occurs, it needs to be prosecuted with stronger criminal laws. The biggest problem is properly preparing people, which is the responsibility of election administrators.

2. **Most fraud and intimidation is happening outside of the polling place.** Mr. Greenbaum observed that with respect to both voter fraud and voter suppression, such as deceptive practices and tearing up voter registration forms, most of that is taking place outside of the polling place.

3. **This issue cannot be addressed through one study or one methodology alone.** Mr. Weinberg observed that since there is such a variety in types of fraud and intimidation, one solution will not fit all. It will be impossible to obtain data or resolve any of these problems through a single method.

4. **The preliminary research conducted for this project is extremely valuable.** Several of the working group members complimented the quality of the research done and although it is only preliminary, thought it would be useful and informative in the immediate future.

5. **The Department of Justice is exploring expanding its reach over voter suppression activities.** In the context of the conversation about defining voter intimidation, Mr. Donsanto pointed out that while voter intimidation was strictly defined by the criminal law, his section is beginning to explore the slightly different concept of vote suppression, and how to pursue it. He mentioned the phone-jamming case in New Hampshire as an initial success in this effort. He noted that he believes that vote suppression in the form of deceptive practices ought to be a crime and the section is exploring ways to go after it within the existing statutory construct. Mr. Bauer raised the example of a party sending people dressed in paramilitary outfits to yell at people as they go to the polls, telling them they have to show identification. Mr. Donsanto said that under the laws he has to work with today, such activity is not considered corrupt. He said that his lawyers are trying to "bend" the current laws to address aggravated cases of vote suppression, and the phone-jamming case is an example of that. Mr. Donsanto said that within the Department, the term vote "suppression" and translating it into a crime is a "work in progress."

6. **Registration fraud does not translate into vote fraud.** Ms. Rogers, Mr. Donsanto and others stated that although phony voter registration applications turned in by people being paid by the form was a problem, it has not been found
in their experience to lead to fraudulent voters at the polls. Ms. Rogers said such people were motivated by money, not defrauding the election.

7. **Handling of voter fraud and intimidation complaints varies widely across states and localities.** Ms. Rogers and others observed that every state has its own process for intake and review of complaints of fraud and intimidation, and that procedures often vary within states. The amount of authority secretaries of state have to address such problems also is different in every state. Mr. Weinberg stated he believed that most secretaries of state did not have authority to do anything about these matters. Participants discussed whether secretaries ought to be given greater authority so as to centralize the process, as HAVA has mandated in other areas.

**Working Group Concerns**

1. Mr. Rokita questioned whether the purpose of the present project ought to be on assessing the level of fraud and where it is, rather than on developing methods for making such measurements. He believed that methodology should be the focus, “rather than opinions of interviewees.” He was concerned that the EAC would be in a position of “adding to the universe of opinions.”

2. Mr. Rokita questioned whether the “opinions” accumulated in the research “is a fair sampling of what’s out there.” Ms. Wang responded that one of the purposes of the research was to explore whether there is a method available to actually quantify in some way how much fraud there is and where it is occurring in the electoral process. Mr. Rokita replied that “Maybe at the end of the day we stop spending taxpayer money or it’s going to be too much to spend to find that kind of data. Otherwise, we will stop it here and recognize there is a huge difference of opinion on that issue of fraud, when it occurs is obtainable, and that would possibly be a conclusion of the EAC.” Ms. Sims responded that she thought it would be possible to get better statistics on fraud and there might be a way of “identifying at this point certain parts in the election process that are more vulnerable, that we should be addressing.”

3. Mr. Rokita stated that, “We’re not sure that fraud at the polling place doesn’t exist. We can’t conclude that.”

4. Mr. Rokita expressed concern about working with a political scientist. He believes that the “EAC needs to be very careful in who they select, because all the time and effort and money that’s been spent up to date and would be spent in the future could be invalidated by a wrong selection in the eyes of some group.”
Election Protection 2004

By the Election Protection Coalition

Election Protection – the Program

Election Protection 2004 was the nation’s most far-reaching effort to protect voter rights before and on Election Day. The historic nonpartisan program included:

- A toll-free number, 1-866-OUR-VOTE, with free, immediate and multi-lingual assistance to help voters with questions about registration and voting, and assist voters who encounter barriers to the ballot box.
- Distribution of more than five million “Voters’ Bills of Rights” with state-specific information
- 25,000 volunteers, including 6,000 lawyers and law students, who watched for problems and assisted voters on the spot at more than 3,500 predominantly African-American and Latino precincts with a history of disenfranchisement in at least 17 states.
- Civil rights lawyers and advocates represented voters in lawsuits, preserved access to the polls, exposed and prevented voter intimidation, worked with election officials to identify and solve problems with new voting machines, technology and ballot forms, and protected voter rights in advance and on Election Day.

Voter Intimidation and Suppression Stories (Abridged)

- An Associated Press story noted Election Protection’s exposure of reported voter suppression tactics in Colorado: Officials with the Election Protection Coalition, a voter-rights group, also said some voters in a predominantly black neighborhood north of Denver found papers on their doorsteps giving them the wrong address for their precinct.

- Election Protection received a report from Florissant County, Missouri from a voter who lives in predominantly white neighborhood. While waiting in line to vote, a Republican challenger challenged the black voters by requesting more proof of identification, residence, and signature match, while asking nothing from white voters. Also, the same voter reportedly asked a few questions about voting but an election officials refused to provide any meaningful answer, insisting that "it’s very simple", but provided white voters with information when requested. There was one other black voter in line who was also singled out for same treatment while white voters were not.

- Election Protection received a report from Boulder County, Colorado that a poll worker made racist comments to Asian American voter and then told her she was not on the list and turned her away. The voter saw others filling out provisional ballots and asked for one but was denied. Another Asian American woman behind
her in line was also given trouble by the same poll worker (he questioned her nationality and also turned her away).

- The Election Protection hotline received reports from Pinellas County, Florida that individuals purporting to be from the Kerry campaign are going door-to-door handing out absentee ballots, and asking voters to fill them out, and then taking the ballots from them, saying "Vote here for Kerry. Don't bother going to the polls."

- The Election Protection Coalition received a report from a woman whose sister lives in Milwaukee and is on government assistance. Her sister was reportedly told by her "case manager" that if she voted for Kerry, she would stop receiving her checks.

- An illiterate, older and disabled voter in Miami-Dade asked for assistance reading the ballot and reported that a poll worker yelled at him and refused to assist him and also refused to allow him to bring a friend into the booth in order to read the ballot to him.

- The Election Protection Coalition have gathered reports that flyers are circulating in a black community in Lexington, South Carolina claiming they those who are behind on child support payments will be arrested as the polls.

- Minority voters from Palm Beach County, Florida reported to the hotline that they received middle-of-the-night, live harassing phone calls warning them away from the polls.

- A volunteer for Rock the Vote reported that two illiterate voters in Michigan requested assistance with their ballots but were refused and reportedly mocked by poll workers.

- The hotline received a call from a radio DJ in Hillsborough County, Florida, who stated that he has received many calls (most of which were from African-Americans) claiming that poll workers were turning voters away and not "letting" them vote.

- The hotline received a call from Pima County, Arizona, indicating that Democratic voters received calls throughout Monday evening, providing incorrect information about the precinct location. Voters have had to be transported en masse in order to correct the problem.

- A caller from Alabama claims that he was told at his polling place that he could vote there for everything but the President and that he would have to go elsewhere in order to vote for a presidential candidate.
• Poll monitors in Philadelphia reports groups of lawyers, traveling in threes, who pull voters out of line and challenge them to provide ID, but when challenged themselves, they hop into waiting cars or vans and leave. Similar activity by Republican lawyers in Philadelphia was reported in the 2002 election.

• In Cuyahoga, Ohio, a caller reported that all black voters are being asked to show ID, while white voters are not. Caller report that he is black and had to show ID while his girlfriend is white and did not have to show ID.

• Two months ago, suspicious phone calls to newly registered Democrats —telling them they weren’t, in fact, registered to vote — were traced to the Republican headquarters in the Eastern Panhandle. On Monday, Democrats there said the calls have started again, even after the Berkeley County Clerk — a Republican — sent the party a cease-and-desist letter. The Berkeley prosecutor, who also is county Democratic chairman, has called on the U.S. attorney to investigate.

• In Tuscon, Arizona a misleading call informing voters that they should vote on November 3 has been traced back to the state GOP headquarters. The FBI is investigating.

• A man driving around in a big van covered in American flags and a big picture of a policeman was reportedly parked in front of a polling place; he then got out and moved within the 75 ft limit, until he was asked to leave; he then was found inside the polling place and was again asked to leave. Election Protection volunteers contacted officials and the man was eventually removed.

• The Election Protection hotline has received a report from individuals who claim to have received recorded telephone message coming from Bill Clinton and ACT and reminding them to vote on Nov. 3rd.

• In Massachusetts, the EP Hotline has received a report that a radio station (WILD) is broadcasting that voters will be arrested on the spot if they have outstanding parking tickets.

• In Richland, South Carolina Election Protection has received a report of a poll manager turning away individuals who do not have photo ID issued to the county or a driver's license; an EP lawyer spoke with the Poll Manager at 8:20 am and told her that people with other forms of ID should be allowed to vote by provisional ballot.

• In Greenville, a caller reported that a white poll worker was asking Blacks for multiple form of I.D. Fortunately, the voter who reported the problem did have a second I.D. but reported that some others were turned away. Election Protection attorneys have alerted election officials.
• In Allegheny County, Pennsylvania, an official looking flyer advises Democratic voters to "create a peaceful voting environment" by voting on Wednesday, November 3.

• The week before the election, flyers were circulated in Milwaukee under the heading "Milwaukee Black Voters League" with some "warnings for election time." The flyer listed false reasons for which you would be barred from voting (such as a traffic ticket) and then warned that "If you violate any of these laws you can get ten years in prison and your children will get taken away from you."

• There is a Jefferson County flyer which tells voters "See you at the Poles![sic]" on November 4.
The Long Shadow of Jim Crow, People for the American Way and the National Association for the Advancement of Colored People

This report describes the pervasive and repeated practices of voter intimidation and vote suppression that have taken place in very recent years and during contemporary American history. The most recent cases included in the report are the incident in which Florida law enforcement questioned elderly African American voters in Orlando regarding the 2003 mayoral race, which had already been resolved, shortly before the 2004 election; the 2004 Florida felon purge list; the case of South Dakota in 2004 in which Native Americans were improperly and illegally required to show photo identification at the polls or denied the right to vote, and similar improper demands for ID from minorities in other parts of the country; the use of challengers in minority districts in many locations; the challenge to the right of African American students to vote in Texas in 2004; the presence of men looking like law enforcement challenging African American voters at the polls in Philadelphia in 2003; the distribution of flyers in Louisiana and elsewhere in a number of elections over the last few years in minority areas telling them to vote on the wrong day; and the FBI investigation into thousands of Native American voters in South Dakota in 2002, which resulted in no showing of wrongdoing.

The report also points out that, "Over the past two decades, the Republican Party has launched a series of 'ballot security' and 'voter integrity' initiatives which have targeted minority communities. At least three times, these initiatives were successfully challenged in federal courts as illegal attempts to suppress voter participation based on race.

It goes on to describe the numerous instances of voter intimidation and suppression during the 2000 election, the 1990s, the 1980s and back through the civil rights movement of the 1960s, putting current efforts in historical perspective. Describing the chronology of events in this way demonstrates the developing patterns and strategic underpinnings of the tactics used over the last forty years.
The New Poll Tax: Republican-Sponsored Ballot-Security Measures are Being Used to Keep Minorities from Voting

By Laughlin McDonald

McDonald argues that “the discriminatory use of so-called ‘ballot security’ programs” has been a reoccurring scandal since the passage of the Voting Rights Act of 1965. These programs are deceptively presented as preventing voter fraud and thereby furthering good government. However, McDonald states “but far too often they [the ballot security programs] are actually designed to suppress minority voting -- and for nakedly partisan purposes.”

McDonald blames the federal government as well as the states for use of suspect ballot security programs. He cites the implementation of the U.S. Department of Justice’s in "Voting Integrity Initiative" in South Dakota as the worst example of a joint federal-state effort to prevent voter fraud. Alleged voter fraud only in counties with significant Native American populations was targeted. South Dakota Attorney General Mark Barnett “working with the FBI, announced plans to send state and federal agents to question almost 2,000 new Native-American registrants, many of whom were participating in the political process for the first time.” However, statistics show that these efforts only served to increase Native American voter participation. Native Americans “were targeted based on fraud allegations that proved to be grossly exaggerated; at the end of the investigation, only one Native American was even charged with a voting-rules violation.”

McDonald cites several other ballot security efforts that were really disguised attempts at minority voter suppression:

In Pine Bluff, Ark., Democrats accused Republican poll watchers of driving away voters in predominantly black precincts by taking photos of them and demanding identification during pre-election day balloting. Democrats in Michigan charged that a plan by Republicans to station hundreds of "spotters" at heavily Democratic precincts was an effort to intimidate black voters and suppress Democratic turnout. In South Carolina, a lawsuit filed the day before the election alleged that officials in Beaufort County had adopted a new and unauthorized policy allowing them to challenge voters who gave rural route or box numbers for their registration address. According to the complaint, a disproportionate number of those affected by the new rule would be African-American voters who lived in the rural areas of the county.

McDonald is also critical of the Help America Vote Act (HAVA). He states that HAVA "contains other provisions that may enhance the opportunities for harassment and intimidation of minorities through ballot-security programs.” McDonald specifically attacks the photo ID requirement for anyone who registered by mail but has not previously voted. McDonald argues that the ID requirement will suppress minority voting because minorities are less likely then non-minorities to have a photo ID, a photo ID is expensive to obtain and all the alternatives to photo ID present similar obstacles to minority voters. He also argues that there is no evidence that photo ID will combat voter
fraud but it only really provides “another opportunity for aggressive poll officials to single out minority voters and interrogate them.”

McDonald lists some classic past ballot security efforts by the Republicans that have been abused: the 1981 gubernatorial election anti-fraud initiative leading to the well known consent decree prohibiting the Republicans from repeating this, a similar Republican effort in Louisiana in 1986 in Senator John Breaux’s race which again resulted in prohibition by a state court judge, and a similar effort by Republicans in Senator Jesse Helms 1990 reelection. This time the Department of Justice sued the Republican Party and Helm’s reelection committee, resulting in another consent decree prohibiting future ballot security programs without court approval.

McDonald indicates that the crux of the problem is lax enforcement of federal voters rights laws. He states, “there is no record of the purveyors of any ballot-security program being criminally prosecuted by federal authorities for interfering with the right to vote.” The only positive case law McDonald cited was a decision by the United States Court of Appeals for the Eighth Circuit that affirmed “an award of damages ranging from $500 to $2,000, payable by individual poll officials to each of seven black voters who had been unlawfully challenged, harassed, denied assistance in voting or purged from the rolls in the town of Crawfordsville [Arkansas].”

McDonald concludes by stating that Congress and the states should adopt “nondiscriminatory, evenly applied measures to ensure the integrity of the ballot.”
The Joint Legislative Audit Committee of the Wisconsin Legislature required the Wisconsin Audit Report. The Report obviously does not include the 2006 statistics for statewide voter registration as required by HAVA. Wisconsin voter registration is required by statute in only 172 municipalities---those with populations of 5,000 or more. Another 167 smaller municipalities opted to maintain voter registration lists. Currently, 28.9% of the voting-age population is not required to register before voting.

According to the Report, great variation was found in the implementation of existing voter registration laws. For example, 46% of municipalities that responded to the survey did not send address verification cards to individuals who registered by mail or at the polls on Election Day in November 2004. Further, only 85.3% of survey respondents reported updating their voter registration lists to remove inactive voters, as required by law.

Current voter registration practices were determined to be insufficient to ensure the accuracy of voter registration lists used by poll workers or to prevent ineligible persons from registering to vote. The Report identified 105 instances of voting irregularities in six municipalities, including 98 ineligible felons who may have voted. The names of these individuals were forwarded to appropriate district attorneys for investigation.

Due to concerns about ineligible voting, stemming from the 2004 election, the Joint Legislative Audit Committee requested that voter registration procedures be evaluated. The following was investigated for this Report:

* voter registration requirements and the methods by which voters register, including requirements in other states;

* the address verification process, including the use of address verification cards to confirm the residency of those who register by mail or at the polls;

* procedures and practices for updating voter registration lists; and,

* the role of the Elections Board.

Wisconsin allows qualified electors to register in person, by mail, or with a special registration deputy before Election Day, and at the polls on Election Day. In municipalities where registration is required by statute, 20.3% of Wisconsin voters registered at the polls on Election Day in November 2004. Municipal clerks rely on registrants to affirm their eligibility, including citizenship and age. However, requirements for providing identification or proof of residence vary depending on when an individual registers and by which method.
Address verification cards are the primary tool available to municipal clerks for verifying the residency of registered voters and detecting improper registrations by mail or at the polls. Statutes require that clerks send cards to everyone who registers by mail or on Election Day. However, only 42.7% of the 150 municipalities surveyed sent cards to both groups, and 46% did not send any address verification cards.

Statutes also require clerks to provide the local district attorney with the names of any Election Day registrants whose cards are undeliverable at the address provided. However, only 24.3% of the clerks who sent cards also forwarded names from undeliverable cards to district attorneys. District attorneys surveyed indicated that they require more information than is typically provided to conduct effective investigations.

To ensure that voter registration lists contain only the names of qualified electors, municipal clerks are required by statute to remove or inactivate the names of individuals who have not voted in four years, to update registration information for individuals who move or change their names, and to remove or inactivate the names of deceased individuals. They are also required to notify registered voters before removing their names from registration lists. These statutory requirements are not consistently followed:

* 85.3% of municipalities removed the names of inactive voters from their voter registration lists;

* 71.4% sometimes or always notified registered voters before removing their names; and

* 54.0% reported removing the names of ineligible felons.

Because of such inconsistencies, registration lists contain duplicate records and the names of ineligible individuals. For example, more than 348,000 electronic voter registration records from eight municipalities were reviewed, identifying 3,116 records that appear to show individuals who are registered more than once in the same municipality.

In six municipalities where sufficient information was available, there was 105 instances of potentially improper or fraudulent voting in the 2004 elections. These included: 98 ineligible felons who may have voted; 2 individuals who may have voted twice; 1 voter who may have been underage; and 4 absentee ballots that should not have been counted because the voters who cast them died before Election Day.

Recommendations:

* adjusting the early registration deadline to provide clerks more time to prepare registration lists;

* establishing more stringent requirements for special registration deputies, including prohibiting compensation based on the number of individuals registered;
* establishing uniform requirements for demonstrating proof of residence for all registrants;

* providing municipal clerks with more flexibility in the use of address verification cards;

* Authorizing civil penalties for local election officials and municipalities that fail to comply with election laws; and,

* implementing mandatory elections training requirements for municipal clerks.

The Report also recognized that the new HAVA registration procedures would help with existing registration problems.
Interview with Tony Sirvello, Executive Director, IACREOT

April 12, 2006

Biographical

Sirvello is currently the executive director of the International Association of Clerks, Recorders, Election Officials and Treasurers, an organization of 1700 members. Formerly, he ran elections in Harris County, Texas for 29 years.

Incidents of Election Fraud

Sirvello stated that one problem with election crimes is that they are not high on the priority list of either district attorneys or grand juries. Therefore, complaints of election crime very rarely are prosecuted or are indicted by the grand jury. In 1996 in Harris County, 14 people voted twice but the grand jury refused to indict. One woman voted twice, once during early voting and once on Election Day. She said she thought there were two elections. The jury believed her. Sirvello believes none of the people intentionally voted more than once. He said that he believes double voting is not as big of an issue as people make it out to be.

In 1986, it was found that there were 300 more ballots than voter signatures. It was clear that the elections officials stuffed the ballot boxes. The case was brought before a grand jury, but there was no indictment because all of the defendants were friends and relatives of each other and none would admit what had been done.

Sirvello stated that there have been isolated circumstances where a voter would show up at the poll and his name had already been signed and he had voted.

Finally, Sirvello indicated that some people who worked in Houston but did not live in Harris County were permitted to vote.

Specific Absentee Ballot/Vote By Mail Issues

Sirvello said that mail voting presents the largest problem. With mail voting there is too much opportunity to influence voters or to fraudulently request a ballot.

If one applied for an absentee ballot, their name and address was made available to candidates and political consultants who would often send people to collect the ballot. Many did not want to give up the ballot but wanted to mail it personally. The result was to discourage voting.

In Texas, a person could only apply for an absentee ballot if over 65 years of age. Parties, candidates and consultants would get the list of voters over 65 and send them a professional mail piece telling them they could vote by mail and a ballot with everything filled out except the signature. Problems ensued -- for example, voters would print their
names rather than sign them, and the ballot was rejected. In other cases, the elderly would give their absentee ballot to someone else.

If a person applied for an absentee ballot but then decided not to cast it but to vote in person, that person had to bring the non-voted absentee ballot to the poll and surrender it. If they did not, they would not be permitted to vote at the polling place.

Incidents of Voter Intimidation

Sirvello only reported isolated cases of intimidation or suppression in Harris County. These mostly occurred in Presidential elections. Some people perceived intimidation when being told they were not eligible to vote under the law. Sirvello stated that the big issue in elections now is whether there should be a paper trail for touch screen voting.

Recommendations

District attorneys need to put more emphasis on election crime so people will not believe that it goes unpunished.

There should be either a national holiday for Election Day or a day should be given off of work without counting as a vacation day so that better poll workers are available and there can be more public education on election administration procedures.
Interview with Craig Donsanto, Director, Public Integrity Section, U.S. Department of Justice
January 13, 2006

Questions

How are Prosecution Decisions Made?

Craig Donsanto must approve all investigations that go beyond a preliminary stage, all charges, search warrant applications and subpoenas and all prosecutions. The decision to investigate is very sensitive because of the public officials involved. If a charge seems political, Donsanto will reject it. Donsanto gives possible theories for investigation. Donsanto and Noel Hillman will decide whether to farm out the case to an AUSA. Donsanto uses a concept called predication. In other words, there must be enough evidence to suggest a crime has been committed. The method of evaluation of this evidence depends on the type of evidence and its source. There are two types of evidence—factual (antisocial behavior) and legal (antisocial behavior leading to statutory violations). Whether an indictment will be brought depends on the likelihood of success before a jury. Much depends on the type of evidence and the source. Donsanto said he “knows it when he sees it.” Donsanto will only indict if he is confident of a conviction assuming the worst case scenario—a jury trial.

A person under investigation will first receive a target letter. Often, a defendant who gets a target letter will ask for a departmental hearing. The defendant’s case will be heard by Donsanto and Hillman. On occasion, the assistant attorney general will review the case. The department grants such hearings easily because such defendants are likely to provide information about others involved.

The Civil Rights Division, Voting Rights Section makes its own decisions on prosecution. The head of that division is John Tanner. There is a lot of cooperation between

Does the Decision to Prosecute Incorporate Particular Political Considerations within a State Such as a One Party System or a System in which the Party in Power Controls the Means of Prosecution and Suppresses Opposition Complaints?

Yes. Before, the department would leave it to the states. Now, if there is racial animus involved in the case, there is political bias involved, or the prosecutor is not impartial, the department will take it over.

Does it Matter if the Complaint Comes from a Member of a Racial Minority?

No. But if the question involves racial animus, that has also always been an aggravating factor, making it more likely the Department will take it over.
What Kinds of Complaints Would Routinely Override Principles of Federalism?

Federalism is no longer big issue. DOJ is permitted to prosecute whenever there is a candidate for federal office.

Are There Too Few Prosecutions?

DOJ can’t prosecute everything.

What Should Be Done to Improve the System?

The problem is asserting federal jurisdiction in non-federal elections. It is preferable for the federal government to pursue these cases for the following reasons: federal districts draw from a bigger and more diverse jury pool; the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected; DOJ has more resources — local prosecutors need to focus on personal and property crimes—fraud cases are too big and too complex for them; DOJ can use the grand jury process as a discovery technique and to test the strength of the case.

In U.S. v. McNally, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to “fix” McNally, did not include voter fraud.

As a result, the department needs a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce. The department has drafted such legislation, which was introduced but not passed in the early 1990s. A federal law is needed that permits prosecution in any election where any federal instrumentality is used.

Other Information

The Department has held four symposia for DEOs and FBI agents since the initiation of the Ballot Access and Voting Integrity Initiative. In 2003, civil rights leaders were invited to make speeches, but were not permitted to take part in the rest of the symposium. All other symposia have been closed to the public. (Peg will be sending us the complete training materials used at those sessions. These are confidential and are the subject of FOIA litigation).

There are two types of attorneys in the division: prosecutors, who take on cases when the jurisdiction of the section requires it; the US Attorney has recused him or herself; or when the US Attorney is unable to handle the case (most frequent reason) and braintrust attorneys who analyze the facts, formulate theories, and draft legal documents.

Cases:
Donsanto provided us with three case lists: Open cases (still being investigated) as of January 13, 2006 – confidential; election fraud prosecutions and convictions as a result of the Ballot Access and Voting Integrity Initiative October 2002-January 13, 2006 and cases closed for lack of evidence as of January 13, 2006.

If we want more documents related to any case, we must get those documents from the states. The department will not release them to us.

Although the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate complaints of fraud, the number of cases that the department is investigating and the number of indictments the department is pursuing are both up dramatically.

Since 2002, the department has brought more cases against alien voters, felon voters, and double voters than ever before. Previously, cases were only brought when there was a pattern or scheme to corrupt the process. Charges were not brought against individuals – those cases went un-prosecuted. This change in direction, focus, and level of aggression was by the decision of the Attorney General. The reason for the change was for deterrence purposes.

The department is currently undertaking three pilot projects to determine what works in developing the cases and obtaining convictions and what works with juries in such matters to gain convictions:

- Felon voters in Milwaukee.
- Alien voters in the Southern District of Florida. FYI – under 18 USC 611, to prosecute for “alien voting” there is no intent requirement. Conviction can lead to deportation. Nonetheless, the department feels compelled to look at mitigating factors such as was the alien told it was OK to vote, does the alien have a spouse that is a citizen.
- Double voters in a variety of jurisdictions.

The department does not maintain records of the complaints that come in from DEOs, U.S attorneys and others during the election that are not pursued by the department. Donsanto asserted that U.S. attorneys never initiate frivolous investigations.

According to the new handbook, the department can take on a case whenever there is a federal candidate on the ballot.
Interview with Douglas Webber, Assistant Indiana Attorney General

February 15, 2006

Background
Mr. Webber was an attorney for the Marion County Election Board and was also part of the Indianapolis Ballot Security Team (sometimes called the Goon Squad). This Team was a group of attorneys well trained in election law whose mission was to enforce ballot security.

Litigation
Status of litigation in Indiana: On January 12 the briefing was completed. The parties are waiting for a decision from the U.S. district judge. The judge understood that one of the parties would seek a stay from the 7th Circuit Court of Appeals. The parties anticipate a decision in late March or early April. Mr. Webber did the discovery and depositions for the litigation. Mr. Webber feared the plaintiffs were going to state in their reply brief that HAVA’s statewide database requirement would resolve the problems alleged by the state. However, the plaintiffs failed to do so, relying on a Motor Voter Act argument instead. Mr. Webber believes that the voter ID at issue will make the system much more user-friendly for the poll workers. The Legislature passed the ID legislation, and the state is defending it, on the basis of the problem of the perception of fraud.

Incidents of fraud and intimidation
Mr. Webber thinks that no one can put his or her thumb on whether there has been voter fraud in Indiana. For instance, if someone votes in place of another, no one knows about it. There have been no prosecuted cases of polling place fraud in Indiana. There is no recorded history of documented cases, but it does happen. In the litigation, he used articles from around the country about instances of voter fraud, but even in those examples there were ultimately no prosecutions, for example the case of Milwaukee. He also stated in the litigation that there are all kinds of examples of dead people voting--totaling in the hundreds of thousands of votes across the country.

One interesting example of actual fraud in Indiana occurred when a poll worker, in a poll using punch cards, glued the chads back and then punched out other chads for his candidate. But this would not be something that would be addressed by an ID requirement.

He also believes that the perception that the polls are loose can be addressed by the legislature. The legislature does not need to wait to see if the statewide database solve the problems and therefore affect the determination of whether an ID requirement is necessary. When he took the deposition of the Republican Co-Director, he said he thought Indiana was getting ahead of the curve. That is, there have been problems around the country, and confidence in elections is low. Therefore Indiana is now in front of getting that confidence back.
Mr. Webber stated that the largest vote problem in Indiana is absentee ballots. Absentee ballot fraud and vote buying are the most documented cases. It used to be the law that applications for absentee ballots could be sent anywhere. In one case absentee votes were exchanged for "a job on election day"—meaning one vote for a certain price. The election was contested and the trial judge found that although there was vote fraud, the incidents of such were less than the margin of victory and so he refused to overturn the election. Mr. Webber appealed the case for the state and argued the judge used the wrong statute. The Indiana Supreme Court agreed and reversed. Several people were prosecuted as a result—those cases are still pending.

Process
In Indiana, voter complaints first come to the attorney for the county election board who can recommend that a hearing be held. If criminal activity was found, the case could be referred to the county prosecutor or in certain instances to the Indiana Attorney General's Office. In practice, the Attorney General almost never handles such cases.

Mr. Webber has had experience training county of election boards in preserving the integrity and security of the polling place from political or party officials. Mr. Webber stated that the Indiana voter rolls need to be culled. He also stated that in Southern Indiana a large problem was vote buying while in Northern Indiana a large problem was based on government workers feeling compelled to vote for the party that gave them their jobs.

Recommendations
- Mr. Webber believes that all election fraud and intimidation complaints should be referred to the Attorney General's Office to circumvent the problem of local political prosecutions. The Attorney General should take more responsibility for complaints of fraud because at the local level, politics interferes. At the local level, everyone knows each other, making it harder prosecute.
- Indiana currently votes 6 am to 6 pm on a weekday. Government workers and retirees are the only people who are available to work the polls. Mr. Webber suggested that the biggest change should be to move elections to weekends. This would involve more people acting as poll workers who would be much more careful about what was going on.
- Early voting at the clerk's office is good because the people there know what they are doing. People would be unlikely to commit fraud at the clerk's office. This should be expanded to other polling places in addition to that of the county clerk.
- Finally, Mr. Webber believes polling places should be open longer, run more professionally but that there needs to be fewer of them so that they are staffed by only the best, most professional people.
Interview Sharon Priest, former Secretary of State, Arkansas
January 24, 2006

Process:

When there is an allegation of election fraud or intimidation, the county clerk refers it to the local district attorney. Most often, the DA does not pursue the claim. There is little that state administrators can do about this because in Arkansas, county clerks are partisanly elected and completely autonomous. Indeed, county clerks have total authority to determine who is an eligible voter.

Data:

There is very little data collected in Arkansas on fraud and intimidation cases. Any information there might be stays at the county level. This again is largely because the clerks have so much control and authority, and will not release information. Any statewide data that does exist might be gotten from Susie Storms from the State Board of Elections.

Most Common Problems

The perception of fraud is much greater than the actual incidence of fraud.

- The DMV does not implement NVRA in that it does not take the necessary steps when providing the voter registration forms and does not process them properly. This leads to both ineligible voters potentially getting on the voting rolls (e.g. noncitizens, who have come to get a drivers license, fill out a voter registration form having no intention of actually voting) and voter thinking they are registered to vote to find they are not on the list on Election Day. Also, some people think they are automatically registered if they have applied for a drivers license.
- Absentee ballot fraud is the most frequent form of election fraud.
- In Arkansas, it is suspected that politicians pay ministers to tell their congregations to vote for them.
- In 2003, the State Board documented 400 complaints against the Pulaski County Clerk for engaging in what was at least borderline fraud, e.g. certain people not receiving their absentee ballots. The case went to a grand jury but no indictment was brought.
- Transportation of ballot boxes is often insecure making it very easy for insiders to tamper with the ballots or stuff the ballot boxes. Priest has not actually witnessed this happen, but believes it may have.
- Intimidation at the poll sites in court houses. Many voters are afraid of the county judges or county employees and therefore will not vote. They justifiably believe
their ballots will be opened by these employees to see who they voted for, and if they voted against the county people, retribution might ensue.

- Undue challenges to minority language voters at the poll sites
- Paid registration collectors fill out phony names, but these individuals are caught before anyone is able to cast an ineligible ballot.

Suggested Reforms for Improvement:

- Nonpartisan election administration
- Increased prosecution of election crimes through greater resources to district attorneys. In addition, during election time, there should be an attorney in the DA’s office who is designated to handle election prosecution.
- There should be greater centralization of the process, especially with respect to the statewide database. Arkansas has a “bottom up” system. This means the counties still control the list and there is insufficient information sharing. For example, if someone lives in one county but dies in another, the county in which the voter lived – and was registered to vote – will not be notified of the death.
Interview with Heather Dawn Thompson, Director of Government Relations, National Congress of American Indians

March 22, 2006

Background

Thompson is a member of the Cheyenne River Sioux tribe in South Dakota. For many years she worked locally on elections doing poll monitoring and legal work, from a nonpartisan perspective. In 2004, she headed the Native Vote Election Protection, a project run by the National Congress of American Indians, and was in charge of monitoring all Native American voting sites around the country, focusing on 10 or 15 states with the biggest Native populations. She is now permanently on staff of the National Congress of American Indians as the Director of Government relations. NCAI works jointly with NARF as well as the Election Protection Coalition.

Recent trends

Native election protection operations have intensified recently for several reasons. While election protection efforts in Native areas have been ongoing, leaders realized that they were failing to develop internal infrastructure or cultivate locally any of the knowledge and expertise which would arrive and leave with external protection groups.

Moreover, in recent years partisan groups have become more aware of the power of the native vote, and have become more active in native communities. This has partly resulted in an extreme increase in voter intimidation tactics. As native communities are easy to identify, easy to target, and generally dominated by a single party, they are especially vulnerable to such tactics.

Initially, reports of intimidation were only passed along by word of mouth. But it became such a problem in the past 5 to 6 years that tribal leaders decided to raise the issue to the national level. Thompson points to the Cantwell election in 2000 and the Johnson election in South Dakota in 2002 as tipping points where many began to realize the Indian vote could matter in Senate and national elections.

Thompson stressed that Native Vote places a great deal of importance on being nonpartisan. While a majority of native communities vote Democratic, there are notable exceptions, including communities in Oklahoma and Alaska, and they have both parties engaging in aggressive tactics. However, she believes the most recent increase in suppression and intimidation tactics have come from Republican Party organizations.

Nature of Suppression/Intimidation of Native Voters

Thompson categorizes suppression into judge related and poll-watcher related incidents, both of which may be purposeful or inadvertent, as well as longstanding legal-structural constraints.
Structural problems

One example of inadvertent suppression built into the system stems from the fact that many Indian communities also include significant numbers of non-Indians due to allotment. Non-Indians tend to be most active in the state and local government while Indians tend to be more involved in the tribal government. Thus, the individuals running elections end up being non-Indian. Having Indians vote at polling places staffed by non-Indians often results in incidents of disrespect towards Native voters (Thompson emphasized the considerable racism which persists against Indians in these areas). Also, judges aren’t familiar with Indian last names and are more dismissive of solving discrepancies with native voters.

Structural problems also arise from laws which mandate that the tribal government cannot run state or local elections. In places like South Dakota, political leaders used to make it intentionally difficult for Native Americans to participate in elections. For example, state, local and federal elections could not be held in the same location as tribal elections, leading to confusion when tribal and other elections are held in different locations. Also, it is common to have native communities with few suitable sites, meaning that a state election held in a secondary location can suddenly impose transportation obstacles.

Photo ID Issues

Thompson believes both state level and HAVA photo ID requirements have a considerable negative impact. For a number of reasons, many Indian voters don’t have photo ID. Poor health care and poverty on reservations means that many children are born at home, leading to a lack of birth certificates necessary to obtain ID. Also, election workers and others may assume they are Hispanic, causing additional skepticism due to citizenship questions. There is a cultural issue as well—historically, whenever Indians register with the federal government it has been associated with a taking of land or removal of children. Thus many Indians avoid registering for anything with the government, even for tribal ID.

Thompson also offered examples of how the impact of ID requirements had been worsened by certain rules and the discriminatory way they have been carried out. In the South Dakota special election of 2003, poll workers told Native American voters that if they did not have ID with them and they lived within sixty miles of the precinct, the voter had to come back with ID. The poll workers did not tell the voters that they could vote by affidavit ballot and not need to return, as required by law. This was exacerbated by the fact that the poll workers didn’t know the voters—as would be the case with non-Indian poll workers and Indian voters. Many left the poll site without voting and did not return.

In Minnesota, the state tried to prohibit the use of tribal ID’s for voting outside of a reservation, even though Minnesota has a large urban Native population. Thompson believes this move was very purposeful, and despite any reasonable arguments from the Secretary of State, they had to file a lawsuit to stop the rule. They were very surprised to find national party representatives in the courtroom when they went to deal with lawsuit, representatives who could only have been alerted through a discussion with the Secretary of State.
Partisan Poll-Monitoring

Thompson believes the most purposeful suppression has been perpetrated by the party structures on an individual basis, of which South Dakota is a great example.

Some negative instances of poll monitoring are not purposeful. Both parties send in non-Indian, non-Western lawyers, largely from the East Coast, which can lead to uncomfortable cultural clashes. These efforts display a keen lack of understanding of these communities and the best way to negotiate within in them. But while it may be intimidating, it is not purposeful.

Yet there are also many instances of purposeful abuse of poll monitoring. While there were indeed problems during the 2002 Johnson election, it was small compared to the Janklow special election. Thompson says Republican workers shunned cultural understanding outreach, and had an extensive pamphlet of what to say at polls and were very aggressive about it. In one tactic, every time a voter would come up with no ID, poll monitors would repeat “You can’t vote” over and over again, causing many voters to leave. This same tactic appeared across reservations, and eventually they looked to the Secretary of State to intervene.

In another example, the head of poll watchers drove from poll to poll and told voters without IDs to go home, to the point where the chief of police was going to evict him from the reservation. In Minnesota, on the Red Lake reservation, police actually did evict an aggressive poll watcher—the fact that the same strategies are employed several hundred miles apart points to standardized instructions.

None of these incidents ever went to court. Thompson argues this is due to few avenues for legal recourse. In addition, it is inherently difficult to settle these things, as they are he said-she said incidents and take place amidst the confusion of Election Day. Furthermore, poll watchers know what the outline of the law is, and they are careful to work within those parameters, leaving little room for legal action.

Other seeming instances of intimidation may be purely inadvertent, such as when, in 2002, the U.S. Attorney chose Election Day to give out subpoenas, and native voters stayed in their homes. In all fairness, she believes this was a misunderstanding.

The effect of intimidation on small communities is especially strong and is impossible to ultimately measure, as the ripple effect of rumors in insular communities can’t be traced. In some communities, they try to combat this by using the Native radio to encourage people to vote and dispel myths.

She has suggestions for people who can describe incidents at a greater level of detail if interested.

Vote Buying and Fraud

They haven’t found a great deal of evidence on vote-buying and fraud. When cash is offered to register voters, individuals may abuse this, although Thompson believes this is not necessarily
unique to the Native community, but a reflection of high rates of poverty. This doesn’t amount to
a concerted effort at conspiracy, but instead represents isolated incidents of people not observing
the rules. While Thompson believes looking into such incidents is a completely fair inquiry, she
also believes it has been exploited for political purposes and to intimidate. For example, large
law enforcement contingents were sent to investigate these incidents. As Native voters tend not
to draw distinctions between law enforcement and other officials, this made them unlikely to
help with elections.

Remedies

As far as voter suppression is concerned, Native Vote has been asking the Department of Justice
to look into what might be done, and to place more emphasis on law enforcement and combating
intimidation. They have been urging the Department to focus on this at least much as it is
focusing on enforcement of Section 203. Native groups have complained to DOJ repeatedly and
DOJ has the entire log of handwritten incident reports they have collected. Therefore, Thompson
recommends more DOJ enforcement of voting rights laws with respect to intimidation. People
who would seek to abuse the process need to believe a penalty will be paid for doing so. Right
now, there is no recourse and DOJ does not care, so both parties do it because they can.

Certain states should rescind bars on nonpartisan poll watchers on Election Day; Thompson
believes this is contrary to the nonpartisan, pro-Indian presence which would best facilitate
voting in Native communities.

As discussed above, Thompson believes ID requirements are a huge impediment to native voters.
At a minimum, Thompson believes all states should be explicit about accepting tribal ID on
Election Day.

Liberalized absentee ballot rules would also be helpful to Native communities. As many Indian
voters are disabled and elderly, live far away from their precinct, and don’t have transportation,
tribes encourage members to vote by absentee ballot. Yet obstacles remain. Some voters are
denied a chance to vote if they have requested a ballot and then show up at the polls. Thompson
believes South Dakota’s practice of tossing absentee ballots if a voter shows up at the ED would
serve as an effective built-in protection. In addition, she believes there should be greater scrutiny
of GOTV groups requesting absentee ballots without permission. Precinct location is a
longstanding issue, but Thompson recognizes that states have limited resources. In the absence
of those resources, better absentee ballot procedures are needed.

Basic voter registration issues and access are also important in native communities and need to
be addressed.

Thompson is mixed on what restrictions should be placed on poll watcher behavior, as she
believes open elections and third party helpers are both important. However, she would be
willing to explore some sort of stronger recourse and set of rules concerning poll watchers’
behavior. Currently, the parties are aware that no recourse exists, and try to get away with what
they will. This is not unique to a single party—both try to stay within law while shaking people
up. The existing VRA provision is ‘fluffy’—unless you have a consent decree, you have very
little power. Thompson thinks a general voter intimidation law that is left a bit broad but that nonetheless makes people aware of some sort of kickback could be helpful.
Interview with Jason Torchinsky, former attorney with the Civil Rights Section of the Department of Justice, assistant general counsel for the American Center for Voting Rights (ACVR) and Robin DeJarnette, political consultant for C4 and C5 organizations and executive director for the ACVR.

February 16, 2006

ACVR Generally

Other officers of the ACVR—Thor Hearne II—general counsel and Brian Lunde, former executive director of the Democratic National Committee.

Board of Directors of ACVR—Brian Lunde, Thor Hearne II, and Cameron Quinn

ACVR works with a network of attorneys around the country and has been recently involved with lobbying in PA and MO.

Regarding the August 2005 Report

ACVR has not followed up on any of the cases it cited in the 2005 report to see if the allegations had been resolved in some manner. Mr. Torchinsky stated that there are problems with allegations of fraud in the report and prosecution—just because there was no prosecution, does not mean there was no vote fraud. He believes that it is very hard to come up with a measure of voter fraud short of prosecution. Mr. Torchinsky does not have a good answer to resolve this problem.

P. 35 of the Report indicates that there were coordinated efforts by groups to coordinate fraudulent voter registrations. P. 12 of the Ohio Report references a RICO suit filed against organizations regarding fraudulent voter registrations. Mr. Torchinsky does not know what happened in that case. He stated that there was a drive to increase voter registration numbers regardless of whether there was an actual person to register. He stated that when you have an organization like ACORN involved all over the place, there is reason to believe it is national in scope. When it is the same groups in multiple states, this leads to the belief that it is a concerted effort.

Voting Problems

Mr. Torchinsky stated there were incidents of double voting—ex. a double voter in Kansas City, MO. If the statewide voter registration database requirement of HAVA is properly implemented, he believes it will stop multiple voting in the same state. He supports the HAVA requirement, if implemented correctly. Since Washington State implemented its statewide database, the Secretary of State has initiated investigations into felons who voted. In Philadelphia the major problem is permitting polling places in private homes and bars— even the homes of party chairs.
Mr. Torchinsky believes that voter ID would help, especially in cities in places like Ohio and Philadelphia, PA. The ACVR legislative fund supports the Real ID requirements suggested by the Carter-Baker Commission. Since federal real ID requirements will be in place in 2010, any objection to a voter ID requirement should be moot.

Mr. Torchinsky stated that there are two major poll and absentee voting problems—(1) fraudulent votes—ex. dead people voting in St. Louis and (2) people voting who are not legally eligible—ex. felons in most places. He also believes that problems could arise in places that still transport paper ballots from the voting location to a counting room. However, he does not believe this is as widespread a problem now as it once was.

Suggestions

Implement the Carter-Baker Commission recommendations because they represent a reasonable compromise between the political parties.
Interview with Joe Rich, former Chief of the Voting Section, US Department of Justice
February 7, 2006

Background

Mr. Rich went to Yale undergraduate and received his law degree from the University of Michigan. He served as Chief of the Voting Section from 1999-2005. Prior to that he served in other leadership roles in the Civil Rights Division and litigated several civil rights cases.

Data Collection and Monitoring
The section developed a new database before the 2004 election to log complaint calls and what was done to follow up on them. They opened many investigations as a result of these complaints, including one on the long lines in Ohio (see DOJ letter on website, as well as critical commentary on the DOJ letter's analysis). DOJ found no Section 2 violation in Ohio. John Tanner should be able to give us this data. However, the database does not include complaints that were received by monitors and observers in the field.

All attorney observers in the field are required to submit reports after Election Day to the Department. These reports would give us a very good sense of the scope and type of problems that arose on that day and whether they were resolved on the spot or required further action.

The monitoring in 2004 was the biggest operation ever. Prior to 2000, only certain jurisdictions could be observed — a VRA covered jurisdiction that was certified or a jurisdiction that had been certified by a court, e.g. through a consent decree. Since that time, and especially in 2004, the Department has engaged in more informal “monitoring.” In those cases, monitors assigned to certain jurisdictions, as opposed to observers, can only watch in the polling place with permission from the jurisdiction. The Department picked locations based on whether they had been monitored in the past, there had been problems before, or there had been allegations in the past. Many problems that arose were resolved by monitors on the spot.

Processes for Cases not Resolved at the Polling Site

If the monitor or observer believes that a criminal act has taken place, he refers it to the Public Integrity Section (PIN). If it is an instance of racial intimidation, it is referred to the Civil Rights Criminal Division. However, very few such cases are prosecuted because they are very hard to prove. The statutes covering such crimes require actual violence or the threat of violence in order to make a case. As a result, most matters are referred to PIN because they operate under statutes that make these cases easier to prove. In general, there are not a high number of prosecutions for intimidation and suppression.
If the act is not criminal, it may be brought as a civil matter, but only if it violated the Voting Rights Act — in other words, only if there is a racial aspect to the case. Otherwise the only recourse is to refer it to PIN.

However, PIN tends not to focus on intimidation and suppression cases, but rather cases such as alleged noncitizen voting, etc. Public Integrity used to only go after systematic efforts to corrupt the system. Now they focus on scattered individuals, which is a questionable resource choice. Criminal prosecutors over the past 5 years have been given more resources and more leeway because of a shift in focus and policy toward noncitizens and double voting, etc.

There have been very few cases brought involving African American voters. There have been 7 Section 2 cases brought since 2001 — only one was brought on behalf of African American voters. That case was initiated under the Clinton administration. The others have included Latinos and discrimination against whites.

Types of Fraud and Intimidation Occurring

There is no evidence that polling place fraud is a problem. There is also no evidence that the NVRA has increased the opportunity for fraud. Moreover, regardless of NVRA’s provisions, an election official can always look into a voter’s registration if he or she believes that person should no longer be on the list. The Department is now suing Missouri because of its poor registration list.

The biggest problem is with absentee ballots. The photo ID movement is a vote suppression strategy. This type of suppression is a bigger problem than intimidation. There has been an increase in vote suppression over the last five years, but it has been indirect, often in the way that laws are interpreted and implemented. Unequal implementation of ID requirements at the polls based on race would be a VRA violation.

The most common type of intimidation occurring is open hostility by poll workers toward minorities. It is a judgment call whether this is a crime or not — Craig Donsanto of PIN decides if it rises to a criminal matter.

Election Day challenges at the polls could be a VRA violation but such a case has never been formally pursued. Such cases are often resolved on the spot. Development of a pre-election challenge list targeted at minorities would be a VRA violation but this also has never been pursued. These are choices of current enforcement policy.

Long lines due to unequal distribution of voting machines based on race, list purges based on race and refusal to offer a provisional ballot on the basis of race would also be VRA violations.

Recommendations
Congress should pass a new law that allows the Department to bring civil actions for suppression that is NOT race based, for example, deceptive practices or wholesale challenges to voters in jurisdictions that tend to vote heavily for one party.

Given the additional resources and latitude given to the enforcement of acts such as double voting and noncitizen voting, there should be an equal commitment to enforcement of acts of intimidation and suppression cases.

There should also be increased resources dedicated to expanded monitoring efforts. This might be the best use of resources since monitors and observers act as a deterrent to fraud and intimidation.
Interview with Justice Evelyn Stratton, Supreme Court of Ohio

February 17, 2006

The 2004 Election

Justice Stratton stated that usually in the period right before an election filings die down due to the Ohio expedited procedures for electoral challenges. However, the 2004 election was unusual because there were motions and cases decided up to the day of the election. Justice Stratton believed that most of the allegations were knee-jerk reactions without any substance. For example, without any factual claims, suit was brought alleging that all voter challengers posed a threat to voters. Thematicaly, allegations were either everyday voting problems or “conspiracies” depending on where the complaint came from. The major election cases in 2004 revolved around Secretary of State Blackwell.

Justice Stratton made a point that the Ohio Supreme Court bent over backwards in the 2004 election to be fair to both sides. There was never any discussion about a ruling helping one political party more than the other.

Justice Stratton cited two cases that summarize and refute the 2004 complaints---819 NE 2d 1125 (Ohio 2004) and 105 Ohio St. 3d 458 (2004).

General Election Fraud Issues

Justice Stratton has seen very few fraud cases in Ohio. Most challenges are for technical statutory reasons. She remembered one instance where a man who assisted handicapped voters marked the ballot differently than the voter wanted. Criminal charges were brought against this man and the question that the Ohio Supreme Court had to decide was whether ballots could be opened and inspected to see how votes were cast.

Justice Stratton claimed she knew of isolated incidences of fictitious voter registration but these were not prosecuted. She has not seen any evidence of ballots being stuffed, dead people voting, etc.

Suggestions for Changes in Voting Procedures

The Ohio Supreme Court is very strict about latches---if a person sits on their rights too long, they lose the right to file suit. The Ohio expedited procedures make election challenges run very smooth. Justice Stratton does not remember any suits brought on the day of the election. She supports a non-partisan head of state elections. Justice Stratton believes that last minute challenges should not be permitted and that lower courts need to follow the rules for the expedited procedures. Even given the anomalies with lower courts permitting late election challenges in 2004, the Ohio Supreme Court does not want to make a new rule unless this pattern repeats itself in 2008.
Interview with John Tanner, Director, Civil Rights Division, U.S. Department of Justice

February 24, 2006

Note: Mr. Tanner’s reluctance to share data, information and his perspective on solving the problems presented an obstacle to conducting the type of interview that would help inform this project as much as we would have hoped. Mr. Tanner would not give us any information about or data from the section’s election complaint in-take phone logs; data or even general information from the Interactive Case Management (ICM) system—its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws; and would give us only a selected few samples of attorney-observer reports, reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. He would not discuss in any manner any current investigations or cases the section is involved in. He also did not believe it was his position to offer us recommendations as to how his office, elections, or the voting process might be improved.

Authority and Process

The Voting Section, in contrast to the Public Integrity section as Craig Donsanto described it, typically looks only at systemic problems, not problems caused by individuals. Indeed, the section never goes after individuals because it does not have the statutory authority to do so. In situations in which individuals are causing problems at the polls and interfering with voting rights, the section calls the local election officials to resolve it.

Federal voting laws only apply to state action, so the section only sues local governments—it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. Doing it this way has been most effective—for example, while the section used to have the most observers in the South, systematic changes forced upon those jurisdictions have made it so now the section does not get complaints from the South.

The section can get involved even where there is no federal candidate on the ballot if there is a racial issue under the 14th and 15th Amendments.

When the section receives a complaint, attorneys first determine whether it is a matter of individuals or systemic. When deciding what to do with the complaint, the section errs on the side of referring it criminally because they do not want civil litigation to complicate a possible criminal case.

When a complaint comes in, the attorneys ask questions to see if there are even problems there that the complainant is not aware are violations of the law. For example, in the Boston case, the attorney did not just look at Spanish language cases under section 203, but also brought a Section 2 case for violations regarding Chinese and Vietnamese voters.
When looking into a case, the attorneys look for specificity, witnesses and supporting evidence.

Often, lawsuits bring voluntary compliance.

**Voter Intimidation**
Many instances of what some people refer to as voter intimidation are more unclear now. For example, photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera. It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation.

The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.

The inappropriate use of challengers on the basis of race would be a violation of the law. Mr. Tanner was unaware that such allegations were made in Ohio in 2004. He said there had never been an investigation into the abusive use of challengers.

Mr. Tanner said a lot of the challenges are legitimate because you have a lot of voter registration fraud as a result of groups paying people to register voters by the form. They turn in bogus registration forms. Then the parties examine the registration forms and challenge them because 200 of them, for example, have addresses of a vacant lot.

However, Mr. Tanner said the Department was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama, as was referenced in a February 23 Op-Ed in USA Today. Mr. Tanner reiterated the section takes racial targeting very seriously.

Refusal to provide provisional ballots would be a violation of the law that the section would investigate.

Deceptive practices are committed by individuals and would be a matter for the Public Integrity Section. Local government would have to be involved for the voting section to become involved.

Unequal implementation of ID rules, or asking minority voters only for ID would be something the section would go after. Mr. Tanner was unaware of allegations of this in 2004. He said this is usually a problem where you have language minorities and the poll workers cannot understand the voters when they say their names. The section has never formally investigated or solely focused a case based on abuse of ID provisions. However, implementation of ID rules was part of the Section 2 case in San Diego. Mr. Tanner reiterated that the section is doing more than ever before.

When asked about the section's references to incidents of vote fraud in the documents related to the new state photo identification requirements, Mr. Tanner said the section only looks at retrogression, not at the wisdom of what a legislature does. In Georgia, for
example, everyone statistically has identification, and more blacks have ID than whites. With respect to the letter to Senator Kit Bond regarding voter ID, the section did refer to the perception of concern about dead voters because of reporting by the Atlanta Journal-Constitution. It is understandable that when you have thousands of bogus registrations that there would be concerns about polling place fraud. Very close elections make this even more of an understandable concern. Putting control of registration lists in the hands of the states will be helpful because at this higher level of government you find a higher level of professionalism.

It is hard to know how much vote suppression and intimidation is taking place because it depends on one’s definition of the terms – they are used very loosely by some people. However, the enforcement of federal law over the years has made an astounding difference so that the level of discrimination has plummeted. Registration of minorities has soared, as can be seen on the section’s website. Mr. Tanner was unsure if the same was true with respect to turnout, but the gap is less. That information is not on the section’s website.

The section is not filing as many Section 2 cases as compared to Section 203 cases because many of the jurisdictions sued under Section 2 in the past do not have issues anymore. Mr. Tanner said that race based problems are rare now.

NVRA has been effective in opening up the registration process. In terms of enforcement, Mr. Tanner said they do what they can when they have credible allegations. There is a big gap between complaints and what can be substantiated. Mr. Tanner stated that given the high quality of the attorneys now in the section, if they do not investigate it or bring action, that act complained of did not happen.

Recommendations
Mr. Tanner did not feel it was appropriate to make recommendations.
Interview with Lori Minnite, Barnard College

February 22, 2006

Background

Ms. Minnite is an assistant professor of political science at Barnard College. She has done substantial research on voter fraud and wrote the report “Securing the Vote.” Ms. Minnite also did work related to an election lawsuit. The main question that she was asked to address in the lawsuit was---did election-day registration increase the possibility of fraud?

Securing the Vote

In Securing the Vote, Ms. Minnite found very little evidence of voter fraud because the historical conditions giving rise to fraud have weakened over the past twenty years. She stated that for fraud to take root a conspiracy was needed with a strong local political party and a complicit voter administration system. Since parties have weakened and there has been much improvement in the administration of elections and voting technology, the conditions no longer exist for large scale incidents of polling place fraud.

Ms. Minnite concentrates on fraud committed by voters not fraud committed by voting officials. She has looked at this issue on the national level and also concentrated on analyzing certain specific states. Ms. Minnite stressed that it is important to keep clear who the perpetrators of the fraud are and where the fraud occurs because that effects what the remedy should be. Often, voters are punished for fraud committed by voting officials.

Other Fraud Issues

Ms. Minnite found no evidence that NVRA was leading to more voter fraud. She supports non-partisan election administration. Ms. Minnite has found evidence that there is absentee ballot fraud. She can’t establish that there is a certain amount of absentee ballot fraud or that it is the major kind of voter fraud.

Recommendations

Assure there are accurate voter records and centralize voter databases

Reduce partisanship in electoral administration.
Interview with Nina Perales, Counsel, Mexican American Legal Defense and Education Fund

March 7, 2006

Background

Ms. Perales is an attorney with the Mexican American Legal Defense Fund (MALDEF). MALDEF’s mission is to foster sound public policies, laws and programs to safeguard the civil rights of the 40 million Latinos living in the United States and to empower the Latino community to fully participate in our society. One of the areas MALDEF works in is electoral issues, predominately centered on the Voting Rights Act. Ms. Perales did not seem to have a sense of the overall electoral issues in her working region (the southwest) effecting Hispanic voters and did not seem to want to offer her individual experiences and work activities as necessarily a perfect reflection of the challenges Hispanic voters face.

Largest Election Problems Since 2000

Santa Anna County, New Mexico-2004-intimidated voters by video taping them.

San Antonio-One African American voter subjected to a racial slur.

San Antonio-Relocated polling places at the last minute without Section 5 pre-clearance.

San Antonio-Closed polls while voters were still in line.

San Antonio-2003-only left open early voting polls in predominantly white districts.

San Antonio-2005-racially contested mayoral run-off election switched from touch screen voting to paper ballots.

Voter Fraud and Intimidation

In Texas, the counties are refusing to open their records with respect to Section 203 compliance (bilingual voting assistance), and those that did respond to MALDEF’s request submitted incomplete information. Ms. Perales believes this in itself is a form of voter intimidation.

Ms. Perales said it is hard to say if the obstacles minorities confront in voting are a result of intentional acts or not because the county commission is totally incompetent. There have continuously been problems with too few ballots, causing long lines, especially in places that had historically lower turnout. There is no formula in Texas for allocating ballots – each county makes these determinations.

When there is not enough language assistance at the polls, forcing a non-English speaker to rely on a family member to vote, that can suppress voter turnout.
Ms. Perales is not aware of deceptive practices or dirty tricks targeted at the Latino community.

There have been no allegations of illegal noncitizen voting in Texas. Indeed, the sponsor of a bill that would require proof of citizenship to vote could not provide any documentation of noncitizen voting in support of the bill. The bill was defeated in part because of the racist comments of the sponsor. In Arizona, such a measure was passed. Ms. Perales was only aware of one case of noncitizen voting in Arizona, involving a man of limited mental capacity who said he was told he was allowed to register and vote. Ms. Perales believes proof of citizenship requirements discriminate against Latinos.

Recommendations

Ms. Perales feels the laws are adequate, but that her organization does not have enough staff to do the monitoring necessary. This could be done by the federal government. However, even though the Department of Justice is focusing on Section 203 cases now, they have not even begun to scratch the surface. Moreover, the choices DOJ has made with respect to where they have brought claims do not seem to be based on any systematic analysis of where the biggest problems are. This may be because the administration is so ideological and partisan.

Ms. Perales does not believe making election administration nonpartisan would have a big impact. In Texas, administrators are appointed in a nonpartisan manner, but they still do not always have a nonpartisan approach. Each administrator tends to promote his or her personal view regardless of party.
Interview with Pat Rogers, private attorney

March 3, 2006

Background

In addition to his legal practice with Modrall, Sperling, Roehl, Harris & Sisk, Rogers also does some state-level lobbying for Verizon Wireless, GM, Dumont and other companies. His experience in election law goes back to 1988, where his first elections case was a defense against Bill Richardson, who had sued to get another candidate tossed off a ballot because of petition fraud. Since 1988, he has been involved in election cases at least once every two years.

2004 Litigation

In a case that ended before the New Mexico Supreme Court, Rogers represented the Green Party and other plaintiffs against the New Mexico Secretary of State for sending a directive telling local boards not to require ID for first time voters registering by mail. He argued that this watered-down ID check conflicted with what seemed fairly clear statutory requirements for first time voters. In 2004 these requirements were especially important due to the large presence of 3rd party organizations registering voters such as a 527 funded by Governor Richardson, ACORN, and others.

Plaintiffs were seeking a temporary restraining order requiring Secretary of State to follow the law. Yet the Supreme Court ultimately decided that, whether the directive was right or wrong, it was too late to require ID lest Bush v. Gore issues be raised.

Today, the issue is moot as the state legislature has changed the law, and the Secretary of State will no longer be in office. It seems unlikely they will send any policy directives to county clerks lest they violate due process/public notice.

Major issues in NM w/ regard to vote fraud

Registration fraud seems to be the major issue, and while the legislature has taken some steps, Rogers is skeptical of the effect they will have, considering the history of unequal application of election laws. He also believes there are holes in the 3rd party registration requirement deadlines.

Rogers views a national law requiring ID as the best solution to registration problems. Rather than imposing a burden he contends it will enhance public confidence in the simplest way possible.

Registration Fraud in 2004 election

It came to light that ACORN had registered a 13 year old. The father was an APD officer and received the confirmation, but it was sent to the next door address, a vacant house.
They traced this to an ACORN employee and it was established that this employee had been registering others under 18.

Two weeks later, in a crack cocaine bust of Cuban nationals, one of those raided said his job was registering voters for ACORN, and the police found signatures in his possession for fictitious persons.

In a suspicious break-in at an entity that advertised itself as nonpartisan, only GOP registrations were stolen.

In another instance, a college student was allegedly fired for registering too many Republicans.

Rogers said he believed these workers were paid by the registration rather than hourly.

There have been no prosecution or convictions related to these incidents. In fact, there have been no prosecutions for election fraud in New Mexico in recent history. However, Rogers is skeptical that much action can be expected considering the positions of Attorney General, Governor, and Secretary of State are all held by Democrats. Nor has there been any interest from the U.S. attorney—Rogers heard that U.S. attorneys were given instruction to hold off until after the election in 2004 because it would seem too political.

As part of the case against the Secretary of State regarding the identification requirement, the parties also sued ACORN. At a hearing, the head of ACORN, and others aligned with the Democratic Party called as witnesses, took the 5th on the stand as to their registration practices.

Other incidents

Very recently, there have been reports of vote buying in the town of Espanola. Originally reported by the Rio Grande Sun, a resident of a low-income housing project is quoted as saying it has been going on for 10-12 years. The Albuquerque Journal is now reporting this as well. So far the investigation has been extremely limited.

In 1996, there were some prosecutions in Espanola, where a state district judge found registration fraud.

In 1991, the chair of Democratic Party of Bertolino County was convicted on fraud. Yet she was pardoned by Clinton on same day as Marc Rich.

