SEC is still working on catching up on time with all the technological innovation and improvement plans under the HAVA Election Security grant.

Describe all major issues that arose during the implementation of the project and the reasons why established goals were not met, if applicable. Address each issue separately and describe whether and how the issues were resolved. Also, briefly discuss the implications of any unresolved issues or concerns.

As referred in the past year report, besides the global pandemic, Puerto Rico's Government established the Electoral Code Act for 2020, or "Ley Electoral 2020", with the principal goal of providing the right to vote, the electoral enrollment, to perform

updates for the electoral registration and among other electoral transactions without the need of going physically at a polling center or to a Permanent Board Unit (Jip).

This new electoral code will bring a new implementation design and massive education about the new electoral technologic systems that will provide greater ease and direct accessibility to voting at the stipulated dates by the Electoral Code. That is why SEC revised the HAVA Election projects submitted on July 12, 2021, to EAC to adequate the actual Election Security State Plan, achieving and merging the improvement in technology purposes meeting the federal and state requirements.

Besides the reference scenario, no other issues or aspects were met that make us unable to reach the established goals.
