## ELECTION DEFINITION: GEN-01

### General Election: GEN-01

A basic election held in 4 precincts one of which is a split precinct. This election contains 19 contests compiled into 4 ballot styles. 5 of the contests are in all 4 ballot styles. The other 15 contests are split between at least 2 of the precincts with a maximum of 4 different contest spread across the 4 precincts. The voting variations supported by this election are as follows:

- Closed Primary: No
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: Yes
- Cross-party endorsement: No
- Split Precincts: Yes
- Vote for N of M: Yes
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: Yes
- Early Voting: No

This election was designed to functionally test the handling of multiple ballot styles, support for at least two languages, support for common voting variations, and audio support for at least two languages. Test Pattern 8 was chosen for audio input in an alternative language because it is a basic voting pattern using an ADA device. Test pattern 9 was chosen for audio input to demonstrate support for write-in voting using an ADA device. Test Pattern 3 was chosen for Spanish language input because it is a basic vote pattern using Spanish. Test Pattern 10 was chosen for Spanish language input because it exercises write-in using Spanish.

### Configuration

**EMS computer is used to create ballots with the following characteristics:**

**General Election named:** GEN-01 General Election

**ELECTION DEFINITION: GEN-01**

**Precinct Based Testing**

**Criteria For Evaluation of Test Results:**

The results of this test will be accepted if the stated election definition can be input into the EMS, the election transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results. During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

## ELECTION DEFINITION: GEN-02

### General Election

A basic election held in 3 precincts. This election contains 14 contests compiled into 3 ballot styles. 9 of the contests are in all 3 ballot styles with the other five split across the 3 precincts. The voting variations supported by this election are as follows:

- Closed Primary: No
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: Yes
- Straight Party voting: No
- Cross-party endorsement: No
- Split Precincts: No
- Vote for N of M: Yes
- Recall issues, with options: Yes
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: No
- Early Voting: Yes

This election was designed to functionally test the handling of multiple ballot styles, support for ballot rotation, support for two languages, support for complex voting variations, and audio support for multiple languages. The election will be an early voting election with at least one machine running all precincts. Voting options for Over-voting and Under-voting will be exercised. Ballots 7 and 16 were selected for Spanish based language input. Ballots 13 and 17 were selected for casting of ballot using the ADA Audio capability.

**Criteria For Evaluation of Test Results:**

The results of this test will be accepted if the stated election definition can be input into the EMS, the election transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results. During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

## ELECTION DEFINITION: GEN-03

### General Election

A basic election held in 2 precincts. This election contains 8 contests and compiled into 2 ballot styles. 4 of the contests are in both ballot styles. The other 4 contests are split between the two precincts. The voting variations supported by this election are as follows:

- Closed Primary: No
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: No
- Cross-party endorsement: No
- Split Precincts: No
- Vote for N of M: No
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: Yes
- Early Voting: No

This election was designed to functionally test the handling of multiple ballot styles, support for at least three languages including a character-based language, support for common voting variations, and audio support for at least three languages and an ADA binary input device. Test patterns 3 and 4 were chosen for input in the Spanish language because they are a basic voting pattern with a write-in. Test patterns 5 and 6 were chosen for audio input using the Spanish language to demonstrate support for write-in voting using an ADA device with and alternative language. Test pattern 7 was chosen for character-based language input because it is a basic vote pattern using Chinese. Test pattern 8 was chosen for character-based language using an ADA device to demonstrate support for character-based ADA device support. Test pattern 9 was chosen for binary input to show support for ADA binary input device. Test pattern 10 was chosen for binary input using ADA audio deceive to show support for binary input and ADA support.

During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

## ELECTION DEFINITION:PRIM-01

### Primary Election: PRIM-01

A closed primary election in 2 precincts. This election contains 30 contests compiled into 5 ballot styles. Each ballot style contains 6 contests. The voting variations supported by this election are as follows:

- Closed Primary: Yes
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: No
- Cross-party endorsement: No
- Split Precincts: No
- Vote for N of M: Yes
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: Yes
- Early Voting: No

This election designed to functionally test an open primary with multiple ballot styles, support for two languages, and support for common voting variations. Test patterns 5 and 18 are input in an alternative language. Test patterns 8 and 18 are input using an ADA audio device. These patterns were select to exercise the write-in functionality in a primary election.