Intimidation/Suppression

Rogers believes the most notable example of intimidation in the 2004 election was the discovery of a DNC Handbook from Colorado advising Democratic operatives to widely report intimidation regardless of confirmation in order to gain media attention.
In-person polling place fraud

There have only been isolated instances of people reporting that someone had voted in their name, and Rogers doesn’t believe there is any large scale conspiracy. Yet he contends that perspective misses the larger point of voter confidence. Although there has been a large public outcry for voter ID in New Mexico, it has been deflected and avoided by Democrats.

In 2004, there were more Democratic lawyers at the polls than there are lawyers in New Mexico. Rogers believes these lawyers had a positive impact because they deterred people from committing bad acts.

Counting Procedures

The Secretary of State has also taken the position that canvassing of the vote should be done in private. In NM, they have a ‘county canvas’ where they review and certify, after which all materials—machine tapes, etc.,—are centralized with the Secretary of State who does a final canvass for final certification. Conducting this in private is a serious issue, especially considering the margin in the 2000 presidential vote in New Mexico was only 366 votes. They wouldn’t be changing machine numbers, but paper numbers are vulnerable.

On a related note, NM has adopted state procedures that will ensure their reports are slower and very late, considering the 2000 late discovery of ballots. In a close race, potential for fraud and mischief goes up astronomically in the period between poll closing and reporting. Rogers believes these changes are going to cause national embarrassment in the future.

Rogers attributes other harmful effects to what he terms the Secretary of State’s incompetence and inability to discern a nonpartisan application of the law. In the 2004 election, no standards were issued for counting provisional ballots. Furthermore, the Secretary of State spent over $1 million of HAVA money for ‘voter education’ in blatant self-promotional ads.

Recommendations

Rogers believes it would be unfeasible to have nonpartisan election administration and favors transparency instead. To make sure people have confidence in the election, there must be transparency in the whole process. Then you don’t have the 1960 vote coming down to Illinois, or the Espanola ballot or Dona Anna County (ballots found there in the 2000 election). HAVA funds should also be restricted when you have an incompetent, partisan Secretary of State.

There should be national standards for reporting voting results so there is less opportunity for fraud in a close race. Although he is not generally an advocate of national laws, he
does agree there should be more national uniformity into how votes are counted and recorded.
Interview with Rebecca Vigil-Giron, Secretary of State, New Mexico

March 24, 2006

Background

Vigil-Giron has been Secretary of State for twelve years and was the President of the National Association of Secretaries of State in 2004. Complaints of election fraud and intimidation are filed with the SOS office. She then decides whether to refer it to the local district attorney or the attorney general. Because the complaints are few and far between, the office does not keep a log of complaints; however, they do have all of the written complaints on file in the office.

Incidents of Fraud and Intimidation

During the 2004 election, there were a couple of complaints of polling place observers telling people outside the polling place who had just voted, and then the people outside were following the voters to their cars and videotaping them. This happened in areas that are mostly second and third generation Latinos. The Secretary sent out the sheriff in one instance of this. The perpetrators moved to a different polling place. This was the only incident of fraud or intimidation Vigil-Giron was aware of in New Mexico.

There have not been many problems on Native reservations because, unlike in many other states, in New Mexico the polling place is on the reservation and is run by local Native Americans. Vigil-Giron said that it does not make sense to have non-Natives running those polls because it is necessary to have people there who can translate. Because most of the languages are unwritten, the HAVA requirement of accessibility through an audio device will be very helpful in this regard. Vigil-Giron said she was surprised to learn while testifying at the Voting Rights Act commission hearings of the lack of sensitivity to these issues and the common failure to provide assistance in language minority areas.

In 2004 the U.S. Attorney, a Republican, suddenly announced he was launching an investigation into voter fraud without consulting the Secretary of State’s office. After all of that, there was maybe one prosecution. Even the allegations involving third party groups and voter registration are often misleading. People doing voter registration drives encourage voters to register if they are unsure if they are already registered, and the voter does not even realize that his or her name will then appear on the voter list twice. The bigger problem is where registrations do not get forwarded to election administrators and the voter does not end up on the voting list on Election Day. This is voter intimidation in itself, Vigil-Giron believes. It is very discouraging for that voter and she wonders whether he or she will try again.

Under the bill passed in 2004, third parties are required to turn around voter registration forms very quickly between the time they get them and when they must be returned. If
they fail to return them within 48 hours of getting them, they are penalized. This, Vigil-Giron believes, is unfair. She has tried to get the Legislature to look at this issue again. Regarding allegations of vote buying in Espanola, Vigil-Giron said that the Attorney General is investigating. The problem in that area of New Mexico is that they are still using rural routes, so they have not been able to properly district. There has, as a result, been manipulation of where people vote. Now they seem to have pushed the envelope too far on this. The investigation is not just about vote buying, however. There have also been allegations of voters being denied translators as well as assistance at the polls.

Vigil-Giron believes there was voter suppression in Ohio in 2004. County officials knew thirty days out how many people had registered to vote, they knew how many voters there would be. Administrators are supposed to use a formula for allocation of voting machines based on registered voters. Administrators in Ohio ignored this. As a result, people were turned away at the polls or left because of the huge lines. This, she believes, was a case of intentional vote suppression.

A few years ago, Vigil-Giron heard that there may have been people voting in New Mexico and a bordering town in Colorado. She exchanged information with Colorado administrators and it turned out that there were no cases of double voting.

Recommendations

Vigil-Giron believes that linking voter registration databases across states may be a way to see if people who are registered twice are in fact voting twice.

The key to improving the process is better trained poll workers, who are certified, and know what to look for on Election Day. These poll workers should then work with law enforcement to ensure there are no transgressions.

There should be stronger teeth in the voter fraud laws. For example, it should be more than a fourth degree felony, as is currently the case.
Interview with Tracy Campbell, author

March 3, 2006

Background

Campbell's first book on election fraud looked at Ed Pritchard, a New Deal figure who went to jail for stuffing ballot boxes. While his initial goal in writing that book was to find out why Pritchard had engaged in vote stealing, his growing understanding of a pervasive culture of electoral corruption led him to consider instead how it was that Pritchard was ever caught. In 1998, he started working on a book regarding fraud in Kentucky, which quickly became a national study. He hoped to convey the 'real politics' which he feels readers, not to mention academics, have little sense about. While less blatant than in previous eras, fraud certainly still occurs, and he mentions some examples in his book. The major trend of the past 60-70 years has been that these tactics have grown more subtle.

While he hasn't conducted any scientific study of the current state of fraud, his sense as a historian is that it is seems naive, after generations of watching the same patterns and practices influence elections, to view suspect election results today as merely attributable to simple error.

Vote-buying and absentee fraud

Campbell sees fraud by absentee ballot and vote buying as the greatest threats to fair elections today. He says vote fraud is like real estate: location, location, location—the closer you can keep the ballots to the courthouse the better. Absentee ballots create a much easier target for vote brokers who can manage voting away from the polling place, or even mark a ballot directly, in exchange for, say, $50—or even more if an individual can bring their entire family. He has noted some small counties where absentee ballots outnumber in-person ballots.

However, few people engaged in this activity would call it 'purchasing' a vote. Instead, it is candidate Jones' way of 'thanking' you for a vote you would have cast in any event. The issue is what happens if candidate Smith offers you more. Likewise, the politicians who engage in vote fraud don't see it as a threat to the republic but rather as a game they have to play in order to get elected.

Regional patterns

Campbell suggests such practices are more prevalent in the South than the Northern states, and even more so compared to the West. The South has long been characterized as particularly dangerous in intimidation and suppression practices—throughout history, one can find routine stories of deaths at the polls each year. While he maintains that fraud seems less likely in the Western states, he sees the explosion of mail in and absentee ballots there as asking for trouble.

Poll site closings as a means to suppress votes
Campbell points to a long historical record of moving poll sites in order to suppress votes. Polling places in the 1800s were frequently set-up on rail cars and moved further down the line to suppress black votes.

He would include door-to-door canvassing practices here, as well as voting in homes, which was in use in Kentucky until only a few years ago. All of these practices have been justified as making polling places 'more accessible' while their real purpose has been to suppress votes.

**Purge lists**

Purge lists are, of course, needed in theory, yet Campbell believes the authority to mark names off the voter rolls presents extensive opportunity for abuse. For this reason, purging must be done in a manner that uses the best databases, and looks at only the most relevant information. When voters discover their names aren't on the list when they go to vote, for example, because they are "dead," it has a considerable demoralizing effect. Wrongful purging takes place both because of incompetence and as a tool to intentionally disenfranchise.

Campbell believes transparency is the real issue here. An hour after the polls close, we tend to just throw up our hands and look the other way, denying voters the chance to see that discrepancies are being rectified. He believes the cost in not immediately knowing election outcomes is a small price to pay for getting results rights and showing the public a transparent process.

**Deceptive practices**

Today's deceptive practices have are solidly rooted in Reconstruction-era practices—i.e. phony ballots, the Texas 'elimination' ballot. The ability to confuse voters is a powerful tool for those looking to sway elections.

**Language minorities**

Campbell argues there is a fine line between offering help to non-English speakers and using that help against them. A related issue, particularly in the South, is taking advantage of the illiterate.

**Current intimidation**

Another tactic Campbell considers an issue today is polling place layout: the further vote suppressers can keep people away from the polls, the better. Practices such as photographing people leaving a polling place may also tie into vote-buying, where photos are used to intimidate and validate purchased votes. A good way to combat such practices is by keeping electioneering as far from the polls as possible.

**Recommendations**

Specific voting administration recommendations Campbell advocates would include reducing the use of absentee ballots and improving the protective zone around polling places.
Campbell would also like to see enforcement against fraud stepped up and stiffer penalties enacted, as current penalties make the risk of committing fraud relatively low. He compares the risk in election fraud similar to steroid use in professional sports—the potential value of the outcome is far higher than the risk of being caught or penalized for the infraction, so it is hard to prevent people from doing it. People need to believe they will pay a price for engaging in fraud or intimidation. Moreover, we need to have the will to kick people out of office if necessary.

He is skeptical of the feasibility of nonpartisan election administration, as he believes it would be difficult to find people who care about politics yet won’t lean one way or the other—such an attempt would be unlikely to get very far before accusations of partisanship emerged. He considers the judiciary the only legitimate check on election fraud.
Interview with Joe Sandler, Counsel to the DNC

February 24, 2006

Background

Sandler is an election attorney. He worked for the DNC in 1986, was in-house counsel from 1993-1998, and currently is outside counsel to the DNC and most state Democratic Parties. Sandler was part of the recount team in Florida in both 2002 and 2004. He recruited and trained attorneys in voting issues—starting in 2002 Sandler recruited in excess of 15,000 attorneys in twenty-two states. He is now putting together a national lawyers council in each state.

2004—Administrative Incompetence v. Fraud

Sandler believes the 2004 election was a combination of administrative incompetence and fraud. Sandler stated there was a deliberate effort by the Republicans to disenfranchise voters across the country. This was accomplished by mailing out cards to registered voters and then moving to purge from the voters list those whose cards were returned. Sandler indicated that in New Mexico there was a deliberate attempt by Republicans to purge people registered by third parties. He stated that there were intentional efforts to disenfranchise voters by election officials like Ken Blackwell in Ohio.

The problems with machine distribution in 2004 were not deliberate. However, Sandler believes that a large problem exists in the states because there are no laws that spell out a formula to allocate so many voting machines per voter.

Sandler was asked how often names were intentionally purged from the voter lists. He responded that there will be a lot of names purged as a result of the creation of the voter lists under HAVA. However, Sandler stated most wrongful purging results from incompetence. Sandler also said there was not much intimidation at the polls because most such efforts are deterred and that the last systematic effort was in Philadelphia in 2003 where Republicans had official looking cars and people with badges and uniforms, etc.

Sandler stated that deliberate dissemination of misinformation was more incidental, with individuals misinforming and not a political party. Disinformation did occur in small Spanish speaking communities.

Republicans point to instances of voter registration fraud but Sandler believes it did not occur, except for once in a blue moon. Sandler did not believe non-citizen voting was a problem. He also does not believe that there is voter impersonation at the polls and that Republicans allege this as a way of disenfranchising voters through restrictive voter identification rules.
Fraud and Intimidation Trends

Sandler stated that over the years there has been a shift from organized efforts to intimidate minority voters through voter identification requirements, improper purging, failure to properly register voters, not allocating enough voting machines, failure to properly use the provisional ballot, etc., by voter officials as well as systematic efforts by Republicans to deregister voters.

At the federal level, Sandler said, the voting division has become so politicized that it is basically useless now on intimidation claims. At the local level, Sandler does not believe politics prevents or hinders prosecution for vote fraud.

Sandler’s Recommendations

Moving the voter lists to the state level is a good idea where carefully done
Provisional ballots rules should follow the law and not be over-used
No voter ID
Partisanship should be taken out of election administration, perhaps by giving that responsibility by someone other than the Secretary of State. There should at least be conflict of interest rules
Enact laws that allow private citizens to bring suit under state law
All suggestions from the DNC Ohio Report:

1. The Democratic Party must continue its efforts to monitor election law reform in all fifty states, the District of Columbia and territories.
2. States should be encouraged to codify into law all required election practices, including requirements for the adequate training of official poll workers.
3. States should adopt uniform and clear published standards for the distribution of voting equipment and the assignment of official pollworkers among precincts, to ensure adequate and nondiscriminatory access. These standards should be based on set ratios of numbers of machines and pollworkers per number of voters expected to turn out, and should be made available for public comment before being adopting.
4. States should adopt legislation to make clear and uniform the rules on voter registration.
5. The Democratic Party should monitor the processing of voter registrations by local election authorities on an ongoing basis to ensure the timely processing of registrations and changes, including both newly registered voters and voters who move within a jurisdiction or the state, and the Party should ask state Attorneys General to take action where necessary to force the timely updating of voter lists.
6. States should be urged to implement statewide voter lists in accordance with the Help America Vote Act (“HAVA”), the election reform law enacted by Congress in 2002 following the Florida debacle.
7. State and local jurisdictions should adopt clear and uniform rules on the use of, and the counting of, provisional ballots, and distribute them for public comment well in advance of each election day.
8. The Democratic Party should monitor the purging and updating of registered voter lists by local officials, and the Party should challenge, and ask state Attorneys General to challenge, unlawful purges and other improper list maintenance practices.

9. States should not adopt requirements that voters show identification at the polls, beyond those already required by federal law (requiring that identification be shown only by first time voters who did not show identification when registering.)

10. State Attorneys General and local authorities should vigorously enforce, to the full extent permitted by state law, a voter’s right to vote without showing identification.

11. Jurisdictions should be encouraged to use precinct-tabulated optical scan systems with a computer assisted device at each precinct, in preference to touchscreen (“direct recording equipment” or “DRE”) machines.

12. Touchscreen (DRE) machines should not be used until a reliable voter verifiable audit feature can be uniformly incorporated into these systems. In the event of a recount, the paper or other auditable record should be considered the official record.

13. Remaining punchcard systems should be discontinued.

14. States should ask state Attorneys General to challenge unfair or discriminatory distribution of equipment and resources where necessary, and the Democratic Party should bring litigation as necessary.

15. Voting equipment vendors should be required to disclose their source code so that it can be examined by third parties. No voting machine should have wireless connections or be able to connect to the Internet.

16. Any equipment used by voters to vote or by officials to tabulate the votes should be used exclusively for that purpose. That is particularly important for tabulating/aggregating computers.

17. States should adopt “no excuse required” standards for absentee voting.
18. States should make it easier for college students to vote in the jurisdiction in which their school is located.
19. States should develop procedures to ensure that voting is facilitated, without compromising security or privacy, for all eligible voters living overseas.
20. States should make voter suppression a criminal offense at the state level, in all states.
21. States should improve the training of pollworkers.
22. States should expend significantly more resources in educating voters on where, when and how to vote.
23. Partisan officials who volunteer to work for a candidate should not oversee or administer any elections.
Interview with John Ravitz, Executive Director, New York City Board of Elections  
February 16, 2006

Process
If there is an allegation of fraud or intimidation, the commissioners can rule to act on it. For example, in 2004 there were allegations in Queens that people had registered to vote using the addresses of warehouses and stores. The Board sent out teams of investigators to look into this. The Board then developed a challenge list that was to be used at the polls if any of the suspect voters showed up to vote.

If the allegation rises to a criminal level, the Board will refer it to the county district attorney. If a poll worker or election official is involved, the Board may conduct an internal investigation. That individual would be interviewed, and if there is validity to the claim, the Board would take action.

Incidences of Fraud and Intimidation
Mr. Ravitz says there have been no complaints about voter intimidation since he has been at the Board. There have been instances of over-aggressive poll workers, but nothing threatening. Voter fraud has also generally not been a problem.

In 2004, the problem was monitors from the Department of Justice intimidating voters. They were not properly trained, and were doing things like going into the booth with voters. The Board had to contact their Department supervisors to put a stop to it.

Charges regarding “ballot security teams” have generally just been political posturing.

The problem of people entering false information on voter registration forms is a problem. However, sometimes a name people allege is false actually turns out to be the voter’s real name. Moreover, these types of acts do not involve anyone actually casting a fraudulent ballot.

With respect to the issue of voters being registered in both New York and Florida, the Board now compares its list with that of Florida and other places to address the problem. This will be less of an issue with the use of statewide voter registration databases, as information becomes easier to share. Despite the number of people who were on the voter registration lists of both jurisdictions, there was no one from those lists who voted twice.

Most of the problems at the polls have to do with poll workers not doing what they are supposed to do, not any sort of malfeasance. This indicates that improved training is the most important measure we can take.

There have been instances in which poll workers ask voters for identification when they shouldn’t. However, the poll workers seem to do it when they cannot understand the name when the voter tells it to them. The Board has tried to train them that no matter what, the poll worker cannot ask for identification in order to get the person’s name.
Absentee ballot fraud has also not been a problem in New York City. This is likely because absentee ballots are counted last – eight days after election day. This is so that they can be checked thoroughly and verified. This is a practice other jurisdictions might consider.

New York City has not had a problem with ex-felons voting or with ex-felons not knowing their voting rights. The City has not had any problems in recent years with deceptive practices, such as flyers providing misinformation about voting procedures.

Recommendations
- Better poll worker training
- Thorough inspection of absentee ballots subsequent to the election
Interview with Wendy Weiser, Deputy Director, Democracy Program, The Brennan Center

Brennan Center findings on fraud

The Brennan Center's primary work on fraud is their report for the Carter Baker Commission with commissioner Spencer Overton, written in response to the Commission's ID recommendations. Brennan reviewed all existing reports and election contests related to voter fraud. They believe the contests serve as an especially good record of whether or not fraud exists, as the parties involved in contested elections have a large incentive to root out fraudulent voters. Yet despite this, the incidence of voter impersonation fraud discovered is extremely low—something on the order 1/10000th of a percentage of voters. See also the brief Brennan filed on 11th circuit in Georgia photo ID case which cites sources in Carter Baker report and argues the incidence of voter fraud too low to justify countermeasures.

Among types of fraud, they found impersonation, or polling place fraud, is probably the least frequent type, although other types, such as absentee ballot fraud are also very infrequent. Weiser believes this is because impersonation fraud is more likely to be caught and is therefore not worth the risk. Unlike in an absentee situation, actual poll workers are present to disrupt impersonation fraud, for instance, by catching the same individual voting twice. She believes perhaps one half to one quarter of the time the person will be caught. Also, there is a chance the pollworker will have personal knowledge of the person. Georgia Secretary of State Cathy Cox has mentioned that there are many opportunities for discovery of in person fraud as well. For example, if one votes in the name of another voter, and that voter shows up at the polls, the fraud will be discovered.

Weiser believes court proceedings in election contests are especially useful. Some are very extensive, with hundreds of voters brought up by each side and litigated. In both pre-election challenges and post-election contests, parties have devoted extraordinary resources into ‘smoking out’ fraudulent voters. Justin Leavitt at Brennan scoured such proceedings for the Carter Baker report, which includes these citations. Contact him for answers to particular questions.

Countermeasures/statewide databases

Brennan has also considered what states are doing to combat impersonation fraud besides photo ID laws, although again, it seems to be the rarest kind of fraud, beyond statistically insignificant. In the brief Brennan filed in the Georgia case, the Center detailed what states are already doing to effectively address fraud. In another on the web site includes measures that can be taken that no states have adopted yet. Weiser adds that an effort to look at strategies states have to prevent fraud, state variations, effectiveness, ease of enforcement would be very useful.

Weiser believes the best defense against fraud will be better voter lists—she argues the fraud debate is actually premature because states have yet to fully implement the HAVA database requirement. This should eliminate a great deal of ‘deadwood’ on voter rolls and undermine the
common argument that fraud is made possible by this deadwood. This was the experience for Michigan, which was able to remove 600,000 names initially, and later removed almost 1 million names from their rolls. It is fairly easy to cull deadwood from lists due to consolidation at the state level—most deadwood is due to individuals moving within the state and poor communication between jurisdictions. (Also discuss with Chris Thomas, who masterminded the Michigan database for more information and a historical perspective.)

Regarding the question of whether the effect of this maintenance on fraud in Michigan can be quantified, Weiser would caution against drawing direct lines between list problems and fraud. Brennan has found various groups abusing the existence of list deadwood to make claims about fraudulent voting. This is analyzed in greater detail in the Brennan Center’s critique of a purge list produced by the NJ Republican party, and was illustrated by the purge list produced by the state of Florida. When compiling such lists and doing comparisons, sound statistical methods must be utilized, and often are not.

The NJ GOP created a list and asked NJ election officials to purge names of ineligible voters on it. Their list assumed that people appearing on the list twice had voted twice. Brennan found their assumptions shoddy and based on incorrect statistical practices, such as treating individuals with the same name and birthdays as duplicates, although this is highly unlikely according to proper statistical methods. Simply running algorithms on voter lists creates a number of false positives, does not provide an accurate basis for purging, and should not be taken as an indicator of fraud.

Regarding the Florida purge list, faulty assumptions caused the list to systematically exclude Hispanics while overestimating African Americans. Matching protocols required that race fields match exactly, despite inconsistent fields across databases.

The kinds of list comparisons that are frequently done to allege fraud are unreliable. Moreover, even if someone is on a voter list twice, that does not mean that voter has voted twice. That, in fact, is almost never the case.

Ultimately, even matching protocols without faulty assumptions will have a 4 percent to 35 percent error rate—that’s simply the nature of database work. Private industry has been working on improving this for years. Now that HAVA has introduced a matching requirement, even greater skepticism is called for in judging the accuracy of list maintenance.

Intimidation and Suppression

Brennan does not have a specific focus here, although they do come across it and have provided assistance on bills to prevent suppression and intimidation. They happen to have an extensive paper file of intimidating fliers and related stories from before the 2004 election. (They can supply copies after this week).

Challengers
Brennan has analyzed cases where challenger laws have been beneficial and where they have been abused. See the decision and record from the 1982 NJ vs. RNC case for some of the history of these laws. Brennan is currently working on developing a model challenger law.

Weiser believes challenge laws with no requirement that the challenger have any specific basis for the challenge or showing of ineligibility are an invitation to blanket harassing challenges and have a range of pitfalls. State laws are vague and broad and often involve arcane processes such as where voters are required to meet a challenge within 5 days. There are incentives for political abuse, potential for delaying votes and disrupting the polls, and they are not necessarily directed toward the best result. Furthermore, when a voter receives a mailer alleging vote fraud with no basis, even the mere fact of a challenge can be chilling. A voter does not want to have to go through a quasi-court proceeding in order to vote.

Brennan recommends challenge processes that get results before election, minimize the burden for voters, and are restricted at polling place to challenges by poll workers and election officials, not voters. They believe limitless challenges can lead to pandemonium—that once the floodgates are open they won’t stop.

Recommendations

Intimidation— Weiser believes Sen. Barak Obama’s bill is a good one for combating voter harassment and deceptive practices. Many jurisdictions do not currently have laws prohibiting voter harassment and deceptive practices.

Fraud— Current state and federal codes seem sufficient for prosecuting fraud. Weiser doesn’t consider them under-enforced, and sees no need for additional laws.

Voter lists— New legislation or regulations are needed to provide clear guidance and standards for generating voter lists and purging voters, otherwise states could wrongfully disenfranchise eligible voters.

Challengers—Challenge laws need to be reformed, especially ones that allow for pre-election mass challenges with no real basis. There is no one size fits all model for challenger legislation, but some bad models involving hurdles for voters lead to abuse and should be reformed. There should be room for poll workers to challenge fraudulent voters, but not for abuse.

Also useful would be recommendations for prosecutors investigating fraudulent activity, How should they approach these cases? How should they approach cases of large scale fraud/intimidation? While there is sufficient legislative cover to get at any election fraud activity, questions remain about what proper approaches and enforcement strategies should be.
Interview with Bill Groth, Attorney for the Plaintiffs in Indiana Identification Litigation
February 22, 2006

Fraud in Indiana

Indiana has never charged or prosecuted anyone for polling place fraud. Nor has any empirical evidence of voter impersonation fraud or dead voter fraud been presented. In addition, there is no record of any credible complaint about voter impersonation fraud in Indiana. State legislators signed an affidavit that said there had never been imposter voting in Indiana. At the same time, the Indiana Supreme Court has not necessarily required evidence of voter fraud before approving legislative attempts to address fraud.

The state attorney general has conceded that there is no concrete fraud in Indiana, but has instead referred to instances of fraud in other states. Groth filed a detailed motion to strike evidence such as John Fund’s book relating to other states, arguing that none of that evidence was presented to the legislature and that it should have been in the form of sworn affidavits, so that it would have some indicia of verifiability.

Photo ID law

By imposing restrictive ID measures, Groth contends you will discourage 1,000 times more legitimate voters than illegitimate voters you might protect against. He feels the implementation of a REAL ID requirement is an inadequate justification for the law, as it will not affect the upcoming 2006 election where thousands of registered voters will be left without proper ID. In addition, he questions whether REAL ID will be implemented as planned in 2008 considering the backlash against the law so far. He also feels ID laws are unconstitutional because of inconsistent application.

Statewide database as remedy

Groth believes many problems will be addressed by the statewide database required under HAVA. To the extent that the rolls in Indiana are bloated, it is because state officials have not complied with NVRA list maintenance requirements. Thus, it is somewhat disingenuous for them to use bloated voter rolls as a reason for imposing additional measures such as the photo ID law. Furthermore, the state has ceded to the counties the obligation to do maintenance programs, which results in a hit or miss process (see discussion in reply brief, p 26 through p. 28).

Absentee fraud

To the extent that there has been an incidence of fraud, these have all been confined to absentee balloting. Most notably the East Chicago mayoral election case where courts found absentee voting fraud had occurred. See: Pabey vs. Pastrick 816 NE 2nd 1138 Decision by the Indiana Supreme Court in 2004.
Intimidation and vote suppression

Groth is only aware of anecdotal evidence supporting intimidation and suppression activities. While he considers the sources of this evidence credible, it is still decidedly anecdotal. Instances he is aware of include police cars parked in front of African American polling places. However, most incidents of suppression which are discussed occurred well in the past. Trevor Davidson claims a fairly large scale intimidation program in Louisville.

Challengers

There was widespread information that the state Republican Party had planned a large scale challenger operation in Democratic precincts for 2004, but abandoned the plan at the last minute.

Last year the legislature made a crucial change to election laws which will allow partisan challengers to be physically inside the polling area next to members of the precinct board. Previously, challengers at the polling place have been restricted to the ‘chute,’ which provides a buffer zone between voting and people engaging in political activity. That change will make it much easier to challenge voters. As there is no recorded legislative history in Indiana, it is difficult to determine the justification behind this change. As both chambers and the governorship are under single-party control, the challenger statute was passed under the radar screen.

Photo ID and Challengers

Observers are especially concerned about how this change will work in conjunction with the photo ID provision. Under the law, there are at least two reasons why a member of the precinct board or a challenger can raise object to an ID: whether a presented ID conforms to ID standards, and whether the photo on an ID is actually a picture of the voter presenting it. The law does not require bipartisan agreement that a challenge is valid. All it takes is one challenge to raise a challenge to that voter, and that will lead to the voter voting by provisional ballot.

Provisional ballot voting means that voter must make a second trip to the election board (located at the county seat) within 13 days to produce the conforming ID or to swear out an affidavit that they are who they claim to be. This may pose a considerable burden to voters. For example, Indianapolis and Marion County are coterminous—anyone challenged under the law will be required to make second trip to seat of government in downtown Indianapolis. If the voter in question did not have a driver’s license in the first place, they will likely need to arrange transportation. Furthermore, in most cases the election result will already be known.

The law is vague about acceptable cause for challenging a voter’s ID. Some requirements for valid photo ID include being issued by state or fed govt, w/ expiration date, and the names must conform exactly. The League of Women Voters is concerned about voters
with hyphenated names, as the Indiana DMV fails to put hyphens on driver’s licenses potentially leading to a basis for challenge. Misspelling of names would also be a problem. The other primary mode of challenge is saying the photo doesn’t look like the voter, which could be happen in a range of instances. Essentially, the law gives unbridled discretion to challengers to decide what conforms and what does not.

Furthermore, there is no way to determine whether a challenge is in good or bad faith, and there is little penalty for making a bad faith challenge. The fact that there are no checks on the challenges at the precinct level, or even a requirement of concurrence from an opposing party challenger leads to the concern that challenge process will be abused. The voter on the other hand, will need to get majority approval of county election board members to defeat the challenge.

Groth suggests the political situation in Indianapolis also presents a temptation to abuse this process, as electoral margins are growing increasingly close due to shifting political calculus.

Other cases

Groth’s other election law work has included a redistricting dispute, a dispute over ballot format, NVRA issues, and a case related to improper list purging, but nothing else related to fraud or intimidation. The purging case involved the election board attempting to refine its voter list by sending registration postcards to everyone on the list. When postcards didn’t come back they wanted to purge those voters. Groth blames this error more on incompetence, than malevolence, however, as the county board is bipartisan. (The Indiana Election Commission and the Indiana election division are both bipartisan, but the 92 county election boards which will be administering photo id are controlled by one political party or the other—they are always an odd number, with the partisan majority determined by who controls the clerk of circuit court office.)

Recommendations

Supports nonpartisan administration of elections. Indiana specific recommendations including a longer voting day, time off for workers to vote, and an extended registration period.

He views the central problem of the Indiana photo ID law is that the list of acceptable forms of ID is too narrow and provides no fallback to voters without ID. At the least, he believes the state needs to expand the list so that most people will have at least one. If not, they should be allowed to swear an affidavit regarding their identity, under penalty of perjury/felony prosecution. This would provide sufficient deterrence for anyone considering impersonation fraud. He believes absentee ballot fraud should be addressed by requiring those voters to produce ID as well, as under HAVA.

His personal preference would be signature comparison. Indiana has never encountered an instance of someone trying to forge a name in the poll book, and while this leaves
open the prospect of dead voters, that danger will be substantially diminished by the statewide database. But if we are going to have some form of ID, he believes we should apply it to everyone and avoid disenfranchisement, provided they swear an affidavit.
Interview with Neil Bradley, February 21, 2004

Voter Impersonation Cases (issue the Georgia ID litigation revolves around)

Mr. Bradley asserted that Georgia Secretary of State Cox stated in the case at issue: that she clearly would know if there had been any instances of voter impersonation at the polls; that she works very closely with the county and local officials and she would have heard about voter impersonation from them if she did not learn about it directly; and that she said that she had not heard of “any incident”---which includes acts that did not rise to the level of an official investigation or charges.

Mr. Bradley said that it is also possible to establish if someone has impersonated another voter at the polls. Officials must check off the type of voter identification the voter used. Voters without ID may vote by affidavit ballot. One could conduct a survey of those voters to see if they in fact voted or not.

The type of voter fraud that involves impersonating someone else is very unlikely to occur. If someone wants to steal an election, it is much more effective to do so using absentee ballots. In order to change an election outcome, one must steal many votes. Therefore, one would have to have lots of people involved in the enterprise, meaning there would be many people who know you committed a felony. It's simply not an efficient way to steal an election.

Mr. Bradley is not aware of any instance of voter impersonation anywhere in the country except in local races. He does not believe it occurs in statewide elections.

Voter fraud and intimidation in Georgia

Georgia's process for preventing ineligible ex-felons from casting ballots has been improved since the Secretary of State now has the power to create the felon purge list. When this was the responsibility of the counties, there were many difficulties in purging felons because local officials did not want to have to call someone and ask if he or she was a criminal.

The State Board of Elections has a docket of irregularity complaints. The most common involve an ineligible person mailing in absentee ballots on behalf of another voter.

In general, Mr. Bradley does not think voter fraud and intimidation is a huge problem in Georgia and that people have confidence in the vote. The biggest problems are the new ID law; misinformation put out by elections officials; and advertisements that remind people that vote fraud is a felony, which are really meant to be intimidating. Most fraud that does occur involves an insider, and that's where you find the most prosecutions. Any large scale fraud involves someone who knows the system or is in the courthouse.

Prosecution of Fraud and Intimidation
Mr. Bradley stated that fraud and intimidation are hard to prosecute. However, Mr. Bradley made contradictory statements. When asked whether the decision to prosecute on the county level was politically motivated, he first said "no." Later, Mr. Bradley reversed himself stating the opposite.

Mr. Bradley also stated that with respect to US Attorneys, the message to them from the top is that this is not a priority. The Georgia ACLU has turned over information about violations of the Voting Rights Act that were felonies, and the US Attorney has done nothing with the information. The Department of Justice has never been very aggressive in pursuing cases of vote suppression, intimidation and fraud. But, the Georgia ACLU has not contacted Craig Donsanto in DC with information of voter fraud.

Mr. Bradley believes that voter fraud and intimidation is difficult to prove. It is very hard to collect the necessary factual evidence to make a case, and doing so is very labor-intensive.

Recommendations

In Georgia, the Secretary of State puts a lot of work into training local officials and poll workers, and much of her budget is put into that work. Increased and improved training of poll workers, including training on how to respectfully treat voters, is the most important reform that could be made.

Mr. Bradley also suggested that increased election monitoring would be helpful.
Interview with Commissioner Harry Van Sickle and Deputy Chief Counsel to the Secretary of State Larry Boyle, State of Pennsylvania

March 1, 2006

As Commissioner Van Sickle has only been in office for about a year, Mr. Boyle answered most of our questions.

Fraud and Intimidation

Neither Van Sickle nor Boyle was aware of any fraud of any kind in the state of Pennsylvania over the last five years. They are not aware of the commission of any deceptive practices, such as flyers that intentionally misinform as to voting procedures. They also have never heard of any incidents of voter intimidation. With respect to the mayoral election of 2003, the local commission would know about that.

Since the Berks County case of 2003, where the Department of Justice found poll workers who treated Latino voters with hostility among other voting rights violations, the Secretary’s office has brought together Eastern Pennsylvania election administrators and voting advocates to discuss the problems. As a result, other counties have voluntarily chosen to follow the guidance of the Berks County federal court order.

Regarding the allegations of fraud that surrounded the voter identification debate, Mr. Boyle said was not aware of any instances of fraud involving identity. He believes this is because Pennsylvania has laws in place to prevent this. For example, in 2002 the state legislature passed an ID law that is stricter than HAVA’s – it requires all first time voters to present identification. In addition, the SURE System – the state’s statewide voter registration database – is a great anti-fraud mechanism. The system will be in place statewide in the May 2006 election.

In addition, the state took many steps before the 2004 election to make sure it would be smooth. They had attorneys in the counties to consult on problems as well as staff at the central office to take calls regarding problems. In addition, in 2004 the state used provisional ballots for the first time. This resolved many of the problems that used to occur on Election Day.

Mr. Boyle is not aware of any voter registration fraud. This is because when someone registers to vote, the administrator does a duplicate check. In addition, under new laws a person registering to vote must provide their drivers license or Social Security number which are verified through the Department of Motor Vehicles and the Social Security Administration. Therefore, it would be unlikely that someone would be able to register to vote falsely.

Process
Most problems are dealt with at the local level and do not come within the review of the Secretary of State’s office. For instance, if there is a complaint of intimidation, this is generally dealt with by the county courts which are specially designated solely to election cases on Election Day. The Secretary does not keep track of these cases. Since the passage of NVRA and HAVA counties will increasingly call the office when problems arise.

Recommendations
Mr. Boyle suggested we review the recommendations of the Pennsylvania Election Reform Task Force which is on the Secretary’s website. Many of those recommendations have been introduced in the legislature.
Interviews

Common Themes

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.

- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, “dead” voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud, although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.

- Several people indicate -- including representatives from DOJ -- that for various reasons, the Department of Justice is bringing fewer voter intimidation and suppression cases now and is focusing on matters such as noncitizen voting, double voting and felon voting. While the civil rights section continues to focus on systemic patterns of malfeasance, the public integrity section is focusing now on individuals, on isolated instances of fraud.

- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA -- done well, a major caveat -- will reduce this problem dramatically.
Common Recommendations:

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.
  - With respect to the civil rights section, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one’s definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and the section has not pursued any such cases.
  - Craig Donsanto of the public integrity section says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases the department is investigating and the number of indictments the section is pursuing are both up dramatically. Since 2002, the department has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so it can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama’s “deceptive practices” bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected nonpartisanly they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas is a problem that must be addressed in some fashion. Suggestions included moving
election responsibilities out of the secretary of states’ office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots “for cause” only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the scheme contemplated in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines.
Interview with Wade Henderson, Executive Director, Leadership Conference for Civil Rights

February 14, 2006

Data Collection

Mr. Henderson had several recommendations as to how to better gather additional information and data on election fraud and intimidation in recent years. He suggested interviewing the following individuals who have been actively involved in Election Protection and other similar efforts:

- Jon Greenbaum, Lawyers Committee for Civil Rights
- Tanya Clay, People for the American Way
- Melanie, Campbell, National Coalition for Black Political Participation
- Larry Gonzalez, National Association of Latino Election Officers
- Jacqueline Johnson, National Congress of American Indians
- Chellie Pingree, Common Cause
- Jim Dickson, disability rights advocate
- Mary Berry, former Chair of the US Commission on Civil Rights, currently at the University of Pennsylvania
- Judith Browne and Eddie Hailes, Advancement Project (former counsel to the US Commission on Civil Rights)
- Robert Rubin, Lawyers Committee for Civil Rights – San Francisco Office
- Former Senator Tom Daschle (currently a fellow at The Center for American Progress)

He also recommended we review the following documents and reports:

- The 2004 litigation brought by the Advancement Project and SEIU under the 1981 New Jersey Consent Decree
- Forthcoming LCCR state-by-state report on violations of the Voting Rights Act
- Forthcoming Lawyers Committee report on violations of the Voting Rights Act (February 21)

Types of Fraud and Intimidation Occurring

Mr. Henderson said he believed that the kinds of voter intimidation and suppression tactics employed over the last five years are ones that have evolved over many years. They are sometimes racially based, sometimes based on partisan motives. He believes the following types of activity have actually occurred, and are not just a matter of anecdote and innuendo, and rise to the level of either voter intimidation or vote suppression:

- Flyers with intentional misinformation, such as ones claiming that if you do not have identification, you cannot vote, and providing false dates for the election
- Observers with cameras, which people associate with potential political retribution or even violence
• Intimidating police presence at the polls
• Especially in jurisdictions that authorize challenges, the use of challenge lists and challengers goes beyond partisanship to racial suppression and intimidation
• Unequal deployment of voting equipment, such as occurred in Ohio. Also, he has seen situations in which historically Black colleges will have one voting machine while other schools will have more.

Mr. Henderson believes that these matters are not pursued formally because often they involve activities that current law does not reach. For example, there is no law prohibiting a Secretary of State from being the head of a political campaign, and then deploying voting machines in an uneven manner. There is no way to pursue that. Also, once the election is over, civil litigation becomes moot. Finally, sometimes upon reflection after the campaign, some of the activities are not as sinister as believed at the time.

Mr. Henderson believes government does not engage in a sustained investigation of these matters or pursue any kind of resolution to them. LCCR has filed a FOIA request with both the Civil Rights Division and the Criminal Division of the Department of Justice to examine this issue.

Election Protection activities will be intensified for the 2006 elections, although the focus may shift somewhat given the implementation of new HAVA requirements.

Recommendations for Reform

There was tremendous concern after the 2004 election about conflicts of interest – the “Blackwell problem” – whereby a campaign chair is also in charge of the voting system. We need to get away from that.

He also supports Senator Barak Obama’s bill regarding deceptive practices, and is opposed to the voter identification laws passing many state legislatures.

• States should adopt election-day registration, in order to boost turnout as well as to allow eligible voters to immediately rectify erroneous or improperly purged registration records
• Expansion of early voting & no-excuse absentee voting, to boost turnout and reduce the strain on election-day resources.
• Provisional ballot reforms:
  o Should be counted statewide – if cast in the wrong polling place, votes should still be counted in races for which the voter was eligible to vote (governor, etc.)
  o Provisional ballots should also function as voter registration applications, to increase the likelihood that voters will be properly registered in future elections
• Voter ID requirements: states should allow voters to use signature attestation to establish their identity
• The Department of Justice should increase enforcement of Americans with Disabilities Act and the accessibility requirements of the Help America Vote Act
• Statewide registration databases should be linked to social service agency databases
• Prohibit chief state election officials from simultaneously participating in partisan electoral campaigns within their states
• Create and enforce strong penalties for deceptive or misleading voting practices
Prosecution Of Electoral Fraud Under United States Federal Law

By Craig Donsanto

In Prosecution of Electoral Fraud, Donsanto discusses what sort of conduct is currently considered to be actionable as vote fraud, the historical background for the role of the criminal prosecutor in this area, and the various federal laws and juridical precedents governing the prosecution of vote fraud. It is a very useful document for understanding the current Department of Justice’s view of its mission in this area, its interpretation of the federal laws governing its work, and how the Department has and has not been able to utilize applicable provisions.

Donsanto stresses that because electoral administration is primarily a state rather than a federal matter, the federal government usually only has authority over electoral issues where: federal candidates are standing for election; a corrupt act occurs; a federal instrumentality is employed in the fraud; the fraud involves the participation of public officials “acting under color of law” in such a manner that the constitutional right to Due Process and/or Equal Protection is violated; and/or the fraud is motivated by an intent to deprive a class of voters who’s rights have been specifically guaranteed by the United States Constitution.

Donsanto defines election fraud as “a substantive irregularity relating to the voting act—such as bribery, intimidation, or forgery—which has the potential to taint the election itself.” Specifically, this includes:

* Preventing voters from participating in elections where a federal candidate is on the ballot, or when done “under color of law” in any election—18 U.S.C. sections 241 & 242.

* Vote buying, 42 U.S.C. section 1973i(e).

* Voting more than once, 42 U.S.C. section 1973i(e).

* Intimidating voters through physical duress in any election, 18 U.S.C. section 245(b)(1)(A), or through physical or economic threats in connection with their registering to vote or their voting in federal elections, 42 U.S.C. section 1973gg-10, or to vote for a federal candidate, 18 U.S.C. section 594.

* Malfeasance by election officials acting “under color of law” for actions such as ballot-box stuffing, falsely tabulating votes, or preventing valid voter registrations or votes from being given effect in any election, 18 U.S.C. sections 241 & 242, as well as in elections where federal candidates are on the ballot, 42 U.S.C. sections 1973i(e), 1973i(e) & 1973gg-10.
* Submitting fictitious names on voter registration roles, 42 U.S.C. sections 1973i(c) & 1973gg-10.

* Knowingly procuring eligibility to vote for federal office by persons who are not entitled to vote under applicable state law, 42 U.S.C. sections 1973i(c) & 1973gg-10 (criminal voting—prohibited in approximately 40 states) and 42 U.S.C. sections 1973i(c), 1972gg-10, 18 U.S.C. 1015(f) & 611 (non-citizen voting).

* Knowingly making a false claim of United States citizenship to register to vote in any election, 18 U.S.C. section 1015(f), or falsely claiming United States citizenship for registering or voting in any election, 18 U.S.C. section 911.

* Providing false information concerning a person’s name, address or period of residence in a district in order to establish that person’s eligibility to register or to vote in a federal election, 42 U.S.C. sections 1973i(c) & 1973gg-10.

* Causing the production of voter registrations that qualify alleged voters to vote for federal candidates, or the production of ballots in federal elections, that the actor knows are materially defective under applicable state law, 42 U.S.C. section 1973gg-10.

* Using the United States mails, or interstate wire facilities, to obtain the salary and emoluments of an elected official through any of the activities mentioned above, 18 U.S.C. sections 1341 & 1343.

* Ordering, keeping or having under one’s authority or control any troops or armed men at any polling place in any election. The actor must be an active civilian or military officer or an employee of the United States government, 18 U.S.C. section 592.

* Intimidating or coercing a federal employee to induce or discourage “any political activity” by that employee, 18 U.S.C. section 610.

Other Points of Interest

- Most election fraud is aimed at corrupting elections for local offices, which control or influence patronage positions. Election fraud occurs most frequently where there are fairly equal political factions, and where the stakes involved in who controls public offices are weighty -- as is often the case where patronage jobs are a major source of employment, or where illicit activities are being protected from law enforcement scrutiny.

- Vote buying offenses have represented a sizable segment of the federal election crime docket in modern times.

- Voter intimidation requires proof of a difficult element: the existence of physical or economic intimidation that is intended by the defendant and felt by the victim. The crime of voter "intimidation" normally requires evidence of threats, duress, economic coercion, or some other aggravating factor which tends to improperly induce conduct on the part of the victim. If such evidence is lacking, an
alternative prosecutive theory may apply to the facts, such as multiple voting in violation of 42 U.S.C. ' 1973i(e). As with other statutes addressing voter intimidation, in the absence of any jurisprudence to the contrary, it is the Criminal Division’s position that section 1973gg-10(1) applies only to intimidation that is accomplished through the use of threats of physical or economic duress. Voter “intimidation” accomplished through less drastic means may present violations of the Voting Rights Act, 42 U.S.C. § 1973i(b), which are enforced by the Civil Rights Division through noncriminal remedies.

- Section 1973gg-10(2) is a specific intent offense. This means that the offender must have been aware that citizenship is a requirement for voting and that the registrant did not possess United States citizenship. In most instances, proof of the first element is relatively easy because the citizenship requirement is stated on the voter registration form, and the form requires that the voter check a box indicating that he or she is a citizen. Proof of the second element, however, may be more problematic, since the technicalities of acquiring United States citizenship may not have existed in the culture of the registrant’s country of birth, or otherwise been evident to him, and because the registrant may have received bad advice concerning the citizenship requirement. These issues can also usually be overcome by the fact that all voter registration forms now require a registrant to certify that he or she is a citizen. Section 611 is a relatively new statute that creates an additional crime for voting by persons who are not United States Citizens. It applies to voting by non-citizens in an election where a federal candidate is on the ballot, except when: (1) non-citizens are authorized to vote by state or local law on non-federal candidates or issues, and (2) the ballot is formatted in a way that the non-citizen has the opportunity to vote solely for the non-federal candidate or issues on which he is entitled to vote under state law. Unlike section 1015(f), section 611 is directed at the act of voting, rather than the act of lying. But unlike section 1015(f), Section 611 is a strict liability offense in the sense that the prosecution must only prove that the defendant was not a citizen when he registered or voted. Section 611 does not require proof that the offender be aware that citizenship is a prerequisite to voting.
Interview with Douglas Webber, Assistant Attorney General, Indiana

February 15, 2006

Background
Mr. Webber was an attorney for the Marion County Election Board and was also part of the Indianapolis Ballot Security Team (sometimes called the Goon Squad). This Team was a group of attorneys well trained in election law whose mission was to enforce ballot security.

Litigation
Status of litigation in Indiana: On January 12 the briefing was completed. The parties are waiting for a decision from the U.S. district judge. The judge understood that one of the parties would seek a stay from the 7th Circuit Court of Appeals. The parties anticipate a decision in late March or early April. Mr. Webber did the discovery and depositions for the litigation. Mr. Webber feared the plaintiffs were going to state in their reply brief that HAVA’s statewide database requirement would resolve the problems alleged by the state. However, the plaintiffs failed to do so, relying on a Motor Voter Act argument instead. Mr. Webber believes that the voter ID at issue will make the system much more user-friendly for the poll workers. The Legislature passed the ID legislation, and the state is defending it, on the basis of the problem of the perception of fraud.

Incidents of fraud and intimidation
Mr. Webber thinks that no one can put his or her thumb on whether there has been voter fraud in Indiana. For instance, if someone votes in place of another, no one knows about it. There have been no prosecuted cases of polling place fraud in Indiana. There is no recorded history of documented cases, but it does happen. In the litigation, he used articles from around the country about instances of voter fraud, but even in those examples there were ultimately no prosecutions, for example the case of Milwaukee. He also stated in the litigation that there are all kinds of examples of dead people voting--totaling in the hundreds of thousands of votes across the country.

One interesting example of actual fraud in Indiana occurred when a poll worker, in a poll using punch cards, glued the chads back and then punched out other chads for his candidate. But this would not be something that would be addressed by an ID requirement.

He also believes that the perception that the polls are loose can be addressed by the legislature. The legislature does not need to wait to see if the statewide database solve the problems and therefore affect the determination of whether an ID requirement is necessary. When he took the deposition of the Republican Co-Director, he said he thought Indiana was getting ahead of the curve. That is, there have been problems around the country, and confidence in elections is low. Therefore Indiana is now in front of getting that confidence back.
Mr. Webber stated that the largest vote problem in Indiana is absentee ballots. Absentee ballot fraud and vote buying are the most documented cases. It used to be the law that applications for absentee ballots could be sent anywhere. In one case absentee votes were exchanged for "a job on election day"—meaning one vote for a certain price. The election was contested and the trial judge found that although there was vote fraud, the incidents of such were less than the margin of victory and so he refused to overturn the election. Mr. Webber appealed the case for the state and argued the judge used the wrong statute. The Indiana Supreme Court agreed and reversed. Several people were prosecuted as a result—those cases are still pending.

Process
In Indiana, voter complaints first come to the attorney for the county election board who can recommend that a hearing be held. If criminal activity was found, the case could be referred to the county prosecutor or in certain instances to the Indiana Attorney General's Office. In practice, the Attorney General almost never handles such cases.

Mr. Webber has had experience training county election boards in preserving the integrity and security of the polling place from political or party officials. Mr. Webber stated that the Indiana voter rolls need to be culled. He also stated that in Southern Indiana a large problem was vote buying while in Northern Indiana a large problem was based on government workers feeling compelled to vote for the party that gave them their jobs.

Recommendations
- Mr. Webber believes that all election fraud and intimidation complaints should be referred to the Attorney General's Office to circumvent the problem of local political prosecutions. The Attorney General should take more responsibility for complaints of fraud because at the local level, politics interferes. At the local level, everyone knows each other, making it harder to prosecute.
- Indiana currently votes 6 am to 6 pm on a weekday. Government workers and retirees are the only people who are available to work the polls. Mr. Webber suggested that the biggest change should be to move elections to weekends. This would involve more people acting as poll workers who would be much more careful about what was going on.
- Early voting at the clerk's office is good because the people there know what they are doing. People would be unlikely to commit fraud at the clerk's office. This should be expanded to other polling places in addition to that of the county clerk.
- Finally, Mr. Webber believes polling places should be open longer, run more professionally but that there needs to be fewer of them so that they are staffed by only the best, most professional people.
Interview with Kevin Kennedy, State Elections Director, State of Wisconsin

April 11, 2006

Background

Kennedy is a nonpartisan, appointed official. He has been in this position since 1983.

Complaints of fraud and intimidation do not usually come to Kennedy’s office. Kennedy says that complainants usually take their allegations to the media first because they are trying to make a political point.

2004 Election Incidents of Fraud

The investigations into the 2004 election uncovered some cases of double voting and voting by felons who did not know they were not eligible to vote, but found no concerted effort to commit fraud. There have been a couple of guilty pleas as a result, although not a number in the double digits. The task force and news reports initially referred to 100 cases of double voting and 200 cases of felon voting, but there were not nearly that many prosecutions. Further investigation since the task force investigation uncovered that in some instances there were mis-marks by poll workers, fathers and sons mistaken for the same voter, and even a husband and wife marked as the same voter. The double votes that are believed to have occurred were a mixture of absentee and polling place votes. It is unclear how many of these cases were instances of voting in two different locations.

In discussing the case from 2000 in which a student claimed – falsely – that he had voted several times, Kennedy said that double voting can be done. The deterrent is that it’s a felony, and that one person voting twice is not an effective way to influence an election. One would need to get a lot of people involved for it to work.

The task force set up to investigate the 2004 election found a small number of illegal votes but given the 7,000 alleged, it was a relatively small number. There was no pattern of fraud.

The one case Kennedy could recall of an organized effort to commit fraud was in the spring of 2003 or 2004. A community service agency had voters request that absentee ballots be sent to the agency instead of to the voters and some of those ballots were signed without the voters’ knowledge. One person was convicted, the leader of the enterprise.

In Milwaukee, the main contention was that there were more ballots than voters. However, it was found that the 7,000 vote disparity was tied to poll worker error. The task force found that there was no concerted effort involved. Kennedy explained that there are many ways a ballot can get into a machine without a voter getting a number. These include a poll worker forgetting to give the voter one; someone does Election Day registration and fills out a registration form but does not get a number because the
transaction all takes place at one table; and in Milwaukee, 20,000 voters who registered were not put on the list in time and as a short term solution the department sent the original registration forms to the polling places to be used instead of the list to provide proof of registration. This added another element of confusion that might have led to someone not getting a voter number.

The Republican Party used this original list and contracted with a private vendor to do a comparison with the U.S. postal list. They found initially that there were 5,000 bad addresses, and then later said there were 35,000 illegitimate addresses. When the party filed a complaint, the department told them they could force the voters on their list to cast a challenge ballot. On Election Day, the party used the list but found no actually voting from those addresses. Kennedy suspects that the private vendor made significant errors when doing the comparison.

In terms of noncitizen voting, Kennedy said that there is a Russian community in Milwaukee that the Republican Party singles out every year but it doesn’t go very far. Kennedy has not seen much in the way of allegations of noncitizen voting.

However, when applying for a drivers license, a noncitizen could register to vote. There is no process for checking citizenship at this point, and the statewide registration database will not address this. Kennedy is not aware of any cases of noncitizen voting as a result, but it might have happened.

Kennedy said that the biggest concern seemed to be suspicions raised when groups of people are brought into the polling site from group homes, usually homes for the disabled. There are allegations that these voters are being told how to vote.

Incidents of Voter Intimidation

In 2004, there was a lot of hype about challenges, but in Wisconsin, a challenger must articulate a basis under oath. This acts as a deterrent, but at the same time it creates the potential that someone might challenge everyone and create long lines, keeping people from voting. In 2004, the Republican Party could use its list of suspect addresses as a legitimate basis for challenges, so there is the potential for abuse. It is also hard to train poll workers on that process. In 2004, there were isolated cases of problems with challengers.

In 2002, a flyer was circulated only in Milwaukee claiming that you had vote by noon. This was taken as an intimidation tactic by the Democrats.

Reforms

Wisconsin has had difficulty with its database because 1) they have had a hard time getting a good product out of the vendor and 2) until now there was no registration record for one-quarter of the voters. Any jurisdiction with fewer than 5000 voters was not required to have a registration list.
In any case, once these performance issues are worked out, Kennedy does believe the statewide voter registration database will be very valuable. In particular, it will mean that people who move will not be on more than one list anymore. It should also address the double voting issue by identifying who is doing it, catching people who do it, and identifying where it could occur.

**Recommendations**

Better trained poll workers  
Ensure good security procedures for the tabulation process and more transparency in the vote counting process  
Conduct post-election audits
Interview with Sarah Bell Johnson

April 19, 2006

Procedures for Handling Fraud

Fraud complaints are directed first to the state Board of Elections. Unlike boards in other states, Kentucky’s has no investigative powers. Instead, they work closely with both the Attorney General and the U.S. Attorney. Especially since the current administration took office, they have found the U.S. Attorney an excellent partner in pursuing fraud cases, and have seen many prosecutions in the last six years. She believes that there has been no increase in the incidence of fraud, but rather the increase in prosecutions is related to increased scrutiny and more resources.

Major Types of Fraud and Intimidation

Johnson says that vote buying and voter intimidation go hand in hand in Kentucky. While historically fraud activity focused on election day, in the last 20 years it has moved into absentee voting. In part, this is because new voting machines aren’t easy to manipulate in the way that paper ballots were open to manipulation in the past, especially in distant rural counties. For this reason, she is troubled by the proliferation of states with early voting, but notes that there is a difference between absentee ballot and early voting on machines, which is far more difficult to manipulate.

Among the cases of absentee ballot fraud they have seen, common practice involves a group of candidates conspiring together to elect their specific slate. Nursing homes are an especially frequent target. Elderly residents request absentee ballots, and then workers show up and ‘help’ them vote their ballots. Though there have been some cases in the Eastern district of election day fraud, most have been absentee.

Johnson argues that it is hard to distinguish between intimidation and vote buying. They have also seen instances where civic groups and church groups intimidate members to vote in a specific manner, not for reward, but under threat of being ostracized or even telling them they will go to hell.

While she is aware of allegations of intimidation by the parties regarding minority precincts in Louisville, the board hasn’t received calls about it and there haven’t been any prosecutions.

Challengers

Challengers are permitted at the polls in Kentucky. Each party is allowed two per location, and they must file proper paperwork. There is a set list of defined reasons for which they can challenge a voter, such as residency, and the challengers must also fill out paperwork to conduct a challenge.
As for allegations of challengers engaging in intimidation in minority districts, Johnson notes that challengers did indeed register in Jefferson County, and filed the proper paperwork, although they ultimately did not show up on election day.

She finds that relatively few challengers end up being officially registered, and that the practice has grown less common in recent years. This is due more to a change of fashion than anything. And after all, those wishing to affect election outcomes have little need for challengers in the precinct when they can target absentee voting instead.

In the event that intimidation is taking place, Kentucky has provisions to remove disruptive challengers, but this hasn’t been used to her knowledge.

Prosecutions

Election fraud prosecutions in Kentucky have only involved vote buying. This may be because that it is easier to investigate, by virtue of a cash and paper trail which investigators can follow. It is difficult to quantify any average numbers about the practice from this, due in part to the five year statute of limitations on vote buying charges. However, she does not believe that vote-buying is pervasive across the state, but rather confined to certain pockets.

Vote-hauling Legislation

Vote hauling is a common form of vote buying by another name. Individuals are legally paid to drive others to the polls, and then divide that cash in order to purchase votes. Prosecutions have confirmed that vote hauling is used for this purpose. While the Secretary of State has been committed to legislation which would ban the practice, it has failed to pass in the past two sessions.

Paying Voter Registration Workers Legislation

A law forbidding people to pay workers by the voter registration card or for obtaining cards with registrations for a specific party was passed this session. Individuals working as part of a registration campaign may still be paid by hour. Kentucky’s experience in the last presidential election illustrates the problems arising from paying individuals by the card. That contest included a constitutional amendment to ban gay marriage on the ballot, which naturally attracted the attention of many national groups. One group paying people by the card resulted in the registrar being inundated with cards, including many duplicates in the same bundle, variants on names, and variants on addresses. As this practice threatens to overwhelm the voter registration process, Kentucky views it as constituting malicious fraud.

Deceptive practices

Other than general reports in the news, Johnson hasn’t received any separate confirmation or reports of deceptive practices, i.e., false and misleading information being distributed to confuse voters.
Effect of Kentucky’s Database

Johnson believes Kentucky’s widely praised voter registration database is a key reason why the state doesn’t have as much fraud as it might, especially the types alleged elsewhere like double and felon voting. While no database is going to be perfect, the connections with other state databases such as the DMV and vital statistics have been invaluable in allowing them to aggressively purge dead weight and create a cleaner list. When parties use their database list they are notably more successful. Johnson wonders how other states are able to conduct elections without a similar system.

Some factors have made especially important to their success. When the database was instituted in 1973, they were able to make everyone in the state re-register and thus start with a clean database. However, it is unlikely any state could get away with this today.

She is also a big supporter of a full Social Security number standard, as practiced in Kentucky. The full Social Security, which is compared to date of birth and letters in the first and last name, automatically makes matching far more accurate. The huge benefits Kentucky has reaped make Johnson skeptical of privacy concerns arguing for an abbreviated Social Security number. Individuals are willing to submit their Social Security number for many lesser purposes, so why not voting? And in any event, they don’t require a Social Security number to register (unlike others such as Georgia). Less than a percent of voters in Kentucky are registered under unique identifiers, which the Board of Elections then works to fill in the number through cross referencing with the DMV.

Recommendations

Johnson believes the backbone of effective elections administration must be standardized procedures, strong record keeping, and detailed statutes. In Kentucky, all counties use the same database and the same pre election day forms. Rather than seeing that as oppressive, county officials report that the uniformity makes their jobs easier.

This philosophy extends to the provisional ballot question. While they did not have a standard in place like HAVA’s at the time of enactment, they worked quickly to put a uniform standard in place.

They have also modified forms and procedures based on feedback from prosecutors. Johnson believes a key to enforcing voting laws is working with investigators and prosecutors and ensuring that they have the information they need to mount cases.

She also believes public education is important, and that the media could do more to provide information about what is legal and what is illegal. Kentucky tries to fulfill this role by information in polling places, press releases, and high profile press conferences before elections. She notes that they deliberately use language focusing on fraud and intimidation.

Johnson is somewhat pessimistic about reducing absentee ballot fraud. Absentee ballots do have a useful function for the military and others who cannot get to the polling place, and motivated
individuals will always find a way to abuse the system if possible. At a minimum, however, she recommends that absentee ballots should require an excuse. She believes this has helped reduce abuse in Kentucky, and is wary of no-excuse practices in other states.
Methodology suggestions

In analyzing instances of alleged fraud and intimidation, we should look to criminology as a model. In criminology, experts use two sources: the Uniform Crime Reports, which are all reports made to the police, and the Victimization Survey, which asks the general public whether a particular incident has happened to them. After surveying what the most common allegations are, we should conduct a survey of the general public that asks whether they have committed certain acts or been subjected to any incidents of fraud or intimidation. This would require using a very large sample, and we would need to employ the services of an expert in survey data collection. Mr. Ansolobohere recommended Jonathan Krosnick, Doug Rivers, and Paul Sniderman at Stanford; Donald Kinder and Arthur Lupia at Michigan; Edward Carmines at Indiana; and Phil Tetlock at Berkeley. In the alternative, Mr. Ansolobohere suggested that the EAC might work with the Census Bureau to have them ask different, additional questions in their Voter Population Surveys.

Mr. Chandler further suggested it is important to talk to private election lawyers, such as Randall Wood, who represented Ciro Rodriguez in his congressional election in Texas. Mr. Ansolobohere also recommended looking at experiments conducted by the British Election Commission.

Incidents of Fraud and Intimidation

Mr. Davidson's study for the Lawyers Committee for Civil Rights on the Voting Rights Act documented evidence of widespread difficulty in the voting process. However, he did not attempt to quantify whether this was due to intentional, malevolent acts. In his 2005 report on ballot security programs, he found that there were many allegations of fraud made, but not very many prosecutions or convictions. He saw many cases that did go to trial and the prosecutors lost on the merits.

