- 8. **Brief Description of System or system modification:**

Modification - ES&S Voting System 6.0.4.3 (EVS6043) is a modification to the ES&S Voting System 6.0.4.0 (EVS6040) previously certified by the EAC on May 3, 2019.

ES&S Voting System 6.0.4.3 (EVS6043) presents a fully integrated suite of election management products that fully comply with the EAC Voluntary Voting System Guidelines, Version 1.0. This release adds new card eject options to ExpressVote® Universal Voting System HW2.1. Election officials now have the option to require the ExpressVote Tabulator to front eject the printed vote summary card to allow voters to review their selections before casting their vote. Electionware® has been updated with options to configure this card eject setting.