## ELECTION DEFINITION: PRIM-01

### Criteria For Evaluation of Test Results:

The results of this test will be accepted if the stated election definition can be input into the EMS, the election transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results. During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

## ELECTION DEFINITION: PRIM-03

### Primary Election

A basic election held in 2 precincts. This election contains 10 contests and is compiled into 2 ballot styles. 2 of the contests are in both ballot styles. The other 8 contests are split between the two parties' ballots. The voting variations supported by this election are as follows:

- Closed Primary: Yes
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: No
- Cross-party endorsement: No
- Split Precincts: No
- Vote for N of M: No
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: Yes
- Early Voting: No

This election was designed to functionally test the handling of multiple ballot styles, support for at least three languages including a Ideographic based language, support for common voting variations, and audio support for at least three languages and a ADA binary input device. Test patterns 3 and 4 were chosen for input in the Spanish language because it is a basic voting pattern with a write-in. Test patterns 5 and 6 were chosen for audio input using the Spanish language to demonstrate support for write-in voting using an ADA device with and alternative language. Test pattern 7 was

**ELECTION DEFINITION: PRIM-03**

chosen for Ideographic based language input because it is a basic vote pattern using Chinese. Test pattern 8 was chosen for character based language using an ADA device to demonstrate support for Ideographic based ADA device support. Test pattern 9 was chosen for binary input to show support for ADA binary input device. Test pattern 10 was chosen for binary input using ADA audio deceive to show support for binary input and ADA support.

**Configuration:**

**EMS computer is used to create ballots with the following characteristics:**

**General Election named:** PRIM-03 Primary Election

**Precinct Based Testing**

**1 machine used for each precinct**

**2 precincts:** Middleton Community Center, First Baptist Church

**2 parties:** Democrat, Republican

**Languages:** English, Spanish, Chinese

**Contest Totals:** 8

**Contests as listed:**

Democratic Party Ballot	Republican Party Ballot
President of the United States  Anne Neet  Ben Baker	President of the United States  Andre Nina  Brent Gilley

**ELECTION DEFINITION: PRIM-03**

Write-In  Vote for 1	Write-In  Vote for 1

**Criteria For Evaluation of Test Results:**

The results of this test will be accepted if the stated election definition can be input into the EMS, the election transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results. During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

## ELECTION DEFINITION: MaximumCandidates

### Volume and Stress

#### Overview

This election will exercise 462 ballot positions across 2 contests to investigate the system's response to process, store, and report data when the maximum allowable candidate positions are present on the ballot. The election will subject the ICE and ICP tabulators, and the ICC system, to ballot processing at the high volume rates to evaluate software response to hardware-generated interrupts and wait states.

#### Elections/Ballots

This election was created by Dominion. The pre-filled ballots were provided on 22 inch card stock by Dominion, along with the election results.

#### Test Decks

Two test decks containing 480 ballots (240 ballots per Ballot style) will be marked in a matrix pattern. The Test Decks will be cast 5 times on each tabulator (ICE and ICP) to produce 4800 cast ballots. Additionally, the test decks will be fed into the Central Count System 25 times to produce 12000 scanned ballots. The total ballots processed for this election will be 16800.