In terms of voter intimidation and vote suppression, Mr. Davidson said he believes the following types of activities do occur: videotaping of voters' license plates; poll workers asking intimidating questions; groups of officious-looking poll watchers at the poll sites who seem to be some sort of authority looking for wrongdoing; spreading of false information, such as phone calls, flyers, and radio ads that intentionally mislead as to voting procedures.

Mr. Ansolabohere believes the biggest problem is absentee ballot fraud. However, many of these cases involve people who do not realize what they are doing is illegal, for example, telling someone else how to vote. Sometimes there is real illegality occurring however. For example, vote selling involving absentee ballots, the filling out of absentee ballots en masse, people at nursing homes filling out the ballots of residents, and there are stories about union leaders getting members to vote a certain way by absentee ballot. This
problem will only get bigger as more states liberalize their absentee ballot rules. Mr. Chandler agreed that absentee ballot fraud was a major problem.

**Recommendations**

Go back to “for cause” absentee ballot rules, because it is truly impossible to ever ensure the security of a mail ballot. Even in Oregon, there was a study showing fraud in their vote by mail system.

False information campaigns should be combated with greater voter education. Los Angeles County’s voter education program should be used as a model.
Preliminary Findings of Joint Task Force Investigating Possible Election Fraud: May 10, 2005

On January 26, 2005, the Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, and the United States Attorney’s Office formed a task force to investigate alleged voting irregularities during the November 2004 elections. The purpose of the task force was to determine whether evidence of criminal fraud existed in the irregularities and, if evidence of fraud was found, to pursue criminal prosecutions.

The task force has made the following specific determinations based on evidence examined to date:

* evidence of more than 100 individual instances of suspected double-voting, voting in names of persons who likely did not vote, and/or voting in names believed to be fake. Those investigations continue;

* more than 200 felons voted when they were not eligible to do so. In order to establish criminal cases, the government must establish willful violations in individual instances;

* persons who had been paid to register voters as “deputy registrars” falsely listed approximately 65 names in order to receive compensation for the registrations. The evidence does not indicate that these particular false registrations were later used to cast votes; and,

* the number of votes counted from the City of Milwaukee exceeds the number of persons recorded as voting by more than 4,500.

The investigation concentrated on the 70,000+ same-day registrations. It found that a large majority of the reported errors were the result of data entry errors, such as street address numbers being transposed. However, the investigation also found more than 100 instances where votes were cast in a manner suggesting fraud. These include:

* persons with the same name and date of birth recorded as voting more than once;

* persons who live outside Milwaukee, but who used non-existent City addresses to register and vote in the City;

* persons who registered and voted with identities and addresses that cannot in any way be linked to a real person;

* persons listed as voting under a name and identity of a person known to be deceased; and

* persons whose identities were used to vote, but who in subsequent interviews told task force investigators that they did not, in fact, vote in the City of Milwaukee.
The investigation found persons who were paid money to obtain registrations allegedly falsified approximately 65 names on registration forms, allegedly to obtain more money for each name submitted. There is no evidence gathered to date that votes were cast under these specific false names. Also found were more than 200 felons who were not eligible to vote in the 2004 election, but who are recorded as having done so.

An additional finding of the task force was that the number of votes cast far exceeds the total number of recorded voters. The day after the 2004 election, the City of Milwaukee reported the total number of votes as 277,344. In late November an additional 191 previously uncounted absentee ballots were added, for a total of 277,535 votes cast. Still later, an additional 30 ballots were added, bringing the total number of counted votes to 277,565. City records, however, have been unable to match this total to a similar number of names of voters who cast ballots – either at the polls (under a prior registration or same day registration) or cast absentee ballots. At present, the records show a total of 272,956 voter names – for a discrepancy of 4,609. This part of the investigation was hampered by widespread record keeping errors with respect to recording the number of voters.

In the 2004 election, same-day registrations were accepted in which the card had incomplete information that would help establish identity. For example: 48 original cards for persons listed as voting had no name; 548 had no address; 28 did not have signatures; and another 23 cards had illegible information. These were part of approximately 1,300 same-day registrations for which votes were cast, but which election officials could not authenticate as proper voters within the City. Included in this 1,300 were 141 same-day registrants from addresses outside the City of Milwaukee, but who voted within the City of Milwaukee. In several instances, the voter explicitly listed municipality names other than Milwaukee on the registration cards.

Another record keeping procedure hampering the investigation appears to be the post-election misfiling or loss of original green registration cards that were considered duplicates, but that in fact corresponded to additional votes. These cards were used to record votes, but approximately 100 cards of interest to investigators can no longer be located. In addition, other original green registration cards continue to be found.
Donetta,

Enjoyed lunch. Here are three attachments you might be able to use on voter ID.

Plaintiffs,

v.

STATE OF MISSOURI,

Defendant.

CONSOLIDATED WITH
No. 06AC-CC00587
Division 2

AFFIDAVIT OF L. MARVIN OVERBY,
IN SUPPORT OF INTERVENORS, DALE L. MORRIS AND
MISSOURI SENATOR DELBERT SCOTT

COMES NOW L. Marvin Overby, and having been sworn on his oath, deposes and states as follows:

1. I am over 21 years of age and competent to make this Affidavit. If called as a witness in this action, I could testify to the matters contained in this affidavit from personal knowledge and would testify as set forth herein.
2. I am currently a full professor of political science at the University of Missouri in Columbia and I have attached a current and accurate summary of my academic and professional experience which is attached as Exhibit "A".

3. I have had occasion to review and am familiar with the provisions of the Missouri Voter Protection Act in its final enacted form, especially as such provisions concern the requirement that certain persons present the specified forms of identification before casting a ballot and also those provisions of the Missouri Voter Protection Act providing photo identification without cost.

4. I have collaborated with Jeffrey Milyo and conducted additional research into the effect of the photo identification requirements contained in the Missouri Voter Protection Act upon voter participation. I have further researched the effect that such photo identification requirements will have upon the ability of Missourians to participate in an election.

5. The conclusions that I have reached and a description of the analysis undertaken are summarized on the report attached to this affidavit as Exhibit "B".

6. My research into the Missouri Voter Protection Act and the voter identification requirements and related provisions contained therein supports three essential conclusions.

A. Our best estimate of the number of eligible Missouri voters that do not possess a Missouri Department of Revenue-issued photo ID and that are not residents of a facility licensed under chapter 198 is about 19,000 persons. Of these, about 6,000 are likely to desire a photo ID for the purpose of voting, based upon historic voter participation patterns.
B. The existing scholarly literature strongly suggests that voter photo ID requirements are not likely to have a significant effect on either voter participation or the outcome of elections, nor is such a photo ID requirement likely to have a significant or differential impact on poor, less educated or minority voters.

C. The existing scholarly literature does demonstrate that a significant percentage of citizens --- in Missouri and nationally --- lack confidence on the election process, a significant percentage of voters are concerned about vote fraud, and that significant majorities of voters from all political parties and racial groups support the requirement that a person provide a government-issued photo ID before casting a ballot.

FURTHER Affiant sayeth not.

John H. Leek Memorial Scholarship, Department of Political Science, University of Oklahoma, 1987 and 1988.
We have been asked by legal counsel in this case to i) evaluate the report by the Missouri Department of Revenue (DOR fiscal note 4947-01) on the number of eligible voters in Missouri who may not have a photo ID, ii) to discuss what the relevant scholarly literature implies about the effects of a photo ID requirement, and iii) to review the statistical analysis prepared by Dr. John Lott on the potential impact of the state of Missouri’s new photo ID requirements on voter turnout.

A summary of the basic findings is as follows:

1) The DOR fiscal note likely overstates the number of eligible voters in Missouri without a photo ID. Our best estimate of the number of eligible voters who do not possess a DOR-issued photo ID and are not residents under chapter 198 is about 19,000 persons; of these, about 6,000 are likely to desire a photo ID for the purpose of voting, based upon voter turnout patterns. Adding in persons who are residents under chapter 198 and may be eligible to apply for a no cost nondriver license brings this number up to about 8,000 persons.

2) The existing scholarly literature does not examine photo ID laws, but existing findings strongly suggest that voter photo identification requirements are not likely to have a significant effect on either voter turnout or the outcome of elections, nor is such a requirement likely to have a significant or differential impact on poor, less educated, or minority voters. Moreover, a review of survey data shows strong public support for photo IDs, indicating the probability that such requirements would enhance public confidence in the voting process and, perhaps, even increase voter turnout.

3) Dr. Lott’s analysis employs appropriate data and statistical methods; his findings accord with the relevant scholarly literature on voter turnout. Lott’s analysis is the best existing estimate of the likely impact of the new photo ID law on eligible voters in Missouri.
In the next section, we report on our qualifications. We then review the DOR fiscal note, the scholarly literature and the report by Dr. Lott, in turn.

1. Qualifications

Dr. Jeffrey Milyo is an associate professor in both the Truman School of Public Affairs and the Department of Economics at the University of Missouri in Columbia, Missouri. Dr. Milyo has been on the faculty of the Harris School of Public Policy at the University of Chicago, and has been a visiting scholar at the Massachusetts Institute of Technology, Yale University, and most recently, Stanford University. Milyo identifies himself as a Republican; his curriculum vitae is included in Appendix A.

Dr. Milyo's research specialty is in the area of statistical analyses of American political economy; his work has been published in a number of leading peer-reviewed journals, including the American Economic Review, the Quarterly Journal of Economics, the Journal of Law and Economics, the Journal of Policy Analysis and Management, the State Politics and Policy Quarterly and the Election Law Journal. He frequently serves as a peer-reviewer for the leading journals in economics and political science, including the American Political Science Review, the American Journal of Political Science, the Quarterly Journal of Political Science and the Journal of Politics.

Dr. Marvin Overby is a professor in the Department of Political Science at the University of Missouri in Columbia, Missouri. He has also served on the faculties of Loyola University-Chicago and the University of Mississippi, and has held visiting appointments at the University of Szeged (Hungary) and the Johns Hopkins University-Nanjing University Center for Chinese and American Studies (China). Overby identifies himself as a Democrat and has worked for a Democratic member of the U. S. of Representatives; his curriculum vitae is included in Appendix A.

Dr. Overby’s research focuses on statistical analyses of American politics, including issues of minority representation. His research has been published in a number of leading peer-reviewed journals, including the American Political Science Review, American Journal of Political Science, The Journal of Politics, Legislative Studies Quarterly, Political Research Quarterly, American Politics Research, Polity, State Politics and Policy Quarterly, and the Journal of Legislative Studies. He regularly reviews manuscripts for these journals, and his work and opinions have been cited in such media outlets as The Wall Street Journal, the Washington Post, The Boston Globe, the National Journal, the Economist, and Congressional Quarterly Weekly Report.

2. DOR Fiscal Note 4947-01

The Missouri Department of Revenue prepared a fiscal note estimating the anticipated cost of SB 1014 and undertook to estimate the number of eligible voters in Missouri who may be without photo ID as of June 14, 2006. (A copy of the fiscal note is attached as Appendix B.) The DOR fiscal note is an estimate of the cost of SB 1014 under a version of the legislation that was prior to the amendment providing an exemption from the photo...
identification requirement for voters born before 1941. This analysis of the legislation prior to the incorporation of the exemption means that the version of the DOR's estimate of costs and voters likely affected by the ID requirements will be greater than those actually affected by the law as enacted.

The DOR started with the U.S. Census estimate of voting age population (VAP) in Missouri in 2000, then subtracted the number of persons who were at least 23 years of age as of 2006 and had a DOR-issued photo ID. This latter figure is 3,998,304 persons; it is meant to be an estimate of the number of persons age 18 and older in 2000 with photo ID’s; however, this method ignores out-migration of younger persons and in-migration of older persons. It is unknown how these different sources of undercount and overcount net out. Further this estimate requires a projection of the photo-ID holding populations 5 years removed from the Census count. In general, the more distant the projected year from the base year, the less reliable will be any such projection.

As an alternative method of calculating the number of eligible voters not holding a DOR-issued photo ID, we prefer to make only a one-year out projection of VAP in 2006, and to utilize DOR’s actual count of persons holding DOR photo ID on August 10, 2006.

On August 4, 2006 the U.S. census released its most current estimate of VAP in Missouri as of July 1, 2005; that figure is 4,422,078 persons. However, this figure needs to be adjusted to match the August 10, 2006 date of the DOR count of persons with photo ID. We accomplish this by applying the annual growth rate from July 2004 to July 2005, which is approximately 0.0178, to yield an estimate of state VAP as of July 2006. We then pro-rate the annual growth rate to update this estimate to August 10, 2006; the resulting estimate of Missouri VAP is 4,509,790 persons. Subtracting the 4,458,726 persons known to hold DOR-issued photo ID as of August 10, 2006, yields an estimate of 51,064 voting age persons without DOR-issued photo-ID.

The DOR estimates that 31,152 VAP persons without photo-ID are also “residents under chapter 198 who are not likely to be physically able to ambulate to a polling place.” Of these persons, the DOR estimates that 2,077 will apply for a no cost non-driver license. We have no basis to dispute this estimate, so we adopt this DOR figure without amendment.

Given the above, the number of VAP who are not residents under chapter 198 and do not possess DOR-issued photo ID’s is (51,064 less 31,152), or 19,912 persons.

However, voting age population (VAP) overstates the voting eligible population (VEP) because it includes non-citizens, currently disenfranchised felons, persons who do not meet state residency requirements, and persons deemed mentally incompetent. For this reason, political scientists employ estimates of voting eligible state populations that exclude such ineligible voters; the best estimates of VEP that we know of are from the US Election Project and have been developed by Dr. Michael McDonald at George

Mason University in Fairfax, VA. The estimated VEP from this source corrects for non-citizens and disenfranchised felons only.

Based on the most current US Election Project data for 2006, the average ratio of VEP to VAP is approximately 0.97 (it is lower in earlier years); so we multiply 19,912 persons by this ratio, to yield an estimate of 19,315 voting eligible persons without photo-ID and not residents under chapter 198. Even so, this figure certainly overstates the number of such persons who would choose to vote, even absent the photo ID requirement.

For this reason, the DOR fiscal note adjusts its estimate downward by assuming that the state-wide average voter turnout rate of 50% (based on VAP) is a proxy for the proportion of persons who would desire a photo ID under the new requirements for the purposes of voting. Applying this adjustment to the VAP of persons without DOR-issued photo ID and not residents under chapter 198, leaves just 9,956 such persons whom we estimate would desire a photo ID in order to vote.

However, the population of individuals that does not possess a DOR-issued photo ID is typically assumed to be poor, less educated, and disproportionately composed of racial and ethnic minorities. It is well known in political science research that after correcting for income and education, race has little impact on voter turnout. For this reason, we focus on the lowest quintile of family income or persons without a high school education. Both of these groups exhibit turnout rates in the range of 30%-40% of VAP. Taking the midpoint of this range (i.e., 35%) and multiplying it by the VAP not possessing DOR-issued photo ID and not resident under chapter 198 leaves just 6,969 persons.

Even this final estimate of just under 7,000 persons is likely to be an overestimate. We have not taken into consideration that some small number of these persons will not meet residency requirements or that some small number may be mentally incompetent. Further, we have not considered that those persons without photo ID may be disproportionately likely to be non-citizens or disenfranchised felons, or may have even lower turnout rates than the lowest quintile of family income earners. In addition, some fraction of these persons will already possess a military ID, passport, or some other government-issued photo ID (which are not accounted for in the DOR figures) and would not require any additional identification in order to vote.

Further, approximately 13.5% of Missourians are over age 65; in 2006, persons age 65 and older may cast a provisional ballot without a photo ID. Therefore, as many as 941 persons (13.5% of 6,969) may feel no urgent need to obtain a new photo ID; this leaves about 6,028 persons who may be expected to desire a photo ID.

http://elections.gmu.edu/

Census 2000 Summary File 1 (SF 1) 100-Percent Data
Given this analysis, and adding back the DOR estimate of 2,077 persons who are residents under chapter 198 and may apply for a photo ID, we conclude that an upper-bound estimate for the number of persons who are eligible and may choose to obtain a new photo ID is 8,105 persons.

Recent news reports suggest that 1,400 persons have already received photo ID’s from the DOR. Given that this rate may increase as the election draws closer, the running count to date is reasonably in line with our estimate --- and stands in stark contrast to claims that hundreds of thousands of voters will need to obtain a photo ID. Such claims appear to be without a sound foundation.

2. Review of the Scholarly Literature

There are no systematic statistical studies of the effects of photo ID requirements for voting. This is despite the fact that most other countries both require such identification and experience higher rates of turnout than seen in the U.S. Comparative studies of voter turnout across countries focus on voter registration, the frequency of elections, non-compulsory voting, and single-member districts (as opposed to proportional representation) as reasons that turnout in the U.S. is low relative to other developed democracies. The fact that such cross country studies do not even entertain the possibility that photo ID requirements reduce turnout is itself informative about the opinion of the profession regarding the likely unimportance of such laws for turnout.

There are many studies that analyze the effects of other voting institutions on turnout. In general this literature finds modest effects of post-registration laws (e.g., time off work for voting, polls open early or late, mailing sample ballots, etc.). This is because voter registration is a relatively higher hurdle for most persons; adding or removing some marginal costs of voting beyond registration has virtually no observable effect on turnout.

Several studies find some negative effect of voter registration laws; however, a well-known study published in the lead journal of the American Political Science Association casts serious doubt on such claims, even arguing that: "what was thought to be a fact, namely that poorly educated persons are more deterred from voting by registration laws than well-educated persons, is not a fact." Further, recent work shows "even the most dramatic easing of voter registration costs" has only modest effects on number of voters and improvement in turnout among lower socioeconomic status groups.

---

In addition, empirical studies generally show only very modest influence of voter turnout on election results. Even under the most extreme assumptions (e.g. if everyone voted), increased turnout would rarely affect the outcome of an election.¹⁰

In fact, scholars of American politics generally agree that voter turnout is determined largely by idiosyncratic factors, such as an individual's intrinsic value of voting (i.e., does the individual feel a duty to vote).¹¹ For this reason, factors that influence trust and confidence in the integrity of the electoral process are generally thought to be important determinants of an individual's decision to vote.¹² Influential evidence on the importance of the intrinsic value of voting comes from field experiments in which individuals receive reminders about their civic duty to vote; the treatment effect of mailings and personal canvassing significantly increases voter turnout.¹³ Finally, while there is some debate, the best evidence suggests that negative advertising reduces voter turnout, primarily because of its detrimental effect on public trust in the political process.¹⁴

The evidence that public trust in the integrity of the electoral process strongly suggests that concerns about voter fraud may reduce voter turnout. There is broad agreement that there have been problems with voter fraud in Missouri, particularly St. Louis City. The extent of the problem has been the focus of testimony in both Washington and Jefferson City, and has been discussed in the academic literature.¹⁵ Furthermore, courts in Missouri have recognized the nature of this problem. In its decision in Missouri, ex. rel. Bush-Cheney 2000 Inc. v Baker the Missouri Court of Appeals held that “[c]ourts should not hesitate to vigorously enforce the election laws so that every properly registered voter has the opportunity to vote. But equal vigilance is required to ensure that only those entitled to vote are allowed to cast a ballot. Otherwise, the rights of those lawfully entitled to vote are inevitably diluted” (34 S.W. 3d 410, 413 [2000]).

Public opinion polls – both nationally and in Missouri – have consistently shown that a) a significant percentage of Americans lack confidence in the election process; and b) there

is widespread public support, across demographic and partisan divides, for the use of photo identification at polling places. Such findings have been reconfirmed recently by a survey by Rasmussen Poll, a copy of which is attached as Appendix C.

Relevant excerpts from the Rasmussen poll follow:

“A plurality of voters in each of 32 states agree that the political system in the U.S. is ‘badly broken.’ Percentages range from a high of 63% in Vermont to 47% in Nebraska, but all point in the same direction.”

“An earlier, national, survey found that just 48% of American adults believe that elections are generally fair to voters. That number has been fairly consistent since we began polling on the topic in the mid-90s.”

“There was little geographic difference on the question of whether individuals should be required to present photo identification (such as a driver’s license) when they go to the polls. Support for this approach ranged from 60% in Vermont to 92% in Florida. Maine was the only other state to register below the 73% level of support for requiring photo ID’s.”

“Discussions of voter fraud sometime revolve around assumptions of voter suppression—people who should be allowed to vote but are prevented from doing so. Other times, people express concern that people vote who are not eligible. In eighteen states, more voters are concerned to ineligible voters are allowed to cast ballots. In twelve states, more voters are concerned about people prevented from voting.”

“Voters in New York are more likely than in any other state to express a concern about voter suppression. Thirty-four percent (34%) of Empire State voters hold this view.”

“Washington and Arizona are tops when it comes to concerns about ineligible people casting ballots. In Washington, that may be the result of controversies in the election for Governor. In Arizona, it is more likely tied to concerns about illegal immigrants.”

Source: Rasmussen Poll (August 28, 2006); see Appendix C

Finally, a universal photo ID requirement would also obviate selective challenges that might be racially motivated, thereby increasing the equity of the voting experience.

16 A Wall Street Journal/NBC News poll conducted in April 2006 shows 62% of respondents nationwide were “strongly in favor” and 19% “somewhat in favor” of laws requiring “a valid photo identification” to vote. In sharp contrast, a mere 7% of respondents were “mildly” or “strongly opposed.” See online.wsj.com/public/resources/documents/poll20060426.pdf [accessed August 30, 2006].
Among other localities, such challenges have been documented in recent years in Arkansas. Some prominent African-American leaders (such as Andrew Young) have also supported mandatory photo IDs for voting because "requiring ID can help poor people' who otherwise might be even more marginalized by not having one."11

3. Report by Dr. John Lott

We have reviewed the report by Dr. Lott from August xx, 2006); we evaluated this work as we would do in the capacity of peer reviewers for a leading journal such as the Journal of Politics or the Journal of Law and Economics. Overall, we find the quality of the data and statistical analysis to be of the sort appropriate for a top academic journal. In addition, we note that the findings in Dr. Lott's analysis are consistent with our understanding of the implications of the existing scholarly literature on state institutions, public trust and voter turnout.

consulting, state data center charges, etc.) in the fiscal note response, have they been reviewed by the Office of Administration - Information Technology Services.

☐ Yes ☐ No (If no, why not?)

8. Will this legislation directly affect Total State Revenue? X Yes ☐ No
   (If yes, explain how.) Yes, see #12

9. Please summarize how this bill would affect your agency.

Section 115.427.7 –
- Requires DOR to issue a nondriver license and waive the fee required under subsection 7 of 302.181 to any applicant who signs an affidavit verifying they do not have any other form of photographic personal identification (nondriver license) that meets subsection 1, which basically requires the document to be issued by the United States or state of Missouri. In addition, DOR must design and provide the affidavit that is required.
- Requires DOR to provide access to a mobile voter processing system to obtain the photograph and signature to produce the nondriver license for individuals that are physically unable to otherwise visit contract offices, because they are residents of facilities licensed under chapter 198, RSMo and they a physician statement to that affect.
- The total cost for processing and issuing any nondriver license photo identification must be paid for by the state through an appropriation to the Department of Revenue.
- Local election authorities may assist the department in issuing nondriver license photo identifications.

10. Long-range implications.

11. If this is a REVISED Fiscal Estimate Worksheet, please explain reason for revision.
N/A

12. Assumptions and methodology used in arriving at state fiscal impact. (List all references, personnel, and expenses and equipment to be requested by program in the bill. Include specific duties and responsibilities for new employees listed.)

ADMINISTRATIVE IMPACT

Constitutional Amendment 3 (2004) authorizes 3% of highway funds to be used to offset the actual cost to collect such funds by the Department of Revenue.

For purposes of this fiscal note, the department of revenue assumes all costs will be appropriated from the general revenue fund. Through the appropriations process, the general assembly may appropriate the constitutionally permissible highway fund amount to offset the general revenue fund cost shown in this fiscal note.
The department assumes that based on the language as written it would affect residents of facilities licensed under chapter 198 and any individual who does not otherwise now have a nondriver license.

<table>
<thead>
<tr>
<th>41,536</th>
<th>Residents of facilities licensed under chapter 198 who are not likely to be physically able to ambulate to a polling site. <em>(based on statistics from the Department of Health and Senior Services as of January 11, 2006)</em></th>
</tr>
</thead>
<tbody>
<tr>
<td>x 5%</td>
<td>Estimated number of citizens who are eligible and may apply for a no cost nondriver license</td>
</tr>
<tr>
<td>2,077</td>
<td>Estimated annual nondriver licenses applicants</td>
</tr>
</tbody>
</table>

DOR assumes that field coordinators will provide mobile service to individuals that are physically unable to otherwise visit contract offices, because they are residents of facilities licensed under chapter 198, RSMo, who request a nondriver license photo identification and provide a physician's statement to such affect. Based on the estimated volume of applicants the department assumes that current staff levels will be sufficient to provide this service.

The department currently does not have *mobile* equipment to create a nondriver license; therefore, will incur costs for purchasing cameras and scanners to obtain the photographs and signatures required to produce the nondriver license. The photograph and signature will be electronically transmitted to the central office to create the nondriver license and to be mailed to the resident.

$ 300  Sony Cyber-Shot 7.2MP  
x 14  Field Coordinators  
$4,200

$ 200  Scanners  
x 14  Field Coordinators  
$2,800

Based on the current language as written the number of individuals who currently do not have a photographic personal identification would now be eligible for one at no cost, in addition the language can be interpreted to allow individuals who simply sign the affidavit even though they had or have an acceptable photographic personal identification to now obtain a nondriver at no cost.

The department used the Census for Missouri that showed 4,167,519 individuals 18 or older, then ran a program that indicates there are 3,998,304 individuals currently on the DOR system. Therefore, there are approximately 169,215 individuals who do not have a photographic personal identification.

REVENUE IMPACT

Because the language requires the nondriver license to be provided by the department to an applicant who signs an affidavit stating that they do not have any other form of photographic personal identification at no cost there will be a potential loss in revenue as indicated below.

This proposal has an emergency clause; therefore, it becomes effective the date the Governor signs the bill. For purposes of this fiscal the revenue decrease is calculated for a full twelve months of FY07.

FY07
2,077 Annual applicants for nondriver license from a chapter 198 residents
69,032 Applicants that have never had a nondriver license the will only apply the first year of implementation
+22,247 Annual applicants for new, renewal or duplicate
93,356 Estimated nondriver license
x $6 Nondriver license fee
$560,136 Total potential revenue decrease

FY08 & FY09
2,077 Annual applicants for nondriver license from a chapter 198 residents
+ 22,247 Annual applicants for new, renewal or duplicate.
24,324 Estimated nondriver license
x $6 Nondriver license fee
$145,944 Total potential revenue decrease

1* Should voters be required to show photo identification such as a driver's license before being allowed to vote?

2* Should election ballots be printed in English only or should they be printed in English and Spanish?

3* In most elections, are large numbers of people prevented from voting who should be allowed to vote?

4* Okay... in most elections, are large numbers of people allowed to vote who are not eligible to vote?

5* Some people say that America's political system is badly broken. Do you agree?

Rasmussen Reports is an electronic publishing firm specializing in the collection, publication, and distribution of public opinion polling information.

The Rasmussen Reports ElectionEdge™ Premium Service for Election 2006 offers the most comprehensive public opinion coverage ever provided for a mid-term election. We update the President's Job Approval Ratings daily and are polling every Senate and Governor's race at least once a month in 2006.

Rasmussen Reports was the nation's most accurate polling firm during the Presidential election and the only one to project both Bush and Kerry's vote total within half a percentage point of the actual outcome.

During Election 2004, RasmussenReports.com was also the top-ranked public opinion research site on the web. We had twice as many visitors as our nearest competitor and nearly as many as all competitors combined.

Scott Rasmussen, president of Rasmussen Reports, has been an independent pollster for more than a decade.
Evidence of Voter Fraud and the Impact that Regulations to Reduce Fraud have on Voter Participation Rates

John R. Lott, Jr.¹
Department of Economics
SUNY Binghamton
Binghamton, NY 13902

Revised
August 18, 2006

Abstract

The results provide some evidence of vote fraud and that regulations that prevent fraud can actually increase the voter participation rate. It is hard to see any evidence that voting regulations differentially harm either minorities, the elderly, or the poor. While this study examines a broad range of voting regulations, it is still too early to evaluate any possible impact of mandatory photo IDs on U.S. elections. What can be said is that the non-photo ID regulations that are already in place have not had the negative impacts that opponents predicted. The evidence provided here also found that campaign finance regulations generally reduced voter turnout.

¹ The Dean's Visiting Professor. Michael Munger and Clark Bensen provided helpful comments. I would like to thank John Matsusaka for providing me with his Initiative and Referendum Institute's Initiatives Database. The data on voter turnout in general elections; the margin of victories by state for presidential, gubernatorial, and US Senate races; and per capita income by county were provided by Clark Bensen.
Introduction

The regulations to ensure the integrity of the voting process can reduce the voter participation rate by making it more costly for people to vote. But to the extent that the regulations provide increase people's confidence that their votes will be properly counted, these regulations can actually encourage more people to vote. The trade-offs are everywhere. For example, absentee ballots make voting much more convenient, increasing the rate at which people vote, but some view them as "notorious" sources of voter fraud.\(^2\) There has been some bi-partisan support for stricter registration and ID requirements (e.g., the Carter-Baker commission). Generally, Democrats are concerned that stricter rules will discourage voters, while Republicans think that stricter rules are needed to ensure confidence in the voting process.

Almost 100 countries require photo IDs to vote.\(^3\) Many directly tie voter registration with provision of an ID and only allow an ID that is specifically issued for voting.\(^4\) Some also either do not allow or greatly restrict absentee ballots.\(^5\)

For example, all voters in Mexico must present voter IDs, which include not only a photo but also a thumbprint. The IDs themselves are essentially counterfeit-proof, with special holographic images, imbedded security codes, and a magnetic strip with still more security information. As an extra precaution, voters' fingers are dipped in indelible ink to prevent people from voting multiple times.

Mexican voters cannot register by mail — they have to personally go to their registration office and fill out forms for their voter ID. When a voter card is ready three months later, it is not mailed to the voter as it is in the U.S. Rather, the voter must make a second trip to a registration office to pick it up. The 2006 election was the first since the 1991 reforms in which absentee ballots were available, but only for voters who requested one at least six months before the election.\(^6\)

In the U.S. during 2006, three states -- Georgia, Indiana and Missouri -- have adopted regulations requiring that photo IDs be presented before people can vote. Other states are considering following suit, generating heated debate as well as court cases. Some claim that such a requirement would prevent "many people" from voting,\(^7\) but the evidence so far is scant. The primary evidence presented measures the portions of the population who do not possess driver's licenses (Overton, 2006 and Pawasarat, 2005). National Commission on Electoral Reform (2001, p. 77) claims that about 92 percent of

\(^3\) Building Confidence in U.S. Elections, p. 5.
\(^4\) Ibid.
\(^5\) For example, as a result of fraud in their 1988 Presidential election, absentee ballots were not allowed in Mexico until (see Associated Press, "Mexican Senate approves mail-in absentee ballots for Mexicans living abroad," AZcentral.com, April 28, 2005 (http://www.azcentral.com/specials/specia103/articles/0428mexicovote-ON.html).
\(^6\) The United Kingdom faced claims of widespread vote fraud from "postal votes" during the 2005 election. Zoe Hughes, "Reform call after postal votes row," The Journal (Newcastle, UK), May 21, 2005, p. 4.
the voting age population have driver’s licenses and that other photo IDs -- such as student IDs, military IDs, employee IDs, and passports – “probably” only increases this percentage “slightly.” Yet, this provides only a very crude measure of whether photo ID requirements will prevent people from voting. Some people without driver’s licenses will not vote even when there are no photo ID requirements and others will go out to get a photo ID in order to vote. Just because they don’t have a photo ID at some point in time (when they may not have any reason to have such an ID), doesn’t imply that they won’t get one when they have a good reason to do so.

A better measure of how difficult it is to meet the ID requirement is the percent of registered voters who have driver’s licenses (Brace, 2005). But even this measure ignores that people can adjust their behavior and that some of those who currently don’t have a photo ID might acquire one once it is required. Others have pointed out that even these estimates are unnecessarily alarmist because the lists of registered voters have not been updated to remove people who have died or moved away, and the statistics thus exaggerate the number of voters who are listed by motor vehicle bureaus as not currently having driver’s licenses (Bensen, 2005).

There is also the question of the disparate impact on different groups. Would minorities or the elderly, people who are said to be less able to bear the costs of getting photo IDs be particularly discouraged? The courts, the media, as well as Democratic governors’ veto messages have raised concerns over this impact. Again, the existing evidence involves either comparing the percent of adults with photo IDs or the percent of registered voters with driver’s licenses.

There is some evidence from other countries, such as Mexico, that strict anti-fraud regulations have actually been associated with increases in voter turnout. Nevertheless, it is difficult to measure the effect of mandatory photo IDs in the United States, and for a simple reason: there has only been one primary election in just one state, Indiana, during 2006 using mandatory photo IDs. The Georgia and Missouri mandatory photo ID laws have not yet gone into effect. Florida, Hawaii, Louisiana, Oklahoma, and South Carolina all had non-mandatory photo ID laws by 2004, with South Dakota joining the group by 2006. In these states, people are asked for photo IDs, but if not available, a wide set of options range from providing non-photo IDs to signing a pledge that the voter is who they say that they are. It remains to be seen whether the mere threat of asking for a photo

---

9 Since the 1991 election reforms in Mexico, there have been three presidential and four congressional elections. In the three presidential elections since the 1991 reforms, 68 percent of eligible citizens have voted, compared to only 59 percent in the three elections prior to the rule changes. However, there is only a very trivial increase for congressional elections. Comparing the four congressional elections prior to the reforms with the four afterwards produces only a one percent increase from 56 to 57 percent. See Klesner (2003) for the turnout data up through the 2003 elections.
ID has any effect on voting behavior. So far no one has investigated the impact of these or other laws on voting participation rates.

Similar concerns that have been raised about regulations requiring non-photo IDs. For example, Tova Andrea Wang with The Century Foundation notes that “Furthermore, for those who do not have the kinds of up-to-date non-photo ID necessary—and many minority and urban voters, for example those who live in multiple family dwellings simply will not—getting identification from the government will present costs and burdens for voters who simply want to exercise their constitutional right to vote.”

The general question remains to what extent other restrictions affect the voter participation rate and whether the impacts are different across different groups of voters. In the following sections, I will briefly discuss how to test how voting regulations affect turnout and then provide some empirical evidence.

**Voter IDs on Voter Participation Rates**

Ensuring integrity of the voting process can either increase or decrease voter participation rates. There is an increased cost to voting, decreasing participation, but the increased integrity of the process can also increase the benefits to people voting. Eliminating fraud can also work to reduce the voter participation rate simply because there will be fewer “false” votes.

These three positions are as follows:

1) **The Discouraging Voter Hypothesis:** With little or no fraud to eliminate, the regulations discourage legitimate voters from voting, this hypothesis predicts that to the extent that regulations have any effect they will reduce the number of people who vote. Critics of stricter regulations argue that minorities, the elderly, and the poor are most affected.

2) **The Eliminating Fraud Hypothesis:** If there is indeed substantial fraud and that the regulations eliminate it, the measured voter participation rate will decline. Votes that shouldn't have been recorded will now no longer be recorded and voter participation will decline.

3) **The Ensuring Integrity Hypothesis:** Greater confidence that the election is fair and that votes will be counted accurately encourages additional voter participation. (Similarly, if the regulations reduce confidence, depending on the extent of the

---

11 Sherry Swirsky, co-chair of Philadelphia Mayor Ed Rendell’s Election Reform Task Force, noted in 1993 that “[But] the obsessive concern with fraud is what depresses voter turnout and registration in Philadelphia. It contributes to this ultimately destructive view that 'My vote doesn't matter, the whole system is corrupt.' The Inquirer has done a grave disservice to democracy to this city. They have exaggerated the pervasiveness of fraud in elections.” Scott Farmelant, “Dead Men Can Vote: Voting Fraud is alive and well in Philadelphia,” Philadelphia City Paper, October 12-19, 2005 (http://www.citypaper.net/articles/101295/article009.shtml).
Any or all of these effects may be occurring at the same time, and the difficult task is how to disentangle the possible effects that voting regulations can have. Both the Discouraging Voter and Eliminating Fraud hypotheses predict that to the extent that voting regulations have any effect, they will reduce the voter participation rate. While the Ensuring Integrity hypothesis may exist even if voter participation declines after the regulations are enacted, it is the only hypothesis that can explain increased voter participation.

Obviously, the simplest test is whether different voting regulations alter voter participation rates. However, as just noted, this test can only disentangle the hypotheses if voter participation increases.

There are two other possible ways of analyzing the data. The first is whether there are systematic differences in who is affected by the voting regulations. Even if the total voting participation rate does not show a statistically significant change, it is possible that certain groups -- such as minorities, the elderly or the poor -- face declines in participation rates and whether such declines occur systematically. In other words, do African-Americans face reductions in voter participation or is it particular random segments of African-Americans that appear to be more related to randomness than to any type of systematic discrimination.

The second and more powerful test is to examine what happens to voter participation rates in those geographic areas where voter fraud is claimed to be occurring. If the laws have a much bigger impact in areas where fraud is said to be occurring, that would provide evidence for the Eliminating Fraud and/or Ensuring Integrity hypotheses. The point would be that the laws per se were not discouraging African-Americans or the elderly or the poor from participating, but that the change in participation in high fraud areas would indicate that any drop was primarily due to eliminating fraudulent votes rather than the general impact of the voting rules on certain types of citizens.

Over the 1996 to 2006 period studied here, there are a range of different regulations that can affect the cost of voting: photo IDs, non-photo IDs, same day registration, registration by mail, pre-election day in poll voting, absentee ballot obtained without requiring an excuse, whether there is a closed primary, provisional ballots, and voting by mail. The existing ID requirements, while not as strict as the mandatory photo IDs recently enacted by Georgia, Indiana and Missouri, may still make it more difficult for some people to vote.

Motor Voter was already adopted nationally prior to the 1996 general election. The timing for these laws were primarily obtained from the Republican National Committee’s “Summary of State Voting Laws and Procedures” from November 1996 to July 2006. Electionline.org’s Election Reform: What’s Changed, What Hasn’t and Why 2000-2006 (February 2006). Information on in-person absentee voting was obtained from a Nexis/Lexis search.
Other reforms, such as same day voter registration, absentee ballots without an excuse, and voting by mail, make it easier for people to vote and should increase voter participation rates, but they may also make fraud easier. Same day voter registration makes it more difficult to accurately determine whether people are who they claim to be. Both Democrats and Republicans agree that the problems of vote fraud involve absentee ballots and vote by mail are due to the difficulties in monitoring who ordered them and filled them out. Election results have been overturned as a result of this type of fraud. The New York Times has editorialized that “If the Legislature really wanted to deter fraud, it would have focused its efforts on absentee ballots, which are a notorious source of election fraud . . .”

Likewise, provisional ballots also make voting easier: in theory, they allow voters, who have been the victim of some type of bureaucratic error (where their registration information has been misplaced) to be allowed to vote. Yet, there is the potential for fraud, where provisional ballots are issued to people outside of where they are registered and possibly voting in many different precincts. Some, such as John Fund (2004), claims, “We might have a Florida-style dispute spilling into the courts in several states where the presidential race is close, with one side calling for all provisional ballots to be tabulated (‘Count Every Vote’) and the other demanding that the law be scrupulously observed.”

Again, just as with IDs, all these other rules could either increase or decrease voter participation. For example, lax absentee ballot rules can make it easier for some people to vote, but they can also increase fraud and thus discourage others from participating.

Other factors that determine voter participation rates include the closeness of races, the presence of initiatives and major races on the ballot, and income and demographic characteristics (e.g., Cox and Munger, 1989; Matsusaka, 1992 and 1993; and Gerber and Green, 2002). The closer the races and thus the greater the interest in races, the more

---

13 Signatures are required on these mail-in ballots, but as the bi-partisan National Commission on Election Reform noted “But in fact, for practical reasons, most states do not routinely check signatures either on applications or on returned ballots, just as most states do not verify signatures or require proof of identity at the polls.”

14 “In 1993, a federal judge had to overturn a special state Senate election in which Democratic precinct workers had gone door to door with absentee ballot forms and "helped" voters fill them out.” John Fund, “The Voter Integrity Project: How to stop fraud and suppression? Ashcroft showed the way in 2002.”

16 This paper uses Matsusaka’s distinction between initiatives and legislative measures. While I only have data on the initiatives on the ballot, presumably legislative measures matter also, though Matsusaka (1992) finds that initiatives are much more important in explaining voter turnout than are legislative measures. Matsusaka states that an “initiative is a proposed law or constitutional amendment that has been put on the ballot by citizen petition. By contrast, a "legislative measure" or "legislative referendum" or "legislative proposition" is a proposed law or constitutional amendment that has been put on the ballot by the legislature.

The only variable that I did not follow Cox and Munger specification and use was campaign spending. In part I did this because they were examining turnout for only congressional races in a non-presidential election year. It is not clear how one would distribute presidential campaign spending across counties, especially since presidential campaigns target their expenditures. Given that I am using county level
likely people will be to participate. For the general election data, data has been collected on the absolute percentage point differential between the top two finishers of that state's presidential race as well as for any gubernatorial or U.S. senatorial races. The Initiative and Referendum Institute’s Initiatives Database is used to identify the number and types of initiatives that have appeared on general and primary election ballots from 1996 through 2004. Twenty-five different types of initiatives are identified ranging from those on abortion to Veteran Affairs.\textsuperscript{17}

The Evidence

The data here constitute county level data for general and primary elections. The general election data goes from 1996 to 2004. For the primary election, the data go from 1996 to July 2006 for the Republican and Democratic primaries. However, the data do not go back to 1996 for all states since I relied for the primary data on data supplied by state Secretary of States. Because of this limit on primary data, most of the estimates here will focus on the general election data.

How did these laws impacted voter participation rates? As a first crude measure, I only considered states that had changed their laws over time to compare how the participation rates changed when the laws changed. Obviously this simple comparison ignores that many other factors are changing, but it at least compares only the same states over time. The simple mean voter participation rates, with and without photo IDs, indicate that adopting photo IDs produced a drop in voter participation of 1.5 percentage points, a statistically insignificant change. On the other hand, a similar breakdown for non-photo IDs, absentee ballots with no excuses, provisional ballots, pre-election day in-poll voting, same day registration, registration by mail, and voting by mail all show statistically significant increases in voter participation rates. These other changes are much larger and indicate an increase of at least 4 percentage points. For registration by mail, an increase of 11.5 percentage points. (The raw means for all the data are shown in the

\textsuperscript{17}The source of the information related to the Voting Age Population and general elections is the master election files of Polidata (www.polidata.org). Polidata compiles election-related information from state and local election officials around the country, year-by-year, on an ongoing basis, but only for general elections. This information includes registration and turnout statistics when available and election results by party by office, by state and county. In cases in which the election officials do not collect, compile or report the actual number of voters who requested ballots, the turnout is determined by the partisan race in the state that generated the highest number of votes. In a handful of cases this turnout may be the result of non-statewide races, such as those for the U.S. House or the State Legislature. There are several projections and estimates for the Voting Age Population, some released before an election and some released long after the election year. The Voting Age Population numbers used here are estimates based upon methodology developed by Polidata reflecting annual state-level estimates of the population released by the Bureau of the Census.

County level data on per capita income were obtained from the Regional Economic Information System (REIS). Nominal values were converted to real values by using the consumer price index. State level unemployment rates were obtained from the Bureau of Labor Statistics. Poverty rate data was obtained from U.S. Department of Commerce.
Table 2 provides the first regression estimates. They are constructed to account for all the different types of voting regulations mentioned earlier; the closeness of presidential, gubernatorial, and U.S. Senate races; geographic and demographic differences; the number and types of voter initiatives; as well as national changes over time in voter participation rates. Six specifications are reported: three each examining the voter participation rate and the natural log of the voter participation rate. While all the estimates account for geographic and year fixed effects, the estimates report different combination of the other control variables. Specifications (1) and (4) examine only the ID requirements as well as the margin of victory for the presidential, gubernatorial, and U.S. Senate races. Specifications (2) and (5) include all the other variables except for information on the topics of individual initiatives. Finally, because of Matsusaka's (1992) evidence -- that the impact of initiatives on voter turnout vary dramatically with the issues that the initiative deals with -- specifications (3) and (6) include all dummy variables indicating the type of initiative being voted on. The regressions were run using ordinary least squares with clustering of counties by state and robust standard errors.

The results indicate only minimal support for the notion that IDs -- whether photo IDs with substitution or non-photo IDs -- reduce voting participation rates. Indeed, most of voting regulations, in the vast majority of estimates, seem to have no statistically significant effects. In only one of the six specifications does requiring non-photo IDs imply a statistically significant effect. In that one case, specification (4) with the most minimal use of control variables, non-photo IDs are associated with a 3.9 percent reduction in voting rates. Accounting for all the other factors in specification (6) drives this estimate down to about 2.2 percent.

Of the other laws, only one, pre-election day voting, is consistently and significantly related to voting rates is, and it implies about a 1.5 to 1.8 percentage point reduction in voting participation from the law. This result is consistent with the Ensuring Integrity Hypothesis. The Discouraging Voter or Eliminating Fraud Hypotheses would imply that pre-election day voting should increase voting participation rates, either because the cost of voting has been reduced or because there is more fraud. The Ensuring Integrity Hypothesis can explain the drop in voting rates because increased fraud discourages others voting. Only one of the laws implies a statistically significant impact and that is only for one specification. In that one specification same day registration implies a 2.4 percentage point increase in voting rates, and that result is consistent with all three hypotheses.

As to the other results, presidential election margins are most important of any of the races in explaining voter turnouts and that holds for all races. Among the initiatives, topics on abortion, animal rights, campaign finance, education, labor reform, and taxes get voters the most excited. By contrast, initiatives on business regulations almost put people to sleep, reducing voter participation by 12 percentage points. Hispanics vote at about a half of a percentage point lower rate than whites.
A few other specifications were also tried. For example, I included state specific time
trends and squared values for the winning margins in presidential, gubernatorial, and
senate races. The results showed little change from those already presented.

In addition, I also tried using data that I had available up until 2002 on most campaign
finance regulations. Proponents of campaign finance regulations worry that the
perception of corruption created by campaign donation discourage people from voting. If so, campaign finance regulations should increase voter participation rates. Yet, the
results imply that the regulations reduce voter turnout and their inclusion does not change
the estimated effects of voting regulations on voter participation shown in specifications
(3) and (6) (see Table 3). Limits on corporate donations to gubernatorial campaigns,
political action committees, or political parties as well as limits on total gubernatorial
campaign expenditures all reduce voter participation rates. Limits on these types of
campaign expenditures by individuals are very highly correlated with the limits on
corporations and unions and drop out of the specifications. Only limits on union
donations to political parties are associated with high voter participation rates. Given
previous work that campaign finance regulations lower the rate that incumbents are
defeated, increase their win margins, and decrease the number of candidates running for
office (Lott, 2006), it is not particularly surprising that these regulations also discourage
people from voting.

Tables 4 and 5 attempt to see whether the different voter regulations have a differential
impact across African-Americans, Hispanics and whites. Table 4 shows the coefficient
estimates for percentage of the voting age population represented by each of the races
interacted with the various voting regulations. Table 5 examines whether the coefficients
for any particular regulation are statistically different between the different races. With
two exceptions, it is very difficult to see any differential impact across these racial
groups. Voting by mail increases African-Americans’ voting rates relative to whites and
lowers Hispanics’ voting rates relative to whites. Absentee ballots also increase the
voting rate of African-Americans relative to Hispanics. But none of the other voting
regulations impacts these different races differently.

Table 6 tries a similar breakdown by voter age and again it is difficult to see many
significant differences between different age groups. The F-tests shown in the last

---

18 See for example Cox and Munger (1989) for analogous specifications involving squared winning
margins. I did also try including total county population (given that county size remains constant this will
measure density as done by Cox and Munger) as well as the state poverty rate, but including these variables
in specifications 3 and 6 did not cause any of the voting regulations to change from being significant to not
significant nor cause the reverse to happen. The state level poverty rate will again be discussed later.

19 Allan Cigler (2004) notes that “But the breakdown of the existing system of campaign finance regulation
started to attract the attention of a number of additional interests, particularly foundations and think tanks
disturbed by voter cynicism and concerned with the lack of voter participation in elections and the erosion
of civic responsibility generally. Enhancing democracy through the lessening of the impact of money in
politics was typically the goal of these organizations.”

20 See Lott (2006) for a detailed discussion of this data. Using these variables reduces the sample size by
23 percent so they are included separately and were not included in the regressions reported in Table 2.

21 Matsusaka (1993), Matsusaka and Palda (1993), and Cox and Munger (1989) have recognized that the
impact of campaign finance laws on how competitive races are could either increase or decrease turnout.
column compare age groups from 20 to 29, 30 to 39, 40 to 49, and 50 to 64 year olds with the estimates for 65 to 99 year olds. In all these estimates only the differences between 50 to 64 year olds and 65 to 99 year olds are significantly different from each other and that is true for non-photo IDs, absentee ballots without an excuse, provisional ballots, and pre-election day in-poll voting or in-person absentee voting regulations. But all these results are much more a result of 50 to 64 year olds being different from any of the other age groups than it is that 65 to 99 year olds. There is no evidence that any of these rules impact those over 65 years of age relative to voters from 20 to 50 years of age.

Figures 1 and 2 are a result of a regression that breaks down the estimates by both race, age and gender. The regression that generated these figures corresponded to specification (3) in Table 2 that interacts those factors with just photo ID requirements. Again it is hard to see these regulations as differentially harming either the elderly, African-Americans, Hispanics, or women. In Figure 1, the one standout estimate is African-American females 50 to 64 years of age, a group that shows a big drop in their share of the voting age population from photo IDs. But this contrasts sharply with African-American females who are 40 to 49 and 65 to 99 years of age. It does not appear that there is anything systematic about being either African-American, female or elderly that causes one to be adversely impacted by photo IDs. The estimates in Figure 2 similarly show a random pattern by race and age. Interestingly in this case it is white males between 65 and 99 who appear to be most adversely affected by photo IDs.

To test whether poor people are impacted differently from others by these different voting regulations, I tried interacting the voting regulations shown in specification (3) from Table 2 first by county income and then separately by state level poverty rates. In none of these cases were these coefficients statistically significant and implies that none of the regulations neither adversely affected nor improved poor people’s voter participation rates.

Table 7 provides interesting results. The American Center for Voting Rights provides what appears to be the only comprehensive national list of voter fraud “hot spots.” Their 2005 report lists six major “hot spots”: Cuyahoga County, Ohio; St. Clair County, Illinois; St. Louis County, Missouri; Philadelphia, Pennsylvania; King County, Washington; and Milwaukee County, Wisconsin. Again I started with specification (3) in Table 2 but added in variables that interacted the voting regulations with a dummy variable equaling 1 for these six counties. Table 6 reports just the coefficients from this regression for these interactions and the voting regulations by themselves.

As shown earlier, ID requirements have no significant impact on voting participation rates when all the counties for which they are imposed are examined. However, most telling, non-photo IDs increased voting participation in the “hot spots,” supporting the Ensuring Integrity hypothesis. Neither of the other theories can explain why requiring IDs increase voter participation. The same also holds true for increasing the length of the registration deadline: It, too, increases voter turnout despite making voting more difficult. The results for pre-election day in-poll voting also imply that vote fraud is occurring. In general, pre-election day in-poll voting is associated with reduced turnout,
consistent with the Ensuring Integrity hypothesis. The fact that turnout increases in the fraud "hot spots" when pre-election day in-polling is allowed implies that the "hot spots" are exploiting this rule for vote fraud.

Finally, Table 8 provides some simple estimates for U.S. Senate primaries by party.\textsuperscript{22} The sample here was only a third of the size of the general election estimates. Overall, Democratic primary turnout rates seem to be much more affected by voting regulations than do Republican ones. However, the only results that are related to fraud involve provisional ballots. Both specifications for the Democratic primary produce coefficients that imply the Ensuring Integrity Hypothesis: despite the lower cost of voting from provisional ballots, there is a statistically significant 4.4 percentage point drop in the voting rate. For Republicans the coefficients are of the opposite sign and statistically significant. Thus, the results do not allow us to disentangle the alternative hypotheses.

Conclusion

There is some evidence of vote fraud. Regulations meant to prevent fraud can actually increase the voter participation rate. It is hard to see any evidence that voting regulations differentially harm either minorities, the elderly, or the poor. While this study examines a broad range of voting regulations, it is still too early to evaluate any possible impact of mandatory photo IDs on U.S. elections. What can be said is that the non-photo ID regulations that are already in place have not had the negative impacts that opponents predicted.

One particularly valuable finding is that voting regulations have a different impact on turnout in counties where fraud is alleged to be rampant. These results indicate that while these voting regulations have little impact on turnout generally, certain regulations do significantly impact turnout in these so-called "hot spots."

Contrary to the claims that campaign finance regulations will encourage voter participation by reducing the perception of political corruption, campaign finance regulations reduced voter participation rates.

Following other recent work showing that campaign finance regulations entrench incumbents, reduce the number of candidates running for office, and increase win margins (all factors associated with less exciting campaigns), these results find that campaign finance regulations usually reduce voter turnout.

\textsuperscript{22} The county level on votes by U.S. Senate race was obtained by going online at the different Secretary of State websites (http://www.nass.org/sos/sosflags.html). Some states only had this data available back to 2000 and others did not have the data available by race at the county level.

Voters by Age Group
Figure 2: The Change in Voting Participation Rates from the Adoption of Photo IDs by Race for Men

A one standard deviation in the share of the population in a particular age group produces the following change in voter participation rates:

- Black Male
- Hispanic Male
- White Male

Percent of Population:
- 20 to 29 Years of Age
- 30 to 39 Years of Age
- 40 to 49 Years of Age
- 50 to 64 Years of Age
- 65 to 99 Years of Age
Table 7: Examining Whether the Six “Hot Spots” Counties Identified by the American Center for Voting Rights as Having the Most Fraud: Interacting the Voting Regulations that can affect fraud with the six “Hot Spots” Using Specification 3 in Table 2 as the base (The six “hot spots” are Cuyahoga County, Ohio; St. Clair County, Illinois; St. Louis County, Missouri; Philadelphia, Pennsylvania; King County, Washington; and Milwaukee County, Wisconsin. Absolute t-statistics are shown in parentheses using clustering by state with robust standard errors.)

Increasing the Security of Elections:
The Effect of Identification Requirements on Turnout of Minority Voters

by

Hans A. von Spakovsky

Voter fraud is a well-documented and existing problem in the United States. While it is safe to say that many elections are conducted without voter fraud affecting the outcome or representing a significant factor in the race, there are sufficient cases of proven fraud and convictions by both state and federal prosecutors to warrant taking the steps necessary to improve the security and integrity of elections. There were many cases reported in the press in 2004 of thousands of fraudulent voter registration forms submitted to election officials in a dozen states across the country. Obviously, when such fraudulent registrations are not caught by registration clerks, these registrations become a possible source of fraudulent votes as do frauds caused by impersonations of registered voters. For example, a New Mexico voter was not allowed to vote in 2004 because when he appeared at his polling place, he was told that someone else had already voted in his place. In addition, someone could vote under the name of voters still on the roles but who have moved or died. In 2000, a review by two news organizations of Georgia’s voter registration rolls for the previous 20 years found 5,412 votes had been cast by deceased voters – some on multiple occasions - and at least 15,000 dead people were still registered on the active voting rolls.

Investigations by both the Milwaukee Journal Sentinel and a Joint Task force formed by the Milwaukee U.S. Attorney’s Office and local law enforcement agencies found thousands of fraudulent and suspicious votes in that city, in a state that John Kerry won by only 11,384 votes in the 2004 election. Among the findings were that Milwaukee showed at least 4,500 more votes cast than the number of people listed as voting, as well as instances of suspected double voting, voting under fictitious names, and voting in the names of deceased voters. As the Milwaukee Journal Sentinel noted, some of this voter fraud could have been prevented through photo identification since the Task Force had noted “cases of persons voting in the name of a dead person or as someone else...persons listed as voting who said they did not vote...people [who]

---

registered and voted with identities and addresses that cannot in any way be linked to a real person.\(^6\) These cases illustrate the need for requiring voters to show photo identification at the polls to authenticate their identity.\(^7\)

A related and growing problem that also supports the need for requiring photo identification when voting is the increased number of noncitizens, both legal and illegal, who are registering to vote and voting in U.S. elections.\(^8\) In the past four years alone, the Department of Justice has convicted more than a dozen noncitizens in Florida for registering and voting in elections in Broward, Miami-Dade, St. Lucie, Martin, and Palm Beach Counties, including one individual, Rafael Velasquez, who was a former candidate for the Florida legislature.\(^9\) While this may seem to be a relatively small number of convictions, it is important to keep in mind that the Department of Justice has not conducted any comprehensive or systematic check of voter registration rolls in Florida to find noncitizens. There are at least 1.5 million noncitizens of voting age in Florida – “only 540 of them would have had to vote (or 540 more ineligible voters than may actually have voted) for Gore to reverse the presidential winner” in the 2004 election.\(^10\) Could this many noncitizens vote in any one election? That question is succinctly answered by the findings of the Committee on House Oversight in the Dornan-Sanchez congressional election dispute in California in 1997. The Committee found 748 invalid votes due to noncitizens who had registered illegally in just one congressional district.\(^11\)

According to Dan Stein of the Federation for American Immigration Reform, there were 11 states carried by President Bush in the 2000 election that “had small enough winning vote margins that voting by noncitizens could have tipped the results to Vice President Gore.” As another example of the prevalence of this problem, in a February 8, 2005 report to the President of the Utah Senate, the Legislative Auditor General John Schaff found that more than 58,000 illegal immigrants had Utah drivers’ licenses and 37,000 had nondriver’s license identification cards. Almost 400 of these illegal aliens had registered to vote and at least 14 had actually voted

\(^{7}\) Although this paper focuses on voting in polling places, the many reported cases of absentee ballot fraud make it clear that individuals submitting absentee ballots by mail should be required to include photo copies of identification documents with their ballots as well.

\(^{12}\) Testimony of Dan Stein (“[t]hose states were Colorado, Florida, Georgia, Missouri, Nevada, New Hampshire, North Carolina, Ohio, Tennessee, Texas, and Virginia. A switch of three votes in the Electoral College from Bush to Gore would have reversed the outcome of that election, so that voting of enough noncitizens to reverse the outcome in any one of those 11 states would have reversed the final outcome.”)
in Utah elections. In the ongoing lawsuit in Arizona over the state’s new requirement that individuals registering to vote show proof of citizenship, the plaintiffs have apparently been forced to concede that Arizona has uncovered several hundred instances in which noncitizens were fraudulently registered to vote.\textsuperscript{13} A review in 2005 by Paul Bettencourt, the Voter Registrar for Harris County, Texas, the third largest county in the country, found at least 35 cases in which noncitizens applied for or received a voter card, including a Brazilian woman who voted at least four times. As Bettencourt stated, “we regularly have elections decided by one, two, or just a handful of votes in any one of our more than 400 local government jurisdictions.”\textsuperscript{14}

It should be kept in mind that the federal government does not cooperate with inquiries by local election authorities on the immigration status of registered voters. Even if it did, it could only provide information on noncitizens that are in its files—individuals who are here legally and illegal immigrants who have been caught and a file created. Since the vast majority of illegal immigrants are not in its information system, the federal government could not provide accurate information on every registered voter even if it wanted to. Since more than half of the states do not require proof of legal presence in the U.S. to apply for a driver’s license and the National Voter Registration Act (also known as Motor Voter) requires states to offer voter registration to persons who apply for a driver’s license, voter rolls are guaranteed to become “inflated by non-citizens who are registered to vote...[t]he only question is the number.”\textsuperscript{15}

The solution to preventing fraudulent votes from being cast in polling places is to require all voters to present photo identification, a recommendation made by the bipartisan Carter-Baker Commission on Federal Election Reform. The Commission’s recommendation was based on photo identifications issued under the REAL ID Act of 2005,\textsuperscript{16} which requires states to verify each individual’s full legal name, date of birth, address, social security number, and U.S. citizenship before the individual is issued a driver’s license or personal identification card.\textsuperscript{17} Similarly, the solution to preventing noncitizens from registering and voting in elections is to require all individuals registering to vote to provide proof of citizenship.

Those opposed to these requirements argue that they are unnecessary and discriminatory, and will lead to reduced turnout by minority voters. However, contrary to those claims, the documented history of fraudulent voter registrations and voter fraud, and increasing incidents of noncitizens registering and voting, show the need for such requirements. As former Congresswoman Susan Molinari pointed out, “[f]ar from discriminatory, a mandatory voter ID

\textsuperscript{15} Testimony of Patrick Rogers.

provides means by which more Americans may obtain the identification already required for
daily functions – such as cashing a check, entering a federal building, or boarding an airplane.”

There is also no evidence that minority voters have less access to identification documents than
other voters, or that requiring proof of citizenship will disproportionately affect minority voters
or lead to lower turnout of eligible voters if either requirement is implemented. As John Lott
concluded in a recent study, “the non-photo ID regulations that are already in place have not had
the negative impacts that opponents predicted.”

On October 29, 2002, President George Bush signed into law the Help America Vote Act
of 2002 (“HAVA”). HAVA contained the first nationwide identification requirements for
voters. It applies to first-time voters who register by mail and who have not previously voted in
a federal election. Under §303(b)(2)(A) of HAVA, when voting in person, such voters must
present a current and valid photo identification or a copy of a current utility bill, bank statement,
government check, paycheck, or other government document that shows the name and address of
the voter. Voters can avoid this requirement if they submit a copy of one of these documents
with their voter registration form or if they drop off their registration form with an election
official instead of mailing it in. First-time registrants voting by mail using an absentee ballot
must submit a copy of one of these documents with the absentee ballot. Any voter who does not
have any of these documents can vote a provisional ballot that must be verified by local election
officials to determine whether the voter is eligible to vote. States and localities were required
to comply with these provisions beginning January 1, 2004. However, HAVA specifically
provided that these identification requirements, as well as the other requirements in Title III of
the law such as provisional voting and statewide computerized voter registration lists, were
“minimum requirements” and nothing prevented a state from establishing requirements “that are
more strict” so long as they are not inconsistent with other federal laws.

Spurred in part by the passage of HAVA and the 2004 election, a number of states such
as Georgia, Indiana, and Missouri passed legislation implementing photo identification
requirements for voters that were stricter than the HAVA requirement. In addition to a voter
identification requirement, Arizona also passed a requirement that an individual registering to
vote show proof of citizenship. All of these state statutes have been attacked in court in
litigation alleging violations of state law, the Voting Rights Act, Equal Protection, or the 24th
Amendment (poll taxes). The objection to photo identification requirements is that they will
reduce the turnout of black voters because fewer blacks possess identification documents than

\[18\] Id. at 90.

\[21\] §303(b)(1), 42 U.S.C. §15483(b)(1).
\[22\] This illustrates a major defect in HAVA – it is still possible for an individual to register to vote without any check
being made of his identity.
\[23\] §303(b)(2)(B) and §302(a)(3) and (4), 42 U.S.C. §§15483(b)(2)(B), 15482(a)(3) and (4).
whites or that they will be intimidated by identification requirements and will not vote. These theories, however, are mostly anecdotal and not based on any objective evidence. The new statutes passed by Georgia, Indiana, Missouri, and Arizona are either too recent to judge their possible effect on the turnout of voters or have not been implemented because of restraining orders. However, a number of states (including Georgia) have had less strict voter identification requirements in place for a number of years, and a review of turnout in those states reveals that they not only have no effect on the turnout of black voters, turnout actually increased after implementation of some requirements. Additionally, available information on photo identification possessed by individuals, particularly driver’s licenses, shows no discrepancy between blacks and whites.

