

March 13, 2014

Ms. Jessica Myers
EAC Project Manager for Verity 1.0
US Election Assistance Commission
1201 New York Avenue NW, Suite 300
Washington, DC 20005

Ms. Myers:

Hart InterCivic hereby makes a request to your office for an update to the Verity Voting version 1.0 Application for System Testing. The Verity 1.0 components that will be included in the initial system certification include:

- Verity Scan – Digital ballot scanning device
- Verity Touch Writer – Ballot marking device
- Verity Build – Election definition application
- Verity Central – Central office scanning application
- Verity Count – Central office tabulation & reporting application

Hart plans to apply for EAC certification of additional Verity components in the future.

This modification to the Verity Voting 1.0 application, Verity System Description, provides alignment to the Verity 1.0 Technical Data Package. Hart InterCivic thanks you for considering this request.

Best Regards,
Tom W. Farley

Tom Farley

Sr. Systems Engineer