**Equipment:** (1) ICE unit, (1) ICP unit, (1) ICC system

### Configuration

**EMS computer is used to create ballots with the following characteristics:**

**Election named:** : MaximumCandidates

#### Precinct Based Testing

**ELECTION DEFINITION: MaximumCandidates**

**2 machines (ICE and ICP) used for voting in 2 precincts**

**Candidates:** 462 ballot positions X2 = 924

**Number times votes per tabulator:** 5X

**Central Count Testing**

**1 machines used for voting in 2 precincts**

**Candidates:** 462 ballot positions X2 = 924

**Number times votes per tabulator:** 25X

**Languages:** English

**Contests as listed:** Candidacy 1(vote for 30) and Candidacy 2 (vote for 10)

**ELECTION DEFINITION: MaximumCandidates**

Gina Sheppard (Libertarian Party)	20
Total Votes	4620

**Total Ballots presented:** 480

**Total Votes:** 9240

**Error Handling:** Throughout the duration of the test, attention will be paid to any errors that occur. The error handling abilities of the voting system will be evaluated and documented if any such instances occur. The audit logs will be inspected to assess the error handling abilities of the system in any such situation throughout the duration of the test.

**Test Deck Pattern:**

Ballot marking completed by Dominion in a pre-determined pattern at the 50% threshold value. Candidacy 1 contest is vote for 30, and Candidacy 2 contest is vote for 10.

**Criteria For Evaluation of Test Results:** Vote the total amounts of ballots described in this definition and report the totals as described.

## ELECTION DEFINITION: MaximumContests

### Volume and Stress

#### Overview

This election will exercise 462 ballot positions across 2 contests to investigate the system's response to process, store, and report data when the maximum allowable candidate positions are present on the ballot. The election will subject the ICE and ICP tabulators, and the ICC system, to ballot processing at the high volume rates to evaluate software response to hardware-generated interrupts and wait states.

#### Elections/Ballots

This election was created by Dominion. The pre-filled ballots were provided on 22 inch card stock by Dominion, along with the election results.

#### Test Decks

Two test decks containing 400 ballots (200 ballots per Ballot style) will be marked in a matrix pattern. The Test Decks will be cast 5 times on each tabulator (ICE and ICP) to produce 4000 cast ballots. Additionally, the test decks will be fed into the Central Count System 25 times to produce 10000 scanned ballots. The total ballots processed for this election will be 14000.

**Equipment:** (1) ICE unit, (1) ICP unit, (1) ICC system

### Configuration

**EMS computer is used to create ballots with the following characteristics:**

**Election named:** : MaximumContests

#### Precinct Based Testing

**ELECTION DEFINITION: MaximumContests**

**2 machines (ICE and ICP) used for voting in 2 precincts**

**Contests:** 156 contests X2 = 312

**Number times votes per tabulator:** 5X

**Central Count Testing**

**1 machines used for voting in 2 precincts**

**Contests:** 156 X 25 = 3900

**Number times votes per tabulator:** 25X

**Languages:** English

**Contests as listed:** Contests 1-156

**Error Handling:** Throughout the duration of the test attention will be paid to any errors that occur. The error handling abilities of the voting system will be evaluated and documented if any such instances occur. The audit logs will be inspected to assess the error handling abilities of the system in any such situation throughout the duration of the test.

**Test Deck Pattern:**

Ballot marking completed by Dominion in a pre-determined pattern at the 50% threshold value. Each contest presented is Vote for 1.

**Criteria For Evaluation of Test Results:** Vote the total amounts of ballots described in this definition and report the totals as described.

## ELECTION DEFINITION: System Limits

### Volume and Stress

#### Overview

This election will exercise a total of 10 Tabulators, 1000 Precincts, and 4 Electoral Districts (ED). The 10 tabulators will consist of 100 Precincts and 400 Contests, with each contest containing 10 choices. The purpose is to investigate the system's response to process, store, and report data when the maximum allowable Precincts are present on the ballot. The election will subject the ICC, ICE and ICP to ballot processing at the high volume rates to evaluate software response to hardware-generated interrupts and wait states.

#### Elections/Ballots

This election was created by Dominion. The pre-filled ballots were provided on 22 inch card stock by Dominion. Election results were ascertained by processing the ballots on the ICC system.

#### Test Decks

Ten test decks containing 400 ballots each will be marked by Dominion in a pre-determined pattern. The test decks will be cast 1 time on each tabulator/system.