Driver’s licenses, a primary form of picture identification, are possessed by a vast majority of Americans. According to an FEC report covering the 1995-96 period, approximately 87% of persons 18 years and older have driver’s licenses while an additional 3% or 4% have a photo identification card issued by the State motor vehicle agency. The Federal Highway Administration (“FHA”) reported in 2004 that the number of licensed drivers age 18 and over was 195,432,072. Since the total population of the U.S. age 18 and over in 2004 according to the Census Bureau was 215,694,000, the percentage of the U.S. voting age population (“VAP”) with a driver’s license was 90.6%. Using the FEC’s 3% to 4% figure for additional non-driver’s license identification cards, approximately 94 to 95% of the VAP has, at a minimum, photo identification documents issued by state motor vehicle authorities. The FHA does not have information on driver’s licenses by race; however, these statistics show that the number of individuals of voting age who do not have photo identification is very small.

Claims have also been made, particularly in the litigation in Georgia, that photo identification requirements discriminate against the elderly. But according to the Federal Highway Administration, the number of older Americans who hold driver’s licenses as a percentage of their age group is surprisingly high. For example, 90.7% of persons age 65 to 69 have a driver’s license; 86.5% of persons age 70 to 74 have a license; and 82% of persons age 75

---

26 The University of Wisconsin-Milwaukee released a study last year claiming that there is a racial disparity in the driver’s licenses held by Wisconsin residents. John Pawasarat, “The Driver License Status of the Voting Age Population in Wisconsin,” June 2005, available at www.eti.uwm.edu. However, this study admits that the data it obtained from Wisconsin on “DOT photo ID utilization was only available at the state level by age and gender,” and not by race. As John Lott points out, this type of study “provides only a very crude measure of whether photo ID requirements will prevent people from voting. Some people without driver’s licenses will not vote even when there are no photo ID requirements and others will go out to get a photo ID in order to vote.” Lott at 3.

28 Licensed Drivers by Sex and Ratio to Population -2004, U.S. Department of Transportation, Federal Highway Administration, Highway Statistics, 2004, available at http://www.fhwa.dot.gov/polic/ohim/hs04/dl.htm. For this calculation and all other calculations on driver’s licenses in this paper, the number of licensed drivers under the age of 18 as listed in the table, Licensed Total Young Drivers, by Age, 2004, are subtracted from the total numbers for the U.S. and individual states listed in the first table. That number is then compared to the voting age population provided by the Census Bureau reports on registration and turnout in the 2004 election. These tables will be cited throughout this paper collectively as “Federal Highway Administration, Highway Statistics, 2004.”
to 79 have a license.29

The results of the 2004 election certainly do not support the claim that an identification requirement will decrease turnout. HAVA’s national identification requirements, although limited, were in effect for the first time all across the country. However, turnout was 60.7% of the voting age eligible population,30 an increase of 6.4 percentage points over the turnout of 54.3% of the eligible population in the 2000 presidential election. This was the largest increase in turnout since the 1948 to 1952 election, when turnout increased by 10.1 percentage points.31 The Census Bureau publishes a report every two years on voting and registration in federal elections based on responses from surveys. A comparison of the 2000 and 2004 reports shows that in the 2000 election, 56.8% of the eligible black population reported voting in the election. In 2004, when HAVA’s limited identification requirement was in effect, 60% of the eligible black population voted, an increase of 3.2 percentage points.32

Another revealing analysis is obtained by reviewing the experience of four states that imposed in-person identification requirements on voters at the precinct. South Carolina, Georgia, Virginia, and Louisiana, allow or allowed a voter to present either photo identification or one of a long list of other documents. All but South Carolina allowed a signed affirmation of the voter’s identity if the voter does not have the required identification documents. Having an affirmation exception might prevent decreases in minority voter turnout if it is actually true that minorities do not have identification documents. Nevertheless, such an exception would probably not reduce the intimidation factor if it is correct that minorities are intimidated by the challenge of presenting identification or having to take the extra step of completing an affidavit. Turnout would also be reduced (even with an affirmation exception) if it is true that identification requirements are applied in a discriminatory manner against black voters as has been claimed.33 However, an examination of the turnout figures in presidential elections in South Carolina, Georgia, Virginia, and Louisiana, states that require identification at the polls, refutes these claims, as does the experience of Alabama and Florida.34

---

32 U.S. Census Bureau, “Voting and Registration in the Election of November 2000” (February 2002), Table A; Voting and Registration in the Election of November 2004 (March 2006), Table B. These Census Bureau reports are based on surveys conducted by the Census to determine the rates at which individuals register and vote in elections. While these self-reporting surveys may inflate actual results, they provide the best data available on turnout and can be compared historically and geographically since any inflation will be similar.
33 Rights Groups Say Voter Bill Erects Hurdles,” New York Times, October 7, 2002. The NAACP claims that if blacks do not have identification, they are sent home, but if whites do not have identification, they are allowed to vote.
34 It must be kept in mind when reviewing turnout rates that other factors may influence turnout such as local races of particular interest to voters and other historical and cultural factors.

**South Carolina**

Under South Carolina Code §7-13-710, a voter must present his valid South Carolina driver’s license or other form of identification containing a photograph issued by the Department

---

35Unless otherwise noted, national and state turnout figures are based on reports produced previously by the Federal Election Commission and now available on the website of the U.S. Election Assistance Commission; the EAC took over responsibility for maintaining election statistics when it was created by HAVA. Historical election turnout information is available at [www.eac.gov](http://www.eac.gov). The EAC changed the turnout analysis for the 2004 election to citizen voting age population from voting age population, as conducted by the FEC for the 2000 and prior elections. While CVAP is more accurate, this change would obviously makes comparisons between 2004 and prior years difficult. Therefore, the historical turnout provided in this chart from 1984 to 2000 is for the voting age population from historical data; however, the turnout information for 2004 for the VAP is taken from electionline.org, "Holding Form: Voter Registration 2006," July 2006, p. 15.
of Public Safety at the polls. Under an amendment passed in 1988, if the voter is not licensed, the voter can alternatively present the written registration notification received after registering to vote as required by §7-5-125. This exception was first effective for the 1988 general election.

An examination of South Carolina’s turnout figures shows no effect from the state’s identification requirements even with the state’s significant minority population. According to the 2000 Census, South Carolina was 67.2% white and 29.5% black.36 The percentage of the voting age population with driver’s licenses in 2004 was 94.5%.37

South Carolina is one of the only states that provides turnout statistics by race. From 1984 to 2004, the total turnout broken out by the percentages of white/nonwhites voting in the general election was as follows:38

38South Carolina General Election, Statewide Votes Cast, Demographics by Race, www.state.sc.us/cgi-bin/scs...countykey=ALL&regvot=VOT&demo=RACE.
These figures reveal that in 1988 there was a slight drop in the number of nonwhite voters when compared to the 1984 election. The percentage of such voters was down 2.45 percentage points in the year that voters could use the voter registration card sent to all voters after they register in place of a South Carolina driver’s license. If nonwhite voters had experienced prior problems voting due to the lack of a license, turnout should have increased, not decreased, in the election year when the voter registration card issued to all voters could be used as an alternative. However, this did not occur. A Census survey shows that despite the voter identification requirement, the turnout percentage of the black VAP in South Carolina has steadily risen since 1988, with the exception of 2004, and a slightly higher percentage of the black VAP turned out to vote in the 2000 election than the white VAP: 60.7% vs. 58.7%.[39] The total number of nonwhites voting has steadily increased since 1988, rising from 245,304 voters to 433,732 voters in 2004.

Similarly, no conclusions can be drawn of any kind of negative effect from identification requirements on the general trend of South Carolina’s turnout when compared to national turnout. South Carolina has generally had a lower turnout than the majority of states. However, there are other states without identification requirements with lower turnout. Although the 1988 turnout of VAP in South Carolina was below the national average of 50.11%, no significance can be attributed to this fact since other states without identification requirements have had lower turnout than South Carolina in different elections. In 2000, for example, South Carolina ranked 44th in terms of turnout.

In years that national turnout has declined, South Carolina’s turnout has not decreased as much as the national decline; while in years that the national turnout has increased, South Carolina’s turnout has generally increased at a greater rate (with the exception of 2004). For example, turnout declined nationally by 3 points from 1984 to 1988 but only declined 1.75 points in South Carolina. From 1988 to 1992, national turnout increased by 4.98 points from 50.11% to 55.09% yet turnout in South Carolina increased by 6.09 points, going from 38.91% to

---

[39]Table 4a. Reported Voting and Registration of the Total Voting-Age Population by Sex, Race, and Hispanic Origin, for States: November 2000. U.S. Census Bureau, at http://www.census.gov/population/socdemo/voting/p20-542/tab04a.pdf. All references in this paper to self-reported turnout of black and white voters come from these Census Bureau surveys of past presidential elections and will be referenced as “Census Bureau reports.”
45%. This trend was repeated in 1992-1996 (national decline of 6.01 vs. decline of only 3.44 in South Carolina) and 1996-2000 (national increase of 2.22 vs. increase of 5.04 in South Carolina). If identification requirements affected voters, it would be logical to assume that national turnout trends would be offset in states with significant minority populations that arguably make it more difficult for an individual to vote by requiring identification. South Carolina’s record does not support that assumption.

**Virginia**

According to the 2000 Census, Virginia’s population is 72.3% white and 19.6% black.\(^{40}\) The percentage of the voting age population with driver’s licenses in 2004 was 93.8%.\(^{41}\) Virginia passed a voter identification requirement in 1999 that became effective for the 2000 Presidential election.\(^{42}\) It requires a voter to present a voter registration card, a social security card, a driver’s license, or any other photo identification issued by a government agency or employer. If the voter has none of these forms of identification, he can sign an affidavit attesting to his identity. Virginia does not keep statistics on the number of voters who complete such an affidavit in lieu of presenting a form of identification. Like South Carolina, however, Virginia’s turnout does not substantiate any claim that having an identification or affidavit completion requirement intimidates voters and affects turnout.

In the 1996-2000 period when the national turnout increased 2.22 points from 49.08% to 51.3% and Virginia’s identification requirement became effective, Virginia’s overall turnout increased 5.46 points, going from 47.54% to 53%. Even after imposing a new identification requirement, Virginia’s turnout increased at twice the rate of the national turnout. Virginia ranked 29\(^{th}\) in turnout in the country. According to Census survey reports, the turnout of black voters in Virginia in comparison to the VAP of blacks dipped slightly, going from 53.3% in 1996 to 52.7% in 2000. The .5 difference between these numbers, however, is within the margin of error of the surveys. Although this study has only examined turnout in presidential elections, it should be noted that reported black turnout in the 1998 congressional election in Virginia according to the Census Bureau was 23.8%; yet in the 2002 congressional election, after implementation of the voter identification requirement, reported black turnout in the state was 27.2%, 3.4 percentage points higher.

**Georgia**

According to 2000 Census figures, Georgia has a population that is 65.1% white and 28.7% black.\(^{43}\) The percentage of the voting age population with driver’s licenses in 2004 according to Federal Highway Administration statistics when compared to Census reports was

---

\(^{41}\) *Federal Highway Administration, Highway Statistics,* 2004.

\(^{42}\) VA. CODE §42.2-643.

89.8%. Georgia's controversial 2005 photo identification law was actually an amendment to an existing state statute, reducing the number of acceptable forms of identification from 17 to six. In 1997, Georgia first imposed an identification requirement, including both photo identification and a lengthy list of acceptable non-photo identification documents with an affidavit exception. It was effective for the 1998 Congressional election and was first effective for a presidential election in 2000. Under the 2005 amendment, permissible documents are a driver's license, a federal or state government photo identification, a passport, a military photo identification or a tribal photo identification. The affidavit exemption was eliminated. Discussion of the amended version of the statute will follow a discussion of the effect of the earlier identification law.

Turnout in Georgia has historically been amongst the lowest in the country. In the 1996-2000 period when the national turnout increased by 2.22 points and Georgia’s identification requirement became effective, Georgia’s turnout increased 1.37 points, going from 42.43% to 43.8%. In comparing that increase with the increase/decrease in turnout of all other states, Georgia ranked 37th in the country, ahead of Indiana which suffered a 3.73 point decline in turnout and behind Alaska with a 9.56 point increase in turnout from 1996 to 2000 (the largest increase in turnout of any state). Given Georgia’s large minority population, a significant decrease in turnout in the 2000 election would have been expected if the assumptions underlying objections to identification requirements are valid. However, Georgia’s turnout increased although not at as great a rate as the national increase.

Additionally, according to a Census Bureau survey, a higher percentage of blacks than whites reported voting in the 2000 election: 51.6% vs. 48.3%. This compares to a Census report for the 1996 election that shows 45.6% of blacks voted and 52.3% of whites voted. Therefore, the percentage of blacks reporting voting in comparison to the black VAP actually increased by 6 points after identification requirements became effective. It appears that black voters were not affected by Georgia’s identification requirements in the first presidential election after the law became effective. In the 2004 election, Georgia’s total turnout rate increased 7 percentage points from the 2000 election, the tenth largest increase in the nation according to the Committee for the Study of the American Electorate. Even with the state’s identification requirement, the Census Bureau survey shows that black voters again reported voting at a higher rate than whites in the 2004 election, 54.4% vs. 53.6%, an increase over their turnout in the 2000 election.

Because Georgia is covered by Section 5 of the Voting Rights Act, the state was required to submit the 2005 amendment requiring photo identification to the Department of Justice (“DOJ”) before it became effective. DOJ reviews such submissions under a retrogression standard, i.e., will the voting change disproportionately affect minority voters and put them in a worse position than under the current law. DOJ precleared the law, finding no discriminatory effect on minority voters, and explained the reasons for its preclearance in a letter to Senator Christopher Bond on October 7, 2005. This letter provides valuable information on the question of how many voters possess photo identification and whether there is any significant racial disparity. In fact, the letter states that on the primary claim that “African-American citizens in the State are less likely than white citizens to have the requisite photo identification,” that assertion “is not true.” DOJ made the following findings:

- Georgia’s Department of Driver Services ("DDS") showed 6.4 million photo identification holders, very close to the 6.5 million VAP projected by the Census Bureau, far larger than the 4.5 million registered voters in Georgia. The Census

49 Letter of October 7, 2005, from William E. Moschella, to Sen. Christopher S. Bond. This letter is available on DOJ's website at http://www.usdoj.gov/crt/voting/misc/ga_id_bond_ltr.htm. The discussion of the preclearance in this paper is based solely on publicly available information and documents.
projection also included ineligible voters such as 50,000 prisoners and 228,000 illegal aliens.

- DDS had racial data for 60% of the card holders – the card holders who register to vote when they apply for a license. 28% of those card holders were black, slightly higher than the black percentage of the VAP in Georgia, indicating that of the DDS applicants who register to vote, blacks hold DDS identification at a *slightly higher* rate than white Georgians.

- Student photo identification issued by all Georgia state colleges are acceptable under the amended law and data from the university system showed that black students represented 26.8% of public college students, slightly more than their share of the state VAP in 2000.

- 2000 Census data showed that 19.4% of blacks worked for the government at the local, state, or federal level in Georgia, versus only 14.3% of whites. Blacks therefore have greater access to government employee identification.

Georgia also established a mobile bus system to provide DDS identification cards to locations remote from DDS offices and provided such cards to indigents for free. Despite all of these findings, a federal court issued an injunction against implementation of the law.\(^{50}\) However, the court did *not* find any violation of the Voting Rights Act; the judge based his injunction on the Equal Protection clause due to problems the law would supposedly cause for elderly and poor voters (not minorities), and the 24th Amendment prohibition against poll taxes despite the state identification card being free for indigents. The judge granted a preliminary injunction against the statute in a 120-page slip opinion issued two days after the hearing on the matter. Since this paper is concerned with turnout results, an in-depth analysis of this court opinion will not be presented. However, the court’s legal analysis is deeply flawed, particularly its view that incidental costs of obtaining a photo identification constitute a “poll tax.” This is discussed at length in the Indiana decision cited later in this paper, where the court correctly noted that “the imposition of tangential burdens does not transform a regulation into a poll tax.”\(^{51}\)

The Georgia legislature amended the law in 2006 to make the state identification card free to any voter who requested one, without having to declare indigence, and authorized very county in the state (not just DDS offices) to issue photo identification cards. Despite these changes, the same federal judge issued a 193-page slip opinion again only two days after a hearing enjoining implementation of the amended statute.\(^{52}\) However, this opinion was based on the short time

\(^{50}\) *Common Cause v. Billups*, 406 F.Supp.2d 1326 (N.D. Ga. 2005). In what may have been forum shopping, this lawsuit was not filed in the state capitol of Atlanta where the law was passed by the legislature and signed by the governor. It was filed in Rome, Georgia, where there is only one federal judge. The named defendant, Secretary of State Cathy Cox, also stated on numerous occasions, including during her testimony, her opposition to the law. See Letter from Secretary of State Cathy Cox to Governor Sonny Perdue, April 8, 2005, available at http://www.aclu.org/votingrights/votingrights.cfm?id=18652&c=168; 406 F.Supp.2d at 6-8.

\(^{51}\) *Indiana Democratic Party v. Rokita*, No. 1:05-0634 (S.D. Ind. April 14, 2006), slip op. at 90.

remaining before the July 18th primary, the court holding that there was not sufficient time before
the primary for individuals to obtain a photo identification or for the state to educate the public
about this requirement.53

In June, the Secretary of State also released a statement claiming that a comparison of the
state’s voter registration roll with the state’s driver’s license list revealed 676,000 registered
voters without a driver’s license.54 This analysis, however, was deeply flawed, suffering from
many of the same shortcomings as the expert analysis submitted to a federal court in the Indiana
voter identification lawsuit that is discussed below. Most importantly, despite her access to
other state records, the Secretary of State only compared the voter registration list to driver’s
license records, and did not run a data matching program with other available state records on
photo identification cards acceptable under the law such as student identification cards issued by
the state university system or employee identification cards issued by the state and local
governments.55 Individuals on the list without a social security number were shown as “not
having a valid Georgia driver’s license or DDS-issued Photo ID card.”56 She also failed to
eliminate the names of military and overseas voters who are not subject to the identification
requirements – Georgia has several large military installations and local election officials can
distinguish military and overseas voters from their past applications for absentee ballots under the
Uniformed and Overseas Citizens Absentee Voting Act.57 The problems with Secretary Cox’s
list of registered voters who supposedly did not have photo identification cards was vividly
illustrated by the fact that it mistakenly included a member of the state election board, relatives
of two other members of the board (all of whom have photo identification)58 and, according to
the testimony of the vice-chair of the state election board at the court hearing, included the
federal judge in the voter identification case.

Louisiana

According to the 2000 Census, Louisiana has a population that is 63.9% white and 32.5%
black.59 The percentage of the voting age population with driver’s licenses in 2004 was 95.9%.60
In 1997, Louisiana passed Act 779 amending the election code to require voters to identify

53 Id. at 169. The court also changed its mind on the issue of a poll tax, adopting the analysis of the Indiana decision
and holding that providing identification cards without charge eliminated the claim that it was a poll tax despite the
incidental costs involved. Id. at 177.
54 “Demographic Analysis Shows that Registered Voters Lacking a Driver’s License or State-Issued Georgia ID
Card are Disproportionately Elderly and Minority,” Press Release of Secretary of State Cathy Cox, June 23, 2006,

of absentee ballots sent to uniformed services and overseas voters.
themselves with a driver's license, other photo identification, or by completing an affidavit.\textsuperscript{51} It became effective on August 15, 1997.\textsuperscript{62}

During the 1984-2000 period, Louisiana’s turnout was higher than the national turnout. Turnout ranged from a low of 1.17 percentage points greater than the national turnout in 1988 to a high of 7.9 points greater in 1996. It was 2.9 points greater in 2000, after identification requirements became effective. Of the five elections, the 2.9 point increase was the third largest. Two other elections (1984 and 1988) had smaller increases. A Census survey reveals that in the 2000 election, 66.4\% of the white VAP reported voting and 63.2\% of the black VAP reported voting.\textsuperscript{63} This compares to a Census report for the 1996 election that shows 62.6\% of the white VAP voted and 60.9\% of the black VAP voted.\textsuperscript{64} Thus, reported turnout of black voters in comparison to the black VAP increased by 2.3 points after the identification requirement became effective.\textsuperscript{65} Although Louisiana’s turnout in the 2004 election as 2.6 points below the total national turnout rate, the 62.1\% turnout reported by black voters was 5.8 points above the reported national rate of black turnout of 56.3\%. One can conclude that black voters in Louisiana have not been detrimentally affected by the state’s identification requirements.

\item[\textsuperscript{63}] Census Bureau reports.
\item[\textsuperscript{64}] Census Bureau reports.
\item[\textsuperscript{65}] With a black voting rate of 60.9\% in 1996, Louisiana was 10.3 points above the national black participation rate of 50.6\% of black VAP as reported by the Census Bureau.
\end{enumerate}
\end{footnotesize}
Although it has experienced only one presidential election since implementing a new identification requirement, the experience of Alabama, another Southern state with a large minority population covered under the special provisions of Section 5 of the Voting Rights Act, should be mentioned. Alabama implemented a new voter identification requirement in 2003 similar to HAVA. According to Department of Transportation statistics, 105.5% of the VAP in Alabama hold driver’s licenses. In the 2000 election, the Census Bureau reports that 57.2% of blacks voted; in 2004, after the new identification requirement was effective, 63.9% of blacks reported voting, an increase of 6.7 percentage points. Florida, which implemented an identification requirement in 1998 with a variety of acceptable identification documents, also experienced a steady increase in black voter turnout after the effective date of the statute. It went from a reported black voter turnout of 40.5% in 1996 before the identification requirement, to a black turnout of 42.3% in 2000 and 44.5% in 2004 after the identification requirement was effective. Florida also has a very high rate of driver’s licenses being held by the VAP in 2004 – almost 99%.

Recently Adopted Laws

Indiana

Indiana passed a photo identification requirement in 2005 as Senate Enrolled Act No. 483. It requires all voters to present a valid photo identification issued either by Indiana or the United States that has a picture of the voter, his name, and an expiration date that is either current or expires after the date of the most recent general election. The law does not apply to absentee voters who send their ballot through the mail or to voters who reside in nursing homes. A voter without identification can vote a provisional ballot and has until the second Monday following election day to appear before county officials either with a photo identification or with an affidavit stating that he is indigent or has a religious objection to being photographed. The Indiana Democratic Party filed suit against the state, claiming the identification requirement violated the 1st and 14th Amendments, 42 U.S.C. §1971, and the portions of the Indiana Constitution.

In a ruling on April 14, 2006, a federal judge denied the plaintiffs’ motions for summary judgment and granted judgment for the state, holding that the identification requirement is “a constitutionally-valid, reasonable time, place, and manner restriction on voting and on voters.” The judge’s characterization of the plaintiffs’ case was caustic. She stated that they had “not introduced evidence of a single, individual Indiana resident who will be unable to vote...or who

66 ALA. CODE § 17-10A-1.
67 This may be due to Alabama residents who hold both a personal and commercial driver’s license.
68 FLA. STAT. § 101.043.
69 IND. CODE §3-11-8-25.1 and §3-5-2-40.5.
70 IND. CODE §§3-11.7-5-1; 3-11-7.5-2.5
71 Indiana Democratic Party v. Rokita, No. 1:05-0634 (S.D. Ind. April 14, 2006), slip op. at 5.
will have his or her right to vote unduly burdened.”^72 The plaintiffs moved a political debate in the Indiana General Assembly into a judicial forum, having “failed to adapt their arguments to the legal arena” and basing their case “on little more than their own personal and political preferences.”^73

The judge did not even allow the expert report prepared for the plaintiffs into evidence because she viewed “the analysis and conclusions set out in it as utterly incredible and unreliable.”^74 The report attempted to compare the voter registration list with driver’s license files, but the court held it failed to account for voter roll inflation, compared demographic data from different years without qualification or analysis, drew obviously inaccurate and illogical conclusions, and failed to qualify the statistical estimates based on socioeconomic data. To the extent any parts of the report could be considered reliable, they actually strengthened the state’s case since, for example, the report showed “an estimated 99% of Indiana’s voting age population already possesses the necessary photo identification to vote.”^75 That perhaps explains why, when Indiana held its federal primary in May after the court’s ruling, “[a]cross Indiana, there were no reports of problems caused by the new requirement, with most areas reporting they did not have to turn away a single voter.”^76

The court also noted that the supposedly “common sense” claim that persons from lower socioeconomic levels will have a harder time obtaining photo identification because they do not drive or own cars, or have limited financial ability, is not true. To the extent the expert’s socioeconomic analysis was accurate, it actually indicated “that voters without photo identification are not significantly more likely to come from low income segments of society.”^77

Arizona

Arizona passed Proposition 200 in the 2004 general election. Because Arizona is covered by Section 5 of the Voting Rights Act, the law was also subject to review by DOJ as the Georgia identification law was - DOJ precleared the law without objection. In addition to requiring a voter to show either one identification card with his name, address and photo, or two identification documents with his name and address, Proposition 200 also amended Arizona Revised Statutes §16-166 to require anyone registering to vote to prove U.S. citizenship by providing certain documentation such as a driver’s license, birth certificate, passport, naturalization documents or any other “documents or methods of proof that are established pursuant to the Immigration Reform and Control Act of 1986.” This last standard is particularly

^72 Id. at 3.
^73 Id.
^74 Id. at 43. The report did not meet the reliability standard for expert opinions set out in Federal Rule of Evidence 702. As just one example of how flawed the report was, the expert claimed there were 989,000 registered voters in Indiana without driver’s licenses. When that number was added to the number of issued licenses (4,569,265), the total of 5,558,265 represents an “incredible 123% of Indiana’s entire voting age population as determined by the Census.” This was obviously wrong. Id. at 48.
^75 Id. at 51.
^77 Rokita at 53.
noteworthy, since the state will accept any document that the federal government accepts as proof of citizenship. This is a reference to the Employment Eligibility Verification form (Form I-9), prepared by the Department of Homeland Security, which every employer in the United States is responsible for completing on every new employee to verify their employment eligibility as either a citizen or a noncitizen legally present and able to work in the U.S.\textsuperscript{78} This requirement makes it difficult for litigants to argue that the state is acting unreasonably or somehow violating federal voting rights laws since Arizona is imposing the same requirement on individuals registering to vote that the federal government imposes on individuals who want to become employed.

However, a lawsuit was filed claiming the Arizona law violates the National Voter Registration Act. On June 19, 2006, a federal judge issued an order refusing to grant a preliminary injunction, correctly holding that “Arizona’s proof of citizenship requirement does not conflict with the plain language of the NVRA” and that “the NVRA does not act as a ceiling preventing states from enforcing their own laws regarding voter qualifications.”\textsuperscript{79}

Missouri

The Missouri Voter Protection Act, Senate bills 1014 & 730, requires voters to show photo identification issued by the state or the U.S. government, including the military. Voters with disabilities, sincerely held religious beliefs, and those born before January 1, 1941, are exempt if they execute an affidavit. All nondriver’s license identification cards are issued by the state for free and mobile units will go to nursing homes and other places accessible to the elderly and disabled. Two lawsuits that have been consolidated have been filed against the law in state court claiming violations of state law, but no significant rulings have occurred as this paper goes to print. \textit{Weinschenk and Jackson County v. Missouri,} No. 06AC-00656 and 587 (Cir. Ct. of Cole County, Mo.).

In a very interesting analysis filed in the lawsuit in support of two intervenors, Jeffrey Milyo and Marvin Overby of the University of Missouri evaluated the number of eligible voters in Missouri who may not have photo identification. They estimate that the number of eligible voters out of a VAP of 4.5 million who do not have photo identification issued by Missouri’s motor vehicles department and who are not residents of a nursing home (and thus exempt) was only about 19,000 persons. Comparing the voting age population with the number of identification cards issued by the state yields an estimate of only 51,064 voting age persons without such identification. However, after correcting the Census VAP estimate by taking out ineligible voters such as felons, the mentally incompetent, and individuals who do not meet residency requirements, as well as applying Missouri’s statewide average voter turnout rate, they concluded that the “upperbound estimate for the number of persons who are eligible and may

\textsuperscript{78} The I-9 Form and information about its use is available at http://www.uscis.gov/graphics/formsfee/forms/i-9.htm.

\textsuperscript{79} \textit{Gonzalez v. Arizona,} No. 06-1268 (D. Ariz. June 19, 2006), slip op. at 9, 12. When Arizona held its election in March, “[t]here were no widespread reports of problems Tuesday in the first elections held under the voter identification requirements of Proposition 200” Matthew Benson, “Proposition 200 Causes Few Headaches at Polls,” \textit{Arizona Republic,} March 15, 2006.
choose to obtain a new photo ID is 8,105 persons.\textsuperscript{80}

**Conclusion**

The turnout of voters in presidential elections in South Carolina, Virginia, Georgia and Louisiana, states with significant African-American populations, as well as in Alabama and Florida, reveals no evidence substantiating the claim that the turnout of minority voters is negatively affected by identification requirements for voters. Available data indicates that the overwhelming percentage of the voting age population, black and white, already have a form of photo identification. It is, therefore, highly unlikely that new and stricter identification requirements for voters will adversely affect the turnout of minority voters, especially given the fail-safe provisional voting requirements in affect across the country as required by HAVA. Many critics of HAVA’s identification requirements made exactly the same claims, and the turnout in the first presidential election after those requirements became effective saw an upsurge in black voting.

Given the numerous prosecutions for voter fraud that have occurred across the United States in recent years, the thousands of fraudulent voter registration forms submitted to election officials, the types of problems cited in the Wisconsin fraud investigation after the 2004 election, and registration and voting by noncitizens, requiring proof of citizenship to register and photo identification to vote is an important means of ensuring the integrity of our election process.\textsuperscript{81} It is not a requirement that will prevent or deter minority voters from casting their ballots, but will help guarantee that their votes are not devalued by fraudulent or noncitizen voting.

*The opinions expressed in this article are those of the author and not those of his employer.*

\textsuperscript{81} Driver’s licenses should only be acceptable as voter identification if they are issued by a state in compliance with the REAL ID Act that requires proof of citizenship or a notation on the face of the card that the holder is not a citizen.
ACT NUMBER E4019904; EAC CONTRACT NUMBER 06-04
Personal Services Contract for Interim Expert Services

Background

Section 241 of H.R. & VA lists a number of election administration topics on which the U.S. Election Assistance Commission may elect to do research. In particular, Section 241(b) (6) and (7) state the two topics of nationwide statistics and methods of identifying, deterring and investigating voting fraud in elections for Federal offices; and identifying, deterring and investigating methods of voter intimidation. The EAC Board of Advisors has recommended that the EAC make research on these topics a high priority.

The EAC seeks to obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation. The EAC needs this expert to conduct a preliminary examination of these topics to determine if a larger research project might be warranted. To promote a balanced and non-partisan approach to this effort, EAC is contracting with two experts, who will work jointly to perform the work described below. This contract is a follow-on agreement to EAC Contract Number 05-66. That agreement for non-severable services expires February 15, 2006, without completion of the project. The originally estimated labor hours for that project were insufficient. As such, the EAC seeks to continue the work started in that previous contract but has changed the scope (or duties) of the contractor to limit project costs. This change is reflected in the scope of work section, below.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants and experts under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such, this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). The initial appointment under this agreement shall be for the intermittent employment of an expert as defined by 5 C.F.R. §304.102(d) and (e). The expert (hereinafter “contractor”) shall work as required by the EAC, without a regularly scheduled tour of duty. Under no circumstances may contractor work more than 225 hours during the term of this agreement (5 C.F.R. §304.103(c)(2)(i)).

Supervision and Management.

The EAC Manager and Contracting Officer’s Representative (COR) for this effort is Peggy Sims. Ms. Sims will provide taskings, and authorize, supervise, review and approve all work and performance. She will also approve all labor hours on invoices and travel vouchers submitted for compensation under this agreement.
Period of Appointment.

The appointment under this contract is temporary and shall be for a period of up to four months. The contract period shall begin February 26, 2006. The contract may be extended and contractor reappointed for an additional period (not exceed one year) upon agreement of both parties. (See 5 C.F.R. §304.103(c)).

Compensation

The consultant shall be paid at a rate of $111 per hour. Contractor shall perform the services prescribed by this agreement as directed by the COR on an intermittent basis. However, in any event, the contractor shall not work more than 41 hours in either of the 2 two week periods that make up each four week pay period. Further, as aforementioned, the contractor may not work more than 225 hours during the term of this agreement. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. COR shall provide contractor notice and authorization when performance under this agreement is required.

The consultant shall not incur overtime and is not eligible for premium pay under subchapter V of chapter 55 of title 5, United States Code. (5 C.F.R. §304.106(b)). The contractor, as an intermittent appointee, is also not entitled to sick or annual leave. Contractor will not receive compensation for Federal holidays when no work is performed. (5 C.F.R. §304.106(b)). The contractor shall not receive automatic adjustments of pay based upon 5 U.S.C. §5303. Contractor's pay rate may be increased at the sole discretion of the Contracting Officer, consistent with Federal regulations. Contractor may be reimbursed for other costs, such as local travel, consistent with this agreement if approved by the COR and submitted in writing via invoice.

Travel

The contractor may be required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC COR. The contractor will be reimbursed for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel. Compensation for travel shall be made in accordance with the rates set forth in the Federal Travel Regulation. The amount reimbursed for travel shall not exceed $6,500 in Federal Fiscal Year 2006.

Release of Information

As a result of the limited employment relationship created by this agreement, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information. All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All
such work produc shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.

Compensation Procedures

Compensation shall be made for work done (labor hours) by submitting invoices. Invoices shall be submitted every four weeks from the date of award. A week shall be from Sunday to Saturday. The first pay period shall begin February 26, 2006. Invoices must be submitted every 4 weeks when compensable work under this contract has been performed. The COR will provide the contractor with an invoice schedule, identifying each of the invoice periods, and model invoice forms. Invoices shall be delivered to the COR for review and approval. Each invoice shall:

(1) Identify each day (by date) that work was performed and the number of labor hours performed that day. Briefly describe the nature of the work performed that day;
(2) State the total number of labor hours that have been expended under the agreement for the invoice period;
(3) State the total number of hours worked for each of the two week periods that make up the total invoice time;
(4) Provide a cumulative total of hours worked during the entire contract performance period (one year);
(5) Submit, as a separate line item, all reimbursable travel costs for approval. The submission must provide dates of travel, receipts and other information as required by the Federal Travel Regulation.
(6) Include the contractor's signature, affirming that information contained in the invoice is accurate.

Duty Location

Contractor's duty station shall be his/her home or place of business. The contractor has access to and shall supply common office equipment to include telecommunications, internet access, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word, Project and Excel). All other resources will be provided by the EAC as needed and at its discretion.

Notices

Any notice, given by any of the parties hereunder, shall be sufficient only if in writing and delivered in person or sent by telegraph, telegram, registered, or regular mail as follows:

To EAC: 1225 New York Avenue, Suite 1100, Washington, DC 20005,
Attention: Contracting Officer Representative, Peggy Sims.
To Contractor: At EAC and at the Contractor's address shown on the Cover Page of this contract or to such other address as either of such parties shall designate by notice given as herein required. Notices hereunder shall be effective in accordance with this clause or on the effective date of the notice whichever is later.

Areas of Responsibility (Statement of Work)

1. Submit a revised work plan reflecting revised due dates for deliverables.

3. Using the description developed for 2 above, perform background research, including both Federal and State administrative and case law review, and a summation of current activities of key government agencies, civic and advocacy organizations regarding these topics. Deliver a written summary of this research and all source documentation.

4. Work in consultation with other EAC staff and the Commissioners to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The Working Group will be provided with the results of the consultant's research (discussed in 2 and 3 above) as background information. The consultant will be responsible for developing a discussion agenda and convene the Working Group with the objective of identifying promising avenues for future research by EAC.

5. The consultant shall be responsible for creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort.

Terms and Conditions

The following additional terms and conditions shall apply to this personal services contract:

a. Federal Acquisition Regulation Clauses Incorporated by Reference:

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. These clauses may be obtained on the internet at http://fasite.hill.af.mil/.

52.203-7 Anti-Kickback Procedures (JUL 1995)

52.203-12 Limitation on Payments to Influence Certain Federal Transactions (Sept 2005)
b. Federal Acquisition Regulation Clauses in Full Text:

**Contract Termination (FAR 52.249-12)**

The Government may terminate this contract at any time upon at least 15 days' written notice by the Contracting Officer to the Contractor. The Contractor, with the written consent of the Contracting Officer, may terminate this contract upon at least 15 days' written notice to the Contracting Officer. (End of Clause)

**Site Visit (FAR 52.237-1)**

Offerors or quoters are urged and expected to inspect the site where services are to be performed and to satisfy themselves regarding all general and local conditions that may affect the cost of contract performance, to the extent that the information is reasonably obtainable. In no event shall failure to inspect the site constitute grounds for a claim after contract award. (End of Clause)

**Protection of Government Buildings, Equipment, and Vegetation (FAR 52.237-2)**

The Contractor shall use reasonable care to avoid damaging existing buildings, equipment, and vegetation on the Government installation. If the Contractor's failure to use reasonable care causes damage to any of this property, the Contractor shall replace or repair the damage at no expense to the Government or the Contracting Officer directs. If the Contractor fails or refuses to make such repair or replacement, the Contractor shall be liable for the costs which may be deducted from the contract price. (End of Clause)

**Covenant Against Contingent Fees (FAR 52.203-5)**

(a) The Contractor warrants that no person or agency has been employed or retained to solicit or obtain this contract upon an agreement or understanding for a contingent fee, expect a bona fide employee or agency. For breach or violation of this warranty,
the Government shall have the right to annul this contract without liability or, in its discretion, to deduct from the contract price or consideration, or otherwise recover, the full amount of the contingent fee.

(b) "Bona fide agency," as used in this clause, means an established commercial or selling agency maintained by a contractor for the purpose of securing business, that neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts nor holds itself out as being able to obtain any Government contract or contracts through improper influence.

"Bona fide employee," as used in this clause, means a person, employed by a contractor and subject to the contractor's supervision and control as to time, place, and manner of performance, who neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts nor holds itself out as being able to obtain any Government contract or contracts through improper influence.

"Contingent Fee," as used in this clause, means any commission, percentage, brokerage, or other fee that is contingent upon the success that a person or concern has in securing a Government contract.

"Improper influence," as used in this clause, means any influence that induces or tends to induce a Government employee or officer to give consideration or to act regarding a Government contract on any basis other than the merits of the matter.

(End of Clause)

**Disputes (FAR 52.233-1), Alternate I**

(a) This contract is subject to the Contract Disputes Act of 1973, as amended (41 U.S.C. 601-615).

(b) Except as provided in the Act, all disputes arising under or relating to this contract shall be resolved under this clause.

(c) "Claim," as used in this clause, means a written demand or written assertion by one of the contracting parties seeking, as a matter of right, the payment of money in a sum certain, the adjustment or interpretation of contract terms, or other relief arising under or relating to this contract. However, a written demand or written assertion by the Contractor seeking the payment of money exceeding $100,000 is not a claim under the Act until certified. A voucher, invoice, or other request for payment that is not in dispute when submitted is not a claim under the Act. The submission may be converted to a claim under the Act, by complying with the submission and certification requirements of this clause, if it is disputed either as to liability or amount or if not acted upon in a reasonable time.

(d) (1) A claim by the Contractor shall be made in writing and, unless otherwise stated in this contract, submitted within 6 years after accrual of the claim to the Contracting Officer for a written decision. A claim by the Government against the Contractor shall be subject to a written decision by the Contracting Officer.
(i) The contractor shall provide the certification specified in paragraph (d)(2)(iii) of this clause when submitting any claim exceeding $100,000.

(ii) The certification requirement does not apply to issues in controversy that have not been submitted as all or part of a claim.

(iii) The certification shall state as follows: "I certify that the claim is made in good faith; that the supporting data are accurate and complete to the best of my knowledge and belief; that the amount requested accurately reflects the contract adjustment for which the Contractor believes the Government is liable; and that I am duly authorized to certify the claim on behalf of the Contractor."

(3) The certification may be executed by any person duly authorized to bind the Contractor with respect to the claim.

(e) For Contractor claims of $100,000 or less, the Contracting Officer must, if requested in writing by the Contractor, render a decision within 60 days of the request. For Contractor-certified claims over $100,000, the Contracting Officer must, within 60 days, decide the claim or notify the Contractor of the date by which the decision will be made.

(f) The Contracting Officer's decision shall be final unless the Contractor appeals or files a suit as provided in the Act.

(g) If the claim by the Contractor is submitted to the Contracting Officer or a claim by the Government is presented to the Contractor, the parties, by mutual consent, may agree to use alternative dispute resolution (ADR). If the Contractor refuses an offer for ADR, the Contractor shall inform the Contracting Officer, in writing, of the Contractor's specific reasons for rejecting the offer.

(h) The Government shall pay interest on the amount found due and unpaid from

(1) the date that the Contracting Officer receives the claim (certified, if required); or

(2) the date that payment otherwise would be due, if that date is later, until the date of payment.

With regard to claims having defective certifications, as defined in FAR 33.201, interest shall be paid from the date that the Contracting Officer initially receives the claim. Simple interest on claims shall be paid at the rate, fixed by the Secretary of the Treasury as provided in the Act, which is applicable to the period during which the Contracting Officer receives the claim and then at the rate applicable for each 6-month period as fixed by the Treasury Secretary during the pendency of the claim.
(i) The Contractor shall proceed diligently with performance of this contract, pending final resolution of any request for relief, claim, appeal, or action arising under or relating to the contract, and comply with any decision of the Contracting Officer.

(End of Clause)

By signing below, contractor agrees to furnish the personal services set forth or otherwise identified, above, consistent with the conditions noted above and for the consideration stated herein.

Contractor:

Towa Wang

EAC Contracting Officer:

Thomas Wilkey
Executive Director
Background

Section 241 of HAVA lists a number of election administration topics on which the U.S. Election Assistance Commission may elect to do research. In particular, Section 241(b) (6) and (7) state the two topics of nationwide statistics and methods of identifying, deterring and investigating voting fraud in elections for Federal offices; and identifying, deterring and investigating methods of voter intimidation. The EAC Board of Advisors has recommended that the EAC make research on these topics a high priority.

The EAC seeks to obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation. The EAC needs this expert to conduct a preliminary examination of these topics to determine if a larger research project might be warranted. To promote a balanced and non-partisan approach to this effort, EAC is contracting with two experts, who will work jointly to perform the work described below. This contract is a follow-on agreement to EAC Contract Number 05-67. That agreement for non-severable services expires February 25, 2006, without completion of the project. The originally estimated labor hours for the project were insufficient. As such, the EAC seeks to continue the work started in the previous contract but has changed the scope (or duties) of the contractor to limit project costs. This change is reflected in the scope of work section, below.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants and experts under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such, this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). The initial appointment under this agreement shall be for the intermittent employment of an expert as defined by 5 C.F.R. §304.102(d) and (e). The expert (hereinafter "contractor") shall work as required by the EAC, without a regularly scheduled tour of duty. Under no circumstances may contractor work more than 225 hours during the term of this agreement (5 C.F.R. §304.103(c)(2)(i)).

Supervision and Management.

The EAC Manager and Contracting Officer’s Representative (COR) for this effort is Peggy Sims. Ms. Sims will provide taskings, and authorize, supervise, review and approve all work and performance. She will also approve all labor hours on invoices and travel vouchers submitted for compensation under this agreement.
Period of Appointment.

The appointment under this contract is temporary and shall be for a period of up to four months. The contract period shall begin February 26, 2006. The contract may be extended and contractor reappointed for an additional period (not exceed one year) upon agreement of both parties. (See 5 C.F.R. §304.103(c)).

Compensation

The consultant shall be paid at a rate of $111 per hour. Contractor shall perform the services prescribed by this agreement as directed by the COR on an intermittent basis. However, in any event, the contractor shall not work more than 41 hours in either of the 2 two week periods that make up each four week pay period. Further, as aforementioned, the contractor may not work more than 225 hours during the term of this agreement. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. COR shall provide contractor notice and authorization when performance under this agreement is required.

The consultant shall not incur overtime and is not eligible for premium pay under subchapter V of chapter 55 of title 5, United States Code. (5 C.F.R. §304.106(b)). The contractor, as an intermittent appointee, is also not entitled to sick or annual leave. Contractor will not receive compensation for Federal holidays when no work is performed. (5 C.F.R. §304.106(b)). The contractor shall not receive automatic adjustments of pay based upon 5 U.S.C. §5303. Contractor's pay rate may be increased at the sole discretion of the Contracting Officer, consistent with Federal regulations. Contractor may be reimbursed for other costs, such as local travel, consistent with this agreement if approved by the COR and submitted in writing via invoice.

Travel

The contractor may be required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC COR. The contractor will be reimbursed for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel. Compensation for travel shall be made in accordance with the rates set forth in the Federal Travel Regulation. The amount reimbursed for travel shall not exceed $3,500 in Federal Fiscal Year 2006.

Release of Information

As a result of the limited employment relationship created by this agreement, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information. All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All
such work product shall be turned over to the EAC upon completion of your appointment
term or as directed by the EAC. The EAC shall have exclusive rights over this material.
You may not release government information or documents without the express written
permission of the EAC.

Compensation Procedures

Compensation shall be made for work done (labor hours) by submitting invoices.
Invoices shall be submitted every four weeks from the date of award. A week shall be
from Sunday to Saturday. The first pay period shall begin February 26, 2006. Invoices
must be submitted every 4 weeks when compensable work under this contract has been
performed. The COR will provide the contractor with an invoice schedule, identifying
each of the invoice periods, and model invoice forms. Invoices shall be delivered to the
COR for review and approval. Each invoice shall:

(1) Identify each day (by date) that work was performed and the number of labor
hours performed that day. Briefly describe the nature of the work perform for
that day;
(2) State the total number of labor hours that have been expended under the
agreement for the invoice period;
(3) State the total number of hours worked for each of the two week periods that
make up the total invoice time;
(4) Provide a cumulative total of hours worked during the entire contract
performance period (one year);
(5) Submit, as a separate line item, all reimbursable travel costs for approval.
The submission must provide dates of travel, receipts and other information
as required by the Federal Travel Regulation.
(6) Include the contractor's signature, affirming that information contained in the
invoice is accurate.

Duty Location

Contractor's duty station shall be his/her home or place of business. The contractor has
access to and shall supply common office equipment to include telecommunications,
internet access, a computer, office supplies, facsimile machine and common workplace
software (including Microsoft Word, Project and Excel). All other resources will be
provided by the EAC as needed and at its discretion.

Notices

Any notice, given by any of the parties hereunder, shall be sufficient only if in writing
and delivered in person or sent by telegraph, telegram, registered, or regular mail as
follows:

To EAC: 1225 New York Avenue, Suite 1100, Washington, DC 20005,
Attention: Contracting Officer Representative, Peggy Sims.
To Contractor: At EAC and at the Contractor's address shown on the Cover Page of this contract or to such other address as either of such parties shall designate by notice given as herein required. Notices hereunder shall be effective in accordance with this clause or on the effective date of the notice whichever is later.

Areas of Responsibility (Statement of Work)

1. Submit a revised work plan reflecting revised due dates for deliverables.

3. Using the description developed for 2 above, perform background research, including both Federal and State administrative and case law review, and a summation of current activities of key government agencies, civic and advocacy organizations regarding these topics. Deliver a written summary of this research and all source documentation.

4. Work in consultation with other EAC staff and the Commissioners to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The Working Group will be provided with the results of the consultant’s research (discussed in 2 and 3, above) as background information. The consultant will be responsible for developing a discussion agenda and convene the Working Group with the objective of identifying promising avenues for future research by EAC.

5. The consultant shall be responsible for creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort.

Terms and Conditions

The following additional terms and conditions shall apply to this personal services contract:

a. Federal Acquisition Regulation Clauses Incorporated by Reference:

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. These clauses may be obtained on the internet at http://farsite.hill.af.mil/.

52.203-7 Anti-Kickback Procedures (JUL 1995)

52.203-12 Limitation on Payments to Influence Certain Federal Transactions (Sept 2005)
b. Federal Acquisition Regulation Clauses in Full Text:

**Contract Termination (FAR 52.249-12)**

The Government may terminate this contract at any time upon at least 15 days’ written notice by the Contracting Officer to the Contractor. The Contractor, with the written consent of the Contracting Officer, may terminate this contract upon at least 15 days’ written notice to the Contracting Officer. (End of Clause)

**Site Visit (FAR 52.237-1)**

Offerors or quoters are urged and expected to inspect the site where services are to be performed and to satisfy themselves regarding all general and local conditions that may affect the cost of contract performance, to the extent that the information is reasonably obtainable. In no event shall failure to inspect the site constitute grounds for a claim after contract award. (End of Clause)

**Protection of Government Buildings, Equipment, and Vegetation (FAR 52.237-2)**

The Contractor shall use reasonable care to avoid damaging existing buildings, equipment, and vegetation on the Government installation. If the Contractor’s failure to use reasonable care causes damage to any of this property, the Contractor shall replace or repair the damage at no expense to the Government as the Contracting Officer directs. If the Contractor fails or refuses to make such repair or replacement, the Contractor shall be liable for the cost, which may be deducted from the contract price. (End of Clause)

**Covenant Against Contingent Fees (FAR 52.203-5)**

(a) The Contractor warrants that no person or agency has been employed or retained to solicit or obtain this contract upon an agreement or understanding for a contingent fee, expect a bona fide employee or agency. For breach or violation of this warranty,
the Government shall have the right to annul this contract without liability or, in its
discretion, to deduct from the contract price or consideration, or otherwise recover,
the full amount of the contingent fee.

(b) "Bona fide agency," as used in this clause, means an established commercial or
selling agency, maintained by a contractor for the purpose of securing business, that
neither exerts nor proposes to exert improper influence to solicit or obtain
Government contracts nor holds itself out as being able to obtain any Government
contract or contracts through improper influence.

"Bona fide employee," as used in this clause, means a person, employed by a
contractor and subject to the contractor's supervision and control as to time, place,
and manner of performance, who neither exerts nor proposes to exert improper
influence to solicit or obtain Government contracts nor holds itself out as being able
to obtain any Government contract or contracts through improper influence.

"Contingent Fee," as used in this clause, means any commission, percentage,
brokerage, or other fee that is contingent upon the success that a person or concern
has in securing a Government contract.

"Improper influence," as used in this clause, means any influence that induces or
tends to induce a Government employee or officer to give consideration or to act
regarding a Government contract on any basis other than the merits of the matter.
(End of Clause)

Disputes (FAR 52.233-1), Alternate I

(a) This contract is subject to the Contract Disputes Act of 1978, as amended (41

(b) Except as provided in the Act, all disputes arising under or relating to this contract
shall be resolved under this clause.

(c) "Claim," as used in this clause, means a written demand or written assertion by
one of the contracting parties seeking, as a matter of right, the payment of money in a
sum certain, the adjustment or interpretation of contract terms, or other relief arising
under or relating to this contract. However, a written demand or written assertion by
the Contractor seeking the payment of money exceeding $100,000 is not a claim
under the Act until certified. A voucher, invoice, or other routine request for payment
that is not in dispute when submitted is not a claim under the Act. The submission
may be converted to a claim under the Act, by complying with the submission and
certification requirements of this clause, if it is disputed either as to liability or
amount or is not acted upon in a reasonable time.

(d) (1) A claim by the Contractor shall be made in writing and, unless otherwise
stated in this contract, submitted within 6 years after accrual of the claim to the
Contracting Officer for a written decision. A claim by the Government against the
Contractor shall be subject to a written decision by the Contracting Officer.
(2)

(i) The contractor shall provide the certification specified in paragraph (d)(2)(iii) of this clause when submitting any claim exceeding $100,000.

(ii) The certification requirement does not apply to issues in controversy that have not been submitted as all or part of a claim.

(iii) The certification shall state as follows: "I certify that the claim is made in good faith; that the supporting data are accurate and complete to the best of my knowledge and belief; that the amount requested accurately reflects the contract adjustment for which the Contractor believes the Government is liable; and that I am duly authorized to certify the claim on behalf of the Contractor."

(3) The certification may be executed by any person duly authorized to bind the Contractor with respect to the claim.

(e) For Contractor claims of $100,000 or less, the Contracting Officer must, if requested in writing by the Contractor, render a decision within 60 days of the request. For Contractor-certified claims over $100,000, the Contracting Officer must, within 60 days, decide the claim or notify the Contractor of the date by which the decision will be made.

(f) The Contracting Officer's decision shall be final unless the Contractor appeals or files a suit as provided in the Act.

(g) If the claim by the Contractor is submitted to the Contracting Officer or a claim by the Government is presented to the Contractor, the parties, by mutual consent, may agree to use alternative dispute resolution (ADR). If the Contractor refuses an offer for ADR, the Contractor shall inform the Contracting Officer, in writing, of the Contractor's specific reasons for rejecting the offer.

(h) The Government shall pay interest on the amount found due and unpaid from

(1) the date that the Contracting Officer receives the claim (certified, if required); or

(2) the date that payment otherwise would be due, if that date is later, until the date of payment.

With regard to claims having defective certifications, as defined in FAR 33.201, interest shall be paid from the date that the Contracting Officer initially receives the claim. Simple interest on claims shall be paid at the rate, fixed by the Secretary of the Treasury as provided in the Act, which is applicable to the period during which the Contracting Officer receives the claim and then at the rate applicable for each 6-month period as fixed by the Treasury Secretary during the pendency of the claim.
(i) The Contractor shall proceed diligently with performance of this contract, pending final resolution of any request for relief, claim, appeal, or action arising under or relating to the contract, and comply with any decision of the Contracting Officer.
(End of Clause)

By signing below, contractor agrees to furnish the personal services set forth or otherwise identified, above, consistent with the conditions noted above and for the consideration stated herein.

EAC Contracting Officer:  

[Signature]
Thomas Wilkey
Executive Director
Consulting Services to Assist EAC in the Development of a Voting Fraud and Voter Intimidation Project

Background

Section 241 of HAVA lists a number of election administration topics on which the U.S. Election Assistance Commission may elect to do research. In particular, Section 241(b) (6) and (7) state the two topics of nationwide statistics and methods of identifying, deterring and investigating voting fraud in elections for Federal offices; and identifying, deterring and investigating methods of voter intimidation. The EAC Board of Advisors has recommended that the EAC make research on these topics a high priority.

The EAC seeks to obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation. The EAC needs this consultant to conduct a preliminary examination of these topics to determine if a larger research project might be warranted. If so, the consultant would also be tasked to define the scope of the project and prepare a Statement of Work for the EAC to use for a subsequent competitive procurement. To promote a balanced and non-partisan approach to this effort, EAC is contracting with two consultants, who will work jointly to perform the work described below.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). As a result of this unique relationship, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information, travel and conduct. All research, information, documents and any other intellectual property, (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express permission of the EAC.

Supervision and Management.

The EAC Project Manager for this effort is Margaret Sims, EAC Research Specialist. Ms. Sims will provide taskings, and supervise, review and approve all work and performance.
Period of Appointment, Compensation and Travel.

The period of appointment under this contract is estimated at six months. The appointment shall constitute intermittent appointment (without a regularly scheduled tour of duty) per 5 C.F.R. §340.401(b). The consultant shall not incur overtime. The consultants shall not receive automatic adjustments of pay based upon 5 U.S.C. 5303. The consultants are not eligible for sick and annual leave, nor compensation for work performed on federal holidays. The Consultant is expected to work 450 hours during the estimated six month appointment period. These hours must be distributed evenly over the period so that the Consultant is working approximately, but no more than 20 hours per week. The consultant shall be paid at a rate of $111 per hour. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. The project at issue is sought to be completed within the sixth month period. The period of appointment shall continue until the project, outlined below, is completed.

Consultant’s duty station shall be his/her home or place of business. The consultant has access to and shall supply common office equipment to include telecommunications, internet, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word and Excel). Other resources will be provided by the EAC as needed and at its discretion.

The Consultant is required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC per Federal Travel Regulations and EAC policy. The Consultant will be reimbursed, at the Federal government rates, for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel.

Areas of Responsibility

2. Using the description developed above, perform background research, including both Federal and State administrative and case law review, and a summation of current activities of key government agencies, civic and advocacy organizations regarding these topics. Deliver a written summary of this research and all source documentation.

3. Work in consultation with other EAC staff and the Commissioners to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The Working Group will be provided with the results of Tasks 1 and 2 as background information. The consultant will be responsible for developing a discussion agenda and convene the Working Group with the objective of identifying promising avenues for future research by EAC.
4. The consultant shall be responsible for creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future research resulting from this effort.

5. Should the EAC decide to pursue one or more of the recommendations made in the report noted above, the consultant will be responsible for defining the appropriate project scope(s) and preparing Statement(s) of Work sufficient for use in a competitive procurement.

Compensation Procedures

Compensation shall be made for work done by submitting invoices. Invoices shall be submitted on a monthly basis. These invoices shall state the number of labor hours that have been expended. Invoices shall be delivered to Ms. Margaret Sims for review and Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington DC 20005. Compensation for travel shall be submitted by travel voucher consistent with federal travel regulation and EAC requirements.

Termination

This consultant contract can be terminated without cause in advance of the current end date by two weeks' notice in writing by either of the parties.

Estimated Project Timetable.

Mr. Job Serebrov
2110 South Spring Street
Little Rock, AR 72206

Dear Mr. Serebrov:

Enclosed is a signed personal services contract (EAC 05-67) in the amount for the provision of services to the U.S. Election Assistance Commission (EAC) in researching and developing a plan for a voter fraud and intimidation study. On or about September 1, 2005, an EAC employee communicated to you that EAC agreed to enter this personal services agreement with you. You began work based upon this notice of award. Despite the fact that the agreement was entered and communicated by an unauthorized person, EAC has reviewed the contract and concluded that ratification of this agreement is appropriate. EAC has ratified the agreement made with you on September 1, 2005. EAC has also received your first invoice for the period September 1 through September 30. That invoice will be reviewed and placed in line for payment.

To acknowledge receipt of this contract, please countersign and date below and return one copy of this letter to the attention of Nicole Mortellito.

We appreciate your work on these important efforts.

Sincerely,

Gracia Hillman

FINAL DRAFT
For Review by the Standards Board and Board of Advisors

Report to the
U. S. Election Assistance Commission
On
Best Practices to Improve Voter Identification Requirements
Pursuant to the
HELP AMERICA VOTE ACT OF 2002
Public Law 107-252

May 16, 2006
Submitted by
The Eagleton Institute of Politics, Rutgers, The State University of New Jersey
The Moritz College of Law, The Ohio State University
The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

The Eagleton Institute explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

The Moritz College of Law has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. Election Law @ Moritz illuminates public understanding of election law and its role in our nation’s democracy.

A draft of this report and the statistical analysis in its appendix were critiqued by a Peer Review Group. The comments of its members improved the quality of our work. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in our recommendations.

REPORT AND RECOMMENDATIONS TO THE EAC
VOTER IDENTIFICATION ISSUES

Report Background
The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

EXECUTIVE SUMMARY AND RECOMMENDATIONS

Background and Methods
This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.
Opponents seek to forestall more stringent identification requirements, such as for government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters --such as, they argue, racial and ethnic minorities, the young, and elderly voters-- may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.

Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate and investigates whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout, and important first step in assessing tradeoffs between ballot security and ballot access. The aim is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis was conducted to examine the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on turnout and on vote fraud is to collect more information on both topics systematically and regularly.
Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:¹ the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.² Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, although it used different statistical methods and two different sets of data on turnout in 2004 election, it points to the same general finding. As discussed at greater length in the appendix to this report, stricter voter identification requirements were correlated with reduced turnout in the models employed.³ As explained below, these models find that a statistically significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible

² Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).
³ Appendix C: Tim Vercellotti, Eagleton Institute of Politics, Analysis of Effects of Voter Identification Requirements on Turnout.
voters, however, the tradeoffs between ballot security and ballot access cannot be assessed fully.

Methodology
The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters. The categories range from “Stating Name” which we judge to be somewhat less demanding than “Signing Name.” “Signature Match” requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding that the voter simply signing. “Present ID” requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government “Photo ID” as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the “maximum” and “minimum” identification requirements. The term “maximum” refers to the most that voters may be asked to do or show at the polling place (putting aside cases in which particular voter’s eligibility may be questioned pursuant to a state challenge process). The term “minimum,” on the other hand, refers to the most that voters can be required to do or show, in order to cast regular ballot (again leaving aside a state challenge process). We have included “maximum” requirements in our analysis, and not simply “minimum” requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the “maximum” of being asked to show photo ID may deter some voters even though the “minimum” would allow them to vote without photo ID.

4 Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146
It is worth emphasizing that, at the time of the 2004 election, there was no state that had a “minimum” requirement of showing photo ID—in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U.S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings
As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis’s aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names. With the addition of the registration closing data to the aggregate analysis, photo id is no longer a
significant predictor of turnout. Signature match and non-photo id remain significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a “maximum” requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a “minimum” requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws — such as less user-friendly voter registration systems — may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen’s right to privacy (protecting social security numbers from public disclosure, for
example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast. And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC
The dynamics of Voter ID requirements—how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls—are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.

2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls.

Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.
REVISED FINAL DRAFT
For review by the EAC's Advisory Boards

or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess
the number of ineligible voters who will be prevented from voting by the stricter ID
requirements.

3. Encourage or require the states in the 2006 election and beyond, to collect and report
reliable, credible information on the relationship between ballot access and ballot
security. EAC should publish an analysis of this information to provide a sound factual
basis for the states to consider as they estimate the incidence of the kinds of vote fraud
that more stringent ID requirements may prevent. The analysis should describe the
dynamics of the voter ID process in preserving the security of the ballot. EAC can also
use this information to encourage the states to assess the effectiveness of programs to
ensure that all eligible voters have required ID and are permitted to vote in future
elections. Well-designed longitudinal studies in the states can show the results of
changing voter ID requirements on electoral participation over time. The studies should
include precinct-level data to provide the fine-grained analysis that can provide a solid
foundation for policy.

I. Useful information could be supplied by state-sponsored surveys of voters by local
election officials. It would make clear why those who cast a provisional ballot were
found ineligible to cast a regular ballot. The answers would illuminate the frequency
with which ID issues divert voters into the provisional ballot line.

II. Surveys to ask voters what they know about the voter ID requirements would also
provide useful context for evaluating the effect of various voter ID requirements on
electoral participation.

