

## **Ann Griffiths Testimony**

CIBER is pleased to present this testimony for accreditation consideration to the Election Assistance Commission for acceptance on this seventh day of October two thousand and eight. The testimony expresses CIBERS' perception of the historical paths taken to prepare us for the NVLAP accreditation. CIBER has a rich history of growth and has developed the strong commitment to act upon the requirements of the EAC direction for testing voting systems.

CIBER will outline the steps that it has taken to not only achieve accreditation, but to show this body the level of commitment we have as an organization to maintaining and growing a best-in-class certified testing facility.

CIBER is an invested partner in the effort to improve the voting experience and in being part of an organization of partners that can be relied on to ensure that our rights, as Americans, to vote are protected.