**Equipment:** (1) ICE unit, (1) ICP unit, (1) ICC system

### Configuration

**EMS computer is used to create ballots with the following characteristics:**

**Election named:** : System Limits Portrait

## ELECTION DEFINITION: System Limits

### Precinct Based Testing

**2 machines (ICE and ICP) used for voting in 1000 precincts**

**Candidates:** 40,000 X2 = 80,000

**Number times votes per tabulator:** 1X

### Central Count Testing

**1 machines used for voting in 1000 precincts**

**Candidates:** 40,000

**Number times votes per tabulator:** 1X

**Languages:** English

**Contests as listed:** Refer to the following files found in the Election Definition folder for each tabulator located at  
\T57381\Functional\Functional Testing\Volume and Stress

**ELECTION DEFINITION: System Limits**

System Limits 10 - Precincts 901-1000 Election Results.txt

**Voting Devices Used:** (1) ICE unit, (1) ICP unit, (1) ICC system

**Total votes for 1 cast run:** 1 vote per contest

(Refer to files listed above for totals)

**Total Ballots presented:** 12,000

**Total Votes:** 1,600,000

**Error Handling:** Throughout the duration of the test, attention will be paid to any errors that occur. The error handling abilities of the voting system will be evaluated and documented if any such instances occur. The audit logs will be inspected to assess the error handling abilities of the system in any such situation throughout the duration of the test.

**Test Deck Pattern:**

Ballot marking completed by Dominion in a pre-determined pattern. Each contest is Vote for 1.

**Criteria For Evaluation of Test Results:** Vote the total amount of ballots described in this definition and report the totals as described.

**ELECTION DEFINITION: ICE Accuracy Test 11 inch**

**Accuracy Testing:**

This test will exercise both odd and even marked voting positions for this ballot. There are multiple ballot positions depending on which size ballot is utilized. Dominion will provide professional ballots on 11 in. (198 positions), 14 in (270 positions), 17 in (342 positions), 20 in (414 positions), and 22 in (462 positions) card stock in which 20% will be marked by Dominion to their stated marked threshold of 50% and the remaining 80% of ballots will be hand marked with the pre-determined voting pattern.

**Equipment:** 2 ICE 400A Units

**Configuration**

**EMS computer is used to create ballots with the following characteristics:**

**Election named:** : Accuracy Test EAC

**Precinct Based Testing**

**2 machines used for voting in 5 precincts**

**Candidates:** 99 per side for a total of 198 ballot positions

**Languages:** English

Candidate 1

*through*

Candidate 99

**Contest – 11B**

Candidate 1

*through*

Candidate 99

**Vote For 51**

**Voting Devices Used:**

ICE precinct tabulation device

**ELECTION DEFINITION: ICE Accuracy Test 11 inch**

**Test Deck Pattern:**

The Test Decks will consist of 50 marked ballots for each precinct in which 20% will be marked by the vendor and the remaining 80% will be hand marked by the VSTL. The voting pattern will consist of Column 1 and 3 having the odd position selected, and Column 2 having the even candidates selected. This pattern will be maintained for both sides of the ballot for the duration of testing. There will be a total of 5 ballot lengths (11, 14, 17, 20, 22) in which each test deck will be run 9 times per the 2 ICE machines rotating the orientation on each deck cycle. The 4 orientations will be cycled for the duration of the accuracy test. The combined ballots cast for this accuracy test will total 1,558,980 ballot positions exercised for the test.

**TEST RESULTS**

**Total ballots cast = 50**

**Criteria For Evaluation of Test Results:** The results for this test will be accepted if no anomalies are recorded during the test execution and the results match the expected results for the test pattern.

**ELECTION DEFINITION: ICE Accuracy Test 17 inch**

**Accuracy Testing:**

This test will exercise both odd and even marked voting positions for this ballot. There are multiple ballot positions depending on which size ballot is utilized. Dominion will provide professional ballots on 11 in. (198 positions), 14 in (270 positions), 17 in (342 positions), 20 in (414 positions), and 22 in (462 positions) card stock in which 20% will be marked by Dominion to their stated marked threshold of 50% and the remaining 80% of ballots will be hand marked with the pre-determined voting pattern.