III. Spot checks by state election officials on how the identification process works at
polling places could provide information on how closely actual practice tracks
statutory or regulatory requirements. Such reports should be available to the
public.

4. Encourage states to examine the time period allowed for voters who cast a provisional
ballot because they lacked required ID to return with their identification. In eleven states,
voters who had to cast a provisional ballot because they lacked the ID required for a
regular ballot were permitted to return later with their ID. Their provision of this ID is the
critical step in evaluating the ballots. The length of the period in which the voter may
return with ID is important. In setting the time period for return, which now varies among
the states from the same day to about two weeks, states should consider three factors:
the convenience of the voter, the total time allowed to evaluate ballots\(^6\), and the safe harbor provision in presidential elections.

5. Recommendations to the states from EAC should reflect current judicial trends. Requirements that voters provide some identifying documentation have been upheld, where photo ID is not the only acceptable form. Whether laws requiring photo ID will be upheld is more uncertain.

SUMMARY OF RESEARCH

Background and Approach of the Study

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether to vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

- Bowler, Brockington and Donovan in “Election Systems and Voter Turnout: Experiments in the United States”. The Journal of Politics, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems.
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." American Political Science Review. 61:2 (June 1967) found that local variations in the

\(^6\) Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.
rate of voting are most directly tied to variations in the rate of registering to vote, and that
the rate of registering to vote in localities is most directly related to the laws and
administration of the registration process. They concluded that the decline in voting over
the past 80 years was due, in part, to the rise of registration laws.

- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly.* 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics.* 59:2 (May 1997); concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.

- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior.* 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review.* 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review.* 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.

- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review.* 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior.* 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.
For review by the EAC’s Advisory Boards

- Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior*. 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics.*, 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

**Voter ID requirements on Election Day**

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related. The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.8

---

7 As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

8 Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."
We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare. Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter ID

---

9 "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." Harvard Law Review 119:1144. John Fund's 2004 book, Stealing Elections: How Voter Fraud Threaten Our Democracy, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about disenfranchisement; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with voter fraud.
ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot. Voter ID requirements that require voters to bring a document to the polls--rather than simply sign their names--may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected. And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards--legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest 7 questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?12

10 For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

11 The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. Election Day Study, Chapter 6, p. 5.

12 "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)
2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?\footnote{See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.}

3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?\footnote{In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.}

4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.\footnote{“Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements.” Harvard Law Review 127:1144 (2006)} A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?\footnote{For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).}

6. Does it comply with the letter and spirit of Voting Rights Act?

7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it,
intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

**Voter ID and Turnout**

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, *Voter ID Requirements*. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states). Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one’s name, signing one’s name, matching one’s signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all “photo ID” states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as “maximum,” the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one’s signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum requirements.

---

17 Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

18 As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.
identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, no state had a "minimum" requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state's voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice. Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state's legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

---

19 One state election official told us that, “We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is.”

* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

1 Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

2 Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

3 Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

4 Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

5 Voters lacking a photo ID could vote by providing another form of ID in 2004.

6 Voters lacking a photo ID could vote by providing another form of ID in 2004.

Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)
Findings of the statistical analysis
The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ($r = -.30$, $p < .05$). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ($r = -.20$, $p = .16$). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnover rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

This table displays the mean turnout using the aggregate county level data for each state in 2004.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend
emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.21

Voter identification requirements are just one factor that may affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American 22
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus our model takes into account the number of days between each state’s registration deadline and the election.

21 The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

22 The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.
The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that voter identification requirements such as signature matching, a non-photo ID or a photo ID are associated with lower turnout than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county’s population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county’s population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.  

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum

---

23 This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti’s paper in the appendices.
requirements, a signature match, non-photo identification or photo identification were correlated with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from self-described registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens; the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey. In addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have

24 For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991). Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).
25 It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).
influenced turnout in 2004. The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation. Table 3 below shows predicted probabilities (calculated from the probit coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.

---

26 The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

27 The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

28 A probit model is a popular specification of a generalized linear regression model, using the probit link function.

29 In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies stating one’s name to providing photo identification or an affidavit, with all other variables held constant. N.S. = nonsignificant coefficient in the probit model.

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one’s name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names. In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one’s name was the maximum or minimum requirement.

---

30 The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.
Race and ethnicity have generated particular interest in the debate over voter ID requirements. The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

Varying voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis
The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

31 Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.
In the aggregate data, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names.

The signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names. That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day, or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is not the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (Common Cause v. Billups and Indiana Democratic Party v. Rokita). Cases challenging the mandatory disclosure of voters’ Social Security numbers on privacy grounds have yielded mixed results.

Non-photo identification. For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the
only form accepted. In Colorado Common Cause v. Davidson, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in League of Women Voters v. Blackwell, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). Id. This was found to be consistent with HAVA.

Photo ID. Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.\(^\text{32}\) Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (Common Cause v. Billups, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL

\(^{32}\) Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.
In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at *1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. Id. at *1, 3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

Privacy. In Greidinger v. Davis, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters’ social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government’s interest in preventing fraud. On the other hand, in McKay v. Thompson, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public, which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen’s right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Developments since 2004
Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at
the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

Conclusions
The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.  

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents

---

33 In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." Response to the Report of the 2005 Commission on Federal Election Reform, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

The Eagleton Institute explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

The Moritz College of Law has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. Election Law @ Moritz illuminates public understanding of election law and its role in our nation's democracy.

A draft of this report and the statistical analysis in its appendix were critiqued by a Peer Review Group. The comments of its members improved the quality of our work. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in our recommendations.

REPORT AND RECOMMENDATIONS TO THE EAC
VOTER IDENTIFICATION ISSUES

Report Background
The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

EXECUTIVE SUMMARY AND RECOMMENDATIONS

Background and Methods
This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.
- Opponents seek to forestall more stringent identification requirements, such as for government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters—such as, they argue, racial and ethnic minorities, the young, and elderly voters—may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.

- Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate and investigates whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout, and important first step in assessing tradeoffs between ballot security and ballot access. The aim is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis was conducted to examine the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on turnout and on vote fraud is to collect more information on both topics systematically and regularly.
Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are: the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs. Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, although it used different statistical methods and two different sets of data on turnout in 2004 election, it points to the same general finding. As discussed at greater length in the appendix to this report, stricter voter identification requirements were correlated with reduced turnout in the models employed. As explained below, these models find that a statistically significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible voters, it is difficult to evaluate those tradeoffs.

---

1 See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. Political Behavior, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

2 The EAC has contracted with other researchers to study vote fraud issues.

3 Appendix C: Tim Vercellotti, Eagleton Institute of Politics, Analysis of Effects of Voter Identification Requirements on Turnout.
voters, however, the tradeoffs between ballot security and ballot access cannot be assessed fully.

Methodology
The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states’ ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters. The categories range from “Stating Name” which we judge to be somewhat less demanding than “Signing Name.” “Signature Match” requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding that the voter simply signing. “Present ID” requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government “Photo ID” as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the “maximum” and “minimum” identification requirements. The term “maximum” refers to the most that voters may be asked to do or show at the polling place (putting aside cases in which particular voter’s eligibility may be questioned pursuant to a state challenge process). The term “minimum,” on the other hand, refers to the most that voters can be required to do or show, in order to cast regular ballot (again leaving aside a state challenge process). We have included “maximum” requirements in our analysis, and not simply “minimum” requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the “maximum” of being asked to show photo ID may deter some voters even though the “minimum” would allow them to vote without photo ID.

Even the most relaxed provisions for identification at the polls — anything stricter than the honor system used in North Dakota — will impose some burden on particular voters. Harvard Law Review 119:1146
It is worth emphasizing that, at the time of the 2004 election, there was no state that had a "minimum" requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings
As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis's aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names. With the addition of the registration closing data to the aggregate analysis, photo id is no longer a
significant predictor of turnout. Signature match and non-photo id remain significant and
negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age
population.

The non-photo identification requirement showed the most significant and consistent correlation
with reduced turnout. This result may be surprising given the intense debates surrounding photo
identification requirements. The effect of photo ID requirements cannot, however, be assessed
from the data the statistical analysis examined, since none of the states had laws in 2004 that
conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a
"maximum" requirement (i.e., the most that voters could be asked to show at the polls)
accepted another type of identification or an affidavit as a "minimum" requirement in the 2004
election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain
unanswered. The data examined in this project could not capture the dynamics of how
identification requirements might lower turnout. If ID requirements dampen turnout, is it because
individuals are aware of the requirements and stay away from the polls because they cannot or
do not want to meet the requirements? Or, do the requirements result in some voters being
turned away when they cannot meet the requirements on Election Day? Other factors that may
also be correlated with stricter ID laws – such as less user-friendly voter registration systems –
may actually be causing lower turnout. The CPS data do not include the information needed to
answer this question. Knowing more about the "on the ground" experiences of voters
concerning identification requirements could guide policy-makers at the state and local level in
determining whether and at what point in the electoral cycle a concerted public information
campaign might be most effective in helping voters to meet identification requirements. Such
knowledge also could help in designing training for election judges to handle questions about,
and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that
voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts
have used a balancing test to weigh the legitimate interest in preventing election fraud against
the citizen's right to privacy (protecting social security numbers from public disclosure, for
example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast. And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements—how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls— are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.

2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls

---

5 Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," Arizona Republic, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.
or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC can also use this information to encourage the states to assess the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.

   I. Useful information could be supplied by state-sponsored surveys of voters by local election officials. It would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.

   II. Surveys to ask voters what they know about the voter ID requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.

   III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks statutory or regulatory requirements. Such reports should be available to the public.

4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors:
REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

the convenience of the voter, the total time allowed to evaluate ballots, and the safe harbor provision in presidential elections.

5. Recommendations to the states from EAC should reflect current judicial trends.
   Requirements that voters provide some identifying documentation have been upheld, where photo ID is not the only acceptable form. Whether laws requiring photo ID will be upheld is more uncertain.

SUMMARY OF RESEARCH
Background and Approach of the Study
Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether the vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". The Journal of Politics, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." American Political Science Review. 61:2 (June 1967) found that local variations in the

---

6 Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.
rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.

- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." Social Science Quarterly. 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," Journal of Politics. 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.

- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," Political Behavior. 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." American Political Science Review. 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." American Political Science Review. 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.

- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." American Political Science Review. 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." Political Behavior. 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.
Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior.* 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics.*, 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

**Voter ID requirements on Election Day**

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related. \(^7\) The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here. \(^8\)

---

\(^7\) As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

\(^8\) Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."
We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare. Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter ID

9 "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." Harvard Law Review 119:1144. John Fund’s 2004 book, Stealing Elections: How Voter Fraud Threaten Our Democracy, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about disenfranchisement; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with voter fraud.
ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot. Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected. And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards --legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest 7 questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?12
REVISED FINAL DRAFT
For review by the EAC's Advisory Boards

2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?¹³

3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?¹⁴

4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.¹⁵ A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?¹⁶

6. Does it comply with the letter and spirit of Voting Rights Act?

7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it,

---

¹³ See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

¹⁴ In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state’s voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

¹⁵ "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

¹⁶ For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).
intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

Voter ID and Turnout

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, Voter ID Requirements. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states). Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one’s name, signing one’s name, matching one’s signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all “photo ID” states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID. The report refers to this set of ID requirements as “maximum,” the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one’s signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum

17 Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

18 As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.
identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, no state had a "minimum" requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state's voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice. Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state's legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

---

19 One state election official told us that, "We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is."

* States applies only HAVA’s ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.
1 Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.
2 Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.
3 Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.
4 Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.
5 Voters lacking a photo ID could vote by providing another form of ID in 2004.
6 A Texas voter could cast a ballot by providing another form of ID in 2004.
7 Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.
8 Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)
Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements (r = -.30, p < .05). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant (r = -.20, p = .16). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

This table displays the mean turnout using the aggregate county level data for each state in 2004.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend
emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.21

Voter identification requirements are just one factor that may affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American 22
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus our model takes into account the number of days between each state’s registration deadline and the election.

21 The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one’s name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

22 The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.
The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that voter identification requirements such as signature matching, a non-photo ID or a photo ID are associated with lower turnout than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election. 23

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum

23 This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.
requirements, a signature match, non-photo identification or photo identification were correlated with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from self-described registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens; the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey. In addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have

---

24 For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991). Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

25 It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).
influenced turnout in 2004. The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one’s name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation. Table 3 below shows predicted probabilities (calculated from the probit coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.

---

*26 The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

*27 The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

*28 A probit model is a popular specification of a generalized linear regression model, using the probit link function.

*29 In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one’s name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names. In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one’s name was the maximum or minimum requirement.

---

30 The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.
Race and ethnicity have generated particular interest in the debate over voter ID requirements. The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

Varying voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis
The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.
In the aggregate data, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names.

The signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names. That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day, or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question.

Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Litigation Over Voter ID Requirements
A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is not the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful.

To date, only two cases have considered laws requiring voters to show photo ID (Common Cause v. Billups and Indiana Democratic Party v. Rokita). Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

Non-photo identification. For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the
only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeier*, No. 04-CV-4653, 2004 WL

---

32 Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.
In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

**Developments since 2004**
REVISED FINAL DRAFT
For review by the EAC's Advisory Boards

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stages of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver’s license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver’s license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at
the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

**Conclusions**

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.  

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents.

---

33 In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

On

Best Practices to Improve Voter Identification Requirements

Pursuant to the

HELP AMERICA VOTE ACT OF 2002

Public Law 107-252

May 16, 2006

Submitted by

The Eagleton Institute of Politics, Rutgers, The State University of New Jersey
The Moritz College of Law, The Ohio State University
The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

The Eagleton Institute explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

The Moritz College of Law has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. Election Law @ Moritz illuminates public understanding of election law and its role in our nation's democracy.

REPORT AND RECOMMENDATIONS TO THE EAC
VOTER IDENTIFICATION ISSUES

Report Background
The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

EXECUTIVE SUMMARY AND RECOMMENDATIONS

Background and Methods
This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.
Opponents seek to forestall more stringent identification requirements, such as for government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters --such as, they argue, racial and ethnic minorities, the young, and elderly voters-- may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.

Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter-ID debate and investigates whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout, and important first step in assessing tradeoffs between ballot security and ballot access. The aim is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis was conducted to examine the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on turnout and on vote fraud is to collect more information on both topics systematically and regularly.
Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:¹ the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.² Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, although it used different statistical methods and two different sets of data on turnout in 2004 election, it points to the same general finding. As discussed at greater length in the appendix to this report, stricter voter identification requirements were correlated with reduced turnout in the models employed.³ As explained below, these models find that a statistically significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible

¹ See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. Political Behavior, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).
² The EAC has contracted with other researchers to study vote fraud issues.
³ Appendix C: Tim Vercellotti, Eagleton Institute of Politics, Analysis of Effects of Voter Identification Requirements on Turnout.
voters, however, the tradeoffs between ballot security and ballot access cannot be assessed fully.

Methodology
The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters. The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding that the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be asked to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be required to do or show, in order to cast regular ballot (again leaving aside a state challenge process). We have included "maximum" requirements in our analysis, and not simply "minimum" requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the "maximum" of being asked to show photo ID may deter some voters even though the "minimum" would allow them to vote without photo ID.

---

4 Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146
It is worth emphasizing that, at the time of the 2004 election, there was no state that had a "minimum" requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings
As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis's aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names. With the addition of the registration closing data to the aggregate analysis, photo id is no longer a
significant predictor of turnout. Signature match and non-photo ID remain significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a "maximum" requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a "minimum" requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws — such as less user-friendly voter registration systems — may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for
example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast. And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements —how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls-- are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.

2. Recommend as a best practice the publication of a “Voting Impact Statement” by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls

---

5 Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, “New Voter ID Law Goes Smoothly in Chandler,” Arizona Republic, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.
or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC can also use this information to encourage the states to assess the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.

I. Useful information could be supplied by state-sponsored surveys of voters by local election officials. It would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.

II. Surveys to ask voters what they know about the voter ID requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.

III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks statutory or regulatory requirements. Such reports should be available to the public.

4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors:
REVISED FINAL DRAFT
For review by the EAC's Advisory Boards

the convenience of the voter, the total time allowed to evaluate ballots\textsuperscript{6}, and the safe harbor provision in presidential elections.

5. Recommendations to the states from EAC should reflect current judicial trends. Requirements that voters provide some identifying documentation have been upheld, where photo ID is \textit{not} the only acceptable form. Whether laws requiring photo ID will be upheld is more uncertain.

SUMMARY OF RESEARCH
Background and Approach of the Study
Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether the vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". \textit{The Journal of Politics}, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5\% greater turnout than plurality systems.
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." \textit{American Political Science Review}. 61:2 (June 1967) found that local variations in the

\textsuperscript{6} Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.
rate of voting are most directly tied to variations in the rate of registering to vote, and that
the rate of registering to vote in localities is most directly related to the laws and
administration of the registration process. They concluded that the decline in voting over
the past 80 years was due, in part, to the rise of registration laws.

- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout."
  \textit{Social Science Quarterly}. 82:1 (March 2001), found that relaxing registration laws
  produces higher turnout. In particular, they observed that relaxing registration laws is
  more likely to promote voter turnout among those with medium levels of income and
  education, rather than those at the lowest levels. Highton in "Easy Registration and
  Voter Turnout," \textit{Journal of Politics}. 59:2 (May 1997), concluded similarly that registration
  laws affect voter turnout, but also observed that easier registration promotes turnout
  among those in lower socio-economic status.

- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout,
  and the Composition of the American Electorate," \textit{Political Behavior}. 17:2 (June 1995)
  agreed that easier registration promotes higher turnout, but also concluded that higher
  turnout from easier registration would be unlikely to change the composition of the
  electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter
  Turnout." \textit{American Political Science Review}. 85:4 (December 1991) found that
  registration laws decrease voter turnout by depressing the eligible electorate, but that
  lower educated people are not disproportionately impacted by these laws. But
  Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter
  Turnout." \textit{American Political Science Review}. 72:1 (March 1978) found that while
  registration laws did affect both voter turnout and the composition of the electorate, the
  sharpest effect of these restrictions was felt in the South and among the least educated.

- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." \textit{American
  Political Science Review}. 81:1 (March 1987) found that people who move constitute a
  major demographic group affected by registration laws. They estimated that altering laws
  to facilitate voting by recently moved people could increase turnout by 9%. Highton in
  "Residential Mobility, Community Mobility, and Voter Turnout." \textit{Political Behavior}. 22:2
  (June 2000) also found that people who move have lower turnout than stable residents,
  and estimated that the decline was more a result of registration laws than a loss of social
  connections.
Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior.* 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics,* 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

**Voter ID requirements on Election Day**

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related. The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.8

---

7 As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

8 Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."
We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare. Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter

---

9 "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." Harvard Law Review 119:1144. John Fund's 2004 book, Stealing Elections: How Voter Fraud Threaten Our Democracy, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about disenfranchisement; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with voter fraud.
ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot. Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected. And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards --legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest 7 questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?

10 For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

11 The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. Election Day Study, Chapter 6, p. 5.

12 "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)
2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?\(^13\)

3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?\(^14\)

4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.\(^15\) A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?\(^16\)

6. Does it comply with the letter and spirit of Voting Rights Act?

7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it,

\(^13\) See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

\(^14\) In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state’s voter identification requirement actually was. Tova Wang, “Warning Bell in Ohio,” December 5, 2005. Website, the Foundation for National Progress.

\(^15\) "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

\(^16\) For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his “Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown,” 62 Washington and Lee Law Review 937 (2005).
intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

Voter ID and Turnout

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, Voter ID Requirements. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states). Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one’s name, signing one’s name, matching one’s signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all “photo ID” states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID. The report refers to this set of ID requirements as “maximum,” the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.18

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one’s signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum

---

17 Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

18 As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.
identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, no state had a "minimum" requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state's voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice. Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state's legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

19 One state election official told us that, "We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is."

\* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

\1 Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

\2 Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

\3 Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

\4 Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

\5 Voters lacking a photo ID could vote by providing another form of ID in 2004.

\6 Voters lacking a photo ID could vote by providing another form of ID in 2004.

\7 Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

\8 Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)
Findings of the statistical analysis
The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ($r = -.30$, $p < .05$). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ($r = -.20$, $p = .16$). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

This table displays the mean turnout using the aggregate county level data for each state in 2004.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend
emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.\(^{21}\)

Voter identification requirements are just one factor that may affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American \(^{22}\)
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to vote becomes more challenging. Thus our model takes into account the number of days between each state's registration deadline and the election.

\(^{21}\) The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

\(^{22}\) The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.
The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that voter identification requirements such as signature matching, a non-photo ID or a photo ID are associated with lower turnout than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.²³

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum

²³ This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.
requirements, a signature match, non-photo identification or photo identification were correlated with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the CPS is the sheer size of the sample. The survey’s Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from self-described registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens; the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey. In addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have

---

24 For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991). Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

REVISED FINAL DRAFT
For review by the EAC’s Advisory Boards

influenced turnout in 2004. The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one’s name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation. Table 3 below shows predicted probabilities (calculated from the probit coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.

26 The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

27 The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

28 A probit model is a popular specification of a generalized linear regression model, using the probit link function.

29 In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies stating one’s name to providing photo identification or an affidavit, with all other variables held constant. N.S. = nonsignificant coefficient in the probit model.

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one’s name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names. In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one’s name was the maximum or minimum requirement.

30 The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.
Race and ethnicity have generated particular interest in the debate over voter ID requirements. The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one’s name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

Varying voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis
The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

31 Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.
In the aggregate data, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names.

The signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names. That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state’s electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day, or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is not the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (Common Cause v. Billups and Indiana Democratic Party v. Rokita). Cases challenging the mandatory disclosure of voters’ Social Security numbers on privacy grounds have yielded mixed results.

Non-photo identification. For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the
only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. 32 Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeier*, No. 04-CV-4653, 2004 WL

---

32 Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.
2428690, at *1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at *1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. Id. at *1.

These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

Privacy. In Greidinger v. Davis, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government’s interest in preventing fraud. On the other hand, in McKay v. Thompson, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Developments since 2004
Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stages of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at
the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

Conclusions

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents.

33 In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." Response to the Report of the 2005 Commission on Federal Election Reform, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005.
with them to the polls, while assuring that each voter who casts a ballot is eligible and votes only once.

The Moritz College of Law, The Ohio State University
This research report on Provisional Voting in the 2004 election is part of a broader analysis that also includes a study of Voter Identification Requirements, a report on which is forthcoming. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

The Eagleton Institute explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

The Moritz College of Law has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. Election Law @ Moritz illuminates public understanding of election law and its role in our nation's democracy.

The Peer Review Group improved the quality of our work by critiquing drafts of our analysis, conclusions and recommendations. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in the policy recommendations of the report.
EXECUTIVE SUMMARY

Background and Methodology

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve the process of provisional voting. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005.

The Help America Vote Act of 2002 (HAVA, Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient. Section 302(a) of HAVA required states to establish provisional balloting procedures by January 2004. The process HAVA outlined left considerable room for variation among the states, arguably including such critical questions as who qualifies as a registered voter eligible to cast a provisional ballot that will be counted and in what jurisdiction (precinct or larger unit) the ballot must be cast in order to be counted.

The general requirement for provisional voting is that, if a registered voter appears at a polling place to vote in an election for Federal office, but either the potential voter's name does not appear on the official list of eligible voters for the polling place, or an election official asserts that the individual is not eligible to vote, that potential voter must be permitted to cast a provisional ballot. In some states, those who should receive a provisional ballot include, in the words of the EAC's Election Day Survey, "first-time voters who registered by mail without identification and cannot provide identification, as required under HAVA..." HAVA also provides that those who vote pursuant to a court order keeping the polls open after the established closing hour shall vote by provisional ballot. Election administrators are required by HAVA to notify individuals of their opportunity to cast a provisional ballot.

1 The Election Center’s National Task Force Report on Election Reform in July 2001 had described provisional ballots as providing “voters whose registration status cannot be determined at the polls or verified at the election office the opportunity to vote. The validity of these ballots is determined later, thus ensuring that no eligible voter is turned away and those truly ineligible will not have their ballots counted.” It recommended “in the absence of election day registration or other solutions to address registration questions, provisional ballots must be adopted by all jurisdictions.” See www.electioncenter.org.

2 The 2004 election saw at least a dozen suits filed on the issue of whether votes cast in the wrong precinct but the correct county should be counted. One federal circuit court decided the issue in Sandusky County Democratic Party v. Blackwell, 387 F.3d565 (6th Cir. 2004), which held that votes cast outside the correct precinct did not have to be counted. The court relied on the presumption that Congress must be clear in order to alter the state-federal balance; thus Congress, the court concluded would have been clearer had it intended to eliminate state control over polling location (387 F.3d at 578). An alternative argument, that HAVA’s definition of “jurisdiction” incorporates the broader definition in the National Voting Rights Act, however, has not been settled by a higher court. But for now states do seem to have discretion in how they define “jurisdiction” for the purpose of counting a provisional ballot.

3 The definition of who was entitled to a provisional ballot could differ significantly among the states. In California, for example, the Secretary of State directed counties to provide voters with the option of voting on a provisional paper ballot if they felt uncomfortable casting votes on the paperless e-voting machines. "I don't want a voter to not vote on Election Day because the only option before them is a touch-screen voting machine. I want that voter to have the confidence that he or she can vote on paper and have the confidence that their vote was cast as marked," Secretary Shelley said. See http://wired.com/news/evote/0.2946.63289.00.html. (Our analyses revealed no differences in the use of provisional ballots in the counties with these paperless e-voting machines.) In Ohio, long lines at some polling places resulted in legal action directing that voters waiting in line be given provisional ballots to enable them to vote before the polls closed. (Columbus Dispatch, November 3, 2004.)
Our research began in late May 2005. It focused on six key questions raised by the EAC.

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?
2. How did this vary between states that had previously had some form of provisional ballot and those that did not?
3. How did litigation affect implementation?
4. How effective was provisional voting in enfranchising qualified voters?
5. Did state and local processes provide for consistent counting of provisional ballots?
6. Did local election officials have a clear understanding of how to implement provisional voting?

To answer those questions, we:

1. Surveyed 400 local (mostly county) election officials to learn their views about the administration of provisional voting and to gain insights into their experience in the 2004 election.
2. Reviewed the EAC’s Election Day Survey, news and other published reports in all 50 states to understand the local background of provisional voting and develop leads for detailed analysis.
3. Analyzed statistically provisional voting data from the 2004 election to determine associations between the use of provisional voting and such variables as states’ experience with provisional voting, use of statewide registration databases, counting out-of-precinct ballots, and use of different approaches to voter identification.
4. Collected and reviewed the provisional voting statutes and regulations in all 50 states.
5. Analyzed litigation affecting provisional voting or growing out of disputes over provisional voting in all states.

Our research is intended to provide EAC with a strategy to engage the states in a continuing effort to strengthen the provisional voting process and increase the consistency with which provisional voting is administered, particularly within a state. As EAC and the states move forward to assess and adopt the recommendations made here, provisional voting merits continuing observation and research. The situation is fluid. As states, particularly those states that did not offer a provisional ballot before 2004, gain greater experience with the process and as statewide voter databases are adopted, the provisional voting process will demand further, research-based refinement.

KEY FINDINGS

Variation among the states
In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million, or just over 63%, were counted. Provisional ballots accounted for a little more than 1% of the final vote tally. These totals obscure the wide variation in provisional voting among the states.\(^4\)

\(^4\) Attachment 1 provides detailed information on how this study classifies the states according to the characteristics of their provisional voting procedures. It also describes how the data used in the statistical analysis may differ from the data in the Election Day Survey, which became available as our research was concluding.

\(^5\) HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.
Final draft
For Review by the Standards Board and Board of Advisors

• Six states accounted for two-thirds of all the provisional ballots cast. The percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%.
• The portion of provisional ballots cast that were counted ranged from 96% in Alaska to 6% in Delaware.
• States with voter registration databases counted, on average, 20% of the provisional ballots cast.
• States without databases counted ballots at more than twice that rate: 44%.
• States that provided more time to evaluate provisional ballots counted a greater proportion of those ballots. Those that provided less than one week counted an average of 35.4% of their ballots, while states that permitted more than 2 weeks, counted 60.8%.

An important source of variation among states was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.

Variation within states
Within states, too, there was little consistency among different jurisdictions. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors (including the training of election judges or poll workers) beyond statewide factors, such as experience or the existence of voter registration databases, also influence the use of provisional ballots.

• In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
• Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot.

Resources available to administer provisional voting varied considerably among and within states. Differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.

• Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.

6 California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.
7 As the Carter-Baker Commission report put it, "provisional ballots were needed half as often in states with unified databases as in states without." Report on the Commission on Federal Election Reform, "Building Confidence in U.S. Elections," September 2005, p. 16.
8 See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.
• Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.

In precincts located in districts where many voters live in poverty and have low levels of income and education, the voting process, in general, may be managed poorly. Provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

The lessons of litigation
Successful legal challenges highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called “wrong precinct issue” — whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. Most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots. This litigation was significant nonetheless.

• First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
• Second --and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right — the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
• Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot.

States move to improve their processes
Shortly after the 2004 election, several states came to the conclusion that the administration of their provisional voting procedures needed to be improved, and they amended their statutes. The new legislation highlights areas of particular concern to states about their provisional voting process.

• Florida, Indiana, Virginia, and Washington have clarified or extended the timeline to evaluate the ballots.
• Colorado, New Mexico, North Carolina, and Washington have passed legislation focused on improving the efficacy and consistency of the voting and counting process.
• Colorado, Arkansas, and North Dakota took up the issue of counting provisional ballots cast in the wrong precinct.

The wide variation in the implementation of provisional voting among and within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices that draw on the experience gained in the 2004 election can be useful in states’ efforts to achieve greater consistency in the administration of provisional voting. The important effect of experience on the administration of the provisional ballot process indicates that the states have much they can learn from each other.
SUMMARY OF RECOMMENDATIONS FOR BEST PRACTICES

State efforts to improve the provisional voting process have been underway since the 2004 election. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states.

Take a quality-improvement approach
Defining what constitutes a successful provisional voting system is difficult. Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. A first step is for states to recognize that improving quality begins with seeing the provisional voting process as a system and taking a systems approach to regular evaluation through standardized metrics with explicit goals for performance.

EAC can facilitate action by the states by recommending as a best practice that:
• Each state collect data systematically on the provisional voting process to permit evaluation of its voting system and assess changes from one election to the next. The data collected should include: provisional votes cast and counted by county; reasons why provisional ballots were not counted, measures of variance among jurisdictions, and time required to evaluate ballots by jurisdiction.

Emphasize the importance of clarity
Above all else, the EAC should emphasize the importance of clarity in the rules by which each state governs provisional voting. As state legislators and election officials prepare for the 2006 election, answers to the questions listed in the recommendation section of this report could be helpful. Among those questions are:
• Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate?
• Do the procedural requirements of the system permit cost-efficient operation?
• How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

Court decisions suggest areas for action
The court decisions following the 2004 election also suggest procedures for states to incorporate into their procedures for provisional voting. EAC should recommend to the states that they:
• Promulgate clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards.
• Provide effective materials to be used by local jurisdictions in training poll workers on such procedures as how to locate polling places for potential voters who show up at the wrong place.
• Make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office. Poll workers need appropriate training to understand their duty to give such voters a provisional ballot.

Assess each stage of the provisional voting process
Beyond the procedures suggested by court decisions, states should assess each stage of the provisional voting process. They can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process.

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot. Our recommendations for best practices to avoid error at the polling place include:

• The layout and staffing of the multi-precinct polling place is important. States should ensure that training materials distributed to every jurisdiction make poll workers familiar with the options available to voters.
• The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting and include take-away information for the voter on the steps in the ballot evaluation process.
• Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. Best practice would be for states should provide guidelines (as do Connecticut and Delaware) to estimate the supply of provisional ballots needed at each polling place.

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted.

• State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Kansas allows voters to proffer their ID by electronic means or by mail, as well as in person.
• More provisional voters have their ballots counted in those states that count ballots cast outside the correct precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence.
• If a state does require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count as long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location. While the best practice might be for poll workers to direct the voter to correct precinct poll workers' advice is not always correct, and the voter should be protect against ministerial error.
• Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.

In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. Our research did not identify an optimum division of the five weeks available.
The best practice here is for states to consider the issue and make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

After the election, timely information to voters about the disposition of their provisional ballot can enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

- Best practice for the states is to establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

**Final observation**

The detailed examination of each stage in the provisional voting process can lay the foundation each state needs to improve its system. Efforts to improve provisional voting may be most effective as part of a broader effort by state and local election officials to strengthen their systems. Collecting and analyzing data about those systems will enable states to identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as ways to reduce the need for voters to cast their ballots provisionally.
Provisional Voting in 2004

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million or just over 63% were counted. Provisional ballots accounted for a little more than 1% of the final vote tally.

These totals obscure the wide variation in provisional voting among the states. Six states accounted for two-thirds of all the provisional ballots cast. State by state, the percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%. The portion of provisional ballots cast that were actually counted also displayed wide variation, ranging from 96% in Alaska to 6% in Delaware. States with voter registration databases counted, on average, 20% of the provisional ballots cast. Those without databases counted provisional ballots at more than twice that rate, 44%.

An important source of variation was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.

- The percentage of the total vote cast as provisional ballots averaged more than 2% in the 25 experienced states. This was 4 times the rate in states new to provisional voting, which averaged 0.47%.
- The experienced states counted an average of 58% of the provisional ballots cast, nearly double the proportion in the new states, which counted just 33% of cast provisional ballots.
- The combined effect of these two differences was significant. In experienced states 1.53% of the total vote came from counted provisional ballots. In new states, provisional ballots accounted for only 0.23% of the total vote.

Those voting with provisional ballots in experienced states had their ballots counted more frequently than those in the new states. This experience effect is evidence that there is room for improvement in provisional balloting procedures, especially in those states new to the process. That conclusion gains support from the perspectives of the local election officials revealed in the survey conducted as a part of this research. Local (mostly county level) election officials from "experienced" states were more likely to:

9 HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.
10 California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.
11 See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.
12 To compensate for the wide differences in vote turnout among the 50 states the average figures here are calculated as the mean of the percent cast or counted rather than from the raw numbers of ballots cast or counted.
13 Managing the provisional voting process can strain the capacity election administrators. For example, Detroit, counted 123 of the 1,350 provisional ballots cast there in 2004. A recent study concluded that Detroit’s 6-day time limit to process provisional ballots was very challenging and unrealistic. To overcome this challenge, the entire department’s employees were mobilized to process provisional ballots. (emphasis added.) GAO Report-05-997, "Views of Selected Local Officials on Managing Voter Registration and Ensuring Citizens Can Vote," September 2005.
• Be prepared to direct voters to their correct precincts with maps;
• Regard provisional voting as easy to implement;
• Report that provisional voting sped up and improved polling place operations
• Conclude that the provisional voting process helped officials maintain accurate registration databases.

Officials from "new" states, on the other hand, were more likely to agree with the statement that provisional voting created unnecessary problems for election officials and poll workers.

If experience with provisional voting does turn out to be a key variable in performance, that is good news. As states gain experience with provisional ballots their management of the process could become more consistent and more effective over subsequent elections. Further information from the EAC on best practices and the need for more consistent management of the election process could sharpen the lessons learned by experience. The EAC can facilitate the exchange of experience among the states and can offer all states information on more effective administration of provisional voting.

Concluding optimistically that experience will make all the difference, however, may be unwarranted. Only if the performance of the "new" states was the result of administrative problems stemming from inexperience will improvement be automatic as election officials move along the learning curve. Two other possibilities exist. Our current understanding of how provisional voting worked in 2004 is not sufficient to determine unambiguously which view is correct.

1. "New" states may have a political culture different from "old" states—That is, underlying features of the "new" states political system may be the reason they had not adopted some form of provisional voting before HAVA. The "new" states may strike a different balance among the competing objectives of ballot access, ballot security and practical administration. They may ascribe more responsibility to the individual voter to take such actions as registering early, finding out where the right precinct is, or re-registering after changing address. They may value keeping control at the local level, rather than ceding authority to state or federal directives. The training they offer poll workers about provisional ballots may not be as frequent or effective as in other states. If the inconsistent performance in the "new" states arises out of this kind of political culture, improving effectiveness in the use of the provisional ballots -- as measured by intrastate consistency in administration—will be harder and take longer to achieve.

2. "Old" states may devote fewer resources to updating their registration files or databases because they consider provisional ballots as a reasonable fail safe way for voters with registration problems a way to cast a ballot. The adoption of statewide voter registration databases in compliance with HAVA therefore may reduce the variation in the use of provisional ballots among the states.

Other influences decreasing consistency among the states include:

14 Despite differing political cultures among states and the latitude HAVA provides states, the statute does, indeed impose some degree of uniformity on issues that Congress thought essential. For example, before HAVA, took effect, "no state gave the voter the right to find out the status of their ballot after the election." Now all offer that opportunity. See Bali and Silver, "The Impact of Politics, Race and Fiscal Strains on State Electoral Reforms after Election 2000," manuscript, Department of Political Science, Michigan State University. Resisting HAVA's mandates through foot-dragging lacks any legitimate foundation in law or policy.
The more rigorous the verification requirements, the smaller the percentage of provisional ballots that were counted. Some states verified provisional ballots by comparing the voter's signature to a sample, some matched such identifying data as address, birth date, or social security number, others required voters who lacked ID at the polling place to return later with the ID to evaluate the provisional ballot, and some required provisional voters to execute an affidavit.  
- In the 4 states that simply matched signatures, nearly 3.5% of the total turnout consisted of provisional ballots, and just under three-fourths of those ballots (73%) were counted.
- In the 14 states that required voters to provide such additional information as address or date of birth just over 1.5% of the total turnout consisted of provisional ballots, and 55% of those ballots were counted.
- In the 14 states that required an affidavit (attesting, for example, that the voter was legally registered and eligible to vote in the jurisdiction) just over one-half of a percent (0.6%) of turnout came from provisional ballots, and less than one-third of those (30%) were counted. (But note that HAVA requires all voters to certify that they are eligible and registered in order to cast a provisional ballot, which is functionally an affidavit. The 14 states described here used an explicit affidavit form.)
- In the 10 states that required voters to return later with identifying documents just under 1.5% of the total turnout came from provisional ballots, and more than half (52%) of these were counted. Voters apparently found this requirement less onerous than the affidavit, even though it required a separate trip to a government office.

Voter registration databases provided information that reduced the number of provisional ballots counted. In states using provisional voting for the first time, states with registered-voter databases counted only 20% of the ballots that were cast. States without such databases counted more than double that rate (44%). As HAVA's requirement for adoption of statewide databases spreads across the country, this variation among states is likely to narrow. Real-time access to a continually updated, statewide list of registered voters should reduce the number of provisional ballots used and reduce the percentage counted since most of those who receive them will be less likely to be actually registered in the state.

States that counted out-of-precinct ballots counted 56% of the provisional ballots cast. States that counted ballots cast only in the proper precinct counted an average of 42% of provisional ballots.

15 See Table 2 in Appendix 2 for information on the verification method used in each state.
16 The Election Day Survey found that states using statewide voter registration databases reported a lower incidence of casting provisional ballots than states without voter registration databases, suggesting that better administration of voter registration rolls might be associated with fewer instances where voters would be required to cast a provisional ballot due to a problem with their voter registration.
17 The Election Day Survey concluded that: "Jurisdictions with jurisdiction-wide provisional ballot acceptance reported higher rates of provisional ballots cast, 2.09 percent of registration or 4.67 percent of ballots cast in polling places, than those with in-precinct-only acceptance, 0.72 and 1.18 percent, respectively. Predictably, those jurisdictions with more permissive jurisdiction-wide acceptance reported higher rates of counting provisional ballots, 71.50 percent, than other jurisdictions, 52.50 percent."
In experienced states, the disparity was even more pronounced: 52% of provisional ballots cast were counted in states requiring in-district ballots, while 70% were counted in those allowing out-of-precinct ballots.

If all states had counted out-of-precinct ballots, perhaps 290,000 more provisional ballots would have been counted across the country.\(^{18}\)

- States that provide a longer the time to evaluate provisional ballots counted a higher proportion of those ballots.\(^{19}\)
  - Fourteen states permitted less than one week to evaluate provisional ballots, 15 states permitted between one and two weeks, and 14 states permitted greater than two weeks\(^ {20}\).
  - Those states that permitted less than one week counted an average of 35.4% of their ballots.
  - States that permitted between one and two weeks counted 47.1%.
  - States that permitted more than 2 weeks, counted 60.8% of the provisional ballots cast\(^ {21}\).
  - The effect of allowing more time for evaluation is felt most strongly in states where more than 1% of the overall turnout was of provisional ballots. In states where provisional ballots were used most heavily, those that permitted less than one week to evaluate ballots counted 58.6% while those that permitted one to two weeks counted 65.0% of ballots, and those states that permitted greater than three weeks verified the highest proportion of provisional ballots, at 73.8%.

Variation Within States

Not only was there little consistency among states in the use of provisional ballots, there was also little consistency within states. This was true in both new and old states. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors beyond statewide factors, such as verification requirements or the time provided for ballot evaluation, also influence the provisional voting process. Reacting to the lack of consistency within states, the Carter-Baker Commission\(^ {22}\) recommended that "states, not counties or municipalities, should establish uniform procedures for the verification and counting of provisional ballots, and that procedure should be applied uniformly throughout the state."

Election Line reported that:

---

\(^{18}\) This estimate is a rough approximation. States that recognize out-of-precinct ballots counted, on average, 56% of the provisional votes cast. Applying that ratio to the 1.9 million provisional ballots cast nationwide would result in 1.1 million provisional ballots that would have been counted if all states accepted out-of-precinct votes. States that did not recognize out-of-precinct ballots counted 42% of the provisional ballots cast, or about 813,000 ballots, for a difference of about 290,000 votes.

\(^{19}\) See Appendix ..., Relationship Between Time Allotted to Verify Provisional Ballots and the Level of Ballots that are Verified, David Andersen, The Eagleton Institute of Politics

\(^{20}\) Many thanks to Ben Shepler, of the Moritz College of Law, for assembling complete data on the time requirements states permitted for the counting of provisional ballots.

\(^{21}\) 43 states are included in this analysis, including Washington D.C. The 7 election-day registration states are omitted, as is Mississippi, which never provided data on provisional ballots. North Carolina is also omitted from the regressions, as it does not have a statewide policy on how it verifies provisional ballots.

\(^{22}\) Recommendation 2.3.2 of the Report of the Commission on Federal Election Reform, "Building Confidence in U.S. Elections," September 2005, p.16. The report also observed that, "...different procedures for counting provisional ballots within and between states led to legal challenges and political protests. Had the margin of victory for the presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated."
In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.

Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot. This would probably not have come to light except for the sharp examination caused by the very close election for governor.

Resources available to administer provisional voting varied considerably among and within states. The result is that differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that:

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.
- Staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.
- Predominantly non-Hispanic, Black jurisdictions reported a greater percentage of polling places or precincts with an inadequate number of poll workers. Predominantly non-Hispanic, Native American jurisdictions reported the second highest percentage of staffing problems.

The conclusions to be drawn from these findings are clear. In voting districts with lower education levels, poverty, and inadequately-staffed polling places, the voting process is unlikely to function well. More people will end up casting provisional ballots. That makes the provisional voting process especially important in such districts. But if jurisdictions struggle with regular voting, how well are they likely to do with the more complicated provisional balloting process? In precincts where the voting process, in general, is managed poorly, provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

**Effectiveness of Provisional Voting**

The certainty of our conclusions about the effectiveness of provisional voting is limited because of the complexity of the problem and a lack of important information. An ideal assessment of how well provisional ballots worked in 2004 would require knowing the decisions of local officials in 200,000 precincts on how to inform voters about provisional voting; their performance in providing a provisional ballot to those qualified to receive one, and their decisions whether to count a provisional ballot. Information needed about the eligibility or registration status of provisional voters is also not available.

We see no automatic correlation between the quality of a state's voting system and either the number of provisional ballots cast or counted. Low numbers could reflect accurate statewide voting data and good voter education. Or they could suggest that provisional ballots were not...
made easily available. High numbers could be seen as signifying an effective provisional voting system or a weak registration process. But we do know that in 2004 provisional ballots allowed 1.2 million citizens to vote, citizens who would otherwise have been turned away from the polls.

Since we do not know the total number of registered voters who might have voted but could not makes a precise, quantitative estimate of the effectiveness of provisional voting impossible. The Cal Tech – MIT Voting Technology Project, however, estimated that 4 – 6 million votes were lost in the 2000 presidential election for the reasons shown in Table 1 below. The estimate is an approximation, but it may provide data good enough for a general assessment of the size of the pool of potential voters who might have been helped by the provisional ballot process.

<table>

</tbody>
</table>

Table 1 Cal Tech – MIT Voting Technology Project Estimates
4 – 6 million votes are lost in presidential elections due to the causes shown in the table. Registration mix-ups (e.g., name not on list) and polling place operations (e.g., directed to wrong precinct) are the causes most likely to be remedied by provisional voting.

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. In 2004, about 1.2 million provisional voters were counted. A rough estimate, then, of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost)\(^{23}\). Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

**Legislative Response**
Indeed, several states\(^{24}\) came to the conclusion that the administration of their provisional voting procedures needed to be improved and amended their statutes after the 2004 election. State legislation adopted since the election points to particular areas of concern.

---

\(^{23}\) Another interpretation of the data should be considered. The Census Bureau’s Current Population Survey (CPS) developed the category of “registration mix-ups” to assess the states’ registration systems. After each election the CPS asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, ‘registration problems’ would cover only voters who went to the polls where the determination that they were not registered was wrong or they were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 8.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

\(^{24}\) Twelve states made statutory or regulatory changes: Arizona, Arkansas, Colorado, Florida, Georgia, Indiana, Louisiana, Montana, New Mexico, North Carolina, Virginia and Wyoming. See Table 4 in Appendix 2.
Not enough time to examine and count the provisional ballots. Florida, Indiana, Virginia, and Washington all have clarified or extended the timeline to evaluate the ballots. But taking more time can prove a problem, particularly in presidential elections with the looming deadline to certify the vote for the Electoral College.25

Lack of uniform rules for counting ballots and effective training of the election officials in interpreting and applying those rules to determine the validity of ballots. Colorado, New Mexico, North Carolina, and Washington have all passed legislation focused on improving the efficacy and consistency of the voting and counting process.

Litigation
Successful legal challenges to the process highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called "wrong precinct issue" – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. These lawsuits were largely unsuccessful in their stated goal: most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots.

This litigation was significant nonetheless.

• First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.

• Second --and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right --the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they persisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.

• Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot – although the litigation regrettably came too late to be truly effective in this regard. In many states, on Election Day 2004, the procedures in place for notifying voters about where to go were less than ideal, reflecting less-than-ideal procedures for training poll workers on this point.

There was also pre-election litigation over the question whether voters who had requested an absentee ballot were entitled to cast a provisional ballot. In both cases (one in Colorado and one, decided on Election Day, in Ohio), the federal courts ruled that HAVA requires that these voters receive a provisional ballot. Afterwards, it is for state officials under state law to

25 The resources available to evaluate and count provisional ballots within a tight schedule may not be easily available. The General Accounting Office reports that Detroit, where 1,350 provisional ballots were cast and 123 counted, found the 6-day time frame for processing provisional ballots "very challenging and unrealistic. To overcome this challenge, the entire department's employees were mobilized to process provisional ballots." The report also found that in Los Angeles County, "staff had to prepare duplicate ballots to remove ineligible or invalid contests when voters cast their ballots at the wrong precinct. To overcome this challenge, staffing was increased to prepare the duplicate ballots." In a close, contested election, "duplicate" ballots would doubtless receive long and careful scrutiny. See Appendix 7, GAO, "Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," September 2005. (GAO Report-05-997)
determine whether these provisional ballots will be counted, in part by determining if these provisional voters already had voted an absentee ballot (in which case one ballot should be ruled ineligible, in order to avoid double voting). These decisions confirm the basic premise that provisional ballots should be available whenever voters believe they are entitled to them, so that their preferences can be recorded, with a subsequent determination whether these preferences count as valid votes.

RECOMMENDATIONS

Because every provisional ballot counted represents a voter who, if the system had worked perfectly, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use of provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. The statewide voter registration database will facilitate verifying that ballot, but the voter will still have vote provisionally. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly.

The wide variation in the implementation of provisional voting among and particularly within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices based on the experience gained in the 2004 election can be useful in states’ efforts to achieve greater consistency in the administration of provisional voting.

Recommendations for Best Practices

Recent legislative activity shows that state efforts to improve the provisional voting process are underway. Those states, as well as others that have not yet begun to correct shortcomings that became apparent in 2004, can benefit from considering the best practices described here. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states. One way to strengthen the recommendations and build a constituency for them would be for EAC to ask its advisory committee members to recommend as best practices procedures that have worked in their states.

Self-evaluation of Provisional Voting – 4 Key Questions

The first need to achieve greater consistency within each state is to think about provisional voting systematically. As legislators, election officials, and citizens in the states prepare for the 2006 election, they should ask themselves these questions about their provisional voting systems.

1. Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate? Does the tally include all votes cast by properly registered voters who correctly completed the steps required?

2. Is the provisional voting system sufficiently robust to perform well under the pressure of a close election when ballot evaluation will be under scrutiny and litigation looms?

3. Do the procedural requirements of the system permit cost-efficient operation? Are the administrative demands of the system reasonably related to the staff and other resource requirements available?
4. How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

If the answers to these questions leave room for doubt about the effectiveness of the system or some of its parts, the EAC's recommendation of best practices should provide the starting point for a state's effort to improve its provisional voting system.

**Best Practices For Each Step In The Process**

We examined each step of the provisional voting process to identify specific areas where the states should focus their attention to reduce the inconsistencies noted in our analysis. We offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.

**The Importance of Clarity**

The EAC should emphasize above all else the importance of clarity in the rules governing every stage of provisional voting. As the Century Foundation's recent report observed, "Close elections increasingly may be settled in part by the evaluating and counting of provisional ballots... To avoid post election disputes over provisional ballots—disputes that will diminish public confidence in the accuracy and legitimacy of the result—well in advance of the election, states should establish, announce, and publicize clear statewide standards for every aspect of the provisional ballot process, from who is entitled to receive a provisional ballot to which ones are counted."26

Litigation surrounding the 2004 election resulted in decisions that, if reflected in state statutes or regulations and disseminated in effective training for poll workers, can increase the clarity of provisional ballot procedures, increase predictability, and bolster confidence in the system. By taking the following steps, states can incorporate those court rulings into their procedures.

- **Promulgate, ideally by legislation, clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards.** For example, in Washington State, the court determined that an election official's failure in evaluating ballots to do a complete check against all signature records is an error serious enough to warrant recanvassing.27 Clear direction by regulation or statute on what records to use in evaluating ballots could have saved precious time and effort and increased the reliability of the provisional voting system.

- **States should provide poll workers standard information resources for the training of poll workers by local jurisdictions.** Training materials might include, for example, maps or databases with instruction on how to locate polling places for potential voters who show up at the wrong place. Usable and useful information in the hands of poll workers can protect voters from being penalized by ministerial errors at the polling place.28

---

27 See Washington State Republican Party v. King County Division of Records, 103 P3d 725, 727-728 (Wash. 2004)
28 See Panio v. Sunderland 824 N.E.2d 488, 490 (NY, 2005) See also Order, Hawkins v. Blunt, No.04-4177-CV-C-RED (W.D. Mo. October 12, 2004). While rejecting the notion that all ballots cast in the wrong precinct should be counted, the court ruled that provisional votes cast in the wrong precinct should be thrown out provided that the voter had been directed to the correct precinct. This meant that provisional votes cast in the wrong precinct (and even the...
State training materials provided to local jurisdictions should make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office. Recent legislation in Arizona indicates that recommendations should emphasize HAVA's requirement that persons appearing at the polling place claiming to be registered voters cannot be denied a ballot because they do not have identification with them. Poll workers may need appropriate training to understand their duty to give such voters a provisional ballot.

A. Registration and Pre-Election Information for Voters

Providing crisp, clear information to voters before the election is important to the success of the provisional voting process. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process. States can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. Best practices in this area would include:

1. If states require identification at the time of registration, the kind of IDs required should be stated precisely and clearly and be publicly and widely available in a form that all voters can understand. For example, “You must bring your driver's license. If you don't have a driver's license, then you must bring an ID card with your photograph on it and this ID card must be issued by a government agency.”

2. The process to re-enfranchise felons should be clear and straightforward. To avoid litigation over the registration status of felons, best practice should be defined as making re-enfranchisement automatic, or no more burdensome than the process required for any new registrant.

3. State or county websites for voters should offer full, clear information on boundaries of precincts, location of polling places, requirements for identification, and other necessary guidance that will facilitate registration and the casting of a regular ballot. An 800 number should also be provided. Models are available: the statewide databases in Florida and Michigan provide voters with provisional voting information, registration verification and precinct location information.

B. At the Polling Place

wrong polling place) would count if there were no evidence that the voter had been directed to a different polling place. The court placed a duty upon election officials to make sure the voters were in the correct locations. Note that this question would not arise in a state that counted ballots cast in the wrong polling place but within the correct county.

The Florida Democratic Party v. Hood, 342 F. Supp. 2d 1073, 1075-76 (N.D. Fla. 2004). The court explained that provisional voting is designed to correct the situation that occurs when election officials do not have perfect knowledge and when they make incorrect determinations about eligibility (the "fail-safe" notion). Denying voters provisional ballots because of on-the-spot determinations directly contradicts this idea. Even before the cited decision, the Florida Secretary of State's office had determined that any voter who makes the declaration required by federal law is entitled to vote a provisional ballot, even if the voter is in the wrong precinct.

Websites in 29 states describe, with varying degrees of specificity, the identification voters may need. In 18 states voters can learn something about the precinct in which they should vote. And in 6 states (California, District of Columbia, Kentucky, Michigan, North Carolina, and South Carolina) they can verify their registration on the website.

The Century Foundation, op. cit.
Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot.

1. The layout and staffing of the polling place, particularly the multi-precinct polling place is important. Greeters, maps, and prominently posted voter information about provisional ballots, ID requirements, and related topics can help the potential voters cast their ballot in the right place. States should require poll workers to be familiar with the options and provide the resources needed for them to achieve the knowledge needed to be helpful and effective. Colorado has clear regulations on polling place requirements, including HAVA information and voting demonstration display. Many states require training of poll workers. In some states that requirement is recent: after the 2004 election, New Mexico adopted a requirement for poll workers to attend an “election school.” A state statutory requirement for training could facilitate uniform instruction of poll workers in those states that do not already provide it.

2. The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting, as occurred in Washington State. The ballot might include a tear-off leaflet with information for voters such as: “Reasons Why Your Provisional Ballot Might Not Be Counted” on one side and “What to Do if My Provisional Ballot Is Not Counted” on the other.

3. Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. In 2004, some polling places ran out of ballots, with unknown effects on the opportunity to vote. In Middlesex County, New Jersey, for example, on Election Day the Superior Court ordered the county clerk to assure that sufficient provisional ballots were available at several heavily used polling places, and it authorized the clerk “in the event additional provisional ballots are required...to photocopy official provisional ballots.” At least two states, Connecticut and Delaware, provide guidelines to local election officials on how to estimate the demand for provisional ballots. Connecticut sets the number at 1% of the voters in the district, Delaware at 6%. States that do not offer a practical method to guide the supply of provisional ballots at polling places should consider doing so. The guideline should take into account both the number of voters in the district and the number of provisional ballots actually cast in recent elections.

4. To achieve the procedural clarity needed to forestall disputes, states should establish a clear chain of custody for the handling of provisional ballots from production through distribution, collection and, finally, evaluation. A number of states have clear procedures for at least parts of this chain of custody. All states should examine their chain-of-custody requirements for clarity. Illinois includes the potentially beneficial requirement that ballots be transported by bi-partisan teams, which offers the potential to avoid some charges of election fraud.

34 2005 N.M. Laws 270 page no. 4-5.
35 Voting Order, November 2, 2004, Superior Court of New Jersey, Law Division, Middlesex County.
36 Connecticut: “Equal to or not less than 1% of the number of electors who are eligible to vote in any given district, or such other number as the municipal clerk and the registrars agree is sufficient to protect voting rights. Conn. Gen. Stat. Ann. § 9-232j. Delaware: Each County Department of Elections Office is required to provide to each election district a number of provisional ballots equal to 6% of registered voters in that district, with a minimum allocation of 15 ballots. Additional supplies to be delivered when the supply becomes “very low.” Del. Code Ann. Tit 15 § 4948(e).
C. Evaluating Voter Eligibility and Counting Provisional Ballots

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted. Public recognition of the validity of those criteria is important in establishing the legitimacy of the system as a whole. The experience in 2004 in North Carolina, Washington, and Ohio underlines the importance of clear criteria. As the Century Foundation report put it, "Whatever procedures the states choose [to determine if a provisional ballot should be counted], the paramount consideration—as with all others concerning provisional voting—is that they be clear and thus not susceptible to post-election manipulation and litigation." Nonetheless, the *Panio v. Sutherland* decision in New York shows the difficulty of defining the range of administrative errors from which the provisional voters should be held harmless. Even when the standard is "clerical error" judges can differ over what that means exactly. Possibly a state law might be able to clarify a definition by giving examples of clerical errors, but even then the definition is unlikely to be perfect.

1. State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state’s ability to verify that the person casting the provisional ballot is the same one who registered. While there may be a concern to ensure that the individual who returns with the ID may not be the same individual who cast the provisional ballot, the spirit of HAVA demands that the opportunity to prove identity be provided after Election Day. A signature match can go far in establishing that the individual who voted and the individual returning later with identification is, in fact, the same person.

Encouraging a voter who lacks ID on Election Day to return later to help the verification process by providing proper identification will strengthen the system and increase public confidence in the electoral process. Our data indicate that some voters would prefer to return with ID rather than to sign an affidavit, perhaps because of uncertainty about the legal process involved in the affidavit. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Of particular interest is Kansas, which allows voters to proffer their ID by electronic means or by mail, as well as in person.

2. More provisional ballots are counted in those states that verify ballots cast outside the correct precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the

---

37 The Century Foundation, op. cit.
39 In Kansas, the voter can provide ID to a County Election Officer any time before the County Board of Canvassers meets to count provisional ballots. KS. ST. 25-1122(d). ID can be presented in person, OR via mail or electronic means. Id. The Board must meet either on the Friday or Monday following a Tuesday election. Id. at 25-3104.
40 Deadlines in other states are: Alabama -- 5:00 P.M. on the Monday following the election AL ST § 17-10A-2(c)(1); Florida: until 5:00 P.M. on the third day following the election. Fla. Stat. Ann. § 101.048 (adopted after the 2004 election); Georgia—no later than 2 days after the election. GA ST § 21-2-417; 419. Illinois—2 days to submit additional information 10 Ill. Comp. Stat. Ann. 5/18A-15(d); Indiana— in 2004 the deadline was the close of the polls IN. ST. § 3-11.7-5-2(a). The time period was extended to 13 days by the adoption of Indiana Code 3-11-8, Section 25, Subsection (l); Maryland—until the meeting of the Election Board; MD ELEC LAW § 11-303. New Jersey— until the close of business on the second day after the election 19:53C-3(d); Nevada—until 5:00 P.M. on the Friday following the election NV ST 293.3085; New Mexico—until 7:00 P.M. on Election Day NM ADC 1.10.22 (8) (h).
41 See Andersen, op. cit, pgs. 23 – 24 for an analysis of the significant effect of counting out-of-precinct ballots. The Election Day Survey found that, "Most notably, jurisdictions that permitted jurisdiction-wide acceptance of provisional ballots reported higher rates of provisional ballots being cast, but also reported a much higher incidence of provisional ballots being counted, than other jurisdictions."
additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence. One option for states is to involve the voters in the decision by pointing out that voters who cast their provisional ballots in the wrong precinct may not be able to participate in the local election. The voter could then decide to go to the correct precinct or vote provisionally for the higher offices at the top of the ticket only.

3. Alternatively, if a state chooses to require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location. Ideally the voter could be directed to the correct machine, but poll worker advice will not always be correct. One way to assess the balance of issues here is to consider that, if a voter in a multi-precinct polling place is sent to the wrong machine, the error is probably the poll worker's, and the voter should not be penalized.

4. Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected (e.g., check the applicable box "unregistered voter"; "lack of signature match" "wrong precinct," etc.) Those forms should be disclosed publicly when completed. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.42

Colorado Reiection Codes (Any ballot given a rejection code shall not be counted):

- RFS (Rejection federal or state) No federal or state candidates or issues to duplicate.
- RNS (Rejection not signed) Provisional Ballot Affidavit not signed.
- RIN (Rejection incomplete information provided) Required information is incomplete and the designated election official is unable to confirm voter's eligibility.
- RNR (Rejection not registered) Voter did not register by the voter registration deadline or by emergency registration, Colorado voter registration record was not found, or voter was previously cancelled and has not been reinstated pursuant to 1-2-605(10). C.R.S.
- REE (Rejection envelope empty) Provisional ballot envelope is empty.
- RAB (Rejection voter voted absentee) Designated election official has confirmed that voter voted an absentee ballot.
- REV (Rejection based on ballot cast in early voting) Voter voted early.
- RIP (Rejection based on incorrect party) Incorrect Party in Primary Election.
- RFE (Rejection felon not eligible to vote) Individual was convicted of a felony and is either serving a sentence of confinement or detention or is on parole.
- RWC (Rejection elector not registered in county or State of Colorado) Non-county or non-state resident; therefore voter not eligible to vote in the county where the provisional ballot was voted.
- RID (Rejection first time voter has not supplied identification upon registration or thereafter prior to and during time voter voted) First Time Voter who

41 Chances are administrative error accounts for the voter being directed to the wrong precinct under these circumstances.
42 8 CCR 1505-1, at 26.5.4, adopted August 4, 2005. See also 1-2-609(3) C.R.S.
registered by mail or through a voter registration drive, is tagged as id deficient, and did not provide id at the time of voting.

RRD  (Rejection registration deficient) Voter had deficient or incomplete registration and required information was not provided prior to or at the time of filling in the provisional ballot envelope. Voter's eligibility cannot be established.

D. Verification of Provisional Ballots
1. States that use the information on the provisional ballot to permit voters who have changed their addresses to update their registrations should adopt clear procedures on that process and specify how the new information will be communicated between different Boards of Elections

2. In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. States should consider in particular how to divide the time allowed them by the safe-harbor provisions that apply in presidential elections to the certification to the Electoral College. Some part of this five-week period will be consumed by the eligibility evaluation, but states should take care to provide a sufficient period of time as well for challenges. If a state consumes 21 days following the election in the eligibility evaluations, only two weeks will remain for legal challenges to be concluded. Is that sufficient? Or should the state provide the resources needed to complete the eligibility determinations in 10 days or two weeks, leaving three weeks or more for legal challenges in a close election? Our research did not identify an optimum division of the five weeks available. The prudent course here would be to encourage states to consider the issue and then make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

E. Post-election Information for Voters
Timely information to voters about the disposition of their provisional ballot will provide helpful feedback and more important enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

1. Establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

F. State Laws Governing Litigation over Provisional Voting
1. Establish special, streamlined litigation procedures for Election Day complaints that individuals are being denied the right to cast a provisional ballot

Broader Considerations

G. Integrity and the Appearance of Integrity
1. State laws or regulations providing for non-partisan or bi-partisan bodies to make a public determination of the validity of provisional ballots would increase confidence in the system.
2. To improve transparency, state laws or regulations should require the purging process for registration to be public and with an opportunity for voters to correct an erroneous determination that they should be purged.

