According to the Paperwork Reduction Act, as amended, no persons are required to respond to a collection of information unless it displays a valid OMB Control Number. The valid OMB control number for this information collection is 4040-0014. Public reporting burden for this collection of information is estimated to average 1 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: US Department of Health & Human Services, OS/OCIO/PRA, 200 Independence Ave, SW, Suite 336-E, Washington DC 20201. 2021-2022 EAC Progress Report

3. EAC Progress Report

1. State or Territory:

Colorado

2. Grant Number:

3. Report:

Annual (Oct 1 - Sept 30)

4. Grant:

Election Security

5. Reporting Period Start Date

10/01/2020

6. Reporting Period End Date

09/30/2021

4. Progress and Narrative

7. Describe in detail what happened during this reporting period and explain how you implemented the approved grant activities in accordance with your State Plan/Program Narrative. (*Note: Your activities should align with your Grant Cost Categories Table.*)

During the FFY 2021 reporting period, we spent grant funds in accordance to our approved state plan and the HAVA act. The following is a summary of the activities for which funds were expended in this reporting period .

Sub-Grants

Sub-Grants for the Purchase and Installation of Drop-boxes and Associated Materials

During the reporting period, the Department expended \$176,370.03 in Election Security Grants funds to aid counties in purchasing and installing 24-hour secure ballot drop boxes . In calendar year 2016, Colorado began issuing grants to counties around the state for the purchase and installation of ballot drop boxes. This grant process continued and was expanded in 2021, following legislation that increased the number of required 24-hour ballot drop boxes. Counties could ask for reimbursement for the cost of the purchase, delivery and installation of the drop-box, along with the cost for the purchase, delivery, and installation of equipment needed to keep the box secure, including camera equipment.

These grant funds were used to improve the administration of elections for Federal office in Colorado. In 2013, Colorado began mailing all active voters in the state a ballot. To improve both the speed and safety of returning those ballots, Colorado counties began to place ballot drop-boxes around their communities for voters to use. This grant program encouraged counties either to increase their use of drop boxes or to begin using these valuable tools. Usage of the drop boxes by voters has continued to increase, and the majority of voters now use it to return their ballots around the state.

Voting Equipment and Processes

Ballot Tracking

During the reporting period, the Department expended \$70,000.00 of Security Grant funds for the development of a user interface to allow voters to monitor the status of their ballots. This service works to counter foreign disinformation intended to decrease Americans' electoral process by reassuring Coloradans of the security of their individual cast ballots. In its first statewide implementation, statewide ballot tracking was popular with counties and voters. Slightly more than half (52.8 percent) of all Coloradans who cast a ballot in the 2020 General Election used the service. We have heard anecdotally that voters' confidence in the election system was boosted by the ability to receive confirmation that their ballot was accepted and counted.

Voter Registration System

Payments to the Colorado Department of Public Health and Environment

During the reporting period, the Department expended \$2,340.00 in Election Security Grant funds for data on deceased Colorado Residents from the Colorado Department of Public Health and Environment (CDPHE). These funds were spent ensuring the statewide voter registration database is accurate and up-to-date.

SCORE Development

During the reporting period, the Department expended \$255,754.28 of Election Security Grant and \$77,451.80 in Section 251 Grant funds for contractor development services to make enhancements and improvements to the state's centralized voter registration and election management system, known as SCORE. Some specific improvements to which this expenditure was devoted include updating the scanning process and batch management process, improving the task queuing process to make registration and list maintenance more efficient and improve auditability. The Department also expended \$167,131.76 in Election Security Grant Match funds on the purchase of hardware to support SCORE.

Cyber Security

Global Mobile

During the reporting period, the Department expended \$58,560.00 of Election Security Grant funds for the 2020 General Election to improve accessibility for voter's who needed to cure a discrepant signature or provide identification by using their phone . Individuals were able to accomplish this by taking a picture of their signature along with a copy of their ID to cure the discrepancy so their ballot could be counted. During the reporting period, the Department also added functionality to the system to allow a voter whose registration record was missing a signature the ability to sign the registration affidavit electronically.

Staffing

Rapid Response Election Security Cyber Unit (RESCU)

During the reporting period, the Department expended \$270,499.97 in Election Security Grant funds and \$66,778.36 in Election Security Grant Match funds to staff the RESCU unit, which is a highly-trained team of election security experts who help protect Colorado's elections from foreign interference, and disinformation campaigns. The team works closely with the Department's information security team to protect against cybersecurity threats and with counties to provide resources and assistance to increase their security awareness and preparedness.

Voter Education/Communication

Mis-Information/Dis-Information

During the reporting period, the Department expended \$253,700.00 in Election Security Grant and \$20,000.00 in Election Security Grant Match funds to prevent the spread of foreign mis/dis-information. The Department monitored for foreign mis/dis-information and countered it by promoting accurate election information in a trusted voice/trusted source campaign. The Department also recruited community leaders to amplify trusted source information across their networks, leveraging their trusted voice.

Other

Archiving Historical Federal Election Data

During the reporting period, the Department expended \$60,265.00 in Election Security Grant funds to upload, archive, and create a searchable database of Colorado's federal election data, dating back to 1902. The system is a public-facing web interface that allows a person to search historical election results and reference the source documents.

8. Describe any significant changes to your program during the project, including changes to your original State Plan/Program Narrative or favorable developments that improved program efficiency and/or service delivery.

N/A

9. Issues Encountered:

Describe all major issues that arose during the implementation of the project and the reasons why established goals were not met, if applicable. Address each issue separately and describe whether and how the issues were resolved. Also, briefly discuss the implications of any unresolved issues or concerns.

N/A

10. Provide a description of any training conducted, including security training.

N/A

11. Subgrants:

Did your office provide subawards to local jurisdictions during this reporting period?

Yes

12. Describe the activities carried out by your subgrantees during the reporting period.