**Equipment:** 2 ICE 400A Units

**Configuration**

**EMS computer is used to create ballots with the following characteristics:**

**Election named:** : Accuracy Test EAC

**Precinct Based Testing**

**2 machines used for voting in 5 precincts**

**Candidates:** 171 per side for a total of 342 ballot positions

**Languages:** English

**Contests as listed:**

Candidate 171

**Vote For 87**

**Voting Devices Used:**

ICE precinct tabulation device

**ELECTION DEFINITION: ICE Accuracy Test 17 inch**

**Test Deck Pattern:**

The Test Decks will consist of 50 marked ballots for each precinct in which 20% will be marked by the vendor and the remaining 80% will be hand marked by the VSTL. The voting pattern will consist of Column 1 and 3 having the odd position selected and Column 2 having the even candidates selected. This pattern will be maintained for both sides of the ballot for the duration of testing. There will be a total of 5 ballot lengths (11, 14, 17, 20, 22) in which each test deck will be run 9 times per ICE machine rotating the orientation on each deck cycle. The 4 orientations will be cycled for the duration of the accuracy test. The combined ballots cast for this accuracy test should total 1,558,980 ballot positions exercised for the duration of the test.

**TEST RESULTS**

**Total ballots cast = 50**

**Criteria For Evaluation of Test Results:** The results for this test will be accepted if no anomalies are recorded during the test execution and the results match the expected results for the test pattern.

**ELECTION DEFINITION: ICE Accuracy Test 22 inch**

**Accuracy Testing:**

This test will exercise both odd and even marked voting positions for this ballot. There are multiple ballot positions depending on which size ballot is utilized. Dominion will provide professional ballots on 11 in. (198 positions), 14 in (270 positions), 17 in (342 positions), 20 in (414 positions), and 22 in (462 positions) card stock in which 20% will be marked by Dominion to their stated marked threshold of 50% and the remaining 80% of ballots will be hand marked with the pre-determined voting pattern.

**Equipment:** 2 ICE 400A Units

**Configuration**

**EMS computer is used to create ballots with the following characteristics:**

**Election named:** : Accuracy Test EAC

**Precinct Based Testing**

**2 machines used for voting in 5 precincts**

**Candidates:** 231 per side for a total of 462 ballot positions

**Languages:** English

**Contests as listed:**

General Election

**ELECTION DEFINITION: ICE Accuracy Test 22 inch**

**Contest 22F**

**Contest 22B**

Candidate 1

*through*

Candidate 231

**Vote For 117**

**Voting Devices Used:**

ICE precinct tabulation device

**ELECTION DEFINITION: ICE Accuracy Test 22 inch**

**Test Deck Pattern:**

The Test Decks will consist of 50 marked ballots for precincts 1-4, and 55 marked ballots for precinct 5. The vendor will electronically mark 20% of each test deck to the 50% threshold, and the remaining 80% will be hand marked by the VSTL. The voting pattern will consist of Column 1 and 3 having the odd position selected and Column 2 having the even candidates selected. This pattern will be maintained for both sides of the ballot for the duration of testing. There will be a total of 5 ballot lengths (11, 14, 17, 20, 22) in which each test deck will be run 9 times per ICE machine rotating the orientation on each deck cycle. The 4 orientations will be cycled for the duration of the accuracy test. The combined ballots cast for this accuracy test should total 1,558,980 ballot positions exercised for the duration of the test.

**TEST RESULTS**

**Total ballots cast = 55**

**Criteria For Evaluation of Test Results:** The results for this test will be accepted if no anomalies are recorded during the test execution and the results match the expected results for the test pattern.

## ELECTION DEFINITION: Accuracy Test ICE Audio

### Regression Testing:

This test will exercise the audio voting functions for the ICE unit by following the selected voting matrix. There are 10 possible voting positions per ballot. The ballot will be voted 400 times using the ATI. This election contains 2 contests compiled in 1 ballot style with 1 proposal.