3. State laws or regulation should require the evaluation process for provisional ballots to be public, while protecting the names of those who voted provisionally.

H. Continuous Assessment of the Provisional Ballot -- Process and Performance

Defining what makes for a successful provisional voting system is difficult. The most successful system is probably not the one with the most provisional votes cast (that could indicate problems with the registration system). Nor is the system with the greatest number counted or with the fewest counted necessarily superior because the evaluation process could be flawed. Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. The EAC should consider engaging one of the national quality organizations or processes, such as Six Sigma or the Baldrige Quality process to evaluate the provisional ballot process. Pending such a review, the EAC can recommend that states take the following actions.

1. Recognize that the first step to improving quality is to see the provisional voting process as a system and take a systems approach to regular evaluation through standardized metrics with explicit goals for performance.

2. States should begin by collecting data systematically on the provisional voting process so that they can evaluate their voting system and assess changes from one election to the next. The effort should start in the 2006 election, and the data collected should include:

   -- Provisional votes cast and counted by jurisdiction, say counties, with details on why the voter had to vote provisionally (lack of ID, not on list, challenged at polling place, issued absentee ballot, etc) and number of ballots actually counted in each category.

   -- Reasons why provisional ballots were not counted, using categories such as those that have been adopted by Colorado, described earlier in this report.

   -- Measures of variance among jurisdictions.

   -- Number of poll workers trained in administration of provisional voting by polling place

   -- Number of jurisdictions posting information on provisional voting in the polling place

   -- Time required to evaluate ballots by jurisdiction

---

43 Six Sigma is a measure of quality that strives for near perfection. Six Sigma is a disciplined, data-driven approach and methodology for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process -- from manufacturing to transactional and from product to service.

44 The Baldrige Criteria for Performance Excellence provide a systems perspective for understanding performance management. They reflect validated, leading-edge management practices against which an organization can measure itself. With their acceptance nationally and internationally as the model for performance excellence, the Criteria represent a common language for communication among organizations for sharing best practices. The Criteria are also the basis for the Malcolm Baldrige National Quality Award process.
Improving understanding of the provisional voting process through analysis of detailed information will enable state and local election officials to strengthen their systems. By collecting and analyzing this data states can identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as a way to reduce the need for voters to cast their ballots provisionally.
ATTACHMENT 1 – Data Sources for Classification of the States

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The variables used to analyze a state’s use of provisional ballots:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and included it in our analysis.

New vs. Old States

We classified states as “new” or “old” based on the 2001 Electionline study of provisional voting, but condensed its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

We included in the list of “Old States” all states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots. States in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as “new” states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they

45 This study can be found at: http://electionline.org/Portals/1/Publications/Provisional%20Voting.pdf
were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline's map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct's list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter's name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island's first use of provisional voting was in 2004 and, therefore, classified the state as "new" to the system of provisional balloting.

Statewide List of Registered Voters

The Electionline preview of the 2004 Election\textsuperscript{46} was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline's criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases because we found it had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election\textsuperscript{5}. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as “out-of-precinct.” States that invalidated such ballots were categorized as “in-precinct only.”

\textsuperscript{46} "Election Preview 2004: What’s changed, What Hasn’t and Why”. This study can be found at: http://electionline.org/Portals/1/Publications/Electionpreview.2004.report.final.update.pdf

\textsuperscript{47} In Illinois, it is not clear that all counties followed this procedure. Some counties may not have counted out-of-precinct ballots.
Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

*North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.
To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

\(^{46}\) Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

\(^{49}\) Maryland reported provisional ballots that were counted per county, but not number cast.

\(^{50}\) Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.
June 15, 2006

John Weingart, Associate Director
Eagleton Institute of Politics
Rutgers University
191 Ryders Lane
New Brunswick NJ 08901-8557

Dear Mr. Weingart:

During a recent briefing by staff, the EAC discussed and reviewed possible next steps with the provisional voting and voter identification studies as well as the Eagleton contract which is scheduled to conclude on June 30, 2006.

We were in agreement that Eagleton's work on the EAC contract should conclude, as scheduled, by June 30, 2006. In preparation for this conclusion, the EAC requests that the comments and suggestions which were noted during the EAC's recent Board of Advisors and Standards Boards meeting (and were described in Mr. O'Neil's June 8, 2006 letter to Chairman DeGregorio) be included in the final draft report on provisional voting which Eagleton will deliver to the EAC on or about June 30, 2006. The Commissioners have determined that they will take this final draft report and, from it, may develop guidance and best practice recommendations that will be presented to the Board of Advisors and Standards Boards for further review.

The EAC Commissioners have also reviewed and considered next steps with the voter identification draft report which Eagleton has prepared. While the final disposition of the results and findings of this study, on the part of the EAC, are still unclear, the Commissioners have asked that the final draft report of this study also be prepared and submitted to the EAC not later than June 30, 2006.

We look forward to receiving these reports. On behalf of the EAC thank you for the considerable time and energy which the Eagleton/Moritz team has devoted to these critical election issues.

Sincerely,

Thomas R. Wilkey
June 8, 2006

Dear Chairman DeGregorio:

Karen Lynn-Dyson relayed the Commission's decision in your meeting of June 1 to take more time to consider how to proceed with the delivery of EAC research reports on provisional voting and voter identification.

The Eagleton-Moritz research team, of course, encourages the Commission's thoughtful consideration of the two reports, but we are mindful of the need to deliver revised documents that respond to the Commission's comments by the close of our contract on June 30th. We believe that if we receive the Commission's final comments on the Provisional Voting report by June 19 we will be able to complete any additional work that the Commission might request and incorporate the results in our final reports before the end of the contract period.

Based on suggestions raised at the meetings, we already plan to supplement the Provisional Voting report with some brief, additional information about the influence of the fail-safe ballot provisions of the National Voting Rights Act on the experience with provisional voting in 2004.

We understand that the Commission must submit the final draft Voter ID report to the same review process by your advisory boards as was followed with the Provisional Voting paper. We understand that step is a prerequisite for wider release. We would appreciate your advice on how to handle this review, given the rapidly approaching end of our contract.

We hope the commission will use both reports, as intended from the outset of this project, as the basis for recommendations for better, if not best, practices to the states. If the Commission cannot decide to issue such recommendations to the states, we hope it will promptly release the reports to provide the states and the broader elections community with this information, analysis and perspective on the issues.

We recognize, based on the reactions at the meetings of the Standards Board and, particularly, the Board of Advisors, that some of the findings, conclusions, and recommendations of the reports will be controversial with some of the Commission's constituencies. But we also believe, based on the comments of the Peer Review Group, the advisors assembled by the Commission, and our response to their critiques, that the reports are grounded on solid research by a well-qualified, nonpartisan team and that the reports will provide new information for the policy process. We believe this information will contribute to achieving the EAC mission of providing helpful information that the states may or may not choose to implement.
The information in the reports can improve the policy process by raising the level of debate over increasingly volatile issues related to election administration. We believe our reports will prove useful to the states as they complete preparations for the 2006 elections. Moreover, the elections community is aware of this work, and awaits the analysis and conclusions.

We look forward to working with you to conclude this research in a way that will serve the public interest.

Very truly yours,

[Signature]

Thomas M. O'Neill
Project Director
August 18, 2005

Dear Commissioners:

At the meeting of the Board of Advisors in Portland, Oregon, our notebooks included an EAC Information Research Update, dated July 18, 2005. The Update indicates that the EAC has awarded a contract to the Eagleton Institute / Moritz College of Law ("Moritz") to conduct research into "Provisional Voting / ID Requirements."

Obviously, the duty of the EAC as outlined in Section 241 to conduct research on election issues is a very important one. That is why it is clearly an absolute necessity that the researchers who are awarded contracts to conduct that research be objective and nonpartisan in their work. It would be inappropriate and potentially very damaging and embarrassing to the EAC (and the Board of Advisors) if this research is conducted by entities that have a preconceived opinion or bias on the issue being researched or are, in fact, advocates on the issue. Any findings or recommendations such biased entities put in their final report would be open to question and could cause great harm.

Unfortunately, hiring the faculty at Moritz to conduct research on provisional balloting and voter identification provisions calls into question whether the research can be conducted in an objective manner and reach conclusions that are not pre-determined by the public and pre-existing views of the researchers. This is crystal clear from an easily-conducted review of the Moritz website.

The Associate Director of the Election Law program at Moritz, Daniel Tokaji, is an outspoken opponent of voter identification requirements and commentator on provisional voting. Here is a brief summary of some of his recent comments, taken from the Moritz website:

It's therefore questionable at best whether an ID requirement is really necessary to combat voting fraud. Supporters of the ID requirement have yet to make a convincing case that existing methods of discouraging and punishing fraud are insufficient. While the anti-fraud benefits of stricter ID laws are dubious, there is evidence that an ID requirement would impose a severe burden on many voters, particularly those of low income....In their present form, the ID bills presently on the table are likely unconstitutional.... (ID and the Right to Vote, April 12, 2005)

"Ohio's election reform is a mixed bag. Establishing a clear rule for provisional ballots is a good idea, but I don't think there's a good reason for refusing to count provisional ballots cast out of precinct, given that a statewide registration database (which should allow for easy verification of eligibility) has to be in place by 2006. It would be much better to move to in-precinct early voting than mail-in absentee voting, but it seems that Ohio doesn't want to spend the money." (Reform Comes to Ohio, May 20, 2005).
"Nevertheless, DOJ seems likely to sign off on this [Arizona's proposition 200 implementing rules], given that they've take the position - quite clearly an erroneous one, in my view - that voters need not even be given a provisional ballot if they lack ID." (Arizona Voter ID, July 18, 2005).

"It remains to be seen, of course, whether DOJ will rigorously enforce Section 5 of the Voting Rights Act, when it comes to practices - like the Georgia ID law - that threaten to result in the denial of minority votes...." (Preclearance, Preclearance, Preclearance, July 20, 2005).

"...I tend to doubt that the preclearance process will prove to be an effective remedy for measures like the Georgia ID law. Even though this law will have a "retrogressive" effect, by serving as a barrier to minority voters' participation...." (The Voting Rights Act, Then and Now, July 31, 2005)

"We should remember that, at the turn of the 20th Century, allegations of "good government" were used by white Democrats in a remarkably successful strategy to suppress the black vote. The result of those very successful efforts was to impose barriers like the literacy test, which excluded African Americans from voting throughout the South for the better part of the century, until after the Voting Rights Act of 1965. If you go back and read some of the documents from the late 1800's and early 1900's, as I've recently been doing, the similarity to the sort of arguments being advanced now in support of photo ID laws is frightening. It is beyond unfortunate to see the same sort of tactics, albeit dressed up in more respectable garb, being employed at the start of the 21st Century." (Vote Suppression, Fraud and Voter ID, August 3, 2005)

In addition to these postings, Dr. Tokaji is acting as an advocate on voter identification issues, having submitted a comment letter to the Department of Justice dated August 18, 2005, along with a number of other professors, urging an objection to a voter identification provision currently before the Department for review under Section 5 of the Voting Rights Act. Obviously, this advocacy is occurring after the EAC awarded this contract and during the pendancy of the research work.

The issue here is not whether Dr. Tokaji's opinions are correct or incorrect, or the appropriateness of his submitting a comment letter to the Department of Justice. The point is the strongly held, pre-existing notions about both provisional balloting and voter identification espoused by the Associate Director of Moritz's election law program and his advocacy on these issues. This raises serious concerns about the propriety of Moritz being provided with federal tax dollars to conduct non-partisan and impartial research into such a sensitive and high profile area of election law. We cannot be certain that data collected and conclusions reached by this research project will not be predetermined to comport with the views of Moritz's officials.
I would strongly recommend that this contract be reconsidered by the EAC. Under these circumstances, any report issued by Moritz will be open to serious questions as to its validity and objectivity.

Hans:

I'm currently at the Seattle airport awaiting a return flight to D.C., so I apologize if my response below is somewhat incomplete. I think the issue you raise certainly deserves our full consideration, so I will look forward to additional responses and dialogue from others included in this distribution list.

A couple of quick points in response to your concerns (and I am speaking for myself below, and not for the entire commission):

(1) The RFP that was issued by the EAC pertaining to the research on provisional voting and voter ID requirements was widely advertised (as all our RFP's are). We did so because we wanted to receive a wide range of possible contractors to conduct this important research. This was a competitive RFP process which, if my memory serves me correct, produced a good number of responses from interested entities.

(2) Carol Paquette assembled a review panel (I'm not sure how many persons were involved in the review panel) to score the responses to this RFP...the submission by the Eagleton Institute included, as a part of their proposal, the Moritz School of Law at Ohio State University as a partner in conducting the legal research required for Eagleton to provide a final report (due in October) to the EAC. The review panel scored the Eagleton submission as best, considering a variety of factors.

(3) The lead entity in this project is the Eagleton Institute. While the project manager's name from Eagleton escapes me right now, the lead from Moritz is not Dan Tokagi, but Ned Foley, who directs the election law section (or something to that effect) at Moritz. Certainly it is true that Professor Tokagi is contributing to the work product being assemble by Moritz, which consists primarily of reviewing election and administrative codes from all 50 states to ascertain how each state deals with provisional voting and voter ID requirements.

(4) As is the case with all federal contractors, both Eagleton Institute and Moritz are contractually obligated to produce objective, sound and unbiased research and analysis on this project. While it is certainly prudent to consider the potential bias of any prospective contractor(s), after receiving the recommendation from the review panel and Carol Paquette (at the time, the acting EAC Executive Director), we unanimously agreed among the commissioners that the recommendation was worthy of support. At the time, we were aware, for example, that the Eagleton Institute had been involved last year in some litigation involving provisional ballots. We were also aware, as you point out, of Professor Tokagi's personal views regarding the issue of voter ID and provisional voting. Nevertheless, there was unanimous agreement in supporting the staff (and review panel) recommendation to move forward with the proposal submitted by Eagleton Institute.

(5) Finally, to ensure that the final workproduct from both Eagleton and Moritz is objective and representative of all view points on these important issues, Eagleton proposed early in the process -- and we enthusiastically agreed -- to the formation of a balanced peer review panel which will review the work, on an on-going basis, of Eagleton and Moritz. All EAC commissioners have had an opportunity to provide names to Eagleton to ensure appropriate political balance on this peer review panel and Eagleton has been responsive to our various suggestions.

By way of summary, let me say that I believe we have an obligation to closely scrutinize the conduct of all of our federal contractors. If things come to light that bring into question the
objectivity of any of our contractors, I believe the EAC ought to conduct its due diligence and deal with such matters accordingly, including the possibility of contract termination.

I would be happy to conduct such due diligence with regard to this particular contract. However, I must say, with all due respect, that I do not think any breach has occurred, either by Eagleton or Moritz, which would necessitate termination of this contract. I think appropriate checks and balances have been accounted for in this contract, and I believe these checks and balances will ensure an objective and sound final product from Eagleton.

I welcome your continued feedback, Hans.

Kindest regards,

RAY MARTINEZ III
Commissioner
U.S. Election Assistance Commission

August 19, 2005

To Gracia, Ray, Donetta, Tom, Julie, Karen

In his note regarding the Eagleton contract, Hans has raised some of the same concerns I raised from the beginning of any discussions I had regarding this contract with our staff, and at our first formal meeting with Eagleton. In reviewing their work product from time to time, I continue to have concerns about a lack of balanced input and have repeatedly voiced them with staff and with Eagleton. I did this when the initial peer review group was proposed and again during their presentation at our meeting in Pasadena (the outreach slide in their public presentation showed outreach to seven groups, of which only one could be considered conservative-leaning). Now, as I have just had the opportunity to read their July progress report, it appears that Eagleton seems to be going into a larger analysis of the voter fraud issue than was authorized in the contract. My suspicion is that Dan Tokaji is injecting his views into this to dismiss or diminish the concerns some people may have about voter fraud. I could be wrong, but his previous writings lead me to believe otherwise.

I only found one mention of voter fraud in the contract with Eagleton. It is in Section 3.5 regarding provisional voting, where it discusses "minimizing opportunity for voter fraud." Yet, on page 4 of the July progress report from Eagleton, in describing their work plan for the next month it states: "we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms." This clearly seems to be going beyond the mandate we gave them as I thought they were going to be looking at voter fraud relating to provisional voting (as the contract calls for), not voter fraud as it relates to election reforms. While voter fraud was never mentioned in the contract regarding the voter ID issue, page 5 of their July report indicates that their narratives "will include an appraisal of the prevalence and nature of vote fraud." In addition to this, page 6 describes a look into the "relationship between voter ID regime and vote fraud."

Voter fraud is clearly an issue that is perceived differently from the Right and from the Left. I have struggled with determining what a clear definition of voter fraud is myself, and therefore want to obtain various perspectives and good analysis on this issue before I formulate a solid conclusion in my mind. It has been my understanding all along that the whole voter fraud/voter intimidation issue is going to studied by the EAC using a balanced group of consultants—not Eagleton and Moritz, who are likely to focus just on the number of prosecutions of voter fraud, rather than the complaints made or the fact that many election officials are frustrated that some prosecutors don't take their complaints about voter fraud seriously. I am not convinced at this point that we will get a balanced and objective study from Eagleton/Moritz on voter fraud. I am puzzled on why they seem to be expending a significant portion of their time on this and would want to know if we somehow authorized them to do more research into the voter fraud issue.

On page 7 of their July report Eagleton indicates that communications with the EAC on the Peer Review Group "were not clear or timely." I would like to know what this refers to. Also, I may have missed it, but I do not recall seeing the final list of who is serving as the Peer Review group.

The August 15th copy of the July report that I received from Karen did not include the attachment of the financial report of expenses incurred. I would like to see that attachment.

Outside of our NIST work, this contract represents our largest single outside expenditure of our operational funds. Any single expenditure of $500,000+ needs to be closely monitored. I, for one, am not going to sign off on any report that appears to have been written from a biased viewpoint, especially one that doesn't appear to be interested in hearing from conservative organizations or right-leaning researchers, or seems to minimize any input from them. I've already had questions...
from congressional staff and others on why we picked Eagleton and Moritz, as they are perceived by some as biased against Republicans. I assured the critics that we have insisted all along on an objective study from Eagleton. An unbalanced or biased study from them will not only hurt my credibility, but also that of the EAC. I'm not suggesting that we stop their work, but I do want Tom and Julie to inform them in no uncertain terms that we will not accept a report that does not seriously consider all viewpoints on provisional voting and the voter ID issue, and that any study or interpretations they present to us reflect a diversity of opinions on these subjects. We also need for staff to determine whether their considerable work into the voter fraud area is authorized in the contract. We should not be paying for and receiving work we did not authorize.

The contract clearly calls for "alternative approaches" on voter ID requirements and "alternatives" on provisional voting. I agreed to support this contract to Eagleton because I was assured that we would receive a variety of approaches from their work, and not just those from a liberal perspective.

August 19, 2005

Paul:

I am directing this email only to the commissioners, because I don’t think we should air our disagreements among staff until we have at least had a chance to discuss controversial issues with each other in person. It appears from Gracia’s email that we will have a chance do so next week in Denver.

In the meantime, I feel compelled to respond to your email regarding Eagleton.

(1) As I stated last night in my email to Hans, we have an on-going responsibility to monitor the expenditure of all our federal funds, including to government contractors who are contractually obligated to deliver unbiased research. However, I will remind you that we did not contract with Eagleton merely to provide a compilation of state laws and procedures. Rather, we contracted with Eagleton (and indirectly with Moritz through Eagleton) to provide both research AND analysis of provisional voting and voter ID. Invariably, the analysis portion of their final product will be from a professional (and institutional) perspective, and will NOT represent any one researcher’s personal point of view. If it does, then Eagleton and Moritz risk damaging their credibility not just with the EAC, but with other federal government agencies which undoubtedly contract with their respective institutions on other projects. I doubt seriously that either institution would risk such damage and allow one team member to inject bias into the work. Moreover, the peer review group that is (or has) been assembled by Eagleton is designed to cure any lingering concerns about potential institutional or personal bias...Eagleton has been responsive to your feedback on this issue, to the point where they have removed all perspective representatives of the advocacy community on the peer review group (because they felt they could not achieve political "balance" from the advocacy groups). If there is some person (or persons) which you would like to see Eagleton include in the review group, it is my understanding that such inclusion is but a mere phone call away.

(2) You will recall that at our meeting last week, I raised the exact same concern about the Eagleton progress report, and asked for clarification from staff regarding the details of this particular work (i.e.; fraud) on the part of Eagleton. I expect staff (or us directly) to ask questions of Eagleton (as we would any contractor) and determine if their work in this area is within the scope of work (and contract) we all agreed to. If it isn’t then we re-direct them, just as we have done, for example with Kim Brace and EDS.

(3) Finally, I must express my disappointment, Paul, regarding your comments on Professor Tokagi that you chose to include in your email. While I may disagree with Hans on his particular analysis of the perceived personal bias of this contract, at least his allegations regarding Professor Tokagi’s potential bias are grounded in fact (and he recited them as such in his email). You, on the other hand, have chosen to accuse Professor Tokagi of manipulating the work on this project based on your "suspicion." With all due respect, that unfortunate accusation borders, in my view, on a breach of professional decorum and I cannot let it go without response.

We clearly have some political issues that are increasingly being injected into nearly every discussion at the EAC table. I have stated both to you and Gracia individually that I believe this trend in part represents a "maturation" of the EAC and I am not uncomfortable with it. However, if we are going to bring accusations of subjectivity and bias to the table, then I will expect that such a filter will be applied across the board to ALL projects undertaken by the EAC, and that such a filter will be based solidly on fact, and not on innuendo, personal hunches or suspicions.
I send this email, as always, with the highest degree of respect and friendship toward you. And yet, my disappointment is evident in your comments regarding an esteemed and respected member of the legal academic community (and someone whom I regard as a personal friend.)

I look forward to our continued discussion on this matter. And as for the substance of Hans' concern regarding Moritz, I stand by my email which I sent to everyone last night.

RE: October 18, 2006 Letter

Dear Mr. Neas:

Your letter of October 18, 2006 requests the release of EAC’s Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group’s concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants. However, it is important to remember the purpose of this study — finding a uniform definition of voter fraud and making recommendations on how to study the existence, prosecution and deterrence of voter fraud — as it will serve as the basis of the EAC report on this study.

Thank you for your letter. You can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be made available to the public.

Sincerely,

Paul DeGregorio
Chairman

Fax: (202) 566-3127

Dear Commissioners,

On October 11th, USA Today published an article describing the report commissioned by the EAC on voter fraud. We write today to urge the EAC to release this report.

As a 25 year old civil rights and civil liberties organization, People For the American Way Foundation (PFAWF) and our sister organization, People For the American Way (PFAW) have long been dedicated to ensuring the integrity of our elections. In particular in the years since the 2000 election, PFAWF and other principle partners such as the NAACP and the Lawyers’ Committee for Civil Rights Under Law, have carried out a program called Election Protection to ensure that all eligible voters are able to vote and have that vote counted as cast.

We know that voter fraud and intimidation occur— we’ve seen the long lines, the erroneous purges, the misleading flyers and phone calls. And yet there seems to be little attention to these matters on the state and federal level.

Instead, a disproportionate amount of time and energy are spent on measures that purport to curb voter fraud by requiring voters to produce proof of citizenship and identity to vote. In actuality, these measures do little to secure the elections and much to disenfranchise otherwise eligible voters. Indeed we are weeks away from an election where thousands of eligible voters may be disenfranchised by overly restrictive voter identification laws. That presents a real threat to the integrity of our elections and the health of our democracy.

The report that the EAC commissioned from voting experts would make a vitally important contribution to the national discourse on the reality of voter fraud. In light of the numerous claims regarding the prevalence of voter fraud, this report provides a much

needed analysis about the state of our electoral process. While media reports indicate that this tax-payer funded report is final, even if there are outstanding concerns within the EAC, we implore you to move forward with releasing the report as is, and to hold a public hearing to address any potential issues. Again, the importance of the information in this report is paramount and the public deserves such full disclosure. The report should be released immediately so that those who are concerned about ensuring the integrity of elections can benefit from its findings.

Sincerely,

[Signature]

Commissioners-

Enclosed please find a preliminary list of Peer Review Group members, whom Eagleton is considering for their Peer Review Group. Tom Wilkey will be bringing this item to you for discussion and input at Monday’s Commissioner’s meeting.

Eagleton envisions this Peer Review Group as the body that will review the draft analysis that it will prepare on provisional voting and on voter identification. The Group would also provide comment on the development of alternative approaches to provisional voting and voter identification which Eagleton will develop for the EAC.

I have included the e-mail from the Eagleton Project Director, Tom O’Neil, so that you could get a feel for his approach/philosophy to assembling the Group.

Regards-
K

Karen Lynn-Dyson

----- Forwarded by Karen Lynn-Dyson/EAC/GOV on 06/23/2005 02:25 PM -----

"Tom O'Neill"

Karen,

As you probably recall, one of the features of our proposal was the creation of a Peer Review Group to look over our findings, conclusions and draft reports before we prepare final drafts for the EAC’s review. The EAC asked that before recruiting members of the PRG we submit names for EAC’s review. The aim, of course, is to assemble a panel that is experienced, informed, and balanced.

Attached is a list of potential PRG members drawn from academia, the law, and non-profit organizations with interests in this area. Please look it over.

We may conclude that the PRG should also include two or three former government officials now in academia or related fields. We have a conference call with our partners at Moritz planned for tomorrow or Friday to decide a) if former officials should be included in the PRG and b) if so, who they should be. I’ll keep you informed of our thinking as it develops.

Tom
PROPOSED MEMBERS OF PEER REVIEW GROUP

R. Michael Alvarez, Ph.D.
Professor of Political Science
California Institute of Technology

Alvarez has taught political science at Caltech since 1992. He received his B.A. in political science from Carleton College; his M.A. and Ph.D. from Duke University. Alvarez focuses on the study of electoral politics. He has published many articles on electoral behavior and public opinion. Support for his research has come from the National Science Foundation, The IBM Corporation, the Carnegie Corporation, of New York, and the Knight Foundation. Alvarez edits the Analytical Methods for Social Research book series and is on the editorial boards of a number of academic journals. He is Co-Director of the Caltech-MIT Voting Technology Project.

Deborah Goldberg, Ph.D.
Program Director, Democracy Program
Brennan Center for Justice at NYU School of Law
New York, NY 10013

Goldberg supervises the Democracy Program's litigation, scholarship, and public education. She was the principal author of Writing Reform: A Guide to Drafting State & Local Campaign Finance Laws, and was lead counsel to the intervenor in the Supreme Court case Nixon v. Shrink Missouri Government PAC. She serves on the Steering Committee of a coalition to restore voting rights to persons with past felony convictions. Goldberg is a graduate of Harvard Law School. Before joining the Brennan Center, she was in private practice. She holds a Ph.D. in philosophy and taught ethics at Columbia University.

Martha E. Kropf, Ph.D.
Assistant Professor of Political Science
University of Missouri-Kansas City

Kropf has been on the faculty at Missouri since 1999. She received her BA Summa Cum Laude, Phi Beta Kappa from Kansas State University and her PhD in Political Science from American University. Her work concentrates on Research Methods, Urban Politics, American Government, and Political Behavior. Before joining the faculty at Missouri, she was Project Coordinator at the University of Maryland Survey Research Center. She has published recent on undervoting in presidential elections, and on invalidated ballots in the 1996 presidential election, and on the incremental process of election reform in Missouri.

Wade Henderson, Esq.
Executive Director
Leadership Conference on Civil Rights
Washington, DC 20006

Wade Henderson is the Executive Director of the LCCR and Counsel to the Leadership Conference on Civil Rights Education Fund (LCCREF), and leads the organizations' work on issues involving nationwide election reform. He is a graduate of Howard University and the Rutgers University School of Law. During its over 50 years of existence, LCCR has worked to redefine civil rights issues in broad and inclusive ways. Today, it includes over 180 national organizations. Previously Henderson served as Washington Bureau Director of the NAACP. He began his career as a legislative counsel of the ACLU.

Kay Maxwell
President
League of Women Voters of the U.S.
Washington, DC 20036-4508

Kay J. Maxwell has been a member of the League since 1976. She attended Smith College and earned a B.A. in International Relations from the University of Pennsylvania. She has conducted civic participation training for women leaders in Bosnia, Israel, the West Bank, Rwanda, Kuwait and Jamaica. She has also served as vice president at the International Executive Service Corps (IESC), an international economic development organization. She is a board member of DC Vote, and the New Voters Project.

Tim Storey
Program Principal
Legislative Management Program
National Conference of State Legislatures
Denver, CO 80230
or
Washington, D.C. 20001

Peter G. Verniero, Esq.
Counsel
Sills, Cummis, Epstein and Gross, PC
Newark, New Jersey 07102

Verniero chairs the firm's Appellate Practice Group. He earned his B.A. at Drew University, Phi Beta Kappa, and his J.D. (with honors) at the Duke University School of Law. In 1999, he was appointed a justice of the New Jersey Supreme Court, where he served for 7 years before re-entering private practice. Before his appointment to the Supreme Court, he served as New Jersey's Attorney General, and in that capacity oversaw the state's election laws. He also served as Chief of Staff and Chief Counsel to Governor Christine Todd Whitman.

Tim O'Rourke, Dean of the Fulton School of Liberal Arts at Salisbury University in Maryland, has agreed to serve on the Peer Review Committee.

Tom O’Neill
In July 2002, Timothy G. O'Rourke became the Dean of the Fulton School of Liberal Arts at Salisbury University, a comprehensive public university with nearly 7,000 students located on Maryland's Eastern Shore. The largest of the university's four schools, the Fulton School has about 120 full-time faculty and more than 1,800 undergraduate and graduate majors in ten academic departments and accounts for more than two-fifths of the University's credit hour production.

In the seven years before his arrival at Salisbury, Dr. O'Rourke was at the University of Missouri-St. Louis, where he was the Teresa M. Fischer Professor in Citizenship Education, a position established in 1995 in order to promote the informed participation of youth in community and governmental affairs. The inaugural recipient of this professorship, Dr. O'Rourke held a joint appointment as Professor of Educational Leadership and Professor of Political Science. From 1998 to 2002, he served as Executive Director of Kids Voting Missouri, a program in which nearly 68,000 Missouri elementary and secondary students went to official polling sites and voted alongside their parents in the November 7, 2000 presidential election.

From 1992 to 1995, Dr. O'Rourke was professor and head of Political Science at Clemson University. Prior to that, Dr. O'Rourke was, for 14 years, a faculty member in the University of Virginia's Center for Public Service. From 1985 to 1992, Dr. O'Rourke served as the Executive Director of the Virginia Commission on the Bicentennial of the U.S. Constitution. Commission projects included the national opening of Montpelier, Madison's home (1987); the "Constitution Train" to Philadelphia to mark "Virginia Day" (1987); production of Worth Fighting For, an Emmy-Award-winning documentary on the ratification struggle in Virginia (1988); the celebration of the 200th anniversary of the first federal elections (1989); the Virginia visit of Hungarian President Árpád Göncz to mark the "Global Legacy of the Bill of Rights" (1990); and production of What No Just Government Should Refuse, an Emmy-nominated documentary on the writing of the Bill of Rights (1991). From 1983 through 1986, Dr. O'Rourke directed "The Virginia Court Days Forums," a series for Virginia public television featuring town meetings on constitutional issues.

Professor O'Rourke is the co-author of State and Local Government: The Third Century of Federalism (1988) and author of The Impact of Reapportionment (1980), named by CHOICE as one of the Outstanding Academic Books of 1980. His articles on the federal Voting Rights Act have appeared in such journals as the Rutgers Law Journal, the Virginia Law Review and the Journal of Law & Politics. He has testified before both U.S. House and Senate committees on various voting issues and has served as an expert witness in voting rights litigation. In addition, he has staffed electoral reform commissions, including the Virginia Beach Mayor's Committee for Reapportionment (1990) and the Charlottesville Citizens' Committee to Study Council Changes (1980-81). During 1996-97, he served as advisor to the St. Peters Charter Commission, which drafted a home rule charter for that city. Dr. O'Rourke's teaching interests include state politics, school law, and voting rights and representation. He is a Phi Beta Kappa graduate of the University of Pittsburgh (1970) and holds a Ph.D. in Political Science from Duke University (1977). In 2002, Dr. O'Rourke joined four others in the inaugural Class of Distinguished Alumni recognized by the Tyrone Area School District (PA). Dr. O'Rourke and his wife Jeidy have five grown children and one grandchild and reside in Quantico, Maryland.
Existing Research Analysis

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the “second phase” of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund’s frequently cited book. Again, this is something that it is hoped will be addressed in the “second phase” of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.

- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.

- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
• Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.

• Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.
Peer Review Group  
Summary of Comments  
To the Eagleton/Moritz Group  
Under Contract to Provide Research Assistance to the EAC  

October 15, 2005

The Peer Review Group (PRG) met by telephone conference on September 21. Those participating included: Michael Alvarez, John C. Harrison, Martha Kropf, Dan Lowenstein, Peter Verniero, Brad Smith, and Tim Storey. This summary also includes additional written remarks submitted by Martha Kropf and additional remarks from a follow-up phone call with Timothy O’Rourke. We are now addressing all the comments including, in some cases, returning to members of the group to seek further elaboration or clarification.

We encouraged the members of the PRG to comment about any aspect of the project. We furnished them with these materials before the meeting.

1. Survey of local (mainly county) officials conducted in June 2005.  
2. State-by-state narrative of developments in provisional voting  
3. Statistical Analysis of state provisional voting  
4. Memorandum on Provisional Voting Litigation  
5. Memorandum on Provisional Ballot Litigation by State  
6. July Memorandum on Provisional Ballot Litigation by Issue

We suggested that PRG members rank our draft responses to each of the six key questions posed by the EAC along these lines:

1- Research supports conclusions well.  
2- Research supports some conclusions. Specific questions are:  
3- Research does not support conclusions. Major problems are:

On the Alternatives paper, we asked PRG members to list up to three items they found questionable in light of the research and their own knowledge of provisional voting and election administration and to give us their thoughts on alternative policies that we had no included.

General Suggestions

1. Make transparently clear the meaning of ‘old’ versus ‘new’ states. It is not enough to categorize the states as such, we need to determine why specific states were considered ‘old’ or ‘new’ (i.e. clarify what conditions were met by old states).
2. Be clear in our report about the data that we were unable to obtain and perhaps speculate on why that data was not available. (For example, do we have the documentation the state election boards gave the localities regarding counting practices? If not, why not? Indicate the states for which it was difficult to obtain data.

3. Prescribe less and describe more (tell what voters/administrators have done, not what they should have done or ought to do).

4. Questioned our assumption about public trust – How do we know that decreases in disputes/challenges signify an increase in public trust? We need to explain this assertion.

Specific Review by Area of Analysis/Document

Response to Statistical Review:

- Challenged our emphasis on the number of provisional ballots counted as a percentage of those cast as an indication of success of Provisional Voting. Suggested alternative relationships to consider (PB v. Turnout, PB v. Registered Voters, and PB v. Voting age Population).

- Wanted the inclusion of variation within states among counties (and geographical considerations).

- The report needs to address the quality and validity of the data used in the analysis.

- On Page 8, cautioned using the estimate of 280,000 disenfranchised voters who would have voted if outside precinct voting was permitted.

Response to Question Four:

- Remove the comments in the footnote (p. 1) that offers an alternative way of analyzing the question relating to the possible increase in voter participation as a result of provisional voting because the margin of error in the Census survey does not support a conclusion at this level of significance.

- Address the alternative explanation for why old states may enfranchise more voters than new states (i.e. Kropf’s Failsafe option).

- Include a statistical summary of the relationship between the length of time a state has had PV and the rate at which votes are counted.

Response to Question Five:

- Is it possible to draw any conclusions about the local differences within and among states broken down by county (presumably 20 states worth)?
• Clarify what is meant by “design” and say how many states have/had provisional ballots that are designed differently and look different. Why is design important?

• Page 17 indicates that states with statewide voter databases end up validating fewer PVs. This is important & should be addressed in more detail.

Response to Question Six:

• On the usefulness of instructions, 98% said the instructions were useful. Make it clear that this represents 98% of the officials who got instruction.

• Is the passive voice the best means to communicate this information (for ex. "Second, objectively how well did the process appear to be managed?")

Response to State Narratives:

• When in doubt about whether we have data to support a sentence it is important to be careful about the language we use (say ‘doing XYZ would have revealed’ as opposed to ‘most of what we know about XYZ revealed’…)

• Clarify for the readers what is meant by "provisional vote/total vote". Does that mean provisional votes cast? Counted? Make it clear right at the beginning of every document?

• Footnote states that do not list poll sites or tell people where to vote with the fact that many cities/counties do have a poll finder.

Election Official Survey

• Clarify how we determined who to include in the sample and how we developed the questions in the survey (was a focus group an initial step?) Why were 3,800 election officials deemed eligible to participate (out of how many? 5,000 or so?)

• Clarify old and new states on pg. 2 in National Survey. Comment on how to assess fraud in provisional voting? What is the relationship between PV and turnout?

• Explore more issues about citizenship (18% non-citizen voting in CA)?

• Appendix A says survey was random, but it’s not. How was the data weighted for small, medium and large counties, and for other issues? Clarify this in the report.
• Why doesn’t the total of new and old states equal 50 (25 and 18) and why does the National Survey of Election Officials have different numbers? Is FL an ‘old’ state?

• Are the New England states underrepresented in the survey? If so, why?

• Report should offer more information about the response rate.

Alternatives Document

• The importance of clarity in state processes for both administrators and voters needs to be better articulated.
  (Better training of poll workers, clarity whether failure to check boxes disqualifies voters, access to better info. at polling locations)

• Cautions the use of definitive statements (such as A-3, perhaps say “This raises the question of…”).

• Have other EAC Guidelines been tested in court yet?

• On page 3: the ‘tracking number’ in # 6 is not feasible. Also, “the information” in # 12 should be changed to “the website and 800 numbers” for clarification.

• Page 6, there were disagreements about # 1 and # 2 of options in Sec. F regarding the installation of a separate body to rule on PV for the integrity process; a motion was made to get rid of them.

• Page 6, Sec. E option # 1 should be eliminated or clarified

• Add to Sec. F a ‘# 5’ requiring states to provide detailed public info. on PV
Contract to Provide Research Assistance to The EAC
For the Development of Voluntary Guidance on
Provisional Voting and Voter Identification Procedures

MONTHLY PROGRESS REPORT
September 2005

For
UNITED STATES ELECTION ASSISTANCE COMMISSION
1225 New York Avenue N.W., Suite - 1100
Washington, DC 20005
September 14, 2005

Prepared by:
Eagleton Institute of Politics
Rutgers, The State University of New Jersey
191 Ryders Lane
New Brunswick, NJ 08901-8557
INTRODUCTION

This report describes our progress from September 1 through September 30, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

We focused in September on refining our Provisional Voting research. This refinement was necessary to prepare a strong final analysis paper and develop alternative approaches to Provisional Voting based on the analysis. An important part of this refinement involved reconciling sometimes conflicting data on Provisional Voting from different sources, including the Election Day Study, which finally became available in September. With a clearer understanding of our data, we began the critical work of selecting alternatives to recommend to the EAC as guidance or best practices responsive to both our research and the needs of the Commission.

Three meetings this month helped us accomplish the necessary refinement. We briefed the EAC on our work on September 6, held the first meeting of the Peer Review Group (PRG) on September 21, and gained the benefit of the EAC's reaction to the September 6 briefing in a conference call on September 30.

The completion of our work on Provisional Voting has been delayed by the time needed to absorb and incorporate the findings of the EAC Election Day Study, to recruit and receive the comments of the PRG, and to receive the Commission's comments on the September 6 briefing. The schedule called for the release of the Election Day Study last spring, the submission of the Preliminary Guidance Document to the EAC's advisory boards in mid-September, and a public hearing on the Guidance Document in late October. We now plan to submit to the EAC a final draft of our report, a preliminary guidance document, and draft...
best practices before the end of October. And we understand that after review of those materials, the EAC will decide whether to issue a guidance document or recommend best practices. Projecting a late November date for those decisions seems reasonable. If the EAC does decide to issue a Guidance Document on Provisional Voting, the time needed for a review by the advisory boards is likely to delay a public hearing until January.

While we have made a good start on the Voter ID sections of our research, most time and resources this month were dedicated to resolving issues involved in Provisional Voting.

This report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to Tom O'Neill at: tom_oneill@verizon.net or (908) 794-1030.
PROVISIONAL VOTING

Tasks 3.4 - 3.9 in our contract relate to Provisional Voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed in August, and Task 3.5 is well underway.

Task 3.5: Analysis and Alternative Approaches. Assess the potential, problems, and challenges of Provisional Voting and develop alternative means to achieve the goals of Provisional Voting.

LEGISLATION, REGULATIONS, AND LITIGATION

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It has provided a base of understanding for the analysis of states’ actual experience with Provisional Voting in 2004, for which the Eagleton team has lead responsibility.

Description: The Moritz team has created a 50-state chart to summarize information on Provisional Voting, compiled statutes, case law and administrative procedures regarding Provisional Voting and is near completion with this research.

Progress: We have completed the memorandum outlining Provisional Voting legislative changes since the 2004 election and we are continuing to clarify the laws prior to these changes.

Challenges: The variety in the form and frequency of Provisional Voting legislation from state to state makes creating a snap-shot view across states a challenge.

Work Plan: The analysis of the information, data, and survey results concerning Provisional Voting was completed in September, on schedule. We are now revising it in response to comments by the Peer Review Group (PRG). We are also revising the alternatives document to reflect the critique of the PRG and the guidance from the EAC in response to the September 6 briefing.

PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team has researched and compiled a narrative of each state’s experience with Provisional Voting in 2004. The report findings from the survey of 400 local election officials are now complete. The survey results have proven to be instrumental in shaping our
understanding of actual practice in administering Provisional Voting, including the steps local officials took to prepare for the election.

**PROVISIONAL VOTING NARRATIVES**

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with Provisional Voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to Provisional Voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz’s collection and analysis of statutes, regulations and litigation.

**Progress:** We completed a state-by-state narrative of developments in Provisional Voting and distributed it to the EAC and the PRG. This work has been helpful in understanding the context of the data collected on provisional voting from the states.

**Challenges:** The primary obstacle to constructing the narratives was difficulty in communicating and obtaining necessary information from various state officials. As a result, the narratives underwent several revisions to incorporate up-to-date and reliable information. Now that so many other analyses, including the Election Day Survey, have been released, we were challenged by different interpretations of the same basic facts. But the reconciliation of interpretation and data collection has been invaluable in establishing rigor in our report.

**Work Plan:** We completed revisions of the narratives incorporating comments from the PRG.

**PROVISIONAL VOTING STATISTICAL ANALYSIS**

**Description:** Throughout September the Eagleton research team revised and clarified its statistical analysis, and worked to reconcile the classifications of this analysis (such as states counting only those provisional ballots cast within the proper precinct versus states that counted ballots cast within the proper county) with the classification made in other parts of this study or in other studies (such as the Election Day Study or *Electionline* reports).

**Progress:** In response to comments from the PRG, we have clarified and sharpened the presentation on the methods used and results achieved in the statistical analysis. We have double checked the classification of variables upon which the study is based and reconciled differences in various areas of the overall study. This effort is nearing completion.

**Challenges:** The difficulties encountered have been a result of communication delays and time constraints. Overall, these are not problems or hindrances, but simply slow down the process.
Work Plan: In mid-October we aim to complete a final revision of the statistical analysis and a full reconciliation of all data within the study.

Survey of County Election Officials

Description: The Eagleton Center for Public Interest Polling (CPIP) conducted a national survey of county election officials to measure several aspects of Provisional Voting.

Progress: The analysis of the survey results and findings report is complete. As a result of the critique by the PRG, the research team is revising and clarifying the descriptions of the survey design and sample selection process to make the research methods more transparent.

Work Plan: We used the information from the survey in drafting the analysis and alternatives document required under Task 3.5. We will include necessary clarifications regarding survey design and sample selection in the final analysis and alternatives document.

Peer Review Group

Most members of the PRG met by telephone conference on September 21 to comment on all the research described above. Participating in the meeting were Michael Alvarez, Martha Kropf, Dan Lowenstein, Peter Verniero, Brad Smith, and Tim Storey. Timothy O'Rourke contributed his comments separately. The group provided a detailed critique of our approach, methods, and conclusions, and we are now revising each document in response to the comments and suggestions. It praised the quality of the work and the rigor of much of the analysis. A summary of the suggestions from the members of the PRG is attached to this report.

Challenges and Work Plan

Making arrangements for review of drafts by the PRG and by the EAC has taken longer than anticipated by the Work Plan. The schedule called for all research and analysis to have been completed and incorporated into a Draft Preliminary Guidance Document by mid September. The review process by the EAC and PRG took longer than contemplated by the Work Plan. And we now understand that the EAC will make a separate decision—that will require additional time—whether to issue a Guidance Document or recommendations for best practices. It has not, therefore, been possible to schedule a public hearing or arrange for review of our work by the EAC's advisory boards, as called for in the Work Plan. We now aim to complete our reports and recommendations for guidance by the end of October, and to then await a response from the EAC before scheduling submission to the advisory boards or making arrangements for a hearing.
VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of Provisional Voting, and is becoming the principal focus of our research.

Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

Description: The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

Progress: The 50 State (plus the District of Columbia) chart has been completed, the voter identification statutes have been collected for all states and D.C., and summaries of the existing voter identification statutes have been written for all states and D.C.

Challenges: Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snapshot view across states a challenge.

Work Plan: Analysis of voter identification data will begin now.

SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern with increasing the rigor of voter ID requirements. We understand that the EAC has issued a
research contract that will focus on vote fraud and vote suppression. Our research in this area will be limited to developing an understanding of the tradeoffs between ballot security and access to the ballot. We have completed the basic database on voter identification issues has been completed, and the next key step will be drafting the first narratives.

**VOTER ID AND TURNOUT ANALYSIS**

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We have created a database and gathered statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election.

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. We have also utilized exit poll data collected on Election Day 2004 as a resource for understanding the demographics of voter turnout.

**Challenges:** The analysis of these data has been postponed until the data reconciliation of Provisional Voting is complete. The main challenge now is an issue of time management. As a result of the extensive revision and data reconciliation efforts aimed at the Provisional Voting section of our work VID has been temporarily placed on hold.

**Work Plan:** The analysis of the impact that voter identification requirements have upon voter turnout should be completed by early November.
PROJECT MANAGEMENT

PEER REVIEW GROUP

Description: A feature of our proposal was the creation of a PRG. It reviews our research and methodology and provides valuable feedback and suggestions for the direction of our work.

Progress: The research team held its first conference call with PRG members on September 19, 2005. The research team will hold a workshop meeting on October 19, 2005 to address the PRG’s comments.

Challenges: To date we still have not heard back from two PRG Members.

Projections: Revisions and clarifications to our reports on Provisional Voting will be resolved by the end of October. We will need to schedule a second conference call to review our research with regard to Voter Identification Requirements in late November. As noted earlier, a summary of the comments we have received from the PRG is attached to this report.

COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

INFORMATION SYSTEM

Description: The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding Provisional Voting and voter identification.

Progress: At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. We have reorganized our system by separating final drafts from earlier versions of documents, discarding dated files contained in the Information System, and updating the system as a whole.

Projections: The entire project team continues to use the Information System which contains the above referenced research, in working toward the preparation for our final reports to the EAC.

INTRANET
Description: All project team members have signed on to the Intranet site. The Intranet facilitates the exchange of information and collaboration among project participants.

Progress: Project team members regularly post drafts, completed materials and spreadsheets online for internal review. The intranet has helped team members and serves as an internal website with announcements and important documents readily available to all team members.

FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project September 1- September 30, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer at the EAC.
Job Description
U.S. Election Assistance Commission (EAC) Voter Fraud and Voter Intimidation
Project Consultant

The U.S. Election Assistance Commission (EAC) seeks to identify a senior-level project consultant to develop various project activities and studies related to U.S. election voter fraud and voter intimidation.

The consultant must have knowledge of voter fraud and intimidation along with an understanding of the complexities, nuances and challenges which surround the topics. The EAC is particularly interested in candidates with experience in elections, with public policy and the law. The consultant must be able to demonstrate an ability to approach the issues of voter fraud and intimidation in a balanced, nonpartisan fashion.

This consultant, whose contract would run for the period June-November, 2005, would be responsible for:

• Identifying and convening a working group of key individuals and organizations knowledgeable about the topics of voter fraud and intimidation;

• Developing a project scope of work and a project work plan related to voter fraud and intimidation;

• Authoring a report summarizing the key findings of this preliminary study of voter fraud and intimidation. The report will also include suggestions for specific activities the EAC may undertake around these topics.

From this initial research and exploration of these topics the consultant may be retained to help oversee research projects and contracts EAC may develop on the topics of voter fraud and intimidation.

EAC’s consultant fees are competitive and are awarded based on the candidate’s relevant background and experience.

Biographical Sketch
R. Michael Alvarez, Ph.D.
Professor of Political Science
Division of the Humanities and Social Sciences

R. Michael Alvarez was selected by Scientific American magazine to be on the 2004 "Scientific American 50" for his outstanding scientific and technological contributions to help improve the U.S. voting system. He has taught political science at Caltech since December 1992. He received his B.A. in political science in 1986 from Carleton College; he received his M.A. and Ph.D. from Duke University in 1990 and 1992, respectively. Alvarez was named an Associate Professor in April 1995, received tenure in June 1997, and was promoted to Professor in March 2002. Alvarez has focused most of his research and teaching on the study of electoral politics in the United States. His first book, Information and Elections, was published in the spring of 1997. This project examined the question of how much American voters know about presidential candidates and how they obtain that information. His second book, Hard Choices, Easy Answers (with John Brehm), is a study of American public opinion about divisive social and political issues. His recent book (published January 2004), Point, Click, and Vote: The Future of Internet Voting (with Thad E. Hall), published by Brookings Institution Press, examines the controversies swirling around the Internet voting in the United States. He has also published many articles on electoral behavior and public opinion in the United States and other advanced industrial democratic nations.

Alvarez has received a number of honors and grants for his work. He was named the "Emerging Scholar" by the American Political Science Association's Voting Behavior and Public Opinion Section in 2002. He was a John M. Olin Faculty Fellow (1994-95) as well as a John Randolph Haynes and Dora Haynes Faculty Fellow (1994, 1997, 1999, 2002). Alvarez received the Sprague Award with John Brehm for their work on public opinion, and the Durr Award with Jonathan Nagler for their work on modeling elections. Also, Alvarez has received financial support for his research from the National Science Foundation, The IBM Corporation, the Carnegie Corporation of New York, and the Knight Foundation. Alvarez edits the Analytical Methods for Social Research book series and is on the editorial boards of a number of academic journals: American Journal of Political Science, American Politics Quarterly, Election Law Journal, Political Behavior, The Journal of Politics and Political Research Quarterly. He was the editor of The Political Methodologist, 1993-96.

Professor Alvarez is Co-Director of the Caltech-MIT Voting Technology Project, researching technological solutions to electoral problems, and is the Principal Investigator of the "Secure Electronic Registration and Voting Experiment" Evaluation. He has been an expert witness in a series of recent court cases, including California's defense of the blanket primary (California Democratic Party v. Jones), Bradley v. Compton, and Cano v. Davis. He has testified before a number of organizations, including the U.S. Senate. He was an outside consultant for Knight Ridder on their 2000 Hispanic Voter Poll, and in 2004 is a consultant to Greenberg, Quinlan, Rosner Research Inc. in their research on the Hispanic electorate. Alvarez is a frequent guest on Pasadena's National Public Radio affiliate, KPCC-FM, and writes opinion pieces for local newspapers. He has been interviewed for National Public Radio, Jim Lehrer's Newshour, CNN, ABC, NBC News, and for many state, national and international newspapers.
Bradford R. Clark
Professor of Law

Education: B.A., Florida State University; J.D., Columbia University

Biographical sketch: Before coming to the Law School in 1993, Professor Clark spent several years practicing law in the Washington, D.C., office of Gibson, Dunn & Crutcher, where he specialized in appellate litigation. Previously, Professor Clark served as an attorney adviser in the Department of Justice’s Office of Legal Counsel, where he provided legal advice to the president, the attorney general, and the heads of executive departments. Professor Clark also served as a law clerk to Judge Robert H. Bork of the U.S. Court of Appeals for the D.C. Circuit and to Supreme Court Justice Antonin Scalia. Professor Clark teaches and writes in the areas of civil procedure, constitutional law, and federal courts.

Current Semester Courses: Civil Procedure I, Law Review

Grants/Contracts

"Issue Advocacy and Soft Money in the 2004 Presidential Election in Missouri." Center for the Study of Elections and Democracy, Brigham Young University. Award: $8,450. (May 2004-February 2005). This award funds research concerning campaign activity in the presidential race in Missouri.

"Public Opinion Toward the Library in the Community." Kansas City, Missouri Public Library. Contract: $6,372. (January 2004-June 2004). This grant/contract funds the survey conducted by my class, “Survey Research and Analysis,” which is a service learning class at UMKC.

"Explaining Unrecorded Votes in Elections." University of Missouri System Research Board Grant, Requested $48,468, Awarded $38,468 (with David Kimball).

"Issue Advocacy and Soft Money in the 2002 Missouri Senate Election." Center for the Study of Elections and Democracy, Brigham Young University. Award: $4400. (August 2002-February 2003). This award funds research concerning campaign activity in the Carnahan/Talent Senate race (with Dale A. Neuman).

"Voting and the Media: A New Look at Public Journalism." University of Missouri-Kansas City Faculty Research Grant, Award: $6,000. (December 2001-January 2003).
Grants/Contracts, continued...

"Kansas City Consensus Issue Identification Survey." University of Missouri-Kansas City, Center for the City, Faculty Knowledge Fund, Award: $5,815. (January 2002-May 2002). This award provided the funding for a survey conducted by my class "Survey Research and Analysis" for the Kansas City Consensus, a policy research and advocacy group.

"Invalidated Ballots in the 1996 Presidential Election: A County-Level Analysis." University of Missouri-Kansas City Research Incentive Fund, Award: $350. (April 2001). This award allowed me to purchase data for the voting equipment project.

Pending Grant Applications

"Ballot Design and Unrecorded Votes." (With David Kimball).
- Application submitted to Smith Richardson Foundation Domestic Public Policy Research Fellowship Program, June 2004 ($60,000).
- Application submitted to National Science Foundation, August 2004.

Conferences

Presentations

Conference Presentations, continued...

"Missouri's Legacy: Jean Carnahan and Her Run for Senate." Paper presented at the 2002 Southern Political Science Association Meeting, November 6-9, 2002, Savannah, GA.

Conference Presentations, continued...

"The Missouri Primary." Paper presented at the American Political Science Meeting, Washington, DC, August 31-September 2, 2000 (with E. Terrence Jones and Dale Neuman, with Sam Dreiling and Maureen Gilbride Mears).

"Viewers Like You: Community Norms and Contributions to Public Broadcasting." Paper presented at the 1997 Association for Research on Nonprofit Organizations and Voluntary Action Annual Conference. December 4-6, 1997, Indianapolis, IN; also presented at the 1997 Southern Political Science Meeting, November 5-8, 1997, Norfolk, VA.

Conference Presentations, continued...

"Overworked, Overwrought and Underpaid: Teaching Students to Teach." Paper presented at the 68th Annual Southern Political Science Meeting, November 6-9, 1996, Atlanta, GA (with Julie Dolan, Marni Ezra and Karen O'Connor).

Other Conference Participation

Expert Testimony

Offered Affidavit in Working Families, et. al v. New York City Board of Elections on behalf of the plaintiff (asked to participate by the Brennan Center for Justice, who was representing the plaintiff). (Summer 2003; case settled out of court. The NYC Board of Elections disabled the sensor latches on lever voting machines. The plaintiffs asked the Election Board to reconnect them.)

Offered Affidavit and Deposition in Stewart v. Blackwell, Ohio, on behalf of the plaintiffs, represented by the ACLU. (Fall 2003-present. In this lawsuit, the plaintiffs are asking the state and four counties to stop using punchcard ballots and optical scan voting equipment with central count ballots.)

Testified before the Blunt Commission on Electoral Reform, January 12, 2001, Hearings held at the University of Missouri-Kansas City

*Special Note: My colleague Stephen Knack testified before two United States Congressional Committees about our paper, "Who Uses Inferior Voting Technology?" (Committee on Rules and Administration, Hearing on Election Reform, and Committee on Governmental Affairs, Hearing on Federal Election Practices and Procedures).

Community Involvement

“Public Opinion Toward the Library in the Community.” Survey conducted for the Kansas City Public Library as a part of my Survey Research and Analysis Class, Spring 2004.

Data Analysis for “By the People.” National deliberative democracy experiment held in various locations around the nation. Organized data entry and conducted data analysis for KCPT-TV, Kansas City's PBS affiliate, January 2004.

“Issue Identification Survey.” Conducted for Kansas City Consensus as a part of my Survey Research and Analysis Class. Spring 2002.

Community Activities

Member, Central United Methodist Church. (on the Church and Society Committee).
National Women's Political Caucus.
Block Captain, 5700 of Harrison Street, Kansas City, MO

Family

Husband: John Szmer
Daughter: Gwendolyn Margaret Szmer, born September 26, 2003
Equal Rights Amendment

An amendment to guarantee equal rights to women has still never been ratified and added to the U.S. Constitution, even though it was first introduced in 1923. The Equal Rights Amendment passed Congress in 1972 but lapsed in 1982 when it fell three states short of ratification.

Where we stand: The National Women's Political Caucus supports the adoption of the Equal Rights Amendment to the United States Constitution. more...

Health Care for Women

Long-Term Care Insurance

Long-term care is required for many Americans with permanent disabilities and illnesses. Assisted living, whether at home or in a nursing home,...

Where we stand: The National Women's Political Caucus supports long-term care insurance for women. more...

Equality of Insurance Benefits

A majority of insurance companies do not provide coverage for essential services, such as contraceptive drugs and devices. Contraceptives are a...

Where we stand: The National Women's Political Caucus supports mandatory coverage of family planning, including contraceptive drugs and devices. more...

Prescription Drug Coverage by Medicare

In December of 2003 Congress passed a law creating a Medicare prescription drug discount card, allowing those eligible for Medicare to receive...

Where we stand: The National Women's Political Caucus supports full coverage of prescription drugs by Medicare. more...

Judicial Appointments

Pro-Choice Judicial Nominees

In January of 1973 the Supreme Court legalized abortion, giving women the right to choose. The right to choose has been attacked recently,...

Where we stand: The National Women's Political Caucus supports pro-choice judicial nominees who will uphold Roe v. Wade and continue to give women the right to choose. more...

Reproductive Choice

Mandatory Waiting Periods for Abortions
Mandatory waiting periods require women seeking abortions to wait for a period of time before the procedure may be performed. Generally, a...

Where we stand: The National Women's Political Caucus supports a woman's access to abortions without unnecessary hassle and delay. more...

International Human Rights for Women
Women are often the target of human rights violations specifically because they are women. Violence and sexual abuse in the home is still...

Where we stand: The National Women's Political Caucus supports human rights for all women across the globe, so that women may live in a free society. more...

RU486
In 2000, the Food and Drug Administration approved RU486, more commonly known as the abortion pill. RU486 is a non-surgical pill that enables...

Where we stand: The National Women's Political Caucus supports availability of RU486 and emergency contraception. The NWPC does not support pharmacists who determine who can and cannot receive them. more...

Violence Against Women Act

Violence Against Women Act Reauthorization 2005
The Violence Against Women Act (VAWA) of 2000 expires in 2005 and the remarkable gains we've made in ending domestic and sexual violence could come to a halt if Congress does not act quickly.

Where we stand: The National Women's Political Caucus supports the reauthorization and funding of the Violence Against Women Act. more...

Women and Education

Sex Education
Sex education provides accurate information on healthy relationships, peer pressure, contraception and abstinence in order for youth to use...

Where we stand: The National Women's Political Caucus supports comprehensive sex education that allows youth to know all of their options and make informed decisions. more...

Equal Pay
The Equal Pay Act of 1963 worked to end the pay differential that exists between men and women. The act made it illegal for employers to pay...

Where we stand: The National Women's Political Caucus supports equal pay for everyone, regardless of sex or race. more...

A Living Wage
A living wage would increase the income of low wage earners so that they may be able to support their family without additional government...

Where we stand: The National Women's Political Caucus supports the adoption of a national living wage. more...
Daniel Hays Lowenstein

Biography

Daniel Hays Lowenstein

Professor of Law
Born New York, New York, 1943
A.B. Yale, 1964
LL.B. Harvard, 1967
UCLA Law faculty since 1979

Daniel Lowenstein teaches Election Law, Statutory Interpretation & Legislative Process, Political Theory, and Law & Literature. A leading expert on election law, he has represented members of the House of Representatives in litigation regarding reapportionment and the constitutionality of term limits. He is a member of the Board of Directors of the award-winning theatre troupe Interact and regularly brings the company to the School of Law to perform plays with legal themes, such as Sophocles' Antigone, Ibsen's Rosmerholm, and Wouk's The Caine Mutiny Court Martial.

Professor Lowenstein worked as a staff attorney at California Rural Legal Assistance for two and one-half years. While working for California's Secretary of State, Edmund G. Brown Jr. in 1971, he specialized in election law, and was the main drafter of the Political Reform Act, an initiative statute that California voters approved in 1974, thereby creating a new Fair Political Practices Commission. Governor Brown appointed Professor Lowenstein as first chairman of the Commission. He has served on the national governing board of Common Cause and has been a board member and a vice president of Americans for Nonsmokers' Rights.

Professor Lowenstein's textbook, Election Law (1995), appears to be the first text on American election law since 1877. He has written on such topics as campaign finance, redistricting, bribery, Initiative elections, political parties, commercial speech, and The Merchant of Venice.

For information on Interact, click on:

Professor Lowenstein represented certain plaintiffs in California Prolife Council PAC v. Scully, challenging California regulations of slate mail. For a pdf file containing the March 1, 2001, order of U.S. District Judge Lawrence K. Kariton declaring these regulations unconstitutional, use the following link:
http://www.law.ucla.edu/faculty/bios/lowenstein/slatemailorder.pdf

Read Professor Lowenstein's 10/02/2003 Daily Journal article: "Valid Ballot - Panel Exploited Precedent to Rationalize Postponement of Recall Vote".

**Awards**

Abigail Thernstrom is a Senior Fellow at the Manhattan Institute in New York, a member of the Massachusetts State Board of Education, and a commissioner on the United States Commission on Civil Rights. She received her Ph.D. from the Department of Government, Harvard University, in 1975.

