

From the Vendor Trace document or declaration, identify all documents that pertain to the System Change Notes. Each submitted (Vol. 1, Sect. 1.1) Technical Data Package document (Vol.2 Sect. 6.6) is reviewed (Vol. 1, Sect. 1.6.2.2).

Note about revisions: The first time a review form is completed, the form revision number is 01. As the review process continues, newer versions of vendor documents, or additional documents, will be submitted to close discrepancies. Each time new versions of documents are examined, the review form is saved with a new revision number. Save the form with the new revision (Save As) before you update the document names, versions and/or file names. Enter Reviewer name and date on the new revision.

Applicable TDP Documents table: List each applicable TDP document. Put the Title from inside the document in the first column, along with the version and date. Under "File name," copy the full document file name.

Trace Table: Verify whether the vendor correctly documented each applicable VVSG requirement listed in this template. Use the following notations to indicate results:

- **Traced** column: For each positive finding, enter the document number(s) corresponding to the **Applicable TDP Documents** Table below, with the section number(s) in each applicable document where the requirement is fulfilled. (Example: Doc. 2, Sec. 1.2)
- **Y, N, NT or NS** (Findings) column:
 - "Y" indicates that the document(s) fulfill the requirement.
 - "N" indicates that the document(s) do not fulfill the requirement.
 - "NT" (not tested) indicates requirements that are applicable to the system configuration but outside the scope of this certification review effort (only for a partial or delta cert).
 - "NS" (not supported) indicates requirements that apply to features that are not supported in the configuration being tested (such as paper ballots).
- **Comments** column
 - Explain "N", "NT" or "NS" findings here.
 - In addition, use the Comments column to enter any comments that would be helpful throughout the project.
 - **Discrepancies:**
 - List discrepancies in red
 - A Documentation discrepancy is written when a VVSG requirement is not fulfilled or is partially fulfilled in the TDP.
 - An Informational discrepancy is written when the issue is outside the scope of the certification; Informational discrepancies are provided to the client but do not preclude certification.
 - Enter the discrepancy number of any discrepancies written (from the separate discrepancy report), with a short description in the Comments column.

Trace Table

Req #	VVSG 2005 – Vol. 2 unless otherwise specified	Traced	Y, N, NT or NS	Comments
2	Technical Data Package			
2.1	Scope			
2.1.1	Content and Format			
2.1.1.1	Required Content for Initial Certification (<i>Indicate “**” if this document does not fall into the identified category of documentation.</i>)			
i.	At minimum, the TDP shall contain the following documentation: System change notes.			Not reviewed. No substantive changes from EAC certified EVS 5220 documentation
2.1.1.2	Required Content for System Changes and Re-certification			
	For systems seeking re-certification, vendors shall submit System Change Notes as described in Section 2.13, as well as current versions of all documents that have been updated to reflect system changes.			Not reviewed. No substantive changes from EAC certified EVS 5220 documentation
	Vendors may also submit other information relevant to the evaluation of the system, such as test documentation, and records of the system's performance history, failure analysis and corrective actions.			Not reviewed. No substantive changes from EAC certified EVS 5220 documentation
2.1.1.3	Format			
	The requirements for formatting the TDP are general in nature; specific format details are of the vendor's choosing. The TDP shall include a detailed table of contents for the required documents, an abstract of each document and a listing of each of the informational sections and appendices presented. A cross-index shall be provided indicating the portions of the documents that are responsive to documentation requirements for any item presented.			Not reviewed. No substantive changes from EAC certified EVS 5220 documentation

Req #	VVSG 2005 – Vol. 2 unless otherwise specified	Traced	Y, N, NT or NS	Comments
2.1.3	Protection of Proprietary Information			
	The vendor shall identify all documents, or portions of documents, containing proprietary information not approved for public release. Any person or test agency receiving proprietary information shall agree to use it solely for the purpose of analyzing and testing the system, and shall agree to refrain from otherwise using the proprietary information or disclosing it to any other person or agency without the prior written consent of the vendor, unless disclosure is legally compelled.			Not reviewed. No substantive changes from EAC certified EVS 5220 documentation
2.13	System Change Notes			
	Vendors submitting modifications for a system that has been tested previously and received national certification shall submit system change notes. These will be used by the accredited test lab to assist in developing and executing the test plan for the modified system.	See Below	Y	
a.	The system change notes shall include the following information: Summary description of the nature and scope of the changes, and reasons for each changes;	Doc #1, sec 1.0 ExpressVote	Y	
b.	The system change notes shall include the following information: A listing of the specific changes made, citing the specific system configuration items changed and providing detailed references to the documentation sections changed;	Doc #1, sec 1. Introduction	Y	
c.	The system change notes shall include the following information: The specific sections of the documentation that are changed (or completely revised documents, if more suitable to address a large number of changes).	Doc #1, sec 1. Introduction	Y	
d.	The system change notes shall include the following information: Documentation of the test plan and procedures executed by the vendor for testing the individual changes and the system as a whole, and records of test results.		Y	ES&S Provided Certification Test Cases separately (TDP section 05_SYSTEM TEST AND VERIFICATION\02_Cert Test Cases)