- Closed Primary: No
- Open Primary: No
- Partisan offices: No
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: No
- Cross-party endorsement: No
- Split Precincts: No
- Vote for N of M: No
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: No
- Early Voting: No

**Equipment:** 2 ICE 400A Unit, 1 Security Token

### Configuration

**EMS computer is used to create ballots with the following characteristics:**

**Election named:** : Accuracy Test ICE DRE

### Precinct Based Testing

**2 machine used for voting in 1 precinct**

**ELECTION DEFINITION: Accuracy Test ICE Audio**

**1precinct:** Huntsville

No
Vote for 1
<b>Referendum A</b>
<b>Bond Issue</b>
To promote and assure the preservation and improvement of essential rail passenger and freight services to the inhabitants of the state, shall section two of chapter one hundred eighteen of the laws of nineteen hundred seventy-four, authorizing the creation of a state debt in the amount of two hundred fifty million dollars for capital facilities be approved?
Yes
No
Vote for 1

**Voting Devices Used:**

ICP precinct tabulation device

## ELECTION DEFINITION: Accuracy Test

### Test Deck Pattern:

The Test Deck will consist of 44 hand marked ballots for each precinct. The voting pattern will consist of a matrix pattern and three exception votes handled by the tabulators. The test decks will be voted 85 times rotating the orientation on each deck cycle. The 4 orientations will be cycled for the duration of the accuracy test.

A) Under vote the straight party selections, vote for each candidate in each party per race and select the corresponding to Non Partisan ballot position in each Non Partisan race. Vote the "State University Trustee" race by selecting the corresponding five candidates to the ballot position of the other races. After the last candidate has been chosen in race 5 select all written in choices for ballots 6-8. Vote "Yes" for each proposal on the first ballot, vote "No" for the second ballot and vote Yes for the remaining ballots 3-8. Each candidate should have the number of ballots corresponding to their position on the ballot: First candidate- 1 ballot, Second candidate – 2 ballots, Third candidate – 3 ballots and continue the pattern for all 8 candidates. B) Vote the American Straight party candidate and under vote all other races on the ballot. Repeat this pattern voting the next Straight party and under voting all other races on the ballot. Continue this pattern until all 8 Straight part contests have been voted while under voting the remaining races on each ballot.

**Criteria For Evaluation of Test Results:** The results for this test will be accepted if no anomalies are recorded during the test execution and the results match the expected results for the test pattern.

### **ELECTION DEFINITION: ATI Regression Test**

A basic election held in 4 precincts one of which is a split precinct. This election contains 19 contests compiled into 4 ballot styles. 5 of the contests are in all 4 ballot styles. The other 15 contests are split between at least 2 of the precincts with a maximum of 4 different contest spread across the 4 precincts. The voting variations supported by this election are as follows:

- Closed Primary: No
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: Yes
- Cross-party endorsement: No
- Split Precincts: Yes
- Vote for N of M: Yes
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: Yes
- Early Voting: No

The purpose of this election is to test the functionality of the ATI with upgraded firmware. This fix addresses issues associated with using the ATI in conjunction with binary input devices (Sip and Puff, Foot Pedals). The processing of ballots includes 20 ballots voted using the ATI handheld device, 10 ballots voted using the Sip and Puff device, and 20 ballots voted using the Foot Pedals. No alternative languages will be used during this test.

#### **Configuration**

**EMS computer is used to create ballots with the following characteristics:**

**General Election named:** GEN-01 General Election

#### **Precinct Based Testing**

**ELECTION DEFINITION: ATI Regression Test**

**2 machines used for all precincts**

**4 precincts:** Precinct 1, Precinct 2a, Precinct 2b, Precinct 3

**3 parties:** Democrat, Libertarian, Republican

**Languages:** English, Spanish

**Contest Totals:** 19

**Equipment:** 1 ICE, 1 ICP

**Contests as listed:**

**Criteria For Evaluation of Test Results:**

The results of this test will be accepted if the stated election definition can be input into the EMS, the election transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results. During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.