Thernstrom and her husband, Harvard historian Stephan Thernstrom, are the co-authors of *America in Black and White: One Nation, Indivisible* (Simon & Schuster), which the *New York Times Book Review*, in its annual end-of-the-year issue, named as one of the notable books of 1997. They are currently working on a new book: *Getting the Answers Right: The Racial Gap in Academic Achievement and How to Close It*.

Her frequent media appearances have included Fox News Sunday, Good Morning America, the Jim Lehrer News Hour, Both Sides with Jesse Jackson, and Black Entertainment Television. For some years, she was a stringer for The Economist, and continues to write frequently for a variety of journals and newspapers, including *Commentary, The Wall Street Journal, The New York Times, The Washington Post*, and *The Public Interest*.

She serves on several boards: the Center for Equal Opportunity, and the Institute for Justice, among others. From 1992 to 1997 she was a member of the Aspen Institute's Domestic Strategy Group.

President Clinton chose her as one of three authors to participate in his first "town meeting" on race in Akron, Ohio, on December 3, 1997, and she was part of a small group that met with the President again in the Oval Office on December 19th.
John Samples

Director, Center for Representative Government

John Samples directs Cato's Center for Representative Government, which studies campaign finance regulation, delegation of legislative authority, term limits, and the political culture of limited government and the civic virtues necessary for liberty. He is an adjunct professor at Johns Hopkins University. Prior to joining Cato, Samples served eight years as director of Georgetown University Press, and before that, as vice president of the Twentieth Century Fund. He has published scholarly articles in Society, History of Political Thought, and Telos. Samples has also been featured in mainstream publications like USA Today, the New York Times, and the Los Angeles Times. He has appeared on NPR, Fox News Channel, and MSNBC. Samples received his Ph.D. in political science from Rutgers University.

Ensuring the Continuity of the United States Government
Bradley A. Smith  
Professor of Law  
B.A., cum laude, Kalamazoo College, 1980  
J.D., cum laude, Harvard Law School, 1990

One of the nation’s leading authorities on Election Law and Campaign Finance, Professor Smith returns to Capital after five years in Washington, D.C., where he served as Commissioner, Vice Chairman, and Chairman of the Federal Election Commission (FEC). Nominated by President Clinton in February of 2000 to fill a Republican-designated seat on the Commission, Professor Smith was confirmed by the Senate in May of 2000 and took his seat the following month. Prior to his nomination, Smith had become a fixture in the national discussion on campaign finance, and was called “the most sought after witness” when Congress considered campaign finance issues. His writings have appeared in such academic journals as the Yale Law Journal, Georgetown Law Journal, and Pennsylvania Law Review, and in popular publications such as the Wall Street Journal, USA Today, and National Review. In 2001, Princeton University Press published his book, “Unfree Speech: The Folly of Campaign Finance Reform,” which was praised by syndicated columnist George Will as “the year’s most important book on governance.” The Times of London called it “a much needed dose of realism which has relevance far beyond America,” and Publishers Weekly described it as “a marvelous contrarian view: moderate in tone, elegant in language, clever in argument.” Named FEC Chairman in January 2004, Professor Smith oversaw implementation of the McCain-Feingold campaign finance bill, and successfully fought to increase due process protections for defendants in FEC enforcement actions. Professor Smith has spoken at over 30 of the nation’s law schools, including Harvard, Yale, Columbia, Stanford, Chicago, Michigan, and NYU. His many media credits include national appearances on ABC, NBC, PBS, Fox, CNBC, MSNBC, C-Span, and Bloomberg Media, including such programs as Hardball with Chris Matthews, and the O’Reilly Factor. He has also appeared on numerous local and national radio programs, and made television appearances in Great Britain, Japan, and Canada.

Prior to joining Capital’s faculty in 1993, he served as United States Vice Consul in Ecuador, and worked as an attorney for the law firm of Vorys, Sater, Seymour and Pease. He has also taught law at George Mason University. Professor Smith was the first Director of Capital’s summer study abroad program in Greece, and from 1994 to 2000 served as co-Director of Capital’s National Moot Court team with Professor Jeffrey Ferriell, winning six regional championships in the National Appellate Advocacy Competition or National Moot Court Competition. His teaching has included Election Law, Civil Procedure, Law & Economics, Jurisprudence, and Administrative Law.

Working Papers

PATRICK HENRY PROFESSOR OF CONSTITUTIONAL LAW AND THE SECOND AMENDMENT NELSON LUND has written widely in the field of constitutional law, including articles on constitutional interpretation, federalism, separation of powers, the Second Amendment, the Commerce Clause, the Speech or Debate Clause, the Equal Protection Clause, and the Uniformity Clause. In addition, he has published articles in the fields of employment discrimination and civil rights, the legal regulation of medical ethics, and the application of economic analysis to legal institutions and legal ethics.

Professor Lund left the faculty of the University of Chicago to attend its law school, where he served as executive editor of the University of Chicago Law Review and chapter chairman of the Federalist Society for Law and Public Policy Studies. After law school, he held positions at the United States Department of Justice in the Office of the Solicitor General and the Office of Legal Counsel. He also served as a law clerk to the Honorable Patrick E. Higginbotham of the United States Court of Appeals for the Fifth Circuit and to the Honorable Sandra Day O'Connor of the United States Supreme Court. Following his clerkship with Justice O'Connor, Professor Lund served in the White House as associate counsel to the president from 1989 to 1992.

Since joining the faculty at George Mason, Professor Lund has taught Constitutional Law, Legislation, Federal Election Law, Employment Discrimination, State and Local Government, and seminars on the Second Amendment and on a variety of topics in Jurisprudence.
Abigail Thernstrom is a Senior Fellow at the Manhattan Institute in New York, a member of the Massachusetts State Board of Education, and a commissioner on the United States Commission on Civil Rights. She received her Ph.D. from the Department of Government, Harvard University, in 1975.

Thernstrom and her husband, Harvard historian Stephan Thernstrom, are the co-authors of America in Black and White: One Nation, Indivisible (Simon & Schuster), which the New York Times Book Review, in its annual end-of-the-year issue, named as one of the notable books of 1997. They are currently working on a new book: Getting the Answers Right: The Racial Gap in Academic Achievement and How to Close It.

They are also the editors of a forthcoming volume, Beyond the Color Line: New Perspectives on Race and Ethnicity, and their lengthy review of William G. Bowen and Derek Bok's much-noticed book, The Shape of the River, appeared in the June 1999 issue of the UCLA Law Review.

Abigail Thernstrom's 1987 work, Whose Votes Count? Affirmative Action and Minority Voting Rights (Harvard University Press) won four awards, including the American Bar Association's Certificate of Merit, and the Anisfield-Wolf prize for the best book on race and ethnicity. It was named the best policy studies book of that year by the Policy Studies Organization (an affiliate of the American Political Science Association), and won the Benchmark Book Award from the Center for Judicial Studies.

Her frequent media appearances have included Fox News Sunday, Good Morning America, the Jim Lehrer News Hour, Both Sides with Jesse Jackson, and Black Entertainment Television. For some years, she was a stringer for The Economist, and continues to write frequently for a variety of journals and newspapers, including Commentary, The Wall Street Journal, The New York Times, The Washington Post, and The Public Interest.

She serves on several boards: the Center for Equal Opportunity, and the Institute for Justice, among others. From 1992 to 1997 she was a member of the Aspen Institute's Domestic Strategy Group.

separation of powers, the Second Amendment, the Commerce Clause, the Speech or
Debate Clause, the Equal Protection Clause, and the Uniformity Clause. In addition, he
has published articles in the fields of employment discrimination and civil rights, the
legal regulation of medical ethics, and the application of economic analysis to legal
institutions and legal ethics.

Professor Lund left the faculty of the University of Chicago to attend its law school,
where he served as executive editor of the *University of Chicago Law Review* and chapter
chairman of the Federalist Society for Law and Public Policy Studies. After law school,
he held positions at the United States Department of Justice in the Office of the Solicitor
General and the Office of Legal Counsel. He also served as a law clerk to the Honorable
Patrick E. Higginbotham of the United States Court of Appeals for the Fifth Circuit and
to the Honorable Sandra Day O'Connor of the United States Supreme Court. Following
his clerkship with Justice O'Connor, Professor Lund served in the White House as
associate counsel to the president from 1989 to 1992.

Since joining the faculty at George Mason, Professor Lund has taught Constitutional
Law, Legislation, Federal Election Law, Employment Discrimination, State and Local
Government, and seminars on the Second Amendment and on a variety of topics in
Jurisprudence.

Subject Chron memo on Job and Tova

Here is the revised memo.

Checked the files- Tally Vote was initiated September 16 and was due back on September 20.

Job and Tova asked about the status of their signed contract on September 20. A series of e-mails were exchanged around September 22 regarding who would be overseeing their contract-(Gavin, Peg, etc.)

Carol Paquette sent several internal e-mails with the altered Statement of Work on the voting fraud and intimidation project, starting on September 21.

Sorry you feel awful- this place just about does you in every October 1

:-)

Hang in there

K

All-

This morning the Commissioners approved the Statement of Work for the Voter Fraud/Voter Intimidation project consultants, with the caveat that some additional language would be added and the SOW polished up.

Tom, Peg and I are scheduled to interview the first candidate tomorrow morning at 10:00 am and will need your edits to this SOW by COB today.

I am attaching the item again, just in case you don't have a copy. Since I have an appointment out of the office and will be leaving at 4:00 today, I ask that you get your changes and edits to Nicole so that she may enter them and get the revised copy to the candidate first thing in the morning.

Thanks for your input on this.

Statement of Work
Assistance with developing an Election Assistance Commission (EAC) Voter Fraud and Voter Intimidation Project

Background

Section 241 of HAVA enumerates a number of periodic studies of Election Administrations issues in which the U.S. Election Assistance Commission may elect to engage. In general “On such periodic basis as the Commission may determine, the Commission shall conduct and make available to the public studies regarding the election administration issues described in subsection (b), with the goal of promoting methods of voting and administering elections....”

Specifically, Section 241b 6 and 7 describes Election administration issues such as:

6. Nationwide statistics and methods of identifying, deterring and investigating voting fraud in election for Federal offices and

7. Identifying, deterring and investigation methods of voter intimidation.

Building on this HAVA reference to studies of voter fraud and voter intimidation, the EAC Board of Advisors has indicated a priority interest in further study of these issues to determine how the EAC might respond to them.

The U.S. Election Assistance Commission (EAC) seeks to identify senior-level project consultants to develop various project activities and studies related to U.S. election voter fraud and voter intimidation.

The consultant(s) must of have knowledge of voter fraud and intimidation along with an understanding of the complexities, nuances and challenges which surround the topics. The EAC is particularly interested in candidates with experience in elections, with public policy and the law. The consultant(s) must be able to demonstrate an ability to approach the issues of voter fraud and intimidation in a balanced, nonpartisan fashion.
Duties

The consultant (s), whose contract would run for the period September-February, 2005, would be responsible for the following.

1. Performing background research, including a state-by-state administrative and case law review related to voter fraud and intimidation, and a review of current voter fraud and intimidation activities taking place with key government agencies, civic and advocacy organizations. This review will be summarized and presented to the EAC.

2. Identifying and convening a working group of key individuals and organizations knowledgeable about the topics of voter fraud and intimidation. The list of working group members and the methods used to identify the groups members will be shared with EAC staff prior to the confirmation of the working group. The working group’s goals and objectives and meeting agendas will be vetted with key EAC staff.

3. Developing a project scope of work and a project work plan related to voter fraud and intimidation. Based on research into the topics, the deliberations and findings of the working group, and the consultants’ understanding of the EAC’s mission and agency objectives, the consultants will develop a draft scope of work and project work plan for the EAC’s consideration.

4. Authoring a report summarizing the key findings of this preliminary study of voter fraud and intimidation. The report will also include suggestions for specific activities the EAC may undertake around these topics.

From this initial research and exploration of these topics the consultant (s) may be retained to help oversee follow-on research projects and contracts EAC may develop on the topics of voter fraud and intimidation.

Special Considerations

Work for Hire Agreement (insert language)

Terms and Conditions

The period of performance for this consulting contract is six months, with a fixed price ceiling of $XXXXXX for labor. The consultant (s) is expected to work at least 200 hours in performing this work. The EAC estimates that the most efficient distribution of these hours would be as follows: XXXXX. The period of performance and level of effort can be revised in writing by mutual agreement of the EAC and the consultant, as required.

Job-

Thanks ever so much for following up. Indeed, the Commissioners have reviewed the issue and have agreed in principle, to an approach that would entail hiring a consultant or consultants to help the EAC study and frame the issues of voter fraud and intimidation.

The idea would be that after a period of time, the consultants, and, perhaps, a working group of the EAC, would make a series of recommendations on next steps for the agency to take regarding voter fraud and intimidation.

Thanks for your patience; I hope to have a definitive answer for you by mid-July at the latest.

Tom and Jeannie-

At yesterday's research briefing, the Commissioners approved the concept of a series of scholarly articles that would cover various "Trends in Election Administration"

There was general agreement that the EAC would produce, by the end of this year, two of these articles that might be on topics such as early voting, restoration of felon rights, vote centers, etc.

I'd like to have a brief meeting the end of this week or the beginning of next with you, Jeannie and myself to go over some of the finer points of this idea and to put in place a process to get this project moving.

Shall we meet Friday morning at 11:00?

I'd like for us to identify the writers we want to use and the process we will use to determine the selection of topics for articles. As the Chair suggested, we should also discuss in some detail, the editorial guidelines we will use that will guide the work that our writers will do for us.

Thanks

Commissioner Hillman:

PFAW was not represented on the Working Group for the Voting Fraud-Voter Intimidation research project. Also, I have had no communications with the organization about the study. I did work with Jeannie and Gavin on a response to PFAW’s FOIA request for the study. Jeannie should have the final copy of that reply.

Peggy Sims
I know that People For the American Way delivered petitions to EAC about release of the Fraud report but I need to know what other communications EAC has had with People For about the study.

Was it represented on the study's working group? If so, by whom? Did they write to us and did we answer? Did anybody from there talk with anybody at EAC about the study and our work? Thanks.

Sent from my BlackBerry Wireless Handheld
Brian, nice to meet you yesterday. I am not yet sure on the direction our Practice will grow with e-voting...

The abnormal and unacceptable length of time to get turnarounds on our certification submissions, and the changing standards such that we have to certify to different levels of work than Systest or Wyle, to get their same level of certification, has interfered with our customer relationships and caused our employees to be very nervous, such that they sought our permission to join Wyle while continue to support us on the State of NY work.

The part-time auditor assigned by your group to us is conflicted and has other work. While I agree our July 2006 documentation was deficient to prove the work we were doing in due course met existing Federal standards, we have spent tens of thousands of dollars and many man months to stand up to a new level of documentation, which we believe has been made fully compliant (with the standards sent down for others) by late last year and exceeded in February, which work is yet to be decided upon- 10 weeks after our early submission to your request. After over a decade of dedication to this important work, it is criminal what CIBER has had to endure compared to others to get interim certification.

Had our accreditation been handled as Systest and Wyle, I doubt yesterday’s hearing would have been convened to vilify either of us. The inflection point was last December, and we are all paying a price for the inaction and slow action thereto.

The EACs process in this matter has unfairly hung CIBER out to dry and incur damages there from. To reduce further risk, I would encourage the EAC to reply to our February submission asap, accredit us as we have exceeded the levels of criteria Systest and Wyle were subjected to, and move on to the important business of higher standards with NIST on all future accreditations.

Mac Slingerlend
Commissioners,
Would you like me to request that he post my response?

I'd be happy to print your email on my blog (leaving off your phone number, of course). Let me know if you'd like me to do so.

As far as contacting you before I blog about the FEC, I don't think I see myself as a journalist who has an obligation to do so before expressing my opinions. However, I do welcome you sending me comments, and generally speaking I'd be happy to reproduce those comments on the blog if you like.

Rick

Mr. Hasen,
I write to point out incorrect information you posted on your website on December 11, 2006. You wrote: "Note what's missing compared to the earlier version leaked to the USA Today Newspaper." No one at the EAC leaked anything to USA Today. The reporter asked for a copy of the staff report about the fraud
research that was presented at a public meeting in May to our Board of Advisors and the Standards Board, and the EAC provided it to him. This information was presented and discussed at a meeting that was open to the public, so we provided materials distributed at the meeting to anyone who requested it. The staff report about the fraud project was also distributed to the members of both advisory boards. Go here to view the Federal Register notice about the public meeting at which this project and many others were discussed.

The statement you attribute to one of the consultants is absolutely correct. As stated by their contract, these consultants were hired so that the EAC could "...obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation."

As for your reference to what's "missing compared to the earlier version," the report contains the summaries of every interview conducted by the consultants as well as every book, article, report or case that was reviewed. It does not contain the synopsis of those interviews, which were written by the consultants. EAC provided the individual summaries so readers could reach their own conclusions about the substance of the interviews.

EAC's interpretation of HAVA and its determination of what it will study and how it will use its resources to study it are matters of agency policy and decision. These are not, nor should they be, determinations or decisions made by consultants. The EAC has the ultimate responsibility for the reports it issues, and it is incumbent upon the agency to conduct due diligence to ensure reports, data or any other information is complete and accurate before it is adopted by the Commission.

As someone with a public platform who writes about matters regarding election administration, I would appreciate it if you would consider extending the same professional courtesy most journalists do and contact the agency if you have questions or concerns in the future about EAC policy or actions. You may reach me directly at 202-566-3103 if I can ever be of assistance. Thank you for your consideration in this matter.

Sincerely,
Jeannie Layson

Yes, we should have him post your response.

At least he acknowledged your response and admits that these are his opinions and that he does not think of himself as a journalist.

---

Commissioners,
Would you like me to request that he post my response?

----- Forwarded by Jeannie Layson/EAC/GOV on 12/13/2006 02:48 PM -----
Commissioners,
I want to respond to Rick Hasen's post regarding EAC and the fraud report. My suggested response is below, and his original post follows. Please let me know if you agree that I should attempt to correct the misinformation he posted. If so, please let me know if you approve of my suggested response. Thank you.

Mr. Hasen,
I write to point out incorrect information you posted on your website on December 11, 2006. You wrote: "Note what's missing compared to the earlier version leaked to the USA Today Newspaper." No one at the EAC leaked anything to USA Today. The reporter asked for a copy of the staff report about the fraud research that was presented at a public meeting in May to our Board of Advisors and the Standards Board, and the EAC provided it to him. This information was presented and discussed at a meeting that was open to the public, so we provided materials distributed at the meeting to anyone who requested it. The staff report about the fraud project was also distributed to every member of both advisory boards. EAC's interpretation of HAVA and its determination of what it will study and how it will use its resources to study it are matters of agency policy and decision. These are not, nor should they be, determinations or decisions made by consultants. The EAC has the ultimate responsibility for the reports it issues, and it is incumbent upon the agency to conduct due diligence to ensure reports, data or any other information is complete and accurate before it is adopted by the Commission.

As someone with a public platform who informs the public about matters regarding election administration, I would appreciate it if you would extend the same professional courtesy most journalists do and contact the agency in the future if you have questions or concerns about EAC policy or actions. You may reach me directly at 202-566-3103. I appreciate your consideration in this matter.

Sincerely,
Jeannie Layson
Director of Communications
More on FL-13, and a Role for the EAC?
When I saw this headline on the Sarasota Herald Tribune web page, I thought it must have been about the FL-13 race.
Over on the election law listserv, Doug Johnson, responding to my commentary calling for the House to investigate the problems and declare a revote in the FL-13 race, suggested that perhaps the EAC is better situated to conduct an investigation than the House of the problems in the FL-13.
I'm afraid we might not be able to count on the EAC to conduct an investigation that is well-funded, tough, and fair. Politics appears to be creeping in to decisions of the EAC's advisory board, and there's real concern about the EAC's vote fraud report. Note what's missing compared to the earlier version leaked to the USA Today newspaper. Tova Wang, who authored the draft report for the EAC, issued the following statement to me: "My co-consultant and I provided the EAC with a tremendous amount of research and analysis for this project. The EAC released what is their report yesterday."
The EAC has also lost two commissioners, one Republican and one Democrat, who appeared to be tough-minded and fair. I am very worried about the fairness and non-partisanship of the new rumored nominees.
In short, the EAC has to prove it is up to the task of fair and serious inquiry before it could be trusted with something like an investigation of the FL-13.

Commissioners-

As was discussed during our session on February 17, 2005, please review and provide your approval, disapproval or amendments to the following items by Friday, February 25, 2005:

1. The attached Scope of Work which outlines the tasks related to contract work around projects relating to voluntary guidance on provisional voting and voter identification procedures.

2. The proposal will be advertised beginning February 28, 2005.

3. The deadline for submitting proposals will be March 14, 2005.

4. Proposal review will be completed by EAC staff by March 17, 2005.

5. Staff will recommend a contractor to the Commissioners on March 18, 2005.

6. Commissioners will be asked for their decisions no later than Tuesday, March 22, 2005.

Thank you for your help and attention to this matter.

February 14, 2005

PROVIDING EAC ASSISTANCE IN DEVELOPING VOLUNTARY GUIDANCE ON PROVISIONAL VOTING AND VOTER IDENTIFICATION PROCEDURES

0.0 Contract Title: Assistance to the U.S. Election Assistance Commission in the Development of Guidance on Provisional Voting and Voter Identification Procedures

1.0 Background: Sec. 302(a) of HAVA requires that all States allow the casting of provisional ballots in instances where a voter declares their eligibility to vote but their name does not appear on the official list of eligible voters, or an election official asserts that a voter is not eligible to vote. This section describes several requirements for implementation of provisional voting, but the States have considerable latitude in specifying how to carry out these requirements. The EAC seeks to examine how provisional voting was implemented in the 2004 general election and to prepare guidance for the States on this topic for the 2006 Federal elections.

HAVA Sec. 303(b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC seeks to examine how these voter identification requirements were implemented in the 2004 general election and to prepare guidance for the States on this topic for the 2006 elections.

One of the remedies for a voter not having an acceptable proof of identity is to allow the voter to cast a provisional ballot, either at the polling place or by mail. This linkage between these two HAVA sections provides a rationale for conducting research on these topics in parallel. However, it is anticipated that two separate guidance documents will result.

2.0 Objective: The objective of this contract is for EAC to obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics for promulgation to the States in time for implementation for the 2006 Federal elections. The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

3.0 Scope: In general the Contractor shall be responsible for all research and analysis activities, including the conduct of public hearings for fact finding and public comment purposes. However, in light of the urgent need to get this work underway, the EAC has scheduled a public hearing on February 23, 2005, on the topic of provisional voting.
An initial framework for provisional voting policy has been set by the court decisions rendered on the election procedures utilized in the 2004 election. The 6th Circuit decision, in particular, has drawn some boundaries which must be given due regard in the course of considering future policy alternatives for provisional voting.

Notice of public meetings and hearings is required to be published in the Federal Register. The Contractor shall be responsible for preparing the notice documents, and the EAC will submit the notices and cover the cost of publication. In addition, draft guidance documents must be published in the Federal Register to obtain public comment prior to their adoption. Again, the Contractor will work with the EAC to prepare the draft documents for publication, which the EAC will submit and cover the cost of publication. Comments received will be provided to the Contractor for analysis and incorporation into the final guidance documents, as appropriate.

4.0 Specific Tasks

For ease of reference, following task 4.3 the remaining tasks are listed separately under the headings of Provisional Voting and Voter Identification Requirements. It is understood that the work on these two topics will be conducted essentially concurrently, with Voter Identification activities starting approximately one month after Provisional Voting.

4.1 Prepare a project work plan. The Contractor shall prepare and deliver a brief Project Plan not later than 10 days after contract award. This plan shall describe how the Contractor will accomplish each of the project tasks, including a timeline indicating major milestones. A single document will be prepared to include both provisional voting and voter identification tasks. The Plan shall be presented at a project kickoff meeting with the EAC Project Manager.

4.2 Submit monthly progress reports. The Contractor shall submit a monthly progress report within 2 weeks of the end of each month. This report shall provide a brief summary of activities performed and indicate progress against the timeline provided in the Project Plan. Any issues that could adversely affect schedule should be identified for resolution. Budget status should also be provided.

4.3 Conduct periodic briefings for the EAC. The Contractor shall periodically meet with the EAC Project Manager and the lead Commissioner for this work to discuss research findings and progress. The Project Plan should make allowance for this activity. The number and frequency of briefings will be determined by the Contractor Project Manager and the EAC Project Manager as the work progresses. The Contractor may also be required to periodically brief the full Commission on their work.

Provisional Voting

4.4 Collect and analyze State legislation, administrative procedures, and court cases. An understanding of the disparities and similarities of how provisional
voting was implemented around the country will provide a baseline for the consideration of future approaches. Seventeen States never had provisional voting before HAVA was enacted, while many other States did. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

4.5 Recommend alternative approaches for future implementation of provisional voting. The Contractor shall conduct a literature review to identify other research results and data available on this topic. The EAC Election Day Survey, for example, contained several questions on provisional voting. The EAC will make these survey data available to the Contractor. Based on their analysis of available research and the results of Task 4.5, the Contractor shall diagnose the problems and challenges of provisional voting implementation and hypothesize alternative approaches.

The Contractor shall assess the efficacy of these alternatives in relation to the following inter-related policy objectives: (1) enabling the maximum number of eligible voters to cast ballots that will be counted; (2) providing procedural simplicity for voters, poll workers, and election officials; (3) minimizing opportunity for voter fraud; and (4) maintaining a reasonable workload for election officials and poll workers. Additional policy considerations may be identified in the course of this research effort. The Contractor shall document and brief these alternatives to the Commission.

4.6 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors. EAC will convene a Board of Advisors meeting or teleconference for the discussion of this document. The Contractor shall provide the document in advance and participate in the Board meeting to answer questions and record comments.

4.7 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC and the Board of Advisors and provide the draft guidance for publication in the Federal Register by the EAC.

4.8 Arrange one public hearing for receiving public comment on draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. No speakers will be required. EAC will handle publicity for the meeting.

4.9 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.
Voter Identification Requirements

4.10 Collect and analyze State legislation, administrative procedures, and court cases. It is assumed that the collection of information for analysis of voter identification requirements will be performed concurrently with the research for Task 4.5. An understanding of the disparities and similarities of how voter identification requirements were implemented around the country will provide a baseline for the consideration of future approaches. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

4.11 Convene a half day public hearing on the topic of voter identification requirements. The Contractor shall be responsible for all aspects of planning and conducting this hearing in consultation with the EAC. The Contractor shall identify three panels of three to four speakers each. The Contractor shall arrange for speaker attendance to include travel and per diem expenses. The EAC will provide publicity for the hearing. The Contractor shall prepare a document summarizing the proceedings and containing all testimony provided.

4.12 Recommend alternative approaches for future implementation of HAVA voter identification requirements. The Contractor shall conduct a literature review to identify other research results and data available on this topic. Based on their analysis of available research and the results of Task 5.11, the Contractor shall diagnose the problems and challenges of voter identification and hypothesize alternative approaches. The Contractor shall coordinate with the EAC to identify appropriate policy objectives by which to assess these alternatives. The Contractor shall document and brief these alternatives to the Commission.

4.13 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors. EAC will convene a Board meeting or teleconference for the discussion of this document. The Contractor shall provide the document in advance and participate in the Board meeting to answer questions and record comments.

4.14 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC and the Board of Advisors and provide the draft guidance for publication in the Federal Register by the EAC.

4.15 Arrange one public hearing for receiving public comment on the draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. No speakers will be required. EAC will handle publicity for the hearing.

4.16 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.
Contract Type. The contract type will be Time and Materials with a ceiling of

6.0 Place of performance. The principal place of performance will be the Contractor’s place of business. Meetings and occasional work efforts may be performed at the EAC offices.

7.0 Period of Performance. The period of performance is from date of award until October 28, 2005.

8.0 Schedule of Deliverables:
- Project plan – 10 days after contract award
- Progress reports – monthly
- Briefings – as required
- Analysis report on provisional voting - TBD
- Alternatives report on provisional voting – TBD
- Preliminary draft guidance on provisional voting – TBD
- Draft guidance on provisional voting for publication – 8/2005
- Public hearing on draft guidance – 30 days after publication
- Final guidance on provisional voting for EAC adoption – 9/2005
- Analysis report on voter identification requirements – TBD
- Public hearing on voter identification requirements – TBD
- Summary of voter identification requirements hearing - TBD
- Alternatives report on voter identification requirements - TBD
- Preliminary draft guidance on voter identification requirements - TBD
- Draft guidance on voter identification requirements for publication – 9/2005
- Public hearing on draft guidance – 30 days after publication
- Final guidance on voter identification requirements to EAC for adoption – 10/2005

REMAINING STANDARD CONTRACT TERMS TO BE PROVIDED.

The Century Foundation Assembles Working Group to Help States Improve Voting Process
3/23/2005
Release Type: Informational

FOR IMMEDIATE RELEASE

Group Will Make Recommendations that Balance Ballot Integrity with Voting Rights and Accessibility

March 23, 2005, New York City - In an effort to improve future elections, The Century Foundation has created a Post-2004 Working Group on Election Reform. This bipartisan group of prominent election law and voting reform experts will produce concrete policy options states can follow in order to improve the voting process.

The members of the working group are: Tova Wang, senior program officer and democracy fellow, The Century Foundation (executive director); Doug Chapin, director, Electionline.org; Norm Ornstein, resident scholar, American Enterprise Institute; Guy-Uriel E. Charles, associate professor of law, University of Minnesota Law School; Edward B. Foley, professor of law and director, Election Law@Moritz, Moritz College of Law, Ohio State University; Samuel Isacharoff, visiting professor at NYU School of Law and Harold R. Medina Professor in Procedural Jurisprudence, Columbia University School of Law; Martha Kropf, assistant professor of political science, University of Missouri, Kansas City; Roy Schotland, professor of law, Georgetown University Law Center; and Dan Tokaji, assistant professor of law and associate director, Election Law@Moritz, Moritz College of Law, Ohio State University. Download working group member bios (PDF).

The 2004 presidential election was the first big test of the 2002 Help America Vote Act (HAVA). Enacted in the wake of the deeply flawed 2000 election, the law was passed in an effort to both improve the voting process and to increase voter access. However, the results on Election Day were mixed at best. While there were improvements in the voting process in a number of jurisdictions, the ways in which many states carried out the law's mandates
produced a number of unintended consequences, resulting in allegations of fraud and voter disenfranchisement.

The working group's mission is to promote an election system that balances ballot integrity with voting rights and accessibility. The group will assess the key provisions of HAVA, analyze the ways in which they were implemented in 2004, and provide guidelines for how they ought to be implemented by the states in the future. In addition, the working group will analyze how states are preparing to comply with HAVA requirements that have implementation deadlines at the end of this year. They plan to provide the best policy options for states to meet these mandates in a report scheduled for release in late spring.

"While the goals of HAVA were generally positive, the law turned out to be deficient in many areas and implementation by the states was flawed," said Tova Wang, executive director of the working group. She noted that a variety of lawsuits have been filed throughout the country about the implementation of HAVA, and advocates and government officials continue to spar over interpretations of the law's requirements and flaws in the voting process. "The disputes almost universally revolve around one core principle: the competing values of ensuring ballot integrity while maintaining wide voting accessibility. We will take a very practical approach to solving the problems that HAVA may have inadvertently created and provide realistic approaches the states can take in order to fulfill the promise that HAVA originally intended," she added.

The Century Foundation has been at the forefront of efforts to reform the voting system since the issue achieved national prominence following the 2000 presidential contest. In 2001, the foundation cosponsored The National Commission on Election Reform, cochaired by former Presidents Gerald Ford and Jimmy Carter. The final report of that commission served as the model for important measures in the Help America Vote Act. Information on issues related to election reform is available at www.tcf.org.

PURCHASE ORDER TERMS AND CONDITIONS

552.223-70 FEDERAL, STATE, AND LOCAL TAXES (APR 1984)
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish a refund from any tax from which the Government is exempt and which was not included in the contract price.

552.210-79 PACKING LIST (DEC 1989)
(a)(4) An invoice shall be prepared and submitted to the designated billing office specified in the contract.

(b)(2) The due date for making invoice payments by the designated payment office shall be the later of the following two events:

(1) Prompt Payment clause 52.232-25 is incorporated in this contract by reference. The clause contains information on payment due date, invoice requirements, acceptance and interest penalties. Certain portions of the clause regarding payment due date, invoice requirements, and constructive acceptance have been extracted for your convenience. All days referred to in the extracts below are calendar days.

(a) Dispatch of packing list or other suitable shipping document shall accompany each shipment and shall indicate (1) Name and address of consignee; (2) Name of consignee; (3) Government order or requisition number; (4) Government bill of lading number covering the shipment if any; and (5) Description of the material shipped, including item number, quantity, number of containers, and package number if any.

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include (1) Cardholder name and telephone number and (2) the term "Credit Card".

52.232-1 PAYMENTS (APR 1984)
The Government shall pay the Contractor, upon the submission of proper invoices and vouchers, the prices stipulated in this contract for supplies delivered and accepted or services rendered and accepted, less any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries accepted by the Government if; (a) The amount due on the deliveries warrants it; or (b) The Contractor requests it and the amount due on the deliveries is at least $1,000 or 50 percent of the total contract price.

52.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)
(a) Discounts for prompt payment will not be considered in the evaluation of offers. However, any offered discount will be considered in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the date on which an electronic funds transfer was made.

52.252-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)
This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

- 52.203-1 Officials Not to Benefit (APR 84)
- 52.203-3 Gratuities (APR 84)
- 52.203-5 Covenant Against Contingent Fees (APR 84)
- 52.203-6 Restriction on Subcontractor Sales to the Government (JUL 85)
- 52.203-7 Anti-Kickback Procedures (OCT 88)
- 52.212-9 Variation in Quantity (APR 84)
- 52.222-3 Convict Labor (APR 84)
- 52.222-4 Affirmative Action for Handicapped Workers (APR 84)(Applies when amount exceeds $2,500.)
- 52.222-41 SERVICE CONTRACT ACT OF 1965, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)
- 52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1989)
- 52.222-43 and 52.222-42 apply to service contracts when the amount exceeds $2,500.

Applicable to orders for services:
- 52.203-1 Officials Not to Benefit (APR 84)
- 52.203-5 Covenant Against Contingent Fees (APR 84)
- 52.203-6 Restriction on Subcontractor Sales to the Government (JUL 85)
- 52.203-7 Anti-Kickback Procedures (OCT 88)
- 52.212-9 Variation in Quantity (APR 84)
- 52.222-3 Convict Labor (APR 84)
- 52.222-4 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84)(Applies when amount exceeds $10,000.)
- 52.222-41 SERVICE CONTRACT ACT OF 1965, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)
- 52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1989)
- 52.222-43 and 52.222-42 apply to service contracts when the amount exceeds $2,500.

Applicable to purchase orders for supplies or services:

- 52.203-1 Officials Not to Benefit (APR 84)
- 52.203-3 Gratuities (APR 84)
- 52.203-5 Covenant Against Contingent Fees (APR 84)
- 52.203-6 Restriction on Subcontractor Sales to the Government (JUL 85)
- 52.203-7 Anti-Kickback Procedures (OCT 88)
- 52.212-9 Variation in Quantity (APR 84)
- 52.222-3 Convict Labor (APR 84)
- 52.222-4 Affirmative Action for Handicapped Workers (APR 84)(Applies when amount exceeds $2,500.)
- 52.222-41 SERVICE CONTRACT ACT OF 1965, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)
- 52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1989)
- 52.222-43 and 52.222-42 apply to service contracts when the amount exceeds $2,500.

Applicable to orders for services:
- 52.203-1 Officials Not to Benefit (APR 84)
- 52.203-5 Covenant Against Contingent Fees (APR 84)
- 52.203-6 Restriction on Subcontractor Sales to the Government (JUL 85)
- 52.203-7 Anti-Kickback Procedures (OCT 88)
- 52.212-9 Variation in Quantity (APR 84)
- 52.222-3 Convict Labor (APR 84)
- 52.222-4 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84)(Applies when amount exceeds $10,000.)
- 52.222-41 SERVICE CONTRACT ACT OF 1965, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)
- 52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1989)
- 52.222-43 and 52.222-42 apply to service contracts when the amount exceeds $2,500.

Applicable to purchase orders for supplies or services:

- 52.203-1 Officials Not to Benefit (APR 84)
- 52.203-3 Gratuities (APR 84)
- 52.203-5 Covenant Against Contingent Fees (APR 84)
- 52.203-6 Restriction on Subcontractor Sales to the Government (JUL 85)
- 52.203-7 Anti-Kickback Procedures (OCT 88)
- 52.212-9 Variation in Quantity (APR 84)
- 52.222-3 Convict Labor (APR 84)
- 52.222-4 Affirmative Action for Handicapped Workers (APR 84)(Applies when amount exceeds $2,500.)
- 52.222-41 SERVICE CONTRACT ACT OF 1965, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)
- 52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1989)
- 52.222-43 and 52.222-42 apply to service contracts when the amount exceeds $2,500.
(i.e. state name, photo i.d., etc) and a maximum requirement (i.e., state name, photo i.d., etc.). It makes no sense to me how they could possibly arrive at a different percentage for these requirement levels.

- My third issue is the persistent use of the phrases "ballot access" and "ballot integrity" without some definition or some explanation of what those concepts are.

Commissioner Davidson also asked that I ask some questions related to the first bullet, above, specifically relating to the comparison of states without validation that the state's turn out for 2004 was "normal" for that state as opposed to an anomaly.

Last, Commissioner Davidson asked that you all coordinate your selected questions to avoid having two commissioners wanting to ask the same question.

Please let me know if you have any questions or concerns about these questions or if I can explain my reasoning behind the questions.

Juliet Thompson Hodgkins
General Counsel
United States Election Assistance Commission
1225 New York Ave., NW, Ste 1100
Washington, DC 20005
(202) 566-3100
Commissioners,

Commissioner Davidson asked that I forward to each of you the following questions that I drafted at her request last week. She also asked that I let you know that she is interested in asking questions 3, 5, and 7.

1. What is meant by “statistically significant”? Please explain in plain language when a result is considered statistically significant. Also, please provide an academic definition of that term. How did you calculate the mean and standard deviations from the mean?
2. What data was used to derive these research findings?
3. Did you attempt to find information or data related to elections prior to 2004 in states that have voter identification requirements?
4. What other variables other than voter identification were tested? Contested race? Historical voter turnout? Weather? Media attention to the area? Candidate activities/campaign?
5. What was the impact (positive or negative) of these other factors on voter turnout?
6. How did you control these variables/factors when measuring the impact of voter ID on voter turnout or on prospective voter turnout? For example, did you only apply the factor to like circumstances – similar historical turnout, same level of contention in the races of the ballot, etc.
7. Would the study and your conclusions have been more reliable if additional data had been analyzed? Data such as voter turn out in states that have had voter ID in past Federal elections?
8. What data did you use to identify voter turnout?
9. What data did you use to identify whether people or groups of people were more or less likely to vote when identification is required?
10. Why did you use census data as opposed to data on registered voters? Doesn’t census data also include information from people who are not registered voters and people who are not even eligible to be registered voters?

In addition to the questions above, I provided the following feedback to Commissioner Davidson concerning the draft report provided by Eagleton:

- I am troubled by the concept that Eagleton compared states as if they were equal. They assume that, all factors being equal, that the voter turn out in each state would be equal. I am not at all certain that this is the case. Further, there is no evidence that the statistician actually compared previous years’ turnout in the same state to determine whether 2004 was some sort of anomaly for that state (high or low). Long story short, I am very skeptical of the data that they used to draw conclusions. We should ask questions about what data they used, how they parsed it, why they used the data, what other data could have been used to provide better, more reliable results.
- My second concern is how they (statistically speaking) differentiate between a minimum requirement
Matt (and Amy) are working on a speech for the Chairman to deliver at the Vote Fraud conference in Utah at the end of the week. Matt has asked for the consultants' definition of vote fraud/voter intimidation and the draft recommendations. As neither have been through full Commission review, I would like to speak with one or both of you before I drop this information in any one Commissioner's lap. Matt is looking for this information today. FYI, attached are copies of the consultants' definition and the draft recommendations from the consultants and others from the working group. Also attached is a summary of concerns expressed by the working group. --- Peggy
Bryan:

An electronic copy of the status report is attached, as requested for the USA Today inquiry. The status report includes the attachment listing the Working Group members. I suggest that you check to ensure that I have protected the copy against any manipulation, and protect it yourself if I have not, before sending it out to anyone. --- Peggy
Jeannie

We suspect that someone from the Voting Fraud-Voter Intimidation Project Working Group has been talking to reporters, tipping them off about what we are finding in our preliminary study, and referring them to our consultants (although the information could have come from anyone on the EAC boards, too). Apparently, the U.S. News & World Report reporter who contacted me also contacted both consultants working on the project.

Based on my recommendation, Tova Wang and, possibly, Job Serebrov, who are on EAC personal services contracts for our voting fraud and voter intimidation research, will seek further clarification from you about what they can and cannot say to reporters and in public fora about vote fraud and voter intimidation and about EAC's research. I have previously advised Tova and Job not to discuss the work they are doing for us as this is EAC research, the Commissioners have not yet received and accepted the final report, and the Commission has not approved their speaking about the EAC research.

Tova plans to call you tomorrow (Tuesday, June 27) about the issue. In addition to the reporter’s inquiry, she has been invited to speak on the subject at the summer conference of the National Association of State Legislatures. She has plenty of knowledge of the subject in her own right (apart from our study), but is having trouble differentiating between her own work and the work she is doing for us. Please, just let me know what you advise her to do.

--- Peggy
Julie:

I received pieces of the draft final report on voting fraud-voter intimidation this morning. If it is OK with you, I'll hold it until all I have all of the pieces, so that you can review it as a whole document. --- Peggy
Karen,

I need info from you for question number 2.... Thanks.

----- Forwarded by Jeannie Layson/EAC/GOV on 03/13/2006 05:10 PM -----
"ROY SALTMAN"

Dear Ms. Layson:

I have two questions about the 2005 Annual Report that you gave me.

(1) Who are, currently, the nine members of the Executive Board of the Standards Board?

(2) On p. 27 of the 2005 Annual Report, it states that EAC contracted with two consultants to conduct preliminary research on the issues of voting fraud and voter intimidation. Can you tell me who these organizations or individuals are, and when their reports might be available? If they are available now, how can I obtain them?

Regards,
Roy Saltman
Sounds good. Would later this afternoon work for you? Right now I'm working on the management guidelines with Brian. Let me know, thank you!

Subject Fw: Tova Wang/Job Serebrov/Improving Election Data Collection Project--FY06 Budget

FYI-

On the budget figure for Improving Election Data Collection

Also, when you're ready let's go through more of the detail on your proposed agenda.

For example, I'd like for us to have some presentations (brief) on various subject areas, so that folks have a basis for their discussion and conclusions.

As we discussed, I think we also will want to have some breakout working groups which focus on particular issues/areas of concern.

Let me know when you're ready to pursue.

K

What Paul V said is NOT at all an accurate statement of what Tova said. I was there. This is very disappointing to read. I may call Mr. V myself.

I watched and heard what was said and by whom. I will be glad to brief you tomorrow morning.

Cc: Karen Lynn-Dyson
Subject: Call from Paul Vinovich

I took a telephone call this morning from Paul Vinovich. He had attempted to reach Gracia, but since she was not here, he asked Sheila if I was in the office so he spoke to me.

Paul was very upset with comments that Tova Wang had made at yesterday's AEI's meeting in which she basically indicated that voter fraud did not exist in the USA. He asked how a person who believes that voter fraud does not exist--or not seem at least willing to listen to both sides--can be hired by the EAC to do a study on voter fraud/voter intimidation. I explained to Paul (as I have now had to explain to many others) that Tova was "balanced" on the study with Job Severbrov. He did not know Job but was well-aware of Tova's positions and was concerned that her public comments indicate that she will not be fair in looking at this issue. I explained to Paul that we were monitoring the work of our consultants on this study and no report would be issued publicly without the support of at least three commissioners. I sent him some background information on Job. I think this study will need close monitoring.

Tom's response was that the letter looked fine. Setting aside NAS, I wanted to make certain that pilot projects on list sharing were a part of our thinking on this study, irrespective of who handles the project for us. You will notice that I did not mention NAS in my letter to Linda.

Tom---

I'll defer to you on this one since I'm not at all aware of how things have been left with NAS (what, if anything, has been said to Herb Lin) and what the timelines are for possibly working with him on the technology refresh project.

I have attached a draft proposed schedule of events for our discussion today. Please keep in mind that this is only a proposal but I thought that we needed somewhere to start from.

Regards,

"Job Serebrov"
Gaylin -

There are 3 files of reference materials for this RFP: the spreadsheet of vote definitions and two summaries of statutory provisions on recounts (which are not consistent in information provided, e.g., one provides statutory language without commentary - the other provides summarized commentary without statutory language). We need a brief paragraph to accompany each to explain what the Offeror can glean from it. For example, the spreadsheet on vote definitions has references in it such as "See pdf of Arkansas statutes in file.", "There is a pdf of the manual in the document folder", "See .doc in file." "I was not able to find copies of these manuals." So this is clearly an internal working draft, not really a final product. How would the Offeror use this in preparing their proposal? Similarly, the two disparate summaries of statutes on recounts - we need to explain that this is a preliminary collection of information and that the two files are different in terms of content. Again, how would the Offeror use this information in preparing their proposal? Also, the title that printed out on first file citing statutory language is not correct and needs to be changed. It currently reads "Voting System Certification by State as of April 22, 2005." There is no heading on the second file.

This is a voluminous amount of information. We need to think about whether it is needed for the preparation of proposals. I will be considering this point this evening when I review the SOW and proposal instructions. Would appreciate your thoughts on this tomorrow.

Karen and Nicole:

Please see suggested changes in the attached (highlighted as tracked changes). In some cases, I could only note that we should insert something to address a particular issue. I don't have specifics for the inserts because we have not had time to discuss or confirm exactly what should be added. --- Peggy

[voterfraud project consultants.2changes.doc]
You've probably seen this already, but I wanted to toss it your direction. It's an interesting report on the topic that Demos did last year. Might not be a bad starting point for ideas, etc.

Best,
Adam
Commissioner Hillman:

PFAW was not represented on the Working Group for the Voting Fraud-Voter Intimidation research project. Also, I have had no communications with the organization about the study. I did work with Jeannie and Gavin on a response to PFAW’s FOIA request for the study. Jeannie should have the final copy of that reply.

Peggy Sims
Election Research Specialist

I know that People For the American Way delivered petitions to EAC about release of the Fraud report but I need to know what other communications EAC has had with People For about the study.

Was it represented on the study’s working group? If so, by whom? Did they write to us and did we answer? Did anybody from there talk with anybody at EAC about the study and our work? Thanks.

Sent from my BlackBerry Wireless Handheld

Hi Karen,

I'm actually going on vacation next week. I'll do my best to be available by cell phone whichever day works better for everyone. Also, the 12th was the one day I mentioned might be difficult for me that week, but if it is the only possibility I will rearrange my schedule. Keep me posted.

Thanks for everything and hope you have a great weekend. Tova

All-

Although Tom Wilkey and I are still working to process each of your contracts on this project, we would like to tentatively schedule an in-person meeting on September 12, here in Washington.

In the meantime, I'd like to propose that we all have a short teleconference call next Wednesday or Thursday at 1:00 PM to begin to talk through the scope of this project and the respective roles and responsibilities each of you might take on.

Could you let me know your availability for a 45 minute call on August 31 or September 1 at 1:00?

Thanks

Karen:

I want to put in my two cents on Steve's replacement. I am concerned with the timing of all of this and whether we will have to start the process all over. As I see it you can replace Steve with another politically neutral or you could have Tova and I do the project and place one or more of those Steve suggested as replacements on a working group.

One comment on the working group. I do not necessarily agree with Tova's suggested list. I indicated to Tova that I would need to see a bio on each of those she listed, stressing electoral experience and an indication of whether the person agreed to be on the working group. Upon reflection and given the need to keep all of these groups politically balanced, I think that those working on the project (Tova, me, and anyone else) should each pick two or three people for the working group and submit those names to the Commission for vetting and approval.

What do you think about all of this?

Job
Karen:

I sent Nicole, in response to her question on this issue, the information that before taking the federal judicial clerkship I was charging $175 per hour but now would charge $200 per hour. However, I did some calculations for her and figured that this may not be the way to arrive at a compensation figure because at 15 hrs per week for 4 months=$48,000 and at 20 hrs per week for 4 months=$60,000. If Tova's figures are similar, it could exceed the budget.

Additionally, both Tova and I feel we needed our travel costs covered given fuel prices for plane travel or gas prices for car travel, not to mention hotels and food. Travel costs would also have to be estimated for any interviews that we do with and for bringing the working group to a central location.

Have you and Tom decided to replace Steve or just to have Tova and I do this?

I hope this helps.

Regards,

Job
I'm sure it won't surprise you to know that I would want to see an
independent analysis before coming to any conclusions. It often turns out
—as it did in Washington—as bad lists and administrative/poll worker
errors that cause the disparities. But I defer judgement.

Dear Hans:

I am writing in response to your email in which you took exception to our retaining Ms. Tova Wang as a part-time consultant to help EAC explore the issues of voter fraud and voter intimidation. I know that you have heard directly from Vice Chairman DeGregorio and Commissioner Martinez on the matter but I thought it important that I write back to make certain that everyone had the same information.

As you now know, Ms. Wang is only one consultant who is working with us on these issues. When EAC determined that we should explore our options on how to study the issues of voter fraud and voter intimidation, as required under HAVA Section 241 (b), we made a conscious decision to retain consultants who would work part-time for a defined and limited period of time to provide broad and diverse perspectives, across the political spectrum, from right to left and including the middle.

EAC conducted broad outreach to identify a strong pool of consultant candidates. We reached agreement to retain 3 highly qualified people -- Stephen Ansolabehere, Job Serebrov and Tova Wang -- to work with us as we try to determine the scope of any project we might do on these issues.

Unfortunately, Dr. Ansolabehere's teaching assignments unexpectedly precluded him from being able to work as a part-time consultant but he has expressed his desire and in fact has agreed to continue working with us in an unpaid capacity as we explore our options and frame the issues. In the meantime, Mr. Serebrov and Ms. Wang have agreed to provide the consultant services that we sought. We believe that all three individuals will bring great value, careful thought and important perspectives to our work on these issues.

I hope this clarifies this part of EAC's extensive research and study agenda. EAC engages thoughtful deliberation and undertakes careful consideration of all of its activities. We value inclusiveness and know that we are best served when we have broad and diverse perspectives to inform our work. I am happy to talk with you at any time that you might have questions or concerns about our work.

To: von Spakovsky, Hans (CRT)
Subject: Re: Research Grants
Importance: High

Hans,

I wish you would have shown us the decency to have spoken to someone at the EAC before you sent this e-mail. Had you done so, you might have discovered that Ms. Wang was paired with Job Serebrov, a conservative attorney who, like you, has served on a local election board (Washington, Co, AK -Fayetteville). He has also worked on voting issues and election law in his practice, including voter fraud. He was counsel to the Arkansas GOP on ballot integrity issues and was the ballot protection specialist for Mike Huckabee in his campaign for Lt. Governor. In addition, Job formed and ran "Arkansans for Fair Elections", a non-partisan group that looked to investigate and prevent voter fraud issues. He headed that group for 8 years. Job served the Republican Party of Arkansas as the Chairman of the Committee for the Revision of the State Constitution.

Thor Hearne called me last week to indicate that Job had called him to be on the working group that Job and Ms. Wang are putting together to look at the voter fraud/voter intimidation issues.

Job was recommended to the EAC for this work by Julie Thompson. His references included two US 8th Circuit judges appointed by GOP presidents: Morris Arnold and Lavenski Smith.

You may recall that the Advisory Board made it clear to the EAC that they thought the Voter Fraud/Voter Intimidation issues should be studied together. That's why Ms. Wang has been paired with Mr. Serebrov to do
this study.

Julie tells me that she had a wide-ranging discussion with you last week but you never brought this issue up. It's too bad, as it may have prevented you from sending an e-mail to so many people that contains only half the story.

Research Grants

Dear Commissioners:

On August 18 I sent you an email raising serious concerns over the awarding of a contract to the Moritz College of Law given its clearly demonstrated pre-existing opinions about provisional balloting and voter identification. Unfortunately, nothing was apparently done about this situation.

I have just learned that a similar situation has occurred. I understand that another research grant has been awarded to Tova Wang for research into "voter fraud and voter intimidation." Ms. Wang has an even more pronounced partisan and one-sided view of these issues than was present in the situation involving Moritz College. She has many posted opinions available on the Internet that make it clear that she will not be able to conduct research in an objective fashion on these issues. Just a few
examples illustrate this:

"It is truly shocking how, given all the problems in the voting system and continued disenfranchisement, the terms of the debate have shifted to that of so-called 'ballot integrity.' It is reminiscent of how conservatives have misappropriated the concept of patriotism and the American flag, and used the power of language and messaging to distort the discussion, by using terms such as 'partial birth abortion' or death tax.'"

"This stands in stark contrast to the entire tenor or the Carter-Baker report, which presumes that fraud committed by voters is the biggest problem confronting our election system. There is simply no strong evidence of this, and some of the remedies proposed will take us backwards in the fight to increase voter participation."

"...voters are individually disenfranchised by continued, often race based, voter intimidation and deceptive practices..."

Carter-Baker Report: Some Bad Fixes for the Wrong Problem, 9/19/2005

"The data is also mounting that identification requirements have disproportionately disenfranchising impacts on certain communities...Given all this piling on of negative evidence, both in terms of the efficacy of ID requirements in fulfilling the goal their advocate's claim and their impact on voting rights, it is somewhat mind boggling that so many state officials, as well as other groups working on this issue, are still vigorously pushing for greater expansion of what seems to be a rather useless yet dangerous tool. Shouldn't the burden of proof now shift to the advocates of more voter ID to demonstrate the value of their cause?"

Voter ID and Fraud: Prove It, 7/28/2005

There are numerous more examples of her partisan opinions and attacks and demonstrably false claims against Republicans and election officials in general, such as her baseless charge in another article that "partisan election officials and party leaders usurped the process and manipulated the new federal voting law in ways that disenfranchised voters." Election 2004: A Report Card, 1/1/2005. The idea that she will write an objective report on issues that she has already expressed such strong opinions on ("there is no evidence that such election fraud is a serious problem") is hard to accept. I find it surprising that the EAC would award her a research grant or expect that election officials around the country would accept as valid a report written by an individual who asserts that "[a]t every step of the way, election officials in key states threw up unnecessary barriers to voting." Id. This gratuitous remark is an insult to the many hard-working election officials that we all know through our work who did everything they could during the last election to improve the election process and in large part succeeded.

Whatever procedures the EAC has set up to screen individuals and entities applying for research grants is obviously not working. I have no doubt that I could today, based on reading Ms. Wang's prior opinions, predict exactly what her report will conclude on the issues of voter fraud and voter intimidation. This situation needs to be corrected so that research is not being conducted by partisan individuals with preset opinions and views on issues. As with my prior email, I strongly recommend that the EAC reconsider the awarding of this contract.
Karen:
Do we have any idea what this is about? I have had regular email contact with her during the last few days and don't know of any unresolved issues regarding my work with her. I do know that she and Job were not happy when our lawyers told them that they need to keep records of hours worked and include the total hours worked (not to exceed 20) on their monthly invoices. Job claimed that he and Tova had previously received assurances that they would not have to do what he refers to as "billing for hours worked". Could this be a fishing expedition? --- Peg

Subject: Invoices and Payments

Job and Tova;

The attorneys have advised me that each of you should amend your invoice to indicate the total hours worked (20) during the first month. You should submit a letter ASAP to Diana Scott with that clarification.

I have been told that it takes our agent, the General Services Administration (GSA), two to three weeks to process our requests for payment. I understand that using the electronic funds transfer (EFT) process will reduce the time for payment by up to five days, because it takes additional time for GSA to cut and mail a paper check.

Diana does not have a completed EFT form from either of you, which would permit the electronic transfer of the funds directly to your chosen bank account. I can find no evidence that Karen suggested you should submit the form, so I have attached a blank form below. Please complete it and return it with the invoice amendment to Diana. If you have any questions about how to fill out the EFT form, let me know. I'll do my best to help you out.

I understand that the contract matters are moving forward. I hope to have more news for you on Monday afternoon.

Hi again Peggy,

I just looked at the list, and I have to tell you that I'm a bit concerned. I know of ways to condense searching to encompass many of the terms in one session (example: vote% & fraud would bring up voter fraud, vote fraud, etc.). However, the list is still 9 pages long. I will do my best to start on it tomorrow, but it will take me more than a day to complete it given the other projects I have on my plate. I just want you to be aware that it will take me some time to complete the task given the current parameters.

Talk to you later.

Bert,

Attached is the text of the presentation that Tim Vercellotti and I will make to the EAC on Thursday, February 8. Thanks for your help in making arrangements for this meeting. Please let me know if you need anything else from us in advance of the meeting.

See you Thursday.

Tom O’Neill
Summarizing a report on
Best Practices to Improve Voter Identification Requirements
Pursuant to the
HELP AMERICA VOTE ACT OF 2002
Public Law 107-252
Submitted on June 28, 2006
by
The Eagleton Institute of Politics, Rutgers, The State University of New Jersey
The Moritz College of Law, The Ohio State University

Thomas M. O'Neill
Project Director
And
Tim Vercellotti
Assistant Research Professor
Assistant Director, Center for Public Interest Polling

Eagleton Institute of Politics
Rutgers, The State University of New Jersey
Introduction

Our report, submitted to the EAC last June, provided information on voter identification practices in the 2004 election. It made recommendations for best practices to evaluate future proposals for voter ID requirements. In particular, we recommended a concerted, systematic effort to collect and evaluate information on voter ID requirements and turnout from the states. This report was a companion to our report on Provisional Voting, submitted to the EAC in November 2005.

The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. Unfortunately, our colleagues from Moritz could not be with us today because of teaching obligations.

Our work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election.

Voter ID requirements are just one set of election rules that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen chooses whether to vote by comparing costs and benefits. The benefits of voting are fairly stable—and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit may be, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decreases.

We conducted our research before last year’s election, when the debate over voter ID requirements was sharp and polarized. We took seriously our charge from the EAC, which was not to enter the national debate, but rather to explore if an empirical study could suggest how we might estimate the effects of different voter ID requirements on turnout. That analysis, of course, would be a sensible first step to assess tradeoffs between ballot security and ballot access.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the net integrity of the ballot may not have been improved.

A key part of our work was a statistical analysis to examine how turnout may vary under different voter identification requirements. We used this statistical study to develop a model to illuminate the relationships between voter ID requirements and turnout. The model’s findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

Tim Vercellotti led that phase of our research and will describe his methods and conclusions.

Results of Statistical Analysis

Our research included an examination of variation in turnout based on voter ID requirements in the 50 states and the District of Columbia. We examined this question using aggregate data at
the county level gathered from the U.S. Census and other sources, and individual-level data from the November 2004 Current Population Survey.

Drawing from the research conducted by the Moritz College of Law, we were able to classify the states into one of five voter ID categories. Voters either had to:

1. state their name,
2. sign their name,
3. match their signatures to those already on file,
4. provide a non-photo ID,
5. provide a photo ID.

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus, it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity. The five categories for minimum requirements were:

1. stating one's name,
2. signing one's name,
3. matching one's signature to a signature on file,
4. providing a non-photo identification, or
5. swearing an affidavit.

Analysis of the aggregate data showed that the average turnout in states requiring photo identification as a maximum requirement was 58.1 percent compared to 64.2 percent in states that required voters to give their name as the maximum requirement. The differences were slightly smaller when we examined states in terms of their minimum requirements, with 60.1 percent of voters turning out in states that required an affidavit compared to 63 percent in states that required voters to give their name as the minimum requirement.

The analyses of aggregate data also included models that controlled for other factors that might influence turnout, such as whether a county was in a presidential battleground state, the length of time between the close of the registration period and Election Day, and the demographic composition of the county in terms of race and ethnicity, age, and household income. Controlling for those factors, the maximum requirements of providing a signature match or a non-photo identification showed a negative effect on voter turnout when compared to counties in states that only required voters to give their names. None of the voter identification requirements showed an effect on turnout, however, in the model that coded counties according to the states' minimum requirements.

Analyses of the individual-level data from the November 2004 Current Population Survey also indicated relationships between voter ID requirements and turnout. Controlling for contextual factors, such as whether a voter resided in a presidential battleground state, and demographic characteristics, such as a voter's gender, race, ethnicity, age, and education, the data showed that registered voters in states that require photo identification as a maximum requirement were 2.9 percent less likely to say they had voted compared to registered voters in states that required voters to state their names. Examining states within the context of minimum identification requirements showed that registered voters in states requiring affidavits were four...
percent less likely to say they had voted compared to registered voters in states that required individuals to give their names at the polling place.

Breaking down the Current Population Survey sample by race and ethnicity also revealed interesting patterns. Photo identification and affidavit requirements were negatively associated with whether white registered voters said they voted compared to their counterparts in states requiring registered voters to give their names. But African-American, Hispanic, and Asian-American registered voters in states that required photo identification as the maximum requirement or an affidavit as the minimum requirement were no less likely to say they had voted than their racial or ethnic counterparts in states that simply required voters to give their names.

The most consistent difference emerged in states that required non-photo identification as a maximum or a minimum requirement. In five of six statistical models, African-American, Hispanic, and Asian-American registered voters in non-photo identification states were less likely to say they had voted in November 2004 than their racial or ethnic counterparts in states that required voters to state their names as a maximum or minimum identification requirement.

That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements. This observation does not answer the question as to why photo identification requirements did not have a more uniform effect across groups in 2004. Of course, photo identification was a maximum requirement in only five states, and each of those states accepted another type of identification as a minimum requirement. But the finding that photo identification requirements were associated with a lower probability that white registered voters said they had voted, and the absence of a similar relationship within other racial and ethnic groups, runs counter to concerns expressed by some in the debate over voter ID. This finding points up the need for further research in this area, perhaps with a view to comparing turnout rates over time before and after a photo identification requirement takes effect, to further isolate potential relationships between photo ID requirements and turnout.

In examining the link between voter identification requirements and turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements.

Conclusions from the Research

The statistical analysis suggests that stricter voter ID requirements can be associated with lower turnout. It was not designed, however, to look at the other side of the balance equation: do tighter ID requirements reduce multiple voting or voting by ineligible voters? The scope of our research as defined by the EAC excluded assessing the dynamics and incidence of vote fraud.
We believe, however, that sound policy on voter ID should begin with an examination of the tradeoffs between ballot security and ballot access.

The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs. The EAC's recent study of election crimes found, for example, that there has never been a comprehensive, nationwide study of voting fraud and intimidation.

Without a better understanding of the incidence of vote fraud and its relationship to voter ID, for now, best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility. Election law should provide the clarity and certainty needed to forestall destabilizing challenges to election outcomes. Absent a sound, empirical basis for striking a wise balance between voter ID and ballot access, legal challenges may increase, not just to the process but to electoral outcomes.

The analysis of litigation conducted by the Moritz College of Law for our research suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting Social Security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents.

To strike that balance requires a more precise understanding of how voter ID requirements affect turnout. A first step in that direction would be to encourage or require states to collect and report additional data, including:

- The reasons potential voters are required to cast a provisional ballot and
- The reasons for rejecting provisional ballots.

Recommendations for consideration and action by the EAC

1. Encourage or sponsor further research to clarify the connection between voter ID requirements and the number of potential voters able to cast a ballot that is counted.

2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements. The analysis will help focus the attention of the public and policy-makers on the tradeoff between ballot access and ballot security. A "Voter Impact Statement," to be drafted and offered for public review and comment before the adoption of new identity requirements, would estimate the number and demographics of:

- Eligible, potential voters who may be kept from the polls or permitted to cast a provisional ballot by a stricter ID requirement; and
- Assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

The data collection and analysis recommended in this report would help make feasible an empirically-based assessment of the effects on voter participation of proposed identification requirements. That assessment could improve the quality of the debate on this polarizing topic.

3. Encourage or require the states to collect and report reliable, credible information on the relationship between ballot access and ballot security. A compilation by EAC of this information would provide a factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.

4. Encourage or require states to sponsor surveys of voters to be conducted by local election officials. Such surveys would determine why those who cast a provisional ballot were found ineligible to cast a regular ballot and illuminate the frequency with which ID issues divert voters into the provisional ballot line. The connection between Voter ID requirements and provisional ballots is, of course, close. Voters who lack required ID will likely vote provisionally, thus placing greater demands on a system that may be hard pressed to meet those demands. Asking voters what they know about ID requirements would also provide useful context for evaluating the effect of those requirements on electoral participation.2

5. Recommend as a best practice that state election officials conduct spot checks on how the identification process actually works at polling places. These spot checks could provide information on how closely actual practice tracks statutory or regulatory requirements.

6. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In 11 states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots, and the safe harbor provision in presidential elections.

A final thought

A voting system that requires voters to produce an ID may prevent the ineligible from voting. It may also prevent some eligible voters from casting a ballot. If the ID requirements block a few ineligible voters from the polls at the cost of preventing an equal or greater number of eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and what form that requirement should take) will weigh value judgments as well as available factual evidence. We did our work on the premise that increased understanding of the facts relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

2 Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it.
We hope that premise is realistic, and we also hope that this research has helped the
Commissioners and the interested public to clarify their thinking on this polarizing topic.

On behalf of the Eagleton – Moritz research team, we thank you for the opportunity to contribute
to the national debate.
Thanks my friend...she was my favorite and I was so proud of her...she struggled to get through Nursing School and had so many difficulties in her life.
I appreciate your support and your friendship...life hasn't been good to me lately so your friendship means even more.
Give Eagleton a hard time for me tomorrow
Thanks again
Tom

The Honorable John Linder
Chairman, Subcommittee on Rules and
Organization of the House
Committee on Rules
U.S. House of Representatives
Washington, D.C. 20515

Dear Mr. Chairman:

We have carefully reviewed the testimony presented to the Subcommittee on Rules and Organization of the House at its hearing on July 15, 1999; on "Cooperation, Comity, and Confrontation: Congressional Oversight of the Executive Branch." The Department of Justice appreciates the Subcommittee's interest in this area, and we would like to take this opportunity to present in this letter, for the benefit of both Members of Congress and the public at large, the approach we take to the issues raised at the hearing. As always, we are committed to cooperating with your Subcommittee, and all committees of Congress, with respect to the oversight process.

The testimony presented at the hearing suggests to us that there is a need for improved communication and sensitivity between the Executive and Legislative Branches regarding our respective institutional needs and interests. It also suggests that there is considerable misunderstanding about the principles that govern the Department's longstanding positions and practices on responding to congressional oversight requests. We hope that this discussion of those governing principles will be helpful to the Committee and foster an improved understanding of the Department's interests in responding to oversight requests.

General Approach

The oversight process is, of course, an important underpinning of the legislative process. Congressional committees need to gather information about how statutes are applied and funds are spent so that they can assess whether additional legislation is necessary either to rectify practical problems in current law or to address problems not covered by current law. By helping Congress be better informed when it makes legislative decisions, oversight promotes the accountability of government. The information that committees gather in this oversight capacity is also important for the Executive Branch in the future implementation of the law and its participation in the legislative process. We have found that the oversight process can shed
valuable light on Department operations and assist our leadership in addressing problems that might not otherwise have been clear.

President Reagan's November 4, 1982 Memorandum for the Heads of Executive Departments and Agencies on "Procedures Governing Responses to Congressional Requests for Information" sets forth the longstanding Executive Branch policy on cooperating with Congressional oversight:

The policy of this Administration is to comply with Congressional requests for information to the fullest extent consistent with the constitutional and statutory obligations of the Executive Branch... [E]xecutive privilege will be asserted only in the most compelling circumstances, and only after careful review demonstrates that assertion of the privilege is necessary. Historically, good faith negotiations between Congress and the Executive Branch have minimized the need for invoking executive privilege, and this tradition of accommodation should continue as the primary means of resolving conflicts between the Branches.

The D.C. Circuit Court of Appeals has recognized the obligations of Congress and the Executive Branch to seek to accommodate the legitimate needs of the other:

The framers... expected that where conflicts in scope of authority arose between the coordinate branches, a spirit of dynamic compromise would promote resolution of the dispute in the manner most likely to result in efficient and effective functioning of our governmental system. Under this view, the coordinate branches do not exist in an exclusively adversary relationship to one another when a conflict in authority arises. Rather, each branch should take cognizance of an implicit constitutional mandate to seek optimal accommodation through a realistic evaluation of the needs of the conflicting branches in the particular fact situation.

United States v. American Tel. & Tel. Co., 567 F.2d 121, 127 (D.C. Cir. 1977). Attorney General William French Smith captured the essence of the accommodation process in a 1981 opinion: "The accommodation required is not simply an exchange of concessions or a test of political strength. It is an obligation of each branch to make a principled effort to acknowledge, and if possible to meet, the legitimate needs of the other branch." Opinion of the Attorney General for the President, Assertion of Executive Privilege in Response to a Congressional Subpoena, 5 Op. O.L.C. 27, 31 (1981).

In implementing the longstanding policy of the Executive Branch to comply with Congressional requests for information to the fullest extent consistent with the constitutional and statutory obligations of the Executive Branch, the Department's goal in all cases is to satisfy legitimate legislative interests while protecting Executive Branch confidentiality interests. Examples of confidential information include national security information, materials that are
protected by law (such as grand jury information pursuant to Rule 6(e) of the Federal Rules of Criminal Procedure and taxpayer information pursuant to 26 U.S.C. § 6103); information the disclosure of which might compromise open criminal investigations or prosecutions or civil cases or constitute an unwarranted invasion of personal privacy; and predecisional deliberative communications (such as internal advice and preliminary positions and recommendations).

We believe that it must be the Department’s efforts to safeguard these important Executive Branch institutional interests that have led to the frustrations expressed during the Subcommittee’s hearing. We hope that we can reduce those frustrations in the future by setting forth here our perspective on some of the more important institutional interests that are implicated during the course of Congressional oversight.

Open Matters

Much of the testimony at the hearing addressed oversight of ongoing Department investigations and litigation. Although Congress has a clearly legitimate interest in determining how the Department enforces statutes, Congressional inquiries during the pendency of a matter pose an inherent threat to the integrity of the Department’s law enforcement and litigation functions. Such inquiries inescapably create the risk that the public and the courts will perceive undue political and Congressional influence over law enforcement and litigation decisions. Such inquiries also often seek records and other information that our responsibilities for these matters preclude us from disclosing. Consequently, we have sought whenever possible to provide information about closed, rather than open, matters. This enables Congress to analyze and evaluate how statutory programs are handled and the Department conducts its business, while avoiding the potential interference that inquiries into open matters entail.

The open matters concern is especially significant with respect to ongoing law enforcement investigations. The Department’s longstanding policy is to decline to provide Congressional committees with access to open law enforcement files. Almost 60 years ago, Attorney General Robert H. Jackson informed Congress that:

It is the position of the Department, restated now with the approval of and at the direction of the President, that all investigative reports are confidential documents of the executive department of the Government, to aid in the duty laid upon the President by the Constitution to “take care that the Laws be faithfully executed,” and that congressional or public access to them would not be in the public interest . . . .

The rationale for this policy is set forth in a published opinion of the Office of Legal Counsel issued by Charles J. Cooper, Assistant Attorney General for the Office of Legal Counsel.
during part of the Reagan Administration. See Response to Congressional Requests for Information Regarding Decisions made Under the Independent Counsel Act, 10 Op. O.L.C. 68, 76-77 (1986). Mr. Cooper noted that providing a Congressional committee with confidential information about active criminal investigations would place the Congress in a position to exert pressure or attempt to influence the prosecution of criminal cases. Id. at 76. Congress would become, "in a sense, a partner in the investigation," id., and could thereby attempt to second-guess tactical and strategic decisions, question witness interview schedules, debate conflicting internal recommendations, and generally attempt to influence the outcome of the criminal investigation. Such a practice would significantly damage law enforcement efforts and shake public and judicial confidence in the criminal justice system. Id. at 76-77.

Decisions about the course of an investigation must be made without reference to political considerations. As one Justice Department official noted 30 years ago, "the Executive cannot effectively investigate if Congress is, in a sense, a partner in the investigation. If a congressional committee is fully apprised of all details of an investigation as the investigation proceeds, there is a substantial danger that congressional pressures will influence the course of the investigation." Memorandum for Edward L. Morgan, Deputy Counsel to the President, from Thomas E. Kauper, Deputy Assistant Attorney General, Office of Legal Counsel, Re: Submission of Open CID Investigation Files 2 (Dec. 19, 1969).

In addition to the problem of Congressional pressure and the appearance of such pressure, the disclosure of documents from our open files could also provide a "road map" of the Department's ongoing investigations. The documents, or information that they contain, could come into the possession of the targets of the investigation through inadvertence or a deliberate act on the part of someone having access to them. The investigation would be seriously prejudiced by the revelation of the direction of the investigation, information about the evidence that the prosecutors have obtained, and assessments of the strengths and weaknesses of various aspects of the investigation. As Attorney General Jackson observed:

Disclosure of the [law enforcement] reports could not do otherwise than seriously prejudice law enforcement. Counsel for a defendant or a prospective defendant, could have no greater help than to know how much or how little information the Government has, and what witnesses or sources of information it can rely upon. This is exactly what these reports are intended to contain.

40 Op. Atty. Gen. at 46. The Department has similar interests in the confidentiality of internal documents relating to its representation of the United States in civil litigation. Our litigation files usually contain confidential correspondence with client agencies as well as the work product of our attorneys in suits that frequently seek millions of tax dollars. They also contain "road maps" of our litigation plans and preparations, as well as confidential reports from experts and consultants. Those plans could be seriously jeopardized and our positions in litigation compromised if we are obliged to disclose our internal deliberations including, but not limited to,
our assessments of the strengths and weaknesses of evidence or the law, before they are presented in court. That may result in an unfair advantage to those who seek public funds and deprive the taxpayers of confidential representation enjoyed by other litigants.

In addition, the reputations of individuals mentioned in internal law enforcement and litigation documents could be severely damaged by the public release of information about them, even though the case might ultimately not warrant prosecution or other legal action. The Department takes very seriously its responsibility to respect the privacy interests of individuals about whom information is developed during the law enforcement process or litigation.

**Internal Department Deliberations**

With respect to oversight on closed matters, the Department has a broad confidentiality interest in materials that reflect its internal deliberative process. In particular, we have sought to ensure that all law enforcement and litigation decisions are products of open, frank and independent assessments of the pertinent law and facts -- uninhibited by political and improper influences that may be present outside the Department. We have long been concerned about the chilling effect that would ripple throughout government if prosecutors, policy advisors at all levels and line attorneys believed that their honest opinion -- be it "good" or "bad" -- may be the topic of debate in Congressional hearings or floor debates. These include assessments of evidence and law, candid advice on strengths and weaknesses of legal arguments, and recommendations to take or not to take legal action against individuals and corporate entities.

The Department must seek to protect this give-and-take process so that the participants in the process can vigorously debate issues before them and remain able to provide decisionmakers with complete and honest counsel regarding the conduct of the Department’s business. If each participant’s contribution can be dissected by Congress in a public forum, then the free and candid flow of ideas and recommendations would certainly be jeopardized. The Supreme Court has recognized the legitimacy of this "chilling effect" concern: "Human experience teaches that those who expect public dissemination of their remarks may well temper candor with a concern for appearances and for their own interests to the detriment of the decisionmaking process." United States v. Nixon, 418 U.S. 683, 705 (1974). Our experience indicates that the Department can develop accommodations with Congressional committees that satisfy their needs for information that may be contained in deliberative material while at the same time protecting the Department’s interest in avoiding a chill on the candor of future deliberations.

The foregoing concerns apply with special force to Congressional requests for prosecution and declination memoranda and similar documents. These are extremely sensitive law enforcement materials. The Department’s attorneys are asked to render unbiased, professional judgments about the merits of potential criminal and civil law enforcement cases. If their deliberative documents were made subject to Congressional challenge and scrutiny, we would face a grave danger that they would be chilled from providing the candid and independent analysis essential to just and effective law enforcement or, just as troubling, that
they might err on the side of prosecution simply to avoid public second-guessing. This in turn would undermine public and judicial confidence in our law enforcement processes, untoward consequences we are confident that Congress, like the Department, wishes to avoid.

Privacy

In addition to these concerns, disclosure of declination memoranda would implicate significant individual privacy interests as well. Such documents discuss the possibility of bringing charges against individuals who are investigated but not prosecuted, and often contain unflattering personal information as well as assessments of witness credibility and legal positions. The disclosure of the contents of these documents could be devastating to the individuals they discuss. We try to accommodate Congressional needs for information about declinations whenever possible by making appropriate Department officials available to brief Committee Members and staff. This affords us an opportunity to answer their questions, which can be helpful because it can include the context and process that accompanied the decision. Hence, the discussion with staff may provide useful information and minimize the intrusion on individual privacy and the chill on our attorneys' preparation of future deliberative documents.

Line Attorneys

The Department also has a strong institutional interest in ensuring that appropriate supervisory personnel, rather than line attorneys and agents, answer Congressional questions about Department actions. This is based in part upon our view that supervisory personnel, not line employees, make the decisions that are the subjects of congressional review, and therefore they should be the ones to explain the decisions. More fundamentally, however, we need to ensure that our attorneys and agents can exercise the independent judgment essential to the integrity of law enforcement and litigation functions and to public confidence in those decisions. Senator Orrin Hatch has recognized the legitimacy of the Department’s practice in this area, observing that Congressional examination of line attorneys "could chill career Department of Justice lawyers in the exercise of their daily duties." See Letter to Attorney General Janet Reno from Senator Orrin Hatch, dated September 21, 1993. Representative Henry Hyde has likewise opposed Congressional interviews of line prosecutors. See Letter of Representative Hyde to Representative Carlos Moorhead, dated September 7, 1993. By questioning supervisors and ultimately the Department’s Senate-confirmed leadership, Congress can fulfill its oversight responsibilities without undermining the independence of line attorneys and agents.

* * *

In sum, the Department recognizes that the process of Congressional oversight is an important part of our system of government. We are committed to cooperating with oversight requests to the fullest extent consistent with our constitutional and statutory responsibilities.
We welcome your suggestions about how we should work together to accommodate the needs of our respective branches of government. Please do not hesitate to contact me if you would like to discuss these matters further. I intend at all times to work diligently with you toward satisfying the respective needs of our coordinate branches.

Sincerely,

Robert Raben
Assistant Attorney General

Ranking Minority Member
Tova and Job,

Thank you for your feedback. There are two factors that went into my decision to perform the search in the manner I indicated which may have a bearing on whether you want me to do each search individually.

First, I checked with the Lexis representative at my school, who suggested the search methodology I used. She indicated that I would get the same results if I did the searches separately or together.

Second, as I am in the midst of finals, as you can imagine, I have limited time to devote to work. I will only be in the office two days in the next two weeks and will not be able to do much work from home. As a result, I probably won't be able to do the majority of the searches until just after Christmas if I am to do the each term separately. If not, I should be able to get you results by the week before Christmas.

I will do whatever you and Peggy decide given your timelines, but wanted to let you know the factors that went into my decision.

Thank you,

Subject: Re: Search Results Example

Tamar:
You are not going to be able to place all of these word searches together. We need you to take each term on the list and do a search on it. You can only merge terms when it will not add other terms and therefore affect the outcome. For instance, vote and voter could probable be merged. I know this creates much much more work but it can't be helped. I would like you to pull the first 50 cases for each set of terms and send them to us with a short case summary (I know Westlaw lets you do a short case summary). From there we will have to read the cases and decide if we need any others in that search term.

Regards,
Job

Tova and Job,

It was good to talk to you today. Hope you are doing well. I've attached my African American search results below. It encompasses all of the terms you suggested having to do with African Americans.

The following is a search I used to truncate words and combine terms, but I still got a large number of results:

Vot! and deny and black or vot! and black and challenge or vot! and black and reject or vot! and black or vot! And deny and African w/s American or vot! And African w/s American and reject or challenge or vot! And African w/s American or election and black and deny or challenge or reject or election and black or election and African w/s American and deny or challenge or reject or election and African w/s American or ballot and security and black or ballot and security and African w/s American or black and vot! And suppress! Or African w/s American and vot! And suppress or African w/s and disenfranchis! or black and disenfranchis!

If this search yields useful cases for you, I can continue searching using the same strategy. If not, please provide me with additional guidelines and I will do my best!

Please feel free to contact me should you have any questions or need additional information.

Mr. Chairman,

Two more interview requests for tomorrow:

1. NPR's News and Notes would like to have you as a guest on their program tomorrow morning at 8 a.m. EST for five to eight minutes. Topic: Your thoughts on the states that are cracking down on voter fraud through voter ID laws, registration policies, etc. Also, they want your take on the Fed. Election Integrity Act, the bill sponsored by Hyde regarding voter ID which will be dropped this week. The interview would be taped, and it would run at 9 a.m. EST. News and Notes explores issues that impact the African American community. You will be interviewed by Farai Chideya (Fah-rah Chu-day-ah). Go here http://www.npr.org/templates/story/story.php?storyid=11 to read more about the program and the host. You are to call 310-815-4302 from a land line. Backup: Producer Devin Robbins at 310-815-4379.

2. Mary Ann McGee of Information Week is working on a story about voting system security. I talked to her about our efforts to help election officials focus on the entire process, not just the voting machine. I sent her the Quick Start guide. She's interested in hearing more about this from you. This is a good opportunity to get the message out that the real challenges we face in Nov. are having enough people and making sure they are properly trained. She wants to talk to you at 10:30 am EST. You are to call her at 508-697-0083.

Please let me know if you will be able to accommodate these reporters, and I'll take it from there. Thank you.

Huma asked if testimony will include updates on the progress/status of current voter info websites and overseas voting programs and if we will discuss voter ID requirements.

I said it may be that voter ID requirements are discussed simply in terms of the overall content of the voter information websites. I distinguished between the morning panels on voter information websites and the afternoon panel on military and overseas voting. She asked what EAC can or will do regarding military and overseas voting before the election. I said EAC will hear testimony about the status, best practices and issues associated with UOCAVA voters and share the information with the public and election officials so they are better informed to help meet the challenge. In particular, I said Scott Wiedmann would provide information on new approaches by FVAP. I said that EAC has been working with state and local officials and experts to fine-tune the UOCAVA survey instrument and that Thursday’s meeting comes two years to the day after EAC released the Best Practices UOCAVA report.

Jeannie Layson/EAC/GOV

Jeannie Layson/EAC/GOV

Send her the news release, embargoed. Read thru testimony and give her more details about what participants will say.

Subject: Request from Huma Zaid, NBC News

Huma Zaid, NBC News researcher asked "is there any information you can send me in advance pertaining to the discussions that are on the agenda? I'd like to include a brief preview of the event for MSNBC.com tomorrow morning." I pointed out the link to the agenda. If they approve the news release, I could send an embargo copy, right? Is it too much to send her any testimony or do we have to wait?
Commissioner Hillman has asked a follow-up question regarding the sharing of EAC's information, on the Eagleton study on Voter ID requirements, with Tom Hicks.

I have given Sheila the following appendices for possible distribution to Tom Hicks:

1. Summary of Voter ID Requirements by State
2. Court Decisions and Literature on Voter Identification and Related Issues
3. Annotated bibliography on Voter Identification Issues

I have not given Sheila, for distribution, these Appendices or parts of the report:

1. Analysis of Effects of Voter ID Requirements on Turnout
2. The Executive Summary and Recommendations
3. Summary of Research
4. State Statutes and Regulations Affecting Voter Identification (electronic version only)

**You'll also recall that I'm awaiting Tom's approval to send to Mike McDonald, various appendices from the Eagleton Provisional Voting report**

Thanks

Last week Tom Hicks was given all of the report appendices except the statistical analysis, and the Eagleton summary report. Takaji's blog contains everything except the Eagleton summary report.

So, as near as I can determine everything except the Eagleton report on "Best Practices to Improve Voter Identification Requirements" and, of course, our report on voter ID, is out there.

I can tell Alvarez that while EAC has yet to release a statement or its findings on Voter ID, the material contained in Tokaji's blog should be used.

Hi Mike-

Indeed, Eagleton has been sharing portions of the findings in various settings, and you may have noted it referenced on Dan Tokaji's blog.

I've asked our Communications Director, Jeannie Layson, to get you with a definitive answer to your
question.

Hope the conference is productive.

"Mike Alvarez"

Hi -- hope all is well.

I've got a quick question for you. Vercellotti and Anderson have put out for public distribution what looks to be their work from their EAC report on voter identification (http://www.eac.gov/)

Given that this piece of their research project is available, is the rest of their work available for public distribution yet (as you know the VTP is having a conference at the end of this week on voter identification and registration, it would be nice to have access to the EAC research at the conference, even at this late date).

Subject: Re: Response Requested - EAC voter ID report

Tom,

Regarding the FR notice, it can be short but it must be accurate and complete. We will also include this info in the newsletter on Thursday. Many people feel strongly about this issue and it may well generate news stories regardless of what we do. We must get it right at the beginning and be prepared to answer questions from the public and the media such as: How long have we had it? Why are we discussing it now? How much did it cost? What will EAC do with it or what exactly are the next steps? If this is a report with preliminary research findings together with recommendations for future study, then could EAC acknowledge the findings without accepting them but instead accept recommendations for future study?

Thomas R. Wilkey/EAC/GOV

Eagleton is submitting it's report as written. There will be a SHORT Executive Summary prepared by staff which will incorporate recommendations for future study which the Commissioners will be asked to adopt.

The report itself will be presented but not formally adopted but merely released and recommendations adopted.

THIS MESSAGE IS FOR ITS INTENDED RECIPIENT ONLY. IT IS A PRIVILEGED DOCUMENT AND SHALL NOT BE RELEASED TO A THIRD PARTY WITHOUT THE CONSENT OF THE SENDER.

Karen,

We need to publish an FR notice early tomorrow regarding the next public meeting. In light of the recent matter regarding voter fraud, I want to be sure to accurately describe what's happening with the voter ID report item contained in the draft agenda. Please add some perspective about what will and will not be discussed and what, if any, action might be expected. The draft agenda says the following: "Presentation of Eagleton ID Report - "Best Practices to Improve Voter Identification Requirements,"John Weingarten, Rutgers University (Time allotted 7-10 minutes; Q & A 5 min.)". What stage are we with this? (preliminary, final, NOTA, etc.) Just trying to stay ahead of the curve.

Thanks,
Bryan

Subject Next Steps on the voter ID report

Tom-

Just wanted to check in to determine what, if anything, I need to do in order to assist with the creation and delivery of EAC's report on the Voter ID study.

I assume that we will have to issue something on or about March 8.

K

Karen Lynn-Dyson
Research Director
U.S. Election Assistance Commission
1225 New York Avenue, NW Suite 1100
Washington, DC 20005
tel:202-566-3123
Just to note, at the Feb 8 meeting, the chair directed exec dir. to provide staff recommendations to commishes within thirty days, but of course we aren't having a March 8 meeting.

Hi Bryan --
Just want to talk to Davidson or another commish on the Eagleton research on voter ID -- their impressions, what they want to see happen on that issue, etc.

Richard Wolf
Washington correspondent
USA TODAY
1100 New York Avenue NW
Washington, D.C. 20005
Commissioners:

Today we had the following media inquiries:

(1) The chair was interviewed by Rich Wolfe of USA Today about the voter ID research. She said we discussed the initial findings about voter ID at a public meeting b/c this is such an important issue that impacts voters in every corner of this country. She noted that the new voter ID laws have been enacted in many states in just a few short years, and that the initial work done by Eagleton only covered one election cycle, and she believed we must study this issue over at least two like elections (presidential) to determine if these new laws have had any impact. The chair said based on the initial work conducted by Eagleton, I've instructed staff to present to the commission w/n 30 days a plan for moving forward to continue studying the impact of voter ID. We will immediately release this plan to the public. He then asked about some of the election reform bills in Congress, specifically the points brought up during Sen. Feinstein's hearing. The chair pointed out that we need to make sure timelines are realistic -- election officials need to have time to make sure new laws will work. Implementation doesn't happen overnight. She said we need to make sure we can actually accomplish initiatives within the timeframes prescribed. She said states are always aware that they must first meet certification requirements, conduct mock elections and train staff before introducing new equipment.

(2) Dick Smolka of Election Administration Reports asked if EAC's meeting with voting equipment vendors on Tuesday was in response the Board of Advisors Resolution that EAC collect certain information from them. Brian Hancock replied that this was not the topic of the meeting and that he had not yet been instructed to collect the information requested in the resolution.

(3) Cara Matthews of Gannett News in Albany called to ask the latest about the possible loss of HAVA 102 funds by New York. We said that we are continuing to review the responses from all the states in the order they were received.

####
Chris Drew of the NYT wants to talk to you about next steps regarding the voter ID research. He was at the meeting, but missed this segment b/c he had me cornered in the kitchen to discuss the Ciber issue. (This is the reporter who wrote the original story.) Please call him at 212-556-1356. He's writing the article b/c his editor saw the one in USA Today and thinks they should cover it, too. Please reply and let me know you got this. Talking points you used for Rich are below.

1. We discussed the initial findings about voter ID at a public meeting b/c this is such an important issue that impacts voters in every corner of this country.
2. New voter ID laws have been enacted in many states in just a few short years.
3. The initial work done by Eagleton only covered one election cycle, and I believe we must study this issue over at least two like elections (presidential) to determine if these new laws have had any impact.
4. Based on the initial work conducted by Eagleton, I've instructed staff to present to the commission w/n 30 days a plan for moving forward to continue studying the impact of voter ID. We will immediately release this plan to the public.
Mr. Galloway,
Per your inquiry, we have been working with the Eagleton Institute to study issues related to voter ID. We held a public meeting earlier this month in which we discussed this project to provide an update on progress being made. At the meeting, EAC commissioners asked the researchers questions about what they'd found so far, methodology, etc. At the conclusion of the questions, EAC Chair Donetta Davidson instructed EAC staff to take a look at Eagleton's recommendations for moving forward and within 30 days present the commissioners with suggestions for further research about voter ID laws. She noted that she thought it was important to study more than one election cycle, since some of these ID laws are so new. Go here to view the testimony Eagleton presented at the meeting, and go here to read the Eagleton paper, in which they referenced some of the data they had collected on our behalf.

For your information, EAC is an independent bipartisan commission created by HAVA. It is charged with developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting test laboratories, certifying voting systems and serving as a national clearinghouse and resource of information regarding election administration. The Commission is also responsible for auditing the use of HAVA funds.

Let me know if I can be of further assistance. 202-566-3103.

Phone: 202-566-3100
www.eac.gov
Commissioners:

Today we had the following media inquiries:

(1) Commissioner Hillman was interviewed by Charles Edwards of NPR in Atlanta about the Standards Bd. meeting. She explained the role of the board, talked about the agenda, including the visit to Kennesaw, and told him GA SOS Handel is on the board. She provided an overview of our voting system standards setting process and our programs to accredit labs and to test and certify systems. She also talked about the importance of gaining public confidence in the voting equipment they use, and talked about our responsibility to bring more accountability to the process.

(2) Jim Galloway of the Atlanta Journal Constitution wanted the report on voter ID. We explained that we had been working with the Eagleton Institute to study issues related to voter ID. We held a public meeting earlier this month in which we discussed this project to provide an update on progress being made. At the meeting, EAC commissioners asked the researchers questions about what they'd found so far, methodology, etc. At the conclusion of the questions, EAC Chair Donetta Davidson instructed EAC staff to take a look at Eagleton's recommendations for moving forward and w/n 30 days present the commissioners with suggestions for further research about voter ID laws. She noted that she thought it was important to study more than one election cycle, since some of these ID laws are so new. We sent him the Eagleton testimony. He requested info about the paper presented by Eagleton that referenced the statistics they collected for us, and we sent it to him.

(3) Josh Stager of Congressional Quarterly asked for the Eagleton report on voter ID. We referred him to the testimony on our website and explained that the presentation by Eagleton consisted of a briefing to EAC on their research. We said that the commissioners did not vote on or decide anything with regard to the research. We said that the chair asked the executive director to develop staff recommendations regarding the research to present to the commissioners within thirty days.

(4) Ken Vogel of Politico called Curtis and asked if the OIG had researched the qualifications of the two new commissioners. Curtis said no, that was part of the nomination process. The reporter asked if the OIG was looking into the Ciber issue, and Curtis said he could not comment on that.

###
Commissioners-

As requested, Jeannie Layson will take the attached statement and prepare a final version for Commissioner’s review and tally vote on Monday.

Subject Re: Next draft of the Voter ID statement

I am comfortable with the latest redraft. However, if there are any changes of substance, even a one word change can be substantive in this document, I will want to see a redraft before it is sent for tally vote.

The statement is well written but there remain some editing issues. Lack of commas, use of the words "which" versus "that." Typo - the word "this" when I think it is supposed to be "his." (I do not consider grammatical and spelling edits as substantive.)

Thanks,

Gracia M. Hillman

Commissioners:

Today we had the following media inquiries:

(1) Marie Cocco of the Washington Post Writers Group (syndicated columnists) called asking about our voter fraud report and the voter ID report. She wanted to know about reports that we had refused to release the voter fraud data. (This is prompted by accusations that refusals to aggressively pursue voter fraud was an issue in the recent firing of some federal prosecutors.) Regarding the voter ID project, we directed her to the testimony from the public meeting, and said that EAC Chair Donetta Davidson requested that staff review the initial research provided by Eagleton and produce a final report, which would include recommendations for further study on this subject. Currently, staff is working to finalize the voter ID report. Regarding the voter fraud and intimidation research, we said that at a May 2006 public meeting of our Standards Board and Board of Advisors, the EAC project manager for this research presented a staff update on the project, and we sent her the document and told her it was given to anyone who asked for it. We explained that the commissioners had adopted a final report, including four recommendations for further study, and sent it to her. We said that as a small agency of 23 employees, including the four commissioners, it is necessary for the agency to contract with consultants to gather the initial data for these projects. After EAC receives the initial data, the agency reviews the data for accuracy and then releases a final report.

(2) Chris Drew of the New York Times wanted to know the status of our voter fraud research, and we directed him to the report on the website.

(3) Steve Terrell of the Santa Fe New Mexican wanted to know what was going on with the NM audit. We checked with Curtis, then told him that our OIG was conducting an audit regarding the expenditure of HAVA funds, and that the audit was requested by the NM SOS.

###
This looks good to me, thank you Julie. Two things- did Eagleton approve the 2nd graph and I made a minor change to the 4th bullet as a point of clarification.

How about if we ask Eagleton for an estimate of the percent of costs they would attribute to the Voter ID portion of the study?

That way we can say the Voter ID study cost approximately X dollars. (And deductively, the Prov Vote study cost X dollars.)

Per your request kind sir, I think this is what you were looking for (Page 14. Also see pages 7,8 of the Eagleton paper.). Go here to view the full report: "The results presented here provide evidence that as voter identification requirements vary, voter turnout does as well. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but still statistically significant."

John, Based on the 6 article Layson sent and the others that I distributed over the weekend, I conclude this: We lost the battle, but won the war.

I am concerned about the news that Rush Holt’s election reform bill would make the EAC permanent. Perhaps we could arrange to talk to him during the 2 week House Easter break and make some suggestions about how the EAC should be restructured before it is made permanent. (Ray Martinez would, I believe, have much to contribute on that topic.)

Tom

I'm sure both of you have already seen the commentary, but just in case you haven't, here it is. Also, I'll let you know if I get any more inquiries about it. Thanks again.

Ms. Cox,
I will answer all of your questions, but per my phone message, I am not sure what you are asking in question #5. If you think that I was dishonest or misleading, I would be glad to answer direct questions about my character. Regardless, I will answer the question and all of the others.

Jeannie Layson

Thank you, Jeanne, for your assistance.

I did already had the Status Report from, I believe, May 2006, and the December report that you just sent me.

In my research for this article on voter ID for the Christian Century magazine, I’m trying to track the voter-fraud, voter ID connection. The two EAC reports, one by Wang and Serebrov and the other by Moritz College of Law and the Eagleton Institute, are both crucial to this discussion. (I am a freelance journalist and am writing on election reform for other outlets as well.)

I understand that the original Moritz/Eagleton report has now been released, though not adopted, by the commission, whereas the Wang/Serebrov report was never released in its original form.

My questions:
1) You said that the Wang/Serebrov report has not been released because it was predecisional. Was the Moritz/Eagleton report released because it was not predecisional?

2) I understood you to say that the December EAC report includes all of the Wang/Serebrov recommendations but not all of the Wang/Serebrov findings. Is that correct?

3) I understood you to say that EAC staff added results of their own research
to the December EAC report. Is that correct?

4) If I'm correct on questions 2 and 3, would it be accurate to say that readers of the December report cannot tell how much of that report does and does not reflect the original Wang/Serebrov findings?

5) I called earlier today requesting the Wang/Serebrov report, and you sent me the December EAC report. I am concerned that if I had not already been researching this closely, I would have thought that you'd sent me the Wang/Serebrov report and would have reported incorrectly that you had. Does the EAC have any comment on this manner of responding to press inquiries? (I contacted you to request the report after I read in the Statesman Journal of Salem, Oregon, an article by Marie Cocco that says: "The bipartisan commission didn't widely release the consultants' review, but makes it available on request." Did the EAC indeed give Ms. Cocco a copy of the "consultants' review"? Or has she misunderstood you in the way I'm concerned about?)

6) I understood you to say that the EAC did not release the Wang/Serebrov report in its original form because the EAC has to do due diligence and its staff is small. Do I understand you correctly? What form of due diligence does the EAC's staff routinely conduct on research that is contracted out to experts before that research is released? You mentioned "vetting" the research. What does that vetting entail?

Thank you for your time.

Meg Cox
Freelance journalist
Chicago
Laura,

The fraud and intimidation research contract was for $147,106, and the voter ID and provisional voting research contract was $560,002. Voter ID was only part of the contract. It also tasked Eagleton to provide information about provisional voting practices. In Oct. 2006, the Commission issued provisional voting best practices.

Please let me know if you need anything else, and I'll send you the statement as soon as it's ready to go.

www.eac.gov
Commissioners:

Today we had the following media inquiries:

(1) Commissioner Hillman was interviewed by Allison Keyes of NPR about the fraud report. Commissioner Hillman explained the scope of the contract and that we asked the contractors to do two things: define voter fraud and intimidation and provide recommendations for future study on these topics. The commissioner pointed out that we did not ask them for conclusions. The reporter asked if it was true that EAC was trying to suppress information about voter intimidation among minorities. The commissioner said she had worked all her life to prevent minorities from being intimidated at the polls, and that she was very anxious to embark upon a more expansive study on this very topic. The commissioner said the agency was transparent, and talked about our public meetings and the transcripts and testimony that were available to the public through our website.

NOTE: The interview will be aired repeatedly this evening on the five minute newscast at the top and bottom of the hour. To listen, tune into WAMU 88.5 FM American University Radio or Listen Live.

(2) Laura Strickler of CBS News wanted to know how much we spent on the fraud report and the voter ID report. We told her the fraud and intimidation research contract was for $147,106, and the voter ID and provisional voting research contract was $560,002. We explained that voter ID was only part of the contract. It also tasked Eagleton to provide information about provisional voting practices. In Oct. 2006, the Commission issued provisional voting best practices.

(3) Rich Wolfe of USA Today is working on a story on what states will have to do if Rush Holt’s bill is enacted. He asked for details on what states and vendors are currently facing in order to transition from the 2002 to the 2005 voting system guidelines which we provided. Brian Hancock also spoke with him on background about the testing and certification program. Mr. Wolf wanted to know more details regarding the differences in the VSS 2002 and the VVSG 2005. Brian explained that the most significant changes related to accessibility and usability. His real concern was what practical effect the VVSG would have on elections 2008. We noted that more than the VVSG, the changes brought about by the EAC implementation of our Testing and Certification Program might have just as big an impact. We noted that we would not be grandfathering any NASED systems, and that if State law required EAC certification, the manufacturers would need to bring their voting systems through the EAC program for full testing. We also explained the implementation date of December 2005 and that as of that date, no systems could apply for testing to the 2002 VSS. We also made sure that Mr. Wolf understood that the EAC program was voluntary and that participation in the EAC certification program would be driven ultimately by the statues, regulations or procedures in each of the States.

(4) Paul DeGregorio called to let us know he was interviewed by Adam Stichko of the St. Louis Post Dispatch about the fraud report. The reporter wanted to know if the reaction was a major setback for the agency. Paul said no, and that as EAC noted in its statement, it was going to improve its internal operations. He pointed out that sometimes EAC makes tough decisions that both sides of the aisle might not agree upon. But regardless, he said the agency has a responsibility to conduct due diligence, and make the tough decisions. He talked about what we have accomplished and the assistance we provide -- best practices, quick starts, VVSG and certification program.

(5) Meg Cox a freelance writer in Chicago asked what prompted EAC’s Statement Regarding Research &
Contracting Policies and whether something new happened in Congress to prompt the statement. We said that the statement contains the information.

(6) Ross Tuttle of Los Angeles was in town today and is working on a documentary series titled "The Freedom Files" which includes an episode on voting rights. He asked for EAC's statement in response to the NYT article on the release of the report. We sent him today's statement.

(7) Kat Zambon of electionline.org asked if other states have a similar partnership arrangement that the Secretary of State in Georgia has with Kennesaw State University to provide technical support for the state's voting machines, as well as outreach, education, ballot design, training and consultation. We said this is the only one that we are aware of.

(8) John Gideon of Voters Unite and Brad Blog had the following questions, and Jeannie's responses follow:

A. How does the EAC see their position as a "clearinghouse" of information as required by HAVA? We follow the mandates of HAVA regarding our responsibilities to conduct studies about election administration issues. The results of those studies make up the "clearinghouse." B. What responsibility does the EAC have with regard to warning states about what may be security vulnerabilities in specific voting systems? The EAC certification program will collect anomaly reports (go here to view the form), which we will then investigate and share with election officials and the public. C. Chairwoman Davidson has said that the EAC's middle name is "Assistance". How does ignoring potential security issues fit into that theme? As I mentioned above, monitoring anomalies is part of our certification program. As we've discussed before, the system you are referring to was not certified by EAC. If the manufacturer of this system wants an EAC certification for this system, it would have to successfully complete our certification process and adhere to all of its rules. EAC did not grandfather any systems already in use (meaning that we did not automatically issue certifications or transfer NASED qualifications to existing systems), including the one you referenced. Mr. Gideon replied that he was amazed that instead of answering the questions I conflated the certification of voting systems with a security vulnerability that is in existence across the country. He asserted this issue had nothing to do with the EAC certification program. I replied that the very fact that we have set up a system to track voting system anomalies is evidence that we think monitoring performance is very important. Again, as we have discussed many times, we did not certify this voting system. If it successfully completes EAC's certification program in the future, then it would be subject to our rules and conditions, and if a problem occurs we would notify the election community and the public.

###
I have executive director reports that I wrote in which he gives an update on all of the research we’re working on, including voter ID and voter fraud. In addition the commissioners have talked about the research we’re working on - including voter ID and voter fraud - in many different public settings, such as NASS, NASED, and Election Center. And we discussed these projects in depth in the 2005 and 2005 annual reports.

in doing a search on the EAC website, the first time there is a finding of the words "Eagleton" or "Rutgers" is the Feb 2007 meeting. I can't find where Tom discussed the project at one of our monthly public meetings.

On 4/17/07, jlayson@eac.gov <jlayson@eac.gov> wrote:

yes, you are correct. Eagleton focused on provisional voting.
Jeannie,

In looking at the May 2006 agenda of the Standards Board and Board of Advisors, I see the topic listed as Provisional vote study not Voter ID. Do you know if the documents given to the Board members (and public) included the Voter ID research? I want to be 100% accurate in my response. Thanks.

Paul

On 4/17/07, jlayson@eac.gov <jlayson@eac.gov > wrote:

Good morning! Per your questions, the Standards Bd. and the Board of Advisors received an update on the voter ID report at a public meeting in May 2006. Go here. EAC held a public meeting in Feb. 2007 which the consultants testified and the commissioners asked questions about the methodology. Go here. In addition, the executive director routinely provides an update on research projects underway at public meetings in his executive director report. Since we post transcripts of our public meetings, these updates are also available on our website.

Also, it certainly was not a five year study. Considering that commissioners weren’t appointed until Dec. 2003 and the first full year of EAC operations was 2004 with a budget of $1.2 million, that is not even possible. We’ve only been in existence for about four years.

Hi Jeannie,

The St. Louis Post-Dispatch has an editorial today that once again distorts and misreports the facts regarding the EAC voter ID and voter fraud reports. I believe the editorial should not go unanswered. Please review the attached letter to the editor and let me know what you think. There are some dates in my response that I need from you (when we discussed the voter ID report at our public meetings).

You can go here http://www.stltoday.com/stltoday/news/stories.nsf/editorialcommentary/story/6CB075FC49517AB2862572BF0081E1DB?OpenDocument (or read below) to see the editorial. Thanks.

Paul

Snipe hunting in Jeff City

Tuesday, Apr. 17 2007

The Missouri Legislature's dogged efforts to crack down on voter fraud call to mind the hallowed tradition of the snipe hunt.

In a snipe hunt, gullible kids are taken out to the woods, handed sticks and gunny sacks and told to track down the elusive snipe. Meanwhile, their pals, who know a snipe is a bird of marsh and shore generally found nowhere near the woods, yuck it up.

Voter fraud is about as rare as snipe in most parts of the country, including Missouri. As evidence of that we have the testimony of (a) a five-year study by the federal Election Assistance Commission; (b) a report from the Missouri Secretary of State showing nobody in the state tried to vote with a fake I.D. in 2006; (c) Department of Justice statistics showing only 86 people were convicted of voter fraud-related crimes in the last five years, many of them on trivial errors; and (d) a federal judge's ruling last week that the justice department had failed to demonstrate that voter fraud had occurred in Missouri.
last year.

Undaunted by these facts, Republicans in the Legislature lurk about like Elmer Fudd with their gunny sacks and sticks, promoting bills to require voters to present photo identification before they're allowed to cast a ballot. They passed such a bill last year, but the courts threw it out as unfair to those who couldn't afford the cost and hassle involved in getting a photo I.D. card.

This year's versions of the photo I.D. bills would allow voters without photo I.D. to cast "provisional ballots," which may or may not get counted. So, despite the fact that a photo I.D. requirement would disenfranchise many voters in the cause of solving a problem that doesn't exist, the Missouri House could pass such a bill this week.

Evidence continues to mount that the hunt master for the national voter I.D. snipe hunt is none other than Karl Rove, President George W. Bush's deputy chief of staff and political guru. As The New York Times suggested Sunday, "The more we learn about the White House purge of United States attorneys, the more a single thread runs through it: the Bush administration's campaign to transform the minor problem of voter fraud into a supposed national scourge."

Not only did the administration suggest that some of the eight fired prosecutors had been insufficiently aggressive in pursuing voter fraud cases, it changed the wording of the Election Assistance Commission's findings on the voter fraud issue. What originally read, "there is widespread but not unanimous agreement that there is little polling place fraud" became "there is a great deal of debate on the pervasiveness of fraud."

Moreover, the release of the commission's report was delayed for nine months, during which period eight states, including Missouri, dealt with voter I.D. laws. Since the 3 percent to 4 percent of the electorate who don't have photo I.D.s tend to be poor, disabled or elderly voters, suppressing their vote would tend to help Republican candidates.

Investigators looking for evidence of fraud need look no further than the e-mail messages emanating from Mr. Rove's offices. Alas, thousands, perhaps millions, of those messages are now "missing." Perhaps Attorney General Alberto Gonzales will shed some light on the problem when his testimony before the Senate Judiciary Committee is rescheduled. In the meantime, Missouri lawmakers should put down the sticks and gunny sacks and back slowly out of the woods before their constituents realize they've been snookered, too.

Eliza,

At the public meeting in February about the voter ID project, in which the consultants participated, Donetta instructed the executive director to provide recommendations on how to proceed with this project w/in 30 days. Here's her quote from the transcript: "And I'm going to request our executive director, within 30 days, to make a recommendation to the Commission on how we determine how to move forward and what the final outcome of this initial research will be, and we will notify everybody." Go here if you'd like to view the transcript.

The commission's decision to not adopt but to release all of the data was on March 30, which did occur after the March 7 hearing.

Thanks.

I do have one question. Congressman Hinchey told me in an interview that the EAC had posted its Voter ID report on its web site shortly after he requested it at a March 7 Appropriations subcommittee hearing. The Brennan Center also pegs the posting of the Voter ID report to March 30, after the hearing. Chairwoman Davidson stated, however, that the Voter ID report had been released prior to the hearing. Can you clear up whether the report was posted before or after the March 7 hearing when it was requested?

Thanks for all your help with this.

-- Eliza.

Commissioners,

(1) Leslie Clark of the Miami Herald plans to attend tomorrow's public meeting. Today she asked whether Florida is required to abide by EAC reply to their request. We said that EAC is the cognizant agency for most of the HAVA funding programs. We said that EAC therefore has the responsibility to advise and instruct states regarding the appropriate use of these funds consistent with the provisions of HAVA as well as circulars developed by OMB Circulars A-87 which governs the use of federal funds to purchase goods for state and local governments.

(2) Dana Burke, News Editor for the Citizen in Webster, TX is working on a story regarding voter identification requirements in Texas. She said Democrats opposed to the new legislation have referred to EAC's voter ID study and point to a correlation between more stringent voter id requirements and lower voter turnout, especially among minority groups. She noticed EAC's statement regarding a request for review, asked if the study is considered valid and whether the assessment by opponents of the legislation is correct. We sent her the following two links and replied that our Inspector General is currently reviewing the circumstances surrounding this research and that when that process is complete we'll be glad to discuss it further.

04/16/07 - EAC Requests Review of Voter ID, Vote Fraud & Voter Intimidation Research Projects

News Release: 3/30/07 - EAC to Launch Comprehensive Study of Voter ID Laws

Donetta Davidson, Chair
U.S. Election Assistance Commission
1225 New York Avenue, NW
Suite 1100
Washington, D.C. 20005

Dear Chair Davidson:

I am attaching a copy of a memo I am sending to Adam Abrogi, Counsel for
the Senate Committee on Rules and Administration, responding to his request for
information about the Eagleton Institute of Politics’ contract with the EAC. If you
or your staff notice any errors or significant omissions in my summary of our work
and coordination with you, please let me know. Also, please don’t hesitate to
contact us if there are any other ways in which we can help you to advance
informed public consideration of provisional voting, voter identification and the
other important issues within your purview.

Sincerely,

[Signature]

John Weingart
Associate Director

Cc:  Tom Wilkey, Executive Director
     U.S. EAC
In response to your April 10th request, I have pulled together some information about the Eagleton Institute of Politics’ contract with the U.S. Election Assistance Commission. Although I did not have a chance to do the thorough review, including comparing notes with all the members of our research team, that would be necessary to compile a full chronology of our work, I hope the following will be useful to you. I will be giving a copy of this memo to EAC Chair Donetta Davidson and Executive Director Tom Wilkey for any assistance it may offer them in responding to Senators Feinstein and Durbin’s April 12th letter.

By way of background, Rutgers University’s Eagleton Institute of Politics submitted a proposal to the EAC on March 25, 2005 to provide “research assistance to the Election Assistance Commission for the development of voluntary guidance on provisional voting and voter identification procedures.” The proposal was submitted after extensive discussions with EAC Commissioners and staff that had begun on Election Day, 2004 when Eagleton had received a phone call from the EAC’s then-Executive Director asking if the Institute would be interested in undertaking this work.

The proposal was prepared and submitted in partnership with the Moritz College of Law at Ohio State University. At the EAC’s request, we proposed to handle the two research topics in sequence, first submitting a report on Provisional Voting and then preparing and submitting the report on Voter Identification. In describing the Voter Identification portion of the study, the proposal stated:

“We propose to test the hypothesis that more stringent voter ID requirements depress voter participation in general or for the poor, minorities and older voters in particular.”

The proposal also included a plan to form a peer review group composed of scholars and practitioners in the areas of elections and voting to examine and comment on the research.

The following pages provide a preliminary summary of our major contacts with the EAC during the course of the contract, with a focus on our work on Voter Identification. More extensive review of our files, including the monthly progress reports we submitted to the EAC, may find other relevant discussions, but this list at a minimum should provide a good overview.
To: Adam Ambrogi, Counsel
May 25, 2005 - Contract awarded

May 26, 2005 - First meeting of Eagleton-Moritz team with EAC Commissioners and staff in Washington. After general discussion of EAC interest in both topics, Commissioner DiGregorio expresses concern that the composition of the project’s peer review group was politically unbalanced. Eagleton had proposed including the following five individuals: R. Michael Alvarez, Professor of Political Science at California Institute of Technology; Martha E. Kropf, Assistant Professor of Political Science at the University of Missouri-Kansas City; Daniel H. Lowenstein, Professor of Law at UCLA; Tim Storey, Program Principal at the National Conference of State Legislatures; and Peter G. Verniero, former New Jersey Attorney General and Supreme Court Justice and current Counsel to Sills, Cummins, Epstein and Gross.

Commissioner DiGregorio subsequently suggests other names for our consideration. We are impressed by the list of people he provides and add three of them to the Peer Review Group: John C. Harrison, Professor of Law at the University of Virginia; Timothy G. O'Rourke, Dean of the Fulton School of Liberal Arts at Salisbury University; and Bradley Smith, Professor of Law at Capital University Law School. The Project Peer Review Group then had eight participants.

July 28, 2005 - Brief EAC Commissioners at a public meeting at Cal Tech on progress on the research. Briefing includes this status report on the Voter ID phase of the work: "statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters will be complete in late August."

August 9, 2005 - First telephone conference with Peer Review Group. Focus is draft Provisional Voting report.

September 6, 2005 - Meet with the EAC in Washington. Brief the Commission on the status of the research on provisional voting.

September 21, 2005 - Second telephone meeting of Project Peer Review Group.

September 30, 2005 - Conference call with EAC Commissioner Martinez and three members of the staff. Commissioner Martinez indicates EAC is generally more comfortable playing the role of a national clearinghouse and therefore prefers to issue reports as “Best Practices” than as "Provisional Guidance." Staff says Eagleton emphasis should be on what states should do as opposed to suggesting how they would do it. Commissioner Martinez concludes meeting saying, “We have been very well served by all the work you and Moritz have done.”
Feb. 22, 2006 - Conference call with Project Peer Review Group members after they have reviewed first draft of Voter Identification report. The Peer Reviewers suggest the statistical analysis: (1) Look at whether voter identification requirements are related to voter registration rates, as well as turnout; (2) Describe in further detail the basis for the aggregate and individual-level data analyses; (3) Clarify whether the report is examining turnout among citizens eligible to vote, or all individuals of voting age; (4) Stress in a footnote that Hispanics in the individual-level analysis are Hispanics who describe themselves as citizens who are eligible to vote; (5) Discuss in the Appendix the reasons why turnout rates appear to be higher in the Current Population Survey data than in other sources of data; and (6) Use predicted probabilities as opposed to odds ratios to describe the relationship between voter identification requirements and turnout.

Eagleton subsequently revises draft of the statistical analysis to address all these issues.

March 28, 2006 - Conference call with EAC staff and Eagleton-Moritz research team in advance of team’s scheduled briefings of EAC Commissioners in Washington, D.C. on Provisional Voting and Voter Identification reports.

April 3, 2006 - Eagleton-Moritz morning meeting in Washington with EAC Commissioners Davidson and Hillman and staff members. Series of questions and responses on Voter ID methodology.

Commissioners ask whether respondents to the Current Population Survey might be non-citizens who said they were registered and voted. In a subsequent follow-up e-mail, Tim Vercellotti of Eagleton writes that the design of the CPS questionnaire skips non-citizens past questions about registration and voting. Commissioner Davidson asks if the team could examine the relationship between identification requirements and turnout over time. Team members respond that the information on state identification requirements for previous election cycles would require additional extensive research. Commissioner Hillman asks if the report could break out the relationship between voter identification and turnout for African-Americans with education levels of a high school diploma or less, or African-Americans below the poverty line.

Subsequent analyses examined these subgroups as suggested.

Eagleton-Moritz afternoon meeting with Commissioners DiGregorio and Martinez and EAC staff. Series of questions and answers. Commissioner DiGregorio concludes he is “disappointed” with the report. Commissioner Martinez says he “appreciates” it.

April 13, 2006 - Conference call between Eagleton and EAC staff. EAC requests that Eagleton convene a conference call of the Project Peer Review Group with EAC staff and/or Commissioners to discuss the statistical analysis of the effects of various Voter Identification requirements on turnout.

EAC staff also reports that the EAC is going to convene its own second peer review group to seek feedback on review by the Project Peer Review Group.
(April 13, 2006 continued)
EAC staff also reports that Eagleton is on the preliminary schedule to present Voter ID findings to the EAC's Advisory Board May meeting but that the date and location have not yet been set. EAC staff say they are "unsure where Voter ID project is going. We're going to have to see. We saw lines really drawn politically over Voter ID piece. We'll have to see what statements the agency chooses to make over this topic. It is the topic - It has nothing to do with you. The timing is such that Voter ID is a hot topic."

April 28, 2006 -Eagleton informs EAC by email of its understanding of status of Voter ID project: "We presented our Voter ID research to the commissioners in April and are now revising it in line with their comments; that revised research paper will be discussed in mid-May by reviewers selected by the Commission. That date was set specifically to allow us to prepare a final report that would be ready for review by the Advisory Board on May 24; ...The appropriate conclusion for our work is a presentation of findings and recommendations for both Provisional Voting and Voter ID, 2 closely related topics, to the Commission at its public meeting in late June..."

May 1, 2006 - EAC Informs Eagleton that it is on the schedule to brief EAC Advisory Boards on both Provisional Voting and Voter ID on May 23 and 24, but asks that we plan on making four separate presentations to the boards over the two days.

May 11, 2006 - Conference call on Voter Identification draft with some of original Project Peer Review group, second group of peer reviewers assembled by EAC, and EAC staff. Second group includes the three individuals noted in entry above for May 26, 2005.

One of new reviewers says that using a five-category ordinal variable in the statistical models to characterize the five types of voter identification requirements might rest on unrealistic assumptions. He recommends using five dichotomous variables, also known as dummy variables, for the requirements instead. He also recommends using predicted probabilities to assess the relationship between identification requirements and turnout in the individual-level data. Two of the original Project Peer Review Group recommend including analyses using the ordinal-level variables in the appendix for comparative purposes.

Subsequent drafts incorporate all these suggestions.

Two of new reviewers also recommend that the models assume age has a curvilinear effect on turnout, with turnout rising, then falling, as voters age. They recommend using both age and age-squared in the models, or age broken down into dummy variables.

Subsequent drafts use a series of dummy variables to capture the curvilinear relationship between age and turnout.
(May 11, 2006 continued)
One of original peer reviewers recommends further explanation clarifying that the turnout rates for the states using aggregate data make clear the rates for each state reflect an average of the turnout across the counties in the state. Same reviewer also recommends expanding the discussion of maximum and minimum requirements to add more detail about the distinctions between the two types of requirements.

Subsequent drafts of the statistical analysis incorporate all these changes.

One of new reviewers expresses concern about the omission of two important contextual predictors of turnout - the number of days between the close of registration and Election Day, and a measure of which states have Election Day registration.

Subsequent analyses examine the effects of these variables on aggregate turnout.

New reviewer also recommends breaking out Asian-American voters when looking at the relationship between voter identification and turnout.

Subsequent drafts incorporate this suggestion by including Asian-Americans in the individual-level analyses.

May 23-24, 2006 - Research team briefs EAC Standards Board and EAC Board of Advisers in Washington, D.C. regarding the Provisional Voting report. The Voter Identification report, originally on the agenda, is dropped before the meeting.

June 6 (?), 2006 - Letter from Project Director Tom O'Neill to Commissioner Paul DiGregorio responding to the Commission's hesitancy to publish best practices recommendation on Provisional Voting and questions on how to handle research on Voter ID. Excerpt from letter: "We hope the commission will use the reports, as intended from the outset of this project, as the basis for recommendations for better, if not best, practices to the states. If the Commission cannot decide to issue such recommendations to the states, we hope it will release the reports to provide the states and the broader elections community with this information, analysis and perspective on the issues. We recognize, based on the reactions at the Standards Board and, particularly, the Board of Advisors, that some of the findings, conclusions, and recommendations of the reports will be controversial with some of the Commission's constituencies. But we also believe, based on the comments of the Peer Review Group, the advisors assembled by the Commission, and our response to their critiques, that the reports are grounded in solid research by a well-qualified, nonpartisan team and that the reports will provide new information for the policy process. We believe this information will contribute to achieving the EAC mission of providing helpful information that the states may or may not choose to implement. ...We believe our reports will prove useful to the states as they complete preparations for the 2006 elections."
June 15, 2006 – EAC Executive Director writes to Eagleton saying "...The EAC Commissioners have reviewed and considered next steps with the voter identification draft report which Eagleton has prepared. While the final disposition of the results and findings of this study, on the part of the EAC, are still unclear, the Commissioners have asked that the final draft report of this study also be prepared and submitted to the EAC not later than June 30, 2006.

June 29, 2006 - Eagleton-Moritz submits to the EAC its final reports on Provisional Voting and on Voter Identification referring to Voter ID paper as "final draft" at EAC request. First of five major recommendations on Voter ID from Eagleton-Moritz is:

The EAC should "encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted."

August 16, 2006 – Eagleton writes to request that the EAC make "the two reports available for use by researchers, legislators, election officials and others interested in these topics." Letter notes: "That the EAC originally commissioned these studies to offer lessons for the 2006 elections based on experience in 2004 further supports the importance of quick action."

August 31, 2006 - EAC Executive Director responds: "You may not release the draft report [on Voter ID]...as this report has not been finalized and has not been officially released by the EAC."

February 8, 2007 - Eagleton presents voter identification findings to public meeting of the EAC in Washington. Transcript of the public meeting is available on the EAC web site.

October 17, 2006 – EAC Executive Director responds to request from Brennan Center for Justice at NYU Law School sending "draft report on provisional voting, prepared by the Eagleton Institute of Politics and the Moritz College of Law." Letter notes, "EAC personnel are in the process of drafting a report about voter Identification. The report will be made available upon completion."

October 27, 2006 – Eagleton writes to EAC Executive Director saying, "We are...disappointed that you are not ready to do the same [release] our report on Voter Identification. We would appreciate knowing approximately when you expect to complete the review and consideration of advisory board concerns you mention to Ms. Welser" [of the Brennan Center]

March 30, 2007 - EAC posts Voter Identification paper on its web site and issues statement concluding of the report that "The Commission and our contractor agree that the research conducted for EAC raises more questions than provides answers."

Craig C. Donsanto  
Election Crimes Branch  
U.S. Department of Justice  
Bond Building  
1400 New York Avenue, NW, 12th Floor  
Washington, DC 20005

Dear Mr. Donsanto:

The U.S. Election Assistance Commission (EAC) has undertaken a short term project to research voting fraud and voter intimidation. As an expert in the prosecution of election crimes, your expertise and unique experience would be a valuable resource as we move forward. I am writing to ask if you will be available to advise and inform our efforts.

As you know, EAC is a federal agency established in accordance with section 201 of the Help America Vote Act of 2002 (HAVA), Public Law 107-252. HAVA requires EAC to conduct research regarding election administration issues. The election administration issues itemized in the statute include:

- Collecting nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for federal office [section 241(b)(6)]
- Identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)]

The EAC Board of Advisors, established in accordance with HAVA section 211, recommended that EAC place a high priority on these topics when initiating our research projects. Subsequently, EAC obtained the services of two consultants (Tova Wang and Job Serebrov) to:

- **Define Voting Fraud and Voter Intimidation** - develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of federal elections;
- **Research Available Resources** - perform background research (including federal and state administrative and case law review), identify
current activities of key government agencies, and civic and advocacy organizations regarding these topics, and summarize this research and all source documentation;

- **Establish a Project Working Group** - in consultation with EAC, establish a working group composed of key individuals and representatives of organizations knowledgeable about voting fraud and voter intimidation, provide a description of what constitutes voting fraud and voter intimidation and the results of the background research to the group, and convene the group to discuss potential avenues for future EAC research on this topic;

- **Produce a Report** - Provide a report to EAC summarizing the preliminary research and working group deliberations, including recommendations for future EAC research, if any;

- **Assist EAC in Initiating Future Research** - if EAC decides to pursue one or more recommendations for future research, draft the project scope and statement of work for the request for proposals.

The EAC manager for this project is Peggy Sims. It would be most helpful if you could offer your expertise to Ms. Sims and our team of consultants. Ms. Sims will contact you to follow up on this request. If you are able to assist us, she will set up an initial interview, which will focus on the identification and prosecution of offenses involving voting fraud and voter intimidation, as well as possible resources on these subjects for our consultants' review. Our consultants and project manager may have follow up questions as the research proceeds. It also would be helpful if you would be able to attend the working group meeting to contribute to its discussion. This meeting will likely be held in February 2006.

If you have any questions about the research or this request, please contact Peggy Sims by email at psims@eac.gov or by phone at 202-566-3120.

Thank you so much for your consideration of this request.

Sincerely yours,

[Signature]

Gricia Hillman
Chair
December 1, 2005

The Honorable Garcia Hillman
Chair
United States Election Assistance Commission
1225 New York Avenue, N.W.
Washington, DC  20005

Dear Madam Chair:

    I am in receipt of your letter of November 23, 2005 requesting my assistance in the development of a statutorily mandated report on voter fraud and intimidation that the Commission is currently undertaking.

    I would be pleased, indeed honored, to assist you and the Commission in this matter and invite Ms. Sims of your staff to contact me at her convenience to discuss this matter further with me.

Sincerely,

Craig C. Donsanto
Director, Election Crimes Branch
Public Integrity Section
